CHAPTER IX.

DIGEST OF THE LAWS REGULATING THE ADMINISTRATION, CHARACTER, AND FINANCES OF THE PUBLIC-SCHOOL SYSTEMS OF THE STATES OF THE UNION.[1]

The following epitome deals primarily with the pedagogical as distinguished from the political features of the school law of the several States. These States—outside the fact of the duty of the federated nation to guarantee a republican form of government to each and the consequent desirability of a system of public education to accomplish that and the homogeneity of national intellectual interests—are each, as should be well known, an autonomous government in matters pertaining to education.

This chapter is to be considered a continuation of that[2] on the educational provisions of the constitutions of the States appearing in the last report. Matters there appearing as broadly blocked out by the electors are here collected under certain pedagogical heads as elaborated by the several legislatures and published throughout the extent of some 4,000 pages, each State arranging and classifying its laws to suit its own convenience. The method of treating each State uniformly employed in this digest not only concentrates the facts, but at the same time, in a measure, indexes them. In the next report, in addition to the inevitable annual revision, it is hoped to lay the final chapter of this series before the public.

In considering the general character of the school laws of the States, one is impressed that there is a certain apparent if not real distinction between the varying emphasis that has been placed on the same subject. In the manufacturing East, northeast of Pennsylvania at least, there has lately been developed an intense desire to operate effectively upon the parent to cause him to educate his child; in other words, to cause him to avail himself for the good of the child of the advantages offered by the public schools at least for a short period during the year. In the South, the preoccupation seems to have been to provide competent teachers, while in the West there has been a tendency to regulate the politico-educational machinery.

It has been deemed inexpedient to attempt in this compilation to show clearly the condition of a very important and much agitated feature of the social side of school affairs called the township system. An examination of the claims for this system reveals that its merits are conditioned by the character of the environment amidst which it is to be operated. The question does not appear to derive its vitality from the extent of territory embraced by the "township," but rather from the amount of taxable property within a given territory, and perhaps at bottom upon the marked inequalities of taxable property between different portions of that territory. Thus in a rich country of many concentrations of inhabitants a plan might operate excellently within a portion of a county which, among a poorer, less dense, and comparatively more evenly distributed population, might not avail, even though the whole county were to be included. In the latter case a true township system would embrace perhaps the whole educational jurisdiction—in other words, the State. This sort of township system is in Massachu-

[1] By Mr. Wellford Addis, specialist in the Bureau.

27377

setts at a minimum, for the interest of the permanent and only fund which it distributes is "not intended to relieve the towns from the support of their schools," but by furnishing money to the towns not obtained from them by annual taxation it "enables the State to execute the school laws and to establish a uniform system of schools"[1] by withholding a subsidy from noncompliant school communities. It is hoped that the investigation of this and other characteristics of the local unit in school affairs is sufficiently advanced to enable it to appear in the next report of this Bureau.

It is to be remarked in passing, however, that there is a grave difference between local option in taxation, the point of view above, and enforced taxation, between allowing the smallest unit of civil government known to our political system to tax itself and causing it to be taxed to the township or "equable" limit by uniting it to its present neighbors by a State law, and thus possibly beyond what in the past either prudence or indifference caused it to fix.[2] The "district school meeting" is probably the only body of citizens that legislates directly, and where, to get the necessary amount of material to elevate a township system, it will be necessary to cover a civil unit, as a county, for instance, that legislature will cease to exist and its members will be "represented," thus getting school affairs away from the people, to which now it is so near, a fact dreaded by those who otherwise see in the State the proper "township" system. There would seem to be no cause for overgreat alarm at the lack of high schools, superintendents, and well-appointed schoolhouses in the agricultural districts. There are evidences that the legislature here and there has endeavored to limit the excessive desire of some school communities to hypothecate the property of its citizens by the force of numbers for the purpose of building schoolhouses, and districts are allowed to unite or to increase their boundaries for the purpose of bettering their facilities for instruction or for establishing high schools or securing a more local supervision than is given by the county superintendent. Such provisions as these have a natural outgrowth into a township system adapted to the local society among which it has been bred. So far as this question is an effort to coerce seemingly recalcitrant communities to tax themselves, or, on the other hand, to coerce richer school communities to "equably" distribute their greater revenues, though derived from a lower rate per cent, among their poorer neighbors (if the wealth of the "township" is unequally distributed), the question is political quite as much as pedagogical.[3] As to the purely administrative side of the question,

[1] Massachusetts school laws, 1892, remarks, page 25.

[2] Due consideration being given to what is said about "unequable" distribution of taxable property.

[3] *Value per capita of real and personal property as assessed for taxation, and density of population (number to the square mile).*

	Per capita value of real and personal property.	Population per square mile.
The United States	$4.07	
North Atlantic Division	6.27	107
South Atlantic Division	2.55	33
South Central Division	2.33	19
North Central Division	3.43	30
Western Division	6.87	3

In Maine, New Hampshire, and Vermont the number of persons to a square mile is, respectively, 22, 42, and 36; on the other hand, the very large negro population south of the Potomac and the Ohio may be considered as cutting down the square-mile population from one-third to over one-half, inasmuch as the races must be educated apart. The fact that there are numerous concentrations of population in cities and towns in the North Atlantic Division may make for or against the "township" system as one considers them as reducing the agricultural population in the townships or as increasing their wealth by propinquity.

such especially in regard to the exceeding multiplication of petty political officers, such as treasurer and secretary of a school board, and their fees, it is possible to think that though the district school meeting and board may remain, the numerous hands through which the district money passes may be made fewer.

[States following in order of geographical divisions as given in the statistical summaries of these volumes.]

MAINE.

1. Organization of the System.

State superintendent.—Town[ship] [1] *superintending school committees or a supervisor.—Truant officers.*

State superintendent.—The governor, with the advice and consent of the council, shall appoint a State superintendent of common schools, whose term of office is for three years or during the pleasure of the executive; vacancies to be filled by a new appointment for like term. His office is at the seat of government, where all reports, maps, plans of buildings, models, and other articles of interest to school officers and teachers as may be procured without expense to the State are to be preserved. His duties are:

I. To exercise a general supervision of all the public schools, and to advise and direct the town committees in the discharge of their duties, by circular, letters, and personal conference, devoting all his time to the duties of his office.

II. To obtain information as to the school systems of other States and countries and the condition and progress of common school education throughout the world, to disseminate this information, with such practical hints upon the conduct of schools and the true theory of education as observation and investigation convince him to be important, by public addresses, circulars, and articles prepared for the press, and to do all in his power to awaken and sustain an interest in education among the people, and to stimulate teachers to well-directed efforts in their work.

III. To take such measures as he deems necessary to secure the holding of a State educational convention once each year for consultation in reference to the interest of common schools and the most approved methods of instruction.

IV. If sufficient encouragement is afforded by citizens, to hold in each county once a year a public meeting or institute for teachers and educators.

V. To prepare and cause to be printed and distributed such portions of the proceedings of State institutes or teachers' conventions as he deems important in the furtherance of education.

VI. To prescribe the studies to be taught in the common schools, reserving to town committees the right to prescribe additional studies.

VII. Annually to report to the governor and council the result of his inquiries and investigations and the facts obtained from the school returns, with such suggestions and recommendations as in his judgment would best promote the improvement of the common schools.

VIII. Biennially, as soon as practicable after the adjournment of the legislature, to compile and have printed in pamphlet form 3,000 copies of the amended school law of the State and distribute the same to the municipal and school officers of the several towns.

IX. To prepare and issue, biennially, such circulars of information and advice to school officers, relating to new school enactments, as he deems necessary for the intelligent and effectual enforcement of such enactments.

X. To prepare and have printed forms for all returns required by law or deemed by him necessary, and shall on the 1st day of each March forward to town clerks blanks for the annual school return and registers for the school year commencing on the 1st day of April following; and the town clerk shall forthwith deliver these blanks to the school committee of the town. In case he shall fail to receive during May the return from a town, he shall on the 1st day of June notify its school committee of the fact.

XI. To furnish the State treasurer on the 1st day of July the number of children between 4 and 21 years of age in the towns from which returns are received.

Superintending school committee (or supervisor).—Every town shall choose by ballot at its annual meeting a superintending school committee of three, as provided below, and shall fill vacancies arising therein at each subsequent annual meeting, or shall, in the same manner, choose a supervisor of schools who shall perform the duties of said committee; and his election shall terminate the office

[1] A New England "town" is not necessarily a collection of houses, but a well defined and represented political entity. It is not a mere municipal organization, nor yet a block of land containing 36 square miles, as the "Congressional township" of the West and the newer States of the South.

of all members of such committee. Women are eligible to these positions. School committeemen or the supervisor shall be sworn. At their first meeting school committees shall designate by lot one of their number to hold office three years and another two years, the remaining member retiring after one year's service, and each member elected to fill these vacancies as they occur shall hold office for three years. Vacancies caused by death, resignation, etc., are to be filled by the board, the appointee to hold until the next annual town meeting. Two members constitute a quorum, and if there is but one member he may fill vacancies: *Provided*, That if the one thus remaining in office declines or neglects to fill vacancies the municipal officers shall fill the same; and they shall fill all vacancies arising in the office of supervisor until the next annual election. The duties of the superintending school committees (and supervisor) shall be:

I. They shall appoint suitable times and places for the examination of candidates proposing to teach within their jurisdiction, and shall post notice of the same in two or more public places within the town at least three weeks before the date appointed, or publish the facts in one or more newspapers having the largest circulation in the county. They shall employ teachers for the several districts in the town.

II. On satisfactory evidence that a candidate possesses good moral character and a temper and disposition suitable to be an instructor of youth, they shall examine the person applying in reading, spelling, English grammar, geography, history, arithmetic, bookkeeping, physiology, the elements of the natural sciences, especially as applied to agriculture, and such other branches as they desire to introduce into public schools, and particularly into the school for which he is examined; also as to his capacity for the government thereof.

III. They shall give to each candidate found competent a certificate that he is qualified to govern a school and instruct in the branches required, or they may validify by indorsement any graded certificate issued to teachers by normal-school principals, county supervisors, or the State superintendent.

IV. They shall direct the general course of instruction and select a uniform system of text-books, of which due notice shall be given. No text-book may be changed during five years from the date of its adoption, unless by a vote of the town. Any person violating this provision shall forfeit not exceeding $500, to be recovered in an action of debt by any school officer or person aggrieved. When the committee make a selection of school books, they shall contract with the publishers for the purchase and delivery thereof, and make such rules as they deem effectual for their preservation and return. [See also under "Schools—Text-books."]

V. They shall examine the schools and inquire into the regulations and discipline thereof and the proficiency of the scholars, for which purpose one or more of the committee shall visit each school at least twice in summer and twice in winter, and use their influence to secure regular attendance of the youth of the town.

VI. After due notice and investigation they shall dismiss any teacher, although having the requisite certificate, who proves unfit to teach, or whose services they deem unprofitable to the school, and give to the person thus dismissed a certificate of dismissal and the reasons therefor, a copy of which they shall retain, which shall not deprive the recipient of compensation for past service.

VII. They shall expel any obstinately disobedient and disorderly scholar, after a proper investigation of his behavior, if found necessary for the peace and usefulness of the school, and restore him on satisfactory evidence of his repentance and amendment.

VIII. They may exclude any person not vaccinated.

IX. They shall determine what description of scholars shall attend each school, classify them, and transfer them from school to school.

X. They shall make a written report of the condition of the schools for the past year, the proficiency of the methods of instruction and government, and shall transmit a copy of the same to the State superintendent. They shall also make a statement annually showing the amount of money raised and expended for the support of schools, designating what part is raised by taxation and what from other sources, showing how such other sources of income accrued, the number of children 4–21 within their town, the whole number corrected to April 1 preceding, and the average number of scholars attending the summer schools and the winter schools, also the total number of different scholars attending school two weeks or more of the preceding year as shall appear from the teachers' register, the average length of the summer schools and of the winter schools, in weeks (of five days each), and the average length of the schools for the year, the number of male and female teachers employed in the public schools during any part of the year, the wages of male teachers a month and of female teachers a week, exclusive of board.

Truant officers.—Cities and towns shall annually elect one or more persons, to be designated truant officers, who shall inquire into all cases of neglect of parents

to have their children attend school and report thereon to the superintending school committee. The truant officer shall, when so directed, prosecute in the name of the city or town any person liable to the penalty, as set forth under the heading, "Schools, age of attendance," below. It is his duty, when notified by the teacher that any pupil is irregular in attendance, to arrest and conduct the delinquent to school. He also is required to preserve the school property from defacement and the quiet of the session. Every city or town neglecting to elect truant officers, and truant officers neglecting to prosecute when directed, shall forfeit a sum not less than $10 nor more than $50 to the use of the local public schools. The compensation of the truant officers is fixed by the municipal officers.

2. Teachers.

Appointment and qualifications (see Organization, "Duties of superintending school committees").—Duties.—Meetings.—Preliminary training.

Duties.—Every teacher of a public school shall keep a register of the names of the pupils, their age, date of entering and leaving, days present, the length of school, the salary received, list of text-books used, and other facts required by the blank form furnished. This register is always open to the inspection of the school committee, and no teacher may receive pay for services until the register, properly filled, completed, and signed, is deposited with the school committee or a person designated by it. All professors and instructors of whatever grade in public or private institutions are enjoined to impress upon their pupils the principles of morality and justice, the love of truth, country, humanity, industry, and frugality as tending to preserve republican institutions and social and individual happiness, and public school teachers are required to consume not less than ten minutes each week in teaching to their pupils kindness to birds and other animals. Whoever teaches a public school without first obtaining a certificate from the school committee of the town forfeits an amount not exceeding the sum he contracted to receive for his service as well as his pay, but a town may, at a legal meeting, instruct its supervisor to teach and fix his compensation.

Meetings.—When not fewer than 30 of the teachers and school officers of a county shall have formed not more than two associations under rules of government approved by the State superintendent for the purpose of mutual improvement in the science and art of teaching and of creating popular interest in education by holding not more than two conventions every year under the supervision of the State superintendent, the State shall defray the necessary expenses, for which purpose the sum of $1,000 is set apart from the annual school fund of the State. Teachers of public schools are authorized, without loss of pay, to close their schools for not more than two days in the year during the session of such conventions within their counties.

Preliminary training of teachers.—The northern normal school at Farmington, the eastern normal school at Castine, and the western normal school at Gorham shall be conducted upon the principles herein set forth:

I. They shall be thoroughly devoted to the training of persons for teaching.

II. The course of study shall include the common English branches in thorough reviews and such of the higher branches as are especially adapted to prepare teachers to conduct the mental, moral, and physical education of their pupils.

III. The art of school management, including the best methods of government and instruction, shall have a prominent place in the daily exercise of these schools.

IV. While teaching the fundamental truths of Christianity, the schools are nonsectarian.

V. The principals shall register the attendance, the age of the pupils, the date of their admission and departure, etc., to be returned to the State superintendent by the 1st day of each December, and the information so furnished shall appear in his annual report.

The course of study shall occupy two years, with suitable vacations, and the terms of admission shall be arranged by the State superintendent, subject to the approval of the governor and council. The trustees may arrange for a course of three years for such students as may elect to pursue it. Graduates receive a diploma. Applicants for admission, if women, must be 16 years of age; but if men, 17 years. They must signify their intention to become teachers and obligate themselves to teach for one year in the State, or, if receiving a diploma, two years. Under these conditions tuition is free. The schools are under the direction of a board of trustees, consisting of seven persons, five of whom shall be appointed by the governor, with the advice and consent of the council, for not

more than three years under one appointment, the governor and the State superintendent being ex officio members. Each of the appointed trustees receives a mileage (10 cents) for each mile traveled, and $2 a day when employed.

3. Schools.

Attendance.—Character of instruction.—Text books.—Buildings.

Attendance.—Every person having under his control a child between the ages of 8 and 15 years shall annually cause such child to attend for at least sixteen weeks some public school, which time shall be divided, so far as the arrangement of school terms will allow, into two terms, each of eight consecutive weeks, and for every neglect of such duty the person offending shall forfeit a sum not exceeding $25 to the treasurer of the city or town for the use of its public schools. But if a child has elsewhere been furnished for a like period of time with the means of education equal to that taught in the common schools of the State, or if his physical or mental condition is such as to prevent attendance at school or application to study, such penalty shall not be incurred. Children living remote from any public school in the town in which they reside may be allowed to attend a public school in an adjoining town, the town in which the child resides making compensation to the town maintaining the school he attends. Every boy between the ages of 10 and 15 years who refuses to attend school as required and who may be found wandering about the streets, etc., while the school of which he is legally a scholar is in session, shall, on complaint of the truant officer, be committed to the State reform school, provided that due warning be given by the officer to the truant and those having control of him. Police and municipal courts and trial justices have jurisdiction of these offenses. Towns may make such by-laws, not conflicting with the law, concerning habitual truants and children between 6 and 17 years of age not attending school, without any regular and lawful occupation, and growing up in ignorance, as are most conducive to their welfare and the good order of society, and may annex a suitable penalty, not exceeding $20, for any breach thereof. But such by-laws must first be approved by a judge of the supreme judicial court.

Character of instruction.—For the subjects taught in public schools see under duties of "Superintending school committee" above; also under "Teachers." The State superintendent prescribes the necessary studies, but the town committee may add others.

Any city or town may annually make provision for free instruction in industrial or mechanical drawing to persons over 15 years of age, either in day or evening schools.

Cities and towns may raise and appropriate money for the support of evening schools; such schools shall admit persons of any age, but must limit their instruction to the elementary branches.

Any town, or two or more adjoining towns, may establish and maintain not more than two high schools. The course of study in the free high schools shall embrace the ordinary English academic studies, especially the natural sciences in their application to mechanics, manufactures, and agriculture; but the ancient or modern languages and music shall not be taught except by direction of the superintending school committee. Such schools shall be open to the youth of the town, or union of towns, having the requisite literary qualifications, and shall be subject to the laws governing the public schools. When two or more towns unite in establishing a free high school the two school committees shall form a board of management. Any town may from year to year authorize its school committee to contract with the trustees of any academy to instruct resident scholars in the town free of charge.

Text-books.—See also under "Duties of superintending school committees" above.

Towns shall provide schoolbooks for the use of the pupils in their public schools at the public expense. School committees shall make rules and regulations for the distribution and preservation of books and appliances furnished at the town's expense. When a pupil in the public school loses, destroys, or unnecessarily injures any schoolbook or appliance owned by the town, his parent or guardian shall be notified, and if the loss is not made good within a reasonable time the assessor shall include in the next town tax of the delinquent parent or guardian the value of the book or appliance so lost, destroyed, or injured.

Buildings and sites.—When a location for the erection or removal of a schoolhouse and requisite buildings has been legally designated but the owner refuses to sell, a schoolhouse lot not exceeding 100 square rods may be condemned, and damages appraised as provided for laying out town ways.

A plan for the erection or reconstruction of a schoolhouse voted by a town shall first be approved by the superintending school committee.

If a minor injures or aids in injuring any schoolhouse, outbuilding, utensils, or appurtenances belonging thereto, or defaces the wall, benches, seats, or other parts of said buildings by marks, cuts, or otherwise, or injures or destroys any public school property, the town, through the truant officer, may recover from parent or guardian in an action of debt double the damage occasioned thereby. Whoever defaces the walls, benches, etc., by obscene pictures, language, marks, or descriptions, shall be fined not exceeding $10 on complaint made within one year.

4. Finances.

Funds (of a permanent or special nature).—Taxation.

Funds.—The State treasurer shall keep a separate account of all moneys received from sales of lands appropriated for the support of schools or from notes taken therefor, and of any other moneys appropriated for the same purpose; and such sum shall constitute a permanent school fund, which may be put at interest as the legislature directs. A sum equal to 6 per cent of the amount of said fund, and all moneys received by the State from the tax on banks, together with one-half the amount of the annual tax paid by savings banks, shall be appropriated to the support of common schools and distributed early in July among the several towns according to the number of children therein between 4 and 21 years of age, as furnished by the State superintendent. The number of children 4 to 21 in towns not reporting the fact shall be taken to be the number returned for the last preceding apportionment, less the children set off to other towns or incorporated into a new town within the year, and one-tenth of the remaining number. The treasurer shall notify the delinquent town of the apportionment, which shall not be paid to any town until its return is made to the superintendent, nor until all State taxes due from such town have been paid.

Taxation.—A tax of 1 mill on a dollar shall annually be assessed upon all property in the State, and shall be known as the mill tax for the support of common schools. It shall be assessed and collected in the same manner as other State taxes, and be paid into the State treasury and designated as the school mill fund. This fund shall annually be distributed by the State treasurer on the 1st day of January to the several cities, towns, and plantations according to the number of children therein, as the same shall appear from the official return of the State superintendent made the previous year. All the school mill fund not distributed or expended during the financial year shall, at its close, be added to the permanent school fund.

Every town shall raise and expend annually for the support of schools therein, exclusive of the income of any corporate school fund or of any grant from the revenue or funds from the State, or of any voluntary donation, devise, bequest, or of any forfeiture accruing to the use of schools, not less than 80 cents for each inhabitant, according to the census by which representatives to the legislature were last apportioned, under penalty of forfeiting not less than twice nor more than four times the amount of the deficiency. The governor and council may cause the State treasurer to withhold from a town supposed to be evading the law its share both of the State school fund and the school mill fund until satisfied to the contrary.

Towns shall provide schoolbooks for the use of the pupils in their public schools at the expense of the town, and all moneys raised and appropriated for that purpose shall be assessed like other moneys.

The assessors or municipal officers of each town shall on or before the 1st day of each May make to the State superintendent of common schools a certificate, under oath, embracing the following items:

I. The amount voted by the town for common schools at the preceding annual meeting.

II. The amount of school moneys payable to the town from the State treasury during the year ending with the 1st day of the preceding April.

III. The amount of money actually expended for common schools during the last school year.

IV. The amount of school moneys unexpended.

V. Answers to other inquiries regarding school finances as called for on the blank furnished by the State superintendent.

No money appropriated by law for public schools shall be paid from the town treasury, except upon the written order of its municipal officers upon presentation of an avouched bill of items.

Any town or towns establishing and maintaining one or more free high schools for at least ten weeks in the year shall receive from the State one-half the amount actually expended for instruction in said school or schools, not, however, to exceed $250: *Provided*, That no town shall receive such State aid unless its appropriation and expenditure for such school has been exclusive of the amounts required by law for common-school purposes. Towns may raise money for establishing and maintaining free high schools, the buildings and appurtenances, in the same manner as for supporting common schools and erecting schoolhouses.

NEW HAMPSHIRE.

1. Organization of System.

State superintendent.—School board (each "town" constituting a "school district"[1]).—Truant officers.

State superintendent.—The governor, with the advice and consent of the council, shall appoint a superintendent of public instruction, who shall hold office for the term of two years, and shall have general supervision and control of the educational interests of the State. He shall prescribe the form of register to be kept in the schools and the form of blanks and inquiries to be filled out by the district school boards and forward them; preserve or distribute all State documents in regard to public schools or education; compile the reports and returns of school boards; investigate the condition and efficiency of the system; awaken and guide public sentiment in educational matters, and shall make an annual report containing a concise abstract of the returns of the school boards, a detailed report of his own doings, a statement of the condition and progress of popular education in the State, such suggestions and recommendations in regard to improving the same as his information and judgment may dictate, and the condition of the State normal school. He shall visit and lecture in towns, and organize, superintend, and conduct at least one teachers' institute each year in each county of the State, or appoint a suitable person to do so. He shall also forward to the chairman of every school board in the State a copy of his annual report.

School board.—The district school board consists of three persons, except when the district (town) maintains a high school, when the membership may be increased to six or nine. One-third of the members shall be chosen each year. Districts may elect or appoint a superintendent of schools, who shall hold office for such term, be vested with such of the powers and duties of the school board, and be entitled to such compensation as it may provide.

The duties of the district school board are to prescribe regulations for the attendance upon and for the management, studies, classification, and discipline of the schools. They shall hire as teachers persons holding certificates and dismiss those found unfit to teach or insubordinate, provide schools at such places within the district and at such times within the year as will best subserve the interests of education, and will give to all the scholars of the district as nearly equal advantages as may be practicable. They may use a portion of the school money, not exceeding 25 per cent, for the purpose of conveying scholars to and from the schools, and make the necessary repairs to schoolhouses and furniture, not exceeding in cost 5 per cent of the school money. They shall furnish to every teacher one of the blank registers provided by the superintendent of public instruction, and shall visit and examine each school in their district at least twice in each term, once near the beginning, once near the close. They shall make an annual report, to be filed with the selectmen of the town, stating the number of weeks of school in summer and winter, the number taught by each sex, the number of pupils in attendance and pursuing each study, the number of pupils not less than 5 years of age who have attended the public schools in their districts not less than two weeks during the year, and such suggestions as they may think useful. They shall also include in their reports a statement of the number of each sex reported by the selectmen or assessors, the number of each sex between the ages of 5 and 15 years who have not attended school, and the number of persons in each district between the ages of 14 and 21 who can not read or write. They shall report annually on the 1st day of April to the State superintendent on blanks furnished by him. Any member who shall refuse or neglect to perform his duties shall be fined not exceeding $50. By a law of 1895 towns may join in employing a superintendent, who shall perform in each town the duties incumbent upon the school board.

[1] But a part of one "town" may be annexed to another *for school purposes* by consent of the selectmen of the towns concerned. (Law of April 1, 1893.)

Truant officers.—School boards may appoint truant officers and fix their pay, which is to be paid by the town. Such officers are to hold office for one year, and are removable for cause. Their duties are to enforce the laws regarding truants and children 6 to 16 without any regular or lawful occupation, and, if required by the school board, shall enforce the laws regarding the illegal employment of children in manufacturing establishments. They shall also annually take the school census of persons 5–16 years of age, and collect such other facts as may be required.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—The school board shall hire teachers holding certificates.

The superintendent of public instruction shall cause to be held at such convenient places and times public examination of candidates for the position of teacher in the public schools. Such examinations shall test the professional as well as the scholastic abilities of candidates and shall be conducted by such persons in such manner as the State superintendent may designate. A certificate of qualification shall be given to all candidates who pass satisfactory examinations in such branches as are required by law to be taught and who in other respects fulfill the requirements set by the State superintendent. Such certificate shall be either probationary or permanent, and shall indicate the grade of school which the holder is qualified to teach. These certificates may be accepted by school committees in lieu of the personal examination required by the following paragraph:

Candidates for teaching in the public schools shall be examined by the school board in the studies required by law, and those passing a satisfactory examination and presenting satisfactory evidence of good moral character and capacity for government shall receive certificates of qualification good for one year.

Every teacher shall make the entries in the register required by the superintendent of public instruction and at the close of the term shall return the register to the school board. Twenty dollars of the wages of every teacher shall be withheld until he has made such return.

Preliminary training.—The instruction in the New Hampshire State Normal School shall be confined to such branches as will specially prepare the pupils to teach in the public schools and to such other branches as are usually taught in normal schools. The school shall be in session at least twenty weeks in each year. Its management is a board of seven trustees, five appointed for two years by the governor, with the advice and consent of the council, and the governor and the State superintendent ex officio. They receive no compensation other than reasonable expenses while engaged in their duties. They appoint a principal, who, with themselves, fixes the course of study and the admission and graduation requirements. Tuition and graduation charges are remitted to those who agree to teach in the public schools for a period equal to their attendance on the exercises of the school.

Institutes.—See under *Organization*—State superintendent.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—No person shall attend school in a district in which he does not reside without permission. Every pupil must have been vaccinated before admission. Every person having the care and custody and control of a child between the ages of 8–16 years, residing in a school district having annually a public school, shall cause such child to attend the public school for at least twelve weeks in every year, at least six of which are to be consecutive, unless the school board shall excuse the delinquent because of physical or mental infirmity or because instructed in a private school, for at least twelve weeks during the year, in the common English branches, or, having acquired those branches, in other more advanced studies. The penalty for violation of this provision is $10 for the first and $20 for every subsequent offense, for the use of the school district, the offender having first been cautioned. The school board is to prosecute under penalty of $20, to be recovered by the selectmen of the town. No child under the age of 10 shall be employed in any manufacturing establishment, nor shall any child under the age of 16 years, who can not read and write, be employed in any manufacturing establishment during the time the public schools in the district in which he resides are in session. Children not included in the provision immediately preceding shall not be employed in a manufacturing establishment unless they shall first furnish to the person proposing to employ them a certificate of the school board of the

district in which they reside that they have attended some public or private day school in which the common English branches are taught during the preceding year, as follows: If under 16 and over 14 years of age, twelve weeks; if under 14 and over 12 years of age, six months, or such part thereof as the schools in the district in which they reside were in session; and if under 12 and over 10 years of age, the whole time the schools were open. Any person connected with a manufacturing establishment violating these provisions shall be fined not more than $50, at the motion of the school board and for the benefit of the school district.

Any scholar may be dismissed the school for gross misconduct. School districts may make by-laws regarding the attendance of children 6–16 if not contrary to the laws of State governing such attendance.

Character of instruction.—The sums raised by local taxation shall be appropriated to the sole purpose of maintaining public schools for teaching reading, writing, English grammar, arithmetic, geography, and such other branches as are adapted to the advancement of the schools.

The board shall prescribe in all mixed schools and in all graded schools above primary the study of physiology and hygiene, having special reference to the effects of alcoholic stimulants and of narcotics upon the human system, and may permit or interdict the study of algebra, geometry, surveying, bookkeeping, philosophy, chemistry, and natural history, or any of them, and other studies of the kind.

Any district, or two or more adjoining districts, may by vote or by-law establish and maintain a high school in which the higher English branches of education and the Latin, Greek, and modern languages may be taught. Any district may contract with an academy, seminary, or other literary institution located within its limits or immediate vicinity to furnish instruction to its own resident youth.

Text-books.—The school board shall purchase at the municipal expense the text-books and other required supplies for the public schools and shall loan the same to the pupils free of charge. Every schoolbook shall continue in use for five years, but no book shall be introduced to favor any particular religious sect or political party.

Buildings and sites.—The district may decide upon the location of its schoolhouses by vote or special committee, but no committee shall have power to bind the district beyond the amount of money voted by it. Failure on the part of the district or its special committee to select a site authorizes the school board, on petition of 10 or more voters, to determine where the school shall be placed, but 10 or more voters may carry an appeal to the county commissioners. If a district refuse or neglect to build, repair, remove, or fit up a schoolhouse, the selectmen, upon petition of 3 or more voters, may, after hearing of all parties, assess upon the district and collect the amounts necessary to perform the work. A school district or its board may grant the use of any schoolhouse in the district for a writing or singing school and for religious or other meetings whenever such use will not conflict with regular school exercises.

4. Finances.

Funds (permanent or special).—Taxation.

Literary fund.—All taxes collected by the State upon the deposits, stock, and attending accumulations of depositors and stockholders, of savings banks, trust companies, loan and trust companies, loan and banking companies, building and loan associations, and other similar corporations nonresident of the State shall be known as the literary fund. This fund shall be distributed in November of each year among the towns and places in proportion to the number of scholars not less than 5 years of age who shall by the last reports of the school boards returned to the State superintendent appear to have attended the public schools not less than two weeks within the year. The town shall assign the amount so received to the district, to be used by them in support of public schools, though one-fifth may be reserved by the school board for the purchase of blackboards, dictionaries, maps, charts, and school apparatus. Towns misapplying their portion of the literary fund shall refund to the State double the sum misapplied.

Dog and railroad taxes.—All money arising from the taxation and licensing of dogs remaining in the treasury of any town or city on the 1st day of April annually which is not due to holders of orders given for loss of or damage to domestic animals by dogs shall be applied to the support of the public schools and shall be assigned to the districts as is other school money. The State treasurer shall pay to each town its proportion of each railroad tax whenever the same shall have been paid to him. [The whole or a part may be applied to the support of public schools.]

Taxation.—School districts may raise money to procure sites, to build, rent, repair, remove, or purchase school buildings, to procure insurance, to plant and care for ornamental trees upon school grounds, to provide furniture, books, maps, charts, apparatus and conveniences for schools, and to pay off debts. They may hire money for building schoolhouses not exceeding four-fifths of their cost, payable in five years, with interest.

VERMONT.[1]

1. Organization of the System.

State superintendent.—Examiner of teachers.—School directors.—Town superintendent.—Truant officers.

State superintendent.—The general assembly shall elect at each biennial session a superintendent of education, who shall have general supervision of the public schools of the State, and shall devote his whole time to the duties of his office, which, in case of vacancy, is filled by the governor. His annual salary is $2,000 and traveling expenses to the amount of $600. His office shall be at the statehouse, and he may employ a clerk, at an annual compensation of $400. His disbursements for postage, expressage, and freightage are refunded him.

He shall hold a teachers' institute in each county during each biennial term, and may hold additional institutes, but not more than two in any one county during a biennial period, nor shall an institute continue more than four days. He may direct the examiner of teachers of a county to conduct the institute. He shall visit each county annually in addition to the occasion of holding an institute, and as many towns as possible, deliver lectures upon educational subjects, confer with and advise school officers and teachers, and investigate the condition of schools. He shall present to the general assembly on the first day of each biennial session a report covering the two years last past, containing an account of his official doings, of the condition of the schools, of the expenditure of school money, and suggestions. He shall file quarterly an itemized sworn statement of his expenses. Not more than 4,000 copies of his report shall be printed. Each examiner of teachers shall receive 20 copies, and members of the general assembly, town clerks, district clerks, and principals of graded union and high schools shall each receive one copy.

Examiner of teachers.—At each biennial session of the legislature, or as soon as possible thereafter, the State superintendent of education and the governor shall appoint one man in each county, who shall be a resident of the same, who shall be styled "examiner of teachers"; vacancies to be filled by the State superintendent and governor. The examiner shall, under the direction of the State superintendent, make all necessary arrangements for holding teachers' institutes, take measures to secure the attendance of teachers, assist at such institutes, and furnish statistical information.

The examiner of teachers, after consultation with the town superintendents of the county, shall, in the spring and autumn of each year, make arrangements for a public examination of applicants for teachers' certificates at such places and times as shall best accommodate the teachers of the county.

The examiner shall receive $4 a day for time actually spent in discharge of the duties of his office and his necessary expenses, not to exceed $2 a day, and expenditures for postage and stationery, and shall file every six months an itemized and sworn-to account of his expenses. He may be removed by the State superintendent and governor for unfitness, and shall biennially report to the former.

Board of school directors.—At the annual town meeting in March, 1893, there shall be elected a board of three or six school directors, citizens of the town, one-third of whom shall be elected for one year, one-third for two years, and one-third for three years. A vacancy in the board shall be filled by the selectmen, until the next annual town meeting. The board shall have the care of school property and the management of the public schools, determine their number and location, employ teachers and fix their compensation, examine and allow claims arising in school matters, draw orders on the town treasurer for the payment thereof, and may make regulations for carrying the powers granted it for carrying them into effect, and when authorized to do so by the town it may purchase or sell sites and erect buildings. It may provide for the instruction of advanced pupils. It shall report fully to the annual town meeting. The compensation of the directors shall be fixed annually by the town.

[1] "The special provisions relating to incorporated school districts and school districts in unorganized towns and gores" are not included in this digest.

Town superintendent.—The board of school directors shall, on or before the 1st day of April of each year, appoint a town superintendent of schools, whose compensation they shall fix. His duty shall be to visit the schools of the town at least once each term, and oftener if the school board so directs. He shall observe, when visiting a school, the condition of the buildings and grounds, the number of the scholastic appliances, maps, text-books, etc., and make suggestions to the board. He may dismiss any incompetent teacher. In towns having a graded school district under special act, the town and the special district may unite in the election of a town superintendent. Any two or more towns, the aggregate number of schools in all of which is not more than 60 nor fewer than 30, may, by vote of the school directors of the several towns, unite for the purpose of employing a superintendent of schools, the directors of the several towns forming a joint committee for the election of the superintendent and determining the proportion of his salary to be paid by each town.

Truant officers.—The selectmen of each town and the mayor of each city shall annually appoint two truant officers, or, in case of failure to appoint, the constables, sheriffs, deputy sheriffs, or policemen shall act as truant officers. The truant officer, or a member of the board of school directors, or other authorized person, may arrest, and upon the written application of three voters in the town shall arrest, a child who is illegally absent from school. Any person charged with the duty of arresting truants who shall refuse or neglect to perform the duty imposed by law shall be fined not exceeding $100. All persons acting as truant officers shall be paid $2 a day for time actually spent, unless otherwise provided. On complaint of a teacher to a school director the truant officer shall inquire into the cause of a pupil's absence, and if he have reason to believe that the pupil's parent, guardian, or master has violated the laws regarding attendance, the truant officer shall immediately make complaint to a justice of the peace or judge of the municipal court, who shall issue a warrant to have the parent, guardian, or master brought before him.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No person shall teach a public school without having a certificate or a permit, and a contract for teaching shall be void if the teacher does not obtain a certificate before opening school. But this provision does not apply to the principal teacher of the highest department of a graded school. No certificate will be granted to a person not 17 years of age. A certificate of graduation from the lower course of a normal school in the State shall be a license to teach in the public schools of the State for five years from the date thereof, and a certificate of graduation from the higher course, for ten years. A graduate of the lower course, after one hundred weeks of successful teaching, may present himself for examination in the studies of the higher course. A person having a ten years' certificate and having taught two hundred weeks under it may, by the concurrent action of the State superintendent and the county examiner of teachers, be given a certificate entitling the recipient to teach until revoked by like concurrent action. The examiner may also grant certificates to the graduates of other normal schools which in his own county are of equal power with those granted graduates of the State normal school.

The State superintendent shall prepare printed questions for examination and blanks for teachers' certificates, and shall transmit the same to the examiners. He shall also fix the standard which shall be reached in the examinations. The examination shall be oral and written, and shall be conducted by the examiner or some competent person appointed by him, and should the examiner not be able to issue certificates seasonably the State superintendent is empowered to issue them. The certificates issued by the examiner are of three grades. A certificate of the first grade shall be given only to one who has taught forty weeks successfully, whose examination papers show the applicant to have reached the standard required by the State superintendent, whose oral examination has been satisfactory, and moral character and ability to govern good. Such certificate shall be a license to teach for five years from its date in any town in the State. A certificate of the second grade shall be granted to a candidate having taught twelve weeks, passed an examination in all the branches required by law to be taught in the common schools, proved in his papers that he has filled the requirements of the standard set by the State superintendent, and that he is of good character and capable of controlling a school. Such certificate shall be a license to teach two years. A certificate of the third grade shall be a license to teach for a specified time, not to exceed one year, and may, at the discretion of the examiner, be limited to the teaching of a particular school. One having twice taken a certificate of the third grade, and who has taught at

least twenty-four weeks, shall not afterwards be given a certificate of that grade. When the exigencies of the case may require it, the examiner may give an applicant a private examination.

Duties.—Every teacher shall register on the proper blanks the daily attendance, and enter therein correct answers to the interrogatories addressed to teachers, and shall return such register to the clerk of the board of directors, the final return to be made on or before the 20th day of March. If the register is properly filled out the clerk will certify the same and the teacher can obtain the compensation for the services rendered. When a pupil is not provided with the required text-books other than those furnished by the State the teacher shall notify the school directors, who will, if the legal guardian fail to supply them, furnish the necessary books. Each teacher shall promptly give notice to the school directors of cases of truancy on the part of any pupil in his school.

Preliminary training.—The manual schools at Randolph, Johnson, and Castleton are continued until August, A. D. 1900.

There shall be two courses of study in a normal school. Each course shall contain such branches as the trustees and the State superintendent shall decide, but no foreign language, ancient or modern, shall be included therein. No study or subject not included in the established courses shall be taught in a normal school, and if these provisions have not been complied with the State superintendent shall withhold the certificates upon which the auditor of accounts is authorized to draw his order for the payment of moneys to these schools. The examination for admission to a normal school shall be controlled by the trustees of such school and the State superintendent. The examination for graduation shall be conducted by a board consisting of the State superintendent, the principal of the normal school, and a practical teacher annually selected by the governor from the Congressional district in which the school is located, who shall receive $4 a day and his traveling expenses while in discharge of his duties. The board shall attend and assist at such examination and grant certificates of graduation to all who pass the required examination in the first course or both courses, but may revoke said certificate on cause shown.

Each town shall be entitled to one scholarship in a normal school, and a person appointed to a scholarship may attend any State normal school as he may elect. Each State normal school is entitled to 20 scholarships in addition to the scholarships it may have by reason of such town scholarships. The town superintendent may appoint to a scholarship, for the period required to complete the course of study, any person residing in the town of good character, 15 years of age or more, who declares it to be his purpose to complete at least one of the courses in a normal school and to teach in the common schools of the State for two years after graduation, and upon passing the examination for admission to the school such person shall be entitled to its privileges. The town superintendent shall notify the trustees of such appointment before the first day of the term in which the appointment is to take effect, and he may recommend other persons to the trustees, but no town shall have more than 10 scholarships during one term. A scholarship shall be reckoned at $12 a half term.

A graded school organized in accordance with a special act of the general assembly and situated in a county in which there is no normal school may establish a training-school department for preparing teachers. The State superintendent shall establish two courses of study in such schools similar to the courses in the normal schools.

Institutes.—See under "Organization of system,—State Superintendent and Examiner of Teachers."

The time, not exceeding four days, actually spent by the teacher of a common school in attendance upon a teachers' institute or State teachers' association during the time such teacher is engaged to teach shall be considered as spent in teaching, nor shall legal holidays be considered as days lost.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—The term "legal pupils" shall include all persons between the ages of 5 to 21 years. No child under 5 years of age shall be received as a pupil, though school directors may establish a kindergarten for such. Every person having under his control a child of good health and sound mind between 8 and 14 years of age shall cause it to attend a public school at least twenty weeks in the year, unless such child has been otherwise furnished with the means of education for a like period or has already acquired the branches of study required by law to be taught in the public schools. No child under 14 years of age shall be

employed in a mill or factory unless such child shall have attended a public school twenty weeks during the preceding year, and shall deposit with the owner or person in charge of such mill or factory a certificate showing such attendance, signed by the teacher. No person shall employ children under 14 years of age who can not read and write, though capable of receiving instruction in those arts, during the time when the school such person should attend is in session. The penalty for violation of these provisions is not fewer than $5 nor more than $25, to be adjudged by any justice of the peace.

The board of school directors may use 25 per cent or less of the school money for the purpose of conveying pupils to and from school.

Character of instruction.—In every town there shall be kept for at least twenty-six weeks in each year, at the expense of the town, by a competent teacher or teachers of good morals, a sufficient number of schools for the instruction of all the children who may legally attend the public schools therein, and all pupils shall be thoroughly instructed in good behavior, reading, writing, spelling, English grammar, geography, arithmetic, free-hand drawing, the history and the Constitution of the United States, and in elementary physiology and hygiene, and shall receive special instruction in the geography, history, constitution, and principles of the government of Vermont. Said school shall be within the limits of the town supporting it and may be established at such places and held at such times as in the judgment of the board of directors will best subserve the interests of education and give all the children of the town as nearly equal advantages as may be. They may also provide for the instruction of advanced pupils in the higher branches of English study in one or more graded schools, if such there be, and may establish central schools in the town, and if instructed by vote of the town may provide for the education of advanced scholars in any graded or incorporated academy within the limits of the town and also establish evening schools and kindergartens. Vocal music may also be taught, if allowed by vote of town.

Text-books.—Any town may purchase and hold text-books for use in its schools if it so votes at a meeting warned for that purpose. [A series of text-books shall be selected every five years and none other shall be used in the public schools (unless supplied without expense to pupils) during the interval. The publisher shall be required to enter into a written agreement to furnish for sale in each town, at a predetermined price, as many books as may be required, the persons selling the books not to charge for them more than the cost of transportation and 10 per cent advance on publisher's contract price.] See also under Teachers; Duties.

Buildings.—Towns shall provide and maintain suitable schoolhouses, and the location, construction, and sale of the same shall be under the control of the board of school directors.

A person who willfully and maliciously injures or defaces a dwelling house or other building shall be fined not more than $20 and be liable to the owner in action at law. A person who carelessly and without malice injures or defaces any part of a building belonging to a town or county or the appurtenances thereof of any kind, including trees and shrubbery, or fastens a horse or other animal to any such appurtenance, or posts bills, etc., whereby any defacement results, shall forfeit $2 to the State.

No barbed-wire fence shall be used to inclose school grounds.

4. Finances.

Funds (permanent or special).—Taxation.

United States deposit money.—The treasurer of the State shall receive moneys belonging to the United States to be deposited with this State. Such moneys shall be apportioned to the several towns, organized or unorganized, and to the gores in proportion to the number of inhabitants in each, according to the last State or national census. The town trustees of the public money may loan the same for one year to the town or to private individuals at an annual interest of 6 per cent. When there are no town trustees of public funds the State treasurer acts. The treasurer of each town shall give credit in his account of the school fund for all sums received by him as income from the town share of the deposit money and this income shall be annually appropriated to the support of schools in the town; but if a town has other school funds the income of which is sufficient to support schools in such town for six months of the year, such town may appropriate the income received from its share of such money to any purpose. Failure to comply with the foregoing provisions makes the town liable to the county to a sum not exceeding double the interest on such moneys, and the grand jury shall inquire into the management and disposition of this fund.

Town school fund.—The selectmen of a town shall have charge of the real and personal estate in such town appropriated as a fund to the use of schools unless otherwise provided by law or the donor. They shall lease lands and loan moneys on annual or semiannual interest secured by real estate.

Taxation.—A tax of 5 cents on the dollar shall be annually assessed on the list[1] of polls and ratable estate of the inhabitants of this State for the support of common schools. The treasurer shall annually apportion to the several towns and cities and unorganized districts the proceeds of such tax according to the number of legal schools maintained during the preceding school year.

The school directors of each town shall annually, in writing, recommend to the selectment of their town the amount of money necessary for the use of schools, and said selectmen shall annually appropriate for such purpose a sum not exceeding one-half nor less than one-fifth of the grand list of such town, and shall assess a tax annually to defray such appropriations. Any town by special vote may raise a larger sum for school purposes.

MASSACHUSETTS.

1. Organization of the System.

State board of education.—Secretary of the State board of education.—Agents of the State board of education.—Commissioners of the State school fund.—Town school committee.—Town superintendent.—Truant officer.

State board of education.—The board of education shall consist of the governor and lieutenant governor, and eight persons appointed by the governor with the advice and consent of the council, each to hold office eight years from the time of his appointment, and one to retire each year in the order of appointment; and the governor, with the advice and consent of the council, shall fill all vacancies in the board. The board may take and hold, in trust for the Commonwealth, any grant or devise of lands, and any donation or bequest of money or other personal property, made to it for educational purposes; and shall forthwith pay over to the treasurer of the Commonwealth, for safe keeping and investment, all money and other personal property so received. It shall prescribe the form of registers and blanks to be used in the schools, shall annually report to the general court concerning the statistical information it has received with an abstract thereof, and its own doings, with observations and suggestions as experience and reflection may dictate. It has general management of the State normal schools and the boarding houses attached thereto.

Secretary of the board of education.—The board may appoint its own secretary, who, under its direction, shall make the abstract of school returns required by law; collect information respecting the condition and efficiency of the public schools and other means of education, including all incorporated institutions an institutions aided by the Commonwealth; diffuse throughout the Commonwealth information concerning the best system of studies and the best method of instruction for the young; suggest to the board and to the general court improvements in the present system of public schools; visit, as often as his other duties will permit, different parts of the Commonwealth for the purpose of arousing and guiding public sentiment in relation to the practical interests of education; collect in his office such schoolbooks, apparatus, maps, and charts as can be obtained without expense to the Commonwealth;[2] receive and arrange in his office the reports and returns of the school committees; receive, preserve, or distribute the State documents in relation to the public-school system; give sufficient notice of and attend such meetings of teachers of public schools, of members of the school committees of the several towns, and of friends of education generally in any county as may voluntarily assemble at the time and place designated by the board, devoting himself at such meetings to the object of collecting information with respect to the condition of the public schools of such county, the fulfillment of the duties of their office by members of the school committees of all the cities and towns, and the circumstances of the several school districts in regard to teachers, pupils,

[1] This "grand list" of Vermont is made up of the polls and one per cent of the assessed value of real and personal property. Five per cent of this "grand list" is taken as related in the text.

[2] By act of April 11, 1894, the board of education is authorized to establish an educational museum, for the care and maintenance of which $1,500 is annually granted.

books, apparatus, and methods of education, with a view to enabling him to furnish all information desired for the report of the board; and send the blank forms of inquiry, the school registers, the annual report of the board, and his own annual report, to the clerks of the several cities and towns as soon as may be after they are ready for distribution.

His salary shall be $3,000 per annum, with an allowance of $400 for traveling expenses, to be paid out of the school fund; the incidental and other necessary expenses shall be paid out of the treasury of the Commonwealth.

Agents of board of education.—The board may appoint one or more suitable agents to visit cities and towns to inquire into the condition of the schools, to confer with teachers and committees, to lecture upon subjects connected with education, and in general to give and receive information upon such subjects in the same manner as the secretary might do if he were present.

Commissioners of the fund.—See Finances, permanent or special funds.

Superintendent of public schools.—A city by ordinance, and a town by vote, may require the school committee annually to appoint a superintendent, who, under the direction and control of said committee, shall have the care and supervision of the public schools; or the school committee of any city without such ordinance may appoint a superintendent by a majority vote of the whole board; the compensation of the superintendent shall not be less than $1.50 for each day of actual service, and shall be determined by the school committee, and, in cities without such ordinance, by a majority vote of the whole board; in every city in which such ordinance is in force or in which a superintendent is appointed, and in every town in which a superintendent is appointed, and which does not provide otherwise by vote, the school committee shall receive no compensation.

Two or more towns may, by a vote of each, form a district for the purpose of employing a superintendent of public schools therein, who shall perform in each town the duties prescribed by law. Such superintendent shall be annually appointed by a joint committee composed of the chairman and secretary of the school committee of each of the towns in said district, who shall determine the relative amount of service to be performed by him in each town, and shall fix his salary and apportion the amount thereof to be paid by the several towns, and certify such amount to the treasurer of each town. Said joint committee shall, for said purposes, be held to be the agents of each town composing such district.

Or any two or more towns the valuation of each of which does not exceed $2,500,000, and the aggregate number of schools in all of which is not more than 50 nor less than 25, may, by vote of the several towns, unite for the purpose of the employment of a superintendent of schools under the provisions of this act.

When such a union has been effected, the school committees of the towns comprising the union shall form a joint committee, and for the purposes of this act said joint committee shall be held to be the agents of each town comprising the union. Said committee shall meet annually in joint convention in the month of April at a day and place agreed upon by the chairman of the committees of the several towns comprising the union, and shall organize by the choice of a chairman and secretary. They shall choose by ballot a superintendent of schools; determine the relative amount of service to be performed by him in each town; fix his salary, and apportion the amount thereof to be paid by the several towns, and certify such amount to the treasurer of each town. When such a union has been effected, it shall not be dissolved because any one of the towns shall have increased its valuation so that it exceeds $2,500,000, nor because the number of schools shall have increased beyond the number of 50 or decreased below the number of 25, nor for any reason for the period of three years from the date of the formation of such union, except by vote of a majority of the towns constituting the union.

Whenever the chairman and secretary of such joint committee shall certify to the State auditor, under oath, that a union has been effected as herein provided, that the towns, in addition to an amount equal to the average of the total sum paid or to the sum paid per child by the several towns for schools during the three years next preceding, unitedly have raised by taxation and appropriated a sum not less than $750 for the support of a superintendent of schools, and that under the provisions of this act a superintendent of schools has been employed for one year, a warrant shall be drawn upon the treasurer of the Commonwealth for the payment of $1,250, $750 of which amount shall be paid for the salary of such superintendent, and the remaining $500 shall be apportioned and distributed on the basis of the amount appropriated and expended for a superintendent in the towns forming such district for the year next preceding, which amount shall be paid for the salaries of teachers employed in the public schools within such district.

Town school committee.—Every town shall, at its annual meeting, or at a meeting appointed and notified by the selectmen for the purpose and held in the

same month in which the annual meeting occurs, choose by written ballots a school committee, which shall have the general charge and superintendence of all the public schools in the town, and where there is no superintendent shall visit each school during the first week of its opening and once during the last two weeks of its session, and also, without notice to the teacher, once during each month. Said committee shall consist of any number of persons divisible by three which said town has decided to elect, one-third thereof to be elected annually, and to continue in office three years. No person shall be deemed to be ineligible to serve upon a school committee by reason of sex. Vacancies are filled by the committee and the selectmen of the town, or, in case of all the committeemen refusing to serve, by the selectmen alone. If a town fails or neglects to choose such committee, an election at a subsequent meeting shall be valid.

[By this section the school committee have general charge and superintendence of the schools, as the chief justice of the Commonwealth remarked from the bench upon a question regarding a sufficient number of schools: "There being no specific direction how schools shall be organized, how many schools kept, what shall be the qualifications for admission to the schools, the age at which children may enter, the age to which they may continue—these must all be regulated by the committee, under their power of general superintendence."]

Each member of the school committee in cities shall be paid $1 a day and in towns $2.50 a day for the time actually employed in discharging the duties of the office, together with such additional compensation as the city or town may allow, except that, unless otherwise provided, in cities and towns employing a superintendent, the school committee shall receive no compensation. Towns uniting in employing a superintendent under the act allowing two or more towns having each property valued at not more than $2,500,000, and having not more than 50 or fewer than 30 schools, to unite, are exempted from the provision regarding the pay of school committeemen.

Truant officers.—The school committee of each town shall appoint and fix the compensation of two or more suitable persons to be designated "truant officers," who shall, under the direction of the committee, inquire into all cases arising under the by-laws regarding truancy, and shall alone be authorized in case of violation thereof to make complaint and carry into execution the judgment thereon, and who may serve all legal processes issued by the courts in pursuance of such by-laws, but shall not be entitled to fees for serving such processes. They may apprehend and take to school without warrant all truants found wandering about in the streets or public places.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—The school committee shall select and contract with the teachers of the public schools, shall require full and satisfactory evidence of the good moral character of all teachers who may be employed, and shall ascertain by personal examination their qualifications for teaching and their capacity to govern schools. The diplomas granted by the State normal schools may be accepted by the school committees in lieu of the examination.

The State board of education shall cause to be held, at such convenient times and places as it may from time to time designate, public examinations of candidates for the position of teacher in the public schools of the Commonwealth. Such examinations shall test the professional as well as the scholastic abilities of candidates, and shall be conducted by such persons and in such manner as the board may from time to time designate. Due notice of the time, place, and other conditions of the examinations shall be given in such public manner as the board may determine. A certificate of qualification shall be given to all candidates who pass satisfactory examinations in such branches as are required by law to be taught and who in other respects fulfill the requirements of the board, such certificate to be either probationary or permanent and to indicate the grade of school for which the person named in the certificate is qualified to teach. A list of approved candidates shall be kept in the office of the secretary of the board, and copies of the same, with such information as may be desired, shall be sent to school committees upon their request. The certificates issued under the provisions of this act may be accepted by school committees in lieu of the personal examination required by the public statutes. A sum not exceeding $500 may be annually expended for the necessary and contingent expenses of carrying out the provisions of this act.

Every teacher of a school shall, before he opens such school, obtain from the school committee a certificate in duplicate of his qualifications, one of which he

shall deposit with the selectmen before he receives any portion of his pay. He shall faithfully keep the registers furnished and make due return thereof to the school committee, or to one designated by them, under penalty of having a portion of his pay withheld. [His authority over his pupils while upon the premises is the same as that of the parent ; but while the pupil is coming to school or departing thence homeward the teacher may or may not assume authority.]

Preliminary training.—[The board of education by vote May 6, 1880, stated the design of the normal schools to be as follows: The design of the normal schools is strictly professional; that is, to prepare in the best possible manner the pupils for the work of organizing, governing, and teaching the public schools of the Commonwealth. To this end there must be the most thorough knowledge of the branches of learning required to be taught in the schools, of the best methods of teaching those branches, of right mental training. The time of one course extends through a period of two years, of the other through a period of four years, and is divided into terms of twenty weeks each, with daily sessions of not less than five days each week.]

Institutes and meetings.—When the board of education is satisfied that 50 teachers of public schools desire to unite in forming a teachers' institute, it shall, by a committee or by its secretary, or, in case of his inability, by such person as it may delegate, apppoint and give notice of a time and place for such meeting and make suitable arrangements therefor. To defray the necessary expenses and charges and to procure teachers and lecturers for such institutes, a sum not exceeding $3,000 may annually be paid out of that half of the income of the school fund not apportioned for distribution to cities and towns. The board may determine the length of time during which a teachers' institute shall remain in session and what portion, not exceeding $350, of the sum provided for in the preceding section shall be appropriated to meet the expenses of such institute.

When a county association of teachers and others holds an annual meeting of not less than one day for the express purpose of promoting the interests of public schools, it shall receive $25 from the Commonwealth upon filing with the governor a certificate, under oath, from its president and secretary that a meeting has been so held.

Subject to the approval of the board of education, there shall annually be allowed and paid, out of that half of the income of the school fund not apportioned for distribution to cities and towns, to the president or treasurer of the Massachusetts Teachers' Association $300, to be applied to the purposes of said association.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—For transportation of pupils see Finances, Taxation.

Every person having under his control a child between the ages of 8 and 14 years, and in every city and town where opportunity is furnished, in connection with the regular work of the public schools, for gratuitous instruction in the use of tools or in manual training, or for industrial education in any form, a child between the ages of 8 and 15 years, shall annually cause such child to attend some public day school in the city or town in which he resides, and such attendance shall continue for at least thirty weeks of the school year, if the schools are kept open for that length of time, with an allowance of two weeks' time for absences not excused by the superintendent of schools or the school committee. Such period of attendance shall begin within the first month of the fall term of school, and for each five days' absence of any such child thereafter, in excess of the above allowance, before the completion of the required annual attendance of thirty weeks, the person having such child under his control shall, upon the complaint of the school committee or any truant officer, forfeit to the use of the public schools of such city or town a sum not exceeding $20, but if such child has attended for a like period of time a private day school approved by the school committee of such city or town, or if such child has been otherwise instructed for a like period of time in the branches of learning required by law to be taught in the public schools, or has already acquired the branches of learning required by law to be taught in the public schools, or if his physical or mental condition is such as to render such attendance inexpedient or impracticable, such penalties shall not be incurred.

For the purposes of the preceding section school committees shall approve a private school only when the teaching in all the studies required by law is in the English language, and when they are satisfied that such teaching equals in thoroughness and efficiency the teaching in the public schools in the same locality, and that

equal progress is made by the pupils therein, in the studies required by law, with that made during the same time in the public schools; but they shall not refuse to approve a private school on account of the religious teaching therein.

All children within the Commonwealth may attend the public schools in the place in which they have their legal residence, subject to the regulations prescribed by law. The school committee shall determine the number and qualifications of the scholars to be admitted to the high school. Children living remote from any public school in the town in which they reside may be allowed to attend the public schools in any adjoining town under such regulations and on such terms as the school committee of the said towns agree upon and prescribe; and the school committee of the town in which such children reside shall pay the sum agreed upon out of the appropriations of money raised in said towns for the support of schools.

Any minor under guardianship, whose father has died, may attend the public schools of the city or town of which his guardian is an inhabitant.

Children may, the consent of the school committee being first obtained, attend schools in cities and towns other than those in which their parents or guardians reside; but when a child resides in a city or town different from that of the residence of the parent or guardian, for the sole purpose of attending school there, the parent or guardian of such child shall be liable to pay such city or town for tuition a sum equal to the average expense per scholar for the period during which the child so attends.

The school committee shall not allow a child who has not been duly vaccinated, unless an unfit subject for inoculation, to be admitted to or connected with the public schools.

The school committees shall not allow any pupil to attend the public schools while any member of the household to which such pupil belongs is sick of smallpox, diphtheria, or scarlet fever, or during a period of two weeks after the death, recovery, or removal of such sick person; and any pupil coming from such household shall be required to present, to the teacher of the school the pupil desires to attend, a certificate, from the attending physician or board of health, of the facts necessary to entitle him to admission in accordance with the above regulation.

No person shall be excluded from a public school on account of the race, color, or religious opinion of the applicant or scholar.

Every member of the school committee under whose direction a child is excluded from the public school, and every teacher of such school from which a child is excluded, shall, on application by the parent or guardian of such child, state in writing the grounds and reason of the exclusion.

A child unlawfully excluded from a public school may recover damages therefor in an action of tort, to be brought in the name of such child by his guardian or next friend, against the city or town by which such school is supported.

The plaintiff in such action may, by filing interrogatories for discovery, examine any member of the school committee, or any other officer of the defendant city or town, as if he were a party to the suit.

Whenever a truant school has been established for any county it shall be the place of confinement, discipline, and instruction for all truants within the cities or towns of said county, unless said cities or towns have made other provision therefor; and police, district, or municipal courts, trial justices, and probate courts shall have jurisdiction within their respective counties of the offenses described in this act; and may commit truants to such truant school or union truant school as may be established for their respective counties under the provisions of this act.

If three or more towns in any county so require, the county commissioners shall establish at the expense of the county, at a convenient place therein other than the jail or house of correction, a truant school for the confinement, discipline, and instruction of minor children convicted under the provisions of sections 19 and 21 of this act and all acts in amendment thereof and in addition thereto; and shall make suitable provisions for the government and control, and for the appointment of proper teachers and officers thereof. But the county commissioners of two, three, or four contiguous counties may, and if three or more cities or towns in each of such counties require, shall, at the expense of said counties, establish for said counties at a convenient place therein a union truant school, to be organized and controlled by the chairman of the county commissioners of said counties, in the manner provided for the government and control of county truant schools by county commissioners; and any county so uniting with another county or counties in the support of a union truant school shall not be required to support a truant school of its own.

A town may assign any such truant school, or, with the assent of the State

board of lunacy and charity, the State primary school, as the place of confinement, discipline, and instruction of children so convicted; and shall pay for their support such sum, not exceeding $2 a week for each child, as the county commissioners or the trustees of the State primary and reform schools respectively shall determine.

Children so committed may, upon satisfactory proof of amendment or other sufficient cause, be discharged from the State primary school by said State board, and from other places of confinement by the judge or justice who committed them.

Each town shall make all needful provisions and arrangements concerning habitual truants, and children between 7 and 15 years of age who may be found wandering about in the streets or public places therein, having no lawful occupation or business, not attending school and growing up in ignorance, and such children as persistently violate the reasonable rules and regulations of the public schools; and shall make such by-laws as shall be most conducive to the welfare of such children and to the good order of such town; and shall provide suitable places for the confinement, discipline, and instruction of such children.

Any minor convicted, under a by-law made under a provision of this act, of being an habitual truant, or of wandering about in the streets or public places of a city or town, having no lawful employment or business, not attending school and growing up in ignorance, or of persistently violating the rules and regulations of the public schools, shall be committed to any institution of instruction or suitable situation provided for the purpose, under the authority of said section or by-law, for a term not exceeding two years.

Whoever, after notice from a truant officer to refrain from so doing, offers a reward for services to any child, in consequence of which reward such child is induced unlawfully to absent himself from school, or whoever, after notice as aforesaid, in any manner entices or induces any child to truancy, or whoever knowingly employs or harbors any truant or unlawful absentee from school, shall forfeit not less than $20 nor more than $50 to the use of the public schools of the city or town in which said offense occurs, to be recovered by complaint.

The school committee of any city or town in any county or counties where a union or county truant school has been or shall hereafter be established may, with the approval of the court making the original commitment and with the consent of the county commissioners of the county in which such truant school is established, cause all persons confined in the truant or farm school in such city or town, when such farm school is a truant school, to be removed to such union or county truant school to complete the term for which they were originally committed, subject, however, to the provisions of law as to release before the expiration of such term.

The school committees of the several towns shall annually report to the secretary of the board of education whether their respective towns have made the provisions required by law relating to truants and absentees from school.

Each town may, and every town containing 5,000 or more inhabitants shall, make all needful provisions and arrangements concerning children under 16 years of age who by reason of orphanage or of neglect, crime, drunkenness, or other vice of parents are suffered to grow up without salutary parental control and education, or in circumstances exposing them to lead idle and dissolute lives; and may also make all such by-laws respecting such children as shall be deemed most conducive to their welfare and to the good order of the town.

The selectmen of towns containing 5,000 or more inhabitants, and of other towns accepting the provisions of sections 25 to 28, inclusive, of this act, shall appoint suitable persons to make complaints of violations of by-laws adopted under the preceding section; and the person so appointed and the officers and duly appointed agents of the Massachusetts Society for the Prevention of Cruelty to Children shall alone be authorized to make such complaints and to carry into execution the judgments thereon; and the persons so appointed shall alone be authorized to make complaints under the following section.

A judge of the superior court, or of a police, district, or municipal court, or a trial justice, upon proof that any child under 16 years of age, by reason of orphanage, or of the neglect, crime, drunkenness, or other vice of parents, is growing up without salutary parental control and education, or in circumstances exposing such child to lead an idle and dissolute life, may order such child to such institution of instruction or other place assigned for the purpose as may be provided under this act by the town in which such child resides, to be there kept, educated, and cared for for a term not extending beyond the age of 21 years for boys or 18 years for girls.

When the parents of a child committed under the preceding section have reformed and are leading orderly and industrious lives, and are in a condition to

exercise salutary parental control over such child and to provide him with proper education and employment, or when, said parents being dead, any person offers to make such suitable provision for the care, nurture, and education of such child as will conduce to the public welfare, and will give security for the performance of the same satisfactory to the directors, trustees, overseers, or other board having charge of the institution to which such child is committed, they may discharge him to the parents or such other person.

No child under 13 years of age shall be employed at any time in any factory, workshop, or mercantile establishment. No such child shall be employed in any indoor work performed for wages or other compensation, to whomsoever payable, during the hours when the public schools of the city or town in which he resides are in session, or shall be employed in any manner during such hours unless during the year next preceding such employment he has attended school for at least thirty weeks, as required by law.

No child under 14 years of age shall be employed in any manner before the hour of 6 o'clock in the morning or after the hour of 7 o'clock in the evening. No such child shall be employed in any factory, workshop, or mercantile establishment, except during the vacation of the public schools in the city or town in which he resides, unless the person or corporation employing him procures and keeps on file a certificate and employment ticket for such child, as prescribed by a section of this act; and no such child shall be employed in any indoor work performed for wages or other compensation, to whomsoever payable, during the hours when the public schools of such city or town are in session, unless as aforesaid, or shall be employed in any manner during such hours unless during the year next preceding such employment he attended school for at least thirty weeks as required by law: *Provided*, The public schools are in session that number of weeks, which time may be divided, so far as the arrangements of school terms will allow, into three terms of ten consecutive weeks each; and such employment shall not continue in any case beyond the time when such certificate expires.

No child under 16 years of age shall be employed in any factory, workshop, or mercantile establishment unless the person or corporation employing him procures and keeps on file the certificate required in the case of such child by the following section, and also keeps on file a full and complete list of such children employed therein.

The certificate of a child under 14 years of age shall not be signed until he presents to the person authorized to sign the same an employment ticket as hereinafter prescribed, duly filled out and signed. The certificate and the employment ticket shall be separately printed, and shall be in the following forms, respectively, and the blanks therein shall be filled out and signed as indicated by the words in brackets:

EMPLOYMENT TICKET, LAWS OF 1894.

When [name of child], height [feet and inches], complexion [fair or dark], hair [color], presents a certificate duly signed, I intend to employ [him or her].

[Signature of intending employer or agent.]

[Town or city and date.]

AGE AND SCHOOLING CERTIFICATE, LAWS OF 1894.

This certifies that I am the [father, mother, or guardian] of [name of child], and that [he or she] was born at [name of town or city], in the county of [name of county, if known], and State [or country] of [name], on the [day and year of birth], and is now [number of years and months] old.

[Signature of father, mother, or guardian.]

[Town or city and date.]

Then personally appeared before me the above named [name of person signing] and made oath that the foregoing certificate by [him or her] signed is true to the best of [his or her] knowledge and belief. I hereby approve the foregoing certificate of [name of child], height [feet and inches], complexion [fair or dark], hair [color], having no sufficient reason to doubt that [he or she] is of the age therein certified.

[Signature of person authorized to sign, with official character or authority.]

[Town or city and date.]

In case the age of the child is under 14 the certificate shall continue as follows, after the word "certified":

And I hereby certify that [he or she] can read at sight and can write legibly simple sentences in the English language, and that [he or she] has attended the

[name] public [or private] day school according to law for [number of weeks, which must be at least thirty] weeks during the year next preceding this date, and that the last thirty weeks of such attendance began [date]. This certificate expires [date one year later than the above date].

[Signature of the person authorized to sign, with official character or authority.]

If the attendance has been at a private school, there must be added also the signature of a teacher of such school, followed by words certifying to school attendance. [Town or city and date.]

In case a child can not read and write, as above stated, the following may be substituted for the clause beginning "and I hereby certify" through to and including the word "language": "And I hereby certify that [he or she] is a regular attendant at the [name] public evening school"; but in such case the certificate shall only continue in force for as long a time as attendance of such child at such evening school is indorsed weekly during the session of such evening school, not exceeding the length of the public school year minus twenty weeks, in place of attendance at day school as now provided by law, with a statement from a teacher thereof certifying that his attendance continues regular. If attendance has been at a half-time school, forty weeks of such attendance must be certified to instead of thirty. The foregoing certificate must be filled out in duplicate and one copy thereof shall be kept on file by the school committee. Any explanatory matter may be printed with such certificate in the discretion of the school committee or superintendent of schools.

The following words shall appear on all age and schooling certificates after the name of the town or city and date: "This certificate belongs to the person in whose behalf it is drawn, and it shall be surrendered to [him or her] whenever [he or she] leaves the service of the corporation or employer holding the same."

In cities and towns having a superintendent of schools, said certificate shall be signed only by such superintendent or by some person authorized by him in writing; in other cities and towns it shall be signed by some member or members of the school committee authorized by vote thereof: *Provided, however*, that no member of a school committee, or other person authorized as aforesaid, shall have authority to sign such certificate for any child then in or about to enter his own employment, or the employment of a firm of which he is a member, or of a corporation of which he is an officer or employee. The person signing the certificate shall have authority to administer the oath provided for therein, but no fee shall be charged therefor; such oath may also be administered by any justice of the peace.

The certificate as to the birthplace and age of the child shall be signed by his father, if living and a resident of the same city or town; if not, by his mother; or if his mother is not living, or if living is not a resident of the same city or town, by his guardian; if a child has no father, mother, or guardian living in the same city or town his own signature to the certificate may be accepted by the person authorized to approve the same.

No child who has been continuously a resident of a city or town since reaching the age of 13 years shall be entitled to receive a certificate that he has reached the age of 14 unless or until he has attended school according to law in such city or town for at least thirty weeks since reaching the age of 13, unless such child can read at sight and write legibly simple sentences in the English language, or is exempt by law from such attendance. Before signing the approval of the certificate of age of a child the person authorized to sign the same shall refer to the last school census taken under the provisions of section 3 of chapter 46 of the public statutes, and if the name of such child is found therein and there is a material difference between his age as given therein and as given by his parent or guardian in the certificate, allowing for lapse of time, or if such child plainly appears to be of materially less age than that so given, then such certificate shall not be signed until a copy of the certificate of birth or of baptism of such child, or a copy of the register of its birth with a town or city clerk, has been produced, or other satisfactory evidence furnished that such child is of the age stated in the certificate.

Any corporation or employer holding any age or schooling certificate shall deliver the same to the person in whose behalf it has been drawn when such person shall leave the employ of such corporation or employer.

The truant officers may, when so authorized and required by a vote of the school committee, visit the factories, workshops, and mercantile establishments in their several cities and towns and ascertain whether any children under the age of 14 are employed therein contrary to the provisions of this act, and they shall report any cases of such illegal employment to the school committee and to the chief of the district police or the inspector of factories for the district. The inspectors of factories and the truant officers, when authorized as aforesaid, may demand the names of all children under 16 years of age employed in such factories, workshops, and

mercantile establishments, and may require that the certificates and lists of such children provided for in this act shall be produced for their inspection. Such truant officers shall inquire into the employment, otherwise than in such factories, workshops, and mercantile establishments, of children under the age of 14 years, during the hours when the public schools are in session, and may require that the aforesaid certificates of all children under 16 shall be produced for their inspection, and any such officer or any inspector of factories may bring a prosecution against a person or corporation employing any such child, otherwise than as aforesaid, during the hours when the public schools are in session, contrary to the provisions of this act, if such employment still continues for one week after written notice from such officer or inspector that such prosecution will be brought, or if more than one such written notice, whether relating to the same child or to any other child, has been given to such employer by a truant officer or inspector of factories at any time within one year.

No person shall employ or permit to be employed a minor under 14 years of age, or over, who can not read and write in the English language, and who resides in a city or town in this Commonwealth wherein public evening schools are maintained, and is not a regular attendant of a day school, or has not attained an attendance of 70 per cent or more of the yearly session of the evening school.

Whenever it appears that the labor of any minor who would be debarred from employment under a section of this act is necessary for the support of the family to which said minor belongs, or for his own support, the school committee of said city or town may, in the exercise of their discretion, issue a permit authorizing the employment of such minor within such time or times as they may fix: *Provided*, That such minor makes application to said school committee, or some person duly authorized by said committee, for such a permit before the opening of the yearly session of the evening school of said city or town; and the provisions of said section shall not apply to such minor so long as said permit is in force: *Provided also*, That if such minor has been prevented by sickness or injury from attending said evening school, as provided in said section, the school committee shall issue to such minor the permit provided for in this section, upon the presentation of the following blank properly filled and signed:

To the School Committee of the ——:

I hereby certify that I have attended —— from —— to ——; that said —— was sick or injured with ——; and that said —— was not in suitable physical condition to attend evening school for the term of —— days.

(Signed) —— ——.

(Dated) —— ——.

The school committee of every city and town in this Commonwealth wherein public evening schools are maintained shall furnish blanks in the above form upon application.

Every public building and every schoolhouse shall be kept in a cleanly state and free from effluvia arising from any drain, privy, or other nuisance, and shall be provided with a sufficient number of proper water-closets, earth closets, or privies for the reasonable use of the persons admitted to such public building or of the pupils attending such schoolhouse.

Every public building and every schoolhouse shall be ventilated in such a proper manner that the air shall not become so exhausted as to be injurious to the health of the persons present therein. The provisions of this section and the preceding section shall be enforced by the inspection department of the district police.

Whenever it appears to an inspector of factories and public buildings that further or different sanitary provisions or means of ventilation are required in any public building or schoolhouse in order to conform to the requirements of this act, and that the same can be provided without incurring unreasonable expense, such inspector may issue a written order to the proper person or authority, directing such sanitary provisions or means of ventilation to be provided, and they shall thereupon be provided, in accordance with such order, by the public authority, corporation, or person having charge of, owning, or leasing such public building or schoolhouse.

Any school committee, public officer, corporation, or person shall within four weeks after the receipt of an order from an inspector, as provided in the preceding section, provide the sanitary provisions or means of ventilation required thereby.

No person shall employ or exhibit, or sell, apprentice, or give away for the purpose of employing or exhibiting, a child under 15 years of age, in dancing, playing on musical instruments, singing, walking on a wire or rope, or riding or performing as a gymnast, contortionist, or acrobat in any circus or theatrical exhibition,

or in any public place whatsoever, or cause, procure, or encourage any such child to engage therein: *Provided*, That nothing in this section shall be construed to prevent the education of children in vocal and instrumental music, or their employment as musicians in any church, chapel, or school, or school exhibition, or to prevent their taking part in any concert or musical exhibition on the special written permission of the mayor and aldermen of a city or of the selectmen of a town.

No license shall be granted for a theatrical exhibition or public show in which children under 15 years of age are employed as acrobats, contortionists, or in any feats of gymnastics or equestrianism, or in which such children belonging to the public schools are employed or allowed to take part as performers on the stage in any capacity, or where in the opinion of the board authorized to grant licenses such children are employed in such a manner as to corrupt their morals or impair their physical health; but nothing herein contained shall prevent the giving of special permission as provided by the preceding section.

The following expressions used in this act shall have the following meanings: The expression "person" means any individual, corporation, partnership, company, or association. The expression "child" means a person under the age of 14 years. The expression "young person" means a person of the age of 14 years and under the age of 18 years. The expression "public building" means any building or premises used as a place of public entertainment, instruction, resort, or assemblage. The expression "schoolhouse" means any building or premises in which public or private instruction is afforded to not less than ten pupils at one time. The aforesaid expressions shall have the meanings above defined for them respectively in all laws of this Commonwealth relating to the employment of labor, whether heretofore or hereafter enacted, unless a different meaning is plainly required by the context.

A certificate of the age of a minor made and sworn to by him and by his parent or guardian at the time of his employment in a mercantile establishment shall be prima facie evidence of his age in any prosecution under the preceding section.

Every parent, guardian, or person authorized to sign the certificates prescribed by the sections of this act who certifies to any materially false statement therein shall be punished by fine not exceeding $50 or by imprisonment not exceeding thirty days, or by both.

Any person violating the provisions of this act, forbidding the employment of children in any circus or public place, shall be punished by fine not exceeding $200 or by imprisonment in the county jail not exceeding six months.

Every parent or guardian of a child under 14 years of age who permits any employment of such child contrary to the provisions of this act, and every owner, superintendent, or overseer of any factory, workshop, or mercantile establishment who employs or permits to be employed therein any child contrary to the provisions of this act, and any other person who employs any child contrary to the provisions of this act, shall for every such offense forfeit not less than $20 nor more than $50 for the use of the public schools of the city or town. A failure to produce to a truant officer or inspector of factories the certificate required by the provisions of this act shall be prima facie evidence of the illegal employment of the child whose certificate is not produced.

Any corporation or employer retaining any age or schooling certificate in violation of this act shall be punished by fine of $10.

Any person who employs or permits to be employed a minor in violation of the provisions of this act shall for each offense forfeit not less than $50 nor more than $100 for the use of the evening schools of such city or town.

Any school committee, public officer, corporation, or person neglecting for four weeks to obey an order from an inspector under this act shall be punished by fine not exceeding $100.

Any person violating any provision of this act where no special provision as to the penalty for such violation is made shall be punished by fine not exceeding $100.

Within one month after the passage of this act the chief of the district police shall cause a printed copy thereof to be transmitted to the school committee of every city and town in the Commonwealth.

Character of the instruction.—A school committee may approve a private school only when the teaching of the studies required by law is in the English language. (Section 2, act of June 21, 1894, regarding attendance.)

In every town there shall be kept, for at least six months and in towns of 4,000 or more inhabitants at least eight months in each year, at the expense of said town, by a teacher or teachers of competent ability and good morals, a sufficient number of schools for the instruction of all the children who may legally attend public school therein, in orthography, reading, writing, English grammar, geography, arithmetic, drawing, the history of the United States, and good behavior.

Algebra, vocal music, agriculture, sewing, physiology, hygiene, physical and industrial training, and the elementary use of hand tools shall be taught, by lectures or otherwise, in all the public schools in which the school committee deem it expedient. The Bible shall be read in the schools without comment.

Every town may, and every town containing 500 families or householders, according to the latest public census taken by the authority either of the Commonwealth or of the United States, shall, besides the schools prescribed above, maintain a high school, to be kept by a master of competent ability and good morals, who, in addition to the branches of learning before mentioned, shall give instruction in general history, bookkeeping, surveying, geometry, natural philosophy, chemistry, botany, the civil polity of this Commonwealth and of the United States, and the Latin language. Such high school shall be kept for the benefit of all the inhabitants of the town, ten months at least, exclusive of vacations, in each year, and at such convenient place or alternately at such places in the town as the legal voters at their annual meeting determine. And in every town containing 4,000 inhabitants the teacher or teachers of the schools required by this section shall, in addition to the branches of instruction before required, be competent to give instruction in the Greek and French languages, astronomy, geology, rhetoric, logic, intellectual and moral science, and political economy.

After the first day of September, 1895, every city of 20,000 or more inhabitants shall maintain as a part of its high school system the teaching of manual training. The course to be pursued in such instruction shall be subject to the approval of the State board of education.

Two adjacent towns, having each less than 500 families or householders, may form one high school district for establishing such a school, when a majority of the legal voters of each town, in meetings called for that purpose, so determine. The school committees of the two towns so united shall elect one person from each of their respective boards, and the two so elected shall form the committee for the management and control of such school, with all the powers conferred upon school committees and prudential committees. The committee thus formed shall determine the location of the schoolhouse authorized to be built by the towns forming the district, or if the towns do not determine to erect a house, shall authorize the location of such school alternately in the two towns. In the erection of a schoolhouse for the permanent location of such school, in the support and maintenance of the school, and in all incidental expenses attending the same, the proportions to be paid by each town, unless otherwise agreed upon, shall be according to its proportion of the county tax.

Evening schools shall be maintained by towns having 10,000 inhabitants for the instruction of persons over 12 years of age in orthography, reading, writing, geography, arithmetic, drawing, history of the United States, good behavior, and such other branches as the school committee may deem expedient, and any town may establish such a school. Every town of 50,000 inhabitants must maintain an evening high school.

Any town may, and every city and town having more than 10,000 inhabitants shall, annually make provision for giving free instruction in industrial or mechanical drawing to persons over 15 years of age, in either day or evening schools, under the direction of the school committee.

Any town may establish and maintain one or more industrial (including nautical) schools, which shall be under the superintendence of the school committee, who shall employ the teachers, prescribe the arts, trades, and occupations to be taught therein, and have the general control and management thereof, but attendance upon such schools shall not take the place of the attendance upon public schools required by law.

The school committees of cities and towns maintaining free evening schools are hereby authorized to employ competent persons to deliver lectures on the natural sciences, history, and kindred subjects in such places as said committees may provide. Said committees are hereby authorized to provide cards or pamphlets giving the titles and names of authors of books of reference contained in the local public libraries on the subject-matter of said lectures.

Text-books.—The school committee shall direct what text-books shall be used in the public schools, but a change in those in use may be made by a vote of two-thirds of the whole committee at a meeting of the committee, notice of the intended change having been given at a previous meeting. The school committee shall purchase, at the expense of the city or town, the necessary text-books and other supplies and loan them to the pupils.

Buildings.—Every town shall provide and maintain a sufficient number of schoolhouses, properly furnished, hygienically arranged, and conveniently located for the accommodation of all the children therein entitled to attend the public schools;

and the school committee, unless the town otherwise directs, shall keep such houses in good order, and shall procure a suitable place for the schools where there is no schoolhouse, and provide fuel and all other things necessary for the comfort of the scholars therein at the expense of the town. A town which refuses or neglects for one year to comply with the requirements of this section shall forfeit not less than $500 nor more than $1,000. Any school committee neglecting for four weeks after the receipt of an order from an inspector of buildings to provide the sanitary provisions required by law shall be fined $100. [See also under Schools; attendance, where the hygienic requirements are set forth in the compulsory school law.]

Whoever willfully and maliciously or wantonly and without cause destroys, defaces, mars, or injures a schoolhouse or any of its appurtenances shall be fined $500 or imprisoned in the jail not exceeding one year.

Finances.

Funds (permanent or special).—Taxation.—The Massachusetts school fund.

The present school fund of the Commonwealth, together with such additions as may be made thereto, shall constitute a permanent fund to be called "the Massachusetts school fund," the principal of which shall not be diminished, and the income, including the interest on notes and bonds taken for sale of Maine lands and belonging to said fund, shall be appropriated as follows [The fund is now nearly $4,000,000, and is increased annually by $100,000 from the State treasury until it shall be $5,000,000]:

One-half of the annual income of the school fund of the Commonwealth shall be apportioned and distributed, without a specific appropriation, for the support of public schools, and in the manner following, to wit: Every town complying with all laws in force relating to the distribution of said income and whose valuation of real and personal estate, as shown by the last preceding assessors' valuation thereof, does not exceed $500,000, shall annually receive $300; every such town whose valuation is more than $500,000 and does not exceed $1,000,000 shall receive $250, provided that any such town for any year for which its rate of taxation shall be $18 or more on $1,000 shall receive $50 additional; and every such town whose valuation is more than $1,000,000 and does not exceed $2,000,000 shall receive $100; and every such town whose valuation is more than $2,000,000 and does not exceed $3,000,000 shall receive $50. The remainder of said half shall be distributed to all towns whose valuation does not exceed $3,000,000 and whose annual tax rate for the support of public schools is not less than one-sixth of their whole tax rate for the year, as follows: Every town whose public school tax is not less than one-third of its whole tax shall receive a proportion of said remainder expressed by one-third; every such town whose school tax is not less than one-fourth of its whole tax shall receive a proportion expressed by one-fourth; every such town whose school tax is not less than one-fifth of its whole tax shall receive a proportion expressed by one-fifth, and every such town whose school tax is not less than one-sixth of its whole tax shall receive a proportion expressed by one-sixth. All money appropriated for other educational purposes, unless otherwise specially provided, shall be paid from the other half of said income. If the income in any year exceeds such appropriations the surplus shall be added to the principal of said fund.

The income of said fund, appropriated to the support of public schools, shall be apportioned by the secretary and treasurer (who, as Commissioners of the School Fund, manage and invest it) in the manner provided, and paid over by the treasurer to the treasurers of the several cities and towns.

No such apportionment and distribution shall be made to a city or town which has not maintained a school as required by law; or which, if containing the number of families or householders named in the law, has not maintained, for at least thirty-six weeks during the year, exclusive of vacations, a high school such as is mentioned therein; or which has not made the returns required and complied with the laws relating to truancy; or which has not raised by taxation for the wages and board of teachers, fuel for the schools, and care of fires and schoolrooms during the school year embraced in the last annual returns a sum not less than $3 for each person between the ages of 5 and 15 years belonging to such city or town on the 1st day of May of said school year.

The income of said funds received by the several cities and towns shall be applied by the school committees thereof to the support of the public schools therein; but said committees may, if they see fit, appropriate therefrom any sum, not exceeding

25 per cent of the same, to the purchase of books of reference, maps, and apparatus for the use of said schools.

The income of the Todd fund shall be paid to the treasurer of the board of education, to be applied by said board to specific objects in connection with the normal schools, not provided for by legislative appropriation.

Moneys received by a county treasurer under the provisions relating to dogs and not paid out for damages shall in the month of January be paid back to the treasurers of the cities and towns in proportion to the amounts received from such cities and towns; and the money so refunded shall be expended for the support of public libraries or schools. In Suffolk County moneys so received by the treasurer of a city or town, and not so paid out, shall be expended by the school committee for the support of public schools.

Taxation.—The several towns shall at their annual meetings, or at a regular meeting called for the purpose, raise such sums of money for the support of schools as they judge necessary; which sums shall be assessed and collected in like manner as other town taxes.

Any town may raise by taxation or otherwise a sufficient sum of money to be expended by the school committee, in their discretion, for the conveyance of pupils to and from the public schools. Any town not maintaining a school of academic grade, but which arranges for such instruction in the school of another town, may pay the necessary transportation expenses of the pupil.

RHODE ISLAND.

1. Organization of the System.

State board of education.—Commissioner of public schools.—Town school committee.—Town superintendent.—District trustees.—Truant officers.

State board of education.—The general supervision and control of the public schools of the State and the enforcement of all rules and regulations necessary for carrying into effect the laws in relation thereto, with such high schools, normal schools, and normal institutes as are or may be established and maintained wholly or in part by the State, shall be vested in a State board of education, which shall consist of the governor and lieutenant-governor ex officio, and of six other members, one from each of the counties of the State, with the exception of Providence County, which shall have two members. Two members of the board of education shall be elected annually at the May session of the general assembly from each county, the term of whose member has expired, who shall hold office three years. Vacancies are filled in the same manner. The governor shall be president and the commissioner of public schools secretary of the board, which shall hold quarterly meetings, unless specially convoked by its president or secretary. The board may grant for the purchase of books in any free public library the sum of $50 for the first 500 volumes it obtains, and $25 for every additional 500 volumes therein, provided that the annual payment shall not exceed the sum of $500. It shall prescribe the character of books which shall constitute such library and regulate its management so as to secure the free use of the same to the people of the town and neighborhood.

The board shall make an annual report to the general assembly. The members shall receive no compensation, but the expenses necessitated by the performance of their duties shall be paid after approval by the general assembly.

Commissioner of public schools.—The State board shall annually elect a commissioner of public schools, who shall devote his time exclusively to the duties of his office, and while unable to perform, the governor shall appoint a person to act as commissioner during the continuance of the disability. He may appoint a clerk to assist in the duties of his office, at an annual compensation not exceeding $750.

He shall visit, as often as practicable, every school district in the State for the purpose of inspecting schools and of diffusing as widely as possible by public addresses and personal communication to school officers, teachers, and parents a knowledge of the defects and of any advisable improvements in the administration of the system and the government and instruction of the schools. He shall endeavor to secure uniformity in text-books and promote the establishment of school libraries, and shall report annually to the board of education upon the condition of education in the State schools, with suggestions for their improvement.

Town school committee.—The school committee of each town shall consist of three residents of the town or of the same number as previous to the taking effect

of this act, divided as equally as may be into three groups, one group retiring from office annually. In a town abolishing all the school districts within its limits, the town school committee shall not be composed of more than seven persons. Vacancies are filled by the town council until the next annual election. The school committee shall meet at least four times in every year. A majority shall constitute a quorum unless the committee consist of more than six, when four shall be a quorum.

The committee may alter and discontinue districts, locate all school houses, examine applicants for teachers, shall visit by one or more of its number every public school in the town at least twice during each term, once within two weeks of its opening and once within two weeks of its close, examining the register, schoolhouse, library, studies, books, discipline, modes of teaching and of improving the school. It shall make rules and regulations for the attendance and classification of the pupils, for the introduction and use of text-books and works of reference, and for the instruction, government, and discipline of the public schools, and shall prescribe the studies to be pursued therein, under the direction of the commissioner of public schools, and it may suspend incorrigible children.

Where a town is not divided into districts, or shall vote to provide schools without reference to such division, the school committee shall manage and regulate such schools and draw orders for the payment of their expenses. Whenever the public schools are maintained by district organization, the committee shall apportion among the districts the town's proportion of the sum of $120,000 received from the State, and in addition at least one-fourth as much more from the town appropriation for the support of public schools; the remainder of the town appropriation and the moneys received from registry and dog taxes, from school funds, and other sources, shall be divided into two equal parts, one to be apportioned to the several districts according to the average attendance at the schools during the preceding year, the other to be apportioned at the discretion of the committee; provided always, that the total apportionment shall not be less than $180, and the district shall have reported in legal manner and form that one or more schools have been taught by a competent teacher in an approved building, that the "teachers' money" of the preceding year has been wholly used in paying teachers, and that the register has been properly kept and deposited. The committee shall make a report annually to the State commissioner and may reserve not more than $40 to defray the expenses of printing it.

Superintendent of town schools.—The school committee of each town shall elect a superintendent of the public schools of the town to perform, under the advice and direction of the committee, such duties and to exercise such powers as the committee shall assign him, and to receive such compensation as the town may vote.

District school trustees.—Each district shall annually elect a moderator, a clerk, a treasurer, a collector, and either one or three trustees. The trustees shall provide and have the custody of the schoolhouse and other property, and shall employ one or more qualified teachers for every fifty scholars in average daily attendance; shall see that the pupils are supplied with books, and shall provide the same at the expense of the district on failure of parent or guardian to furnish them. Whatever compensation is received by the trustees must be paid by tax levied on the district, and may not be taken out of State or town appropriations.

Truant officers.—The town council of each town and the board of aldermen of each city shall annually appoint one or more special constables and fix their compensation, who shall be truant officers, and who shall, under the direction of the school committee, inquire into all cases arising under the provisions of the compulsory attendance act or any ordinances made by the town or city appointing such officers, and shall alone be authorized, in case of violation of any of the provisions of this act or of any such ordinances, to make complaint therefor; they shall also serve all legal processes issued in pursuance of this act or of any such ordinances, but shall not be entitled to receive any fees for such service: *Provided, however,* That in case of the commitment of any person under the provisions of any section of this act or of any ordinance made in pursuance thereof, or for default of payment of any fine and costs imposed thereunder, such officer shall be entitled to the regular fees allowed by law for similar service. The truant officers and the school committees of the several towns and cities shall inquire into all cases of neglect of the duty prescribed by this act within their respective towns and cities, and ascertain the reasons, if any, therefor; and such truant officers or any of them shall, when so directed by the school committee, prosecute any person liable to the penalty provided above.

2. Teachers.

Appointment and qualifications.—Duties.—Preliminary training.—Meetings.

Appointment and qualifications.—No person shall be employed by any trustee to teach, as principal or assistant, in any school supported entirely or in part by the public money, unless he shall have a certificate of qualification signed either by the school committee of the town or by some person appointed by said committee or by the trustees of the normal school, the certificate to be valid for one year, if not otherwise specified, and may be revoked for cause. But no superintendent or school committeeman or trustee may teach in the schools of his town or district. The teacher must be of good moral character and aim to implant in the minds of children committed to his care the principles of morality and virtue. He shall keep a register of the scholars, their names, sex, names of parents or guardians, time of entry and withdrawal, daily attendance, and note by date the visit of a school officer. He shall also prepare the return of the district to the school committee of the town.

Preliminary training.—The normal school shall be under the management of the board of education and commissioner of public schools as a board of trustees. Tuition is free to State pupils having passed the required examination and given satisfactory assurances of their intention to teach in the State public schools at least one year after leaving the school. Graduates in the regular course shall, on recommendation of the principal, receive a diploma. Pupils having attended regularly one term, but living 5 miles distant from the school, may be allowed a sum not exceeding $10 for each quarter year for traveling expenses. The fund for such purpose, however, shall be limited to $1,500.

Meetings.—A sum not exceeding $500 shall be annually allowed to defray the necessary expenses and charges for teachers and lecturers and for teachers' institutes; and a sum not exceeding $300 shall be annually allowed, under the direction of the board of education, for publishing and distributing among the several towns educational publications, providing lectures on educational topics, and otherwise promoting the interests of education in the State.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—Schools must be taught for at least six months by a qualified teacher in an approved schoolhouse.

Every person having under his control a child between the ages of 7 and 15 years shall annually cause such child to attend for at least eighty full school days some public day school in the town or city in which such child resides; and while such child is not lawfully employed to labor at home or elsewhere said person shall cause such child to attend a public day school regularly during the days and hours that the public schools are in session in the city, town, or district where such child resides; and for every neglect of such duty the person so offending shall be fined not exceeding $20; provided, that if the person so charged shall prove or shall present a certificate made by or under the direction of the school committee, setting forth that the child has attended for the required period of time a private day school, approved by the school committee of such town or city, or that the child has been otherwise furnished for a like period of time with the means of education, or has already acquired the elementary branches of learning taught in the public schools, or that his physical or mental condition was such as to render such attendance inexpedient or impracticable, or that the child was destitute of clothing suitable for attending school, and that the person in charge of said child was unable to provide such clothing, or that the child has been excused by the school committee of the town in which such child resides, then such penalty shall not be incurred.

For the purposes of this act the school committee shall approve a private school only when the teaching therein is in the English language and when the persons in charge of such school shall keep the record of attendance of the pupils thereof upon the blanks provided by the State, and shall render to the school committee a detailed report of the attendance of every pupil for any specified time; provided, that the request for such report is made in writing and sets forth that a pupil is suspected of irregular attendance or truancy, and when they are satisfied that such teaching is thorough and efficient; but they shall not refuse to approve a private school on account of the religious teaching therein.

No child under 10 years of age shall be employed in any manufacturing, mechanical, or mercantile establishment, or by any telegraph or telephone company in this State, during the time that the public schools of the town or city in which said child may reside are in session, and any parent or guardian who permits such employments shall for every such offense be fined not exceeding $20.

No child between the ages of 10 and 15 years shall be so employed except during the vacations of the public schools of the city, town, or district in which such child resides, unless during the twelve months next preceding such employment he shall have attended school as provided by this act, or shall have already acquired the elementary branches of learning taught in the public schools, or shall have been excused by the school committee of the town or city in which such child resides; nor shall such employment continue unless such child shall have attended school as above provided each year, or until he shall have acquired the elementary branches of learning taught in the public schools.

No child between the ages of 10 and 15 years shall be so employed who does not present a certificate made by or under the direction of the school committee of the city or town of his compliance with the requirements of the preceding paragraph; and said certificate shall also give the place and date of birth of the child as nearly as may be, and every owner or overseer of any establishment or company shall keep such certificate on file so long as the child is employed. The form of said certificate shall be furnished by the secretary of the State board of education.

Every owner, superintendent, or overseer of any such establishment or company who employs or permits to be employed any child in violation of either of the two next preceding duties, and every parent or guardian who permits such employment, shall be fined not exceeding $20.

The truant officers shall, at least once in every school term, and as often as the school committee require, visit the establishments described in this act, in their respective towns and cities, and ascertain whether its provisions are duly observed, and report all violations thereof to the school committee.

The truant officers shall demand the names of the children under 15 years of age employed in such establishments or company in their respective towns and cities, and shall require the certificates of age and school attendance prescribed in this act to be produced for their inspection, and a refusal to produce such certificates shall be punished by a fine not exceeding $10.

Every owner, superintendent, or overseer of any such establishment or company who employs or permits to be employed therein a child under 15 years of age who can not write his name, age, and place of residence legibly, while the public schools in the town or city where such child lives are in session, shall for every such offense be fined not exceeding $20.

The town council of each town and city council of each city shall make all needful provisions and arrangements concerning habitual truants and children who may be found wandering about in the streets or public places therein, having no lawful occupation or business, not attending school and growing up in ignorance, and shall make such ordinances as will be most conducive to the welfare of such children and to the good order of such town or city, and shall designate or provide suitable places for the confinement, discipline, and instruction of such children.

Every minor convicted under an ordinance made under the provisions of this act of being an habitual truant or of wandering about the streets and public places of a town or city, or of having no lawful employment or business, or of not attending school and of growing up in ignorance, shall be committed to any institution of instruction or suitable place designated or provided for the purpose under the authority of said act for a period not exceeding two years.

Children so committed may, on satisfactory proof of amendment or for other sufficient cause, be discharged from such institution or place by the court which committed them.

The school committee of the several towns and cities shall annually report to the State board of education whether their towns or cities have made the provisions required by this act; and in case the town council of any town or the board of aldermen and city council of any city shall in any year refuse or neglect to comply with any of the provisions of this act as relates to them, after having been duly notified by the commission of public schools, 50 per cent of the money apportioned to such city or town from the State for school purposes shall be withheld until they have fulfilled the duties imposed by this act.

All fines under the provisions of this act shall inure and be applied to the support of public schools in the town or city where the offense was committed.

The district courts of the State shall have jurisdiction in their respective districts of all cases arising under this act and all ordinances passed in conformity with this act.

No officer making complaint under any of the provisions of this act, or under the provisions of any ordinance that may be passed in pursuance thereof, shall be required to give surety for costs; and such officer shall in no way become liable for any costs that may accrue on such complaint.

Character of instruction.—The school committee shall prescribe the studies to be pursued in the public schools, and shall include instruction in the injurious effects of stimulants and narcotics upon the human system. Any two or more adjoining school districts may by concurrent vote establish a school for the older and more advanced children of such districts. Evening schools must be maintained by the towns under the general supervision of the State board. [Instruction must be carried on in English.]

Text-books.—The school committee of every city and town shall purchase, at the expense of such city or town, text-books and other school supplies used in the public schools, and said text-books and supplies shall be loaned to the pupils free of charge, subject to rules and regulations prescribed by the committee.

In towns divided into districts, the district trustees shall provide, at the expense of the district, a suitable bookcase in each schoolroom for the books and supplies furnished by the school committee.

A change may be made in the schoolbooks in the public schools of any town by a vote of two-thirds of the whole committee, provided that no change be made in any text-book in a town oftener than once in three years, unless by the consent of the State board of education.

The sum of $3,000 shall be annually appropriated for the purchase of dictionaries, encyclopedias, and other works of reference; maps, globes, and other apparatus, to be distributed to towns or districts making an appropriation for the same purpose, each town to receive not more than $200 if not divided into districts, districts to receive not more than $20, provided they have raised at least double such sums.

Buildings.—All schoolhouses shall be located by the town school committee, established by the districts, when the town has not assumed control of schools, and be approved by the town school committee. No one shall maintain a nuisance. as swine in a pen, within 100 feet of the inclosure of a schoolhouse.

Finances.

Funds (permanent or special).—Taxation.

Permanent school fund.—The general treasurer, with the advice of the governor, shall have power to regulate the custody and safe-keeping of the fund for the support of public schools, and shall keep the same securely invested in the capital of some safe and responsible bank or banks or in bonds of towns or cities within this State. The money that shall be paid into the State treasury by auctioneers for duties accruing to the use of the State is appropriated annually to the permanent increase of the school fund. All money for the support of public schools appropriated to towns and by them forfeited shall be added to the permanent fund. [The registry and dog taxes are mentioned, and in general see Organization; Town school committee.]

Taxation.—The sum of $120,000, to be denominated "teachers' money," shall be annually paid out of the income of the permanent school fund and from other money in the treasury for the support of public schools to be apportioned among the several towns by the commissioner of public schools as follows: The sum of $100 shall be apportioned for each school not to exceed 15 in number in any one town, the remainder to be apportioned in proportion to the number of children from 5 to 15 years of age, inclusive, in the several towns according to the school census then last preceding. No town shall receive any part of this appropriation unless it raise by tax for the support of public schools a sum equal to the amount it may receive from the State treasury, and neglect or refusal to levy this tax by the 1st day of July forfeits the delinquent town's share of the State appropriation. There shall be an annual appropriation for the support and maintenance of evening schools in the several towns under the general supervision of the State board of education, who shall apportion said appropriation among them.

Every town shall establish and maintain, with or without forming districts, a sufficient number of public schools, and towns may at any legal meeting grant and vote such sums of money as they shall judge necessary for the support of schools, purchase of sites for and the erection and repair of schoolhouses, and for the establishment and maintenance of school libraries.

CONNECTICUT.

1. Organization of the System.

State board of education.—Secretary of the State board.—Agents of the State board.—Town school visitors.—Acting school visitor or superintendent.—District committee.—Board of education.—Town school committee.—Town high school committee.—Truant officers.

State board of education.—There shall be a State board of education, composed of the governor, lieutenant-governor, its secretary, and four persons to be appointed by the general assembly for four years. Three members shall constitute a quorum at the meetings of the board. The term of one member shall expire every year. Vacancies not filled by the general assembly shall be filled by the governor and lieutenant-governor for the unexpired term of office.

The board shall have general supervision and control of the educational interests of the State; may direct what books shall be used in all its schools, but shall not direct any book to be changed oftener than once in five years; shall prescribe the form of registers to be kept in said schools and the form of blanks and inquiries for the returns to be made by the various school boards and committees; shall keep itself informed as to and ascertain the condition and progress of the public schools in the State, and shall seek to improve the methods and promote the efficiency of teaching therein, by holding, at various convenient places in the State, meetings of teachers and school officers, for the purpose of instructing in the best modes of administering, governing, and teaching public schools, and by such other means as they shall deem appropriate; but the expenses incurred in such meetings shall not exceed the sum of $3,000 in any year. It shall, on or before the Monday after the first Wednesday in January in each year, submit to the governor a report containing a printed abstract of said returns, a detailed statement of the doings of the board, and an account of the condition of the public schools, of the amount and quality of instruction therein, and such other information as will apprise the general assembly of the true condition, progress, and needs of public education. But not more than 6,000 copies of the report shall be printed.

The board shall appoint a secretary and shall have the power to appoint agents to secure the due observance of the laws relating to the instruction of children, and to grant, upon public examination, a certificate to teach.

It shall have power to expend the sums of money necessary to execute the powers conferred upon it, and shall semiannually file with the comptroller a certified account of all State moneys received or disbursed by it. All orders for drawing State money shall be signed by the secretary and countersigned by a committee of the board. It shall maintain and have general superintendence of the normal schools.

Secretary of the State board of education.—The State board of education shall appoint a secretary who shall under its direction and control perform such services in the execution of its duties and powers as the board may prescribe, and who shall be paid such salary as the board may determine. The board may also engage such clerks as are necessary to assist the secretary in performing his duties.

Agents of the State board of education.—The board shall have power to appoint an agent to secure the due observance of the laws relating to the instruction of children, and such agent shall make written report of his work to the secretary semiannually.

The state board of education may appoint agents, under its supervision and control, for terms of not more than one year, who shall enforce the law regarding the employment of children under 13 years of age. These agents shall be paid not to exceed $5 per day for time actually employed and necessary expenses, and their accounts shall be approved by the board and audited by the comptroller. The agents so appointed may be directed by the board to enforce the provisions of the law requiring the attendance of children in school and to perform any duties necessary or proper for the due execution of the duties and powers of the board.

School visitors of towns.—There shall be in every town a board of school visitors, composed of three, six, or nine members, as such town may determine, divided into three equal classes. The first class shall hold office until the next annual town meeting, the second class until the second annual town meeting, and the third class until the third annual town meeting following, and until others are elected in their places; provided that when said board is composed of only three members they shall not be so divided into classes, and shall be elected for three years. Should any vacancy occur, the remaining members of the board may fill it till the next annual town meeting, when all vacancies shall be filled in the manner prescribed

in the succeeding section, and the ballots shall distinctly specify the vacancy to be filled.

School visitors shall be chosen by ballot. If the number to be chosen be two, four, six, or eight, no person shall vote for more than half of such number. If the number to be chosen be three, no person shall vote for more than two; if five, not more than three; if seven, not more than four; if nine, not more than five. That number of persons sufficient to fill the board who have the highest number of votes shall be elected. In case of a tie, that person whose name stands first or highest on the greatest number of ballots shall be elected.

Each board of school visitors shall annually choose from themselves a chairman and a secretary. They shall prescribe rules for the management, studies, classification, and discipline of the public schools, and, subject to the control of the State board of education, the text-books to be used; shall, as a board, or by a committee by them appointed, examine all persons desiring to teach in the public schools, and give to those with whose moral character and ability to teach they are satisfied, if found qualified to teach reading, writing, arithmetic, and grammar thoroughly, the influence of alcohol and narcotics upon the human system, and the rudiments of geography and history, and, if required by the board, of drawing, a certificate either authorizing the holder to teach in any district in the town so long as desired, without further examination, unless specially ordered, or to teach in any such district during the ensuing term only, or to teach only in a district therein named during such term; and if a person is examined in and found qualified to teach other branches besides those required in all cases, such branches shall be named in his certificate. They shall revoke the certificates of such teachers as shall at any time be found incompetent to teach or to manage a school, or fail to conform to the requirements of the board; shall, if the town so direct, employ the teachers for all its public schools, after consulting with the several district committees; shall make proper rules for the arrangement, use, and safe-keeping of the district and high school libraries provided in part by the State, and approve the books selected therefor; shall fill vacancies in district offices, fix sites and approve plans for schoolhouses, and superintend any high or graded public school and evening schools; shall make returns of the number of persons over 4 and under 16 years of age, of the number 4 to 16 attending public or private schools, how many nonattendants were under 5, how many over 5 and under 8, how many over 8 and under 14, and how many over 14 and under 16 years of age. Unless these returns are duly made no money may be obtained by the school visitors from the State treasury. At the close of each term the school visitors shall certify to the selectmen that each school had been kept in all respects according to law, and shall submit a report to the town at its annual meeting, all reports and returns being duly sworn to or affirmed.

Acting school visitor.—The board of school visitors shall annually assign the duty of visiting the schools of the town to one or more of their number. If only one is assigned, he shall be called the acting school visitor or superintendent, who shall visit such schools at least twice during each term, once within four weeks after the opening, and again during the four weeks preceding the close, at which visit the schoolhouse and outbuildings, school register, and library shall be examined, and the studies, discipline, mode of teaching, and general condition of the school investigated. Half a day shall be spent in each school so visited, unless he is otherwise directed by the board. He shall, one week at least before the annual town meeting, submit to the board a full written report of his proceedings, and of the condition of the several schools during the year preceding, with plans and suggestions for their improvement, which will be presented to the town with the board's report.

Boards of education, town committees, and boards of school visitors may appoint a person, not one of their own number, to be acting school visitor or superintendent of schools, who shall have all the powers, perform all the duties, and receive the pay prescribed by law for acting school visitors, and any town at its annual town meeting may fix the compensation of the acting school visitor or superintendent.

Acting school visitors shall receive $2 a day, or pro rata for a fraction of a day, each, for the time actually employed in the performance of their duties, and such further compensation as the town may fix at an annual meeting.

District committee and board of education.—Each town shall have power to form, unite, alter, and dissolve and completely abolish school districts and parts of districts within its limits, but no new district shall be formed having fewer than 40 persons 4 to 16 years of age. In the absence of any special appointment the committee of any school district shall be its ex officio agent. Every district shall be a body corporate, and have power to erect schoolhouses and fur-

nish them, to establish schools (if failing to do so the town is empowered to act), to establish and maintain a library, to employ teachers (except when the town directs its school visitors to perform that duty), and pay the wages of the teachers it employs, to levy taxes and borrow money for the forementioned purposes, to make all lawful agreements and regulations for education, and to elect its directors, as follows:

Each school district shall choose, by ballot, at the annual meeting, a committee of not more than three persons, a clerk, who shall be sworn, and a treasurer and collector, who shall hold their respective offices for the period of one year and until others are chosen and qualified; and any resident of the district so chosen, who shall refuse or neglect to perform the duties of the office, shall pay $5 to said district. The members of the district committee shall be residents of the district, but the other offices may be filled by any inhabitants of the town to which said district belongs.

Any school district having by its last enumeration not less than 200 children between 4 and 16 years of age may, at any annual meeting, due notice being inserted in the call therefor, order that its committee shall consist of three persons chosen by ballot, divided into three classes holding office for one, two, and three years, and that annually thereafter one member shall be chosen by ballot, to hold office for three years. Should any vacancy occur, the remaining members of the committee may fill it until the next annual district meeting, when all vacancies shall be filled. Whenever any district has appointed its committee as herein provided, such district may, at any special meeting called for the purpose, vote that it will no longer so appoint its committee, and thereupon the terms of office of all the members of its committee shall end at its next annual meeting, and thereafter its committee shall be appointed according to the provisions of the general law.

In all elections of officers of school districts, a majority of the votes cast shall be required to elect, unless otherwise expressly provided.

School societies organized under the act of 1855 which are not coextensive with the towns in which they are situated (i. e., are cities?) shall be and remain school districts of the towns, but without the jurisdiction of its school visitors.

Except that each shall annually choose, on the third Monday of September, instead of a district committee, a board of education consisting of six or nine persons, who shall be chosen by ballot, one-third to be chosen each year, to serve for three years and until others are elected in their places. That number of persons sufficient to fill the board who have the highest number of votes shall be elected. Said board shall have all the powers and be subject to all the duties of district committees, and shall also have the general superintendence of the public schools in the district and the management of its property; shall lodge all bonds, leases, notes, and other securities with the treasurer of said district, unless the same have been intrusted to others by the grantors or the general assembly; pay into the treasury of the district all moneys which they may receive for the support of schools; determine the number and qualifications of the scholars to be admitted into each school; supply the requisite number of qualified teachers; ascertain annually during the first two weeks of September the expense of maintaining the schools under their superintendence during the year ending the 31st day of the previous August, and report the same, with the amount of moneys received toward the payment thereof, to the district at a meeting to be held on the third Monday of September in each year; shall at the same time make a full report of their doings and the condition of such schools and all important matters concerning the same, and shall perform all lawful acts required of them by the district or necessary to carry into effect the powers and duties herein defined. In general, shall possess all the powers and be subject to all the duties granted and imposed on the school visitors of the town.

Town school committee.—Any town may abolish all the school districts and parts of school districts within its limits and assume and maintain control of the public schools therein, subject to such requirements and restrictions as are or may be imposed by the general assembly, and for this purpose every such town shall constitute one school district, having all the powers and duties of a school district, with the exceptions hereinafter stated.

All business relating to public schools in such towns shall be transacted at town meetings.

It shall also be the duty of the selectmen to call a special meeting of the town for the purpose of electing by ballot a school committee of the number determined upon at a special meeting held for that purpose, or, if such town shall at such meeting have failed to fix such number, of the number of six, nine, or twelve, as said selectmen may determine.

If the number of the committee to be elected shall be six or twelve, no per-

son shall vote for more than half that number; if the number shall be nine, no person shall vote for more than five; and the six, nine, or twelve persons, as the case may be, receiving at such election the highest number of votes shall be the school committee of said town for the respective terms as hereinafter provided.

The members of such committee so elected shall divide themselves into three equal classes, holding office, respectively, until the second, third, and fourth subsequent annual town elections of said town, at which elections, and every annual election subsequent to the last thereof, two, three, or four members, as the case may be, shall be elected by ballot for a term of three years, in the manner prescribed for the election of school visitors.

The school committee in such town shall have in general the powers and duties of district committees and boards of school visitors (*q. v.*).

Town high school committee.—Any town may choose, by ballot, a committee of not more than five residents of the town, who shall have all such powers and duties in relation to public high schools as are by law imposed upon district committees in relation to district schools.

Truant officers.—Every town and the mayor and aldermen of every city having truancy regulations shall annually appoint three or more persons, who alone shall be authorized to prosecute for violations thereof. The selectmen of a town may appoint committees of school districts and janitors of school buildings and other persons special truant officers. The police in the cities, and bailiffs, constables, sheriffs, etc., in their jurisdictions shall arrest all boys between 8 and 16 years of age who habitually wander about the streets or public places during school time, and may stop any boy under 16 years of age during such hours and ascertain whether he be a truant from school, and if he be shall send him to such school. [See also under Organization—State board.]

2. Teachers.

Appointment and qualifications.—Duties.—Preliminary training.—Meetings.

Appointment and qualifications.—See under Organization—School visitors.

No person elected to the office of school visitor or town committee shall be employed as teacher within his town.

No teacher of a public school shall be employed by school visitors, boards of education, district committees, town committees, or high school committees until he has received a certificate of approbation, signed by a majority of the board of school visitors, or by all the committee by them appointed;[1] nor shall any teacher be entitled to any wages, so far as the same are paid out of any public money appropriated to schools, unless he can produce such certificate, dated previous to the opening of his school.

The teacher of every public school shall keep and fill out the school register provided by the State, in the manner and form required, and deliver it at the close of each term to the school visitors; and no teacher shall be entitled to receive any pay unless such register shall have been so kept and filled out during the time for which any payment may be made.

The State board of education shall maintain normal schools as seminaries for training teachers in the art of instructing and governing in the public schools of this State, and such sum as the State board of education may in each year deem necessary for their support, not exceeding in any year $80,000, shall be annually paid therefor from the treasury of the State on the order of said board. But the board shall not expend any money for any normal school hereafter established until the town, city, or city school district in which it is located shall have agreed in writing with the board to furnish, and shall have furnished, schools in suitable and sufficient buildings in connection with the training department of the normal school. [The board may establish and maintain "model schools" in which the pupils of the normal schools shall have an opportunity to practice modes of instruction and discipline.]

The number of pupils in each school shall be determined by the State board of education. Said board may make regulations governing the admission of candidates. To all pupils admitted to [any ?] normal school all its privileges, including tuition, shall be gratuitous; no persons, however, shall be entitled to these privileges until they have filed with said board a written declaration that their object in securing admission to such school is to become qualified to teach in public schools, and that they intend to teach in the public schools of this State.

---

[1] May be examined by (*a*) State Board of Education, (*b*) school visitors, (*c*) boards of education, and (*d*) town committee.

The school visitors in each town shall annually, upon request, forward to said board the names of such persons as they can recommend as suitable persons in age, character, talents, and attainments to be received as pupils in said school. The State board of education shall expend the funds provided for the support of normal schools, appoint and remove their teachers, and make rules for their management; shall file semiannually with the comptroller, to be audited by him, a statement of the receipts and expenses on account of them, and shall annually make to the governor a report, for transmission to the general assembly, of their condition.

Meetings.—See under Organization—State board of education.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—All parents and those who have the care of children shall bring them up in some honest and lawful calling or employment and instruct them or cause them to be instructed in reading, spelling, writing, English grammar, geography, and arithmetic, and every parent or other person having control of any child over 8 and under 16 years of age whose physical or mental condition is not such as to render its instruction inexpedient or impracticable, shall cause such child to attend a public day school regularly during the hours and terms while the public schools in the district wherein such child resides are in session or to elsewhere receive thorough instruction during said hours and terms in studies taught in public schools. But children over 14 years of age shall not be subject to the requirements of this section while lawfully employed to labor at home or elsewhere. But this section shall not be construed to exempt any child who is enrolled as a member of a school from any rule concerning regularity of attendance which has been enacted by the town school committee, board of visitors, or board of education having control of school.

Each week's failure on the part of any person to comply with the provisions of the preceding section shall be a distinct offense, punishable with a fine not exceeding $5. But said penalty shall not be incurred when it appears that the child is destitute of clothing suitable for attending school and the parent or person having control of such child is unable to provide such clothing, or its mental or physical condition is such as to render its instruction inexpedient or impracticable. All offenses concerning the same child shall be charged in separate counts, joined in one complaint. When a complaint contains more than one count, the court may give sentence on one or more counts and suspend sentence on the remaining counts. If at the end of twelve weeks from the date of the sentence it shall appear that the child concerned has attended school regularly during that time, then judgment on such remaining counts shall not be executed.

Attendance of children at a school other than public shall not be regarded as compliance with the provisions of the laws of the State requiring parents and other persons having control of children to cause them to attend school, unless the teachers or persons having control of such school shall keep a register of attendance in form and manner prescribed by the State board of education for the public schools, which register shall at all times during school hours be open to the inspection of the secretary and agents of the State board of education, and shall make such reports and returns concerning the school under their charge to the secretary of the State board of education as are required from the school visitors concerning the public schools, except that no report concerning expenses shall be required; and it shall be the duty of the secretary of the State board of education to furnish to the teachers or persons having charge of any school, on their request, such registers and blanks for returns as may be necessary for compliance with the provisions of this section.

No child under 14 years of age shall be employed in any mechanical, mercantile, or manufacturing establishment. Any person acting for himself or as agent in any way whatever of any mechanical, mercantile, or manufacturing establishment who shall employ or authorize or permit to be employed in such establishment any child in violation of the preceding section shall be fined not more than $60, and every week of such illegal employment shall be a distinct offense, provided that no person shall be punished under this section for the employment of any child when at the time of such employment the employer shall demand and thereafter during such employment keep on file the certificate of any town clerk, or of the teacher of the school where such child last attended, stating that such child is more than 13 years of age, or a like certificate of the parent or guardian of such child in such cases only where there is no record of the child's age in the

office of the town clerk and such child has not attended school in this State. Any parent or guardian who shall sign any certificate that his child or ward is more than 14 years of age when in fact such child or ward is under 14 years of age shall be fined not more than $60.

No child under 14 years of age who has resided in the United States nine months shall be employed to labor unless such child shall have attended a day school in which instruction has been regularly and thoroughly given in the branches of education required in the public schools during at least twelve weeks or sixty full school days of the twelve months next preceding any month in which such child shall be so employed nor unless six weeks at least of this attendance have been consecutive. Any person who shall employ a child contrary to the provisions of this section shall be fined not more than $60.

No person over 14 and under 16 years of age who can not read and write shall be employed in any town where evening schools are established unless he can produce, every school month of twenty days, a certificate from the teacher of an evening school showing that he has attended such school twenty consecutive evenings in current school year, and is a regular attendant. Any person who shall employ a child contrary to the provisions of this act shall be fined not more than $50.

It shall be the duty of every parent, or other person having control of a child under 14 years of age, to furnish the employer of such child a certificate signed by the teacher, school visitor, or committee of the school which the child attended, showing that the child has attended school as required by the preceding section. The employer of any such child shall require such certificate, shall keep it at his place of business during the time the child is in his employment, and shall show the same when demanded, during the usual business hours, to any school visitor of the town where the child is employed, or to the secretary or agent of the State board of education. Said certificate shall be evidence that the child has attended school as the law requires.

Any parent, or any person having control of a child, who, with intent to evade the provisions of this chapter, shall make any false statement concerning the age of such child, or the time such child has resided in the United States, or shall instruct such child to make any such false statement, shall be fined not more than $7 or be imprisoned not more than thirty days.

The school visitors in every town shall, once or more in every year, examine into the situation of the children employed in all its manufacturing establishments. and ascertain whether all the provisions of this chapter are duly observed, and report all violations thereof to one of the grand jurors of the town.

The selectmen, in every town, shall inspect the conduct of the heads of families, and if they find any who neglect the education of the children under their care, may admonish them to attend to their duty; and if they continue negligent, whereby the children grow rude, stubborn, and unruly, they shall, with the advice of a justice of the peace, take such children from those who have the charge of them, and bind them out to some proper master or to some charitable institution or society incorporated in this State for the care and instruction of such children, males till 21, and females till 18 years of age, that they may be properly educated and brought up in some lawful calling.

Each city and town may make regulations concerning habitual truants from school, and children between the ages of 7 and 16 years wandering about its streets or public places, having no lawful occupation, nor attending school, and growing up in ignorance; and such by-laws, also, respecting such children, as shall conduce to their welfare and to public order, imposing suitable penalties, not exceeeding $20 for any one breach thereof; but no such town by-laws shall be valid until approved by the superior court in any county.

Any boy arrested thrice for truancy, if not immediately returned to school, shall be taken before a judge of the criminal or police court or any justice of the peace, and if it appear that the boy is idle, vicious, and truant, he may be committed to a reformatory institution. Upon the request of the parent or guardian of any girl between 8 to 16 years of age a warrant may be issued for her arrest, and the facts appearing against her, she may be sent to a reformatory institution for girls.

Public schools shall be maintained for at least thirty-six weeks in every school district, and no town shall receive any money from the State treasury for any district unless the school therein has been kept during the time herein required, but no school need be maintained in any district in which the average attendance of persons at the school in said district during the preceding year, ending the 31st day of August, was less than eight. And said schools shall be open to all children over 4 years of age in the respective districts, without discrimination on account of race or color.

Character of instruction.—In the public schools shall be taught, by teachers found duly qualified by the school visitors or other legally qualified body, reading,

spelling, writing, English grammar, geography, and arithmetic, and such other studies, including training in manual arts and the principles of vocal and instrumental music, as may be prescribed by the board of school visitors.

In addition to the schools required by law in every town, any town may establish and maintain schools of a higher grade within its limits, and for such purpose purchase, receive, hold, and convey any property; build and repair schoolhouses; lay taxes, and make contracts and adopt regulations for the management of such schools.

Any town or school district may establish and maintain a kindergarten school, which any child over 3 and under 7 years of age, residing in such town or school district, may attend.

Every town may, and towns of 10,000 or more shall establish and maintain, in addition to the schools required by law, public evening schools for the instruction of persons over 14 years of age in such studies as may be prescribed by the board of school authorities of such town. Any town of fewer than 10,000 may establish such evening schools. [The pecuniary assistance given by State to evening schools is given under Finance.]

Text-books.—Any town, at its annual meeting, may direct its school visitors, or board of education, or town committee, to purchase at the expense of said town the text-books and other school supplies used in the public schools of said town, and said text-books and supplies shall be loaned to the pupils of said public schools free of charge, subject to such rules and regulations as the school visitors or the board of education or town committee may prescribe.

Buildings.—No district shall be entitled to receive any money from the State or town unless it has a schoolhouse and outbuildings satisfactory to the board of school visitors.

No new schoolhouse shall be built except according to a plan approved by the board of school visitors and by the building committee of such district, nor at an expense exceeding the sum which the district may appropriate therefor.

The vote of two-thirds of those present and voting at a meeting of the district shall be necessary to fix or change the site of a schoolhouse; but if such two-thirds vote can not be obtained in favor of any site, the school visitors of any town adjoining the town or either of the towns in which such district is, on application of the district, shall, after conferring with the school visitors of the town or towns in which such district is situated, fix the site, and make return to the town clerk of the town in which such site is to be, and shall receive a reasonable compensation for their services from said district.

Any school district may take land which has been fixed upon as a site, or addition to a site, of a schoolhouse for a public school, and which is necessary for such purposes, and for necessary out buildings and convenient accommodations for its schools, upon paying to the owner just compensation.

Any person willfully injuring a schoolhouse or its appurtenances shall be fined $20 or imprisoned ninety days, or both. Any person who shall enter a place of instruction with criminal intent shall be imprisoned not more than four years.

No schoolhouse premises may be inclosed with barbed wire, nor, under penalty of $25–$100, display the flag or emblem of any foreign nation.

4. Finances.

Funds (permanent and special).—Taxation.

School fund of Connecticut.—The fund called the school fund shall remain a perpetual fund, the interest of which shall be inviolably appropriated to the support and encouragement of the public or common schools throughout the State, and for the equal benefit of all the people thereof. The value and amount of the fund shall, as soon as practicable, be ascertained in such manner as the general assembly may prescribe, be published, and recorded in the comptroller's office; and no law shall ever be made authorizing said fund to be diverted to any other use than the encouragement and support of public or common schools among the several school societies as justice and equity shall require. (Constitution of Connecticut.)

The income of the school fund which, after deducting all expenses attending its management, shall remain in the treasury on the 28th day of February in each year, and also $1.50 for every person between 4 and 16 years of age belonging to any school district, as ascertained from the last returns of the school visitors, shall annually, as soon as may be after said day, be divided and distributed by the comptroller among the several towns in proportion to the number of persons in each between the ages of 4 and 16 years, as ascertained from said returns; and he shall transmit the amount distributed to each town to its treasurer, on the application of its school visitors or of its school committee, if such town constitute but one

school district; but no such money shall be transmitted to any town until the comptroller shall have received from its school visitors or committee a certificate signed by them or their chairman and secretary, and substantially in the following form:

We, the school visitors of the town of ———, certify that the schools in said town have been kept for the period required by law during the year ending the 31st day of August last, by teachers duly examined and approved, and have been visited according to law; and that all moneys drawn from the public treasury by said town for said year appropriated to schooling have been faithfully applied and expended in paying for teachers' wages, and for no other purpose whatever.

Dated at ———, this —— day of ———, A. D. ——.

———— ————,
———— ————,
School Visitors.

To the COMPTROLLER.

Whenever it shall be found that the amount of income from the school fund is not sufficient to make a distribution of 75 cents for each enumerated child 4 to 16 years of age, it shall be the duty of the comptroller, upon the written request of the commissioner of the school fund, to draw upon the treasurer to an amount sufficient to make good the deficiency in the income of the school fund to meet the distribution of not less than 75 cents per capita required by law.

Town deposit fund.—The money received from the United States in pursuance of the act of Congress of 1836 shall be or remain deposited with the several towns which have received or shall agree to receive it, on the terms hereinafter specified, in the proportion established by law; and the treasurer shall deliver it to the agents of such towns as have not received it, on receiving receipts therefor signed by such agents and a certified copy of the vote of the town to receive its proportion of said money on the terms and conditions herein specified and appointing an agent to receive the same.

The condition on which any town shall receive its share of the said money shall be that it shall keep the money as a deposit in trust for the State, and account for the same when called for; and that until called for it shall appropriate the entire income thereof annually for the support of public schools therein.

Taxation.—The school visitors and selectmen in each town shall meet as a joint board in June annually and prepare a statement of the estimated cost of maintaining the public schools in the town, and shall immediately notify the committees of the several school districts of the amounts so fixed. They, as a joint board, shall also report the same fact to the town in annual meeting, and in October shall fix the amounts necessary to pay the teachers, for fuel and other incidental expenses of the schools in the town, and shall notify the districts of the several amounts so fixed. All taxes imposed by any school district shall be levied on the real estate situated therein and the ratable personal property of those persons who belong to said district at the time of laying such tax, and upon any manufacturing or mechanical business subject to taxation. This paragraph shall not apply to towns which have consolidated their school districts the estimates of school expenses of which are prepared by the town school committee and reported to the town meeting.

Local school authorities of places maintaining evening schools shall certify to the comptroller the average number of evening scholars, and the comptroller shall draw his order on the State treasurer to the sum of $2.25 for each scholar certified, provided the school has had sessions and the authorities have reported progress and condition to State board.

NEW YORK.

1. ORGANIZATION OF THE SYSTEM.

State superintendent of public instruction.—Deputy superintendent of public instruction.—Assistant superintendent of public instruction.—School commissioners.—District trustees and board of education.—Superintendent.—Attendance (truant) officers.

State superintendent of public instruction.—The State superintendent shall be elected by joint ballot of the senate and assembly on the second Wednesday of February next preceding the expiration of the term of the then incumbent of said office, and on the second Wednesday of February next after the occurrence of any vacancy in the office. The superintendent's office shall be in the capitol, and maintained at the expense of the State. His salary shall be $5,000 a year, payable monthly by the treasurer, on the warrant of the comptroller.

He may appoint clerks and employees, but the compensation of such clerks and

employees shall not exceed in the aggregate the sum annually appropriated by the legislature therefor, and shall be payable monthly by the treasurer, on the warrant of the comptroller and the certificate of the superintendent.

The seal of the superintendent, of which a description and impression are now on file in the office of the secretary of state, shall continue to be his official seal, and, when necessary, may be renewed from time to time. Copies of all papers deposited or filed in the superintendent's office, and of all acts, orders, and decisions made by him, and of the drafts or machine copies of his official letters, may be authenticated under the said seal, and when so authenticated shall be evidence equally with and in like manner as the original.

The superintendent shall be ex officio a trustee of Cornell University and of the New York State Asylum for Idiots, and a regent of the University of the State of New York. He shall also have general supervision over the State normal schools; and he shall provide for the education of the Indian children of the State, as required by this act. Beginning October, 1895, he shall, in cities of 10,000 or more, biennially have taken a census of persons 4–16, of illiterates 12–21, and of non-attendants at public schools because attending private schools or forced to work.

So often as he can, he shall visit such of the common schools of the State as he shall see fit and inquire into their course of instruction, management, and discipline, and advise and encourage the pupils, teachers, and officers thereof. He may appoint persons to perform this duty without remuneration.

He shall annually submit to the legislature a report containing a statement of the condition of the common schools of the State and of all other schools and institutions under his supervision and subject to his visitation as superintendent, estimates and accounts of expenditures of the school moneys, and a statement of the apportionment of school moneys made by him, all such matters relating to his office, and all such plans and suggestions for the improvement of the schools and the advancement of public instruction as he may deem expedient.

He may grant on examination a certificate of qualification to teach, and may revoke the same. While unrevoked, such certificate shall be conclusive evidence that the person to whom it was granted is qualified by moral character, learning, and ability to teach any common school in the State, and shall be considered a legal license to teach without further examination. He may issue a certificate, without examination, to any graduate of a college or university who has had three years' experience as a teacher, and may revoke the same for cause: he may indorse a diploma issued by a State normal school or a certificate issued by a State superintendent or State board of education in any other State, which indorsement shall confer upon the holder thereof the same privileges conferred by law upon the holders of diplomas or certificates issued by State normal schools or by the State superintendent in this State; and he may issue temporary licenses to teach, limited to any school commissioner district or school district, for a period not exceeding six months. Upon cause shown, he may annul any certificate of qualification granted to a teacher by a school commissioner or diploma issued by a State normal school, and he may reconsider and reverse his action in any such matter. He shall prepare and keep in his office alphabetical lists of all persons who have received, or shall receive, certificates of qualification from himself, or diplomas of the State normal schools, with the dates thereof, and shall note any action regarding certificates or diplomas held by them thereon. He may remove a school commissioner or withhold any State money from a district for violation or neglect of duty. He shall prepare suitable registers, blanks, forms, instructions, etc., and transmit them to the persons for whom they are intended.

Deputy superintendent of public instruction.—The State superintendent shall appoint a deputy, who shall receive an annual salary of $4,000, payable monthly by the treasurer on the warrant of the comptroller; and in case of a vacancy in the office of superintendent the deputy may perform all the duties of the office until the day hereinbefore fixed for the commencement of the term of said office. In case the office of both superintendent and deputy shall be vacant, the governor shall appoint some person to perform the duties of the office until the superintendent shall be elected and his term of office commence, as hereinbefore provided.

Assistant State superintendents.—See under Schools—Attendance.

School commissioner.—A school commissioner for each school district shall be elected by the electors of the school commissioner districts every three years, a resident of the county of either sex being eligible. In case of vacancy, the office is filled by the county judge or, if there be no judge, by the State superintendent. His salary shall be $1,000, payable from the free-school fund, but the board of supervisors of the county may increase his salary by a majority vote, the increase to be raised by local taxation. He shall be allowed $200 for his expenses, to be also raised by taxation. He is removable by the State superintendent. His duties are:

1. To ascertain whether the boundaries of the school districts within his district

are definitely and plainly described in the records of the proper town clerks, and when found defective, indefinite, or disputed, to cause the same to be amended at the expense of the district or districts affected.

2. To examine all the schools and school districts within his district as often in each year as shall be practicable; to inquire into all matters relating to the management, the course of study and mode of instruction, and the text-books and discipline of such schools, and the condition of the schoolhouses, sites, outbuildings and appendages, and of the district generally; to examine the district libraries; to advise with and counsel the trustees and other officers of the district in relation to their duties, and particularly in respect to the construction, warming, and ventilation of schoolhouses and the improving and adorning of the school grounds connected therewith, and to recommend to the trustees and teachers the proper studies, discipline, and management of the schools and the course of instruction to be pursued.

3. Upon such examination to direct the trustees to make any alteration or repair on the schoolhouse or outbuildings necessary for the health or comfort of the pupils, not to exceed the sum of $200, unless an additional sum shall be voted by the district. He may also direct the trustee to make any alterations or repairs to school furniture when it is unfit for use or to be repaired and to provide sufficient furniture, not to exceed the sum of $100. He may also direct the trustees to abate any nuisance in or upon the premises. provided the same can be done at an expense not exceeding $25.

4. By an order under his hand, reciting the reason or reasons, to condemn a schoolhouse if he deems it wholly unfit for use and not worth repairing, and to deliver the order to the trustees, or one of them, and transmit a copy to the superintendent of public instruction. Such order, if no time for its taking effect be stated in it, shall take effect immediately. He shall also state what sum, not exceeding $800, will, in his opinion, be necessary to erect a schoolhouse capable of accommodating the children of the district. Immediately upon the receipt of said order the trustee or trustees of such district shall call a special meeting of the inhabitants of said district for the purpose of considering the question of building a schoolhouse therein. Such meeting shall have power to determine the size of said schoolhouse, the material to be used in its erection, and to vote a tax to build the same; but such meeting shall have no power to reduce the estimate made by the commissioner aforesaid by more than 25 per cent of such estimate. And where no tax for building such house shall have been voted by such district within thirty days from the time of holding the first meeting to consider the question, then it shall be the duty of the trustee or trustees of such district to contract for the building of a schoolhouse capable of accommodating the children of the district, and to levy a tax to pay for the same, not to exceed the sum estimated as necessary by the commissioner, and which shall not be less than such estimated sum by more than 25 per cent thereof. But such estimated sum may be increased by a vote of the inhabitants at any school meeting subsequently called and held according to law.

5. To examine, under such rules and regulations as have been or may be prescribed by the State superintendent, persons proposing to teach common schools within his district and not possessing the superintendent's certificate of qualification or a diploma of the State normal school, and to inquire into their moral fitness and capacity, and, if he find them qualified, to grant them certificates of qualification in the forms which are or may be prescribed by the superintendent.

6. To examine any charge affecting the moral character of any teacher within his district, first giving such teacher reasonable notice of the charge, and an opportunity to defend himself therefrom; and if he find the charge sustained, to annul the teacher's certificate, by whomsoever granted, and to declare him unfit to teach; and if the teacher held a certificate of the superintendent, or a diploma of the State normal school, to notify the superintendent forthwith of such annulment and declaration.

7. And, generally, to use his utmost influence and most strenuous exertions to promote sound education, elevate the character and qualifications of teachers, improve the means of instruction, and advance the interest of the schools under his supervision.

The commissioner may administer oaths relating to the public school affairs, and by direction of the State superintendent may subpœna witnesses. An appeal from his action may be carried to the State superintendent.

District trustees and board of education.—Each school commissioner subdivides the territory of his district into school districts, and the inhabitants of each subdivision entitled to vote shall elect by ballot one or three trustees—one retiring annually—a district clerk, and a district collector, and, if the district so determine,

a treasurer. The trustee or trustees of a district compose a board, vacancies to be filled at a special meeting of the district.[1] They call special meetings of the inhabitants; make out a tax list of every district tax voted by the district; purchase or lease sites for schoolhouses, and build and furnish them and hire rooms or buildings for school purposes and supply fuel and other incidentals, but the expense for furnishing and incidental running expenses shall not exceed $50 in any one year, unless authorized by the district; insure the buildings and furniture; employ teachers and fix their compensation and term of service, but not for fewer than ten weeks unless to fill a vacancy; establish rules for the government and discipline of the schools and the course of study to be pursued therein; see that the conditions of the school buildings are good hygienically; report to the district annually and to the school commissioner as follows: The duration of the term of schools, their expenditures for teachers' wages and for books and school apparatus, the number of children in the district schools and the sum of the days' attendance, the number of children 5 to 21 residing in the district, and the names of the parents or persons with whom they reside, the number of vaccinated children of school age, the amount of money paid for teachers' wages in addition to the public money paid therefor, the amount of taxes levied in said district for purchasing schoolhouse sites, for building, hiring, purchasing, repairing, and insuring such schoolhouses, for fuel, for school libraries, or for any other purpose allowed by law, and such other information as the superintendent may require.

Whenever 15 legal voters of one or more school districts shall sign a call, a meeting shall be held for the formation of a union free-school district. Such union district shall elect not fewer than three nor more than nine trustees, one-third of whom shall retire annually, called, collectively, the board of education. This board shall have in all respects the superintendence, management, and control of said union free schools, and power to establish in the same an academical department whenever, in their judgment, it is warranted, and shall possess all the powers and privileges and be subject to all the duties in respect to the common schools which the trustees of common (district) schools possess or are subject to.

Superintendent of cities and union free-school districts.—In an incorporated village having a population of 5,000 and upward, or in any union free-school district having a like population, the board of education may appoint a superintendent of schools having such powers and duties as the board may prescribe.

Attendance (truant) officers.—City and union free-school districts shall appoint and remove at pleasure one or more attendance officers, fix their compensation, and may make regular times, in conformity with the compulsory-education law, for the performance of their duties under the supervision of the local superintendent. if there be one.

2. Teachers.

Appointment and qualifications.—Duties.—Preliminary training.—Meetings.

Appointment and qualifications.—No teacher is a qualified one, within the meaning of this act, unless he possesses an unannulled diploma granted to him by the State normal school, or an unrevoked and unannulled certificate of qualification given to him by the superintendent of public instruction, or an unexpired certificate of qualification given to him by the school commissioner within whose district he is employed.

No person shall be qualified to teach who is under the age of 16 years, nor shall a person related to a trustee by blood or marriage be employed except by the approval of two-thirds of the voters at a district meeting, nor shall the trustees contract with a teacher for more than one year in advance. No part of the school moneys apportioned to a district can be applied or permitted to be applied to the payment of the wages of an unqualified teacher, nor can they or any part of them be collected by a district tax. Any trustee who applies, or directs, or consents to the application of any such money to the payment of an unqualified teacher's wages commits a misdemeanor. Teachers shall keep, prepare, and enter in the books provided for that purpose the school lists and accounts of attendance hereinafter mentioned, and shall be responsible for their safe-keeping and delivery to the clerk of the district at the close of their engagements or terms. Willful failure to attend an institute shall be sufficient cause for the revocation of the delinquent's license.

Preliminary training.—There shall be annually appropriated out of the income of the United States deposit fund the sum of $30,000, and out of the free-school

[1] Not more than one member of a family shall be a member of the same board of education in any school district.

fund the sum of $30,000, for the instruction of competent persons in academies and union schools in the science and practice of common-school teaching under a course to be prescribed by the State superintendent, the academies and union schools to be designated by him with reference to the school districts in each. Every academy or union school so designated shall instruct a class of not fewer than 10 nor more than 25 scholars, each of whom shall continue under instruction not fewer than sixteen weeks, unless excused for cause by the State superintendent, who shall prescribe the conditions of admission to the classes, the course of instruction, and the rules and regulations under which said instruction shall be given, and the number of classes which may be formed in any one year, and the length of time exceeding sixteen weeks, during which such instruction may be given. Instruction is free, and the trustees of the school are allowed $1 for each week's instruction of a scholar. The classes are subject to the visitation of the school commissioner.

[The 11 State normal schools of New York appear to have been organized by special acts under the general provisions of the act of April 7, 1866, the material features of which are as follows:

The governor, the lieutenant-governor, the secretary of state, the comptroller, the State treasurer, the attorney-general, and the superintendent of public instruction shall constitute a commission to receive proposals in writing in regard to the establishment of normal and training schools for the education and discipline of teachers in the common schools of this State from the board of supervisors of any county, from the corporate authority of any village or city, from the board of trustees of any college or academy, and from one or more individuals; but the number of proposals accepted shall not be more than four. Such proposals shall contain specifications for the purchase of lands and the erection thereon of suitable buildings for such schools, or for the appropriation of land and buildings for such use, also the furnishing of such schools and everything necessary to their support. The proposals may have in view either the grant and conveyance of such land and premises to the State, or the use of the same for a limited time and for the gift to the State of furniture, apparatus, etc., necessary to conduct such school.

If the proposals made by any board of supervisors, or by the corporate authorities of any city or village, shall be accepted, said board or corporate authorities shall have the power to raise, by tax, and expend the money necessary to carry the same into effect; and if in their judgment it shall be deemed expedient, they shall have power to borrow money for such purpose for any time not exceeding ten years, and at a rate of interest not exceeding 7 per cent, and issue the corporate bonds of said county, city, or village therefor.

When the said commission shall have accepted proposals it shall certify the same in writing, and then their power under this act in relation to such school shall cease, and thereupon the superintendent of public instruction shall appoint a local board, consisting of not less than 3 persons nor more than 13 persons who shall, respectively, hold their offices until removed by the concurrent action of the chancellor of the university and the superintendent of public instruction, and who shall have the immediate supervision and management of such school, subject, however, to his general supervision and to his direction in all things pertaining to the school. It shall be the duty of such board to make rules and regulations for the government of such schools, subject to the approval of the superintendent of public instruction. They shall also severally transmit through him, and subject to his approval, a report to the legislature on the 1st day of January in each year, showing the condition of the school under their charge during the year next preceding, and which report shall be in such form and contain such an account of their acts and doings as the superintendent shall direct, including especially an account in detail of their receipts and expenditures, which shall be duly verified by the oath or affirmation of their chairman and secretary.

The sum of $12,000 shall be annually appropriated for the support of each normal school payable out of the common-school fund.]

Meetings.—The State superintendent shall annually appoint a teachers' institute once in each year in each school commissioner's district for the benefit and instruction of the teachers in the public schools and intending teachers, with special reference to the presentation of subjects relating to the principles of education and methods of instruction in the various branches of study pursued in the schools. He shall also fix the duration of the institute and the number and compensation of its instructors. The school commissioner shall notify all school officers, teachers, and candidates for teacher's certificate of the time and place of the institute and assist the conductor, and he has the right, when appointed, to hold an institute in any school building without expense to the State beyond allowance

for janitor's fees and lights and fuel. During the duration of an institute all the schools of a district shall be closed. Union school districts of 5,000, employing a superintendent, may close or not. There shall be annually appropriated out of the free-school fund the sum of $30,000 for the maintenance of teachers' institutes. There is a law allowing a town at its annual meeting to pension teachers who have served 25 years continuously. The provisions of this law will appear in a chapter on "Pensions for Teachers," in the next report of this Bureau.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—Common schools shall be free to all 5 to 21 years of age, but children 4 years of age or more shall be admitted to kindergartens. Cities, incorporated villages, and union and special districts may establish separate schools for the instruction of colored youth 5 to 20 years of age.

Every child between 8 and 16 years of age, in proper physical and mental condition to attend school, shall regularly attend upon instruction at a school in which at least the common-school branches of reading, spelling, writing, arithmetic, English grammar, and geography are taught, or upon equivalent instruction by a competent teacher elsewhere than at a public school, as follows:

Every child between 14 and 16 years of age not regularly and lawfully engaged in any useful employment or service, and every child between 8 and 12 years of age, shall so attend upon instruction as many days annually, during the period between the first days of October and the following June, as the public school of the district or city in which such child resides shall be in session.

Every child between 12 and 14 years of age shall attend upon instruction during said period at least eighty consecutive secular days, unless sickness, holidays, or vacations prevent, and absence for sickness, holidays, or vacations shall not be counted as part of said eighty days. In addition to the said eighty days, every such child shall attend upon instruction every school day when not regularly and lawfully engaged in any useful employment or service, unless prevented by sickness or just cause.

If any such child shall so attend upon instruction elsewhere than at a public school, such instruction shall be at least substantially equivalent to that given to children of like age at the public school of the city or district in which such child resides; and such attendance shall be for at least as many hours of each day as are required of children of like age at public schools, and no greater total amount of holidays and vacations shall be deducted from such attendance during the period such attendance is required than is allowed in such public school to children of like age; but occasional absences from such attendance, not amounting to irregular attendance, shall be allowed upon such excuses only as would be allowed in like cases in such public school.

The teacher of every school shall keep an accurate record of the attendance of all children between 8 and 16 years of age, showing such attendance each day by the year, month, day of the month, and day of the week, and the number of hours in each day thereof; and each teacher upon whose instruction any such child shall attend elsewhere than at a public school shall keep a like record of such attendance.

Such record shall at all times be open to the attendance officers or other persons duly authorized by the school authorities [this term means the trustees or board of education or corresponding officers, whether one or more, by whatever name known, of a city union free school district, common-school district, or school district created by special law] of the city or district, who may inspect or copy the same; and every such teacher shall fully answer all pertinent and reasonable inquiries made by such school authorities, inspectors, or other persons; and a willful neglect or refusal so to answer any such inquiry shall be a misdemeanor.

Every person in parental relation to any child [this term means and includes the parents, guardians, and other persons, one or more, having the care, custody, or control of such child] between 8 and 16 years of age, in proper physical and mental condition to attend school, shall cause such child to so as aforesaid attend upon instruction, or shall give notice to the school authorities of his or her city or district of his or her inability so to do. Any violation of the foregoing provisions shall be a misdemeanor, punishable for the first offense by a fine not exceeding $5, and for each subsequent offense by a fine not exceeding $50, or by imprisonment not exceeding thirty days, or both such fine and imprisonment.

Courts of special sessions shall, subject to removal as provided in sections 57 and 58 of the code of criminal procedure, have exclusive jurisdiction in the first instance to hear, try, and determine charges of violations of the foregoing provisions within their respective jurisdictions.

It shall be unlawful for any person, firm, or corporation to employ any child between the ages of 8 and 12 years in any business or service whatever during any part of the term during which the public schools of the district in which the child resides are in session, or to employ any child between 12 and 14 years of age who does not, at the time of such employment, present a certificate signed by the superintendent of schools of the city or district in which the child resides, or, where there is no superintendent, by such other officer as the school authorities may designate, certifying that such child has complied with the law relating to attendance at school during the school year between September and July then current; and any person, firm, or corporation who shall employ any child contrary to the foregoing provisions shall, for each offense, forfeit and pay to the treasurer of the city or village, or to the supervisor of the town in which such offense shall occur, a penalty of $50, the same, when paid, to be added to the public-school moneys of the city, village, or district in which the offense occurred.

The attendance officer may arrest without warrant any child between 8 and 16 years of age found away from his or her home, and who is a truant from instruction upon which he or she is lawfully required to attend, within the city or district of such attendance officer. He shall forthwith deliver a child so arrested either to the custody of a person in parental relation to the child or of a teacher from whom such child is then a truant; or, in case of habitual and incorrigible truants, shall bring them before a police magistrate for commitment by him to a truant school, as provided in section 9 of said law. The attendance officer shall promptly report such arrest and the disposition made by him of such child to the school authorities of his city or district, or to such person as they may direct.

The school authorities of a city or union free school district may establish schools or set apart separate rooms in public school buildings for children between 7 and 16 years of age who are habitual truants from instruction which they are lawfully required to attend, or who are insubordinate or disorderly during their attendance upon instruction or irregular in such attendance. Such school or room shall be known as a truant school, but no person convicted of crimes or misdemeanors other than truancy shall be committed thereto. Such authorities may provide for the confinement, maintenance, and instruction of such children in such schools, and may, after reasonable notice to such child and the persons in parental relation to such child, order such child to attend such school or to be confined and maintained therein for such period and under such rules and regulations as such authorities may prescribe, not exceeding the remainder of the school year, or may order such child to be confined and maintained during such period in any private school, orphans' home, or similar institution controlled by persons of the same religious faith as the persons in parental relation to such child, and which is willing and able to receive, confine, and maintain such child, upon such terms as to compensation as may be agreed upon between such authorities and such private school, orphans' home, or similar institution. If the persons in parental relation to such child shall not consent to either of such orders, such conduct of the child shall be deemed disorderly conduct, and the child may be proceeded against as a disorderly person, and if, upon conviction, the child was lawfully required to attend a public school, the child shall be sentenced to be confined and maintained in such truant school for the remainder of the current school year, or if such child was lawfully required to attend upon instruction otherwise than at a public school, the child may be sentenced to be confined and maintained for the balance of such school year in such private school, orphans' home, or other similar instruction, if there be one, controlled by persons of the same religious faith as the persons in parental relation to such child, which is willing and able to receive, confine, and maintain such a child for a reasonable compensation, which shall be a charge against the city or district. Such confinement shall be conducted with a view to the improvement and to the restoration, as soon as practicable, of such child to the institution elsewhere upon which he or she may be lawfully required to attend. Every child suspended from attendance upon instruction by the authorities in charge of furnishing such instruction for more than one week shall be required to attend such truant school during the period of such suspension.

The school authorities of any city or school district not having a truant school may contract with any other city or district or county having a truant school for the confinement, maintenance, and instruction therein of children whom such school authorities might require to attend a truant school if there were one in their own city or district. Industrial training shall be furnished in every such truant school.

The State superintendent of public instruction has the power to employ assistants. It shall be the duty of such assistants to make investigation and to report to said State superintendent under his instructions the extent to which said

compulsory-education law is complied with in the cities and school districts, and perform such other duties as may be required.

The State superintendent has the power to withhold one-half of all public-school moneys from any city or school district which in his judgment willfully omits and refuses to enforce the provisions of said compulsory-education law, after due notice, so often and so long as such willful omission and refusal shall in his judgment continue; but whenever the provisions of said law have been complied with, all moneys so withheld by the State superintendent shall be paid over by him to such city or school district. Twelve thousand dollars are appropriated to carry out the foregoing provisions regarding attendance.

Character of instruction.—The course of study is fixed by district trustees and boards of education. The injurious effects of stimulants and narcotics must be taught, and every child, by the compulsory education act to take effect January 1, 1895, shall regularly attend instruction at a school in which at least the common-school branches of reading, spelling, writing, arithmetic, English grammar, and geography are taught, if attending other than a public school. An academical department may be established in a union free-school district. Local boards may establish departments for industrial training and for teaching and illustrating the manual or industrial arts and the principles underlying the same, and to erect, equip, and officer such shops as shall be necessary. The board of education or other body having supervision of the public schools in any city or union district may establish free evening schools for instruction in industrial drawing whenever the city authorities or qualified electors shall so direct. Vocal music may be introduced in the normal schools, teachers' institutes, and into union districts and cities, and drawing must be. Kindergartens may, in counties having fewer than 1,000,000 inhabitants, be established, the teachers being considered teachers of the public schools.

Text-books.—The boards of education or such bodies as perform the functions of such boards in the several cities, villages, and union free-school districts of this State shall have power and it shall be their duty to adopt and designate text-books to be used in the schools under their charge in their respective districts. In the common-school districts in the State the text-books to be used in the schools therein shall be designated at the first annual school meeting held after the passage of this act by a two-thirds vote of all the legal voters present and voting at such school meeting.

When a text-book shall have been adopted for use in any of the public or common schools, it shall not be lawful to supersede the text-book so adopted by any other book within a period of five years from the time of such adoption, except upon a three-fourths vote of the board of education, or of such body as perform the function of such board, where such board has made the designation, or upon a three-fourths vote of the legal voters present and voting at the annual school meeting in any other school district.

Any person or persons violating any of the provisions of this act shall be liable to a penalty of not less than $50 nor more than $100 for every such violation, to be sued for by any taxpayer of the school district and recovered before any justice of the peace, said fine, when collected, to be paid to the collector or treasurer for the benefit of said school district.

Buildings.—District trustees and boards of education have the custody of school buildings, the sites for which are purchased and the buildings erected by them when they are authorized thereto by the district. [See Organization; School commissioner.]

The flag of the United States shall be displayed upon or near every school building at the expense of the district.

4. Finances.

Funds (permanent and special).—Taxation.

Funds (permanent and special).—[There is a United States deposit fund which is the original sum of $4,014,520.17 received in virtue of the act of Congress approved June 15, 1837. From the beginning $28,000 of the income were given annually to academies, and after 1846 $25,000 were annually added to the "common-school fund," and, at date, $30,000 are given to academies for the support of teachers' training classes. Of the remaining portion of the income from 1838, $55,000 a year have been given to school district libraries, except during sixteen years, when only $50,000 were granted. The principal is loaned through the district commissioners, about one-half being invested in that way, the other portion being invested in bonds of the United States or bonds guarantied by them. The second fund is the "common-school fund," which amounted in 1893 to $4,373,140, the income of which is given to aid the elementary schools. The "free-school fund"

is the tax levied by the State each year for school purposes. There is also a "literary fund" of $284,201, the income of which is given to "academies." The United States deposit fund and the literary fund are under the charge of the Board of Regents of the University of New York.]

Taxation.—There shall be raised by tax in each year upon the real and personal estate of each county within the State such sum as the legislature shall annually determine necessary for the support of common schools in the State, and the proceeds of such tax shall be apportioned and distributed as herein provided.

The moneys so raised shall be paid into the State treasury. On the first working day of each month the treasurer shall make to the superintendent of public instruction a written statement of the condition of the free-school fund. No such money shall be paid out of the treasury except upon such warrant of the superintendent, countersigned by the comptroller, referring to the law under which it is drawn. Until satisfactory evidence shall be furnished the comptroller that all moneys required by law to be raised by taxation upon a county for the support of schools throughout the State have been collected and paid or accounted for to the State treasurer, he may withhold payment; and whenever, after the 1st day of March in any year, in consequence of the failure of any county to pay such moneys on or before that day, there shall be a deficiency of moneys in the treasury applicable to the payment of school moneys, to which any other county may be entitled, the treasurer and superintendent of public instruction are hereby authorized to make a temporary loan of the amount so deficient, and such loan, and the interest at the rate of 12 per cent per annum, shall be a charge upon the county in default, and shall be added to the amount of State tax, and levied upon such county by the board of supervisors thereof at the next ensuing assessment.

The moneys raised by the State tax or borrowed as aforesaid to supply a deficiency thereof, and such portion of the income of the United States deposit fund as shall be appropriated, and the income of the common-school fund, when the same are appropriated to the support of common schools, constitute the State school moneys, and shall be divided and apportioned by the superintendent of public instruction on or before the 20th day of January in each year as hereinafter provided; and all moneys so apportioned, except the library moneys, shall be applied exclusively to the payment of teachers' wages. He shall apportion and set apart from the free-school fund appropriated therefor the amounts required to pay the annual salaries of the school commissioners elected or elective under this act, to be drawn out of the treasury and paid to the several commissioners as hereinafter provided; and he shall also apportion to each of the cities of the State, and to each of the incorporated villages of the State having a population of 5,000 and upward, and to each union free-school district having a like population, which employs a superintendent of schools, out of the income of the said fund, and if insufficient, the deficiency out of the free-school fund so appropriated, the sum of $800; and in case any city is entitled to more than one member of assembly, according to the unit of representation adopted by the legislature, $500 for each additional member of assembly, to be expended according to law for the support of the public schools of the city. But the superintendent shall make no allotment to any city or district for the expenses of a superintendent unless satisfied that such city, village, or district employs a competent person as superintendent, whose time is exclusively devoted to the general supervision of the public schools of said city, village, or district; nor shall he make any allotment to any district in the first instance without first causing an enumeration of the inhabitants thereof to be made which shall show the population thereof to be at least 5,000, the expense of which enumeration, as certified by said State superintendent, shall be paid by the district in whose interest it is made. He shall then set apart from the income of the United States deposit fund for and as library moneys such sums as the legislature shall appropriate for that purpose. He shall also set apart from the free-school fund a sum not exceeding $4,000 for a contingent fund. He shall then set apart and apportion, for and on account of the Indian schools under his supervision, a sum which will be equitably equivalent to their proportion of the State school money, upon the basis of distribution established by this act, such sum to be wholly payable out of the proceeds of the State tax for the support of common schools. After deducting the said amounts he shall divide the remainder of the State school moneys into two parts, and shall apportion them as follows:

He shall apportion such remainder equally among the school districts and cities from which reports shall have been received in accordance with law, as follows: Making the distributive portion or each district quota $100. To entitle a district to a distributive portion or district quota, a qualified teacher, or successive qualified teachers, must have actually taught the common school of the district for at least the term of time hereinafter mentioned during the last preceding school year. For every additional qualified teacher and his successors who shall have

actually taught in said school during the whole of said term the district shall be entitled to another distributive quota; but pupils employed as monitors, or otherwise, shall not be deemed teachers. The aforementioned term shall be during every school year, shall be one hundred and sixty days of school, inclusive of legal holidays that may occur during the term of said schools, and exclusive of Saturday. No Saturday shall be counted as part of said one hundred and sixty days of school, and no school shall be in session on a legal holiday.

Having so apportioned and distributed the said district quota as specified in section 6 of this act, the superintendent shall apportion the remainder of said State school moneys, and also the library moneys separately, among the counties of the State according to their respective population, excluding Indians residing on their reservations, as the same shall appear from the last preceding State or United States census; but as to counties in which are situated cities having special school acts, he shall apportion to each city the part to which it shall so appear entitled, and to the residue of the county the part to which it shall appear to be so entitled. If the census according to which the apportionment shall be made does not show the sum of the population of any county or city, the superintendent shall, by the best evidence he can procure, ascertain and determine the population of such county or city at the time the census was taken, and make his apportionment accordingly.

Whenever any school district shall have been excluded from participation in any apportionment made by the superintendent, or by the school commissioners, by reason of its having omitted to make any report required by law, or to comply with any other provision of law, or with any rule or regulation made by the superintendent under the authority of law, and it shall be shown to the superintendent that such omission was accidental or excusable, he may, upon the application of such district, make to it an equitable allowance; and if the apportionment was made by himself, cause it to be paid out of the contingent fund; and if the apportionment was made by the commissioners, direct them to apportion such allowance to it at their next annual apportionment, in addition to any apportionment to which it may then be entitled. And the superintendent may, in his discretion, upon the recommendation of the school commissioner having jurisdiction over the district in default, direct that the money so equitably apportioned shall be paid in satisfaction of teachers' wages earned. The school commissioners of the county shall distribute the sums appropriated from the State treasury and certify to the supervisor (or treasurer of the school district) of each town the amount of money apportioned to it and who disbursed the money.

Local taxes are voted by the district in meeting. These taxes are as follows: To purchase sites and build schoolhouses or to hire buildings or rooms, and to repair and furnish and meet the incidental expenses of maintaining same; to purchase maps, globes, blackboards, and other apparatus, and purchase text-books and other supplies, not to exceed $25 in any one year; to establish a school library, purchase the books to increase it and a case to hold it; to supply deficiencies from noncollections and embezzlements; to insure the buildings; to pay deficiencies in teachers' wages after the public (State) money has been exhausted; to satisfy judgments of record. [See Organization; School commissioner.]

NEW JERSEY.[1]

1. Organization of the System.

State board of education.—Trustees of the school fund.—State superintendent of public instruction.—State board of examiners.—County superintendent.—County board of examiners.—School trustees or boards.—City boards of examiners.—City superintendent.—Truant officers.

State board of education.—The general supervision and control of public instruction shall be vested in a State board of education, consisting of the trustees of the school fund and eight members, who shall be appointed by the governor, one from each Congressional district, by and with the advice of the senate. Not more than four members of the board shall be of same political party. Their term of office shall be five years. The board has control of the State normal school and of the New Jersey School for Deaf-Mutes, and is charged with the following duties: To frame by-laws for their own government and to prescribe and cause to be enforced all rules and regulations necessary for carrying into effect the school laws; to recommend to the legislature additions and amendments to the laws in

[1] As this digest goes through the press, the law abolishing the old district system has been used. It may happen that other late changes in the law have escaped notice.

order to perfect the school system; to appoint the county superintendents; to prescribe rules and regulations for holding teachers' institutes; to authorize the payment of the incidental expenses incurred by State superintendent in the performance of his duty; and to decide appeals from that officer's decisions, and to report annually to the legislature.

The members shall receive no compensation beyond necessary expenses.

Trustees of the school fund.—See under Finances.

State superintendent of public instruction.—The State superintendent shall be appointed by the governor, by and with the advice and consent of the senate, for three years, and shall receive an annual salary of $3,000, to be paid out of the school fund, and may be reappointed. His duties are to carry out the instructions of the State board and enforce them. He shall be ex officio secretary of the board, president of the State association of school superintendents, and a member of the State board of examiners and of all county and city boards of examiners. He shall have the supervision of all the schools of the State receiving any part of the State appropriation and shall be the legal adviser and assistant of the county superintendents, and shall from time to time issue circular letters to them on topics of moment. He shall apportion to the counties the State school moneys and withhold from or through the county superintendent or board of trustees or other school officer the State appropriation due to any officer, district, or teacher until the delinquent has complied with the law in every particular, including the keeping of school for nine months during the year immediately preceding that for which payment is demanded. He shall have printed and shall distribute suitable forms for the record of school business and reports, decide controversies arising under the school laws, preserve such books, apparatus, plans, etc., likely to interest teachers as he may secure, without expense to the State, file all school reports of the State and others, and shall keep a record of his acts, provide a seal, annually report to the State board concerning the condition of the educational interests of the State, with such statistical tables as may be of interest and such suggestions as he may deem expedient. He may also have prepared and printed in convenient form a set of plans for the construction of schoolhouses, to be furnished to school officers, at an expense to the State of $500.

State board of examiners.—The State board of examiners shall consist of the State superintendent of public instruction and the principal of the State normal school. Its duty is to hold examinations of teachers, grant State certificates or revoke the same under such rules and regulations as the State board of education may prescribe, entitling the holder to teach without further examination in any part of the State according to its provisions as to duration and grade.

State superintendent of school census.—The State board shall have an annual census taken of the children in the State 5 to 18, and is empowered to designate a superintendent of schools, whose term shall be five years, and his compensation and assistants shall be fixed by it; the superintendent, under the approval of the board, to appoint enumerators, to take and make rules and regulations for governing the taking of the census, furnish books and other stationery. The enumerators shall be paid 5 cents for each name obtained.

County superintendent.—The State board shall appoint a person of suitable attainments to be the county superintendent of the public schools for three years, unless removed for cause, at a compensation of 12½ cents for each child in the county 5 to 18 years of age, provided that he shall not receive less than $800 nor more than $1,300, that the salary of a superintendent having 50 or more district schools to visit shall not be less than $1,000, and that the children in any city or town having a school superintendent shall not be included in fixing the compensation of the county superintendent. He is also allowed his traveling expenses.

He shall issue orders on the county collector in favor of each township collector and city treasurer for the portion of the State appropriation to which each township or city is entitled, examine and license teachers, provide for graded schools, and discharge other duties of general supervision and superintendence over the public schools.

He shall appoint trustees in any district which fails to elect them, and fill vacancies and appoint the first trustees of a district. He shall have power to withhold that part of the State appropriation derived from the revenue of the State from any district in which the inhabitants fail to provide a suitable school building and outhouse.

County board of examiners.—There shall be in each county a county board of examiners, which shall be composed of the county superintendent and a number of teachers holding a State or a first-grade county certificate, not to exceed three, to be appointed by him annually, their compensation not to exceed $10 for each of the three or fewer meetings of the board and traveling expenses.

School trustees or boards of education.—Each township shall be one school district but each city, borough, and incorporated town containing 400 or more children 5 to 18 years of age shall be a school district, separate and distinct from the township school district. The boards of education of any two adjoining school districts may accommodate the boundary to the best interests of the schools. The portion of any school district annexed for all school purposes and the property included shall become a part of the taxing district to which it is annexed for school purposes only. The school trustees shall be a corporate body designated as the board of education of the township, city, borough, etc., as the case may be.

Each board of trustees shall annually elect one of their number district clerk, who shall record the acts of the board, keep the school building in repair and supplied with fuel and blackboard crayons. The board's duties are to employ and dismiss teachers, janitors, mechanics, and laborers, and to fix, alter, allow, and pay their salaries and compensation; make rules and regulations for the government of teachers and pupils; to erect, repair or improve, rent, furnish, and insure school buildings, and purchase, lease, mortgage, or sell school lots, or schoolhouses; to borrow money, with or without mortgage, and to raise money by taxation for the forementioned purpose, provided authorized by the district by vote; in connection with the county superintendent to prescribe the course of study and a uniform series of text-books; to suspend or expel pupils; to provide text-books and other necessary school supplies; to require every teacher to keep a register; to call special meeting of voters; to permit schoolhouse to be used for other than school purposes; to make annual report to county superintendent, and to take school census.

In every township, city, town, borough, or other municipality, not divided into wards, there shall be a school board consisting of nine (or five or three) trustees, three to retire each year. In townships, cities, towns, boroughs, or other municipalities divided into wards the school board shall consist of two trustees from each ward, one to retire biennially. In every city governed by special laws there may be a city board of examiners, appointed by the board of education. In every city of 50,000 or more a board of education shall be composed of and controlled by eight commissioners, known as the commissioners of public instruction, appointed for two years by the mayor, and not more than one-half to be of the same political party. They have the powers granted boards of education, school trustees, etc.

City superintendent.—Any board of education of the cities of a population of 50,000 or more may appoint a city superintendent of schools, define his duties, and fix his term of office, not to exceed three years, and his compensation, which shall not be changed during his term of office.

Truant officers.—In cities having a duly organized police force it shall be the duty of the police authority to detail one or more members of said force to assist in the enforcement of compulsory attendance, and in districts having no regular police force subject to this act it shall be the duty of the board of education, or the school district officers to designate one or more constables of said city, township, or village, whose duty it shall be to assist in the enforcement of this act. Persons charged with the above-specified duty shall be called truant officers, and their compensation shall be fixed by the board of education.

2. Teachers.

Appointment and qualifications.—Duties.—Preliminary training.—Meetings.

Appointment and qualifications.—No teacher shall be entitled to pay unless the holder of a legal certificate.

The qualifications of teachers are ascertained by the State board of examiners, county boards of examiners, city boards of examiners, and county superintendents. Teachers are employed by boards of trustees.

The State board of examiners may indorse the diploma of a normal school or training college or the permanent certificate issued by a State superintendent or board of examiners of another State. State examinations shall be for certificates of three grades. Candidates for the third grade county certificate are not to be less than 18 years old. No experience in teaching will be required; they will be examined in orthography, reading, penmanship, geography, arithmetic, English grammar, and the theory and practice of teaching; the certificate will remain in force for one year from date and entitles to teach in an ungraded school or in a primary school or department in the county. This certificate shall not be issued more than twice to the same person. Candidates for the second grade certificate are not to be less than 19 years old, with an experience in teaching of not less than one year; the subjects are the same as for the third grade certificates, with the addition of English composition, physiology, the history of the United States, and

bookkeeping, and continues in force for three years and entitles to teach in any grade of a grammar school in the county. Candidates for a first grade certificate are not to be less than 20 years old, with an experience in teaching of not less than two years. The examination is upon the same subjects as the second grade, with the addition of algebra, physics, history of education, the Constitution of the United States, and the school law of New Jersey; it continues in force five years and is valid for any school or department in the county and may be renewable. Candidates for the third grade State certificate must be 20 years of age, no experience in teaching is required, and must pass in the subjects required in the examination for third grade county certificate, with physiology, plane and solid geometry, chemistry, geology, botany, and free-hand drawing: the certificate remains in force seven years from date and licenses to teach in any school of the State, and is renewable without reexamination; the second grade certificate, issued for ten years, requires in addition the philosophy of education and the principles of manual training and physical culture, 22 years passed and two years of teaching, and the first grade 25 years passed and five years of teaching. Graduates of the State normal school who have completed two years' course shall be entitled to a third grade State certificate and those completing the three years' course to a second grade. [Rules and regulations of the State board.]

Every teacher shall keep a school register and may not receive pay until it has been exhibited to proper officer; shall have power to hold every pupil accountable in school for disorderly conduct, on the way to or from school or on the play grounds, and to suspend pupil for good cause, but no teacher shall inflict or cause to be inflicted any corporal punishment upon any pupil.

Preliminary training.—There shall be a normal school for the training and education of teachers in the art of instructing and governing the common schools of this State, under the entire management and control of the State board of education. Each county shall be entitled to six times as many pupils in the school as it has representatives in the legislature. Applicants for admission must sign a written declaration that in seeking admission to the school their object is to qualify themselves for teaching the public schools in the State during at least two years or otherwise to pay the cost of tuition. A model school may be maintained in which the modes of instruction and discipline inculcated in the normal school are exemplified, and in which pupils may be prepared for the normal school.

Meetings.—For the purpose of defraying the expenses of teachers' institutes there may be paid annually to the State superintendent out of the income of the school fund $100 to each teachers' institute in any county or to a joint county institute.

The county and city superintendents shall form the "State Association of School Superintendents," which shall meet annually. The board of district trustees shall in each township form an association, which shall convene on call of county superintendent to hear suggestions and communications regarding the management of the public school.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—No child between the ages of 5 and 18 years shall be excluded from any public school on account of religion, nationality, or color. Schools shall be kept nine months.

All parents and those who have the care of children shall instruct them or cause them to be instructed in spelling, reading, writing, English grammar, geography, and arithmetic; and every parent, guardian, or other person having control and charge of any child between the ages of 7 and 12 years shall be required to send it to public day school for a period of at least twenty weeks in each year. Eight weeks of such attendance at least shall be consecutive, unless such child is excused from attendance by the board of the school district in which the parent or guardian resides upon its being shown to the board's satisfaction that the bodily or mental condition of the child has been such as to prevent its attendance at school, or that the child is taught in a private school or at home by some qualified person in such branches as are usually taught in elementary schools. No child under the age of 15 years shall be employed by any company or corporation to labor in any business, unless such child shall have attended within twelve months immediately preceding such employment some public day or night school or some well-recognized private school, such attendance to be for five days or evenings every week during a period of at least twelve consecutive weeks as far as the arrangement of the school terms will admit. Any child between the ages of 12 and 16 years must,

when temporarily discharged by his employer for the purpose, attend school for the period for which temporarily discharged, unless excused by the inspectors of factories and workshops for legalized reasons. Failure to comply with the foregoing provisions shall be a misdemeanor punishable by a fine of $10 to $25 or imprisonment for not less than one month nor more than three.

All children who are habitual truants, or are as scholars incorrigible, or are vagabonds, shall be deemed juvenile disorderly persons and are subject to the provisions of the compulsory attendance act, and it is the duty of the truant officers to examine into all such cases when requested to do so by the school board or factory and workshop inspectory and warn the delinquent parent or guardian of the consequence. If the parent or guardian be recalcitrant, the truant officer shall complain of him to any court of competent jurisdiction in the school district, where he may be fined or compelled to give bond for the performance of his duty.

The foregoing provisions are not to operate in those school districts of the State where accommodations are insufficient.

The trustees of a school district may pay 50 cents to have a child vaccinated, the indigent parents consenting.

No boy under the age of 12 nor girl under 14 shall be employed in any factory, workshop, mine, or establishment where the manufacture of any goods whatever is carried on. Nor shall any child between 12 and 15 years of age be so employed unless it has attended some public day or night school within twelve months immediately preceding, or some well-recognized private school, such attendance to be for five days or evenings every week during a period of twelve consecutive weeks, which may be divided into two terms of six consecutive weeks each so far as the arrangement of school terms will permit. Every employer guilty of violating the foregoing provision shall be liable to a penalty of $50 for each offense. The governor shall appoint, with the advice and consent of the senate, some suitable person, who shall be a resident and citizen of the State, as inspector, at a salary of $1,200 a year, for a term of three years, whose duty it shall be to visit the factories, workshops, mines, and other establishments in the State and note violations of the foregoing provisions in regard to the employment of children.

Character of instruction.—All persons are required to instruct or to have instructed their children or wards in spelling, reading, writing, English grammar, geography, and arithmetic. [The subjects upon which teachers are examined (see also Organization, School trustees) may be regarded as indicating the permitted studies of the public schools.] Evening schools are established, and any board of school trustees or board of education which notifies the State superintendent that not fewer than $500 have been raised by special district tax for the establishment of a school or schools for manual training or for the purpose of adding manual training to the course of instruction now pursued in the school or schools of such district shall be entitled to an equal sum from the State, and so on for each year the instruction in manual training is maintained, provided the State board approves the character of instruction or the sum appropriated from the State school fund does not exceed $5,000. Whenever the local school authority certifies that $3,000 have been raised by subscription for the purpose of introducing industrial education, it shall be the duty of the governor to appropriate an equal sum, provided such appropriation shall not exceed $5,000 in any one year, and any city, town, or township is authorized to tax itself for the support of such instruction. There shall be a board of trustees for each of such schools, of which the governor is ex officio president. No religious service or form of any kind, except reading the Bible and repeating the Lord's Prayer, shall be permitted in any public school.

Text-books.—The trustees of all public schools are authorized to provide such text-books and other school supplies as shall, pursuant to existing law, be approved by the county superintendent and such boards of trustees, and supply the same free to the use of the pupils in said schools, provided that when any pupil shall lose, deface, or destroy any book supplied to such pupil under the provisions of this act the parents or guardians of such pupil shall replace such book so lost, defaced, or destroyed, or shall be liable to damages. The payment of such text-book and supplies shall be provided by special district tax.

Buildings.—Before any district may receive money from the State it must have provided a suitable school building and outhouses, the doors of the building proper to open outward if more than one story high. Land for schoolhouse sites may be condemned. The State superintendent shall furnish a work containing plans and specifications for the erection of school buildings to be furnished to local school officers. Anyone defacing or injuring a school building or any of its appurtenances shall be considered a disorderly person and may be arrested. The national flag shall be displayed upon or near all schoolhouses during the session of the school.

4. Finances.

Funds (permanent and special).—Taxation.

Funds.—The governor, the president of the senate, the speaker of the house, attorney-general, secretary of state, and comptroller are trustees of the fund for the support of public schools.

All moneys paid into the State treasury after 1890 as the proceeds of sales, grants, or leases made of lands under water belonging to the State shall be deemed a part of the current revenue of the State;[1] provided that nothing in this provision shall be construed as transferring from the State school fund any right, title, interest in any securities or property now a part of the assets of that fund or as any way impairing the right of the school fund to the proceeds or income derived from any security or property now belonging to said school fund. [By an act of 1872 all leases made after the 6th of April, 1871, of lands "now or formerly" lying under water shall be transferred to the trustees of the school fund and become a portion of the State school fund, and the annual income arising from such leases shall be distributed by the trustees for the support of public schools in the same manner as other moneys are now distributed.] The fund thus arising from riparian rights, together with all the moneys which shall be received by the treasurer in payment of the principal or interest of the bank or turnpike stock belonging to the fund, all the taxes which may hereafter (1886) be received into the treasury from any of the banking and insurance companies in the State, liable to taxation now or hereafter, all appropriations made to the fund, and all gifts from persons shall be invested by the treasurer of this State under the direction of said trustees, or a majority of them, in the bonds of the United States, or of the State, or any county, city, town, or township, in cases where the total indebtedness of the bonding community does not exceed 15 per cent of the total assessable valuation of taxable property within itself, the interest to be applied to the public schools. The trustees shall report annually to the legislature and receive no compensation. From this fund there shall be annually appropriated as much as will meet the following-named charges:

Twenty-eight thousand dollars for the support of the State normal school and necessary repairs, furniture, and keeping the grounds in order.

The salary and the necessary incidental expenses of the State superintendent and his assistants and the expenses of the board of education.

The cost of teachers' institutes.

The cost of free public libraries.

The cost of Farnum Preparatory School at Beverly.

The State's proportion of the cost of technical education (see Schools, character of instruction).

The taxed costs of foreclosure proceedings instituted by trustees and other expenses at law.

Taxation.—For the purpose of maintaining free public schools there shall be assessed, levied, and collected annually upon the real and personal property a State school tax equal to $5 for each child in this State between the ages of 5 and 18 years. It is the duty of the comptroller to apportion the tax among the several counties. Ten per cent of the full amount of money annually raised by State tax shall be known as a reserve fund, and shall be apportioned among the several counties of the State by the State board of education equitably and justly according to their own discretion, and the State superintendent shall draw orders on the comptroller in favor of the county collectors for the payment of 90 per cent of the amount of school tax paid by their counties, respectively, no portion of the money to be used for sectarian schools. In addition to the moneys apportioned to it by the county superintendent each school district may raise by tax such other sums of money as it may need for school purposes as determined by the voters at the time of electing trustees.

---

[1] The 1895 edition of the school law gives the law of 1871 as in force and recites that "all moneys hereafter received from the sales and rentals of land under water belonging to the State shall be paid over to the trustees of the school fund and appropriated for the support of public schools * * * the same to constitute a part of the permanent school fund of the State."

PENNSYLVANIA.

1. Organization of the System.

State superintendent and deputy.—County superintendent.—Directors and controllers.—Local superintendents.

State superintendent.—A superintendent of public instruction shall be appointed by the governor every fourth year, by and with the advice and consent of two-thirds of all the senate, and shall be removed by the governor for misbehavior. He shall decide without appeal or costs all controversies or disputes that may arise or exist among the directors or controllers of any district or between collectors or treasurers; give advice, explanations, construction, or information to the district officers and citizens relative to the common-school law, the duties of common-school officers, the rights and duties of parents, guardians, and pupils, and the management of the schools, and all other questions calculated to promote the cause of education; sign orders on the State treasurer for payment of State money to the school districts, prepare blank forms for the annual district reports with suitable instructions and forward them, prepare an annual report containing a full account of the condition of the public schools, the expenditure for them, estimates for the year ensuing, the number of pupils, the cost of teaching each, the number of districts, plans for the improvement of the system, and all such matters relating to the concerns of common schools and to the duties of his office as he may deem expedient to communicate, provide a seal for the authentification of official documents, appoint one of his clerks general deputy, who may perform all his duties in his absence, and remove any county superintendent for neglect of duty.

County superintendents.—The school directors [of the several districts] in each county shall meet in convention at the county seat of justice every three years and select viva voce by a majority of the whole number present one person of literary and scientific attainments (college diploma, State or local certificate), and of three years' experience in the art of teaching and good moral character, as county superintendent for three succeeding school years. His salary shall be $4.50 for each school in his jurisdiction at the time of his election, to be paid out of the general fund appropriated for common schools, but in no case to be less than $1,000 nor more than $2,000. School directors may increase the county superintendent's salary from the school fund of the county, and in counties having over 290 schools or 1,200 square miles of territory or a school term exceeding seven and one-half months the salary paid shall not be less than $1,500. The county superintendent may not teach in the public schools unless he do so without compensation. He shall take oath to perform his duties to the best of his ability; visit as often as practicable the several schools of his county, noting the character of instruction and the methods, and giving directions upon these subjects in order to bring the teaching up to the grade intended and the grades into ordination and the schools into uniformity; see that the branches required by law are taught by legally competent teachers, examine all candidates for teaching, grant certificates to qualified persons and revoke the same for cause; annually report to the State superintendent in extenso upon the educational condition of their counties and forward the reports of the several school districts thereof, and hold teachers' institutes annually.

Directors and controllers.—Every township, borough, and city of this Commonwealth, or which shall hereafter be erected, shall be a school district. School districts which are composed of cities and boroughs divided into wards for school purposes shall be constituted as follows: Each ward shall retain its school property and elect a separate board of directors, who shall have the erection and repair of schoolhouses, the purchase of sites, and the levying, assessing, collecting, and disbursing of all taxes laid for the above purposes, but other powers and duties which are exercised by district school directors shall be in the hands of a board of controllers, composed of the directors of the several wards, provided that whenever the ward boards of directors shall voluntarily grant the property of their wards to the board of controllers the city or borough shall constitute a single school district, but the number of directors shall thereafter be three for each ward.

School directors shall be elected annually in other districts as follows: At the same time and place that elections are held for supervisors in wards, cities, or boroughs two qualified citizens shall be elected school directors in each district, whose term of office shall be three years, vacancies to be filled by the board. No school director may be also a constable, pathmaster, commissioner of roads, or auditor. Failure to attend two consecutive meetings on the part of a member,

and the failure of all the members of the board of directors or controllers to levy a tax to keep the schools in operation or provide schoolhouses, vacates the delinquent member's seat, in the first case, and vacates the seats of every member, in the second. The board elects a president, secretary, and treasurer, and holds a meeting at least once in every three months.

The district board of directors and the municipal board of controllers have the following duties and powers: To establish a sufficient number of schools, to employ teachers, to direct what branches shall be taught and books used, to expel all incorrigible children, to purchase and issue text-books and other necessary supplies and to report the amount expended for such supplies, to grade the schools, to pay expenses of the schools by drafts on the district treasurer, and to report and publish annually a statement of the financial operations of the district in not fewer than ten written or printed handbills, to be posted in the most public places of the district, and also to make a statement to the auditor.

The board of controllers of school districts which are composed of cities or boroughs divided into wards for school purposes, or boroughs not so divided but having a population of 5,000 or more, shall possess the following additional powers and have the following duties: They may establish high schools, and shall admit all under 21 properly prepared to enter upon its course of study, and, in general, shall exercise supervision over it, appointing its teachers and establishing its course of study, purchasing land and erecting buildings, and maintaining it for not fewer than ten months in the year.

Cities of under 100,000 inhabitants are constituted one school district, each ward to elect two members of the board of controllers for four-year terms, one going out biennially.

City, borough, and township superintendents.—School directors in any city, borough, or township having a population of over 5,000 may elect one person of literary and scientific acquirements and skill and experience in the art of teaching as city or borough superintendent for the three succeeding school years; and they shall determine his compensation. After the certification of the election of the superintendent to the State superintendent of public schools the schools of the city, borough, or township shall not be subject to the authority of the county superintendent. The municipal superintendent is to perform the duties of the county superintendent and such as may be imposed by his board of directors, to report monthly to the State superintendent, and attend meetings of superintendents called by him.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No district employing a teacher who has not a valid certificate from the county or [local] superintendent shall receive money from the State treasury. ["No teacher shall be employed in teaching any branch of learning other than those enumerated in his or her certificate."] No teacher shall be employed or dismissed except by the vote of the whole number of the directors or controllers of any common-school district. No person shall receive a certificate from a county, city, borough, [or township] superintendent who has not a fair knowledge of orthography, reading, writing, geography, English grammar, mental and written arithmetic, history of the United States, the theory of teaching, and of the effect of alcoholic drinks, of stimulants and narcotics; but no person using intoxicating drinks as a beverage shall be granted a certificate. The certificate shall state the proficiency of the holder in each branch.

The teacher must report monthly to the local school board the number and sex of pupils in attendance, the books used, and branches taught, or forfeit pay.

Preliminary training.—The State is divided at present into 13 normal school districts. When 13 or more citizens shall, as contributors or stockholders, erect and establish a school for the professional training of young men and women as teachers for the public schools of the State, the State students in that school shall be paid 50 cents a week, and if he graduate and sign an agreement to teach for two years in the State, $50 additional shall be paid. The affairs of each school are to be managed by a board of 18 trustees, 12 elected by the contributors and 6 appointed by the State superintendent, and it shall require a three-fourths vote to pass a motion for the sale or purchase of real estate. The governor, superintendent, and attorney-general are a commission to distribute the State money to the schools. The trustees report annually to the superintendent, and are always subject to his inspection. To obtain State aid the following requirement must be met: Suitable building, surrounded by an area of 10 acres; a hall to seat 1,000 persons, with class rooms, etc., to accommodate 300 or more students, properly supplied with heating appa-

ratus, adequately lighted and ventilated, and provided with a place for physical exercise in inclement weather, a library, 6 professors or more, one each in orthography, in reading and elocution, in writing, drawing, and bookkeeping, in arithmetic and higher mathematics, in geography and history, in grammar and English history, and in theory and practice of teaching, together with such professors of natural, mental, and moral sciences, languages, and literature as the condition of the school and the number of students may require. The principal shall be a professor of one of the required branches. There shall be a model school of not fewer than 100 children. The principals shall fix the requisites for admission and the course and duration of study. The examination of the graduating class shall be conducted by a board composed of two principals, one of whom shall be the principal of the school whose pupils are under examination, the State or the deputy State and two county or local superintendents of the normal school district being present, and no person shall graduate unless by a vote of 4 out of the 5 members. Graduates are given a certificate of their scholastic qualifications throughout the State, but after two years of teaching a certificate of competency in teaching (teachers' State certificate) shall be given. Actual teachers in good standing, having taught three full annual terms, may also take the examination.

Meetings.—Annually the county superintendent shall hold an institute, at which all the teachers of the county are required to be present without loss of pay. The duration of the institute is five days, one half day being allowed to come from and another to return home. The county superintendent shall draw from the county treasury for every three days' attendance of a teacher the sum of $1 to defray the expenses of lecturers and instructors. It shall be lawful, however, for the board of directors or controllers which has elected a superintendent and employs not fewer than 75 teachers to hold a separate annual teachers' institute and to draw upon the county treasury in the manner laid down for the county superintendent.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—The board of directors or controllers shall provide a sufficient number of schools for the education of every individual above the age of 6 and under 21 years of age for four to ten months, without regard to race or color.

No minor under 13 years of age shall be employed in cotton, woolen, silk, paper, bagging, or flax factories; any owner or employer of, or in any of said factories, or agent therefor, willfully or knowingly employing any such minor shall pay a fine of $50 for each offense. No minor between the ages of 13 and 16 years shall be employed in such factories longer than nine calendar months in any one year, and not unless he shall have attended school at least three consecutive months within the same year. No boy shall be employed in any mine unless proof be given that he is 12 years old.

Character of instruction.—It is the duty of each county superintendent to see that there be taught orthography, reading, writing, English grammar, geography, arithmetic, and physiology in reference to stimulants, as well as such other branches as the board of directors or controllers may require, all to be taught by qualified teachers. Failure of a local board in these respects works forfeiture of State money. District boards have power to grade schools, and boards in cities and boroughs having a population of 5,000 or more, may establish a high school and fix its course of study, appoint its teachers, and maintain it for ten months in the year.

Upon the application of the parents of 20 or more children above 6 years of age, the school board shall open an evening school, giving instruction in reading, writing, arithmetic, and such other studies as may be prescribed by the board. The term of such school is to be not fewer than four months of twenty evenings of two hours each, but if the average attendance falls below 15, the school may be closed. In certain cities central boards of education are provided, to establish and maintain schools for the instruction in the mechanic arts and kindred subjects; instruction in such schools may be given in the day or evening, and may include chemistry, mathematics, natural philosophy, and other branches pertaining to the mechanic arts.

Text-books.—No series of text-books shall be adopted in any school district unless by affirmative vote of the whole number of the directors or controllers, and their votes shall be recorded by name; nor shall any text-books be changed until three years after their adoption. The board shall purchase text-books and other necessary supplies for the schools as the occasion demands, and such books and supplies shall be furnished free of cost to the pupils, subject to regulations.

Buildings.—Suitable buildings and outhouses must be supplied by the board of directors for all children of school age.

4. Finances.

Funds (permanent and special).—Taxation.

Funds (permanent and special).—Any person found intoxicated in a public thoroughfare or place shall be fined $2, to be paid to the school district. This fund is distributed to the districts on the basis of resident taxables.

Taxation.—There are three kinds of tax for school purposes according to their subjects, each separate and distinct, but all may be due from one person. They are: The rate tax on real and personal property; the rate tax on such trades, occupations, professions, and salaries and emoluments of office as will yield over $1 by the rate on its valuation; a minimum occupation tax of $1 on all resident males' taxables over 21 years of age whose assessed occupation at the rate levied for school purposes will not produce $1. The districts may tax themselves for support of schools in general, up to 13 mills, and may raise a sum for establishing schoolhouses not greater than the sum raised for support of schools in the same year.

DELAWARE.

1. Organization of the System.

State board of education.—County superintendent of free schools.—District school commissioners.

State board of education.—The governor, secretary of state, and the three county superintendents shall constitute a State board of education, which shall meet annually, with the governor as president and the secretary of state as secretary. The board shall hear appeals concerning school matters, shall determine what textbooks are to be used, and shall issue a uniform series of blanks and other records, which it shall distribute. The members of the State board shall receive no compensation. The president shall biennially report to the governor concerning the condition of the public schools and make such suggestions and recommendations in regard thereto as he shall deem proper and advisable, and for his labor in preparing such report he shall be allowed $25 or less.

County superintendent of free schools.—The governor shall annually appoint and commission a suitable person to be superintendent for each county of the State. The person so appointed shall be of good moral character and well qualified, both intellectually and morally, for the office, as well as residents of the county at the time of their appointment and incumbency. The superintendent shall give bond in the sum of $5,000 with sureties.

The county superintendent shall have the entire management, control, and supervision of the colored schools, shall decide as to the location of the schools, appoint teachers for them, and pay the expenses of maintaining them.

The superintendent shall visit each school within the county at least twice a year, each visit to be not less than two hours in duration, provided the school is kept open at least eight months each year. He shall note the number of scholars and their conduct and standing, the condition of the buildings and grounds, the method of instruction, and the discipline and government of the school. He shall advise with the teacher and shall have power to suspend or withdraw the certificate of one refusing to comply with the reasonable directions of the superintendent. He shall devote his entire time to his duties. He shall examine teachers, shall report annually to the president of the State board concerning the condition of the public schools, together with such recommendations and suggestions as may seem proper. His compensation shall be $1,000 per annum, from the State treasury.

District school commissioners.—All alterations in districts must be made by the levy court, two-thirds concurring, upon application; but two or more school districts in any county may unite for establishing and supplying a free school for their common benefit.

The district meeting shall decide what sum shall be raised for a schoolhouse or a free school.

Each district shall annually elect a school commissioner to serve for three years. The duties of the commissioners are—

1. To determine the site, lease or purchase the necessary ground, and build or procure a suitable house for the district, as near the center of the district as possible. When built or procured, it shall not be removed nor another procured without the direction of the school voters at a stated meeting.

2. To keep the schoolhouse in good repair, supply it with necessary furniture and fuel, and bring actions, if necessary, for any injury to it.

3. To provide a school for the district when and as long as their funds will enable them, and to employ teachers. They may make regulations for the government of the school, and by these provide for the expulsion of a scholar for obstinate misbehavior.

4. To receive and collect all money belonging to, appropriated, or resolved to be raised for the district, and to apply the same justly.

5. To appoint collectors for the district, and take security by bond.

6. To do all acts requisite for effecting the premises—the acts of a majority to be as effectual in all cases as if done by them all.

The school committee must also annually, at the stated meeting, exhibit a just account of their receipts and expenditures, and a report of all their proceedings—may then appoint persons to settle such account—and must pay to their successors in office all money due from them. If for ten days they neglect to do this they forfeit and must pay, additionally, at the rate of 5 per cent on the sum due.

For these duties the committee may receive no emolument; but for attendance before the auditor they may, on the settlement of their account, be allowed each $1 per day and 3 cents per mile of necessary traveling.

2. Teachers.

Appointment, qualifications, and duties.—Institutes.

Appointment, qualifications, and duties.—It shall be unlawful to employ any person to teach in the public schools unless the person employed holds a certificate good in the county where employed.

The county superintendent shall examine, either orally or by printed or written questions, or both, all persons who apply, at such times and places as he may appoint. Every applicant of good character found qualified to teach orthography, reading, writing, mental arithmetic, written arithmetic, geography, history of the United States, English grammar, physiology and hygiene, with special reference to the effects of alcoholic drinks and narcotics upon the human system, elements of rhetoric, algebra, geometry, and natural philosophy shall be recommended to the State board for a first-grade certificate, good for three years, if issued. A second-grade certificate shall be issued by the superintendent to an applicant who shall have answered 90 per cent of the questions in all the above up to and including temperance physiology, which shall be good for two years. To an applicant attaining an average of at least 60 per cent on the subjects required for a second-grade certificate a third-grade certificate shall be given by the superintendent, good for one year. Parties refused certificates may appeal to the State board.

Every free-school teacher shall report to the commissioners at the end of each quarter the number of pupils attending school during the quarter, designating whether male or female, the number of days each has attended, the books used, and branches taught. Failure to make these reports shall cause the salary of the teacher to be withheld. The reports shall be forwarded to the county superintendent.

Meetings.—Each superintendent shall hold a teachers' institute during each year of three days' session. Every teacher of the county must attend. At these institutes each superintendent shall give all the information in his power, such other instructions as he may deem advisable, and shall cause a general interchange of views among teachers as to the wants of the schools.

One hundred dollars shall annually be set apart from the school fund distributed among the counties for the purpose of paying the expenses of the teachers' institutes.

3. Schools.

Attendance.—Character of instruction.—Text-books.

Attendance. [There are separate schools for colored persons.]

Character of instruction.—[The studies required in the public schools may be inferred to be those in which teachers are examined for a second-grade certificate.] All public schools receiving aid from the State shall give instruction in physiology and hygiene, with special reference to the effects of alcoholic drinks, stimulants, and narcotics, instruction to be orally when the pupils can not read.

Text-books.—That on and after the first Saturday in April, A. D. 1891, the school commissioners or trustees of each school district or districts in the State shall furnish the necessary text-books free for the use of all the pupils enrolled in the free schools of the State in the manner hereinafter provided.

The school commissioners or trustees shall order from the publisher or publishers the books which have been adopted by the State board of education for use in the free schools of the State, at the net contract prices at which the publishers have agreed to supply the same, as follows: There shall be a blank order book prepared by the State treasurer for the use of the school commissioners, which shall contain duplicate order blanks, with a printed list of the books which have been adopted by the State board of education, and the net contract prices at which the publishers agree to furnish the same.

Duplicate orders shall be filled out and signed by at least two of the school com missioners, or in case of united or incorporated districts by the president and secretary of the school board; one of these orders shall be forwarded to the State treasurer, to be forwarded to the publisher or publishers, and the other shall be kept as a stub in the order book, as a voucher.

The State treasurer, on receipt of an order or orders from school commissioners, shall make an entry of the amount of the order or orders against the district or districts in a book kept for that purpose, and shall forward the order or orders at once to the publisher or publishers, requesting them on receipt of the order or orders to ship the books as directed, at the contract prices named, and send duplicate invoices or bills for the same, one to the State treasurer and the other to the district clerk of the school district to which the books are consigned.

The State treasurer shall pay the publisher or publishers out of the school fund of the State for books thus supplied, and charge the amounts so paid to the respective districts ordering said books and deduct the same from the amount to which such district or districts may be entitled under the school laws of the State: *Provided, however*, That the State treasurer shall pay no bill for at least thirty days from the time it is rendered, in order that he may be notified by the school commissioners of any error or failure on the part of the publisher or publishers to supply the books as ordered and directed, or as billed.

It shall be the duty of the clerk of each school district or districts to distribute the books received, as aforesaid, to the scholars of the district or districts, or their parents, guardians, or other person, as they may desire, upon receipt for the same. The clerk of each district or districts shall be responsible for the safe-keeping of the books furnished him, as aforesaid; and also for prices of books sold, as hereinafter provided, to parents, guardians, scholars, or other persons. Any money or the value of the books which such clerks shall fail to account for according to law may be recovered in the name of the State by the county superintendent before a justice of the peace, as other accounts, when the amount does not exceed the sum of $200. Such clerk shall, at the expiration of his term of office, turn over to his successor in office all books on hand and take a receipt for the same, which shall be his voucher in settlement.

SEC. 4. It shall be the duty of the school commissioners to provide for the safekeeping and care of the books which shall be returned by the pupils at the close of the annual school term to the clerk of the district, or to such other person as the school commissioners shall designate. They shall also keep a separate account of the amount expended for books, and shall report it under a separate item in the annual settlement required by law. The school commissioners may furnish books at cost to pupils who wish to replace books lost or wilfully destroyed, or who may wish to own their books, and shall turn the proceeds of all such sales into the school fund of the district and report the amount at the time of the annual settlement to State auditor.

That the text-books for the colored schools of the State shall be ordered by the county superintendents of the respective counties through the county treasurer of each county. It shall be the duty of the county treasurer, upon the order of the county superintendent, to purchase and furnish text-books to such colored school or schools as the county superintendent shall designate, and the county treasurer shall charge the same to the said school or schools, and deduct the amount thereof from the State appropriation due such school or schools.

The county treasurer shall receive $50 from the State appropriation for colored schools for his services in purchasing text-books for that class of schools.

4. FINANCES.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The clear income of the school fund of this State is apportioned among the school districts as follows:

1. The dividends on an investment in 5,000 shares of Farmers' Bank stock, made under act of February 21, 1837; the interest on $131,750 of a bond of the State of Delaware to the school fund of the said State, at 6 per cent interest, and the

interest on the sum of $5,000 advanced to the county of Sussex under act of February 17, 1837, must be divided, as they fall due, among the counties equally, except that Sussex County is to have, for its schools, the interest on the $5,000 above mentioned in addition to its one-third part of the dividend from the general school fund.

2. All the clear dividends or profits from any other bank stock, securities, or property belonging to said fund, together with the clear sum from fees for marriage and tavern licenses, one-fourth of all money arising from licenses for auctioneering, foreign life insurance agency, vending of goods by samples, keeping of traveling jacks or stallions, keeping eating house, taking photographs, acting as brokers, real-estate agency, exhibiting circuses, practicing jugglery, selling vinous, spirituous, or malt liquors; also one-fourth of the fees on commissions issued to prothonotaries, clerks of the peace, recorders of deeds, clerks of the orphans' court, and sheriffs, and any other income of said fund, or money directed by law to be paid to the trustee of said fund for distribution, must be apportioned among the several counties according to their white population, as ascertained by the census.

The trustee of the school fund, in apportioning annually the share of its income to each county in the State, must distribute it equally among all the districts in the respective counties, without regard to the question whether the said districts are original or subdivided, and so that each district in the same county shall receive the same sum or share, except that in apportioning the share of Newcastle County among the districts thereof the said trustee shall distribute one-seventh part of this among the districts in the city of Wilmington, the residue among the remaining districts equally.

Taxation.—The school commissioners in each school district must annually assess and levy, without regard to any vote thereon, in each school district of Newcastle County the sum of $150, in each school district of Kent County the sum of $125, and in each of the school districts in Sussex County the sum of $75.

Whenever the school voters in a school district raise in any year, by subscription or tax, $25, the school committee may draw an order on the trustee of the school fund for such district's share of the proceeds thereof. Such order, accompanied by a certificate that the committee did actually receive that amount, shall be accepted and paid by the said trustee to the extent of any sum that may stand to the credit of the district when the order is presented, and any money that shall be placed to its credit during that year of the account shall be applicable to the balance.

MARYLAND.

1. Organization of the System.

State board of education.—Board of county school commissioners.—County examiner.—District school trustees.

State board of education.—The governor, by and with the advice and consent of the senate, shall appoint at every regular session of the general assembly four persons, who, together with the governor and the principal of the normal school, shall constitute the State board of education. The board shall meet quarterly at its office in the State normal school, and shall receive no compensation other than for the expenses incurred in attending meetings and for necessary clerical assistance, all to be met by $1,000 per annum. The duties of the board are to enforce the law regarding the public schools, to suspend or remove any unfit examiner or teacher, examine candidates for county examiner and give a certificate of qualification, and grant professional certificates to teachers of long experience and established reputation, which shall be valid until revoked for cause. They shall cause all institutions of whatever grade receiving public money to report annually, such reports or an abstract to be printed in the annual school report of the president of the board. In general, they shall have the care and supervision of the public school interests of the State, including the State normal school.

County board of school commissioners.—Educational matters affecting a county shall be under the control of a county board of school commissioners, to be appointed by the governor, with the advice and consent of the senate, of six or three persons, according to the county, for terms of six years, one-third the members retiring biennially. The board shall meet at least once during each school term, and its members shall receive a per diem for actual service of $4, not to exceed the average of $100 for each commissioner. It shall elect a person, not members of itself to be secretary, treasurer, and examiner, and in counties having more than 85 schools an assistant examiner may be appointed and his salary fixed.

It has charge of all the property, estate, effects, money, funds, claims, and State donations, shall build, repair, and furnish schoolhouses, fix the salaries of teachers, purchase and distribute text-books, and in general has the supervision and control of all schools in the county and the duty to advance its educational interests. It shall annually report to the State board, and in addition make a financial statement. Vacancies are filled by the governor. No person teaching may also be county commissioner.

County examiner.—It shall be the duty of the county examiner, when elected by the county board, as stated above, to examine candidates for teaching schools in the presence of one or more district trustees. It is his duty to visit the schools of the county twice a year when it contains more than 50 schools and three times if it contains fewer, to examine pupils and to inquire into and regulate all matters relating to the management, the course of study, and the instruction and discipline of the schools. He must devote all his time to the schools.

District school trustees.—Educational matters affecting a school district shall be under the supervision of a board of district school trustees, and in all cases where the county has not been properly divided into school districts and full records of the boundaries thereof have not been made and recorded, the board of county school commissioners shall appoint a committee, if they deem it necessary, consisting of three persons, who shall divide the county into suitable districts, none to have a greater area than 4 square miles, unless a part of it be located in a thinly settled region, and in the formation of the district the committee shall take into consideration the most suitable site for the schoolhouse and the general features of the country. The board of school trustees of each district into which the county may have been divided shall be composed of three persons, who shall be appointed by the county school commissioners. The board shall have the care of the houses, lands, furniture, apparatus, and other school property, and except when repairs are paid by a county school tax they shall be determined by the county commissioners. It employs teachers, subject to confirmation by the board of county school commissioners, from among qualified applicants, and exercise a general supervision over their respective schools, and provide suitable outhouses. Vacancies may be created for cause and filled by the board of county commissioners.

For colored schools there is a special board of school trustees to be appointed by the board of county school commissioners.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No person shall be employed by the board of district trustees as a teacher unless holding a certificate issued by the examiner of the county in which the person proposes to teach or by the principal of the State normal school, or a diploma from that school, or a certificate from the State board, or, if a man, who is under 19, or, if a woman, under 17 years of age.

Teachers shall record and render in their quarterly reports to county school commissioners the statistics of attendance, the text-books used, and branches taught, and other matters of a statistical nature as may be required, on penalty of forfeiture of pay. Salaries are fixed by board of county school commissioners.

Any person holding a first-grade teacher's certificate or the diploma of a respectable college or of a State normal school, who has been a teacher seven years, five of which have been in Maryland, may apply to the State board for a life certificate, which is, however, annullable for cause. The certificates issued by each county examiner shall be denominated as of first or second grade. Certificates of the first grade shall embrace orthography, reading, writing, arithmetic, geography, history, English grammar, bookkeeping, algebra, natural philosophy, physiology, plane geometry, and theory and practice of teaching. Those of the second grade shall embrace all the above except bookkeeping and natural philosophy; but the State board may add to the list of subjects required in either grade. Such a certificate shall not remain in force for more than six months unless the holder satisfy the examiner that he has ability to govern and to instruct the pupils of a school. When so satisfied the examiner may issue a revocable certificate for five years. No fees are charged for issuing certificates. In schools having more than 40 pupils in average attendance an assistant may be employed, and for every additional 40 children one teacher may be appointed and the school shall be graded.

Preliminary training of teachers.—There shall be located in the city of Baltimore a State normal school for the instruction and practice of teachers in the science of education, the art of teaching, and the mode of governing schools, whose principal shall be appointed by the State board, at a salary of $2,500 per annum and

such expenses as he may incur in traveling through the State attending institutes and superintending the schools. Besides the principal there shall be two men and two women professors, also appointed by the board. The school shall be open not fewer than nine months, and shall admit women of 16 and men of 17 years of age. The scholarships are distributed among the counties on the basis of their representation in the general assembly, and are selected by the school commissioners from among candidates having the scholastic qualifications for a teacher's certificate as testified by examination before the county examiner (in Baltimore, the city superintendent). The candidates are required to file a written declaration that their object in entering the school is to qualify themselves for teaching in the public schools in the State. In case they fail to fulfill this declaration they shall be compelled to pay $30 for each session of attendance. The State board of education shall have supervision of the school in every particular, and shall provide a model school of primary and grammar grade, the salary of the teachers to be paid in part from tuition fees derived from charges paid by the pupils of the model schools.

Meetings.—A teachers' institute, designed as a temporary normal school, to continue five days, shall be held in each county once a year, and the county examiner shall be present and give normal instruction to the teachers each day.

District, county, and State teachers' associations are recommended by the law, and the Maryland State Teachers' Association has been organized.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—All white youths between the ages of 6 and 21 years shall be admitted into the public schools of the State the studies of which they may be able to pursue, and for cause may be expelled. Proof must be furnished of having been vaccinated. School must, if possible, be kept open ten months. When two or more assistant teachers are employed in a school it shall be graded.

The board of county commissioners shall establish one or more public schools for colored persons 6 to 21 years of age, to be kept open as long as the other schools of the county, provided the average attendance be 15 or more.

Character of instruction.—In every district school there shall be taught orthography, reading, writing, English grammar, geography, arithmetic, history of the United States, and good behavior. Algebra, bookkeeping, natural philosophy, the constitution of the United States and of the State of Maryland and the history of Maryland, vocal music, drawing, physiology, the laws of health, the effects of narcotics and stimulants, and domestic economy shall also be taught, and the elements of agricultural science may be added to the curriculum of the State normal school and the public schools. In districts having a large German population the German language may be taught. Whenever the number of children attending school in any school district is greater than 100 the board of county school commissioners may, with the consent of the board of district school trustees, establish schools of different grades or the school district may be divided, and whenever the average attendance falls below 10 the school may be closed by the county school commissioners, but the district school trustees may keep it open in part at their own expense and shall receive their portion of the school fund as though the school had 20 pupils. Examinations shall be held twice annually. School shall be open six hours, and the hours for teaching shall be regulated by the board of county school commissioners. The school year has four terms. If a building for a high school shall be furnished by one or more election districts it shall be the duty of the board of county school commissioners to provide for the maintenance of academic instruction in the same, if the board deems the school necessary. The teachers are to be paid from the general school fund.

Text-books.—The board of county school commissioners shall adopt and may purchase the text-books for the schools of the county, and shall authorize the delivery of them and of stationery to the various schools under regulations, but no pupil shall be required to pay more than $1 quarterly for the use of such books and stationery, and any child may be exempted from the fee on account of pecuniary inability.

Buildings.—It is the duty of the board of county school commissioners to select suitable sites for schoolhouses. No schoolhouse shall be used for any other than public-school purposes or meeting unless by consent of the board of county school commissioners. Any person disturbing any public school in session shall be guilty of a misdemeanor, and shall be fined $20 or be imprisoned not exceeding thirty days, or both.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—[The free-school fund is made up principally of two sums received from the United States, to wit: The interest on the sum advanced to the United States during the war of 1812, and the so-called United States deposit fund of 1837. The income of this is annually apportioned to the counties.]

If there be no widow or relatives of an intestate within the fifth degree, counting down from the common ancestor to the more remote, the whole surplus of an estate shall belong to the State, and shall be paid to the board of county school commissioners for the use of the public schools of the county.

Taxation.—A State tax of 10½ cents on each $100 of taxable property throughout the State shall be annually levied for the support of the free public schools and the State normal school, to be apportioned by the comptroller among the counties with respect to their population 5 to 20 years of age. The State tax and the interest of the free-school fund are intended to pay the salaries of the teachers and provide schoolbooks and stationery; but if they should be inadequate, then the county school commissioners are authorized to levy a tax as shall be necessary, not to exceed 10 cents on the $100, unless the excess be approved by the board of county commissioners [the general administrative authority].

VIRGINIA.

1. Organization of the System.

State board of education.—State superintendent of public instruction.—County school board.—County superintendent.—District school board.—City school board.—City superintendent.

State board of education.—The State board of education shall be a corporation consisting of the governor, superintendent of public instruction, and the attorney-general. Its duties shall be as follows: To make rules for its own government and the execution of the law; to observe the operations of the system and suggest improvements to the legislature; to invest the capital and surplus income of the literary fund; to appoint, discipline, and remove county and city superintendents of schools, subject to confirmation by the senate; to order a vote in counties or cities on matters so referable by law; to decide appeals from the State superintendent and to determine the contingent expenses of his office; to audit all claims to be liquidated out of the State funds; to approve a first and second clerk for the office of the State superintendent and nominated by him, the first clerk to serve as secretary of the board at an extra compensation not to exceed $320; to regulate matters pertaining to public schools not specially provided for; to report to the general assembly, including the report of the State superintendent; to guard against the multiplying of schools to the detriment of the grade of instruction; to establish uniformity of text-books; to distribute school furniture, apparatus, and library books on some gradual system; to invite and encourage meetings of teachers at convenient places.

Superintendent of public instruction.—A superintendent of public instruction shall be elected by the general assembly by joint vote at its regular session every four years, who is authorized to rent an office in Richmond at $300 a year. He shall be the chief executive of the public free-school system, and shall see that the laws relating thereto are enforced and explain them to public-school officers, shall prepare suitable registers, blank books, and forms for the transacting of the school business, and by circulars and otherwise shall give instruction to those who have educational duties to perform. He may require special reports from any officer and may appoint persons to examine the schools of the county in which such person resides, but no compensation shall be received by him. He shall inspect the public schools as often as is consistent with his other duties, decide all appeals from decisions of county superintendents, shall preserve all books, apparatus, maps, etc., received by him, prepare a scheme for apportioning the money appropriated by the State for the schools among the several counties and cities on a basis of the number of children from 5 to 21 years, provide a seal, and annually report to the board concerning his official acts, including a plain statistical account of receipts and expenditures, and other duties required of him by law.

County school boards.—The county superintendent of schools, together with the district school trustees in each county, shall constitute a body corporate. It shall make and record rules for its own government, may appoint a clerk at $2 a

day for actual service, prepare an estimate of the amount of money needed for the public schools and, after careful revision of the estimates of the district boards, separately prepare estimates of the expenses of schools in each school district, hold a regular annual meeting, manage or examine into the management of all property belonging to the county schools, and report annually to the State superintendent.

County superintendent of school.—County superintendents shall be appointed by the State board for four years, at a compensation of $30 for every 1,000 of population for the first 10,000, $20 for every 1,000 in excess of 10,000 up to and including 30,000, and $10 for every 1,000 in excess of 30,000, rejecting in each case fractions less than 500; provided the compensation shall not be less than $200 a year, to be paid out of the bulk of the State school funds as distinguished from the appropriations from the same to the several counties. His duties shall be as follows: To explain the school system upon all suitable occasions and promote a desire for education, to prepare a scheme for apportioning the State and school funds among the school districts, to examine persons desiring to teach and to issue licenses and to promote the efficiency of the teaching force, to assist in the organization of the district school trustees at their sessions (without the right to vote), to examine all the schools as to their management, course of study, methods, discipline, and text-books, the condition of the schoolhouses, and the records and official papers of the school districts, to decide finally all complaints or appeals concerning the acts of persons connected with the school system, to administer oaths and take testimony whenever required in cases coming before himself or the State superintendent, to keep a record of his official acts, to make special reports to the State superintendent when required to do so, and to obey his instructions and make an annual report to him, on penalty of forfeiting the last quarter of his annual pay.

District boards of school trustees.—School districts shall correspond with the magisterial districts except that towns of 500 or more may elect to form a separate district. Subdistricts may also be formed or, if injurious, abolished.

The judge, commonwealth's attorney, and school superintendent of each county shall be a board to be known as the school trustee electoral board, which shall have power (except in case of municipal councils who appoint their own boards) to appoint district boards of school trustees of three each for the term of three years, one retiring annually, each of whom shall be a resident of the school district and shall continue so during his term or relinquish his place, and no supervisor or county treasurer is qualified. The duties of the board of trustees are as follows: To explain and enforce the school laws, to employ and to dismiss teachers, to suspend or dismiss pupils, to decide what children shall, by reason of poverty, be furnished text-books free, to see that the school census is taken properly every five years of persons 5 to 21 years, to call meetings of the people of the district, to prepare and present to the county school board an estimate of the money needed for maintaining the public schools, including buildings and text-books for the children of indigent persons, to care for, add to, and manage the school property of the district, and to permit the use of an unoccupied public schoolhouse (vacant from lack of funds to maintain it) by a person not employed by the board but who desires to teach, to report annually to the county superintendent, to visit the schools within the district, and to see that they are carried on in accordance with the law.

The clerk of the district school board shall every five years take a census of the persons (5 to 21 years) residing in the district, receiving compensation at the rate of $3 for every 100 persons enumerated, and perform other duties as may be required by the board, for which he shall be paid $2 per diem of actual service.

City school boards.—All the school trustees in a city shall constitute a single corporation, which shall have the same officers, powers, and duties as ordinary boards of district school trustees except as otherwise provided. This board shall have power, subject to the common council, to prescribe the number and boundaries of school districts and the number of trustees (not exceeding three from each district); but until such arrangement is made every city not divided into wards shall be one school district, and cities divided into wards shall have as many districts as there are wards. Each trustee is appointed for three years, one retiring annually. The school board shall select text-books, though for the primary schools it must choose from a list furnished by the State board. It may also establish high and normal schools.

City superintendents.—In every city of 10,000 or more inhabitants there shall be a superintendent of schools, appointed by the board of education of the city and paid by the State, though the amount thus paid may be increased by municipal action. Whenever the population of a county in which a city of fewer than 10,000

inhabitants is located contains 15,000, exclusive of the population of the city, that city may have a superintendent separate from the county, under the conditions obtaining in the case of cities of 10,000 or more. The city superintendent may teach ex officio when requested by the board, may suspend or dismiss pupils, with appeal to city school board, and shall participate in the sessions of the board, but shall have no vote.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duty.—No teacher of a free public school shall be employed or paid from public funds unless holding a certificate of qualification in full force from the county superintendent. If payment is made for the services of a person unqualified, the payment shall be disallowed, and the officer who sanctioned it shall be fined not fewer than $5 nor more than $50. Written contracts must be made in duplicate before installment.

The county superintendent shall examine persons applying for license to teach in the free public schools, and, if satisfied as to their capacity, acquirements, morals, and general fitness, he shall grant them certificates of limited duration subject to revocation, all under the supervision of the State superintendent. He shall also hold examinations for those desiring to teach in his county for the school year at such time and place as may be required by a district board. Examinations will be held in orthography, reading, writing, arithmetic, grammar, geography, physiology and hygiene, and, for a first or second grade certificate, in the theory and practice of teaching. Applicants to teach schools in which the higher branches have been introduced must be examined upon those branches also. The first-grade certificate entitles to teach three years, and may be renewed for two years or shorter period; the second grade is good for two years, and the third grade for one. The State superintendent shall issue two grades of State certificates, one valid for seven years (the "professional certificate") and the other for life (the "life diploma"). To obtain either of these the applicant must pass in the subjects required for a first-class county certificate and such other subjects as the State superintendent may demand, and have taught school two years or more, and satisfy the superintendent of his ability to teach and manage a school.

Every teacher shall keep a daily register of facts pertaining to his school and be responsible for it until delivered to the clerk of the school district, may suspend pupils until the case is decided by the board, is exempted from working on roads, nor shall the salary received be governed by the daily average attendance unless it be 10 or fewer.

Preliminary training.—There are four normal schools—one for white men, one for white women, and two for colored persons. The object of the Hampton Normal School, as set forth in the charter, is to "instruct youth in the various common-school, academic, and collegiate branches, the best methods of teaching the same, and the best mode of practical industry in its application to agriculture and the mechanic arts." The other school for colored persons is known as the Virginia Normal and Collegiate Institute, having for its organization a normal department and a collegiate department and such professional departments as may be deemed expedient.

The State Female Normal School is expressly for the training and education of white women for teachers in the public schools. It is under a board of trustees, of whom the State superintendent is one. The trustees may grant diplomas and certificates of proficiency to its graduates and pupils. Each city and county is entitled to send one pupil and one additional for each representative in the house of delegates above one. Each pupil is required to give satisfactory evidence of an intention to teach in the schools of the State for at least two years. The College of William and Mary is authorized to establish, in connection with its collegiate course, a system of normal instruction and training for the purpose of educating and training white men for teaching for the public schools. It is governed by a board of visitors of 21 persons, 10 of whom are appointed by the governor with the State superintendent an ex officio member, which prescribes rules for the examination applying for normal instruction, and requires satisfactory assurance from each pupil that it is his intention to teach at least two years in the public schools, and each pupil shall have the privilege of the college course without charge. Each county and city in the State shall be entitled to one pupil, who shall be nominated by the county superintendent, and one additional pupil for each additional representative in the house of delegates.

For the purpose of establishing an intermediate grade of instruction between that of the common school and that of the college, any district or school board,

with the consent of the county school board, may admit branches necessary to qualify pupils to become teachers.

Meetings.—The State board of education shall have power at its discretion to invite and encourage meetings of teachers at convenient places and to procure addresses to be made touching the processes of school organization, discipline, and instruction; provided that no public money shall be expended for the purpose, and that no meeting shall be held during the time the schools should be open nor shall any teacher be paid for attendance or be compelled to attend.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—White and colored children must be taught in different schools. The school age is 5 to 21, but persons 21 to 25 may be admitted on payment of tuition fees. Pupils must be vaccinated. An enrollment of at least 20 pupils, with a reasonable assurance of an average attendance of that number, shall be required to constitute a free public school, but in cases where this would work hardship the county superintendent may allow 15, and in case of a factious spirit on the part of one or a few persons which tends to reduce the attendance below the minimum the school may be kept open.

Character of instruction.—In every public free school shall be taught orthography, reading, writing, arithmetic, grammar, geography, history of the United States and of Virginia, physiology and hygiene, and drawing, and none other, except as allowed by the State board. [But see below in regard to intermediary instruction.] In schools having not fewer than 40 pupils, with an average attendance of 30, at least two teachers shall be employed the whole time, one of whom shall be devoted to instruction in elementary branches, and in all localities where the number of children is sufficient preference shall be given to graded schools—that is to say, schools in which the pupils are taught in different rooms by different teachers, according to advancement in the studies of the one-teacher school. To encourage an intermediate grade of instruction, school boards of districts, when the county board has consented, may admit instruction in any branches necessary to qualify pupils for teaching in the public schools or to enter any of the colleges or higher institutions of the State, but a fee may be required, not exceeding $2.50 a month, for each pupil, and schools having but one teacher and a daily session of five hours shall be confined to the elementary branches.

Text-books.—The State board shall, on some gradual system, bring about uniformity, and to that end they shall be selected from a list furnished by the State board. In cities the text-books may be provided by the city school board, except for primary schools. District boards shall decide what pupils shall be entitled to receive text-books free of charge owing to the poverty of their parents.

Buildings.—The board of school trustees shall provide suitable schoolhouses, with proper furniture and appliances, in every district, and may hire, erect, or purchase such houses, observing the utmost economy consistent with health and decency, after consultation with the county or city superintendent as to the style of architecture and the arrangements of the buildings and grounds. Unsanitary buildings may be condemned by the county superintendents. An unused building may be occupied by a person who desires to open a school, except when school funds are at hand to keep it open as a public school. To disturb any exercise of a school is a misdemeanor, subject to fine of not less than $10, or more than $50, and, in the discretion of the court, confinement in the jail for not more than thirty days.

4. Finances.

Funds (permanent or special).—Taxation.

The funds applicable annually to the establishment, support, and maintenance of free public schools shall be as follows:

State funds, embracing the annual interest on the literary funds (arising from the sale of public lands, forfeited property, and fines for offenses against the State), a capitation tax not exceeding $1 per annum on every male citizen of age, and such tax on property, not less than 1 mill nor more than 5 mills on the dollar, as the general assembly shall order.

County funds, embracing such tax as shall be levied by the board of supervisors, fines imposed upon school officers, and donations.

District funds, embracing such tax as shall be levied by the board of supervisors of the county, not to exceed 10 cents on the hundred dollars, for the purposes of the school district, and donations.

WEST VIRGINIA.

1. Organization of the System.

State superintendent.—State board of examiners.—Board of the school fund.—County superintendents.—District board of education.—Subdistrict trustees.

State superintendent of free schools.—There shall be elected a State superintendent of free schools, whose term of office shall be the same as that of the governor. He shall be a person of good moral character, temperate habits, of literary acquirements and skill and experience in the art of teaching, and shall be paid $1,500 annually and necessary expenses, not to exceed $500 in the year. He shall have his office and residence at the capital, have an official seal, sign all requisitions on the auditor for the payment of State money for school purposes, supervise all county superintendents and free schools of the State, see that the law is executed, prepare and forward all blanks required, correspond with educators and school officers abroad, collate the result of his investigations, make himself acquainted with peculiar wants of each section of the State, and annually report to the governor. He shall also contract with publishers for text-books.

State board of examiners.—There shall be a State board of examiners, consisting of four competent persons, one from each Congressional district, to be appointed by the State superintendent, to serve for four years. (See Teachers, appointment and qualifications.) Each member receives a per diem of $5 for time actually spent in discharge of duty, and 5 cents a mile for distance traveled over.

State board of the school fund. See Finances.

County superintendents.—A county superintendent of free schools shall be elected every four years by the county electors. He shall visit each school within his county at least once during the school year and note its scholastic character and physical surroundings, and shall labor steadily to procure uniformity of instruction throughout the county and promote the efficiency of the teaching force, reporting concerning these facts annually to the State superintendent. He shall make up a report to the State superintendent from the district reports to him concerning the condition of schoolhouses, the value of apparatus, and the volumes in and value of school libraries; and further, to report the districts failing to make a return of the youth within it and those that have failed to make the annual district levy for support of primary schools.

County board of examiners.—There shall be in every county a board of examiners, composed of the county superintendent and two experienced teachers (each of whom shall have a State certificate or a No. 1 county certificate or be a graduate of some reputable school), who shall be nominated by the county superintendent and appointed by the presidents of the district boards of education, for a period of two years, one retiring annually. They shall each receive pay at the rate of $3 a day of actual service, to be paid out of the fees exacted from applicants for a position.

District board of education.—The district board of education shall be composed of a president and two commissioners, elected by the voters of each school district (coextensive with each magisterial district of the county) for terms of four years, the two commissioners to retire at biennial intervals, who shall appoint for each subdistrict three intelligent trustees, each to hold for three years and one to retire annually. The board of education shall fix the salary of the teachers and elect a secretary, who shall not be a member. The board shall have general control and supervision of the schools and school interests, determining the number and location of its schools, provided that every village of fifty or more inhabitants shall be included in one subdistrict. The board shall cause a sufficient number of primary schools to be kept, require every teacher to enumerate the youth (6 to 21), and report the following facts: Youth 6 to 16 years of age, youth 16 to 21 years of age, distinguishing sex and race; determine the rate of taxation necessary for teachers' and building funds; to purchase and sell text-books and furnish record books and blanks to teachers. The members receive $1.50 per diem, not exceeding $9 a year.

Subdistrict trustees.—The trustees of the subdistricts are three in number, appointed for three years by the board of education, one retiring annually. They shall have charge of the schools in their district and appoint teachers, making a written contract; visit every school under their charge once within two weeks after the opening and again within two weeks before its close, thoroughly inspecting the premises, the character of instruction, and the proficiency of the pupils; may purchase fuel, brooms, and other things incidental to schoolroom use, and make repairs, rendering an account to the secretary of the board of education thereof.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No teacher shall be employed unless having a certificate of qualification to teach the grade for which applying. The county board of examiners shall examine each candidate in the prescribed studies, and if satisfied on actual examination as to the competency and moral character of the applicant they shall give a certificate in duplicate, valid for one year. Two examinations shall be held annually. No college diploma or certificate of recommendation shall supersede the necessity of an examination. The certificates shall be graded as follows: The first grade shall be issued for four years to all applicants who obtain an average of 90 (not less than 75 in any subject) on examination in all the branches required to be taught in the primary schools and the theory and art of teaching, general history, civil government, and bookkeeping; this grade certificate may be renewed once, provided its holder has taught under it for two years. The second grade county certificate shall be issued to all applicants who obtain an average of 80 per cent (not lower than 70 in any branch) on the studies of the primary schools and the theory and art of teaching; this certificate is good for two years. The third grade certificate shall be issued to those who obtain an average of 70 per cent (not lower than 60 per cent in any one branch) in the studies of the primary schools, and is valid for one year, and may not be reissued more than twice to the same applicant. Failure to attend a county institute without good excuse annuls the certificate. The State board of examiners issue two grades of certificates—first class, valid for twelve years; second class, for six years. The first class are issued to persons who possess the requisite scholarship and professional experience; the second class are issued to applicants who, in addition to the branches required for the county certificate, pass in four other branches. Second-class certificates are granted to the State normal schools and its branches and of the State university when such graduates have taught successfully the three years immediately preceding in the State under a No. 1 county certificate. Teachers teaching successfully four years under a second-class certificate shall be entitled to a first-class certificate at the expiration of the second class. Each applicant shall pay a fee of $5.

Every teacher shall keep a register, in which he shall enter the date of the beginning and close of the term, the name, sex, age, and studies of each pupil, and other particulars specified by authority. Failure to properly keep and deposit the register forfeits the balance due to the teacher. Teachers are required to take the school census.

Preliminary training.—The West Virginia normal school (Marshall College), with its five branches, is under the control of a board of regents of the State normal school, appointed by the governor. For educating colored persons for teaching, the State superintendent is authorized to arrange with institutions for that race within the State.

Meetings.—Teachers' institutes shall be held annually throughout the State, one or more in each county, and shall continue five days, and be instructed by skilled persons appointed by the State superintendent, at not more than $25 for each institute, but the aggregate amount for the whole State shall not exceed $500. At the close of the institute the county board of examiners shall hold one of their two annual examinations.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—White and colored children are to be taught apart. Every youth between the age of 6 and 21 years shall have a right to receive instruction at the free primary schools. Subdistrict trustees shall provide one or more primary schools for the colored children when they number more than 15, or the board of education of the district shall furnish educational facilities in any way it may deem best.

Schools must be kept at least four months.

Character of instruction.—In the primary schools there shall be taught orthography, reading, penmanship, arithmetic, English grammar, physiology, general history, history of the United States and of West Virginia, geography (including State geography especially), single-entry bookkeeping, civil government, and the theory and art of teaching. It shall be the duty of the State superintendent to prescribe a manual and graded course of primary instruction to be followed in the country and village schools, and for the graduation of those completing the course.

Text-books.—The law names the text-books to be used in the schools, and the State superintendent shall contract with the several publishers for the supply of them for the schools for five years upon the terms and guaranties submitted to the legislature by the publishers, and no "revised editions" are to be admitted during the period covered by the contract. It is the duty of the district board of education to purchase and to have on hand in the office of its secretary as many text-books as will supply the needs of the schools for the year, to be paid for out of the building fund, the books to be sold at the contract retail price. For this trouble the secretary of the board may receive a small and extra compensation. The above so far as applying to the district board is not obligatory upon them unless they so ordain.

Buildings.—The board of education of every district shall provide suitable schoolhouses and grounds, but in erecting buildings they must submit the plan to the county superintendent, whose duty it is to be acquainted with the principles of schoolhouse architecture, and in all his plans he shall study economy, convenience, health, and durability. To provide sites, schoolhouses, and furniture a district tax must be levied, not to exceed 40 cents on the $100 of property.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The existing permanent and invested school fund and all money accruing to this State from forfeited, delinquent, waste, and unappropriated lands and lands hereafter sold for taxes, the State's share of the literary fund of Virginia, or other claims of an educational nature upon her, estates of intestates, escheated lands, the taxes levied upon the revenues of a corporation, exemptions from military duty, and such sums as may from time to time be appropriated shall constitute the school fund. For the management of the fund a board of the school fund is created, composed of the governor, State superintendent, auditor, and treasurer. The interest of the fund is to be annually applied to the support of free schools.

Taxation.—The legislature shall levy for support of free schools an annual capitation tax of $1 on every male inhabitant of 21 years or more.

For the support of free schools there shall be a State tax of 10 cents on the $100, which, together with the interest of the school fund, forfeitures, fines, and confiscations, the annual capitation tax, dividends on bank stock held by the board of the school fund, shall be called the general school fund, and shall be annually distributed to the several counties in proportion to the youth therein, less the salary and expenses of the State superintendent, but no district is to receive its share unless it has annually raised enough money in connection with the State apportionment to keep the schools open for at least four months, or as many as have been settled upon by the voters: *Provided*, the local tax shall not exceed 50 cents on the $100, the levy and the State money to be called the teachers' fund. To provide buildings, sites, furniture, and appliances, and repair them, the board of education shall annually levy a tax on the property in the district not to exceed 40 cents on the $100.

KENTUCKY.

1. Organization of the System.

State board of education.—State board of examiners.—State superintendent of public instruction.—County superintendent.—County board of examiners.—District trustees.—City school board.

State board of education.—The State superintendent, together with the secretary of state and attorney-general, shall constitute the State board of education, which shall take, hold, and dispose of real or personal estate for the benefit of the common schools, the bonds, certificates, and other evidences of indebtedness being in the custody of the chairman. The board shall meet only on the written call of the chairman; it shall constitute a standing committee to prepare rules, by-laws, and regulations for the government of the common schools to be adopted and enforced under the authority and direction of the county superintendents, trustees, and teachers; to prescribe regulations for the management of county teachers' libraries, and prepare suitable lists of books for district libraries, with regulations for the management thereof; to prescribe and publish a public graded course of study for the common schools, specifying the order of studies and the time to be allotted to each, which shall be enforced by the district trustees.

State board of examiners. See Teachers, *Appointment, qualifications, and duties.*

State superintendent of public instruction.—There shall be elected every four years a State superintendent of public instruction, who shall give bond for the faithful performance of his duty to the amount of $25,000. His salary shall be $2,500 per annum, and he shall have all the office fixtures, stationery, books, postage, fuel, and lights needed to carry on the work of his office. He may appoint three clerks, one at a salary of $1,500, one at $1,000, and one at $850 per annum, to be paid out of the common school fund. He shall be a member of the State board of examiners; shall keep his office at the seat of government in such suitable buildings as may be provided; shall devote his entire time and attention to the duties of his office; shall keep an account of all the orders drawn or countersigned by him on the auditor and of all changes in the offices of county superintendents; shall biennially, on or before the meeting of the general assembly, make report of the condition, progress, and prospects of the common schools, the amount and condition of the school fund, how its revenue for the two previous school years has been distributed, the amount produced and disbursed for common-school purposes from local taxation and other sources, and how and for what the same was expended, an abstract of the county superintendent's reports, the practical workings of the common-school system of the State, with suggestions as to any alterations it may require, together with such facts, statistics, and information as may be deemed of interest to be known, and shall cause to be printed a copy for each school district and for each county and city superintendent, 750 copies for the use of the members of the general assembly and for exchange with the superintendents of public instruction of other States and 500 copies for discretionary distribution. He shall include in his report the condition of the institutions for the blind, the deaf and the dumb, and the feeble-minded. He shall prepare suitable blanks for reports, registers, certificates, notices, and such other official documents as the law requires, and shall transmit them to the person intrusted with the execution of the school law. He shall biennially collect, arrange for publication, and index the school laws, omitting all that has been repealed and inserting in the proper place that which is amendatory. He shall report any neglect of duty or any misappropriations of school funds by county superintendents to the county attorney, who shall proceed against the delinquent.

County superintendent.—There shall be a county superintendent of common schools in each county, who shall be possessed of moral character and ability to manage the common school interests of the county efficiently. He shall possess a good English education, shall be competent to examine the teachers who shall apply to teach the common schools in the county, shall be 24 years old, a citizen of Kentucky, and have resided two years next preceding the election in the State and one year in the county for which he is a candidate. To be eligible to the office he shall hold from the State board of examiners a State diploma or State certificate which will not expire during his proposed term of office or a certificate of qualification of the grade of a county certificate of the first-class, which may be granted on an examination held before the State board or upon a written examination held by a special county board, composed of the county judge, county clerk, and a competent person selected by them, upon a series of questions for the examination prepared and forwarded by the State board of examiners which shall be securely sealed until the hour of examination, when, after the seal of the package containing the sealed envelope has been duly inspected, the envelope shall be opened in the presence of the persons assembled by the county clerk. In case of sickness or other disability of either the county judge or clerk the county attorney shall perform the duty required of the absent member. The examination shall be held in every county on the last Friday in July and August next preceding the election of county superintendents, and the examination may be continued during the following Saturday by examiners if deemed necessary, and the written answers of each examination shall be immediately forwarded by the county judge or county clerk by registered mail to the State board of examiners, together with a fee of $2, which shall be paid to the two examiners, and the sworn statements of the members of the special board that the examination had been conducted in their presence in strict accordance with the provisions of this section, and that no applicant had directly or indirectly received assistance. The State board of examiners may, if they deem the answers sufficient, grant a certificate (which will not entitle to teach), but if they refuse they shall notify the county clerk. The members of the special county board shall receive a reasonable compensation fixed by the fiscal court. In counties embracing any city of the first class maintaining a system of public schools separate and distinct from the common schools of the county, no person shall be eligible to the office of county superintendent other than a resident of such county outside of such city or town. No county judge, justice of the peace, circuit clerk, county

clerk, county attorney, county surveyor, coroner, assessor, trustee of a common school district, or a teacher while engaged in teaching shall hold the office of county superintendent.

The county superintendent shall be elected by the qualified voters of each county for four years and shall give bond to the amount of the school fund for the year. In case of contested election the State superintendent shall have power to recognize a superintendent from among the contestants until the matter has been settled. He shall have power to lay off, change, and abolish school districts; may condemn any schoolhouse or appurtenances if unfit for school purposes; shall at least once a year make an official visit to each school district, but shall not visit more than three in one day, noting in a book kept for the purpose the number of pupils in attendance, the number absent and the cause therefor, the names of children unable to purchase books, the condition of the schoolhouse and its appurtenances of every kind, the qualifications and efficiency of the teacher, the conduct and standing of the pupils, the method of instruction, the discipline and government of the school. He shall counsel the teacher and trustees in regard to their duties. He shall make a certified statement to the State superintendent, giving the whole number of children 6 to 20 years residing in his county and in each of its districts, including each city and independent district, and he shall be individually responsible to the teacher or the district for any loss sustained by the teacher or district by reason of any error made in reporting the census. He shall superintend the taking of the census by the district trustees, shall ascertain the amount required to purchase text-books for indigent children, and pay the teachers monthly. He shall make an official report to the county superintendent, giving in tables of details and aggregates the school districts of his county by number; the names and addresses of trustees of each district, with date of expiration of term; the districts in which schools were taught and the time taught; the highest, lowest, and average number of children at school; the cost of tuition of each child for the session and by the month; the number of private schools, academies, and colleges taught in the county, and the length of session of the same; the number of teachers employed—male, female, and total—for the common schools; the average wages of male teachers, female teachers, and of total teachers for the month; the name and address of teachers resident in his county, with grades of certificates of each; the amount of money raised for common school purposes in the county by local tax or otherwise, and the purposes for which disbursed; the number and kind of schoolhouses; the number built and the value of each; the number of district libraries (stating if there be a county library) and the number of volumes in each, and the increase during the year, and the amount he has received for official compensation and expenses. For willful failure to be present at his office at the time appointed to receive reports. or for failing to make reports herein required, he shall be fined a sum not exceeding $50. He shall be at his office at the county seat on the second Saturday of each month, and at such other times as may be necessary to transact his official business. He may remove trustees for cause, and shall decide on questions of school administration, with appeal to State superintendent. His compensation shall be fixed by the fiscal county court at from 8 to 20 cents for each child enumerated by the district trustees, the amount to be paid out of the county levy; but no salary shall be less than $250 nor more than $1,500, and in fixing the amount no child under a city superintendent of a city, first, second, third, or fourth class, shall be counted. He shall also be furnished a suitable office large enough to accommodate the county teachers' library. He shall not buy directly or indirectly any teacher's claim, nor act as an agent for the sale of any text-book. Violation of this section shall cause him to be fined from $100 to $1,000. In case of vacancy the county judge may appoint a successor.

County board of examiners.—The county superintendent shall appoint two strictly moral and well-educated persons holding county certificates of the first class, State diplomas, or diplomas of some literary institution of high learning, who, together with himself, shall constitute a board of examiners for the county, whose material duties, as far as concerning the administration of school affairs, are given under Teachers, Appointment, Qualifications, and Duties, and Schools, Text-books.

District trustees.—The county superintendent shall have power, previous to the 1st day of April of each year, to lay off, abolish, or consolidate districts, and, if necessary, may lay off anew the districts belonging to his county. But in order that all districts may, as soon as practicable, be made to contain 45 children or more, the county superintendent shall work to that end. No district shall contain fewer than 45 nor more than 100 pupil children unless it contains a city, town, or village, or a high school, etc., entitled to a share of common-school funds. Each district shall be under the control of three trustees, who shall be of good moral

character, at least 21 years of age, and for white schools, able to read and write, one of whom shall be elected annually for a term of three years. No person holding the office of trustee of any private school shall be eligible to hold the office of trustee of any common school. The vote in electing a trustee shall be viva voce and taken at the schoolhouse. At this election the qualified voters of the district shall be the electors and any widow having a child 6 to 20 years of age and any widow or spinster having a ward 6 to 20 years. Vacancies shall be filled by the county superintendent. The trustees may take land by purchase or donation, the county superintendent consenting, for the purpose of erecting a schoolhouse, may build thereon, and provide the appurtenances. They may change the location of the house and sell the site. They may have land to the extent of 1 acre condemned, provided the owner does not have a residence, garden, orchard, or burying ground upon it. Whenever there is a district tax levied the trustees shall appoint a treasurer, who shall hold his office four years, giving bond to double the amount of taxes collected. The trustees shall employ teachers in writing, and shall visit all the parents of pupil children and urge upon them the necessity of prompt and regular attendance at school. At each meeting they shall carefully examine the teachers' register, and shall consider the condition of the school in all its features of buildings and instruction and provide for any deficiency. Upon complaint of the teacher in writing the trustees shall have power, after investigation, to suspend a pupil or expel him from school. They shall take an exact census of all the children that reside in their district on the 1st day of April who will be on the 1st day of the following July between the ages of 6 and 20 years, and on or before the 1st of May report a list of the same to the county superintendent and a duplicate list to the clerk of the county court, to be filed in his office, specifying the name, age, sex, and names of the parents or guardians of each child, to be entered in a book. Failure to take the report shall render the trustees liable to a fine of $20 or more, and willful falsification of the census makes the guilty person liable, in addition to the punishment of perjury, to a fine of not less than $50. No trustee shall purchase teachers' claims, directly or indirectly, nor be actuated by pecuniary motives in securing the appointment of any teacher, under penalty of the punishment visited upon bribery, and in general any person who is elected or appointed trustee of a common school but shall willfully fail or neglect to perform his duties shall be fined $50.

On the petition of 10 legal voters who are taxpayers, the county judge may fix the boundary of any proposed graded common school district, a majority of the trustees of any common school district affected being favorable, and arrange for a vote of the white taxpayers upon the question of an annual tax not to exceed 50 cents on each $100 of property belonging to the white voters in the district, town, or city, or a poll tax not exceeding $1.50 per capita on each white male inhabitant over 21, or both an ad valorem and a poll tax, for the purpose of maintaining a graded common school district, and for erecting, purchasing, or repairing suitable buildings therefor if necessary. At the same time a board of six trustees shall be elected for terms of three years, two to retire annually. The trustees shall employ the principal and all teachers and fix their compensation; may add other branches to the curriculum required by law. Any city of the first, second, third, or fourth class may accept the provisions of this law.

City school boards.—There shall be elected in cities of the first class in each legislative district of the city two qualified persons as school trustees for terms of two years, one going out annually. The school board shall have power to govern itself by such rules and regulations for school purposes as they may deem proper, including the election of principals and teachers and the branches to be taught and text-books used. Biennially it shall elect a superintendent.

In cities of the second class there shall be a board of education of two trustees from each ward in the city, to be elected by the qualified voters at large, and the control and management of the public schools of the city and the property and funds thereunto belonging shall be, and is hereby, vested in said board.

In cities of the third and fourth classes the board of education shall consist of two trustees from each ward for terms of four years, one-half the board retiring every two years. The control and management of the public schools of the city and the school property and funds is vested in the board.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No person shall be allowed to teach a private or other school in any district schoolhouse unless he be of good moral character and have the consent of at least two of the trustees and a certificate of

qualification. No person shall be appointed or employed as superintendent, principal, or teacher in any graded common school who is not a person of good moral character and who has not a county certificate, as required by the common-school law of Kentucky. In cities of the first class the board of education shall have power to examine, or cause to be examined by competent persons, all applicants for the position of principal, teacher, or professor. In cities of the second class the board shall appoint a board of examiners of from two to five competent persons, who, in connection with the superintendent, shall examine all applicants for the position of superintendent, principal, or teacher of the schools.

In cities of the third and fourth classes the board shall have power to hold examinations, determine the qualifications of its superintendent, principals, and teachers, and issue certificates to them.

There shall be three grades of certificates issued to teachers of common schools: A State teacher's diploma, a State teacher's certificate, and a county certificate, the last being first, second, or third class.

The State board of examiners, consisting of the State superintendent and two professional educators appointed by himself, shall examine all applicants personally applying to them for certificates of qualification as county superintendents, or for State diplomas or State certificates. The board shall prepare the series of questions for examination of candidates for county superintendents, and also five series of questions for the examination of teachers, but shall submit the same to the board of education before forwarding them to the county superintendents.

The county superintendent shall appoint two strictly moral and well-educated persons holding county certificates of the first class, State certificates or diplomas, or diplomas from some literary institution of high learning, who shall with himself constitute a board of examiners for the county. This board shall grant certificates to persons 18 years of age or over upon written examinations.

State diplomas may be issued by the State board of examiners after a personal examination held at the State capital on the last Wednesday of June and August of each year upon the subjects embraced in the common-school course of study, and also upon the science and art of teaching, psychology, English literature, algebra, higher arithmetic, geometry, physics, and elementary Latin; and the applicant must obtain 90 per cent on all subjects and not less than 70 per cent on any one, must be at least 24 years of age, have taught in the State at least two years, and shall furnish satisfactory evidence of unexceptionable moral character. The diploma shall be good throughout the State and shall qualify the holder as eligible for candidacy as a county superintendent (q. v.). A fee of $5 shall be paid by each candidate to the two appointed members.

A State teacher's certificate may be granted by the State board of examiners upon the recommendation of the county board of examiners after a written examination held in applicant's county, to one who has attained an average grade of 90 per cent, with not less than 70 per cent in any one branch, upon the subjects embraced in the common-school course of study and also in English literature, elementary algebra, higher arithmetic, and the science and art of teaching, including the elements of psychology. The applicant attaining the average required shall be at least 21 years old, shall have two years experience in teaching, and shall present satisfactory evidence of unexceptionable moral character. The State certificate entitles the holder to teach in the common schools of the State, graded or city, for eight years, unless the holder shall be unengaged in active school work for two years, and may, if unrevoked, be renewed for another eight years.

County certificates of the first class require an average of 85 per cent upon all the subjects of the common-school course and upon the science and art of teaching and not lower than 65 per cent in any one branch; of the second class require an average of 75 per cent, and not less than 55 per cent on any one subject; of the third class require an average of 65 per cent, and not lower than 50 per cent on any one subject. The first-class certificate is good for three years, the second-class for two, and the third-class for one, but shall not be given twice to the same person. A certificate of the third class does not entitle the holder to teach in a district having 55 or more children, and a certificate of the second class does not entitle the holder to teach in a district reporting 75 or more pupils. A person having taught for eight consecutive years in the same county under first-class certificates may have the last one renewed annually for four years. [See also under Organization of system—*County Superintendent*.]

It shall be the duty of the teacher to keep a register, which shall be graded for four years' work, and shall be delivered to the chairman of the board of trustees at the close of every term. The section allotted to each year shall be divided into two parts, designated monthly and term summary. The teacher shall faithfully

enforce the course of study, the use of the prescribed text-books, the good conduct of pupils while in school or on the road to or from it, and for good cause may suspend pupil. But no teacher shall be required to teach any other than the common-school branches unless specified in the contract.

Preliminary training.—The State normal school for colored persons shall be under the control and supervision of a board of trustees composed of the State superintendent, who shall be chairman, and three intelligent and discreet persons, residents of Franklin County, to be appointed by the governor with the approval of the senate for terms of three years, one to retire annually. They shall adopt rules for the government of the school, shall prescribe its course for the training of teachers and the requisites for admission, and select the instructors, but every pupil must be at least 16 years of age, possess good health, and satisfactory evidence of good moral character, and sign a written pledge that he or she will, as far as practicable, teach in the colored common schools of Kentucky a period equal to twice the time spent as a pupil in the normal school, together with such other conditions as may from time to time be required, but tuition shall be free to Kentuckians. The sum of $3,000 shall annually be appropriated out of the State treasury to pay the teachers and defray other necessary expenses, which, together with the amount received under the act of Congress of August 30, 1890, shall be known as the colored normal school fund. The diplomas granted by the board to graduates shall entitle the recipient to teach in any of the colored common schools of the State. In the school there shall be a department of agriculture and the mechanic arts.

In cities of the second class the board of education may maintain a normal school or training class for the purpose of training graduates of the high school and others to be teachers in the schools of the city.

Meetings.—The county superintendent shall organize annually a teachers' institute for the normal instruction, improvement, and better qualification of the teachers of his county, one for white and one for colored teachers. The institute shall occupy not less than five nor more than ten days, and shall be held between the 1st day of July and the 1st day of November. The superintendent of public instruction and the two professional members of the State board of examiners shall prepare the programme and a syllabus of each subject, both of which shall be furnished each member of the institute, and shall be faithfully and efficiently carried out. Every teacher of a common school, including teachers of the graded common schools in cities of the fifth and sixth classes who hold a State diploma, State or county certificate, or who contemplate applying for certificate of qualification to teach in the common schools, shall attend the full session of the institute in his home county, unless he is teaching in another county in which the institute is yet to be held, or has attended the institute of a county in which he has a contract to teach; but in teaching in a county other than his home county whose institute is yet to be held, he must attend the full session of the latter. The county superintendent shall revoke the certificate of any teacher who shall fail or neglect to attend the full session of the institute, unless the superintendent shall be fully satisfied that such failure has been caused by actual sickness or other disability, and after the institute has been held it shall be unlawful to grant any person a certificate to teach at any time during that school year unless the person has attended the full session of the institute. During the institute there shall be a suspension of such other schools as are in session, but no reduction of the teachers shall be made. At the close of the institute a certificate of attendance shall be given to the teacher, who shall file it with the board of trustees, which shall report the fact. Any four or fewer counties may hold a joint institute. The county superintendent shall collect from $1 to $2 from each person in attendance, 25 cents of which shall be paid into the county library fund and the rest shall be applied to meeting the necessary expenses of the institute.

At each session of the institute every subject embraced in the common-school course shall be brought before the institute, illustrated and described, and every feature of school organization and school management, together with the whole work of the teacher, shall be considered, and the common-school laws of the State read and expounded.

During the session of the institute there shall be held a county teachers' association, and one hour in the afternoon or the night meeting shall be daily set apart for this purpose. The object of the association shall be primarily to discuss and devise the best ways and means of promoting the interests of education, the improvement of teachers, and the methods of teaching, and especially to devise means for securing better schoolhouses, better attendance, and local aid for common schools.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—No school shall be deemed entitled to any contribution out of the school fund unless the same has been actually kept or is under contract to be kept by a qualified teacher for five months during the same school year, and at which every child residing in the district between the ages of 6 and 20 has had the privilege of attending free of expense, but it shall not be lawful for any white child to attend any common school provided for colored children, or any colored child to attend any common school provided for white children. [For the source of support of colored schools see Finances, Taxation. In cities of the second class the city board of education has complete control of colored schools, and in cities of the fourth class there is a "colored board of education."]

No point in the boundary of any proposed graded common-school district shall be more than 2½ miles from the site of its proposed schoolhouse.

Character of instruction.—The State board of education shall prescribe and publish a public graded course of study for the common schools, specifying the order of studies and the time to be allotted to each, but the course shall embrace spelling, reading, writing, arithmetic, English grammar, English composition, geography, physiology, and hygiene, and the effects of alcoholic drinks and narcotics, civil government, United States history, and the history of Kentucky. The majority of the white voters of a locality may establish a graded school district for white persons, and a majority of the colored voters may establish a graded school district for colored persons. In cities of the first class the board of education shall prescribe the branches of education [other than those required by law] to be taught and the text-books used, but no catechism or other formula of religious belief shall be taught or inculcated. In cities of the second class children from 4 to 6 years of age may be instructed by kindergarten methods, and the board of education may extend the required curriculum, establishing high schools. In cities of the third and fourth classes the board of education may extend the required curriculum, establishing high schools, and maintaining kindergarten and manual training schools.

Text-books.—The county board of examiners in each county shall adopt, on penalty of a fine of $200, a list of text-books on the subjects taught in the common schools, which shall be used in the common schools for five years. Any county board of examiners, whenever any publisher or person selling text-books desires to have his books adopted in the common schools in any county, shall require to be filed a sample copy of each, with its lowest retail price (which shall not be higher than the price obtained in any other section of the United States), at which it is to be sold to patrons and pupils, and shall execute a bond of $10,000, with good security within the State. In cities of the first, [second], third, and fourth classes the board of education select the text-books.

Buildings.—The district trustees, with the consent of the county superintendent, may take land for the purpose of erecting thereon a schoolhouse, provide for and secure the erection of the same, construct such outbuildings and inclosures as shall be conducive to the protection of the property and the comfort and decency of the pupils and teachers. They shall have power to recover for damage done. The county superintendent may condemn a school building as unfit for use, and if the trustees have no funds to put the condemned property in a habitable condition, a capitation tax shall be levied, not exceeding $1 a year. In cities the board of education has control. In graded common school districts no building shall cost more than $15,000, unless it be a city of the first to fourth class, having adopted the provisions governing graded common school districts, when the maximum shall be $100,000.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The school fund shall consist of the interest on the bonds of the Commonwealth for $1,327,000 in aid of common schools, at the rate of 6 per cent per annum, payable semiannually; the dividends on 735 shares of the capital stock of the Bank of Kentucky, representing a par value of $73,500, owned by the State; the interest at the rate of 6 per cent, payable annually on the surplus of $381,986.08 now due the several counties and remaining a perpetual obligation against the Commonwealth for their benefit, the interest at 6 per cent per annum, payable semiannually, on $606,641 received from the United States under act of March 2, 1891; such proportions of fines, forfeitures, and licenses

which may be realized by the State as the amount of taxes for common school purposes bears to the whole State tax other than for the benefit of the Agricultural and Mechanical College, and the annual State tax given below. The fund shall be used to pay the expenses of the State department of education and the payment of teachers of the common schools. The fund shall be distributed annually by the State superintendent according to the pupil children in each county and school district.

Taxation.—There shall be an annual tax of 22 cents on each $100 of value of all real and personal estate and corporate franchises directed to be asesssed for taxation, which shall be distributed as stated under "funds" above. Whenever there shall be a tax levied in any common school district or graded school district it shall be the duty of the trustees to appoint a district treasurer. The tax shall be levied on the property of the district immediately preceding the levy by the trustees, which the treasurer shall collect. Unless there are sufficient funds on hand which may be used to pay the contingent expenses incident to rendering the schools comfortable, the trustees shall assess and the treasurer of the district shall collect a capitation tax of $1.50 or less on all persons having children attending the common school of the district, and shall be used to pay for fuel and other things needful to keep the schoolhouse warm, clean, and comfortable. In the establishment of a graded common school, a minimum tax is fixed, as given under Organization, District trustees. In case of cities taking advantage of the law regarding the organization of a graded common-school district, bonds may be issued to 2 per cent of the taxable property of the city instead of being limited to $15,000, as in the case of the ordinary graded common-school district.

In cities of the first class, organized under the general act for them, the board of education collect a tax of not less than 33 cents on the $100 of property assessed for city taxation. In cities of the second class the general council shall be requested by the board of education to collect the amount required to defray the expenses of maintaining schools, improving or constructing buildings, etc. In cities of the third and fourth classes the board of education shall estimate the amount necessary as in the case of cities of the second class, and the general council shall collect the amount, provided that in any one year it shall not exceed 50 cents on each $100 of assessed city property.

NORTH CAROLINA.

1. Organization of the System.

State board of education.—State superintendent of public instruction.—County board of education.—County examiner.—District committee.

State board of education.—The State board of education consists of the governor, lieutenant-governor, secretary of state, treasurer, auditor, superintendent of public instruction, and attorney-general. It apportions the State school money and recommends text-books to be used in public schools for a term of three years at a predetermined price, and has general power to regulate the public schools of the State.

State superintendent of public instruction.—The State superintendent is elected quadrennially by the people. He prepares the forms and registers used in the schools and in general shall look after and direct the system of public schools and report biennially to the governor. His office is at the State capital; is furnished with an office and expenses incidental to it. He signs requisitions on the auditor for the payment of money by the State treasurer, and is enjoined to learn and to supply the educational wants of the State, and make himself acquainted with the course of educational affairs in other States. For his expenses while counseling with county boards and superintendents, delivering lectures at institutes, etc., and for clerical assistance, $500 is annually allowed. [By law of 1893 he is empowered to employ a clerk at $1,000 per annum.]

County board of education.—The justices of the peace and the county commissioners of each county shall biennially elect a county board of education consisting of three residents, who shall be men qualified by education, experience, and interest to specially further the educational interests of their county. The county superintendent shall be secretary and the county treasurer the treasurer of the board. The members shall not receive more than $2 per diem and mileage. Vacancies shall be filled by the county commissioners. The board shall be charged with the general management of the public schools shall divide the county into districts, decide all controversies about the boundaries of districts, location of schoolhouses, and construction of school law, and shall see that the law is enforced. The board meets quarterly, and in January apportions the school money to each schoolhouse.

[By law of 1895 "all the powers and duties of the board of education devolve upon and are discharged by the board of county commissioners"—the civil county authority—the State superintendent refers (preface to school law) to the county commissioners as "acting as a county board of education."]

County superintendent.—The county superintendent shall be elected by the county board of education, county commissioners, and justices of the peace in joint session biennially. He shall be of good moral character, liberal education, and otherwise qualified to discharge the duties of his office, but for cause may be removed by the county boards who participated in his election. He shall examine all applicants of good moral character for teachers' places six times a year,[1] have charge of the teachers' institute, and, with the concurrence of the school committee of the district, he may suspend any teacher unfit for his place or who is rendering inadequate service for the pay received. He is subordinate to the State superintendent and the county board of education. He shall distribute the blank forms received from the State superintendent and advise with district committees as to the best method of obtaining statistics; he countersigns orders on the treasurer of the county board for payment of teachers' salaries, provided the teacher has made the reports required, and shall himself report to the State superintendent annually, giving an abstract of the number, grade, race, and sex of teachers examined or approved by him, the number of schools taught in the county for each race, the enrollment and average attendance in them by sex, the average length of the terms of the school, and the average salary of teachers by race, and, in addition, the number of school children in the county by race and sex, the public schoolhouses, and the value of school property for each race, the number of institutes held, and the teachers attending them, and such suggestions as he may deem proper. His compensation shall be fixed by the county board at between $2 and $3 per diem for actual service, but his compensation shall not exceed 4 per cent of the school fund apportioned to the county. [The office of county superintendent is abolished and his duties as secretary to the old board of education are to be performed by the clerk of the board of county commissioners.]

District committee.—The county board of education shall lay off their respective counties into convenient school districts, consulting the convenience of the neighborhood. For each white and each colored school district there shall be elected biennially by the county board of education a school committee of three persons, whom they may remove for cause, provided that each committeemen shall be able to sign contracts in a legible hand, or his mark shall be witnessed by a disinterested person, in that person's handwriting. They shall take a census of the school children 6 to 21 years of age annually, by race and sex, and shall also report to the county superintendent the number of public schoolhouses and the value of all public school property. They have authority to employ and dismiss teachers and to fix their pay. They are intrusted with all school property, and have power to control it as they may deem best.

2. Teachers.

No person shall be employed by a district committee to teach who does not produce a certificate from the county [examiner]. Teachers of the third grade shall receive out of the public fund not more than $15 a month, of the second grade not more than $25 a month, and teachers of the first grade such compensation as may be agreed on.

The graduates of the Peabody Normal College are recognized as certified for life.

The grade of the certificate to which the applicant may be entitled shall be fixed on a scale of 100; no certificate shall be issued to an applicant whose standing in any subject is less than 50 per cent, or whose general average is less than 70. A general average of 90 per cent or more shall entitle to a first-grade certificate; of 80 to 90 per cent, to a second grade, and of 70 to 80, to a third grade; the certificates shall be valid for one year, and only in the county. All applicants shall pay to the examiner a fee of $1. The examination shall be held in July annually, and none but those of good moral character shall be admitted.

The board of education of a county may annually appropriate not more than $100 out of county school funds for the purpose of conducting one or more teachers' institutes, or two or more counties may combine.

Teachers must keep a register and turn it over to local authorities before finally paid; they may dismiss pupils.

---

[1] The clerk of the superior court of the several counties in the State shall, on the 1st Monday in June, 1895, and annually thereafter, appoint an examiner whose duty shall be to examine all persons desiring to teach in the public schools of the county.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—White and colored pupils are to be taught separately. Every elementary school which shall receive aid from the State is a public school to which any local resident shall be admitted free of charge, and shall be taught four months, at least. In any district where there is a private school taught nine months by a teacher possessing a first-grade county certificate the school committee may contract with such teacher to give instruction in the common-school branches to all pupils 6 to 21 years of age, and pay therefor from the public-school funds of the district. Under such circumstances the school and teacher are under the same management as a public school as far as the county officials are concerned.

Character of instruction.—No branches shall be taught in the public schools, except spelling, defining, reading, writing, arithmetic, English grammar, geography, elementary physiology and hygiene, and United States and North Carolina history, but the district committee may allow other branches to be taught.

Text-books.—Each county board fixes the books to be used in the public schools, and they shall not be changed for three years, to take effect June, 1896.

Buildings.—The district school committee have complete control of school property in its district, and may dispose of it as it thinks best for the interests of the system. To interrupt or disturb any school is a misdemeanor, punishable by fine of not more than $50 or imprisonment not more than thirty days. Anyone setting fire to a schoolhouse shall be sent to the penitentiary or the county jail, and may be fined at the discretion of the court.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The proceeds of all lands granted by the United States, not otherwise appropriated, all sums or securities now belonging to any State fund for education, the net proceeds from the sale of swamp lands belonging to the State, and all grants, gifts, and devises shall be paid into the State treasury, and together with so much of the ordinary revenue of the State as may be set apart for the purpose shall be faithfully appropriated for establishing and maintaining a system of free public schools.

All moneys, securities, and other property belonging to a county school fund, the net proceeds from sales of estrays, the clear profits of all penalties and forfeiture, all fines collected in the several counties for any breach of the penal or military laws, and all the net proceeds of any tax on licenses to retailers of wines, cordials, etc., and to auctioneers shall belong to and remain in the several counties and shall be faithfully appropriated for establishing and maintaining free public schools in the several counties.

The State board shall annually apportion among the several counties all the school funds in the treasury on the basis of persons 6 to 21 years of age.

The county school board shall apportion each year among its districts all school funds in the following manner: The sum required for the general school expenses is subtracted, then two-thirds are apportioned to the districts on the basis of children 6 to 21 years of age, and the remaining one-third shall be used to equalize the average length of the school terms for the two races.

Taxation.—In addition to the State and county capitation taxes (both together never to exceed $2 on the poll) there shall be levied and collected every year, for the maintenance of the public schools, 18 cents on every $100 of property and credits in the State and 54 cents on every poll. If the tax [capitation] levied by the State is insufficient to maintain one or more schools in each school district for the period of four months, then the board of county commissioners shall levy a special tax to supply the deficiency [except when the limit of 66⅔ cents on the valuation and of $2 on polls has been reached for State, county, and district purposes].

TENNESSEE.

1. Organization of the System.

State board of education.—State superintendent.—County superintendent.—District directors.—City boards of education.

State board of education.—The governor of the State shall appoint a State board of education, to consist of himself, the State superintendent, and six members, two of whom (the appointed members) shall retire every two years. The board

shall locate and make arrangements for opening first-class schools in every respect for the training of teachers. The board may receive contributions of money from the trustees of the Peabody Educational Fund or property or funds from any other source for the benefit of the schools it establishes, and the trustees of colleges, universities, or educational institutions shall have power to give the use of their property to the State board for the benefit of such schools. The board shall elect its own treasurer and secretary and fix their compensation.

State superintendent.—The State superintendent shall be a person of literary and scientific attainments and of skill and experience in the art of teaching, and shall be nominated by the governor and confirmed by the senate for a term of two years, at an annual salary of $2,000, to be paid from the school money in the State treasury. He shall devote his entire time to the duties of his office, shall be a member of the State board of education and of all other State educational bodies and associations, shall have an office in the State capital, and is liable to removal for misconduct. His duties shall be to collect and disseminate statistical and other information relating to the public schools, to make tours of inspection among the public schools throughout the State, to see that the school laws and regulations are faithfully executed, to prepare and distribute blank forms for all returns to be made by school officers, to have printed and distributed to county superintendents and other school officers as many copies of the school laws as may be necessary, with appropriate forms and instructions for carrying said laws into execution, to appoint, at his discretion, persons in each county to visit, without compensation, and examine all or any of the public schools therein and to report to him touching all such matters as he may indicate respecting their condition, management, and improvement; to appoint a person to make the report required from the county superintendent when that officer neglects his duty, to prescribe the mode of examining and licensing school-teachers and their necessary qualifications, to preserve in his office all documents and matters relative to educational subjects that may come to it, to report to the comptroller the school population of each county, to annually submit to the governor a detailed report of his official proceedings for the year ending June 30 preceding, exhibiting a plain statistical account of receipts and expenditures for public schools and of their condition and progress, showing the number of children, by sex and race, between 6 and 21 years of age, the enrollment, the average number belonging, and the per cent of attendance, the average salary paid to teachers, by sex, the amount of each branch of school expenditures severally, the cost of education per scholar, and whatever else may tend to show the degree of success and usefulness of the system.

County superintendents.—The county superintendent shall be elected by the county court biennially, but no member of the county court shall be eligible. He shall be a person of literary and scientific attainments, and of skill in the theory and art of teaching, and shall, before each election, file a certificate of qualification, given by the State board of education, in pursuance of the result of a public examination before a commission composed of three residents of the county (appointed by the county court) competent to conduct such an examination. Women of 21 years of age or more are eligible. The county court fixes the salary of the commissioner.

The duties of the county superintendent shall be as follows: To supervise the public schools; to visit the schools of the several districts from time to time; to confer with teachers and officers; to ascertain the merits of text-books; and to suggest changes tending to bring about uniformity in the course of study when it can be done without increased expense to the parent: to see that the district directors make their reports, or to have them made should the directors fail; to perform such duties in relation to the examination of teachers and issuing to them certificates of qualification as may be required of him by the State superintendent; to report to the county trustee, as soon as ascertained, the scholastic population of each district on the last day of June; to observe such directions and regulations as the State superintendent may prescribe; and to make an annual report, and such other special reports as the State superintendent may call for; to keep a record of his official acts and of the boundaries of the districts of the county. The county superintendent in counties of 30,000 or more is prohibited from teaching in any public school and from taking any contract for building or repairing school property, and from becoming the owner of a school warrant, other than that received for his own services as county commissioner. In addition to the punishment prescribed by statute for misdemeanors in office, a superintendent in counties of 30,000 or more who teaches in any public-school shall be fined not fewer than $25 nor more than $50, to go to the benefit of the public-school fund.

District school directors.—Three district school directors are elected biennially, and any person shall be eligible to the office of director who can read intelligently

and write legibly, perform the duties required, and who resides in the district. If a director moves from the district his office is vacated. If from any cause directors shall not be elected or when vacancies occur, the county superintendent shall appoint them. No director shall be a teacher in the public schools of his district, nor take any contract for building a schoolhouse, nor any contract which his board is competent to make, nor become the owner of a school warrant.

The duties of school directors shall be as follows: To explain and enforce the school laws and regulations, to visit the public schools within the district from time to time and see that they are legally and efficiently conducted, to subdivide their districts, to employ and pay teachers and to dismiss them for cause, to suspend or dismiss pupils when the prosperity or efficiency of the school makes it necessary, to use the school fund apportioned to their district, whether derived from donations or other sources, in such manner as will promote the interest of public schools, to see that the school census is taken in the proper manner on the required date, to hold meetings at the times they shall prescribe, to call meetings of the people for consultation in regard to school matters, to care for and control public-school property, to report any special matter required by the county superintendent, and to report to him annually on all subjects indicated in the blank forms supplied for the purpose, and until such report shall have been made the member of the board acting as clerk shall not draw his pay.

City boards of education.—The several incorporated cities and towns within this State may, through their boards of mayor and aldermen, establish and maintain within their respective corporate limits a system of high graded common schools and have power to appoint a board of education consisting of not exceeding six qualified citizens residing within their corporate limits. The board of education shall have full power as trustees or directors to manage and control such schools, to elect or to employ well-qualified teachers, and to prescribe all needful rules and regulations. Two members of the board shall retire annually.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary education.—Meetings.

Appointment, qualifications, and duties.—No teacher of public schools shall be employed or receive any pay from the public funds unless having a certificate of qualification from the county superintendent, and any officer sanctioning the payment for services rendered by an illegally employed person shall be subject to a penalty of not less than $5 nor more than $50; and for like services women shall be paid the same as men. The county superintendent shall perform such duties in relation to the examination of teachers and issuing to them certificates of qualification as may be required of him by the State superintendent. Written contracts shall be made with all public-school teachers, at fixed rates by the month, the contract to be signed in duplicate. Every public-school teacher shall keep a daily register of facts pertaining to his or her school in proper form and must deliver them to the clerk of the district board before warrant may be issued for the amount of his or her salary. Any teacher may for cause suspend pupils from attendance on the school until the case is decided by the board of school directors [and the teacher has power to punish for offenses committed on the way to and from school].

Preliminary training.—The establishment of a normal school or schools is authorized to be effected by the board of education. The said normal school or schools shall be made in every respect first-class institutions for the professional education of teachers, and the most approved method of instruction shall be adopted, and none but teachers experienced and skilled shall be employed to take charge of them. In the location of such school or schools the State board shall give preference to such locality accessible to all parts of the State as shall offer gratuitously the most suitable grounds and buildings for the establishment of the same. No pupil shall be admitted into said schools who is under 16 or over 30 years of age, and who shall not have undergone satisfactorily such examination as may be prescribed by the State board of education. Those already engaged in teaching may enter said normal school or schools as pupils upon conditions fixed by the State board. Pupils of the public schools may be recommended for admission into said normal school or schools by the county superintendent on consultation with the directors of the school districts of his county, and in cities by the superintendent of public schools, and such pupils so recommended and who pass a satisfactory examination shall have precedence over all other applicants. Diplomas shall be granted to those honorably completing the course of study exempting the holder from examination as a condition precedent to employment in the public

schools of the State. The salaries of principals, teachers, and other officers of said normal schools shall be determined by the State board of education, and the board is authorized to expend annually for the support of the normal college at Nashville, exclusively, $15,000 out of any funds in the State treasury not otherwise appropriated, provided that the Peabody board of trustees shall allow to the State 33 scholarships of $100 each and traveling expenses, one scholarship to be allowed each senatorial district in the State, and to be given after a competitive examination as prescribed by the State board. Three thousand three hundred dollars, or so much thereof as may be deemed necessary, shall be intrusted to the State board of education for the higher and normal education of the children of Tennessee of African descent, and upon the order of the board the comptroller shall issue his warrant for the same to the president or financial manager of approved institutions of learning for scholarships for the benefit of such of the aforesaid children as may apply therefor, under such regulations as may be prescribed by the board of education. The amount thus appropriated shall be a separate fund, over and above the $15,000 annually granted to the State Normal College, and shall be used to defray the expenses of two colored pupils from each senatorial district of the State in approved institutions of learning.

[NOTE.—The State board of education may authorize normal schools to issue diplomas which license the holder to teach in any public school in the State.]

3. SCHOOLS.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—The public schools shall be free to all persons between the ages of 6 and 21 years residing in the district, but white persons and colored persons shall not be taught in the same school. The director of each school district shall establish and maintain therein as many primary schools as may be necessary to teach the children of the district, but they shall have due regard to increasing the length of the school term for the benefit of the district by limiting the number of schools.

When the money derived from the school fund and taxes imposed by the State on the counties shall not be sufficient to keep up a public school for five months in the year in the school districts in the county, the county court shall levy an additional tax sufficient for this purpose, or shall submit the proposition to the vote of the people, and may levy a tax to prolong the schools beyond the five months, but levy is not to exceed State tax. Towns of from 2,000 to 4,000 may maintain a high-grade public school for not fewer than nine months.

Character of instruction.—There shall be two classes of district public schools, designated, respectively, primary and secondary. The directors of each school district shall establish and maintain therein as many primary schools as may be necessary, in which shall be taught orthography, reading, writing, arithmetic, grammar, geography, history of Tennessee and of the United States, the Federal Constitution, and the injurious effects of narcotics and alcoholic stimulants; vocal music and elocution or the art of public speaking may be taught, but no other branches shall be introduced. The course of study in the public schools of each county shall be graded and the system of promoting pupils shall be fixed by the county superintendent in accordance with the general regulations of the State superintendent. The course of study in the primary schools shall consist of five grades, and in the secondary schools shall consist of eight grades, the first five grades in each being identical. Pupils completing the first five grades and attaining proficiency therein shall receive a certificate from the State superintendent certifying that the holder has completed the primary school course, which shall be countersigned by the county superintendent, district directors and the teacher or teachers of the school, and shall entitle the holder to enter the sixth grade of the secondary school of any school district or of the high school of any high school district in which the holder resides. Pupils completing the eighth grade in the course of the secondary schools and obtaining proficiency therein shall receive a diploma from the State superintendent, which shall be countersigned by the county superintendent and by the district directors and by the teachers of the school, which shall entitle the holder to enter the ninth grade of the high school of any high school district in which the holder resides.

The directors of each school district, whenever the interests of the district shall require it, may establish and maintain therein one or more secondary schools. Every secondary school shall consist of a principal and, when necessary, an assistant or assistants may be employed. In every secondary school shall be taught orthography, reading, writing, arithmetic, grammar, geography, history of Tennessee and of the United States, the Federal Constitution, elementary geology of

Tennessee, elementary principles of agriculture, of algebra, of plane geometry, of natural philosophy, bookkeeping, elementary physiology and hygiene, elements of civil government, and rhetoric or higher English. Practice shall be given in elocution or in the art of public speaking. Vocal music may be taught and no other branches shall be introduced.

District directors shall have the power, and they are hereby authorized, to make contracts of consolidation with the trustees or other authorities of academies, seminaries, colleges, or private schools, by which the public schools may be taught in such institutions, provided that the branches of study designated in the preceding paragraphs shall be taught free of any charge in such consolidated schools, and that the authority of the county superintendent, district directors, and other school officers over those studying such branches shall be as full and ample as in the ordinary public schools.

Text-books.—It is the duty of the county superintendent to keep himself informed as to the merits of text-books and to suggest to the directors such changes as may from time to time be advisable, with a view to securing uniformity in the course of study throughout the county, when it can be done without increased expense to the parent. The State superintendent and the commissioner of agriculture shall constitute a commission to procure the preparation of or the designation of a work on the elementary principles of agriculture, but no moneys are to be paid by the State or out of the school fund for the preparation of the necessary book.

Buildings.—The care and management of public-school property of the district is in the hands of the directors.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The permanent school fund of the State shall be the $1,500,000 ascertained and declared by the code and recognized by the State to be the permanent school fund. To this shall be added the interest which has accrued on the same and not been paid by the State, amounting on January 1, 1873, to $1,012,500, making the entire permanent State school fund $2,512,500, for which a certificate of indebtedness shall be issued, signed by the governor under the great seal of the State, and deposited with the comptroller of the treasury, which shall show on its face the purpose for which it was issued and shall provide for the payment of the interest thereon at the rate of 6 per cent, payable semiannually on the 1st day of July and January in each year, commencing July 1, 1873.

To the permanent State fund may be added from time to time the proceeds of all escheated property, of all property forfeited to the State, of all lands sold and bought in for taxes, of the personal effects of intestates having no kindred entitled thereto by the laws of distribution, and donations made to the State for the support of the public schools, unless otherwise directed by the donors. The principal of said fund shall always remain unimpaired and entire, and the annual income arising therefrom shall be, and is hereby, dedicated to the support and maintenance of the public schools of the State.

The State school fund for the annual support of public schools shall be the annual proceeds of the permanent State school fund, any money that may come into the State treasury for the purpose under the present or future laws of the State, and any money that may come into the State treasury for the purpose from any source whatever, and the annual fund shall be apportioned semiannually by the comptroller among the several counties according to their scholastic population as reported to him by the State superintendent, issuing his warrant to the county trustee.

Taxation.—Every male inhabitant in the State subject thereto shall pay a poll tax of $1 for the support of the public schools, which shall be collected as other taxes are, and paid over to the county trustee in the county where collected, and distributed therein to each school district according to scholastic population.

A tax of 1½ mills on $1 shall be, and is hereby, annually assessed upon all property subject to taxation for the support of the public schools, which shall be collected as other taxes are, and paid over to the county trustee in the county where collected, and distributed therein to each school district according to scholastic population.

In case there is an insufficient sum to maintain the school for five months, it is the duty of the county court to levy an additional tax sufficient for that purpose, or to submit the proposition to a vote of the people, and they may levy a tax to prolong the school beyond the five months, the tax to be levied on all property, polls, and privileges liable to taxation, but shall not exceed the entire State tax. All school money coming into the hands of the State or county treasurer

shall be kept separate and apart from any State or county funds in their hands. All unexpended sums for school purposes in the district treasury shall not be returned to county trustee for redistribution, but shall be credited to such district and added to its share of the next apportionment.

Cities and incorporated towns in which have been established higher graded schools are authorized to supplement the school fund derived from State and county tax by an additional municipal tax or levy for their support, provided the town or municipality does not exceed its lawful limit of taxation in making such additional levy, and each municipal corporation of from 2,000 to 4,000 inhabitants, in order to keep and maintain a high-grade public school for not less than nine months in each year, shall receive all moneys collected from it by way of State or county tax on property, privileges, and polls for common school purposes as well as its share of the interest on the permanent school fund of the State, and the mayor and aldermen may levy such additional tax on property, privileges, and polls within the corporation as will be sufficient to keep and maintain a high-grade public school for the period of nine months.

SOUTH CAROLINA.[1]

1. Organization of the System.

State superintendent of education.—State board of examiners.—County school commissioner.—County board of examiners.—District school trustees.

State superintendent of education.—The State superintendent of education shall be elected at each general election, and shall receive $2,100 per annum and $1,200 for clerical assistance. He shall have general supervision over the free schools and shall visit every county for the purpose of inspecting the schools, awakening an interest favorable to the cause of education, and the improvement of the system; with the advice of the State board of examiners, secure uniformity in the use of text-books, prepare and transmit to the county superintendents school registers and blanks and copies of the school law, collect in his office such books, maps, apparatus, etc., as may be obtained. He shall make a report to the general assembly showing the number of persons attending the schools by sex and race, the number of free schools, the number studying each branch, average wages of teachers by sex, the number of schoolhouses erected and the number existing during the year, the kind of material of which made and value, and the number having inclosed grounds, the counties in which institutes were held, and such other statistical information and such plans as he may have matured acceptably to the State board of examiners for the management and improvement of the school fund and the more perfect organization and efficiency of the free public schools. He shall take and hold in trust any grant of lands or gift made for educational purposes, and shall pay into the State treasury all moneys and incomes from property so received. Vacancy in the office shall be filled by the governor, with the advice and consent of the senate.

State board of examiners.—The State superintendent and four persons appointed by the governor, with the advice and consent of the senate, shall constitute the State board of examiners. The appointed members hold for two years, are removable by the governor, and form an advisory body for the State superintendent, with power to review all decisions of the county board of examiners. The duties of the board are to adopt rules for its own government and of the free public schools, to prescribe and enforce rules for the examination by themselves or county superintendents of teachers, to prescribe and enforce the course of study in the free public schools, and to secure a uniform series of text-books.

County school commissioners.—There shall be elected in each county, at each general election, a school commissioner, whose duty it shall be to visit the schools in his jurisdiction as often as may be practicable and to supervise them in all particulars, with the view of bringing about a uniformity of instruction. He shall note the character of the schoolhouses and their furniture and apparatus and make suggestions to the district boards in regard to the same. He shall encourage the formation of associations of teachers and attend their meetings. He shall make a full report annually to the State superintendent containing an abstract of the reports made to him by local school officers and teachers, with suggestions. Failure to make such report forfeits one-fourth of his salary. He shall apportion the income of the county school fund among the districts in pro-

[1] The new constitution of South Carolina, December, 1895, does much toward framing the new school law that will be required.

portion to the average attendance at the schools, and may be instructed by the county board of examiners to expend $200 in defraying the expenses of teachers, institutes. He shall be compensated at the rate of $3 or less per diem, the rate and the number of days not to exceed two hundred, to be determined by the county board of examiners, for time actually employed in the discharge of his official duty, and traveling expenses not over $100. When questions respecting his own compensation arise, the county school commissioner temporarily vacates his place on the county board of examiners in favor of the county auditor.

County board of examiners.—There shall be in each county a board of examiners composed of the county school commissioner and two other persons appointed by the State board of examiners, who shall hold office for the term of two years. No person shall be appointed who is not competent to teach a first-grade school. The board shall examine all candidates for teachers' positions and grant certificates of qualification. It is an advisory board to the county commissioner and a tribunal for hearing and determining any local controversy in reference to the construction or administration of the school laws, with the power to summon witnesses and take testimony. The board shall divide its county into districts for school purposes. The compensation of the members shall be $3 per diem for actual service not exceeding five days in the year and a mileage of 5 cents for each mile necessarily traveled.

District board of trustees.—The county board of examiners shall appoint for each and every school district in their county three school trustees, who shall hold their office for two years. The board shall have the management and control of the local educational interests of the district under the supervision of the county board of examiners and shall visit each school at least once in every school term. It shall hold a session at least two weeks before the commencement of every term and at special times. It is more particularly their duty to provide suitable schoolhouses, to employ and discharge teachers, to suspend or dismiss pupils, to call meetings of the people for consultation in regard to the school interests of the district, to care for the school property, and to visit the schools.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No teacher shall be employed by a district board in any of the free public schools without a certificate, unless under very urgent circumstances, from the State or the county board of examiners. The county board of examiners shall, twice a year, examine all applicants for teaching in the schools of the State. All examinations must be in writing, except in the subject of reading, on questions prepared by the State superintendent. One set of questions shall be prepared and those making an average of 80 per cent shall have a certificate of the first grade, those making 70 per cent a certificate of the second grade, and those making 60 per cent a third grade, but not less than 40 per cent must be made on any one branch. The subjects upon which the applicants are examined are orthography, reading, writing, arithmetic, geography, English grammar, history of the United States and of South Carolina, physiology and hygiene, and the theory and practice of teaching. [These certificates are good for one year.]

Applicants for teachers' State certificates must appear before the State board of examiners at the regular meeting at Columbia during April and October of each year and must pass upon the subjects given to the applicants appearing before the county board, and also algebra and natural philosophy. The State certificate is valid for two years and may be renewed.

The faculties of the State normal institutes which may be held in the State shall have authority to examine such students of the institutes as present themselves, the examination to be conducted under conditions prescribed by the State superintendent of education, and to recommend to the State board of examiners those who have passed a satisfactory examination as qualified to teach in the free public schools for three years, or to be awarded a diploma good for life if the recipient has attended three State normal institutes.

Any applicant producing a diploma from a chartered college or university of the State certifying to his proficiency in the branches required may receive a certificate if of good moral character.

Each teacher shall make out and file with the clerk of the board of district trustees, at the expiration of each school month, a complete report of the enrollment by sex and average attendance, the branches taught and the number of students pursuing each, and other statistics as may be required. When the report is in the hands of the clerk, the teacher may be paid. No compensation shall be given any county superintendent or district trustee for teaching in the free schools.

Preliminary training.—[The State supports two institutions for the education of teachers, one for men as a department of South Carolina University and the other for women, called the Winthrop Training School for Teachers.]

Meetings.—[Authority is given to have two kinds of institutes, State and county.]

3. Schools.

Attendance.—Character of instruction.—Text-books.

Attendance.—White and colored persons are taught in separate schools. It is not lawful for anyone under 6 or over 18 to attend any free public school.

Character of instruction.—The subjects taught in the free schools are, as far as practicable, orthography, reading, writing, arithmetic, geography, English grammar, history of the United States and of South Carolina, the principles of the Constitution and the laws of the United States and of South Carolina, morals and good behavior. For the purpose of establishing and maintaining graded or other public schools in any city, incorporated town, or village, such corporation is declared to be a separate school district.

Text-books.—Owing to the racial and other conditions the State board of examiners adopted the following: The list of text-books shall be elective. From the list the county board of examiners shall adopt a series which may be emended before the expiration of thirty days in case of complaint. The books once selected are not to be changed for a period of five years. Any teacher using nonselected books forfeits pay for the period during which they are used, and a teacher may refuse to teach a child who has not the proper books.

4. Finances.

Funds (permanent and special).—Taxation.

Funds (permanent and special).—The proceeds of all lands given by the United States for educational purposes or gifts from individuals and appropriations by the State for such purposes and all escheats shall be invested and preserved as a State school fund, and the revenue shall be appropriated for the purposes of free public schools. (See also heading Organization of system; State superintendent.

Taxation.—[The Constitution of 1895 provides for a poll tax of $1. Whenever this tax does not give an amount equal to $3 for each child enrolled in the public schools of a county, a State tax shall be levied and distributed to such counties. But after 1898 a tax shall be levied by the general assembly to keep the schools open for the period to be named by that body. County boards of commissioners shall levy an annual tax of 3 mills for school purposes. A school district may levy tax if authorized by general assembly.]

GEORGIA.

1. Organization of the System.

State board of education.—State school commissioner.—County board of education.—County school commissioner.—School trustees.—City board of education.

State board of education.—The governor, the attorney-general, secretary of state, the comptroller-general, and the State school commissioner shall constitute the State board of education, of which the governor shall be president. The board may receive and hold in trust for the State all property granted, shall have a suitable seal, and shall constitute an advisory board with which the State commissioner may consult in cases of doubt, or a body to which appeals from the decision of the State commissioner may be carried through the county superintendent. But upon any question involving the construction of the school laws the concurrence of a majority of the whole board shall be necessary in order to give validity to the decision. It shall be the duty of the board in 1893 and every ten years thereafter to have estimated the population of school age based on the last United States census.

State school commissioner.—The State school commissioner shall be appointed by the governor and confirmed by the senate. He shall have a suitable office at the seat of government, at which shall be kept the books and papers of his office. He shall be charged with the administration of the school laws and a general superintendence of the business relating to the common schools of the State, and from time to time shall transmit to the proper local officers such blanks and instructions

as the law or occasion may require. He shall visit as often as possible the several counties of the State for the purpose of inspection and of counseling school officers or the people. He shall make an annual report to the general assembly, in which he shall present the condition and amount of all funds and property appropriated to the purpose of public education, the number of common and public schools of the various grades, and the number of pupils attending them, by sex, color, and the branches pursued, the average cost a pupil, the plans for the management, extension, and improvement of the common schools, the number of children of school age in the State (with as much accuracy as possible), also the number of private schools and colleges, their attendance by sex, and branches pursued, and the average cost per scholar of tuition in private schools and colleges. He shall organize a teachers' institute in each county, and shall be empowered to require local officers to furnish reports.

He shall receive $2,000 annually for his services and all his necessary traveling expenses, postage, and the like. He shall be entitled to employ one clerk at a salary not to exceed $1,200. All the expenses of his office shall be paid out of the State school fund after being audited by the State board.

County board of education.—Each county shall constitute one school district, which shall be under a county board of education. The grand jury of each county (except in counties where the election of the county board of education is otherwise provided for) shall, from time to time, select from the citizens of their county five freeholders, who shall constitute the county board of education, three of whom shall be elected for two years and two for four years, and thereafter for terms of four years, but no one interested in the sale of schoolbooks shall be eligible to election as a member of any board of education or as county school commissioner. The board shall elect one of their number president and the county school commissioner shall serve as secretary.

The board shall meet four times during the year at the county court-house. Its members shall be exempt from road, jury, and militia duty, but shall not receive other compensation. It shall employ teachers, divide the county into subdistricts, purchase, lease, or rent school sites, build, repair, or rent schoolhouses, purchase maps, globes, and school furniture, etc., and sell schoolhouse sites. It shall provide as far as practicable the same facilities for both races in respect to attainments and length of term time, hear all local controversies in regard to the construction of school law, with an appeal to the State school commissioner, name the text-books to be used, and may establish evening and manual-labor schools. In 1888 and every ten years thereafter the board is required to have enumerated the population 6 to 18. (See City boards of education.)

County commissioner of education.—Each county board of education shall, from the citizens of its county, select a county commissioner of education, who shall be ex officio county superintendent of the common schools for four years. Before election the applicants for the position shall be examined by the president of the county board of education or by some one appointed by him or the board, upon written or printed questions which shall be furnished to the board by the State school commissioner, the examination to be upon the subjects taught in the common schools, the science and theory of common-school teaching and government, and upon such other subjects as the State school commissioner may deem proper. The board shall then elect the applicant standing the highest, taking into consideration the moral character, business qualifications, and general availability of each applicant. The appointee shall be required to give bond and take the oath of office, and may be removed for cause.

The county commissioner shall examine all applicants for licenses to teach in their respective counties, giving previous public notice of the day upon which the examinations are to occur. He may invite such persons as he may think proper to assist in these examinations, shall grade the papers, and revoke licenses for cause. He shall be the medium of communication between the State school commissioner and the subordinate school officers, and he shall visit each school in his county at least once during the school term (or oftener if ordered by the board) without notice to the teachers for the purpose of inspecting its management and the modes of instruction and of giving such advice and making such suggestions tending to elevate its character and efficiency. He shall be the agent of the county board in procuring such school furniture, apparatus, and educational requisites as they may order to be purchased, and shall see that none but the prescribed text-books are used. He shall audit all accounts of teachers and others before an application is made to the county board for an order for payment. His compensation shall be fixed by the county board at not more than $3 a day for each day of service fixed by the board, to be paid out of the educational fund furnished to the county. He shall make a report of the school operations of the preceding year to the grand

jury, and place his books before them for examination, and the jury shall take proper notice of the matters thus brought to their attention.

Subdistrict school trustees.—The county board shall establish in each subdistrict one or more schools for white and one or more for colored children, as near the center as may be in case of one school. If the county board deem it necessary they may appoint three intelligent, upright citizens of each subdistrict as school trustees, to serve three years, one retiring annually. The trustees shall supervise the school operations of their subdistricts, visit the schools, make such recommendations to the county boards as may appear best; and recommend persons for teachers' places, which it shall be the duty of the county boards to choose. The trustees shall report annually to the county board, or oftener if required.

City board of education.—City and county boards shall have enumerated the children of 6 to 18 years of age through one or more competent and reliable persons, who shall go from house to house making a thorough canvass by sex and race. The persons so employed shall be known as enumerators of the school census, and shall take and report any additional statistics required by the State school commissioner. They shall receive $2 per diem or less. (Local systems are created by special laws, in some cases ratified by the vote of the people.)

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—The county board of education is empowered to employ teachers, and the contracts shall be in writing and signed in duplicate by the teacher and by the county school commissioners; but it shall be the right of subdistrict school trustees to recommend the persons to be appointed, provided they be duly licensed and are the choice of the community to be served.

The county commissioners shall examine all applicants for licenses to teach, giving previous public notice of the day upon which the examinations are to take place, and shall invite such persons as they think proper to assist. Applicants shall be examined upon orthography, reading, writing, English grammar, geography, arithmetic, and the science and practice of teaching in common schools. The examinations shall be held throughout the State on a day or days to be fixed by the State school commissioner, and by questions prepared and sent out by him to the county school commissioners, the answers to which shall be graded according to rules also prescribed by the State commissioner. No special examination shall be ordered except in great emergencies, in which case the county school commissioner or some competent person under his authority shall prepare the questions, but the licenses granted on such examination shall be valid only until the next examination and only in the county of issue. The county board shall have power, if they deem best, to employ teachers at a salary.

After thorough examination of the papers submitted by applicants for licenses as teachers upon the examination conducted the county school commissioner shall issue to the applicants certificates and grant licenses of three grades. A license of the first grade shall continue in force for three years, a license of the second grade for two years, and a license of the third grade for one year, in the county of issue, but good in another when indorsed by its county commissioner. All applicants must submit written testimonials of good character. If any applicant shall have shown unusual intelligence in his examination the county commissioner shall forward such papers to the State school commissioner, together with his certificate as to the good moral and professional character of the applicant, and if satisfactory to the State commissioner he shall issue a permanent teacher's license to the applicant, which shall be good in any county, and may be revoked only by the State commissioner. The county commissioner may revoke licenses issued by himself.

It shall be the duty of the teachers to file with the county commissioner at the expiration of each term of school a report of the whole number of scholars admitted to the school during the term, by sex, color, and name, the average attendance, the branches taught, and the number of pupils engaged in each branch, and such other statistics as may be required. Until such report shall have been filed and sworn to it shall not be lawful for the county commissioner to audit the account of said teacher for services rendered.

Preliminary training.—There shall be established in connection with the State university a State normal school for the education and training of teachers for the common schools of this State. The school shall be under a commission com-

posed of the State school commissioner and the chancellor of the university and three citizens of Georgia experienced in teaching, to be appointed by the governor, one for two, one for four, and one for six years, but the school shall be under the management of its board of trustees, which, in connection with the commission, shall prescribe such special features and departments as they may think the progress and advancement of the times require. They shall also have authority to make the necessary rules and regulations for the government of the school, and fix the number of its officers. Tuition shall be free to all white male students resident of Georgia; to nonresidents it shall be $150 per annum, but all free students shall obligate themselves in writing to teach within the next five years after their leaving the school for a period equal to that of their attendance upon its course. Certificates of proficiency may be granted by the faculty stating in general terms what branches of education the holder is prepared to teach, which shall entitle to teach in the common schools without further examination according to the grade specified in the certificate. Diplomas may be issued to graduates under conditions prescribed by the board of trustees.

Meetings.—It shall be the duty of the State commissioner to organize a teachers' institute in each county for the assembling and instruction of the common-school teachers. The institute shall hold an annual session of one week's duration during June, July, or August, or in some other month, as the commissioner shall deem best. The commissioner may combine the annual sessions of any number of institutes, shall prepare a programme of exercises with a syllabus of each subject named in the programme for each day's session, shall require county superintendents to cooperate at their regular per diem, shall require teachers and those having licenses to attend them, and shall cause the proper county school commissioner to fine absentees. But there shall be separate institutes for white and for colored teachers. He shall employ an expert, named by the county school authorities, at a salary of $25 for the week, to give instruction in the institute, and shall pay teachers whose schools have to be closed on account of their attendance at the institute, their regular salary.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Finances.

Attendance.—Admission to all common schools of the State shall be gratuitous to all children between the ages of 6 and 18 years residing in the subdistricts in which the schools are located; but white children and colored children shall not attend the same school, and no teacher receiving or teaching white and colored children in the same school shall be paid from the common school fund. School must be maintained at least three months, or the county forfeits its proportion of the State school fund.

Character of instruction.—There shall be a thorough system of common schools for education in the elementary branches of an English education only, as nearly uniform as practicable. The county board may establish a suitable number of evening schools for the instruction of such youths over 12 years of age as are prevented from attending day schools. The board may also organize in each county one or more manual labor schools on such a plan as shall be self-sustaining, provided the plan be submitted to and approved by the State board of education.

Text-books.—The county board of education shall prescribe from time to time what text-books and books of reference shall be used in the common schools of the county, provided that the Bible shall not be excluded and that books once fixed upon shall not be changed for five years save by a three-fourths vote of all the board. But no books of a sectarian or sectional character shall be introduced. No teacher shall receive pay for a pupil using other than the text-books prescribed.

Buildings.—The county board shall have power to purchase, lease, or rent school sites, to build, repair, or rent schoolhouses, to purchase maps, globes, etc., and to make all other arrangements of this kind necessary to the efficient operation of the school under their care, and the board is invested with the title, care, and custody of all schoolhouses, sites, school libraries, apparatus, or other property belonging to subdistricts.

4. Finances.

Funds (permanent or special).—Taxation.

Funds.—The poll tax, special tax on shows and exhibitions, all taxes on the sale of spirituous and malt liquors, dividends upon the stock of the State in the Bank of the State of Georgia, Bank of Augusta, Georgia Railroad and Banking Com-

pany, and such other means or moneys as now belong by law to the common-school fund, one-half of the proceeds of the rental of the Western and Atlantic Railroad, or one-half its annual net earnings, as ascertained by subtracting the annual cost of running and keeping up the road from the annual gross receipts under any change of policy which the State may adopt hereafter in reference to it, all endowments, devises, gifts, and bequests made or hereafter to be made to the State or State board of education, the proceeds of any commutation tax for military service, all taxes which may be assessed on such domestic animals as from their nature and habits are destructive to other property, all money received by the State agricultural department for the inspections of oils and fertilizers in excess of what may be deemed necessary to defray the expenses of that department, the net amount arising from the hire of convicts of this State after all expenses that are now or may hereafter be made a charge upon the proceeds arising from that source shall have been deducted, money arising from the lease of oyster lands [and the income], any educational fund now belonging to the State (except the endowment of and debt due to the University of Georgia) shall be a part of the common-school fund of the State; and when received and receipted for, from whatever source received, it shall be the duty of the legal receiving officer to keep the same separate and distinct from other funds. The fund shall be used for educational purposes and none other, and shall not be invested in bonds of the State or in other stock, except when investment is necessary to carry out the conditions of an endowment, devise, gift, or bequest. The manner of distributing the fund is given below.

Taxation.—Beginning with the taxes for the year 1894, all moneys belonging to the common-school fund of the State, including poll tax and specific taxes, shall be paid direct into the State treasury in like manner as other State taxes are paid, and said common-school fund shall be used for none other than common-school purposes, as provided by law: *Provided, however*, That when the poll tax from any county is received into the treasury said poll tax shall be placed on the books of the treasurer to the credit of the county from which it comes, and shall form a part of the apportioned fund belonging exclusively to that county, in accordance with the general plan hereinafter set out. On the 31st day of March, the 30th day of June, the 30th day of September, and the 31st day of December annually, or as soon thereafter as practicable, the treasurer of the State shall place to the credit of each county in the State, on his books, its proportionate part of the common-school fund in the treasury on each of said dates, such proportionate part to be determined by the State school commissioner, the comptroller-general, and the treasurer, and to be based upon the proportion which the school population in each county bears to the school population in the State, as shown by the last school census: *Provided, however*, That the salaries of the State school commissioner and his clerk or clerks, and the expenses of his office, and any other items properly chargeable under the law to the general school fund, shall be deducted out of the said fund before making the aforesaid apportionment to the counties.

On the 30th day of April, the 31st day of July, the 31st day of October, and the 31st day of January of each year, or as soon thereafter as practicable, the county school commissioner of each county shall, under the approval of the county board of education, transmit to the State school commissioner an itemized statement of the various sums due and unpaid by the board of education on said several dates, whether the same be for teachers' salaries, for pay of the county school commissioner, or for any other item of expense properly chargeable under the law to the county board of education; and when said itemized statements have been approved by the State school commissioner and presented to the governor, the governor shall issue his warrants upon the treasurer for all the funds standing to the credit of each several county upon the books of the treasurer, or for such part thereof as may be needed to liquidate the indebtedness of the county board of education of such county, as shown by each itemized statement aforesaid. And the State treasurer shall, upon presentation of the warrants aforesaid, draw his checks for the amounts of said warrants in favor of the county school commissioners of the several counties, and the State school commissioner shall immediately transmit said checks to the several county school commissioners, who shall promptly disburse the money so received in payment of the sums set out in the itemized statement aforesaid; and if the money is not sufficient to pay said sums in full, then it shall be prorated among the various items. And the county boards of education are hereby authorized to make their contracts in such manner that the amounts payable to teachers shall become due on the last day of each quarter for services rendered during that quarter.

In order to make the apportionment herein provided, and in order to make quarterly payments to the teachers in the common schools of the State, the treasurer

of the State is hereby authorized to draw, on the first day of April, on any funds in the treasury, $300,000 to pay the teachers quarterly, the same to be repaid from the school fund when the same shall be paid into the treasury.

Beginning with January 1, 1895, and continuing thereafter, the school year shall be coincident with the fiscal year of the schools, to wit, from January 1 to December 31, next following, and the State school commissioner shall, on or before the first Tuesday in June of each year, make an approximate estimate of the entire common school fund of the State for the next succeeding school year, and shall at once communicate, in writing, to the county school commissioner of each county the amount of money approximately estimated that will be payable to his county; and on the second Tuesday in June of each year, or as soon thereafter as practicable, each county board of education shall meet and make the necessary arrangements for placing the schools in operation for the next school year, and shall have full authority in their discretion to fix salaries for the payment of teachers, instead of paying them according to enrollment or attendance.

Where schools are sustained by local taxation for five months or more, the State school commissioner shall, on the 1st day of January, April, July, and October of each year, or as soon thereafter as practicable, notify the governor of the amount of funds standing to the credit of each of such counties on the books of the treasurer on said dates, arising from the quarterly apportionments aforesaid, and thereupon the governor shall issue his warrants for said sums, and the treasurer shall draw his checks for the said sums without requiring the itemized statements as provided above; and the State school commissioner shall immediately transmit said checks to the officer under the local school system authorized to receive its funds. And the State school commissioner shall, in like manner, pay over to the proper officer under the school board of any town or city having a school system sustained by local taxation for a period of five months or more, and to which he is now authorized by law to make direct apportionments, such proportion of the entire county fund as shown on the books of the treasurer as the school population of the town or city bears to the population of the county as shown by the last school census.

In any county in which a county-school system is already in existence a local tax to supplement the State apportionment in support of the common schools may be levied and collected in the following manner: When two successive grand juries of a county shall recommend in their general presentments that a local tax shall be levied in support of the common schools of the county an election shall be held, due notice being given, and if two-thirds of the electors qualified have voted for local taxation for public schools the fact shall be certified to the county board of education, who shall levy the tax. But if there be in the county any town having a school system of its own sustained by local taxation and its share of the common-school fund, the qualified electors thereof shall not vote in the election for taxing the counties for school purposes.

FLORIDA.

1. Organization of the System.

State board of education.—State superintendent of public instruction.—County board of public instruction.—County superintendents.—School supervisors.—Subdistrict trustees.

State board of education.—The State board of education shall consist of the governor, secretary of state, attorney-general, State treasurer, and State superintendent. The board shall assume charge of all lands held by or granted to the State for educational purposes, and of all educational funds; decide all questions and appeals regarding the interest of the school law and those referred to them by the State superintendent; remove any subordinate for unfitness; keep in view the establishment of schools on a broad and liberal basis, the object of which shall be to impart instruction to youth in the profession of teaching in the knowledge of the natural sciences, the theory and practice of agriculture, horticulture, mining, engineering, and the mechanic arts, in the ancient and modern languages, higher mathematics, literature, and in useful and ornamental branches not taught in common schools; cooperate with the superintendent in the general diffusion of knowledge in the State; fill vacancies on the nomination of the State superintendent in county school boards; elect a faculty for the State normal schools and supervise them.

State superintendent of public instruction.—The State superintendent of public instruction shall have the oversight, charge, and management of all matters per-

taining to public schools and buildings. He shall prepare and distribute all necessary copies of the school law, forms, etc.; call conventions of county superintendents and other officers for obtaining and imparting information on the practical workings of the school system and the means of improving it; call institutes to apportion the interest on the common-school fund and the fund raised on the 1 mill State tax among the several counties in proportion to the children 6 to 21 years of age; decide appeals arising under the interpretation of this act, prepare questions for county examinations and distribute them, and hold written examinations for State certificates, visit each seminary at least once in each year, and make an annual report to the governor, giving a full account of the doings of the respective boards of education, their financial acts, and of the prospects, progress, and usefulness of the seminaries.

County board of public instruction.—The county board of public instruction is elected biennially, vacancies being filled by the State board on nomination of the State superintendent. It consists of 3 persons, whose compensation shall be $2 per diem for actual service and 5 cents a mile for traveling expenses. Their duties are to take possession of all school property, to locate, erect, rent, furnish, repair schoolhouses, and maintain schools; to employ teachers, to prescribe and grade the course of study, to fix the compensation of the county superintendents, and to hold regular meetings and perform all acts reasonable and necessary for the promotion of the educational interests of the county. The board shall prepare an itemized estimate showing the amount of money required for the maintenance of the common schools, which shall not be fewer than 3 nor more than 5 mills. They shall fix the time of opening of the schools and the number of hours that shall be considered a school day.

County superintendent of public instruction.—The county superintendent is elected biennially, and is directed to make timely inspection of the county, ascertain the locations in which schools are needed and the amount of aid that the citizens of the neighborhood are willing to contribute, to visit each school once during a term, noting its scholastic and hygienic condition and the fitness of its supervisor, whom he shall nominate and with whom he shall frequently confer, to keep a record of the expenses of each school, to decide disputed questions, to examine applicants for teaching and issue certificates, which are subject to revocation, and in case of failure of the supervisor to take the census to perform that duty.

School supervisor.—Appointed by the county board of public instruction, the school supervisor is directed to supervise the work and management of the school over which he has jurisdiction, and report monthly to the county board of public instruction. In addition to his duty of general supervision and management he shall every four years take a census of children 4 to 21 and 6 to 21 years of age, and for each name he shall be paid 3 cents.

Subdistrict trustees.—If the county board of public instruction deem it advisable, or if one-fourth of the property-holding voters of an incorporated town or city demand it, the board may cause an election district or incorporated town or city to be a school subdistrict. The subdistrict shall elect three trustees biennially.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No person shall be permitted to teach in the public schools who does not hold a teacher's certificate. There shall be five grades of certificates—third grade, second grade, first grade, State, and life certificates, to be granted after written or written and oral examinations, the life certificate alone excepted. The applicant for examination shall present to the examiner a written indorsement of good moral character and shall pay an examination fee of $1. For a third-grade certificate the applicant shall be examined in orthography, reading, arithmetic, English grammar, composition, penmanship, United States history, geography, physiology, and theory and practice of teaching, and must obtain a general average of 60 per cent, and not lower than 40 per cent in any one branch. The certificate is good for one year, but the holder of a third grade certificate can not teach a second year under another. For a second grade an average of 75 per cent shall be required, but not less than 50 per cent in any branch. This certificate is good for two years, and no person will be granted more than two. For a first-grade certificate the applicant shall be examined in civil government, algebra, bookkeeping, physical geography, in addition to the branches required for the third-grade certificate, and must obtain an average of 80 per cent, nor fall below 60 in any branch. A State certificate shall be issued only by the

State superintendent to those holding a first-grade certificate who have taught twenty-four months or more (eight within the State) successfully under a first-grade certificate and shall also pass in geometry, trigonometry, physics, zoology, botany, rhetoric, English literature, mental science, and general history, and the subjects required for a first-grade certificate, and make an average of 85 and of 60 or more in any subject; it holds for five years. Any teacher holding a State certificate who has taught successfully in a high school in this State for the period of thirty months may be granted a life certificate without further examination, if indorsed by three persons holding State certificates as possessing eminent teaching ability, but special life certificates may be granted eminently successful kindergarten or primary teachers who have taught three years, only good, however, for those departments. Second and third grade certificates are good only in the county where issued, but a first-grade certificate may be indorsed by the superintendent of any county. Two examinations are held annually, and applicants for first, second, or third grade are examined by county superintendents. The county board appoints three teachers having the highest grade certificates to grade the papers, each to receive $2 per diem and a mileage of 5 cents.

Teachers are required to inculcate the moral and personal virtues, to prevent defacement of school property, to avoid severe and degrading punishments, to suspend pupils, and to hold a public examination.

Preliminary training.—One white male or female student from each senatorial district in the State shall be admitted to all the rights and privileges of the literary and classical departments of the Florida normal school and business institute, the appointment to be made by the senator of the district. The normal school for colored pupils, organized on the same plan as that for whites, is also under the control of the State board of education.

Meetings.—The State superintendent and the county school boards are authorized to hold teachers' institutes.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

[A law of 1895 makes it punishable by a fine or imprisonment to admit persons of either color into the same school, whether "public, private, or parochial," when sustained by any individual body, association, or corporation.]

Attendance.—White and colored children shall not be taught in the same school. Schools must be taught at least four months in each year, and be open to all children 6 to 21 years of age. Any county neglecting to maintain schools shall forfeit its proportion of the common-school fund.

Character of instruction.—[The subjects taught in the schools may be inferred from the subjects of the third grades of certificates granted teachers. See Teachers, Appointment and qualifications.] The county board of public instruction shall do whatever is necessary for grading and classifying the pupils and providing separate schools for the separate classes and for establishing, when required by the patrons, higher grades of instruction when the number competent to pursue them is sufficient.

Text-books.—No public official or teacher shall receive any private fee, donation, or compensation of any kind in any manner for the introduction or exchange of any schoolbook, on penalty of fine of not fewer than $50 or imprisonment not fewer than thirty days.

Buildings.—The county board of education shall provide a site for each school, with not less than one-half an acre in the rural districts and as nearly as large as may be in villages and cities, the situation to be dry, airy, healthful, and pleasant and reasonably central, and to erect, rent, furnish, and repair schoolhouses and their appurtenances.

4. Finances.

Funds (permanent and special).—Taxation.

Funds (permanent and special).—The proceeds of all lands that have been or may hereafter be granted to the State by the United States for public-school purposes, unspecified donations to the State, State appropriations, escheated property and forfeitures, and 25 per cent of the sales of public lands which are now or may hereafter be owned by the State shall be the State school fund, the interest of which shall be applied exclusively to the support and maintenance of free public schools, and apportioned among the counties according to the children 6 to 21 years of age.

Taxation.—A special tax of 1 mill on the dollar shall be apportioned annually for the support of public schools among the counties, according to the children 6 to 21 years of age. Each county shall be required to assess and collect annually for the support of public free schools a tax of not fewer than 3 nor more than 5 mills. In special districts an additional tax of not more than 3 mills may be raised.

ALABAMA.

1. Organization of the System.

State superintendent of education.—County superintendent.—County educational board (of examiners).—Township superintendent.

State superintendent of education.—There shall be elected biennially a State superintendent of education, at a salary of $2,250 per annum, who shall give bond with sureties in the sum of $15,000. He shall have an office at the capital, where the records of his office shall be kept open to all interested and where he shall give attendance when not absent on official business. He may employ a clerk at a salary of $1,500. His duties shall be to improve and to exercise a general supervision over all the educational interests of the State, and, more specifically, he shall require school officers to report on matters relating to the educational fund, on the condition of schools and the management thereof, and in case of noncompliance may remove the offender. He shall, as far as practicable, visit every county in the State for the purpose of inspection of the condition of the schools and of the accounts of the local officers, and for the purpose of diffusing information regarding the importance of public schools, shall encourage and assist in organizing and conducting teachers' institutes, shall apportion the educational fund, prepare and distribute all forms and books required by officers or teachers, shall keep a debtor and creditor account with each township or other school district in the State of all funds accruing thereto for educational purposes, shall institute suit for the recovery of money belonging to the educational fund, shall require and supervise the collection of all poll taxes, shall elicit information regarding school affairs outside of the State, print and distribute the laws, and shall report annually to the governor in writing, giving a brief account of his labors, an abstract of the reports from the county superintendents, estimates and accounts of expenditures of school money, an itemized account showing the disbursement of the contingent and other funds under his control, and such other matters as he may deem expedient.

County superintendent.—Unless elected by the people a county superintendent of education shall be appointed by the State superintendent for each county for a term of two years. The bond of the county superintendent shall be fixed by the State superintendent, but in no case shall it be less than double the amount of public money coming into his hands and must have good and sufficient sureties. He shall receive for his services $75 and 2 per cent per annum upon the amount of all educational moneys disbursed by him. His duties are to be at his office on the first Saturday of each month, from the beginning of the scholastic year until the close of the public schools for that year, to take charge of the moneys coming into his hands for school purposes, and use the same in paying the expenses of the schools, to make an annual report to the State superintendent, under penalty of fine and removal, showing the amount of money received by him from all sources, his disbursements by items, the amount on hand for each race, and the manner in which he has discharged his duties, delivering a duplicate of the same to the county judge of probate, who shall lay it before the county commissioners' court or board of revenue.

County educational board.—(See Teachers, Appointment, etc.)

Township superintendents.—When not elected by the people or appointed under special acts there shall be appointed by the county superintendent a township superintendent for each township [see Schools, Attendance] or other school district, subject to the approval of the State superintendent, who shall serve for two years. He shall have the immediate supervision of the public schools of the township and shall have power to establish, subject to the approval of the county superintendent of education, one or more schools of either race in such township. He shall convene the parents of children of school age and consult with them and with a view to subserve their wishes and interests he shall determine the number of schools which shall be established in his district for the current scholastic year, fix the location of each school and the length of session, apportion the school money to each school according to the children of school age who will probably attend it, shall determine what children shall be transferred to another district, and do such other acts as may carry out the law. He shall within 10 days after

the meeting report to the county superintendent the number and location of schools, the names of the teachers employed, and the amount of money apportioned to each school. His decision may be appealed from to the county superintendent. He shall contract with teachers, visit schools, enumerate children every second year by race and sex of school age. He is exempt from road and jury duty and poll tax.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—All contracts with teachers must be in writing and shall be approved by the county superintendent to be valid. There shall be three grades of certificates, and every teacher in the public schools must obtain a certificate in one of such grades, but in no case shall an applicant receive a certificate who fails to answer correctly 70 per cent of the questions propounded by the board of examiners.

Every applicant for a teacher's certificate must be examined on the following subjects: For the third grade, in orthography, reading, penmanship, practical arithmetic through fractions, primary geography, and the elementary principles of physiology and hygiene; for the second grade, on all the foregoing subjects, and also in practical arithmetic, history of the United States, English grammar, intermediate geography, and elementary algebra; for the first grade, on all the foregoing subjects, and also in higher algebra, natural philosophy, geometry, and the theory and practice of teaching, but no certificate of the first or second grade shall be granted to any person who has not passed a satisfactory examination in physiology and hygiene with special reference to the effects of alcoholic drinks, stimulants, and narcotics upon the human system. A third-grade certificate shall be valid for one year, a second-grade for two years, and a first-grade for three years in the county where issued.

There shall be established in each county of the State an educational board, composed of the county superintendent and two teachers, either in public or private schools of the county, appointed by the superintendent annually. The board shall meet quarterly or oftener and shall examine in writing all applicants to teach in the public schools of the county, each of whom, if licensed, shall pay a fee of $1, to be divided between the two appointed members. A diploma from any chartered institution of learning will entitle the applicant to a license on proof of the other qualifications of a good moral character and payment of the fee.

Every teacher must forward a quarterly report to the county superintendent setting forth the enrollment, the attendance, transferred pupils, the branches taught and the pupils in each, distinguishing by sex, the monthly pay from school revenue from the townships, the number of days taught, and the amount due. Failure to report works forfeiture of pay.

Preliminary training.—[Normal schools are established under special acts and maintained by the State both for white and for colored persons. The schools are under a board of directors and receive from $2,500 to $3,000 and in one case $1,500 annually from the State treasurer. Graduates shall receive a State certificate from the State superintendent, which will entitle the holder to teach anywhere in the State.]

Meetings.—It shall be the duty of the board of education in each county to organize and maintain therein three teachers' institutes for white and for colored persons, provided there are at least ten licensed teachers of the race in the county holding the institutes. Every teacher holding a license shall be a member, but no fee or assessment shall be imposed on a member without his consent. All persons holding license shall attend at least one county institute, the business of which shall be devoted mainly to discussions and instructions in regard to the methods of teaching and disciplining schools and to the text-books and other matters connected with the schools and school laws.

It shall be the duty of the State superintendent to hold or have held within each Congressional district one or more teachers' institutes for one or more weeks during the summer months; and unappropriated money shall be drawn from the State treasury to defray the expenses thereof, but not to exceed $500 in any year nor the amount given for the same purpose by the Peabody Education Fund.

3. Schools.

Attendance.—Buildings.

Attendance.—The general assembly shall establish, organize, and maintain a system of public schools throughout the State for children 7 to 21 years, but separate schools shall be provided for children of citizens of African descent. Every

township and fraction of a township which is divided by a State or county line, or river, creek, mountain, or other barrier, and every incorporated city or town having 3,000 inhabitants or more shall constitute a separate school district, and each of them shall be under a township superintendent. The township superintendent shall not establish more than two schools for either race in any township in which the fund of such race does not exceed $50. He shall fix the location of each school, the time of its opening, and the length of the session, which shall not be fewer than twelve weeks.

Buildings.—When but one school is established in a township it shall be located so as to accommodate the largest number of pupils and, to encourage the building of a permanent schoolhouse, as near the center of township as possible.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The interest at 6 per cent on all sums of money which have heretofore been or may hereafter be received by the State as the proceeds of sales of lands granted or intrusted by the United States to the State, or to the several townships thereof; the annual interest at 4 per cent on that part of the surplus revenue deposited with the State by act of Congress, June 23, 1836; all the annual rents, incomes, and profits arising from the proceeds of sales of all such lands as have been or may hereafter be given by the United States, or by this State, and by individuals, for the support of the public schools of the State; all such sums as may accrue to the State as escheats; licenses required to be paid into the county school fund, and the sum of $350,000, from any money not otherwise appropriated annually, for the maintenance of schools, together with the specific taxation given below, in the manner there set forth shall be annually appropriated for the maintenance of a system of public schools throughout the State. The State treasurer shall annually set apart $1,000 of any unappropriated money in the treasury as a contingent fund, payable to the order of the department of education.

As soon as the State auditor has certified to the superintendent of education the amount to the credit of the educational fund, including unexpended balance of preceding year, the latter-named officer shall set apart the sum necessary to pay the expenses of the education department and of the normal schools, as fixed by law, and shall then apportion the balance among the several townships and school districts of the State in the following manner: He shall set apart to each township or other school district the amount due from the State as interest on that township or district's 16th section or other trust fund held by the State, and then apportion the remainder to the respective townships according to the latest official returns of the population of school age, according to race.

Taxation.—Each county shall receive as school money all the poll tax collected therein, and each township or other school district is entitled to receive all the poll tax paid by its citizens, the white population receiving what it has paid, the colored the amount paid by it. [The Constitution requires the General Assembly to provide for the collection of an annual poll tax not to exceed $1.50 on each poll, to be applied to the support of public schools.]

All local school funds raised for the support of public schools, by taxation or otherwise, shall be apportioned and expended in the districts in which raised.

MISSISSIPPI.

1. Organization of the System.

State board of education.—State superintendent of education.—County school board.—County superintendent.—District school trustees.

State board of education.—There shall be a board of education consisting of the secretary of state, attorney-general, and superintendent of public education for the management and investment of the school funds, and to regulate all matters arising in the practical administration of the school system. The board may adopt a course of study.

State superintendent of public education.—There shall be a superintendent of public education in each county, who shall be appointed, by and with the advice and consent of the senate, for a term of four years. He shall give bond for $5,000, shall provide a seal, shall have general supervision of the free public schools, and may prescribe such rules and regulations for the efficient organization and conducting the same as he may deem necessary, and shall solicit reports from all public and private educational institutions of the State. He shall preserve all school

books, maps, apparatus, etc., as shall be purchased or donated, apportion semi-annually the school fund to the counties and separate school districts. He shall make a biennial report to the legislature showing the receipts and disbursements of the common-school fund, the number of school districts, schools, teachers employed and pupils taught therein, and the attendance of pupils and studies pursued by them, the financial condition of the schools, their receipts and expenditures, value of schoolhouses and property, cost of tuition, and salaries of teachers, the condition, educational and financial, of the normal and higher institutions connected with the school system of the State of the private schools, academies, and colleges, as far as can be ascertained, and, finally, such general matters, information, and recommendations relating to the educational interests as he may deem important.

County school board.—There shall be a county school board, consisting of one member from each supervisor's district, to be appointed for the term of four years by the county superintendent, the appointments to be ratified by the board of supervisors. Their pay shall be $3 for each day's actual service, but they shall not be paid more than $9. The county superintendent shall be president of the board. Its duty shall be to fix the boundaries of school districts or to alter them (separate school districts excepted). In districts containing not more than one chartered institution of learning the board shall locate the public school at the site thereof, all parties consenting, and the public school shall be conducted in accordance with the rules of the chartered institution in so far as they do not conflict with the provisions of the law.

County board of examiners.—Two first-grade teachers, to be appointed annually prior to the fall examination, one by the county school board and one by the board of supervisors, shall, with the county superintendent, constitute an examining board; but a teacher of a normal training school shall not be appointed on the board.

County superintendent of public education.—There shall be a superintendent of education in each county, who shall be appointed by the State board of education, with the advice of the senate, or shall be elected by the people, for a term of four years. He must be a qualified citizen, a resident of the State for four years and of the county for two years immediately preceding his appointment or election, and shall have passed an examination required for a first-grade teacher's certificate, presided over by 3 persons, 2 of whom shall be college graduates or holders of teachers' first-grade licenses. He shall be provided with an office and shall not teach. It shall be his duty to employ teachers recommended by the local trustees, or in case they fail to recommend, to appoint them offhand, examine their monthly reports when necessary, and require the trustees to certify to them; to fix the pay of teachers; to enforce the course of study and the use of text-books adopted in the county; to enforce the rules in reference to the examination of teachers; to visit schools, and to perform such other duties as may be required of him. If he fail to make a report to the State superintendent he shall be fined $50. He must also report to the county authorities.

District school trustees.—Separate districts shall be made for each race, excluding "separate school districts." A regular school district as laid off by the county school board shall not contain fewer than 9 square miles nor fewer than 45 educable children of the race for which the district is established, unless natural features of the territory prevent attendance. Under such circumstances 10 educable children are requisite, but when fewer than 5 children attend school it shall be discontinued. For every district there shall be three trustees chosen for three years by the patrons of the school, one to retire annually, vacancies to be filled by the county superintendent. The trustees select the teacher, or in default the county superintendent acts, scrutinize the census, may suspend or dismiss pupils, and watch over the school property and the interest of the school, making provision for the comfort and welfare of pupils.

Any municipality of 300 or more may be declared a separate school district by an ordinance of the mayor and board of aldermen, if it maintain a free public school for at least seven months; any part of a county or counties adjoining a municipality may be included in its separate school district by a vote of the resident freeholders of the territory to be added and the consent of the municipal authorities.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No teacher shall be allowed to teach unless licensed, and if the district trustees fail to select a licensed person the county superintendent shall appoint one. Two first-grade teachers, to be appointed annu-

ally, one by the county school board and one by the county supervisors, shall, with the county superintendent, constitute an examining board for each county, which shall as a board examine and grade the applicants for a teacher's position. They shall receive $2.50 per diem for actual service and 25 cents additional for grading papers of each applicant. The board holds examinations semiannually at the county seat separately for each race. The State superintendent prepares the questions. Before a license to teach will be granted the applicant must furnish evidence of good moral character, ability to govern a school, and be 17 years of age. To obtain a first-grade license the applicant must be examined in spelling, reading, practical and mental arithmetic, geography, English grammar and composition, United States history, history of Mississippi, elements of natural philosophy, civil government, and elements of physiology and hygiene with special reference to the effects of alcohol and narcotics. To obtain a second-grade license the same subjects, with the exception of history of Mississippi, elements of natural philosophy, and civil government and a lower grade of geography, United States history, and physiology, but a want of knowledge in physiology is not a bar to a license. To obtain a third-grade license the applicant must be examined on the subjects required for a second grade. Licenses shall be granted to those making a general average of 75 per cent and not less than 50 per cent on any subject for one year, except that in an examination for a third-grade certificate 60 per cent and not less than 40 in any branch is allowed. A general average of 85 in an examination for first grade and six months' experience in teaching shall be a license for two years; of 90 per cent for three years. A second three years' license obtained after the expiration of the first is renewable in the county indefinitely if continuous, but one teaching five years under a first-grade license shall be exempt from examination. A teacher teaching under a third-grade license shall not be principal of a two-teacher school, and in schools having three teachers the principal must have a first-grade license.

The principal teacher in a public school shall keep a daily record of facts pertaining to the school, nor shall pay be drawn in full unless the record is properly kept and delivered. The principal teacher shall make an enumeration of the educable children in the district by sex and color, and record the name and residence of the parents of the children. He shall also make a report to the county superintendent of the pupils in attendance by sex and age, which shall be approved by the trustees, and in addition shall make a term report of such statistics as the blanks may require. Failure in this is followed by the withholding of 20 per cent of his month's pay.

Preliminary training.—The control and government of the State normal school for colored persons is vested in a board of five trustees appointed every five years, with the advice and consent of the senate. The aim of the school is to maintain a first-class normal school for the training of colored persons of both sexes for teaching in the common schools. [Provision for training white women for teaching is made in the State industrial institute and college.]

Meetings.—In every county having more than fifteen school districts for either race there shall be held annually a separate teachers' institute, to continue in session not fewer than five days. Such meetings shall be under the direction of the board of education, which names a number of suitable conductors, from which the board of examiners in each county shall select a conductor. The expenses are paid by the collection of 50 cents from each person examined and charge a fee of 50 cents for every year over one that any license he may issue will run. If this fund is insufficient the deficit may be taken out of the county school fund, not exceeding $40.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—The races are taught separately. A public school shall be maintained in each school district for at least four months during the scholastic year. Neglect to keep the school open for the legal period forfeits the district's share of the State apportionment of free-school funds, except so much as is required to pay teacher's salary. The school age is 5 to 21 years. Educable children who intend to pursue merely common-school studies may attend a high school or college in their county if it is established as a public school at the cost of the district. One teacher is allowed to 50 educable children in a district. When a school has bona fide more than 40 pupils the superintendent may grant an assistant, or in case of an attendance of 80 two assistants, but in schools of over 100 only one teacher shall be allowed to every 35 pupils.

Character of instruction.—The branches of study upon which teachers shall be examined constitute the curriculum of the free public schools. (See Teachers,

above.) A separate school district may make either or both of its schools graded schools, and a graded school may be of two kinds, either a graded grammar school or a graded high school, the latter to be free or tuitional, as the trustees may determine, and to have a course of three years.

Text-books.—The county board at its annual meeting in 1895 shall appoint five teachers of recognized ability, and the superintendent two, who shall constitute a committee for the selection of a uniform series of text-books, and on the first Monday in October, 1895, the committee shall select one text-book for each branch enumerated in the curriculum of the public schools, and every fifth year the same process shall be repeated. The books so selected shall be furnished on a written contract with prices fixed and shall be used in the county for five years. No child unprovided with the books shall be instructed. Separate districts adopt their own books.

Buildings.—Any pupil who willfully defaces or injures any school property is liable to suspension or expulsion, and his parents or guardians shall be liable for all damages. Any one disturbing a public school shall be fined not less than $10 nor more than $50.

4. Finances.

There shall be a common-school fund, which shall consist of the poll tax (which is to be retained in the counties where collected) and an additional sum from the general fund in the State treasury, which together shall be sufficient to maintain the common schools for the term of four months of the year. The fund shall be distributed among the counties in proportion to the educable children in each. Any county or separate school district may levy an additional sum to keep the schools open for a longer period than four months.

LOUISIANA.

1. Organization of System.

State board of education.—State superintendent.—State institute conductor.—Parish school board directors, and the committee for appointing teachers.—Parish superintendent.—District board of directors.—City school board.—City superintendent.

State board of education.—The governor, superintendent of education, attorney-general, and six members, one from each Congressional district, appointed by the governor, shall compose the State board of education. The appointed members shall receive as compensation for their services a per diem for actual service and their traveling expenses equal to that paid members of the legislature. They may require reports from the parish superintendent, and shall appoint for each parish, with the exception of Orleans, a board of school directors. The board shall prepare rules for the government of the common schools, which shall be enforced by the parish superintendent and school boards, give such directions as it may deem proper concerning the branches to be taught, and strictly enforce uniformity of text-books.

State superintendent of public education.—There shall be elected by the qualified voters of the State a superintendent of public education, who shall hold his office for four years, at an annual salary of $2,000; a vacancy to be filled by the governor, with advice of senate. He shall be provided with an office at the seat of government and allowed such incidental and clerical expenses as may be appropriated by the legislature. His duties are to supervise all boards of education and all State, common, high, or normal schools, visit the parishes at least once a year, make a biennial report upon the condition and progress made and possible improvements to be made in the common schools, the amount and condition of the school funds and their distribution, the amount and disbursement of local taxes and other sources of revenue, an abstract of the parish and city superintendent's reports, and all facts of interest to the public schools. He shall have printed a copy of his report for each school district, 200 copies for the legislature and for exchanges, and 300 copies for distribution. He shall decide all controversies among school officers or teachers, with an appeal to the State board.

State institute conductor.—(See Teachers, Meetings.)

Parish school board and the committee for appointing teachers.—The State board shall appoint a board of school directors, consisting of not fewer than 5 nor more than 9 qualified citizens of the parish, for four years. The parish board shall elect a superintendent, and may appoint auxiliary visiting trustees for each ward or school district, report all deficiencies in the schools and neglect of duty by officers

or teachers, visit the schools, apportion the school fund among the districts, determine the number of schools to be opened, the location of the schoolhouses, the number of teachers to be employed and their salary, and in general to enforce the law. The board holds four regular meetings during the year, and its members receive a compensation of not more than $2 per diem, provided that the whole amount expended annually does not exceed $100. By a two-thirds vote they may change the location of a schoolhouse. The board shall report to the auditor semiannually, showing its receipts and expenditures by items.

The president of the board, a person appointed by it, and the parish superintendent form the committee for appointing teachers.

Parish superintendent.—The parish school board elect a parish superintendent, who shall be of age and possessed of moral character and ability to manage the common school interests. His salary shall not exceed $200 per annum. He shall visit at least once each school in the parish, and whenever his services are quite efficient and highly satisfactory to the school board they may grant him his traveling expenses, not to exceed $125 per annum and his expenses to the convention of superintendents. He is a member of the committee for appointing teachers. He shall report from the assessor's returns the number of children between the ages of 6 and 18 years by race and sex in each district. He shall make an annual report to the State superintendent, showing in tables an aggregate of the school districts, the districts in which schools were taught, and the length of time taught, the highest, the lowest, and the average number of children at school, the cost of tuition of each child for the session and month, number of private schools, academies, and colleges taught in the parish, and the length of session of the same, the number of teachers employed, male and female, and their average wages, the sum raised by local tax or otherwise, and the purpose for which disbursed, the number, increase, kind, and value of schoolhouses, number of district libraries and volumes in each, and the increase during the year, and the sums received and expended. Failure to comply causes him to lose $20 of his annual salary. He shall be at his office at the parish seat on the first Saturday of January, April, July, and October, and at such other times as may be necessary.

District board of directors.—The parish board of directors is authorized to appoint auxiliary visiting trustees for each ward or school district or school in the parish. Such trustees shall make quarterly reports to the parish boards concerning the scholastic and material condition of their charges.

City school board and superintendent (of the parish of Orleans).—All the public schools of the parish of Orleans shall be under the direction and control of a board of directors of 20, 8 of whom shall be appointed by the governor, with the approval of the State board, and 12 by the city council of New Orleans, who shall hold for four years, one-fourth to retire annually. The board fixes the salaries of teachers, limits the expenditure to one-ninth of the whole amount provided for the schools, provides rules for examining teachers, and elects them from those passing and from graduates of the normal schools, may establish night and normal schools, appoint a superintendent, and shall make a full report to the common council of New Orleans.

The superintendent shall receive an annual salary of $2,500, hold office on good behavior for four years, is ex officio member of the board who have elected him to assist them in organizing and improving the city system of schools.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—The president of the parish school board, a member appointed by that board, and the parish superintendent shall constitute a committee to appoint the teachers in the common schools of the parish and fill vacancies in the order of merit, and no person may be employed who has not obtained a license for the year in which the school is to be taught, of a grade sufficient to cover the requirements of the school to which appointed. The examinations to ascertain the fitness of candidates are under the control of the parish superintendent, who is assisted by two persons appointed by the school board of the parish, all of whom must agree before a certificate may be issued. The competitors must pay a fee of $1, returnable, and satisfy the examiners of their good character. To obtain a third-grade certificate the applicant must be found competent to teach spelling, reading, primary mental arithmetic, rudiments of practical arithmetic through fractions and simple interest, elementary geography, primary language lessons, and laws of health. To obtain a second-grade certificate the applicant must be found competent to teach arithmetic, geography, English grammar and composition, United States history, elements of natural philosophy and of

physiology. To obtain a high school or first-grade certificate the applicant must be found competent to teach elocution, spelling, grammar, rhetoric and literature, history, botany, philosophy, arithmetic, the effects of narcotics and stimulants, algebra, geography, and geometry, and such other studies of high grade as local boards may deem necessary. A special certificate of this grade may issue on a satisfactory examination in the study or studies to be taught in any special academic department, which shall entitle the holder to special appointment in a department where such studies may be taught. Those holding the diploma of the Peabody Normal College shall be entitled to a first-grade certificate good for four years and renewable at the option of the State board.

All certificates granted teachers by the board of directors of the parish of Orleans shall be good for three years, and upon a second examination at the expiration of three years a certificate of higher grade shall be given, good for five years if the applicant is competent.

It shall be the duty of each teacher to keep a register as the parish superintendent may require, and to make a report of enrollment, the highest, the lowest, and the average attendance, the books used, branches taught, number of pay pupils, if any, and such other statistical information as may be required. For failure the parish superintendent shall withhold $2. The course of study must be faithfully enforced and the rules and regulations obeyed, and failure of the teacher to comply with these provisions may, on complaint, cause his or her removal. The teacher shall have the power to hold every pupil accountable in school for disorderly conduct on the play grounds or to suspend pupil. The teacher must attend State and county institutes.

Preliminary training.—The State normal school shall have the object to train teachers for the public schools of Louisiana, and shall be open to white persons of either sex of 15 (women) or 16 (men) years of age, of moral character of proficiency in the common-school branches, provided they give assurance in writing of intention to teach in the schools of the State one year after graduation. Tuition is free. The board of administrators is empowered to confer diplomas upon the graduates entitling them to a first-grade teacher's certificate, valid for four years in any town or county, subject to renewal at the option of the board; in addition, the diploma gives precedence if the board so order. The parish of Orleans may establish a normal school.

Meetings and State institute conductor.—The parish superintendent may devote the first Saturday of each month during the time the common schools are in session in the parish to holding institutes for the improvement of teachers in their calling. Three hours constitute a legal session. Teachers failing to avail themselves of this opportunity shall forfeit one day's pay, unless excused or living 10 miles away from place of meeting or having to cross water, and a parish superintendent shall forfeit $5 for failure to comply with the provisions regarding them, unless physically unable to comply. The superintendent shall appoint one of the best-qualified teachers as institute manager, who shall receive $2.50. The school board of the parish of Orleans may inaugurate institutes as set forth above.

State institutes shall be held in the aggregate for twenty weeks at such places and times as may be decided upon by the State superintendent and the president of the State normal school, in conjunction with the respective parish superintendents. The State superintendent and the president of the normal school shall select a State institute conductor, who shall have immediate charge of the State institutes, whose salary shall not exceed $1,000 per annum, payable from any funds donated by the board of trustees of the Peabody Fund or appropriated by the general assembly. The conductor is also a member of the State normal school faculty, performing such services and receiving such additional compensation as the board of administrators of that institution may determine.

3. Schools.

Attendance.—Character of instruction.—Text-books.

Attendance.—White and colored persons are taught in different schools. The school age is 6 to 18. The school boards may assess and collect $1 per annum from each family which sends a child to the common schools, to be used in purchasing fuel and other things conducive to the comfort of the pupils.

Character of instruction.—The branches of orthography, reading, writing, arithmetic, geography, grammar, United States history, laws of health and the injurious effects of narcotics and stimulants, physical education, and such other branches as the State or parish school board may require, provided these elementary branches may be taught in the French language in the localities where

that language predominates, if no additional expense is incurred. The parish school board shall have authority to establish graded schools and central or high schools under the sanction of the State board, provided site and buildings are not paid for from the school fund, but the parish of Orleans shall not require the sanction of the State board.

Text-books.—The State board shall strictly enforce a uniformity of text-books and shall adopt a list, which shall not be changed for four years.

4. Finances.

Funds (permanent and special).—Taxation.

Funds (permanent and special).—The school fund of the State shall consist of the interest on the proceeds of all public lands heretofore granted by the United States for the use and support of the public schools; of all lands and other property which may hereafter be bequeathed or donated to the State or generally for school purposes; all funds or property other than unimproved lands bequeathed or granted to the State not designated for other purposes, the proceeds of vacant estates. The legislature may (by the constitution) also appropriate, in whole or in part, the proceeds of the public lands not designated for any other purpose. This fund is distributed among the parishes according to the number of children 6 to 18 years of age.

All fines imposed by the several district courts for violation of the law and all forfeited bonds in criminal cases (the parish of Orleans excepted) are applied to the support of common schools.

Taxation.—The general assembly shall levy an annual poll tax for the maintenance of public schools on every male person of 21 years or more which shall never be less than $1 nor more than $1.50, which belongs to the parish in which collected. There shall be a State school tax to be distributed to the parishes in proportion to the children 6 to 18 years of age, which is fixed annually by the State legislature. The police jurors of the several parishes and the boards of trustees, aldermen, and legal representatives of cities, towns, and villages, except the parish of Orleans, may levy for the support of the common schools of their respective parishes not less than 1½ mills of the 10 mills tax on the dollar of the assessed valuation. Whenever one-tenth of the property taxpayers of any parish, city, or incorporated municipality shall petition the police jury or municipal authorities to increase the rate of taxation for the purpose of constructing public buildings the body petitioned shall order a special election to authorize the levy.

ARKANSAS.

1. Organization of the System.

State superintendent of public instruction.—State commissioners of the school fund.—County examiners.—District school directors.

State superintendent of public instruction.—Every two years there shall be elected a State superintendent of public instruction who shall have the general superintendence of the business of the free common schools of the State. He shall have an office at the seat of government, where he shall keep the matter that accumulates by virtue of his office, and where he shall be in attendance when not necessarily absent on business. He and he alone shall furnish suitable questions for the examination of teachers, prepare and transmit to county superintendents the necessary forms and registers, supervise the school funds so far as to insure their safety, and make an annual report to the governor, showing the number of persons between the ages of 6 and 21 years residing in the State on the 1st day of the preceding July; the number of such persons in each county; the number of each sex; the number of white; the number of colored; the whole number of such persons that attended the free common schools of the State during the year ending the 30th day of the last preceding June, and the number in each county that attended during the same period; the number of whites of each sex that attended, and the number of colored of each sex that attended the said schools; the number of common schools in the State; the number of pupils that studied each of the branches taught; the average wages paid teachers of each sex; the relative average wages paid to male and female teachers, respectively, according to the different grades of the certificates; the number of schoolhouses erected during the year, the material and cost thereof; the number previously erected, the material of

which they were constructed, their condition and value; the number with their grounds inclosed; the counties in which teachers' institutes were held, and the number that attended the institutes in each county.

He shall likewise report the amount of permanent school fund belonging to the State at the close of the fiscal school year, and the amount of other property apportioned to school purposes; the nature, kind, and amount of such investments made of the same; the safety and permanency of such investments; the amount of revenue accruing from the school funds; the income received from the per capita assessment of each county, and the amount derived from such assessments in all the counties of the State; the income derived from all other sources, together with the amount derived from each; likewise, in what sums, for what purposes, and in what manner the said school revenue shall have been expended and what moneys of various kinds are in the various county treasuries unexpended.

He shall also append to his report a statistical table, compiled from the materials transmitted to his office by school officers, with proper summaries, averages, and totals given, and shall present such comparison of results and such an exhibit of his administration and of the operation of the common free school system, together with such statements of the true condition of the schools of the State, as shall distinctly show the improvements and progress made from year to year in the department of public instruction. He may print as high as 5,000 copies of his report.

He shall apportion the school fund and shall from time to time issue editions of the school law, shall have access to the auditor's books and papers, may grant State certificates, and shall prepare a list of text-books, which he shall recommend to the directors and teachers. A vacancy in the office shall be filled by the governor.

State commissioners of the school fund.—(See Finances, Funds.)

County examiner.—The county court of each county shall at the first term thereof, after each general election, appoint in each county not divided into two judicial districts one county examiner; and in each county divided into two judicial districts may appoint one county examiner for each district, such examiner to be of high moral character and scholastic attainments, and all county examiners shall be required, before entering upon the duties of their offices, to stand the same examination as is required of the teachers who receive first-grade licenses, and no one shall fill the offices of county examiner and school director at the same time.

All county examiners shall be paid such salary each year as may be fixed by the county judge. It shall be the duty of the examiner to examine and license teachers of common schools. He shall quarterly hold at the county seat a public examination. He shall receive the reports of the district directors, and shall annually, on or before the 20th of September, prepare in tabular form an abstract of the reports made to him by the directors of the school districts embraced within his county, showing the number of organized districts in his county at the commencement of the year on the 1st day of July preceding, the districts that have made their annual reports, the number of persons in each district between the ages of 6 and 21 years, distinguishing the sex and also the color of said persons, the number of said persons that attended school during the year, the average number of males and females in daily attendance, and the number that pursued each of the studies designated to be taught in the common schools; the number of teachers of each sex employed in his county, the average wages paid per month to teachers of each sex, according to the grade of their certificates, the whole amount paid as teachers' wages in his county, the number of pupils that studied in his county, and the several branches taught; the number of schoolhouses erected during the year in his county, material and cost of same, the number before erected, the material used in their construction, their condition, and value; the number of grounds inclosed; the amount of money raised by tax in each district, and for what purpose raised; the amounts that have been expended and for what purposes, the amount of revenue received by his county from the common-school fund and received for the support of schools from each of all other sources; for what purposes and in what sums the said revenues were expended, and what amounts unexpended were at the close of the school year in the county treasury; and shall report also the number of deaf mutes, blind, and insane in each school district in his county under 30 years of age, their names and their post-offices. Failing to make this report he shall forfeit $25. His expenses for actual and unavoidable expenses of his office to the sum of $25 may be allowed by the county court.

District board of school directors.—The county court shall have power to dissolve any school district when petitioned by a majority of the electors concerned to do so. No school district shall be formed having fewer than 35 persons of the scholastic age.

The electors of every school district shall, when lawfully assembled in annual

district school meeting, with not less than 5 electors present, have the power, by a majority of the votes cast at such meeting, first, to choose a chairman; second, to adjourn from time to time; third, to appoint, when necessary, in the absence of the directors of the district, a clerk pro tempore; fourth, to elect a director for the district for the next three school years who can read and write; fifth, to designate a site for a schoolhouse; sixth, to determine the length of time during which a school shall be taught more than three months in the year; seventh, to determine what amount of money shall be raised by tax on the taxable property of the district sufficient, with the public-school revenues apportioned to the district, to defray the expenses of a school for three months, or for any greater length of time they may decide to have a school taught during the year: *Provided*, That no tax for purposes aforesaid greater than one-half of 1 per cent on the assessed value of the taxable property of the district shall be levied: *And provided further*, That they may, if sufficient revenue can not be raised to sustain a school for three months in any one year, determine by ballot that no school shall be taught during such year, in which case the revenue belonging to such district shall remain in the treasury to the credit of such school district; eighth, to repeal and modify their proceedings from time to time.

There shall be annually elected by the voters in each school district a director, who shall hold his office for the term of three years, and until his successor shall have been elected and have qualified: *Provided*, that at the first annual school meeting of this district after the passage of this act three school directors shall be elected, to hold office one, two, and three years, respectively. Any person who shall have been elected or appointed a director and shall neglect or refuse to qualify and serve as such shall forfeit to his district the sum of $10, which may be recovered by action against him at the instance of any elector in the district, and which, when collected, shall be paid into the county treasury by the officer before whom the action was maintained, and added, by the treasurer, to the school fund revenues appropriated to the district. Any director who shall neglect or fail to perform any duties of his office shall forfeit to his district the sum of $25.

The directors shall have charge of the school affairs and of the school educational interests of their districts, and shall have the care and custody of the schoolhouses and grounds, the books, records, papers, and other property belonging to the district, and shall carefully preserve the same, preventing waste and damage, and shall purchase or lease, in the corporate name of the district, such schoolhouse site as may be designated by a majority of the legal votes at the district meeting; shall hire, purchase, or build a schoolhouse with funds provided by the district for that purpose; and may sell or exchange such site of schoolhouse when so directed by a majority of the electors of any legal meeting of the district.

They shall hire teachers, shall adopt text-books, shall visit the school at least once each term, and when not of a special district may expend annually as much as $25 for maps, charts, globes, dictionaries, and other apparatus, subject to the approval of the State superintendent.

They shall procure from the county examiner and furnish the teacher at the commencement of the term a register for his school, and require the said teacher to report in the said register at the close of the school term the number of days of the said term, the name and age of each pupil, the date on which each entered the school, the separate days on which each attended, the whole number of days each attended, the studies each pursued, the total number of days all pupils attended, the average daily attendance, and the number of visits received from the directors during the term.

They shall submit to the district, at the annual meeting, an estimate of the expenses of the district for that year, including the expenses of a school for the term of three months for the next year, after deducting the probable amount of school moneys to be apportioned to the district for that school year, and shall also submit an estimate of the expenses per month of continuing the school beyond the term of three months, and of whatever else may be necessary for the comfort and advancement of the said school.

Cities and towns may organize as separate school districts, with a board of six directors.

2. Teachers.

Appointment, qualifications, and duties.—Meetings.

Appointment, qualifications, and duties.—Any person who shall teach in a common school of this State without a certificate of qualifications and a license shall not be entitled to receive for such service any compensation from revenues for the support of common schools, except his license expires during the term named in the written contract with the board of directors.

The State superintendent shall furnish suitable questions for the examination of teachers to the county examiner. He may grant State certificates, which shall be valid for life, to any person in the State who shall pass a thorough examination in all those branches required for granting county certificates and also in algebra, geometry, physics, rhetoric, mental philosophy, history, Latin, the Constitution of the United States and of Arkansas, natural history, and theory and art of teaching.

It shall be the duty of such examiner to examine and license teachers of common schools. He shall hold quarterly, at the county seat of each county, in a suitable room to be provided by the county court, a public examination for that purpose, and shall, previous to holding such examination, give at least twenty days' notice thereof to the directors of each school district within the county, whose duty it shall be to file the original notice in their office and post, without delay, copies of said notice in three or more of the most conspicuous places within their district. He shall conduct all examinations by written and oral questions and answers, but shall grant no certificates of qualification except in accordance with the provisions of law respecting teachers' certificates.

He shall, at the time and place appointed for holding public examinations, examine in orthography, reading, penmanship, mental and written arithmetic, English grammar, modern geography, history of the United States, physiology and hygiene, and in the theory and practice of teaching; and if convinced that such persons are of good moral character and are competent to teach successfully the foregoing branches, he shall give such persons certificates ranking in grade to correspond with the relative qualifications of the applicants according to the standard adopted; but he shall not license any person to teach who is given to profanity, drunkenness, gambling, licentiousness, or other demoralizing vices or who does not believe in the existence of a Supreme Being; nor shall he be required to give private examinations. He may cite to reexamination any person holding a license and under contract to teach any free school in his county, and on being satisfied by reexamination or by other means that such person does not sustain a good moral character or that he has not sufficient learning and ability to render him a competent teacher, he may, for these and other adequate causes, revoke the license of such person, and in case of such revocation he shall immediately give notice to such teacher and the directors and thereby terminate the contract between said parties, but the wages of such teacher shall be paid for the time he shall have actually taught prior to the day on which he received notice of the revocation of his license.

In addition to the branches now prescribed by law to be taught in the common schools of the State, it is hereby made the duty of the county examiner of the several counties of the State to examine all persons applying for examination and license to teach in such schools as to their knowledge and proficiency in the method of designating and reading the survey of the lands of this State by ranges, townships, and sections and parts of sections, as surveyed, platted, and designated by the Government of the United States, and no such applicant shall be authorized or licensed to teach in any of such schools unless found upon such examination proficient in the method of designating and reading land surveys, as in this act provided; and it is hereby made the duty and specially imposed upon all persons teaching in the public schools of this State to teach and impart the instruction here provided for whenever practicable to do so, and a willful neglect or failure to discharge the duties by this act imposed shall be deemed sufficient cause for the revocation of license to teach. The examiner shall issue three grades of certificates, respectively, certificates of the first, and of the second, and of the third grades. Certificates of the first grade shall be valid in the county for which they were issued for two years. Those of the second grade shall be valid in the county for which they were issued for one year. Those of the third grade shall be valid in the county six months. But he shall not renew any certificate or grant a license without an examination of the applicant with reference thereto.

Every applicant for examination shall pay $2, which shall go to pay or toward paying the examiner's salary, as fixed by the county judge.

Every teacher shall keep a daily register of his school in the manner prescribed by law, and indicated by the blank school register to be furnished by the director at the commencement of his school.

It shall be the duty of each and every teacher to attend one teachers' institute, and no teacher, when attending an examination for license or one institute, shall be charged for loss of time while necessarily absent from his school to attend such examination or institute.

No teacher shall be entitled to the last month's pay for any school taught by him until he shall have returned to the directors of the district in which such

school was taught the daily register furnished him, with all statistical work which teachers are by law required to perform, perfected and complete, and no director shall otherwise issue an order for such last month's pay.

Meetings.—The State superintendent shall annually hold a teachers' institute in each judicial district of the State. [This law is practically nullified by the "county institute" law which follows.]

The State superintendent is authorized to arrange for the holding of county normal institutes for the white teachers of Arkansas for such white persons as desire to become teachers in the public schools, and another institute, at time and place set by him, for colored persons.

The course of study shall consist of a thorough drill in the principles of the common-school branches, history and constitution of Arkansas, and such pedagogical instruction as shall fully develop the teachers' professional, general, moral, and social preparation for work in the public schools, special attention being given to organization, classification, use of text-books, etc. The session of these institutes is to continue twenty days. For the purpose of carrying this law into effect $10.000 is appropriated for the years 1895 and 1896.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—The district board shall make provision for establishing separate schools for the white children and the colored children of school age and shall adopt such other measures as they may judge expedient for carrying the free-school system into uniform operation throughout the State and providing as nearly as possible for the education of every youth 6 to 21 years of age for at least three months in the year. In special districts schools shall be kept open at least three but not more than ten months.

Character of instruction.—The board of directors in special districts may establish primary, graded, or high schools and employ a superintendent. [Reference is made to the studies in which teachers are required to be examined or the text-books used as indicating the branches taught in the public schools.]

Text-books.—The State superintendent shall prepare, for the benefit of the common schools of the State, a list of text-books on orthography, reading in English, mental and written arithmetic, penmanship, English grammar, modern geography, and history of the United States as are best adapted to the wants of the learner and as have been prepared with reference to the most philosophical methods of teaching those branches, and shall recommend the said text-books to teachers and to directors throughout the State.

The directors of each school district in this State shall adopt and cause to be used in the public schools, in their respective districts, one series of text-books in each branch or science taught on the public schools of their respective districts, and no change in these books shall be made for a period of three years unless it be by a petition of a majority of the voters of the district desiring the change.

Buildings.—The directors have the care and custody of the district school property and shall acquire or sell property when directed by a majority of the electors, in districts not organized under the law establishing special districts.

Any person who shall willfully destroy or injure any building used as a schoolhouse or for other educational purposes, or any furniture, fixtures, or apparatus thereto belonging, or who shall deface, mar, or disfigure any such building, furniture, or fixtures, by writing, cutting, painting, or posting thereon any likeness, figure, words, or device without the consent of the teacher or other person having control of such house, furniture, or fixtures shall be fined in a sum double the value of any such building, furniture, fixtures, or apparatus so destroyed, and shall be fined in a sum not less than $10 nor more than $50 for each offense for writing, painting, cutting, or pasting in any such building, furniture, or fixtures any such words, figures, likeness, or device, to be recovered by civil action in any court of competent jurisdiction, and this punishment is not in lieu of that provided by the statutes for such offenses.

4. Finance.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The proceeds of all lands that have been or hereafter may be granted by the United States to this State, and not otherwise appropriated by the United States or this State; also moneys, stocks, bonds, lands, and other property now belonging to any fund for purposes of education; also the net

proceeds of all sales of lands and other property and effects that may accrue to this State by escheat, or from sales of estrays, or from unclaimed dividends, or distributive shares of estates of deceased persons; also any proceeds of the sale of public lands which may have been or may be hereafter paid over to the State (Congress consenting); also 10 per cent of the net proceeds of the sales of all State lands; also all grants, gifts, or devises that may have been or hereafter may be made to this State, and not otherwise appropriated by the tenure of the grant, gift, or devise, shall be securely invested and sacredly preserved as a public fund that shall be designated as the "common school fund" of the State, and which shall be the common property of the State, except the proceeds arising from the sale or lease of the sixteenth section, the principal of which shall never be apportioned or used.

The annual income from said fund, together with $1 per capita annually assessed on every male inhabitant over the age of 21 years, and so much of the ordinary annual revenue of the State as may hereafter be set apart by law for such purpose, shall be faithfully appropriated for maintaining a system of free common schools for this State, and shall be appropriated to no other purpose whatsoever. The State auditor shall, on requisition from the State superintendent of public instruction, draw warrants on the State treasurer for payment to the several county treasurers of the school revenues due their respective counties

The management of the common-school fund shall be vested in a board of commissioners of the school fund, composed of the secretary of state, the auditor, and State superintendent of public instruction.

Taxation.—The general assembly shall provide by general laws for the support of common schools by taxes, which shall never exceed in any one year 2 mills on the dollar on taxable property, and a per capita tax of $1 on every male inhabitant of the State over 21, provided it may authorize school districts to levy a tax not to exceed 5 mills on the dollar in any one year for school expenses. [See District board of directors under Organization of system.]

TEXAS.

1. Organization of the System.

State board of education.—State superintendent.—State board of examiners.—County superintendent.—County board of examiners.—School district committee.—City board of examiners.

State board of education.—The governor, secretary of state, and comptroller shall constitute a State board of education, of which the State superintendent shall be secretary. The board shall make an apportionment of the available school fund among the several counties of the State and the cities and towns having separate school organizations, according to the population of each.

State board of examiners.—The State superintendent may appoint a State board of examiners, consisting of three or more competent teachers, to serve at his pleasure.

State superintendent of public instruction.—There shall be elected at each general election for State and county officers a State superintendent of public instruction, who shall hold his office for two years and receive a salary of $2,500, and may employ such clerical assistance as may be allowed by the State board. He shall be charged with the administration of the school law and a general superintendency of the business relating to the public schools of the State, shall hear all appeals, prescribe and furnish suitable forms for records and reports, issue circulars of instruction to school officers, and examine and approve all accounts of whatsoever kind against the school fund.

County board of examiners.—There shall be a county board of examiners of three members, appointed by the county superintendent, or by the county judge if there be no superintendent, each of whom must hold a first or higher grade certificate of the county. They serve during the pleasure of the county superintendent.

County superintendent.—The commissioners' court of any county may provide for the election of a county superintendent of public schools, who shall hold for two years, be a person of educational attainments, good moral character and executive ability, a qualified voter of said county, and the holder of a first-grade teacher's certificate. He shall have the immediate supervision of all matters pertaining to public education, shall confer with teachers, deliver lectures, hold institutes, approve all vouchers drawn against the school fund, examine contracts made by trustees with teachers and, if proper, approve them, distribute blank books and forms, and appoint the county board of examiners. In counties having

a school population of 2,000 and not exceeding 3,000, the county superintendent shall receive $800 per annum, in counties of 3,000 to 4,000 he shall receive $900, in counties of 4,000 to 5,000 he shall receive $1,000, in counties of 5,000 or more he shall receive $1,200. In counties having no county superintendent the county judge shall act.

District school trustees.—It is the duty of the county commissioners' court to subdivide their county into school districts as convenient as possible for the attendance of the children at the school or schools to be established therein. The voters of the district shall elect three trustees for said districts, one to retire annually. They shall determine the number of schools and their location, and when they shall be opened and when closed, contract with teachers, and manage and supervise the schools. They shall approve all teachers' vouchers and all other claims against the school fund of their district, and shall have the power to admit pupils over and under scholastic age. They shall take the district census, and for each name taken shall be paid 5 cents.

When a town or village contains more than 200 and fewer than 10,000 it may vote to incorporate itself, as a town or village, in the manner prescribed by law for the incorporation of towns and villages, provided that the incorporated territory shall not exceed a territory of 16 square miles. For such incorporated places there shall be elected five trustees for the period for which the other municipal officers are chosen, and shall in general be vested with all the powers, rights, and duties in regard to the establishment and maintaining of free schools, including the powers of taxation as vested in the council or board of aldermen of incorporated cities and towns.

The cities and towns in the State are authorized to assume exclusive control of all the public schools within their limits and to govern them in any way not inconsistent with the laws, to elect or the council to appoint a board of trustees of six to hold for four years, three to retire biennially. No compensation is allowed them.

City boards of examiners.—Cities and towns of 500 inhabitants of school age, which are independent districts having a superintendent, may have a board of examiners.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—Any teacher desiring to teach in any city, town, or district in the State shall, before contracting with any board of trustees or school board, exhibit a teacher's certificate, and anyone who teaches in any public school of this State without a valid certificate shall not be paid from the free-school funds, and forgery of a certificate shall be punished by confinement in the penitentiary for a term of not less than two nor more than seven years. Applicants for examination must apply to the county superintendent, stating class of certificate desired, and by him is sent to the board of county examiners, the applicant having been satisfactory to the county superintendent and having deposited $3 as an examination fee. The applicant must speak the English language fluently, and be of good moral character. Certificates granted are of three kinds, as follows: A county certificate valid only within the county; a city certificate valid only within the city; a State certificate to be valid anywhere within the State. County certificates shall be of four classes, as follows: First, second, third grades, and permanent, and are issued by the county superintendents on recommendation of the county board of examiners, which shall hold an examination during every month except January, March, May, and July. The questions are furnished by the State superintendent, and the rules and regulations are prescribed by him and the county superintendent. An applicant for a third-grade certificate shall be examined in spelling, writing, arithmetic, English grammar, geography, Texas history, elementary physiology, and hygiene, and the laws of health with special reference to narcotics, and school management and methods of teaching, and must, in order to obtain a certificate, make an average of not less than 70 nor less than 50 on any grade. An applicant for second-grade certificate shall be examined on the five mentioned subjects, and in addition United States history, elementary principles of civil government, English composition, physiology and hygiene, and physical geography. The second-grade certificate is good for two years, and the applicant must make 75 on all and not less than 50 on any one subject, but if he make 85 instead of 75 the certificate is good for four years. An applicant for the first-grade certificate shall be examined in the subjects prescribed for the second grade, and in addition in physics, algebra, elements of geometry, the Constitutions

of the United States and the State of Texas, and in the elements of mental and moral science, and the effects of tobacco and alcoholic intoxicants upon the human system. The certificate is valid for four years (if continuous), and to obtain it the applicant must make an average of not less than 85 in general and 50 in any particular subject, but is valid for two years if only 75 instead of 85 is obtained. An applicant for a permanent certificate shall be examined on the subjects required for a first-grade certificate, and in addition the history of education, psychology, English and American literature, chemistry, solid geometry, plane trigonometry, and elementary double-entry bookkeeping. The general average required to pass for a permanent certificate is 85 and not less than 60 in any subject. The certificate lapses if the holder withdraws three continuous years from teaching. A local permanent certificate may be given to meritorious teachers of five years of continuous work in the public schools of the county of the grade held at the time. On application of a candidate for a first or second grade or a permanent certificate the county superintendent shall forward the papers to the State superintendent, who will lay them before the State board of examiners, together with the fee of $1 furnished by the candidate, and if they find the papers rightly graded they shall recommend that the candidate be given a new certificate in lieu of his county certificate, which shall entitle him to teach in any county.

City boards of examiners may issue certificates of two kinds, a temporary and a permanent certificate, and of three classes for each kind: Primary teacher's certificate, intermediate teacher's certificate, and high-school teacher's certificate. A temporary certificate is good for four or fewer years, and a permanent certificate during good behavior. The force of the normal-school certificate is given below.

It shall be the duty of every teacher to use the English language exclusively in the free public schools, though any other language may be taught as a branch of study; to attend summer normals and county institutes as far as possible; to keep daily registers in which the names, ages, and studies of the pupils and their attendance shall be recorded, and such other matters as may be prescribed by the State superintendent; to make monthly reports upon such subjects as may be designated by the State or county superintendent, which are to be approved by the trustees. They shall also make such reports at the end of the term as may he prescribed by the State superintendent, and until made their last month's salary shall not be paid.

Preliminary training.—Normal instruction for white persons shall be given in the Sam Houston and for colored persons in the Prairie View Normal School. The white school under the supervision of the board of education offers two scholarships for every senatorial district to persons 16 or over who sign a written statement that it is their intention to teach at least one year after leaving the school; the normal school for colored persons 16 or over, one from each senatorial district and three at large. The school is under the immediate authority of the board of directors of the Agricultural and Mechanical College of Texas. University diplomas given by the University of Texas to students completing the degree course in pedagogy or some other course shall have the force of permanent State certificates. Those showing completion of the special professional course shall have the force of first-grade State certificates; those showing completion of the course in elementary pedagogy shall have the force of State certificates of the first grade for a period of two years. Any teacher of three years' standing in Texas who is a degree man of a university or college of standing may receive a permanent State certificate. Those holding a diploma from a Texas State normal school, or from the Peabody Normal School, or the North Texas College, or Coronal Institute may teach in the public schools as being entitled to a permanent State certificate without examination.

Normal institutes and meetings.—The State superintendent shall prescribe regulations for holding summer normal institutes and prescribe rules for granting summer normal certificates, which shall be State certificates, good for four years. The county superintendent shall organize and hold, with such assistance as may be necessary, at least three or more institutes of two days each during the year, and failure to conform to this will cause his removal. It is the duty of all teachers in the public schools in the State to attend the summer normals and county institutes as far as possible.

3. Schools.

Attendance.—Character of instruction.—Buildings.

Attendance.—The children of the white and colored races shall be taught in separate schools, and in no case shall any school consisting of partly white and partly of colored or mixed blood receive any aid from the public-school fund. All

children over 8 years of age and under 17, at the beginning of any scholastic year, shall be entitled to the benefit of the public-school fund for that year for the period of six months at least.

Character of instruction.—There shall be taught in the public schools orthography, reading in English, penmanship, arithmetic, English grammar, modern geography, composition, physiology and hygiene, including the effects of alcoholic stimulants and narcotics on the human system, and other branches as may be agreed on by the trustees or directed by the State superintendent.

Buildings.—When a school district has no schoolhouse or an insufficient number, or those it has are in need of repairs or furniture, the trustees may contract for the building, repairing, or furnishing required, and may use not more that 25 per cent annually of the school fund of the district for a period of five years, provided that in case a house is to be erected the citizens must furnish in labor or means an amount equal to one-third of the school fund to be so used, and a suitable piece of land shall be donated as a site. But if the people of the district tax themselves for the purpose of erecting the building required, the tax to be devoted exclusively to building, and so much of the available school fund of any year, not to exceed 25 per cent, as the county superintendent may deem expedient, may be used in the purchase of suitable school property. The trustees may rent or lease a suitable building.

4. Finances.

Funds (permanent and special).—Taxation.

Funds (permanent and special).—All funds, lands, and other property heretofore set apart and appropriated for the support of the public schools, all the alternate sections of lands reserved by the State out of grants heretofore made, or that hereafter may be made, to railroads or other corporations of any nature whatsoever, one-half of the public domain of the State, and all sums of money that may come to the State from the sale of any portion of the same, shall constitute a perpetual public-school fund. The interest arising from the fund and the taxes [State] herein authorized shall be the available school fund, to which the legislature may add not exceeding 1 per cent annually of the total value of the permanent school fund. The available school fund shall be distributed to the several counties according to the scholastic population.

Taxation.—One-fourth of the revenue derived from the State occupation taxes and a poll tax of $1 on every male inhabitant 21 to 60 years of age shall be set apart annually for the benefit of public free schools, and in addition thereto there shall be levied and collected an annual ad valorem State tax of such an amount, not to exceed 20 cents on the $100, as with the available school fund income will be sufficient to maintain and support the public free schools for a period not less than six months in each year; and the legislature may authorize the school districts to raise an additional ad valorem tax, to be levied and collected within such districts, for the further maintenance of the public schools and the erection of school buildings therein, provided that two-thirds of the taxpayers shall vote such tax, not to exceed in any one year 20 cents on the $100; but this limitation does not apply to incorporated cities or towns constituting separate or independent school districts.

OHIO.

1. Organization of the System.

State commissioner.—State board of examiners.—State text-book board.—County board of examiners.—Board of education.—City and village examiners.—City superintendent.—Truant officer.

State commissioner of common schools.—There shall be elected at the general election for State officers a State commissioner of common schools, who shall hold office for three years, a vacancy to be filled by the governor. He shall give bond to the amount of $5,000, with two or more sureties, and shall keep official books and papers at his office at the capital, where he shall be in attendance not fewer than ten months, except when absent on public business. He shall visit annually each judicial district of the State, superintending and encouraging teachers' institutes, conferring with boards of education or other school officers, counseling teachers, visiting schools, and delivering lectures on topics calculated to subserve the interests of popular education; shall secure the safety and proper application of State educational funds, and may require all persons having charge of

the same to account to him; shall prescribe suitable forms and regulations for making all reports and conducting all necessary proceedings under the school laws, and shall transmit them to the local officers with instructions; shall prepare as many copies of the school laws as are necessary and distribute them; shall make an annual report to the general assembly, or when that body is not in session to the governor; send a copy to the legislature when it convenes. In his report he shall give the condition and amount of all funds and property appropriated to education, the number of common schools, the number, by sex, attending them, and the branches taught, the number of private and select schools in the State, and their attendance, by sex, and the branches taught. He shall also give the number of teachers' institutes, the attendance thereat and the number of instructors, and the amount paid to each, the estimated cost of the schools and the accounts of the expenditures of every description, plans for the management and improvement of common schools, and such other information as he may deem of importance. He shall annually require of the president, manager, or principal of every seminary, academy, and private school a report of such facts, arranged on such form as he shall furnish.

State board of examiners.—There shall be a State board of examiners, which shall consist of five competent persons, residents of the State, to be appointed by the State commissioner for five years, not more than three of whom shall belong to the same political party, one member to retire annually. Each member shall receive $5 per diem of actual service and 6 cents mileage each way from his residence and back.

State text-book board.—(See Schools, Text-books.)

County boards of examiners.—There shall be a county board of examiners, to consist of three competent persons, to be appointed for three years by the probate judge. Two members shall have had at least two years' experience as teachers, and shall be or shall have been within five years actual teachers in properly recognized schools. They shall all be residents of the county for which they are appointed, and shall not be connected with or interested in any school for the special education or training of persons for teachers, or any other private school, or be employed as instructor in any institute in his own county; and violation of these provisions vacates the office held by the offender. A clerk shall be appointed from the members, who shall keep a record of the proceedings, of the certificates issued, and report to the State commissioner annually. Each board shall fix upon the time and place for holding meetings for the examination of applicants for certificates.

Board of education.—The State is divided into school districts, to be styled, respectively, city districts of the first grade of the first class, of the second grade of first class, city districts of the first class, city districts of the second class, village districts, special districts, and township districts. Each city having a population of 250,000 or more, including the territory annexed to it for school purposes and excluding that detached from it for school purposes, shall constitute a city district of the first grade of the first class; each city having a population of 150,000 to 250,000 shall constitute a city district of the second grade of the first class, and each city having a population of 10,000 to 150,000 shall constitute a city district of the first class; each city of the second class having a population of fewer than 10,000 shall constitute a school district to be styled a city district of the second class; each village shall constitute a school district to be styled a village district; each organized township, exclusive of any of its territory included in a city, village, or special district, shall constitute a school district to be styled a township district. All other legally constituted districts shall be styled special districts.

In city districts of the first grade of the first class the board of education shall consist of one member from each ward, who shall be an elector and shall hold for two years. But the members of such board shall not as individuals or as local committees exercise supervisory authority over the schools in the several wards or districts, or have the selection or nomination of teachers. The board shall hold regular meetings once every two weeks.

Boards of education in city districts of the second grade of the first-class shall consist of a school council of 7 and a school director, and shall organize by electing one of its members president and a nonmember clerk, whose salary shall not exceed $2,000 per annum. The members shall be elected biennially, one group retiring annually. The council has legislative power and authority in regard to school affairs within its district, but no resolution levying a tax shall be adopted unless the resolution, together with the estimates on which the same is based, has been submitted to and approved by the board of tax commissioners in the city coextensive with or partly lying in the district. Every resolution involving an expenditure of money or the approval of a contract for the payment of money or the purchase, sale, lease, or transfer of property, or levying any tax, or for the

change or adoption of any text-book, shall before it takes effect be presented, duly certified by the clerk to the school director, who shall sign it or return it to the council at its next meeting, and on his failure to return it as above directed the measure shall become a law; but he may approve or disapprove any part of a resolution appropriating money if the item has no bearing or connection with any other part of such resolution, and the council may override his objections by a two-thirds vote. The council shall have power to provide for the appointment of all necessary teachers and employees, to prescribe their duties, and fix their compensation.

In city districts of the second class and in village districts the board of education shall consist of 6 members, except in districts organized under a law providing for only 3 members, unless such districts elect to have 6 members: but the electors of any city district of the second class may vote that the board shall consist of as many members as the city has wards, in which case a member shall biennially be elected in each ward. In other city districts of the second class the members shall be elected to serve for three years, 2 members to retire annually if composed of 6, 1 member to retire annually if composed of 3 members.

In village districts members of the board of education shall be elected for a term of three years, 1 to retire annually, but the district may vote to increase the membership to 6, when 2 shall retire annually.

The board of education of each township district divided into subdistricts shall consist of the township clerk and one director elected for a term of three years from each subdistrict, the township clerk being ex officio clerk of the board, but having no vote except in case of a tie. The directors thus elected shall be divided into three classes, one class to retire annually. The board shall hold regular sessions on the third Monday of April, June, August, October, December, and February, and may hold special meetings. The board may at any regular session increase or diminish the number or change the boundaries of subdistricts, but no subdistrict shall contain fewer than 60 resident scholars, except where the board deems it necessary to reduce the number.

The board of education of each special district shall consist of 3 resident members having the qualifications of electors, but the electors may vote that the membership be increased to 6, one-third of the board to retire annually.

When the better accommodation of scholars makes it desirable to form a subdistrict composed of parts of two or more townships, the boards of education of the townships interested may by mutual agreement at a joint meeting, or by three special commissioners, establish the same, the school being under the control of the board of education of the township in which the school is situated.

The boards of education of all districts are bodies politic and corporate, but when a board of education decides to dispose of any property held by it in its corporate capacity, exceeding $300 in value, it shall sell the same at auction after thirty days or more notice by advertisement in a newspaper and placard. All property vested in any board of education shall be exempt from tax, sale on execution, or other similar writ. Each board shall organize by choosing one of its members president, and, excepting township boards, by choosing also a clerk, who may or may not be a member. Vacancies are to be filled by the board. A majority of the board of education shall constitute a quorum. The board shall make such rules as it may deem expedient for its own government and of its appointees and the pupils, and shall make and enforce rules for the vaccination of those attending school.

The board of education of each district shall make a report to the county auditor containing a statement of the receipts and expenditures of the board, the number of schools sustained, the length of time such schools were sustained, the enrollment of pupils, the average monthly enrollment, the average daily attendance, the number of teachers employed and their salaries, the number of schoolhouses and schoolrooms, and such other items as the commissioners of common schools may require.

City and village examiners.—There shall be a board of examiners of 3 or 6 persons for each city district of the first class, to be appointed by the board of education of the district. Two of the persons appointed shall have at least two years' practical experience in teaching and shall otherwise be competent for the position and residents of the district for which they were appointed.

City superintendents.—Each board of education shall have the management and control of the public schools of the district with full power to appoint a superintendent and assistant superintendent of the schools, and a superintendent of buildings, whose salaries may be increased, but shall not be diminished, during the term for which the appointment is made.

Truant officer.—(See Schools, attendance.)

2. Teachers.

Appointments, qualifications, and duties.—Meetings.

Appointment, qualifications, and duties.—No person shall be employed as a teacher in a common school who has not obtained from a board of examiners having competent jurisdiction a certificate of good moral character, stating that the holder is qualified to teach orthography, reading, writing, arithmetic, geography, English grammar, and the history of the United States, physiology and hygiene, and possesses an adequate knowledge of the theory and practice of teaching, and if required to teach other branches that the requisite qualifications are possessed, but persons who desire or are expected to teach only special studies, such as music, drawing, painting, penmanship, gymnastics, German or French, or any one of them, or the primary department in any graded school, may be examined in regard to such study or studies, or their special qualifications to teach in a primary department only. The secretary of the State board of examiners and the State commissioner shall prepare a series of questions for each examination to be used in each county for the examination of teachers, which are to be opened in the presence of a majority of the examining board on the day and hour of examination.

The State board of examiners may issue three grades of life certificates to such as are found to possess the requisite scholarship and who exhibit satisfactory evidence of good moral character and professional experience and ability. The certificates shall be for different grades of schools, according to branches taught, and shall be valid in schools specified therein. Each applicant for a certificate shall pay to the board of examiners a fee of $5. The board of county examiners may grant certificates for one, two, and three years, valid in the county wherein they are issued, except in city and village districts that have boards of examiners. The examiners may grant certificates for five years to such applicants as in addition to the necessary qualifications have been for three years next preceding their application engaged in teaching, twelve months of which experience shall have been in one place, and such certificate shall be renewable upon the same conditions but without examination, at the direction of the examining board. Each board of education shall have full power to appoint teachers, janitors, and other employees and fix their salaries, which may be increased but not diminished during the term for which the appointment is made, but no person shall be appointed for a longer time than that for which a member of the board is elected nor dismissed except for cause.

It shall be the duty of all principals and teachers of all schools, public, private, and parochial, to report to the clerk of the board of education the name, age, and residence of every pupil in attendance at their schools, together with such other facts as the clerk may require to facilitate the enforcement of the compulsory-attendance law. Principals and teachers shall report to the truant officer, the superintendent of schools, or the clerk of the board all cases of truancy or incorrigibility. No clerk of a board of education shall draw an order on the treasurer for the payment of a teacher for services until the teacher files with him such reports as are required by the State commissioner and the board of education. All teachers of common schools within any county in which a county institute is held, except those employed in city districts of the first class, may dismiss their schools for the purpose of attending during the week it is held, and boards of education of city districts of the first class within counties having an institute may, by resolution, permit teachers to attend, but no union or graded school shall be dismissed for such purpose unless a majority of its teachers assent. Teachers may suspend pupil until the meeting of the board.

Preliminary training.—A teachers' institute may be organized in any county by the association of not fewer than 30 practical teachers of common schools residing therein who shall declare their intention in writing to attend such institute, the purpose of which shall be the improvement of such teachers in their professional qualifications. Each institute shall elect annually by ballot a president, secretary, and an executive committee to manage the affairs of the institute, which committee shall enter into a bond with sufficient surety, to double the amount of the institute fund in the county treasury, conditioned on the proper employment of the money and on reporting to the State commissioner within five days after the adjournment of the institute the number of teachers in attendance, the names of the instructors and lecturers, the amount of money received and disbursed by the committee, and such other information relating to the institute as the commissioner may require; and failure to make such report shall cause the committee to forfeit to the State $50. When a teachers' institute has not been held for two years in any county, the State commissioner may cause an institute

to be held. The board of education of each city district of the first class may provide for holding an institute yearly for the improvement of their teachers; and general meetings of the teachers of any such city district held not fewer than four days in any year, whether consecutive or not, for the purposes of instruction, shall be deemed to constitute a teachers' institute and shall be sustained out of the institute fund, and if the board of any district does not provide for such institute in any year it shall cause the institute fund to be paid to the treasurer of the county, who shall place it to the credit of the county institute fund; and under such circumstances the teachers in the schools of such district shall be entitled to the advantages of the county institute. An association of teachers of several adjacent counties may organize an institute for the specific purpose of providing for the professional instruction of the teachers of the graded schools in such counties, and the boards of all city, village, and special districts within such counties may contribute from the institute and contingent funds under their control to defray the expenses and may permit teachers employed by them to attend the institute one week. All other institutes shall continue at least four days.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—The schools of each district shall be free to all youth between 6 and 21 years of age who are children, wards, or apprentices of actual residents of the district. All parents, guardians, and other persons who have care of children shall instruct them, or cause them to be instructed, in reading, spelling, writing, English grammar, geography, and arithmetic. Every parent, guardian, or other person having charge of any child between the ages of 8 and 14 years shall send such child to a public, private, or parochial school for the following period: In city districts, in each school year, beginning September 1, not fewer than twenty weeks, at least ten weeks of which, commencing within the first four weeks of the school year, shall be consecutive; and in special, village, and township districts not fewer than sixteen weeks in each school year, eight of which, commencing in the first four weeks of the school year, shall be consecutive, unless the child is excused from such attendance by the superintendent of the public schools in city or other districts having such superintendent, or by the clerk of the board of education in districts having no superintendent, or by the principal of the private or parochial school, upon a satisfactory showing either that the bodily or mental condition of the child does not permit of its attendance at school or that the child is being instructed at home by a person qualified, in the opinion of the superintendent of schools in districts having that officer or by the clerk of the board of education in other districts, to teach the required branches, but in case of refusal to excuse attendance an appeal may be made to the probate judge of the county, upon the giving a bond within ten days after such refusal. All children between the ages of 8 to 16 years not engaged in some regular employment shall attend school for the full term of the school district in which they reside that are in session during the school year.

No child under the age of 14 shall be employed by any person, company, or corporation during the school term; shall attend school at least one-half of each day or attend a public night school, or take regular private instruction from some person qualified, in the opinion of the superintendent of schools or of the clerk of the board of education in districts having no superintendent, to teach such branches until such minor obtain a certificate from such superintendent or clerk that he or she can read at sight and write legibly simple sentences in the English language. Every person, company, or corporation employing or having in employment any such minor shall exact the school attendance or instruction required as a condition of employment and shall, on request of the truant officer, furnish evidence that such minor is complying with the requirements of the enforced-attendance law. Every person, company, or corporation which employs or has in employment any such minor without exacting the school attendance or instruction mentioned above, or employs or has in employment any such minor who is not complying with the requirements of this section shall be fined not fewer than $25 nor more than $50, provided that any employer may, with the approval of the superintendent or clerk above mentioned, make provision for the private instruction of such minors in his employ.

Every child between the ages of 8 and 14 years and every child between the ages of 14 and 16 years unable to read and write the English language or not engaged in some regular employment who is an habitual truant from school, or who absents itself habitually from school, or who while in attendance at any public, private, or

parochial school is incorrigible, vicious, or immoral in conduct, or who habitually wanders about the streets and public places during school hours, having no business or lawful occupation, shall be deemed a juvenile disorderly person and be subject to the provisions of this act for enforced attendance.

To aid in the enforcement of the law in regard to attendance, truant officers shall be appointed and employed as follows: In city districts the board of education shall appoint and employ one or more truant officers; in special, village, and township districts the boards of education shall appoint a constable or other person as truant officer. The compensation of the truant officer shall be fixed by the board appointing him. The truant officer shall be vested with police powers and shall have authority to enter workshops, factories, stores, and all other places where children may be employed and do whatever may be necessary in the way of investigation or otherwise to enforce this act. The truant officer shall institute proceedings against any officer, parent, guardian, person, or corporation violating the law regarding attendance at school, and shall otherwise discharge the duties prescribed in this act and perform such other services as the superintendent of schools or the board of education may deem necessary to preserve the morals and secure the good conduct of school children and to enforce the law. The truant officer shall keep a record of his transactions for the inspection and information of the superintendent of schools and the board of education, and shall make daily reports to the superintendent of schools during the school term in cities and to the clerk of the board of education as often as required by him in special, village, and township districts, suitable blanks being furnished him.

It shall be the duty of all principals and teachers of all schools, public, private, and parochial, to report to the clerk of the board of education of the city, special, village, or township district in which the schools are situated, the name, age, and residence of every pupil in attendance, together with such other facts as the clerk may require in order to facilitate the execution of the law regarding attendance, and the clerk shall furnish blanks for such purpose, and such report shall be made in the last week of September, December, February, and April of each year. It shall be the further duty of such principals and teachers to report to the truant officer, the superintendent of public schools, or the clerk of the board of education all cases of truancy or incorrigibility in their respective schools as soon as practicable after the offense has been committed.

On the request of the superintendent of schools or the board of education, or when it otherwise comes to his notice, the truant officer shall examine into any case of truancy within his district and warn the truant and its parents, guardian, or other person in charge, in writing, of the final consequences of truancy if persisted in. When any child between the ages of 8 and 14 years or 14 and 16 years who can not read and write the English language or is not engaged in some regular employment, or any child between the ages of 14 and 16 who has been discharged from employment to obtain instruction at school is not attending school, without lawful excuse and in violation of the law, the truant officer shall notify the parent, guardian, or other person in charge of such child of that fact, and require such parent, guardian, or other person in charge to cause the child to attend some recognized school within five days from the date of the notice; and it shall be the duty of the parent, guardian, or other person in charge of the child so to cause its attendance at some recognized school. Upon failure to do so the truant officer shall make complaint against the parent, guardian, or other person in charge of the child in any court of competent jurisdiction in the city, special, village, or township district in which the offense occurs. For such failure and upon conviction the parent, guardian, or other person in charge shall be fined not fewer than $5 nor more than $20, or the court may in its discretion require the person so convicted to give a bond in the penal sum of $100, with sureties, to the approval of the court, conditioned that he or she will cause the child under his or her charge to attend some recognized school within five days thereafter, and to remain at such school during the term prescribed by law; and upon the failure or refusal of any such parent, guardian, or other person to pay said fine or furnish said bond according to the order of the court, then said parent, guardian, or other person shall be imprisoned in the county jail not fewer than ten nor more than thirty days.

If the parent, guardian, or other person in charge of any child shall, upon the complaint under the provision immediately preceding, for failure to cause the child to attend a recognized school, prove inability to do so, then he or she shall be discharged, and thereupon the truant officer shall make complaint that the child is a juvenile disorderly person. If such complaint be made before any mayor or justice of the peace it shall be certified by such magistrate to the probate judge. The probate judge shall hear such complaint, and if he determine that the child is a juvenile disorderly person within the meaning of the provision regarding habitual

truants or incorrigible, vicious, and immoral children 8 to 16 years of age, he shall commit the child if under 10 years of age and if eligible for admission to a children's home, or if not eligible then to a house of refuge, if there be one in the county, or the boys' industrial school or the girls' industrial home, or some other juvenile reformatory. No child over 10 years of age shall be committed to a county children's home, and any child committed to a children's home may on the request of trustees of such home, and on its being shown that it is vicious and incorrigible, be transferred by the probate judge to the boys' industrial school or the girls' industrial home. A child committed to any juvenile reformatory under the law requiring attendance shall not be retained there beyond the age of 16 years, and may not be discharged sooner by the trustees under the restrictions applicable to other inmates. Any order of commitment to a juvenile reformatory may be suspended in the discretion of the probate judge for such time as the child may regularly attend school and properly conduct itself. The expense incurred in the transportation of a child to a juvenile reformatory and the costs in the case in which the order of commitment is made shall be paid by the county from which the child is committed after the manner provided in section 759 of the revised statutes: *Provided further*, That if for any cause the parent, guardian, or other person in charge of any juvenile disorderly person shall fail to cause such person to attend school, then complaint against such juvenile disorderly person shall be made, heard, and determined in like manner as provided in each case the parent proves inability to cause such juvenile disorderly person to attend school.

When any truant officer is satisfied that any child compelled to attend school is unable to because absolutely required to work at home or elsewhere in order to support itself or help support or care for others legally entitled to its services who are unable to support or care for themselves, the truant officer shall report the case to the authorities charged with the relief of the poor, who shall thereupon, if the case be a meritorious one, afford such relief as will enable the child to attend school the time each year required under this act. Such child shall not be considered or declared a pauper by reason of the acceptance of the relief herein provided for. In case the child or its parents or guardian refuse or neglect to take advantage of provisions thus made for its instruction, such child may be committed to a children's home or juvenile reformatory. Boards of education, in urgent and deserving cases where no other relief is available and where neither parents nor child are at fault, may make suitable temporary arrangements for the instruction of the child described in this section either at home or at school, and for such purpose may incur necessary expense, to be paid out of the school funds of the district.

The provisions of this act shall apply to children entitled, under existing statutes, to attend school at the institution for the deaf and for the blind.

Any officer, principal, teacher, or person mentioned in the act for enforced attendance neglecting to perform any duty imposed upon him shall be fined not fewer than $25 nor more than $50 for each offense. Any officer or agent of any corporation violating any provision of this act, who participates or acquiesces in or is cognizant of such violation, shall be fined not fewer than $25 nor more than $50. Any person who violates any provision of the act for enforced attendance, for which a penalty is not elsewhere provided, shall be fined not more than $50. Mayors, justices of the peace, and probate judges shall have jurisdiction to try the offenses described in this act, and their judgment shall be final. When complaint is made, information filed, or indictment found against any corporation for violating any provision of the law for enforced attendance, summons shall be served, appearance made, or plea entered, as provided in section 7231, Revised Statutes, except that in complaints before magistrates service shall be made by the constable. In every case of complaint against a child involving commitment to any children's home or juvenile reformatory, the board of county visitors shall be notified and must attend and protect the interests of the child on the hearing, as provided in the act of March 29, 1892, and the order of the commitment of the child to a State reformatory must show that the county visitors were so notified and attended the hearing.

Every person who after being once convicted for violating any of the provisions of the law for enforced attendance shall be convicted of again violating them or any of them may, in addition to the punishment by way of a fine elsewhere provided for, be imprisoned not fewer than ten days nor more than thirty days. On complaint before a mayor or justice of the peace of a second violation of this act, involving the punishment of imprisonment, if a trial by jury be not waived, a jury shall be chosen and the case tried after the manner provided in section 3718a, revised statutes.

This law shall not be operative in any school district where there are not sufficient accommodations in the public schools to seat children compelled to attend

the public schools under the provisions of this act. It is hereby made the duty of every board of education to provide sufficient accommodations in the public schools for all children in their district compelled to attend the public schools under the provisions of this act. Authority to levy the tax and raise the money necessary for such purpose is hereby given the proper officers charged with such duty under the law.

It shall be the duty of the State commissioner within sixty days after the passage of the enforced-attendance law, and from time to time thereafter whenever he may deem it advisable, to formulate and forward to the boards of education throughout the State regulations and suggestions for the instruction and guidance of all boards, officers, superintendents, principals, teachers, and persons charged with the enforcement of the law.

Each board of education shall establish a sufficient number of schools to provide for the free education of the youth of school age within the district under its control, at such places as will be most convenient for the attendance of the largest number, and shall continue each and every day the school so established not fewer than twenty-four nor more than forty-four weeks in each school year.

No pupil shall be suspended from school by a superintendent or teacher except for such time as may be necessary to convene the board of education, and no pupil shall be expelled except by a vote of two-thirds of such board, and not until the parent or guardian has been notified and has been given opportunity to be heard. But no pupils shall be expelled or suspended from any school beyond the current term thereof.

Character of instruction.—Each township board of education shall establish at least one primary school in each subdistrict under its control, and any board of education may establish one or more schools of higher grade than the primary schools whenever it deems the establishment of such school or schools proper or necessary for the convenience or progress of the pupils attending the same, or for the conduct and welfare of the educational interests of the district; and such school or schools shall not be discontinued under three years from the time of the establishment thereof, except by a vote of three-fourths of the members of the board of education of each township. For the purpose of providing schools of higher grade, any township, district, village, and special district, situate within the boundaries of such township, may be united and organized as a special district for high school purposes, by a vote of the electors of the township at any general election, 10 or more qualified electors giving ten days' notice thereof. In any township, special, village, or city district, or part thereof, parents or guardians of youth of school age may petition the board of education to organize an evening school. The petition shall contain the names of not fewer than 25 persons of school age who will attend such school, and who, for reasons satisfactory to the board, are prevented from attending day school. The board may discontinue the school when the average attendance falls below 12. The board of any city, special, or village school district may establish a public kindergarten in connection with the public schools for children 4 to 6 years of age. But no part of the State fund shall be appropriated therefor.

Text-books.—The State commissioner of common schools shall procure by June 4, 1891, as near as he can, one copy of the latest and best edition of each of the school books now in use, so far as he can learn, in the public schools of this State, and thereupon the governor and secretary of state, constituting a board to be known as the State school-book board, shall secure all such information as may be necessary to fully advise them, and by July 4, 1891, fix the price not to exceed which each of said text-books may be sold to and purchased by boards of education, but the price so fixed on any book shall not in the aggregate, as near as can be ascertained, exceed 75 per cent of the present wholesale list prices. The governor shall be president of said board, and the State commissioner of common schools shall be secretary thereof, and the secretary shall keep a record of all the proceedings and write in each book procured by him the price so fixed and preserve the book in his office, and as revisions of the books may be made or new school text-books may be placed on the market from time to time deserving, in the opinion of the board, to be considered, the commissioner shall in like manner obtain copies and the board shall fix the maximum price thereof at which they may be sold and purchased.

Whenever the maximum price of the books now in use has been so fixed by the board, the State commissioner shall forthwith notify the publishers of the books of the action of the board and invite written proposals as to what books—which shall in all respects be exact duplicates of those so on file with the commissioner—they will furnish to the State at a price not exceeding that fixed for the period of five years, in such quantities and at such times as they may be ordered, the board of education making the order to pay all costs of transportation. At the date of

July 4, 1895, the text-book board shall meet and consider the proposals submitted; and if the board is of the opinion that from the proposals thus received the public schools can be well supplied with good school books equal to the necessities and best interests thereof, the board shall accept, record, and preserve them, and each publisher shall be bound by his proposals for five years from the date of such acceptance; and any accepted publisher failing or refusing to promptly fill any order or ship any books ordered shall forfeit and pay to the State $500 for each failure for the benefit of the common-school fund.

The commissioner shall forthwith make out a complete list of the books named in the accepted proposals, fully describing each and giving the price so fixed thereon, the price named in the proposal, and the name and address of the publisher of the book, and the same shall contain such further information as the commissioner may deem necessary or as may be ordered by the board, and he shall at once transmit by mail to each board of education a copy of the statement, which the board shall preserve and enter on its record. From time to time the commissioner shall in like manner make additional statements concerning the action of the board. Each board on receiving the statements first above mentioned shall, on the last Monday in August, meet and shall within two weeks determine, by a majority vote of all the members elected, the studies to be pursued and which of the text-books contained in the list shall be used in their schools, and after the books have been selected they shall not be changed or modified in any way without the consent of three-fourths of all the members elected, given at a regular meeting; and each board of education shall cause it to be ascertained, and at regular meetings in April and August shall determine which and the number of each of said books the schools under its charge will require until the next regular meetings in April and August, and shall cause an order to be drawn for the amount in favor of the clerk of the board of education, payable out of the contingent fund; and the clerk shall at once order the books so agreed upon by the board of the publisher, who shall, upon the receipt of the order, ship the books to the clerk without delay, and if the clerk shall find the shipment correct, he shall pay for them and their transportation. If the boards of education can, at any time, secure of the publisher the books so adopted by the board at a price less than said maximum[1] price, it shall be its duty so to do, and may, without unnecessary delay, make effort to secure such lower price before adopting any particular text-books. Each board shall have power to and shall make all necessary provisions and arrangements to place the books so purchased within easy reach of and accessible to all the scholars in their district, and for that purpose may make such contracts and take such security as they may deem necessary for the custody, care, and sale of such books and accounting for the proceeds, but not to exceed 10 per cent of the cost price shall be paid therefor, and said books shall be sold to the pupils of school age in the district at the price paid the publisher and not to exceed 10 per cent thereof added, and the proceeds of such sale shall be paid into the contingent fund of the district; and whoever receives such books from the board of education for sale to the pupils and fails to account fully and honestly for them or the proceeds arising from their sale shall be guilty of embezzlement and be punished accordingly. But the boards of education may contract with local dealers to furnish the books at prices above specified, such dealers becoming responsible to the publishers for all books purchased by them.

When pupils remove from any district and have text-books of the kind adopted in such district, and not being of the kind adopted in the district to which they remove, and wish to dispose of the same, the board of the district from which they remove, when requested, shall purchase the same at a fair valuation, to be resold.

Each board of education may furnish the necessary school books free of charge to enable the parent or guardian, without expense therefor, to comply with the requirements of this chapter, the same to be paid for out of the contingent fund; but such pupils as are already wholly or in part supplied with necessary school books shall be supplied free of charge only as other or new books are needed, and all school books furnished as herein provided shall be considered and be the property of the district and loaned to the pupils on such terms and conditions as each board may prescribe.

Buildings.—The board of education of any district is empowered to build, enlarge, repair, and furnish the necessary schoolhouses, purchase or lease sites therefor or rights of way thereto. When in the judgment of any board of education it will be for the advantage of the children to have meetings of literary societies, school exhibitions, singing schools, religious exercises, select or normal schools, the board of education shall authorize the opening of such schoolhouses for such purpose, and it may authorize their use for any other lawful purpose, but not to

[1] That reported by the State Commissioner.

interfere with the public school work. When the board of education determines to build, repair, enlarge, or furnish a schoolhouse, the cost of which will exceed, in city districts of the first and second class, $1,500, and in other districts $500, except in cases of urgent necessity, or for the security and protection of school property, it shall proceed as follows:

The board shall advertise for bids for four weeks in two newspapers of general circulation in the district, or, if there be no newspaper of general circulation, then by posting such advertisements in three public places. The bids, duly sealed, shall be filed with the clerk and shall be opened at the meeting of the board immediately succeeding the last day for filing them, and they shall then be publicly read by the clerk and entered on the records of the board. Each bid shall contain the name of every person interested in the same, and shall be accompanied by a sufficient guaranty from some distinguished person that if the bid be accepted a contract will be entered into and the performance of it properly secured. When both labor and materials are embraced in the work bid for, each must be separately stated in the bid, with the price thereof. None but the lowest responsible bid shall be accepted, but the board may in its discretion reject all the bids, or accept any bid for both labor and material which is the lowest in the aggregate. Any part of a bid which is lower than the same part of any other bid shall be accepted whether the residue of the bid is higher or not, but in case the lowest bid is made by two bidders the work shall not be divided between them.

Whoever maliciously injures or defaces any schoolhouse, its fixtures or appurtenances, or commits any nuisance therein, or maliciously trespasses its inclosed grounds or fixtures, shall be fined not more than $100. Whoever maliciously burns or attempts to burn any schoolhouse shall be imprisoned in the penitentiary for not more than twenty years. Whoever in the night maliciously and forcibly breaks and enters any schoolhouse with intent to commit felony or to steal shall be imprisoned not more than ten nor less than one year. Whoever maliciously in the daytime breaks and enters any schoolhouse with intent to steal shall be fined not more than $300 and imprisoned not fewer than sixty days. Whoever willfully interrupts or disturbs any assembly of persons met for a lawful purpose, or any person while he is at or about the place where such assembly is to be held or is and has been held, shall be fined not more than $50 or imprisoned not more than ten days, or both. A member of the board of education is liable as other persons, his liability being limited to the extent that mere errors of judgment with good intent exonerate him.

4. Finances.

Funds (permanent and special).—Taxation.

Funds (permanent and special).—The money which has been and may hereafter be paid into the State treasury on account of sales of lands granted by Congress for the support of public schools in any original survey township or other district of country shall constitute the "common-school fund," of which the auditor of State shall be superintendent, and the income of which shall be applied exclusively to the support of common schools. This common-school fund shall constitute an irreducible debt of the State, on which the State shall pay interest annually at the rate of 6 per cent per annum. When any grant or devise of land or any donation or bequest of money or other personal property is made to the State of Ohio, or to any person, or otherwise, in trust for the common-school fund the same shall become vested in that fund, and when the money arising therefrom is paid into the State treasury proper accounts thereof shall be kept by the auditor of the State, and the interest accruing therefrom shall be applied according to the intent of the grantor, donor, or devisor. The auditor shall keep an account of the fund and the interest which accrues thereon, crediting each county with its share and the amonnt disbursed to each.

The State shall pay interest semiannually at the rate of 6 per cent per annum upon all money which has been paid into the State treasury on account of sales of lands commonly called salt lands, and upon all money hitherto paid, or which may be hereafter paid, into the State treasury on account of sales of swamp lands granted to the State by Congress. The money received from such sales shall constitute an irreducible debt of the State, and the interest shall be apportioned annually on the same basis as the State common-school fund. [The manner of distributing the interest arising from the salt-lands fund is the same as for the State common-school fund.]

Taxation.—For the purpose of affording the advantages of a free education to all the youth of the State there shall be levied annually a tax on the grand list of taxable property of the State, which shall be collected in the same manner as other State taxes, and the proceeds of which shall constitute the State common-

school fund; and for the purpose of higher agricultural and industrial education, including manual training, there shall be levied and collected in the same manner a tax on the grand list of the taxable property of the State, which shall constitute the "Ohio State university fund." The rate of such tax in each case shall be designated by the general assembly at least once in two years, and if the general assembly shall fail to designate the rate for any year, the same shall be, for the State common-school fund, 1 mill, and for the Ohio State university fund one-twentieth of 1 mill upon each dollar of valuation of such taxable property. The auditor shall apportion the State common-school fund to the several counties semiannually, upon the basis of enumeration of the youth therein, as shown by the latest abstract he has received from the State commissioner of common schools.

Each board of education shall annually, at a regular or special meeting, determine as nearly as possible the entire amount of money necessary to be levied as a contingent fund for the continuance of the school or schools of the district after the State funds are exhausted, to purchase sites for schoolhouses, to erect, enlarge, purchase, lease, repair, and furnish schoolhouses, and for other school expenses; and any city, special, or village school district may levy a sum sufficient to support a kindergarten in connection with the public schools.

Such levy shall not exceed in cities of the first grade of the first class 3½ mills and 1 mill additional for every 5,000 pupils over and above 25,000 enrolled in the public schools of said cities, but such additional levy shall not exceed 4 mills. In all other districts the levy shall not exceed 7 mills on each dollar of valuation: *Provided, however*, That in counties containing a city of the first grade of the first class, in districts outside such city in which a high school is maintained, and in all special and village districts of any county such levy shall not exceed 8 mills on each dollar.

But a greater tax than is authorized above, except in city districts of the first-class, may be levied if two-thirds of the electors so vote. The amount to be so levied the board shall certify in writing to the auditor of the county, who shall assess the entire amount upon all property of the district, and the county treasurer shall collect the same as other taxes are collected. Each county auditor shall annually apportion the school funds of the county. The State common-school fund shall be apportioned in proportion to the enumeration of youth to districts, subdistricts, joint subdistricts, and fractions of districts and joint subdistricts within the county. The common-school fund shall be apportioned to the school districts and parts thereof in proportion to the enumeration of youth therein, and all other money not otherwise appropriated by law shall be apportioned annually in the same manner as the State common-school fund. The auditor shall collect or cause to be collected all fines and other money for the support of common schools in his county and pay the same to the county treasurer.

INDIANA.

1. Organization of the System.

State board of education (and text-book commissioners).—State superintendent of public instruction.—County board of education.—County superintendent.—Township, town, and city trustees, director, and superintendent.—City board of school commissioners.

State board of education.—(See Teachers, Appointment, Qualifications, etc.; also Schools, Text-books.)

State superintendent of public instruction.—There shall be elected by the qualified voters of the State at a general election a State superintendent of public instruction, who shall hold his office for two years. He shall be charged with the administration of the system and a general superintendence of the business relating to the common schools, and of the funds and revenues set apart for their support. He shall be provided with a suitable office at the seat of government, where the records of his office shall be kept, and at which he shall give a reasonable attendance to the business and duties of the position. He shall render an opinion, in writing, to any school officer asking the same, touching the construction of the school law. He may employ two clerks, for whom $1,800 is appropriated. He shall make a biennial report to the governor, indicating in general terms the enumeration of the children of the State for common-school purposes, the additions to the permanent school fund within the year, the amount of school revenue collected within the year, and the amounts apportioned and distributed to the schools. At each regular session of the general assembly he shall make a brief exhibit of his labors, the results of his experience and observation as to the operation of said system, and suggest the remedy for observed imperfections; of the amount of the permanent school funds and their placement, revenue given by them and arising from other

sources, and the estimated value of all other property; of the condition of affairs with the condition at previous periods, and of such matters as he thinks of interest to the general assembly.

He shall visit each county in the State at least once during his term of office, and examine the auditor's books and records relative to the school funds and revenues, with a view to their security, meet with such officers as may attend his appointment, counseling with teachers and lecturing upon educational topics. To enable him to defray his traveling expenses he shall be allowed $600 annually. He may require county auditor, superintendent, treasurer, district trustees, clerks, and treasurers to furnish copies of all reports made by them and such other information as he may desire. He may prepare and transmit the forms used in making reports, and shall publish the school laws.

County board of education.—The county superintendent and the trustees of the townships and the chairman of the school trustees of each town and city of the county shall constitute a county board of education, which shall meet semiannually at the office of the county superintendent. The board shall consider the general wants and needs of the schools and school property of which they have charge and all matters relating to the purchase of school books, furnitrue, maps, etc. The change of text-books, except in cities, and the care and management of township libraries shall be determined by the board, and each township shall conform as nearly as practicable to its action.

County superintendent.—The township trustees of the several townships of each county shall meet at the office of the county auditor every two years and appoint a county superintendent, who shall be a citizen of such county, shall execute a bond in the amount of $1,000, and shall be removed for cause. He shall examine at least once a month all applicants for license to teach, and shall license successful competitors, which he may for cause revoke. He shall have general superintendence of the schools of the county; shall attend each township institute at least once in each year, conducting its exercises; shall visit each school of the county at least once each year; shall encourage teachers' institutes and associations and shall labor in every practical way to elevate the character of instruction and the condition of the schools; shall decide questions arising under the school laws, with appeal to the State superintendent; shall be the intermediary between the State superintendent and the local school authorities (cities having a superintendent may be removed from his jurisdiction, however), and in general shall carry out the orders of the State superintendent. He shall, in case of failure of any trustees to do it, cause an enumeration of children in any township, town, or city; shall make an annual report to the State superintendent the enumeration of their respective counties, with the same particular discrimination required of the trustee; shall annually furnish the statistical information which the trustees are required to report to them in such form as may be prescribed by the State superintendent, together with such additional information, embodied in a written report, relative to the conditions of the schools, schoolhouses, and the general progress of education in the county as the State superintendent may require. Failure to make the report of enumeration of children by September 1 causes the county to lose $25 in the next apportionment of school revenue, and failure to make the other reports required by September 15 causes the county to lose $10; both forfeits to be collected from the delinquent superintendent in proceedings before a justice of the peace. He shall cast the apportionment of school revenues from the lists of enumerations and reports of transfers of the several townships, towns, and cities, and report it to the county auditor. He shall receive $4 per diem for every day actually employed in discharge of his duties, but the board of commissioners may determine the number of days, though they shall not be fewer than the whole number of schools under the jurisdiction of the superintendent.

Township school trustees and city and town school boards.—Each civil township and each incorporated town or city in the several counties of the State shall be a district municipal corporation for school purposes by the name and style of the civil township, town, or city corporation, respectively, and the trustees of the township and the school board of each city and town shall be school trustees and perform the duties of clerk and treasurer for school purposes. In cities and towns the common council shall annually elect a school trustee for a term of three years. These three trustees shall constitute the school board of the city or town, and shall elect one of their number president, one secretary, and one as treasurer, the last executing a bond, with two securities not members of the board, in a sum double the amount annually coming into his hands; the other officers shall give bond in any sum not less than one-third of the treasurer's.

The school trustees of every township, incorporated town, or city, shall receive the special school revenue belonging thereto, and the revenue for tuition which may be apportioned to the township, town, or city by the State for tuition for the

common schools, and shall pay out the same for the purpose for which such revenues were collected and appropriated, reporting annually the particulars to the county commissioners. They shall have charge of the educational affairs of their respective townships, towns, and cities; shall employ teachers, establish and conveniently locate a sufficient number of schools for the education of the children of school age, and build or otherwise provide suitable houses, furniture, apparatus, and other articles and educational appliances necessary for the thorough organization and efficient management of the schools; may establish graded schools or such modifications of them as may be practicable; shall have the care and management of all property except the Congressional township school lands. They may in cities and incorporated towns employ a superintendent for their schools and prescribe his duties. They shall annually make a report to the county superintendent containing the statistical information furnished by the teachers, and embody in tabular form the following additional items: The number of districts, schools taught and their grade, teachers by sex, average compensation of each grade, balance of tuition revenue on hand at the commencement of the current year, amount received during the year from the county treasurer and the amount expended for tuition, balance on hand, length of time school was taught in days, schoolhouses erected during the year, the cost of the same, the number and kind before erected, and the estimated value thereof and of all other school property, number of volumes in the library and the number taken out during the year and the annual increase, the assessment on each $100 of taxable property and on each poll of special tax for schoolhouse erection, and the amount of such levy, balance of special school revenue on hand at the commencement of the current year, amount received during the year from the county treasurer, the amount expended during the year and balance on hand, the number of acres of unsold school lands, their value and income given, together with such other information as may be required by the county or State superintendent. Failure to make the reports required subject the township, town, or city to a loss of $25 and the trustee in fault shall be liable to all damages arising from his neglect to the locality concerned. (For election and duty of director see Schools, Buildings.)

City board of school commissioners.—In all cities of 30,000 or more inhabitants there shall be elected by each school district one school commissioner for a term of three years. The board of school commissioners thus formed shall district the city, levy taxes for the support of schools and libraries in addition to those elsewhere authorized; examine applicants for teachers' places; purchase sites, construct buildings; purchase supplies; pay teachers; appoint superintendents; disburse the sums required for the support of schools and libraries; regulate the grading, the course of instruction, and the government in the schools of the city; and issue bonds in anticipation of the revenue to obtain money not exceeding in the aggregate $100,000 for building purposes. All parts of the general school laws not inconsistent with the provision for cities of 30,000 and over hold good for them. The members of the board of school commissioners serve without compensation.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—The trustees of townships, towns, and cities shall employ teachers, but no teacher shall be employed unless holding a license to teach issued by the proper State or county authority and in force at the date of employment, but if the license expire during a term the teacher may complete the term within the then current school year. A trustee shall not employ a teacher whom the other two trustees have decided at any regular meeting they do not wish to employ. Teachers may be dismissed for cause.

The State board of education shall consist of the governor, State superintendent, president of the State university, of Purdue University, of the State normal school, and superintendents of common schools of the three largest cities in the State. The board may grant certificates of qualifications to such teachers as may, after a thorough and critical examination, be found to possess eminent scholarship and professional ability, and shall furnish satisfactory evidence of good moral character. The certificates the board grants shall be valid during life, and good in any locality for any school. The applicant shall, on making application, pay a fee of $5.

The county superintendent shall examine all applicants for license as teachers for the common schools of the State by a series of written or printed questions, requiring answers in writing; but in addition questions may be put and answered orally, and if from the ratio of correct answers and other evidences disclosed by the examination the applicant is found to possess a knowledge which is sufficient to enable him to successfully teach in the common schools of the State orthogra-

phy, reading, writing, arithmetic, geography, English grammar, physiology, and the history of the United States, the county superintendent shall license the applicant for the period of six, twelve, twenty-four, or thirty-six months, according to the ratio of correct answers and other evidences of qualification, given upon said examination, the standard of which shall be fixed by the county superintendent. In examining persons to teach in graded schools in cities and towns the county superintendent may take into consideration the special fitness of such applicants for the services required of them, noting the kind of work they are specially qualified for on the license. Before being licensed every applicant must produce satisfactory evidence of good moral character. The license for six months, however, shall be regarded as a trial license, and not more than one of the kind shall be granted to an applicant in the same county. Any person who shall receive two thirty-six month licenses in succession may receive at the expiration of the latter a license for eight years after such an examination as may be prescribed by the State board of education; but such license shall issue only on approval of the State board of education, and shall be styled a professional license, entitling the holder to teach in any school.

The teacher shall make a complete report to the proper trustee at the end of the term, and until such report has been made the trustee shall not pay more than 75 per cent of the teacher's salary.

Preliminary training.—There shall be established and maintained a normal school, the object of which shall be the preparation of teachers for teaching in the common schools of Indiana, which shall be governed by a board of four trustees appointed by the governor and approved by the senate. The board shall prescribe the course of study for the normal school, shall elect the instructors and fix their salaries, and shall determine the conditions of admission, but the applicant must be 16 years of age if women and 18 if men, of good health, of undoubted moral character, and file a pledge that he or she will, as far as practicable, teach in the common schools of Indiana a period equal to twice the time spent as a pupil in the normal school. Tuition shall be free. The trustees shall make a biennial report to the legislature in years that it meets, and in other years to the governor. The board is authorized to grant, from time to time, certificates of proficiency to such teachers as shall complete any of the prescribed courses of study and whose moral character and disciplinary relations to the school have been satisfactory. After the lapse of two years after graduation, and on satisfactory evidence of professional ability, they shall be entitled to diplomas appropriate to professional degrees, entitling them to teach in any school.

Meetings.—At least one Saturday in each month during which the public schools may be open shall be devoted to township institutes or model schools for the improvement of the teachers. The township trustee shall specify in a written contract with each teacher that such teacher shall attend the full session of each institute or forfeit one day's wages for every day's absence therefrom unless the absence is caused by sickness.

In order to encourage the holding of teachers' institutes in counties, whenever the county superintendent shall file with the county auditor an official statement that there has been held a teachers' institute in the county for five days, with an average attendance of 25 teachers or persons intending to become such, the auditor shall draw his warrant on the county treasurer for $35, and in case there be an average attendance of 40, for $50, for any one year. When any such institute is in session the common schools of the county shall be closed. The county superintendents are required to hold an institute annually.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—The trustees of each township, town, or city may organize the colored children into separate schools, having all the rights, privileges, and advantages of the other schools, provided that when any child attending a colored school shall, on examination and certificate of his or her teacher, that he or she has made sufficient advancement to be placed in a higher grade than that afforded by such colored school, he or she shall be entitled to attend a white school having the grade for which such colored pupil is qualified, and no distinction shall therein be made on account of race or color of such pupil. All schools in a township shall be taught an equal length of time as nearly as the same can be done. The school meeting determines the length of time schools are to be taught.

Character of instruction.—The common schools of the State shall be taught in the English language, and there shall be taught in them orthography, reading, writing, arithmetic, geography, English grammar, physiology, history of the United States, and good behavior, and such other branches and languages as the

advancement of the pupils and the county board may require. The trustees may establish graded schools or such modifications of them as they may deem practicable. The board of any incorporated town or city is empowered to establish kindergartens for children 4 to 6 years of age, cost to be defrayed from local funds. All cities having a population of 3,000 or more shall maintain a night school from 7 to 9 p. m. during the regular school term open to pupils from 14 to 30 years of age employed in business during the day. In cities of 100,000, manual-training schools may be established.

Text-books.—The State board of education shall constitute a board of commissioners for the purpose of making a selection or the compilation for use in the common schools of a series of text-books on the following branches: Spelling, reading, arithmetic, geography, English grammar, physiology, history of the United States, and a graded series of writing books, no book to contain anything of a sectarian character. As soon as the board shall have entered into contract for the furnishing of the books the governor shall announce the fact, and the school trustees of every school corporation within thirty days shall certify to the county superintendent the number required by the schools under their care. The county superintendent makes requisition upon the State superintendent and the latter upon the contractor, who shall, within ninety days, ship the books to the county superintendent, from whom the school trustees shall immediately procure and furnish them to the patrons at the price fixed. It shall be the duty of each township trustee and each school board to furnish the necessary school books to all such indigent children as may desire to attend the schools.

Buildings.—The voters shall annually elect one of their number director, who shall serve without pay. He shall have charge of the school property, under the general concurrence of the trustees (see District trustees under Organization), and shall make all temporary repairs and provide the necessary fuel, and may expel pupils for cause.

When a schoolhouse is unoccupied by a common school of the State and the people who form the school at such house desire that a private school be taught therein, and a majority of them make application to the trustee having charge of such house for the use of it for a private school, the use shall be granted, provided the house be vacated when desired for a public school and the private-school teacher report the number of teachers, of pupils, the average attendance, and the average cost of tuition for each pupil. When a majority of the legal voters of any school district desire the use of the schoolhouse the trustee having charge of the same shall authorize the director to permit such use.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The common-school fund shall consist of the surplus revenue fund, the saline fund and the lands belonging thereto, the bank-tax fund and the fund arising from section 114 of the charter of the State bank of Indiana, the fund arising from fines assessed for breaches of the penal laws of the State and from all forfeitures which may accrue, all lands and other estate which shall escheat to the State for want of heirs, all lands granted to the State without designation of a purpose, the proceeds of the sales of swamp lands granted to the State, and taxes on the property of corporations that may be assessed by the general assembly for common-school purposes. The Congressional township school fund shall consist of the fund derived from the sale of Congressional township school lands and the unsold lands belonging thereto. These funds shall never be decreased, but the income shall always be invariably appropriated to the support of common schools.

Taxation.—There shall be assessed[1] annually 11 cents on each $100 on taxable property, real and personal, in the State, irrespective of color, and 50 cents on each taxable poll for the purpose of supporting a general system of common schools.

The trustees of the several townships, towns, and cities shall have the power to levy a special tax for the construction, renting, or repairing of schoolhouses, for providing furniture, school apparatus, and fuel, and for the payment of other necessary expenses of the school except tuition; but no tax [for such purpose] shall exceed the sum of 50 cents on each $100 worth of property and $1 on each poll in any one year, and the amount derived from the tax shall be denominated the special school revenue. The trustees of the several townships, towns, and cities shall have power annually to levy a tax not exceeding 35 cents on each $100 of taxable

[1] After 1894.

property and 25 cents on each taxable poll, which shall constitute a supplementary tuition fund to extend the terms of school after the tuition funds apportioned by the State to such localities shall have been exhausted. They may also lay a special tax to pay debts, but not to exceed 25 cents on each $100 in any one year.

ILLINOIS.

1. Organization of the System.

State superintendent.—County superintendent.—Township school trustees.—District board of directors.—City and village boards of education.

State superintendent.—There shall be elected every four years a State superintendent of public instruction, who shall hold his office for four years. He shall take the oath of office, and shall give bond in the penalty of $25,000 with securities, conditioned for the prompt discharge of his duties as superintendent and for the faithful application and disposition, according to law, of all school moneys that may come into his hands by virtue of his office. His salary shall be fixed by law as a salary for the services required under the provisions of this act or other law that may be passed. All necessary contingent expenses for books, postage, and stationery pertaining to his office, shall be audited and paid by the State as the salary and contingent expenses of other officers are paid. It shall be his duty to keep an office at the seat of government of the State; to file all papers, reports, and public documents transmitted to him by the school officers of the several counties each year separately; to keep and preserve all other public documents, papers, and books relating to the schools coming into his hands as superintendent, and to hold the same in readiness to be exhibited to the governor or to any committee of either house of the general assembly; to keep a fair record of all matters pertaining to the business of his office; to pay without delay all money which may come into his hands by virtue of his office to the officer or person entitled to receive the same in the legal manner; to counsel and advise in such manner as he may deem best, with experienced and practical school teachers, as to the best manner of conducting common schools; to supervise all the common and public schools in the State; to be the general adviser and assistant of county superintendents of the schools of the State; to address circular letters to county superintendents from time to time, as he shall deem for the interests of schools, giving advice as to the best manner of conducting schools, constructing and furnishing schoolhouses, and examining and procuring competent teachers; to report to the governor the condition of the schools, their number for each preceding year by counties, the number taught exclusively by men and exclusively by women, the number taught by men and women at same time and at different periods, the attendance, the number of persons under 21 years of age, and the number 12 to 21 years that are unable to read and write, the amount of township and county funds, the amount of the interest of the State or common-school fund, and of the interest of the township and county fund annually paid out, the amount raised by an ad valorem tax, the amount annually expended for schools, the number of schoolhouses, their kind and condition, the number of townships and parts of townships in each county, the number and description of books and apparatus purchased for the use of schools and school libraries, the price paid therefor, the total amount purchased and what quantity and how distributed, the number and condition of the libraries, together with such other information and suggestions as he may deem important in relation to the school laws, schools, and the means of promoting education throughout the State, which report shall be laid before the general assembly at each regular session; to make such regulations as may be necessary and expedient to carry into effect the provisions of the school law; to be the legal adviser of all school officers, and when requested by a school officer to give his opinion in writing upon any question arising under the school laws; to hear appeals from county superintendents they having certified to a written statement of the facts in issue; to grant State certificates to such teachers as may be found worthy to receive them; to be ex officio a member of the board of trustees of the University of Illinois, of the Southern Normal University, and of the State board of education,[1] and to act as secretary thereof; to report to the general assembly at its regular session the condition and expenditures of the Normal University, and such other information as the State board or the general assembly shall direct; and finally, to visit such of the charitable institutions of the State as are educational and to examine their facilities for instruction, and to prescribe forms for such reports as he may desire from the superintendents thereof. He shall be vested with the following powers: To direct and cause the county superintendent of any county, directors or boards of trustees or township treasurer or other school officer to withhold from any officer, township, district, or teacher any part of the common

[1] See Teachers, Preliminary training.

school or township or other school fund until such person or corporation shall have made all schedules, reports, and returns required of him by this act, and until such persons or bodies, unless excused by him, shall have executed and filed all official bonds and accounted for all common-school or township or other school funds which have theretofore come into his hands; to require county superintendents to furnish him the information he desires to embody in his report to the general assembly, and to require at any time from the township board a report on the condition of schools under its care, and to determine what statistics local officers shall report to county superintendents; to authorize county superintendents to procure such assistance as may be necessary to conduct county institutes; to require annual reports from the authorities of incorporated towns, townships, cities, or districts having a system under special charter to the same extent as regular school officers are or may be required to make such reports; to require the president, principal, or other proper officer of every organized (whether incorporated or not) institution of learning to make a report that he may exhibit a fair and full statement of the condition of such institutions and of the educational resources of the State. He shall not be interested in the sale of any book or apparatus or furniture used or to be used in any school in the State, and for violation of this provision shall be fined not fewer than $25 nor more than $500, and may be imprisoned in the county jail not less than one month nor more than one year.

County superintendents.—There shall be elected every four years a county superintendent of schools who shall be sworn in and shall execute a bond with joint and several sureties for $12,000, to be increased if deemed best, conditioned on the faithful discharge of his duties. In case of vacancy the county board shall appoint a successor. He shall be provided with a suitable office. In counties of not more than 100 schools the time of the superintendent may be limited by the county board; in counties of 50 or fewer schools the limit shall not be less than 150 days in the year; in counties of 51 to 75 schools, not less than 200 days a year; in counties of 76 to 100 schools, not less than 250 days a year. He may employ the assistants he needs for the full discharge of his duties at a compensation fixed by the county board, but they shall be persons of attainments, versed in the principles and methods of education, familiar with public school work, and competent to visit schools. The county superintendent shall receive in full for all services rendered by him 3 per cent upon the amount of sales of school lands or sales of lands upon mortgage, or of sales of real estate taken for debt, including all services therewith; 2 per cent upon all sums distributed, paid, or loaned out by them for the support of schools. For all other duties required of him by law $4 a day for each day of actual service and $1 a day for expenses for the number of days actually spent in school visitation. He shall present a sworn-to itemized statement of his per diem compensation and expenses, together with a report of all his official acts or those of his assistants, including a list of all the schools visited. It shall also be his duty to sell township-fund lands, issue certificates of purchase, report to the county board and State auditor, and the other legal duties connected therewith; to register applicants for admission to the State normal universities and to the University of Illinois, and to assist in the examination of the same as directed; to visit each school in the county at least once a year, and in the performance of this duty he shall spend at least half the time given to his office, and more if practicable, in visiting ungraded schools, noting the methods and the character of instruction; to direct teachers in the science and art of teaching; to act as the official adviser and constant assistant of the school officers and teachers, carrying out the advice of the State superintendent; to conduct a teachers' institute, and to aid and encourage the formation of other teachers' meetings and to assist in their management and in every way to improve the condition of common schools; to examine all notes, bonds, mortgages, and other evidences of indebtedness which the township treasurer holds officially; and if he finds that the papers are not in proper form or that the securities are insufficient, he shall so state in writing to the board of trustees; to give notice of the election of trustee or director in default of the board's doing so; to hold meetings quarterly for the examination of teachers and to grant certificates, keeping a record of the same; to keep a just and true account of all moneys received and all moneys paid out on account of the institute fund and report to the county board; to report to the county board annually at its first regular meeting; to notify presidents of boards of trustees and clerks of school districts on or before September 30 annually of the amount of money paid by him to the township treasurer, with dates, and to receive and file, on or before the 15th day of July preceding each regular session of the general assembly and at such other time as may be required by the State superintendent or himself, a statement from the board of trustees of each township, giving such statistics and information as may be called for. He shall have power to require the township board of trustees to report the condition of the schools under it, to recommend the remission of the penalty for failure to report; to renew teachers' certificates at their expiration by his indorsement; to revoke the certificate of any teacher for immorality, or other cause; to direct in what manner township treasurers shall keep their

books and accounts; to bring suit against the county collector for a failure to pay State auditor's warrant, to remove any school director from office for willful failure to perform the duties of his office, and to lease and sell school lands.

Trustees of schools.—Each township is a township for school purposes. The school business of the township shall be done by three trustees, one elected by the township annually, to serve three years. No person shall be eligible to the office of trustee of schools unless 21 years of age and a resident of the township, and no two trustees shall reside when elected in the same school district nor be eligible to the office of trustee of schools and school director at the same time. In case of vacancy, it shall be filled by popular election. Within ten days after the annual election of trustees the board shall organize by appointing one of their number president and a person who, though a resident, is neither a director nor trustee, as treasurer, if there be a vacancy in that office, who shall act as clerk. The board shall hold regular semiannual meetings, and special meetings may be held on the call of the president or two members. At the regular meetings, the trustees shall ascertain the amount of State, county, and township funds on hand and subject to distribution, and shall apportion the same as follows: Whatever sum may be due for the compensation and the books of the treasurer, and such sum as may be deemed reasonable and necessary for dividing school lands, making plats, etc., and the remainder of such funds shall be divided among the districts or fractions of districts in which schools have been in accordance with the provisions of the law and the instructions of the State and county superintendents during the preceding year ending June 30 in proportion to the number of children under 21 years in each. The funds thus apportioned shall be placed on the books of the treasurer to the credit of the respective districts, and the same shall be paid out by the treasurer on the order of the directors. The board of trustees shall cause the treasurer, the clerk of the board, the directors of the several districts, or other person to prepare and forward to the county superintendent a statement exhibiting the condition of schools for the preceding biennial period, giving separately each year, commencing on the 1st of July, which statement shall be as follows:

The whole number of schools which have been taught in each year; what part have been taught by men exclusively, by women exclusively, by men and women at the same time, and what part by men and women at different periods; the whole number of scholars in attendance at all the schools by sex; the number of teachers by sex; the highest, lowest, and average monthly compensation given to men and women teachers, giving each item separately; the number of persons under 21 years of age, making a separate enumeration of those above the age of 12 years who are unable to read and write, and the cause of the neglect to educate them; the amount of the principal of the township fund; the amount of interest of the township fund paid into the township treasury; the amount raised by ad valorem tax, and the amount of such tax received into the township treasury; the amount of all other funds received into the township treasury; amount paid for teachers' wages, for schoolhouse lots, for building, repairing, purchasing, renting, and furnishing schoolhouses, for school apparatus, books, and other incidental expenses for the use of school libraries, and as compensation to township officers and others; the whole amount of the receipts and expenditures for school purposes, together with such other statistics and information in regard to schools as the State or county superintendent may require. Any township from which such report is not received in the manner and by the time required by law shall forfeit its portion of the public fund for the next ensuing year, subject to explanation and remission. The board may sell school property, establish a high school if directed to do so by a majority of the electors, lay off the township into one or more school districts, change districts when petitioned for by a majority of each of the districts affected by the change and by two-thirds of the voters in the territory transferred. In case any school district shall for two consecutive years fail to maintain a public school as required by law to do, the trustees of schools of the township or townships in which such district lies shall attach it to one or more adjoining districts.

District board of directors.—In all school districts having a population of fewer than 1,000 inhabitants and not governed by any special act in relation to free schools now in force, there shall be elected a board of 3 directors, elected for three years, one retiring annually. Any person of either sex, married or single, 21 years of age, able to read and write in the English language, shall be eligible as long as he resides in the district, to the office of school director, if not a member of the board of school trustees; vacancies are filled by a new election. The directors, within ten days after every election shall meet and organize by appointing one of their number president and another clerk. They shall hold regular meetings at such times as they may designate and special meetings as occasion may require. No director shall be pecuniarily interested in school affairs. It shall be the duty of the board to make a detailed report of their receipts and expenditures to the voters, and transmit a copy to the township treasurer within five days; to report to the county superintendent within ten days after employment the full names of all persons employed

as teachers, the date of the beginning and the end of their contract; to provide for the necessary revenue to maintain free schools in their district in the manner provided; to maintain free schools for at least one hundred and ten days; to adopt and enforce all necessary regulations for the management and government of schools and to inspect them; to appoint teachers, fix and pay their salaries; to direct what branches of study shall be taught, what text-books and apparatus shall be used; to purchase text-books for children of indigent parents; to furnish proper blanks to teachers. In addition, they shall be clothed with the following powers: To use any funds belonging to their district for their records, to pay their clerk if the amount of his services justify it, to dismiss teachers, to assign pupils to the several schools in the district, fix rates of tuition and collect the same; to suspend or expel pupils who may be guilty of gross disobedience or misconduct, and no action shall lie against them for such expulsion or suspension; to appropriate for the purchase of libraries and apparatus any funds remaining after all necessary school expenses are paid; to sell personal property belonging to district when not needed; to grant special holidays; to control and supervise all school buildings; to borrow money and issue bonds therefor to build schoolhouses, purchase sites, and improve and repair buildings; but it shall not be lawful for a board of directors to purchase or locate a schoolhouse site, or to purchase, build, or move a schoolhouse, or to levy a tax to extend schools beyond nine months without a vote of the people.

Board of education.—Incorporated cities and villages, except such as now have charge and control of free schools by special acts, shall be and remain parts of the school townships in which they are respectively situated and be subject to the general provisions of the school law except as follows: In all school districts having a population of not fewer than 1,000 and not over 100,000 and not governed in educational matters by any special act, there shall be elected, instead of the directors provided by law in other districts, a board of education, consisting of a president of the board, 6 members, and 3 additional members for every additional 10,000 inhabitants, but in no case to consist of more than 15 members. One-third the members shall retire annually, but the president shall be elected annually. The powers of the board shall be to establish and levy tax to support free schools not fewer than six nor more than ten months in each year, except upon petition of the majority of the voters of the district; to repair and improve schoolhouses and furnish them with the necessary fixtures, furniture, apparatus, libraries, and fuel, and have charge of the same; to examine teachers as supplemental to other examination; to employ teachers and to fix the amount of their salaries; to establish schools of different grades and make regulations for the admission of pupils into the same and their government; to buy or lease sites for schoolhouses, with the necessary grounds, if authorized by the voters at an election called in pursuance of a petition signed by at least 500, or one-fifth of the voters; to employ a competent and discreet person or persons to superintend the schools and to fix the salary of such persons (each superintendent may be required to act as principal or teacher in the schools); to lay off and divide the district into subdistricts, to alter and consolidate the same; to visit all the public schools as often as once a month; to inquire into the progress of scholars and the government of the schools; to prescribe the method and course of discipline and instruction; to expel grossly disobedient or misbehaving pupils, and no action shall lie against them for such expulsion; to dismiss unqualified teachers, to provide fuel and other like necessities as may be required; to appoint a secretary; to annually prepare and publish in some newspaper or in pamphlet form a report of the number of pupils instructed in the year preceding and the several branches of study pursued by them, of the number of persons between the ages of 12 and 21 unable to read and write, and of the receipts and expenditures of each school, specifying the source of such receipts and the objects of such expenditures.

In cities having a population exceeding 100,000 inhabitants the board of education shall consist of 21 members, to be appointed by the mayor, by and with the advice and consent of the common council, one-third to retire annually. Any person having resided in a city more than five years next preceding his appointment shall be eligible to membership of such board. The board shall have charge and control of the public schools, and with the concurrence of the city council may erect or purchase buildings, buy or lease sites, issue bonds for providing sites or buildings or to pay bonds, and to borrow money.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No teacher shall be authorized to teach a public school who is not of good moral character, at least 18 years of age if a man, or 17 years if a woman, and who does not possess a certificate of qualifications. The district board of directors or city or village board of education shall employ teachers and fix their pay.

The State superintendent is authorized to grant State certificates which shall be of two grades, the higher of which shall be for life and the lower for five years. Both grades shall only be given after public examination (of which due notice shall be given) in such branches and upon such terms and by such examiners as the State superintendent and the principals of the State [normal] universities may prescribe. Such certificates are revocable for cause.

It shall be the duty of the county superintendent to grant certificates to such persons as may upon due examination be found qualified. They shall be of two grades; those of the first grade shall be valid in the county for two years, and shall certify that the holder is of good moral character, and is qualified to teach orthography, reading (in English), penmanship, arithmetic, English grammar, modern geography, the history of the United States, and effects of alcohol and narcotics. The county superintendent may renew such certificates at their expiration, and may at any time revoke them for cause. For the purpose of examining teachers, the county superintendent shall hold meetings at least quarterly, and oftener if necessary. He shall require a fee of $1 from every applicant and for each certificate renewed he shall also charge $1, which fees shall go to the institute fund.

It shall be the duty of every public-school teacher to see that the school property of the district is not unnecessarily damaged or destroyed, and no teacher shall be paid any part of the school funds unless he shall have kept and furnished the schedules required by law, and shall have satisfactorily accounted for all books, apparatus, and other property belonging to the district. Each teacher shall keep correctly daily registers, which shall exhibit the name, age, and attendance of each pupil, the day of the month and the year, which register shall be handed to the clerk of the board under penalty of loss of pay.

Preliminary training.—There shall be established the Illinois Normal University and the Southern Normal University, with the object of qualifying teachers for the common schools of the State, by imparting instruction in the art of teaching and all branches of study which pertain to a common-school education, in the elements of the natural sciences, including agricultural chemistry, animal and vegetable physiology, in the fundamental laws of the United States and of the State in regard to the rights and duties of citizens, and such other studies as the governing body of each institution may prescribe. Each county shall be entitled to have two pupils instructed gratuitously in each school, and each representative district shall be entitled in each school to a number of pupils equal to the number of representatives in the district, the pupils to be selected from applicants passing the best examination. The Illinois State Normal University is managed and controlled by the "State board of education," and the Southern Illinois Normal University by a board of trustees not exceeding five in number. No member of the State board of education or of the board of trustees shall receive any compensation other than his necessary traveling expenses.

In each county adopting township organization the board of supervisors, and in other counties the county court (if authorized by vote of the people), may establish a county normal school for the purpose of fitting teachers for the common schools, which shall be under the county board of education. Two or more counties may unite in establishing a normal school.

Meetings.—The county superintendent shall hold annually a teachers' institute, continuing in session not fewer than five days, for the instruction of teachers and those who may desire to teach, and with the concurrence of the State superintendent procure such assistance as may be necessary to conduct the institute at such time as the schools of the county are generally closed. Two or more counties may hold a joint institute. Instruction shall be free to those who hold certificates good in the county. The time, not exceeding three days in any one term or five days in any one school year, during term time, actually spent by a teacher of any public school in this State in attendance upon a teachers' institute held under the direction of the county superintendent of schools, shall be considered time lawfully expended by such teacher, and no deduction of wages shall be made in the teacher's pay.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—Every person having control of any child between the ages of seven and fourteen years shall annually cause such child to attend for at least sixteen weeks, twelve of which shall be consecutive, some public or private day school: *Provided*, That this act shall not apply to any child that has been or is being otherwise instructed for a like period of time in the elementary branches of education or whose physical or mental condition renders its attendance impracticable, or who is excused for good reasons by any competent court of record. For every willful neglect of such duty as prescribed above the offender shall be fined from $1 to $20 and costs of suit.

The board of education in cities, towns, villages, and school districts and the board of school directors in school districts may at their discretion appoint one or more proper persons, whose duty it shall be to report all violations of this act in writing to such board of education or board of directors whose duty it shall be, when in their opinion the evidence renders such action necessary, to notify in writing the parent or guardian that such complaint has been made, and if cause be not shown within five days to at once proceed against the responsible person. It shall also be the duty of the board of education in cities, towns, villages, and school districts to appoint one of their number, who shall be a discreet and proper person, whose duty it shall be to hear excuses and reasons of parents or guardians for the nonattendance of children at school and to report in writing to the board at the next regular or special meeting the names, ages, and post-office addresses of all persons prosecuted. The persons so appointed shall be entitled to such compensation as may be fixed by the board and shall be paid out of the distributable school fund. Any fine or penalty mentioned above may be sued for and recovered before any court of record or justice of the peace of the proper county. Any person having control of a child who, with intent to evade the provisions of this law regarding compulsory attendance, shall make a willfully false statement concerning the age of such child or the time such child has attended school, shall forfeit from $3 to $20, for the use of the public schools.

It shall be unlawful for any person, firm, or corporation to employ or hire any child under 13 years of age, unless such child is by its labor wholly or partially the means of support of an aged or infirm relative, and has attended some public or private day school for at least eight weeks in the current school year. Any person, firm, or corporation violating the provisions of this act, and any father, guardian, or person having control of any child under the age of 13 years who willingly permits or consents to the employment of such child shall be fined in a sum from $10 to $50, and every day of such employment shall be deemed a separate offense. The district directors shall have power to assign pupils to the several schools in the district, to admit nonresidents, to fix rates of tuition, to provide that children under 12 years of age shall not be confined in school more than four hours daily, to establish and keep in operation for at least one hundred and ten days of actual teaching in each year, without reduction by reason of closing schools on legal holidays or for any other cause and longer if practicable, a sufficient number of free schools for the accommodation of all children in the district 6 to 21 years of age, and shall secure for all such children the right and opportunity to an equal education in such free schools. It shall be the duty of boards of education in cities and villages to support free schools not fewer than six nor more than ten months.

Character of instruction.—Every public school established shall be for instruction in the branches of education prescribed in the qualifications for teachers and in such other branches, including vocal music and drawing, as the directors, or the voters of the district at the annual election of directors, may prescribe. If the majority of the voters in a township shall vote to establish a township high school, a township board (high school) shall be elected, consisting of 5 members, which shall enjoy the powers and discharge the duties of directors for such district.

Text-books.—The directors shall direct what branches of study shall be taught and what text-books shall be used in the public schools, and shall strictly enforce uniformity of text-books therein, but shall not permit text-books to be changed oftener than once in four years. The directors shall have power to purchase at the expense of the district a sufficient number of the text-books used to supply children whose parents are not able to buy them. The text-books bought for such purpose shall be loaned only, and the directors shall require the teacher to see that they are properly cared for and returned at the end of each school term.

Buildings.—District directors shall have the control and supervision of all schoolhouses in their district, and may grant the temporary use of them, when not occupied by schools, for religious meetings and Sunday schools, for evening schools and literary societies, and for such other meetings as the directors may deem proper; but they shall not purchase or locate a schoolhouse site, or purchase, build, or move a schoolhouse unless directed by vote of the people.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The common-school fund of this State shall consist of the proceeds of a two-mill tax, to be levied upon each dollar's valuation of the property of the State annually until otherwise provided by law; the interest on what is known as the school-fund proper being 3 per cent upon the proceeds of the sales of the public lands in the State, one-sixth part excepted, and the interest on what is known as the surplus revenue distributed by act of Congress and made a part of the common-school fund by the legislature March 4, 1837.

The State shall pay the interest mentioned in the preceding paragraph at the rate of 6 per cent per annum, to be paid into and become a part of the school fund.

On the first Monday in January in each and every year next after the taking of the census of the State by Federal or State authority, the auditor of public accounts shall ascertain the number of children in each county under 21 years of age, and shall thereupon make a dividend to each county of the sum of the tax and the interest due on the school fund proper and surplus revenue in proportion to the number of children in each county under 21 years, and issue his warrant to the superintendent of each county.

All bonds, notes, mortgages, moneys, and effects heretofore accrued or may hereafter accrue from the sale of sixteenth section of the common-school lands of any township or county or from the sale of real estate or other property taken on any judgment or for any debt due to the principal of any township or county fund and all other funds of every description which have been or may hereafter be carried to and made a part of the principal of any township or county fund by any law, shall forever constitute the principal of the township or county fund, and no part thereof shall ever be distributed or expended for any purpose whatever, but shall be loaned and held to use, rent, or profit, as provided by law. But the interest, rents, issues, and profits arising and accruing from the principal of the township or county fund shall be distributed by the county superintendent on a basis of the number of children under 21 years, if the several townships and parts of townships have kept school in accordance with the law.

All fines, penalties, and forfeitures imposed or incurred in any of the courts of record or before any justice of the peace of the State, except fines, forfeitures, and penalties incurred or imposed in incorporated towns or cities for the violation of the by-laws or ordinances thereof, shall be, when collected, paid to the county superintendent of schools, who shall annually distribute such fines, penalties, or forfeitures in the same manner as the common-school funds of the State are distributed.

Taxation.—For the purpose of establishing and supporting free schools for not fewer than 5 nor more than 9 months in each year and defraying all the expenses of every description of the same, the directors of each district and the authorities of each village or city is authorized to levy a tax annually upon the taxable property of the district, village, or city, not to exceed 2 per cent for educational and 3 per cent for building purposes. [Note the 2-mill State tax forming a part of the common-school fund]. All money raised by taxation for school purposes or received from the State common-school fund or other sources for school purposes shall be held by the township treasurer as a special fund for school purposes, subject to the order of the board of education upon warrants signed by the president and secretary thereof.

For the purpose of building schoolhouses or purchasing school sites or repairing and improving the same, the directors of any school district, when authorized by a majority of the voters at an election called for the purpose, may borrow money, issuing bonds signed by not fewer than two members of the board of directors, in sums of not less than $100 at 7 per cent per annum, provided that the sum borrowed in any one year shall not exceed 5 per cent, including existing indebtedness, of the taxable property of the district.

MICHIGAN.

1. Organization of the System.

State board of education.—State superintendent.—County board of school examiners.—County commissioner of schools.—Township school inspectors.—Township board of school inspectors.—District board of directors.—Board of trustees.

State board of education.—There shall be elected every two years a member of the State board of education, who shall serve for six years. The State superintendent shall be ex officio a member as well as secretary of the board. The board shall have the general supervision of the State Normal School, and shall grant teachers' certificates to certain persons as hereinafter set forth.

State superintendent.—At each biennial election there shall be elected a superintendent of public instruction, who shall have his office at the seat of government. A vacancy shall be filled by the governor, by and with the advice of the senate. The State superintendent shall have general supervision of public instruction and of all the State institutions, other than the University, that are essentially educational in their character, and he shall visit the University, the Agricultural College, the Institutions for the Deaf, for the Blind, the industrial school for boys and for girls, the school for dependent and neglected children, and meet with the governing boards of each institution at least once in each year. He shall biennially report to the governor, containing the following matter: The condition of the University and of each of the other State educational institutions, all incorporated institutions of learning,

and the primary, graded, and high schools; the estimated cost of the system and amount of expenditures from all educational funds and plans for their better management; plans for the better organization of the educational system; the annual reports and accompanying documents, so far as he shall deem the same of sufficient public interest, of all the State institutions of educational character; abstracts of the annual reports of the school inspectors of the several townships and cities of the State, and all such other matter relating to his office and the subject of education in general as he may deem expedient to communicate. He shall compile and cause to be printed all general laws relating to schools, together with all necessary forms, regulations, and instructions for conducting all proceedings under said laws or relative to the organization and governing of the schools, including rules and regulations for the management of township and district libraries, and shall transmit the same to the several officers intrusted with the care and management of said schools. He shall semiannually apportion the primary school interest fund among the several townships and cities of the State in proportion to the number of children in each, between the ages of 5 and 20 years, as the same shall be reported to him by the board of school inspectors made to him for the school year closing prior to the May apportionment, drawing on the State treasurer in favor of the treasurer of each county.

County board of school examiners.—The board of supervisors of each county shall biennially appoint two persons as school examiners, who, together with the county commissioner, shall constitute a board of school examiners, who shall examine all persons who offer themselves at two regular public examinations at the county seat, and shall also hold, for the same purpose, not more than four special public examinations, as the interests of the schools may demand. The board shall grant certificates to those found qualified. The appointed members shall receive $4 per diem for each day actually employed in performance of duty.

County commissioner of schools.—There shall be elected biennially a county commissioner of schools, and in case of vacancy the judge of probate, together with the county board, shall appoint some suitable person to the office. The person so elected or appointed shall execute a bond, with two sureties, to be approved by the county clerk, in the sum of $1,000, for the faithful performance of fiscal duties. No person shall be eligible to the office of county commissioner who shall not be a graduate in the literary department of some reputable college, university, or State normal school, or hold a State teacher's certificate, or who shall not have held a first-grade certificate within two years next preceding the time of his or her election; provided, that in counties having fewer than 50 schools subject to the supervision of the county commissioner a person holding, at the time of election, a second-grade certificate shall be eligible. It shall be the duty of the county commissioner to notify the superintendent of public instruction and the chairman of each township board of school inspectors of the county to keep a record of all examinations held by the board of school examiners and to sign all certificates and other papers and reports issued by the board; to receive the institute fees provided by law, and to pay the same to the county treasurer quarterly; to keep a record of all certificates granted, suspended, or revoked by the board or himself, showing to whom issued, with the date, grade, and duration of each certificate, and if suspended or revoked with the date and reason therefor; to furnish to each township clerk a list of persons, with data, legally authorized to teach in the county at large and in the township; to visit each of the schools in the county at least once in each year, and to examine carefully the discipline, the mode of instruction, and the progress and proficiency of the pupils, provided, that if the county commissioner is unable to visit all the schools of the county, as herein required, he may appoint such assistant visitors as may be necessary, who shall perform such duties pertaining to the visitation and supervision of schools as the commissioner shall direct, but their expense shall not in any one year exceed $90; to counsel with the teachers and school boards as to the courses of study to be pursued and as to any improvement in the discipline and instruction in the schools; to promote the improvement of the schools in the county and of the teachers and officers, and act as assistant conductor of institutes appointed by the superintendent of public instruction; to receive the duplicate annual reports of the several boards of school inspectors, examine into the correctness of the same, and, when approved, forward one copy of each to the State superintendent and the other to the county clerk; to make an annual report to the State superintendent, and obey all instructions from him, and distribute the blanks and communications forwarded by him. His compensation shall be not less than $500 in a county having 50 schools, not less than $1,000 where there are 100 schools under such supervision, and not less than $1,200 where there are 125 schools under supervision, but in no case shall it exceed $1,500 per annum. The necessary contingent expenses of the commissioner for printing, postage, stationery, record books, and room rent for public examination shall be allowed by the county supervisors to the sum of $200, and no more. No traveling expenses shall be allowed either to a commissioner or any assistant visitor or school examiner. No commissioner shall receive an order for compensation

until he shall file with the county clerk, first, a certified statement from the State superintendent that all reports required of him have been properly made and filed; and second, a detailed statement, made under oath, showing what schools have been visited by him during the preceding quarter and what amount of time was consumed in each school, naming township and school district. No commissioner shall act as agent for the sale of any school furniture, text-books, maps, charts, or other school apparatus, nor be interested financially in any summer, normal, or teachers' training class in the county for which he was elected. In case of vacancy, the office is filled by the chairmen of the township boards of school inspectors in joint session.

Township board of school inspectors.—At the annual meeting of each township there shall be elected one school inspector, who shall hold office for two years and be an elector of the district, or a woman 21 years of age who has resided in the State three months and in the township ten days.

The school inspectors of each township, together with the township clerk, shall constitute the township board of school inspectors. The township clerk shall be clerk of the board, and the other member shall be elected chairman and treasurer, and shall give bond to double the amount of moneys to come into his hands.

The board shall annually make in triplicate a report, setting forth the whole number of districts in their townships, the amount of money raised and received for township and district libraries, and such other items as are given in the reports of the district school directors for the preceding year or as may be required by the State superintendent. Two copies of the report shall be forwarded to the commissioner and one filed in the office of the township clerk. Before making their annual report, it shall be the duty of the board to examine the list of legally qualified teachers on file in the office of the township clerk, and if the examination shows school has not been taught for the legal period, the board shall certify to the facts in the case in the annual report. It shall be its duty also to render to the township board a full account of all moneys received and disbursed by them. The whole number of meetings of the township board of school inspectors at the expense of the township during any one school year shall not exceed eight.

The chairman of the township board of school inspectors shall have general supervisory charge of the schools of his township, subject to such advice and direction as the county commissioner may give, and shall make such reports of his official labors and of the condition of the schools as the State superintendent may direct or the commissioner request.

The board shall divide the township into school districts, which they may from time to time alter and regulate, but no district shall contain more than 9 sections of land of contiguous territory, and shall be as compact as may be.

District board of directors.—At the first meeting in each school district there shall be elected by ballot a moderator for the term of three years, a director for two years, and an assessor for one year, and on the expiration of their respective terms and annually thereafter their successors shall be elected in like manner for a term of three years. Removal from the district, or neglect to file his acceptance or renew any official bond, or other vacancy, however caused, shall be filled by the board thus created, or in case of two vacancies, by the district in special meeting, or in case of the entire membership of the board being vacant or any vacancy is unfilled for twenty days, then the township board of school inspectors shall appoint a new board or fill the vacancy, as the case may be. Any qualified voter in a school district who has property liable to assessment for school tax shall be eligible to office in such school district, unless an alien. Meetings may be called by one member serving the other with notice twenty-four hours in advance, but a majority shall constitute a quorum.

The board shall purchase the necessary books and stationery for doing and recording the business of the district in an orderly manner; shall have the general care of the schools, and shall make and enforce suitable rules and regulations for their government and management and for the care and preservation of school property which is under their care, if not specially confided to the custody of the director; shall lease or purchase sites and build or rent school houses; shall sell sites and other property when directed by the district meeting; shall estimate the amount to be raised which, in addition to other school funds, is necessary for the entire support of the schools and to meet the deficit of the previous year; shall report to the township clerk the amount of taxes voted and the character of all taxes which the board is authorized to impose on the taxable property of the district, and present to the district in writing an accurate statement of all moneys of the district received and disbursed by it; shall contract in writing with duly qualified persons who desire to teach in the public schools, and shall specify what studies shall be taught in the public schools other than those required by law, and may purchase text-books for impecunious pupils.

The moderator shall preside at all meetings of the district and board, countersign all orders legally drawn by the director, prosecute for the district on the assessor's bond, and such other duties as may be required.

The director shall act as clerk to the district and board meetings, draw and sign warrants upon the township treasurer and the assessor, provide the necessary ap-

pendages for the schoolhouse and keep the same in repair, present at each annual meeting an estimate of the expenses necessary to be incurred by the director and for the payment of any district officers, preserve and file copies of all reports made to the school inspectors, and safely preserve and keep all books, etc., belonging to his office or to the district when not otherwise provided for, take the census of the district, making a list of the names and ages of all the children from 5 to 21 years verified by oath, but children in almshouses, prisons, or asylums not residents of the district or attending the schools, shall be omitted, as also Indian children, report to the board of school inspectors at the close of each school year the whole number of children belonging to the district between the ages of 5 and 20 years, the number attending school during the year under 5 or over 20 years of age, the number of nonresident pupils of the district that have attended school during the year, the whole number that have attended school during the year, the length of time the schools have been taught during the year by qualified teachers, the teachers' names, wages, and duration of service, the average time pupils 5 to 20 years of age have attended school during the year, the amount of money received from the township treasurer, the amount raised by the district and the purpose for which intended, the kind of books used, and such other facts as may be required. The director of a fractional district shall make his annual report to the clerk of the township in which the schoolhouse is situated and also to the clerk of the other township in which the fractional district is situated.

The assessor of each school district shall give bond in double the amount probably coming into his hands with two sureties, shall pay all orders of the director, shall report to the district board in writing concerning the receipts and expenditures, shall appear for the district when directed by it, except in cases in which he is interested adversely to the district.

Any school district containing more than 100 children between the ages of 5 and 20 years may, by a two-thirds vote of the qualified electors present at any annual or special meeting, organize as a graded district, and shall elect by ballot from the qualified voters of the district a trustee for one year, another for two years, and a third for three years, and annually thereafter one trustee for three years, who shall select among themselves a moderator, director, and assessor, and for cause shall remove any of them, and shall fill vacancies until the next meeting of the district, and twenty days after the meeting the vacancies left by it unfilled shall be filled by the school inspectors of the township or city. The board of trustees shall classify and grade the pupils attending schools in their district, and shall cause them to be taught in such schools or departments as they may deem expedient (including a high school, if ordered at the annual district meeting to establish a high school). When ordered at annual district meeting, the board shall fix the requisites for admission to and the fees to be paid in such high school, shall audit the accounts of the director, who shall be limited to an expenditure of $50 annually upon the school property of the district, unless authorized by the board to exceed that amount; shall employ the teachers and other necessary employees and determine the amount of their compensation, provided that when nonresident pupils, their parents or guardians, shall pay a school tax in the district, they shall be required to pay only a sum equal to the difference between the amount of the tax and the amount charged for tuition in the high school.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No contract with any person not holding a legal certificate of qualification shall be made by the district board or a majority thereof.

The board of school examiners shall meet at the county seat on the last Thursday in March and the first Thursday in August, and upon not more than four other occasions, for the purpose of examining all persons who may offer themselves as teachers of the public schools. First and second grade certificates shall be granted only at the regular public examinations. The board of school examiners shall meet on the Saturday following each public examination. The board shall grant certificates to persons in such form as the State superintendent of public instruction shall prescribe, licensing as teachers all persons who are 17 years of age who have attended the public examinations and who shall be found qualified in respect to good moral character, learning, and ability to instruct and govern a school, but no certificate shall be granted to any person who shall not have passed a satisfactory examination in orthography, reading, writing, grammar, geography, arithmetic, theory and art of teaching, United States history, civil government, physiology, and hygiene, with reference to the effects of alcoholic drinks, stimulants, and narcotics upon the human system. The board of examiners shall have the right, however, to renew without examination the certificates of persons who shall have previously obtained an average standing of at least 85 per cent in all studies covered in two or more previous

examinations and who shall have been since the examination continuously and successfully teaching in the same county. All certificates shall be signed by the county commissioner and by at least one other member of the board of examiners. All examination questions shall be prepared by the State superintendent, to be furnished by him to the county commissioner under seal, only to be broken in the presence of the persons to be examined on the day of examination.

There shall be three grades of certificates granted. The certificate of the first grade shall be issued only to those who have taught at least one year with ability and success and shall be valid for four years; when granted, however, the examination papers and certificate shall be within ten days forwarded to the State superintendent for inspection, and if countersigned by him, shall be good in any county other than that in which issued. A certificate of the second grade shall be granted only to those who shall have taught at least seven months with ability and success, and it shall be valid throughout the county in which issued. The certificate of the third grade shall be either of two classes, to wit: Third-grade certificates of class A shall be granted only to persons who have taught successfully and continuously for at least three years next preceding the examination in primary departments of graded schools, and such certificate shall entitle the holder to teach in primary departments of graded schools only; third-grade certificates of class B shall license the holder to teach in any school of the county in which it shall be granted for one year, but no more than three certificates of this class shall be granted to the same person. The county commissioner, however, shall have power, upon the results of an examination satisfactory to himself, to grant certificates licensing the holder thereof to teach in a specified district, but a second special certificate shall not be granted the same person, nor shall it continue in force longer than the next public examination. Any certificate may be revoked for cause. [The force of normal-school certificates is given below.]

The teacher shall keep a correct list of the pupils and their age, the number of days each pupil attends, and shall furnish this information to the director with a correct copy of the same.

Preliminary training.—The purpose of the State normal school shall be the instruction of persons in the art of teaching and in all the various branches pertaining to the public schools of Michigan, and the school shall have a course of study intended specially to prepare students for the rural and the elementary graded schools, giving not fewer than twenty weeks of professional instruction. The State board of education shall provide the necessary rules for the government of the school, the courses of study, a fully equipped training school as a school of observation and practice, grant diplomas, and upon the completion of the course specially prescribed for rural and elementary graded schools shall grant, upon the recommendation of the principal and a majority of the heads of departments of the school, a certificate, which shall be signed by the board and the principal of the normal school, and shall contain a list of the studies included in the course. This certificate shall entitle the holder to teach in any of the appropriate schools of the State for five years. Upon the completion of either of the four years advanced courses of study prescribed by the board, it may grant, upon recommendation of the principal and a majority of the heads of the departments, a certificate, which shall set forth the studies completed, and shall be a life certificate.

Meetings.—The State superintendent is authorized to hold annually an institute for the State at large, the cost of which shall not exceed $1,800, to be paid out of the general fund.

The superintendent shall annually appoint a time and place in each county for holding a teachers' institute unless there are fewer than 1,000 children between the ages of 5 and 20 years, when it may be held at the option of the State superintendent, and if 15 teachers interested do not request that an institute be held, the superintendent may hold a joint county institute for several counties, drawing from the institute fund the amount to the credit of each county. Inability of the State superintendent to conduct an institute warrants him in appointing a conductor to act under his supervision. Every teacher attending an institute thus provided for shall be given a certificate setting forth the fact, and no teacher shall be deprived of pay for the time lost in attending.

Any 15 or more teachers or other persons residing in the State who shall associate for the purpose of promoting education and science and improvements in the theory and practice of teaching, may form themselves into a corporation under such name as they may choose, providing they shall have published in some newspaper published at Lansing, or in the county in which the association is to be located, for at least one month previous to its organization, and shall file in the office of the secretary of State a copy of the constitution and by-laws of said association. The association may hold and possess real and personal property to the amount of $5,000, but the funds or property thereof shall not be used for any other purpose than for the legitimate business of the association in securing the objects of its incorporation. It shall have all the powers and duties of a corporation.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—All persons residents of any school district and 5 years of age, shall have an equal right to attend any school therein, and no separate school or department shall be kept for any persons on account of race or color, but this shall not prevent the grading of the schools according to the intellectual progress of the pupil [said schools of different grades] to be taught in separate places, as may be deemed expedient. The district meeting shall determine the length of time school shall be taught which shall not be less than 9 months in districts having 800 children 5 to 20 years of age, nor less than 5 months in districts having from 30 to 800 children of like ages, nor less than 3 months in all other districts, on pain of forfeiture of their share of the one mill tax.

Every parent, guardian, or other person having control or charge of any child or children between the ages of 8 and 14 years shall be required to send such child or children to a public school for a period of at least 4 months in each school year, at least six weeks of which shall be consecutive, unless such child or children are excused from such attendance by the board of the school district in which such parents or guardians reside, upon its being shown to the board's satisfaction that the child's bodily or mental condition has been such as to prevent its attendance at school or application to study for the period, or that such child or children are taught in a private school or at home in such branches as are usually taught in primary schools or have already acquired the ordinary branches of learning taught in public schools: *Provided*, In case a public school shall not be taught for four months during the year within 2 miles by the nearest traveled road of the residence of any person within the school district, he shall not be liable to the provisions of this act.

No child under 10 years shall be employed in any factory, warehouse, or workshop. No child under 14 years of age shall be employed by any person, company, or corporation to labor in any business, unless such child shall have attended some public or private day school where instruction was given by a teacher qualified to instruct in such branches as are usually taught in primary schools for at least four months of the twelve next preceding the month in which such child shall be so employed: *Provided*, That a certificate from the director of the school district or superintendent in which such child shall have attended school shall be evidence of a compliance with the provisions of this act.

Every parent, guardian, or other person having charge or control of any child from eight to fourteen years of age who has been temporarily discharged from any business or employment shall send such child to some public or private day school for a period for which such child shall have been discharged, unless such child shall have been excused from such attendance by the board of the school district for reasons stated in the paragraph next preceding this.

Failure to comply with the above provisions is a misdemeanor, subjecting the guilty person to a fine of not fewer than $5 nor more than $10 for the first and of not fewer than $10 for each subsequent offense; and it shall be the duty of the officers detailed or appointed under the provisions of this act to assist in the enforcement thereof and to institute proceedings.

In all cities, villages, and townships in this State maintaining and supporting a graded school the board of education or other authority may establish one or more ungraded schools for the instruction of certain children, and may require such children to attend the school through the city police or village marshal. The following classes of persons, eight to sixteen years, shall be subject to this compulsion: Habitual truants from any school, the incorrigibly turbulent or disobedient, the vicious or immoral, and loiterers on the streets. If parent or guardian shall, after warning, fail to comply with the law, he or she shall be proceeded against before a justice of the peace and subjected to a fine of not fewer than $10 nor more than $25, or may be required to give bond for $100 that he will comply with the law. But if the offending party plead his inability to cause the child to attend school, then the child shall be sent to one of the State industrial schools, according to its sex.

Character of instruction.—The district board shall specify the studies to be pursued in the schools of the district in addition to the branches in which instruction is now required to be given in the public schools [see Teachers, Appointment and qualifications]. Any school district containing more than 100 children between the ages of 5 and 20 years may, by a two-thirds vote of the qualified electors present at any meeting, organize as a graded school district, and shall immediately elect a board of trustees, who shall classify and grade the pupils of the district and cause them to be taught in such schools or departments as they may deem expedient, including a high school, if that grade of instruction be ordered by the district meeting, and to charge fees for any branch of such secondary instruction.

Text-books.—The district board may purchase at the expense of the district such text-books as may be necessary for the use of children when parents are not able to

furnish the same, and they shall include the amount of such purchase in the report to the township clerk or clerks, to be levied in like manner as other district taxes. From and after June 30, 1890, each school board of the State shall, when authorized by the district, purchase the text-books used by the pupils of the schools in its district in each of the following subjects: Orthography, spelling, writing, reading, geography, arithmetic, grammar (including language lessons), national and State history, civil government, and physiology and hygiene, and all text-books used in any district shall be uniform in any one subject. Text-books so adopted shall not be changed within five years. The text-books to be used for instruction in physiology and hygiene, with special reference to the nature of alcohol and narcotics and their effects upon the human system, shall give at least one-fourth of their space to the consideration of the nature and effects of alcoholic drinks and narcotics, and the books used in the highest grade of graded schools shall contain at least 20 pages of matter relating to this subject, and all text-books used in giving the foregoing instruction shall first be approved by the State board. When the district has authorized the district board to raise by tax a sufficient sum to comply with the foregoing provisions, it shall contract, at a price not greater than the net wholesale price or through advertisement, for the books selected, to be loaned to the pupils. Any district may take further action at a subsequent annual meeting after it has either adopted or rejected free text-books. Any officer refusing or neglecting to purchase or to provide the money for purchasing the text-books voted shall be deemed guilty of a misdemeanor, and upon conviction shall be liable to a fine of $50 or imprisonment in the county jail for thirty days, or both. But any board may buy its books of local dealers if sold as cheaply as offered in the lowest bid.

Buildings.—The district board shall have the care and custody of the schoolhouse and other property of the district, except so far as the district shall not have confided the care and custody thereof to the director. It may be opened for public meetings unless determined otherwise. The director shall provide the necessary appendages and keep it in good condition and repair during the time school shall be taught, but he shall not purchase charts or any apparatus to be used in the schoolroom without a vote of the district authorizing him to do so. The district board shall purchase or lease in the corporate name of the district such sites for schoolhouses as shall have been lawfully designated, and shall build, hire, or purchase such schoolhouses as may be necessary out of the fund provided for that purpose and make sale of any site or other property of the district when lawfully directed by the qualified voters; but no district in any case shall build a stone or brick schoolhouse upon any site without having first obtained a title in fee to the same or a lease for ninety-nine years, nor shall any district build a frame schoolhouse on any site for which they have not a title in fee or a lease for fifty years without securing the privilege of removing the said schoolhouse. After schools have been maintained at least 8 months in the year, any surplus money arising from the one mill tax may be used in purchasing sites, buildings, or furniture, if so ordered by district meeting.

4. Finance.

Funds (permanent and special).—Taxation.

Funds (permanent and special).—The proceeds from the sales of all lands that have been or hereafter may be granted by the United States for educational purposes, and the proceeds of all lands or other property given by individuals or appropriated by the State for like purposes, shall be a perpetual fund, the income of which shall be inviolably appropriated annually to the specific objects of the original gift, grant, or appropriation. All escheated lands shall become a part of the school fund. The State superintendent shall semiannually, on receiving notice from the auditor-general of the accounts thereof, and between the 1st and 10th day of May and of November, apportion interest of the primary school fund among the several townships and cities of the State in proportion to the number of children in each between the ages of 5 and 20 years, as shall appear from the reports of the boards of school inspectors made prior to the May apportionment or from the best sources of information at his command, and shall prepare a statement of the amount in the aggregate payable to each county; and on reception of such statement the auditor-general shall draw his warrant upon the State treasurer in favor of the treasurer of each county to the amount due. The superintendent shall also send written notices to the clerks of the several counties of the aggregate amount to be disbursed in their respective counties and the amount payable to the townships and cities therein respectively. In case any county, township, city, or district shall fail to receive its share of the interest of the school fund, such deficiency shall be made up in the next apportionment; and whenever any district has had three months' school, but has failed to have the full time of school required by law through no fault of the district or its officers, he may include such district in his apportionment.

All money derived from the dog tax remaining after the satisfaction of the claims of sheep owners shall be apportioned among the several school districts, if over $100, in proportion to the number of children of school age.

Taxation.—It shall be the duty of the supervisor of the township to assess the taxes voted by every school district in his township, and also of all other taxes provided for by the school law chargeable against such district or township, upon the taxable property of the district or township respectively, and to place the same on the township assessment roll in the column for school taxes, and the same shall be collected and returned by the township treasurer in the same manner and for the same compensation as township taxes. He shall also assess 1 mill upon each dollar of taxable property, and all money so raised shall be apportioned by the township clerk to the district in which it was raised. The supervisor, on delivery of the warrant for the collection of taxes to the township treasurer, shall also deliver to him a written statement of the amount of school and library taxes, the amount raised for district purposes on the taxable property of each district in the township, the amount belonging to any new district on the division of the former district, the names of all persons having judgments assessed upon the taxable property of any district, with the amount payable, and the amount of the 1-mill tax levied within the bounds of a fractional school district a part of which is situate within his township but the returns of which are made to the clerk of another township, and the treasurer shall pay to the township treasurer of such other township the amount of the taxes so levied and certified to him for the use of such fractional school district. The township treasurer shall retain in his hands out of the moneys collected by him, after deducting the amount of tax for township expenses, the full amount of the school taxes on the assessment roll, and hold the same subject to the warrant of the proper district officers, to the order of the school inspectors or other persons authorized to draw thereon, and give written notice to the township clerk of the amount.

Any school district may by a two-thirds vote of its qualified electors present at an annual or at a meeting called specially for the purpose, issue bonds to pay for a schoolhouse site and to erect or furnish school buildings as follows:

Districts—	Indebtedness.
Of fewer than 30 persons 5 to 20 years may incur not more than	$300
Of 30 persons 5 to 20 years may incur not more than	500
Of 50 persons 5 to 20 years may incur not more than	1,000
Of 75 persons 5 to 20 years may incur not more than	2,000
Of 100 persons 5 to 20 years may incur not more than	3,000
Of 125 persons 5 to 20 years and an assessed valuation of property of $150,000 or more may incur not more than	5,000
Of 200 persons 5 to 20 years may incur not more than	8,000
Of 300 persons 5 to 20 years may incur not more than	15,000
Of 400 persons 5 to 20 years may incur not more than	20,000
Of 500 persons 5 to 20 years may incur not more than	25,000
Of 800 persons 5 to 20 years may incur not more than	30,000

But in no case shall the indebtedness of a district extend beyond ten years for money borrowed. And in all proceedings under these provisions the director, assessor, and one person appointed by the district board shall constitute a board of inspection, who shall cause a poll list to be kept and a suitable ballot box to be used, which shall be kept open for two hours. When the school district shall have voted to borrow any sum of money, the district board shall issue the bonds thereof in sums of not less than $50 and at a rate of interest not greater than 8 per cent, and the district is authorized to provide for the payment of principal and interest by taxation [see also under Schools, Attendance].

WISCONSIN.

1. Organization of the System.

State superintendent.—Inspector of free high schools.—State board of examiners.—County superintendent.—District and high school boards.—Township board of directors.—City board of education.—Truant officers.

State superintendent.—A State superintendent shall be elected every two years. He may appoint an assistant, who shall perform such duties as the superintendent shall prescribe, also a chief clerk at a salary of $1,500 per annum, a clerk at not more than $1,200 who shall aid in the establishment and administration of libraries, and such other clerks, no one of which is to receive more than $1,000, as the work of his office may require. He shall have general supervision over the schools of the State; shall visit and inspect schools as far as practicable in every county, shall awaken an interest in public education and its improvement, shall recommend text-books

and secure uniformity as far as practicable, discourage the use of sectarian books and instruction, and open correspondence which will acquaint him with the movement of educational affairs throughout the State. He shall prescribe rules for the management of school-district libraries, prepare suitable forms for the use of local officers, and cause the laws and necessary instructions to be printed in pamphlet form, and distribute them to those having care of the public schools, with whom he shall also communicate through circulars and bulletins of information. He shall publish courses of study for ungraded and high schools, decide all cases appealed to him, and prescribe rules of practice, collect such books, apparatus, maps, and charts as can be obtained without expense to the State, and purchase rare and valuable works on education, for which $150 may be drawn from the treasury, apportion and distribute the school fund, and make copies at the rate of 12 cents a folio of any papers on file in his office. He shall hold at least four conventions of county superintendents, and make a biennial report which shall contain an abstract of all the common-school reports received by him from the several clerks of the county board of supervisors, a statement of the common schools in the State, estimates and accounts of expenditures of the school money, plans for the improvement and management of the common-school fund and for the better organization of common schools, a statement of his official visits during the year, and all such matters relating to his office and the common schools of the State as he may deem expedient to communicate.

Inspector of free high schools.—The State superintendent may appoint a person of suitable qualifications to assist him in visiting, inspecting, and supervising the free high schools of the State and to aid in giving any needed assistance to localities in organizing and maintaining free high schools in towns where no graded schools exist.

State board of examiners.—(See Teachers, Appointment, qualifications, and duties.)

County superintendent.—There shall be elected (biennially) by each county a superintendent of schools, whose duty it shall be to examine and license teachers; to visit schools at least once in each year and note the condition of instruction and the buildings, including the adornment of the school grounds; to direct alterations and repairs required by hygienic laws if costing no more than $25; to condemn houses unfit for use; to report annually to county board of supervisors; to transmit to the State superintendent the abstract of the report received from city, town, or village clerks; to report upon such matters as the State superintendent may require; to organize and conduct at least one institute for the instruction of teachers during the year; to advise upon questions arising under the operation of the school board; to form inspection districts for the purpose of teachers. He shall not engage in teaching if receiving fewer than $800 per annum nor any other occupation, nor absent himself from the county or district to engage in any occupation during the term for which he is elected for such time or in such manner as to interfere with the proper discharge of his duties as superintendent of schools. Whenever the county seat is located in a city having a school system of its own and there shall be two county superintendent districts in the county both superintendents may reside at the county seat. The county board of supervisors may allow the county superintendent his traveling expenses, not over $200. Upon petition setting forth the reasons, the county judge, after a judicial investigation, may remove any county superintendent for cause shown.

District board.—The town board of each town shall have power to form and alter districts, but no district shall contain more than 36 square miles and must be composed of contiguous territory, nor shall a district be so diminished in size as to leave it with an indebtedness exceeding 5 per cent of its taxable property. The annual meeting of all school districts shall be held on the first Monday of July of each year, at 7 p. m., unless otherwise ordered by the district. The district shall have power to choose a director, treasurer, and clerk; to designate a site for a schoolhouse; to vote a tax to procure site and build, repair, or furnish the schoolhouse (*Provided*, That a district having fewer than 250 inhabitants must obtain the consent of the town board to raise more than $600 for building or purchasing a schoolhouse, and districts having fewer than 1,000 inhabitants must obtain the consent of the town board to raise more than $1,000); to vote a tax for teachers' wages on the following schedule: Districts having an average attendance of 15 shall not raise more than $350; 15 to 30, not more than $450; 30 to 40, not more than $550; to authorize the sale of any schoolhouse site or other property; to tax to pay indebtedness; to buy apparatus; to raise $100 or less sum annually to procure library; to borrow money; to admit to the schools persons over 20; to authorize the board to purchase text-books; to determine duration of the session of school; and to fix compensation of clerk. [For free high school district see "Schools, Character of instruction," and "Finances, Taxation."]

The officers of each school district shall be a director, treasurer, and clerk, who shall be residents of the district, and shall hold for three years, one being elected annually; together they form the district board, and in case of vacancy the other members shall fill it. The district board shall execute the decisions of the district

meeting, and shall have the care and keeping of the school property, may purchase national flags, shall contract with teachers, expel pupils for cause, and determine what schoolbooks shall be used and what branches other than as required by law be taught in the school under their charge.

The clerk shall annually make a report under oath to the town clerk containing the number of children, by sex, 4 to 20 years of age, and the names of their parents or guardians; the number, 4 to 20, taught in the schools, by sex; the number in school under 4 and over 20; the number of days schools are taught by qualified teachers, including holidays, and the days teachers have attended an institute; the names of all teachers employed during the year, the number of days taught by each, the monthly wages paid to each, and the time allowed for attendance on teachers' institute; the amount of money received from the town treasurer during the year, designating the amount received from apportionment of the common school income, the amount of public money received in each, the number of children taught in each, and the number 4 to 20 years; the amount of money received in the town for school purposes since the date of the last preceding report (setting forth separately the amount received from the State, the amount levied by the county board, the amount raised by the town at its annual meeting in towns where the township system of school government has been adopted); the amount raised by district tax, the manner in which such moneys have been disbursed, the balance on hand, and generally such other facts as the State superintendent may require concerning public or private schools.

Each town clerk shall make a report to the county superintendent, stating the whole number of school districts set off within the town and the number of parts of joint districts in which the schoolhouses belonging thereto are located, the districts or parts of districts in which reports shall have been made, and length of time school has been taught in each district reporting.

Township board of directors.—Any town may vote to adopt the township system, and the several school districts and parts of joint districts within the town shall then be styled subdistricts. The clerks of the several subdistricts and parts of joint districts shall constitute the town board of school directors.

The board of school directors of each town shall have power, out of the funds provided by the town for that purpose, to purchase or hire sites, houses, and rooms for the use of schools, and to fence and improve the same, as they may deem proper, and upon such sites to build, enlarge, alter, improve, and repair schoolhouses, outhouses, or any other building for school purposes, as they may deem advisable; and also, whenever in the opinion of the board any schoolhouse or schoolhouse site is no longer needed for school purposes, the same may be sold and conveyed in the corporate name of the board, such conveyance to be executed by the president and secretary of the board.

Said board shall establish and maintain such and so many schools in the several subdistricts under their charge as they may deem requisite and expedient: *Provided*, That there shall be at least one common school in each subdistrict, and that all such schools shall be kept each year not less than six months. The board shall have, in all respects, the supervision and management of all the schools, with full power to adopt, enforce, modify, and repeal from time to time all rules and regulations not inconsistent with the laws of this State necessary for their organization, gradation, and control, and for the instruction given by them in the different branches of education taught therein, and to establish and enforce proper penalties for the violation of such rules. It shall elect a secretary, who may or may not be a member, who shall perform the duties of clerk and superintendent.

All powers conferred upon district boards by the provisions of the school law excepting those the exercise of which would conflict with the provisions of law relative to the township system, are hereby conferred upon the town boards of directors herein provided for.

Truant officers.—See under Schools, Attendance.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—Every person who shall desire to teach in any of the common schools, unless holding a diploma or certificate then authorizing that person to teach, shall procure such certificate from the proper examining officer, and no certificate shall have force except in the district of the examining officer issuing it; but any county superintendent may call upon another to send him the examination papers upon which a certificate was issued, and if satisfactory may issue a certificate of like grade.

Certificates shall be of three grades. The third-grade certificate shall entitle the holder to teach one year or less in any town of the superintendent's district in which

the teacher has been examined, but may be limited to any town or district, and shall show that the holder has passed in orthography, orthoepy, reading, penmanship, arithmetic, English grammar, geography, history and Constitution of the United States, the constitution of Wisconsin, physiology and hygiene with special reference to the effects of stimulants and narcotics upon the human system, and the theory and art of teaching. The second-grade certificate shall entitle the holder to teach for two years, and embraces all the subjects required for the third-grade certificate and grammatical analysis, physiology, physical geography, and elementary algebra. A first-grade certificate shall entitle the holder to teach for four years (but the county superintendent may limit its duration to one year subject to removal of the restriction after six months of successful teaching by the holder), and shall embrace all the subjects of the second-grade certificate and higher algebra, natural philosophy, and geometry.

The State superintendent shall annually appoint three competent persons at $5 per diem for actual service, residents of the State, who shall constitute a board of examiners, and meet at least once a year to examine applicants for State certificates (provided the State superintendent is thereby authorized to examine principals of high schools and of free high schools who shall have been elected superintendents of the city schools containing such high schools, and to grant certificates to successful candidates valid for one single locality). The State superintendent shall prescribe the manner of conducting and managing such examinations, reporting the results thereof, and with the advice of the examiners in what branches of study in addition to those fixed by law the applicant for an unlimited State certificate shall be examined. The required subjects are those of a first-grade county certificate, mental philosophy, and English literature. In addition, evidence shall be required of good moral character, experience, and success in teaching. An unlimited State certificate shall qualify to teach in any public school of the State. A limited State certificate shall qualify to teach in any public school for five years from its date.

The State superintendent is authorized to examine principals of high schools and of free high schools who shall have been elected superintendents of the city schools containing such high schools, and to grant certificates valid for one year and for a single locality. The State board of examiners may grant diplomas of scholarship and ability to teach to normal school graduates passing a thorough and satisfactory examination in the course of study prescribed by the board, and when any such graduate has, after receiving such diploma, taught a public school in the State for one year the State superintendent may countersign the diploma after investigating the moral character and professional ability of the holder, which shall thereafter have the force of an unlimited State certificate. Any graduate of the State university successfully having taught a public school in the State for sixteen months is entitled to have his diploma countersigned by the State superintendent after examination as to moral character and professional ability. The diploma so countersigned has the force of an unlimited State certificate. Graduates of any college or university incorporated by the State having courses fairly equivalent to the corresponding courses in the State university may have their diplomas countersigned as above described for the State university. Graduates of the course in the science and art of teaching in the State university may have their diplomas countersigned by the State superintendent after the holder has successfully taught a public school in the State eight months and examination as to moral character and professional ability. Graduates of the Milwaukee normal school having taught five years in a public school of the State shall have their diplomas countersigned, after examination as to character and professional ability, by the State superintendent, making it in effect an unlimited State certificate.

Preliminary training.—For the government of the normal schools established, and which may hereafter be established, there is constituted a board called "the board of regents of normal schools," composed of the governor and State superintendent, as ex officio regents, and of nine appointed regents. The term of office of the regents appointed shall be three years, the term of office of three regents expiring each year; and not more than two such members of the board shall reside in any one Congressional district. The governor shall fill all vacancies by appointment, by and with the approval of the senate, if the legislature be in session, and if not, then subject to the approval of the senate at the next succeeding session; but in case of a vacancy before the expiration of a term, the appointment shall be for the residue of the term only.

In addition to those heretofore established, the board of regents may establish other State normal schools at such places as they may designate, upon sites selected by them, and when, in their opinion, the educational interests of the State require it they may proceed to erect suitable buildings upon the sites so selected, and they may enlarge, alter, or repair any normal school building.

The exclusive purposes and objects of each normal school shall be the instruction and training of persons, both male and female, in the theory and art of teaching, and in all the various branches that pertain to a good common-school education, and in

all subjects needful to qualify for teaching in the public schools; also to give instruction in the fundamental laws of the United States and of this State in what regards the rights and duties of citizens. Said board shall also establish a model school or schools for practice in connection with each State normal school, and shall make all the regulations necessary to govern and support the same; and they may, in their discretion, admit pupils to such model schools free of charge of tuition.

The said board shall have the government and control of all the normal schools, and shall have power therefor.

Meetings.—Institutes for the instruction of teachers shall be held in each year in such counties as may be designated by the State superintendent, with the advice and concurrence of the board of regents of the normal schools, preference being given to such counties as receive the least direct benefits from the normal schools. The State superintendent, by and with the advice and consent of said board, may make such rules and regulations as they shall deem proper for organizing and conducting such institutes, and may, by and with the like advice and consent, employ an agent or agents to perform such work in connection therewith as by such rules and regulations may be prescribed. Each of said institutes shall be held under the direction of such agent or agents, assisted by the county superintendent. The course of study pursued in such institutes shall, as far as practicable, be uniform, and be prescribed by the State superintendent, with the assistance of such agents, but subject to revision by the board. The board may use such sum, not exceeding eight thousand dollars in any year, as it may deem necessary, of which not exceeding six thousand dollars shall be paid from the normal school fund income and not exceeding two thousand dollars from the general fund, and the State superintendent may use such additional sum, not exceeding one thousand dollars, to be also paid from the general fund, as he shall deem proper for the purpose of providing public lectures in connection with such institutes by the professor of the theory and art of teaching of the university or such other competent person as the State superintendent may designate, and such amounts as shall be so expended are hereby annually appropriated from the said funds respectively.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—The electors of a district shall determine the length of time a school shall be taught, which shall not be less than six months free, to all.

Every parent or other person having under his control any child between the ages of 7 and 13 years shall cause such child to attend, for at least twelve weeks in each and every school year, some public or private school: *Provided, however,* that this act shall not apply to any child that has been or is being otherwise instructed for a like period of time in the elementary branches of learning, or that has already acquired such knowledge, or whose mental or physical condition is such as to render his or her attendance at school and application to study inexpedient or impracticable, or who lives more than 2 miles from any school by the nearest traveled road, or who is excused for sufficient reasons by any court of record. Every person who shall violate the provisions of this section shall, upon conviction thereof, be fined in any sum not less than $3 nor more than $20 for each and every offense.

It shall be the duty of the director of any school district, or the president of any board of education of any incorporated village or city, or any truant officers appointed by such board of education to prosecute any offense occurring under this act, and such person neglecting to prosecute for such fine within fifteen days after a written notice has been served upon him by any qualified elector or taxpayer within the district, village, or city within which the offending party shall reside shall be liable to a fine of not less than $10 nor more than $20 for each and every offense.

The board of education of every city and incorporated village and the district school board in every school district may appoint one or more persons, who shall be designated as truant officers, whose duty it shall be, acting discreetly, to apprehend upon view all children between 7 and 13 years of age who habitually frequent or loiter about public places and have no lawful occupation, and place such children, when so apprehended, in such schools as the parent or other person having the control of such children may designate. And such officers shall report all cases of truancy to their respective boards of education within a reasonable time. The persons appointed such truant officers shall be entitled to such compensation as shall be fixed by the boards appointing them, and such compensation may be paid out of the school fund.

The fines provided for by this act shall, when collected, be paid over by the officers collecting the same to the proper school treasury of the city, village, or school district in which such person convicted resides, to be applied and accounted for by such

treasurers in the same way as other moneys raised for school purposes, and shall be placed by such treasurers to the credit of any city or district in which such person resided at the time of conviction.

It shall be the duty of all officers empowered to take the annual school census to ascertain the number of children between the ages of 7 and 13 years in their respective districts, the number of children between such ages who did not attend school, and, in so far as possible, the cause or causes of such failure to attend school.

Character of instruction.— Orthography, orthoepy, reading, writing, grammar, geography, arithmetic, the Constitution of the United States and of Wisconsin, and the influence of alcoholic drinks and narcotics shall be taught in every school district, and such other branches as the district board may determine. All instruction shall be in the English language, except that the district board or the board of education of any incorporated village or city may cause any foreign language to be taught by a competent teacher to such pupils as may desire it, not to exceed one hour each day.

Any incorporated village or city or school district which contains within its limits an incorporated village, or which has a graded school of not less than two departments, with not less than 25 pupils prepared to begin a high-school course, and a town, or two or more towns may establish and maintain not exceeding two high schools. The question of establishing such schools may be submitted by the town, school district, or village board, or common council at any annual or duly called special meeting or election, upon written resolution therefor proposed for adoption. If the resolution be adopted, such towns, school districts, village, or city shall constitute a high-school district. [See also under Organization, District board and Township board.]

Towns containing no graded schools may establish a free high school, and when maintained three months the State superintendent shall include it in a separate and distinct class of schools of the kind, each member of which shall receive from the general fund of the State one-half the amount actually expended for instruction in the school, but the whole amount paid to this class of institutions shall not exceed $25,000 in any one year.

Text-books.—The electors of a district shall have power to authorize the board of trustees to purchase text-books for use in the public schools, to be loaned or furnished pupils under such conditions as the board may prescribe, and may levy a tax for the purpose.

The district board shall determine what school and text books shall be used in the several branches taught in the schools; they shall make a list of such books, and file one copy with the clerk and keep one copy posted in the schoolhouse. When any such text-books shall have been adopted (except in districts furnishing free text-books to all pupils attending school therein) they shall not be changed for the term of three years, and no change of text-books shall be made by a school board (except in districts furnishing free text-books as aforesaid) unless authorized by a majority vote of the legal voters of a district, at a regular annual school meeting; and it is hereby made the duty of the district clerk to embody in his notice of such annual meeting the fact that the question of a change of text-books will be submitted to the meeting.

The several boards of education having the government in cities of the public schools shall determine what school and text books shall be used in the several branches of study pursued in the schools, and shall make a list of such books, file a copy with their clerk or secretary, and keep a copy publicly posted in each school building. When any such text-books shall have been adopted they shall not be changed for the term of three years. Any board of education in any city where the district system is not in force may, under the limitations of this act, order changes in text-books: *Provided*, That said changes shall be approved by the common council or board of aldermen of such city; and the aforesaid boards of education are hereby authorized to purchase text-books for use in the public schools, and to loan or furnish them to pupils under such conditions or regulations as they may prescribe. But no text-books shall be permitted in any free public schools which would have a tendency to inculcate sectarian ideas.

Buildings.—The district electors shall designate the site for a schoolhouse, and vote the money to build it or to repair it when built, and furnish it, but no district containing a population of fewer than 250 inhabitants shall vote a tax for building a schoolhouse costing more than $600, in any one year, unless the town board shall certify to the necessity of a larger sum, and in districts of fewer than 1,000 inhabitants, costing more than $1,000, unless the town board certify to a larger amount. The electors may direct the sale of school property. The district board shall have the care and keeping of the school property, and shall keep it in good repair, and provide all necessary appendages, which may include an American flag. They may grant leave to any responsible inhabitant or inhabitants of the district to occupy the schoolhouse for such public meetings as will aid in disseminating intelligence and good morals. The county superintendent may condemn a school building as unfit for use.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The proceeds of all lands that have been or hereafter may be granted by the United States to this State for educational purposes (except the lands heretofore granted for the purposes of a university), and all moneys, and the clear proceeds of all property that may accrue to the State by forfeiture or escheat, and all moneys which may be paid as an equivalent for exemption from military duty, and the clear proceeds of all fines collected in the several counties for any breach of the penal laws, and all moneys arising from any grant to the State where the purposes of such grant are not specified, and the 500,000 acres of land to which the State is entitled by the provisions of an act of Congress entitled "An act to appropriate the proceeds of the sales of the public lands and to grant preemption rights," approved the 4th day of September, 1841, and also the 5 per cent of the net proceeds of the public lands to which the State shall become entitled on her admission into the Union (if Congress shall consent to such appropriation of the two grants last mentioned) shall be set apart as a separate fund, to be called the "school fund," the interest of which, and all other revenues derived from the school lands, shall be exclusively applied to the following objects, to wit:

1. To the support and maintenance of common schools in each school district and the purchase of suitable libraries and apparatus therefor.

2. The residue shall be appropriated to the support and maintenance of academies and normal schools, and suitable libraries and apparatus therefor.

The school-fund income shall be annually apportioned by the State superintendent. Such apportionment shall be made among the several counties and the several towns, specially incorporated villages and cities in each county according to the number of children in each over the age of 4 and under the age of 20 years, as shown by the reports made to the State superintendent during the year preceding; but no apportionment shall be made to any town, village, or city which shall have failed to raise by tax during the preceding year, for the support of common schools therein, a sum equal to the amount of its share from the school-fund income, as determined by the county board of supervisors, unless the town or village board or common council of such city so failing shall have transferred, as they are hereby authorized to do, from the general fund to the school fund of the town, village, or city, for such purpose the amount of deficit in such school tax, and the town, village, or city clerk shall have filed with the State superintendent his certificate showing such transfer to the school fund and his apportionment thereof to the proper school districts or transfer to the board of education, and no apportionment shall be made to any city, village, or town for any school district therein, for any year during which such district shall not have maintained a common school, taught by a qualified teacher, for six months, unless the State superintendent shall be satisfied that school was so taught for three months, and the failure to maintain it for the full six months was occasioned by some extraordinary cause, and not arising from neglect or intent to avoid the legal obligation; nor to any town, village, or city, nor for any school district, reports of which, as required by law, shall not have been made and transmitted during the preceding year to the State superintendent; nor to any city for any year the report for which shall not show that the number of children between the ages aforesaid residing therein has been ascertained by an actual census taken under the direction of the board of education, or other body having the government of common schools therein, by their clerks or persons of their appointment for that purpose.

Taxation.—There shall be levied and collected annually a State tax of 1 mill for each dollar of the assessed valuation of the taxable property of the State, which amount, when so levied and collected, is appropriated to the common-school-fund income, and shall be disbursed in the same manner and under the same conditions and restrictions required by law for the disbursement of the common-school-fund income.

The district electors shall vote such tax as the meeting shall deem sufficient to purchase or lease a suitable site for a schoolhouse, to build, hire or purchase a schoolhouse, and to keep in repair and furnish the same with the necessary fuel and appendages. (See Schools, Buildings.)

To vote such tax as the meeting shall deem proper for the payment of teachers' wages in the district: *Provided*, That for such purposes, in all school districts having an average attendance at school for the year of 15 scholars or less, not more than $350 shall be raised in any one year; in all school districts having an average attendance of not more than 30 nor less than 15 scholars, not more than $450 shall be raised in any one year; and in all school districts having an average attendance of not more than 40 nor less than 30 scholars, not more than $550 shall be raised in any one year.

If any district shall not at its annual meeting or at a subsequent special meeting, prior to the third Monday of November following, vote a tax sufficient to maintain a

school in said district for the term of six months during the ensuing year, the district board shall then, on or before the Wednesday next following said third Monday of November, estimate and determine the sum necessary to be raised to maintain such school, and the district clerk shall forthwith certify to the town clerk the amount so fixed, who shall assess the same as other district taxes are assessed. All school money received from the school-fund income shall be applied exclusively to the payment of teachers' wages.

The high-school board (see Schools, Character of instruction) shall annually determine the amount necessary to be raised by tax for the support of such high school, and certify the same to the proper town, city, or village clerk; if a joint high-school district, they shall certify to the town clerk of each town the proportionate amount thereof to be raised by such town, such proportion to be determined according to the total valuation of all the taxable property in such town and paid to the high-school district treasurer. Any town which is a single high-school district may, by resolution adopted at the annual town meeting, limit the amount to be raised for high-school purposes in such town during such year. In case of a joint high-school district, the town boards of the several towns embraced may, by a joint resolution adopted by all such town boards before the first day of July, likewise limit the amount to be raised in such district.

MINNESOTA.

1. Organization of the System.

State superintendent of public instruction.—High-school board.—County superintendent of public instruction.—District trustees.—City, town, and village board of education and superintendents and examiners.

State superintendent of public instruction.—A superintendent of public instruction shall be appointed by the governor, by and with the consent of the senate, and shall hold his office for two years. An office shall be provided for him at the seat of government, in which he shall file all papers, reports, and public documents transmitted to him by county superintendents, county auditors, and from other sources; and he shall keep a fair record of all matters pertaining to his office. He is required to appoint an assistant superintendent, to perform such service in the department as may be assigned to him. He shall meet the county superintendents of each judicial district, or two or more districts combined, if he shall deem it more conducive to the interests of education, at such time and place as he shall appoint, with the object of accumulating valuable facts relative to schools, and in general to listen to all communications and suggestions and enter into all discussions relative to the work of the schools. He shall annually hold in the sparsely settled counties as many State institutes as may be practicable. He shall report to the legislature through the governor biennially, which report shall contain (1) An abstract of the common-school reports received by him from the several county superintendents, showing the number of organized school districts in the State, the number of schools taught, and the enrollment and average attendance in the same; (2) A statement of the condition of public schools and of all other institutions of learning in the State that may report to him; (3) The amount of school moneys collected and expended each year from all sources, specifying the amounts from each source respectively; (4) All matters relating to his office, the public schools of the State, and the school fund, the number and character of teachers, and whatsoever he may deem expedient to communicate.

He shall prepare and distribute, through the county superintendents of schools, suitable school registers and blanks for teachers' and clerks' reports to the county superintendents.

State high-school board.—The governor, State superintendent, and the president of the University of Minnesota are hereby constituted a high-school board, with power to establish rules for the examination, acceptance, reporting, and courses of study of secondary schools having all the branches prescribed as prerequisite for admission to the collegiate department of the University of Minnesota. The actual expenses incurred by the board shall be paid and those of any examiner appointed by them, who may in addition receive a per diem not to exceed $3 per day or 50 cents an hour, provided he is not receiving a salary from any State institution.

County superintendent of public instruction.—In each county of this State there shall be elected biennially a county superintendent of schools for two years. Vacancies to be filled by county commissioners.

County superintendents of schools shall examine and license teachers and annul certificates for causes shown; visit and instruct the schools of their counties at least once in each term, and give such advice to the teachers as may be requisite and necessary; shall organize and conduct at least one institute for the instruction of teachers in each year, if they deem the same expedient; encourage teachers' associations,

introduce to the notice of teachers and the people the best modes of instruction, the most approved plans of building and ventilating schoolhouses, of ornamenting and adapting school grounds to convenience and the healthful exercise of children; stimulate school officers to the prompt and proper discharge of their duties; receive the reports of school-district clerks and teachers, and transmit an abstract of the same to the State superintendent, adding thereto a written statement on the condition and prospects of the schools under their charge, together with such other information and suggestions as they think proper to communicate. To secure uniformity and accuracy in such reports county superintendents may call meetings of district clerks.

The salary of the county superintendent shall be fixed by the county board of commissioners, but shall not be less than $10 for each organized district in the county. In case of physical inability to visit schools or examine teachers, the county superintendent may appoint a deputy for not more than sixty days in any one year. He may also, in counties having 100 or more school districts, appoint, with the consent of the county board of commissioners, an assistant for twenty days of work in visiting schools in the first part of each term, winter and summer, who shall be paid a per diem of $3 and necessary traveling expenses. In counties having 175 or more organized districts a permanent assistant may be appointed, at a salary of not more than $1,500 per annum. Every failure of the county superintendent to make the reports required by law causes him to forfeit $50 of his salary.

District board of trustees.—School districts shall be classified as follows: First, common school districts, including all districts not embraced in either of the two following classes; second, independent school districts, including all districts now organized as such or that may hereafter be organized; third, special school districts, including all districts now organized as such, or that may hereafter be organized wholly or in part under any special laws of this State.

Districts are made or changed by the county commissioners after hearing of the localities concerned; but any district may contain the entire township in which it is situated, or a tract 6 miles square in different townships. The legal voters of school districts when lawfully assembled, not fewer than 5 being present, shall have power, by a majority of votes of those present, to elect a director, clerk, and treasurer, which election shall be by ballot; to designate a site for a schoolhouse—provided, that the site for a schoolhouse shall not be changed after having been designated, unless at least a majority of the legal voters in the district, who have resided therein for a period of at least six months prior to such vote, and two-thirds of the voters so qualified who are present and voting, vote in favor of such change, except that whenever a majority of the legal voters of any school district, voting thereon, shall determine to build a new schoolhouse, or to remove a schoolhouse already built in such district, and the schoolhouse site therein shall be more than one-quarter of a mile from the center of the district, then a majority of the legal voters of such district, voting thereon, may change the site to a more central location; to vote an amount of money, to be raised by a tax on the taxable property of the district, sufficient to meet the conditions on which apportionments from State school funds are made to districts, and to raise such additional amounts as the district may determine to purchase or lease a site for a schoolhouse, and to build, hire, or purchase such schoolhouse when the same is necessary; to keep in repair and provide the same with the necessary furniture and appendages; to procure fuel; and to purchase or increase the library and school apparatus; to appoint a librarian; and to make all rules necessary for the usefulness, preservation, and increase of the library.

The director, treasurer, and clerk shall form the board of trustees, and the remaining members fill any vacancy.

The board of trustees shall have the general charge of the interests of schools and schoolhouses in their district; shall lease or purchase in the corporate name of the district a site for a schoolhouse designated by the legal voters of the district; shall build, hire, or purchase a suitable schoolhouse with the funds provided for that purpose, and when directed by the legal voters of the district at any legal meeting of the same, may sell or exchange any such site or schoolhouse; shall submit an estimate of the expenses of the district for the coming year; shall levy a tax if the district neglects to vote it, and shall contract with and hire teachers.

City, town, and village boards of education.—Any city, town, village, township, or school district, now or hereafter organized, may be organized into and established as an independent school district in the manner and with the powers hereinafter specified, but this shall not apply to any township or school district containing less than 500 inhabitants, unless said school district consists in whole or in part of an incorporated city, town, or village, nor to any city, town, or village, or any part thereof, which now has any special law regulating its schools, and the territorial limits of no independent district hereafter organized shall exceed 6 miles square.

In case a majority of the voters are in favor of creating an independent district, the district shall elect 6 directors, 2 to retire each year, who shall collectively be

styled the board of education (of the city, town, village, or township), who shall elect a president, clerk, and treasurer, and may also elect a superintendent at such salary as they may fix. The superintendent shall visit the schools of the district, shall superintend the grading of them, the examinations for promotion, shall perform such other duties as the board prescribe, and shall report to the State superintendent of public instruction through the county superintendent or directly.

The board shall establish such grades of schools, alter, and discontinue the same; shall provide necessary rooms or buildings for schoolhouses, and grounds about the same; shall, when authorized by the district, purchase or erect one or more schoolhouses and purchase sites; shall purchase, sell, and exchange school apparatus, furniture, stoves, and other appendages for schoolhouses, and furnish fuel for the same; shall take care of the property of the district, and procure insurance, and make ordinary repairs upon the same, or any part thereof, when deemed expedient; shall contract with, employ, and pay teachers who have received certificates, as provided herein, and discharge the same; shall defray the necessary expenses of the board, pay the compensation of the clerk, treasurer, and superintendent, and for such printing, record books, stationery, and other incidental matters as may be deemed proper; shall superintend and manage in all respects the schools of said district, and from time to time adopt, alter, modify, and repeal rules for their organization, government, and instruction, for the keeping of registers, for the reception of pupils, resident and nonresident within the district, their suspension, expulsion, and transfer from one school to another, prescribe text-books and a course of study for the schools, and visit each school in the district not less than once in three months; shall provide for the prompt payment at maturity of the principal and interest of any indebtedness of the district by voting from time to time taxes upon the taxable property of said district sufficient to meet the same, making allowances for delinquency in paying any part of such taxes; shall appoint and furnish to the board of examiners the necessary blanks for all such grades of such certificates as the board may at any time order, which certificates shall severally contain the branches fixed for the several grades of certificates; shall, when authorized by a vote of the district, make, execute, and deliver, for and in behalf of said district, deeds, mortgages, releases, and all other instruments relating to the real property thereof.

[For the board of school examiners of an independent district, see "Teachers, Appointment, qualifications, and duties."]

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Buildings.

Appointment, qualifications, and duties.—The board of trustees, at a meeting called for that purpose, shall hire such teachers only as have certificates of qualification, on written contracts, specifying the wages per month and time employed as agreed upon by the parties; but no contract shall be made with any teacher who is related by blood or marriage to any member of the school board without the concurrence of all the members of the board of trustees, by vote duly entered on the clerk's record of proceedings.

Every county superintendent of schools shall hold, each spring and fall, in and for his county, at least three meetings for the examination and licensing of teachers, one of which shall be held at the county seat, of which meeting at least ten days' notice shall be given. The examinations thus held shall be public, and be conducted by both written and oral questions and answers. They shall be uniform for the county in which they are held, and no certificate of qualification shall be given by any county superintendent except upon his own personal examination, held in accordance with the provisions of this section: *Provided*, That any teacher may be examined by the county superintendent at any time other than as above specified, on proof that such teacher was unable to be present at a public examination and on payment to the county superintendent of 50 cents for making such private examination.

County superintendents shall examine persons proposing to teach common schools in the county in orthography, reading in English, penmanship, arithmetic, grammar, modern geography, history of the United States, and the practical elementary facts of hygiene, asking questions to test the general knowledge of candidates and their ability to impart oral instruction relating to the subjects treated in the text-books. If satisfied that the candidates are of good moral character and qualified to teach in all the aforesaid branches, certificates shall be granted, the grade of which shall be determined by the examination. County superintendents are authorized to issue three grades of certificates, viz: First grade, valid in the county for two years; second grade, valid in the county for one year; third grade, valid in a given district only for six months. County superintendents may renew certificates at their expiration by indorsement thereon: *Provided*, That in addition to the above branches pre-

scribed in this section all applicants for first-grade certificates shall be examined in elementary algebra, elementary plane geometry, physical geography, physiology, natural philosophy, civil government, and the theory and practice of teaching, and no person shall receive a first-grade certificate who has not taught with success at least one term of not less three months in length. County superintendents may on request examine applicants in independent school districts, which, when countersigned by the board of examiners of the independent district, shall be valid as their own act.

In independent districts the board of education, within twenty days after their election, shall appoint three competent persons, citizens of said district, to serve as school examiners of the public schools therein—one to serve one year, one for two years, and one for three years—from the time of their appointment and until their successors are appointed, and annually thereafter said board shall appoint one examiner, to serve for three years and until his successor is appointed and qualified; and said board shall fill all vacancies that may occur from death or otherwise. The examiners, or any two of them, shall examine any person that may apply for that purpose with the intention of becoming teachers in any of the schools of the district, and if they find the applicant, in their opinion, qualified to teach in any of the schools and to govern the same, and of good moral character, they shall give said applicant a certificate made on such blanks as may be provided by the board of education, naming the branches in which the holder of the certificate is found qualified to teach, setting opposite each branch the degree of attainment on a scale of which 5 shall be the maximum, and no person shall be permitted to teach in the schools without such certificate: *Provided*, That any examination of teachers herein provided for may, at the request of the board of examiners, be made by the county superintendent of schools, whose certificate, as herein provided for, when countersigned by said board of examiners, shall be valid as their own act. The examiners may in all cases, when two of their members concur, have power to annul such certificates, and when so annulled the same shall be reported to the board of education.

The teacher shall keep a register, and shall report to the county superintendent under penalty of having pay withheld.

Preliminary training.—The governor shall nominate, and with the consent of the senate appoint, 8 normal-school directors, not more than one residing in the same county, who, together with the State superintendent, shall constitute the State normal-school board. The board shall have the general supervision, management, and control of the State normal schools and of all the real and personal property thereto appertaining. They are empowered to contract for the erection of all buildings connected with the schools, to appoint all professors and teachers, to fix their salaries, but in no case shall the salary of any principal exceed $2,500 per annum.

The State normal-school board shall prescribe the courses of study in the normal schools, the conditions of admission, and prepare and confer suitable diplomas upon persons completing the full course of study in the normal department. Such board shall adopt any rules and regulations deemed necessary to the highest efficiency of the schools. It shall be the duty of the board, as a whole or through committee of their own number, to visit and thoroughly inspect the grounds, buildings, modes of instruction, and the discipline and management of each school at least once during each term. They shall report to the governor, on or before the first day of December in each year, through their president, the condition of each school, its receipts and disbursements, its wants and prospects, together with such recommendations for its improvement as they may deem proper and necessary.

The principal of each normal school shall annually make a written report to the State superintendent of public instruction on or before the first day of September, covering the calendar or term year of his school. Such report shall set forth the general statistics of the school, and also a statement of the total number of graduates of such school who are then engaged in teaching, so far as may be known, with their names, and the name of the district and county in which they are teaching.

There shall be no charge for tuition or for incidental expenses to the students of any normal school who shall have filed with the principal thereof a declaration of intention to engage in the work of teaching in the public schools of this State for not less than two years after his or her connection with said school shall cease. The board may fix such rates of tuition for pupils in the model schools and for students not intending to teach as in their judgment may be equitable and just.

The State normal-school board shall have power to organize, in connection with each normal school, such model schools as they may deem expedient for the illustration of the best methods of teaching and government: *Provided*, That no more than one teacher shall be employed in either of the model schools, except at the school at Winona, where, so long as provision is made in the normal school for the education of soldiers' orphans, the board may employ one additional teacher in its discretion.

The board shall appoint one teacher for each normal school especially qualified to give instruction in teachers' institutes.

Meetings.—The superintendent of public instruction shall annually hold in the sparsely settled counties as many State teachers' institutes as he shall find practicable, each to continue in session one week at least. He shall give due notice thereof to all teachers and persons proposing to become such, and invite their attendance. He shall attend and have charge of each institute; invite the aid and cooperation of the superintendent of schools for the county; employ suitable instructors and lecturers to give instruction and addresses to aid the teachers in qualifying themselves for a more successful discharge of their duties:

Provided first, That the average expense of such institutes shall not exceed $100 a week. He shall annually, in so many and thickly settled localities as he may deem advisable, organize and, with the aid of others selected by himself, conduct normal-training schools for the benefit of teachers who desire such training but are unable to attend a full course at the State normal schools. Such schools shall be without charge for attendance and entirely practical, their object being to impart normal-methods of teaching and conducting schools, particularly common schools. They shall continue at least four and not more than six weeks at each place, and the average cost shall not exceed $100 for each week of the session:

Provided second, That during the time of holding a teachers' institute in any county of this State, it is hereby made the duty of all teachers and persons desiring a teacher's certificate to attend such institute, or present to the county superintendent satisfactory reasons for not so attending, before receiving such certificate, and any school that may be in session in such county shall be closed for one week upon the requirement of the county superintendent, and the teacher shall be allowed to make up the time lost.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—All schools supported wholly or in part by State school funds shall be styled The Public Schools, and admission to them shall be free to all persons between the ages of 5 and 21 years, residing in the district. In independent districts schools shall be kept open from twenty to forty-four weeks. No district can receive aid from the State which does not keep school open for five months.

Boards of trustees and boards of education may suspend or expel pupils for insubordination, immorality, or being infectiously diseased.

The board of trustees of any common-school district, or the board of education of any independent or special district, may by a vote of a majority of all the members of said board, at any regular meeting, exclude from the public school in the district all children under 6 years of age; and when such action has been once taken, it shall not be changed before the beginning of the next school year.

Every parent, guardian, or other person in the State of Minnesota having control of any child or children between the ages of 8 and 16 years shall be required to send such child or children to a public school, or private school taught by a competent instructor, for a period of at least twelve weeks in each year, at least six weeks of which time shall be consecutive, unless such child or children are excused from such attendance by the board of the school district or the board of education of the city or independent school district in which such parent, guardian, or person having control resides, upon its being shown to their satisfaction that such parent or guardian was not able, by reason of poverty, to clothe such child properly or that such child's bodily or mental condition has been such as to prevent his attendance at school or application to study for the period required, or that such child or children are taught at home in such branches of study as are usually taught in the public schools subject to the same examination as other pupils of the district or city in which the child resides, or that he has already acquired the ordinary branches required by law, or that there is no school taught within 2 miles by the nearest traveled road.

Any parent, guardian or other person failing to comply with the provisions of this act shall, upon conviction, be deemed guilty of a misdemeanor and fined in a sum not less than $10 nor more than $25 for the first offense, nor less than $25 nor more than $50 for the second and every subsequent offense.

It shall be the duty of any school director or president of the board of education to inquire into all cases of neglect of the duty prescribed in this act, and ascertain from the persons neglecting the reasons, if any, therefor, and shall forthwith proceed to secure the prosecution of any offense occurring under this act, and any director or president neglecting to secure such prosecution for such offense within ten days after a written notice has been served on him by any taxpayer in said district or city, unless the person so complained of shall be excused by the district or city board or board of education, for reasons hereinbefore stated, shall be deemed guilty of a misdemeanor, and liable to a fine of not less than $20 nor more than $50.

Upon the trial of any offense as charged herein, if upon such trial it shall be

determined that such prosecution was malicious, then the cost in such case shall be adjudged against the complainant and collected as fines in other cases.

Character of instruction.—[For subjects upon which teachers are examined, see Teachers' Appointment, etc.] All instruction given and books used shall be in the English language, but teachers that are able to speak a language that is the vernacular of a pupil may use that language to aid in the teaching of English words, and may also give instruction in that language for one hour or less a day, provided the trustees have unanimously agreed to these innovations. In independent districts the board of education prescribes the course of study and grades the schools.

All school officers may introduce as part of daily exercises of each school in their jurisdiction, instruction in the elements of social and moral science, including industry, order, economy, patience, cleanliness, honesty, self-reflection, etc.

Buildings.—The board of trustees shall have the general charge of the schoolhouses in their district, shall lease or purchase a site, may permit the schoolhouse to be used when not interfering with school purposes, the users giving bond for $100 and paying a reasonable rent, provided the legal voters accede to the use. No district shall in any one year levy a tax exceeding 10 mills on the dollar for the purpose of building a schoolhouse.

In independent school districts, whenever the board of education shall deem it necessary to purchase or erect a schoolhouse or houses or to purchase sites for the same, it shall call a meeting of the voters of the district and act according to its decision.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The proceeds of such lands as are or hereafter may be granted by the United States for the use of schools within each township in this State shall remain a perpetual school fund to the State, and not more than one-third of said lands may be sold in two years, one-third in five years, and one-third in ten years; but the lands of the greatest valuation shall be sold first: *Provided,* That no portion of said lands shall be sold otherwise than at public sale. The principal of all funds arising from sales or other disposition of lands or other property granted or intrusted to this State in each township for educational purposes shall forever be preserved inviolate and undiminished; and the income arising from the lease or sale of said school land shall be distributed to the different townships throughout the State in proportion to the number of scholars in each township between the ages of 5 and 21 years and have been in attendance forty days in the public schools and have had at least five months of term within the year by a qualified teacher and made the reports required by law.

Any public graded school in any city or incorporated village, or township organized into a district under the so-called township system, which school shall give preparatory instruction [see State high-school board] and shall admit students of either sex from any part of the State without charge for tuition, shall be entitled to receive the sum of $400 annually.

Taxation.—For the purpose of maintaining public schools, a tax of 1 mill, to be known as State school-tax fund, shall be annually levied upon the taxable property of the State, which shall be added to the general school fund, and they together shall be known as the current school fund, and apportioned as above provided.

The county commissioners shall also levy an annual tax of 1 mill, to be known as the local mill tax, on the amount of the assessment made by the assessors of each township, which shall be paid into the county treasury for the support of the public schools, to be apportioned by the county auditor, who shall distribute to each school district or portion thereof the amount of tax collected in said district or portion of district in his said county: *Provided,* That if in any case county commissioners shall neglect, refuse, or fail to make such levy as herein provided for, the county auditor shall nevertheless extend the same upon the assessment rolls of the year the same as if such levy had been so made by the said county commissioners. As a further provision for the support of schools, there shall be set apart by the county treasurer of each county the proceeds of all fines for breach of any penal law in this State not otherwise appropriated by law, and all moneys arising from the issuing of liquor licenses and from unclaimed moneys arising from the sale of estrays, as provided for by amendment to section 12, chapter 19, of the general statutes. And the county auditor shall open an account with each district or portion of district in his county, and keep an accurate account of all moneys received by or due to each of said districts, and all such matters as are necessary to show the condition of accounts between each of said districts and the county treasury, and for this purpose he shall examine any and all of the books in the office of the county treasurer.

There shall be levied annually for school-district purposes, in addition to the general tax of 1 mill, such sum as may be voted at any legal meeting of the qualified

voters of the district, the rate of which shall not exceed 9 mills, for the support of the school (provided it will support the schools for the legal term), or 1 per cent for the erection of a schoolhouse.

IOWA.

1. Organization of the System.

State superintendent.—State board of examiners.—County superintendent.—County board of education.—District board of directors.—Subdistrict director.

State superintendent of public instruction.—A State superintendent of public instruction shall be chosen at the general election in each odd-numbered year. He shall have the general supervision of all the county superintendents and of all the common schools of the State, may meet county superintendents in convention at such points in the State as he may deem most suitable, and by explanation and discussion secure a uniform and efficient administration of the school laws. He shall attend teachers' institutes in the several counties as far as possible, and assist by lectures or otherwise in their instruction and management. He shall render a written opinion to any school officer asking it touching the exposition or administration of the school law, and determine all cases appealed from the decision of county superintendents. He shall have an office at the seat of government, in which he shall file all papers, reports, and public documents transmitted to him by the county superintendents each year separately, and shall exhibit them when required by the governor or the legislature, and shall keep a fair record of all matters pertaining to his office. Every four years he may cause the school laws to be printed, with notes, rulings, forms, and decisions, as may seem of value to aid school officers in the proper discharge of their duties, appropriate reference being made to the previous law that has been amended or changed so as clearly to indicate the effect of amendments or changes. He shall send to each county superintendent a number of copies sufficient to supply each school district in his county. He shall also cause to be printed and bound in paper covers the annotated school laws, and shall furnish to the members of the board of directors one bound copy of the laws, to be turned over by each to his successor in office. He may subscribe for a sufficient number of copies of an educational journal, as he may elect, if published in the State, one copy to be furnished to each county superintendent, provided the journal selected shall contain his decisions concerning the school law. He shall, on the 1st day of January of each year, report to the auditor of the State the number of persons in each county between the ages of 5 and 21, and shall make to the governor a report embracing a statement of the condition of the common schools of the State, the number of district townships and subdistricts therein, the number of teachers, of schools, of schoolhouses and their value, of persons 5 to 21 years of age, the number of scholars in each county that have attended school the previous year as returned by the county superintendent, the number of books in the district libraries, the value of all apparatus in the schools, and such other statistical information as he may deem important, and such plans as he may have matured for the more perfect organization and efficiency of common schools. One thousand copies of this report shall be issued. He shall arrange for the holding of teachers' institutes, and shall be president of the State Normal School and of the State board of examiners and a member of the board of regents of the State University.

State board of examiners.—The superintendent of public instruction, the president of the State University, the principal of the State Normal School, and two persons to be appointed by the executive council, one of whom shall be a woman, for a term of four years, shall form a State board of examiners. One appointed member shall retire annually, and no member shall succeed himself. The board shall meet at such times and places as its president shall direct, and shall annually hold at least two public examinations of teachers, at each of which one member of the board shall preside, assisted by one or two teachers, as the board shall determine. The board may adopt rules not inconsistent with the law, and shall keep a full record of their proceedings and a record of all persons to whom certificates and diplomas are issued. Each member of the board not salaried shall receive $3 per diem and his actual expenses for time actually spent.

County superintendent.—In every odd-numbered year there shall be elected a county superintendent. No person shall be deemed ineligible by reason of sex to this or any other school office in the State of Iowa, but the county superintendent shall not hold any office in or be a member of the board of directors or of supervisors during the time of his or her incumbency.

On the last Saturday of each month the county superintendent shall meet all persons desirous of passing an examination and for the transaction of other business within his jurisdiction in some suitable room provided for that purpose by the board of supervisors at the county seat, at which time he shall examine all applicants for

teachers' positions, and shall give those found competent a certificate. He shall also hold annually a normal institute for the instruction of teachers and those who desire to teach, and may revoke a county certificate for cause and after defense. All disbursements of the institute fund shall be upon the order of the county superintendent, and he shall annually make a report to the State superintendent, containing a full abstract of the reports made to him by the respective district secretaries and of such other matters as he shall be directed to report by the State superintendent or may himself deem essential, and shall at the same time file with the comptroller the number of persons between the ages of 5 and 21 years in each school district of his county, and in case of failure to make either of these reports he shall forfeit $50 and be liable for all the damages caused by his neglect. He shall also report the number of blind or of deaf persons to the superintendents of the institutions for those persons. He shall serve as the medium of communication between the State superintendent and the local officers of the system, and may in his own discretion visit the different schools in the county and, at the request of a majority of the directors of a district, shall visit the school in said district at least once during each term. For his services the county superintendent shall receive from the county treasury the sum of $4 for every day necessarily engaged in the performance of official duties, and also the necessary stationery and postage for the use of his office, and he shall be entitled to such additional compensation as the board of supervisors may allow, provided he shall first file a sworn statement of the time he has been employed in his official duties with the county auditor. If for any cause the county superintendent is unable to attend to his official duties, he shall appoint a deputy to perform them in his stead, except as to visiting schools and trying appeals.

County board of education.—(See Schools, Text-books.)

District board of directors.—Each civil township now or hereafter organized and each independent school district originally organized as such is hereby declared a school district. The subdirectors of the several subdistricts shall constitute a board of directors for the district township, and shall organize by electing a president from their own number, and at a subsequent meeting elect a secretary and treasurer, who shall give bonds, but shall not be members of the board unless it have a membership of 5 or more, in which case they may be selected from the board.

The board shall hold two regular meetings annually, and may be convened by the president on special occasions. It shall make all contracts, purchases, payments, and sales necessary to carry out any vote of the district, but before constructing any schoolhouse they shall consult with the county superintendent as to the most approved plan of such building. It shall fix the site for each schoolhouse, taking into consideration the geographical position and convenience of each portion of the subdistrict; shall determine what number and for what period schools shall be taught beyond that required by law; shall determine where pupils may attend school, and for this purpose may divide the district into such subdistricts as may by them be deemed necessary, and regulate its affairs, provided that no such subdistrict shall be created for the accommodation of fewer than 15 pupils; but the board of directors shall have power to rent a room and employ a teacher for the accommodation of any 10 scholars; may establish graded or union schools wherever it may seem necessary, and may select a person who shall have the general supervision of schools in the district, subject to the rules and regulations of the board, and shall visit the schools from time to time through one of its members. The board is authorized to adopt textbooks for the teaching of all branches authorized to be taught in the public schools of the State, and to contract for and buy said books and other necessary supplies, and to sell the same at cost to pupils. The board shall cause 12 or more shade trees to be planted on each schoolhouse site if not having that number upon it, the expense to come out of the contingent fund, and may use unappropriated money from that fund to effect an insurance on the school property of the district.

The president shall have charge of the supplies, shall draw drafts on the county treasurer for the district money, naming the fund against which the draft is to be charged and the purpose for which drawn; shall sign all contracts made by the board, and shall appear for the board in all suits brought by or against the same, unless individually a party, when the secretary shall act.

The secretary shall record all the proceedings of the board and district meetings, file all papers, countersign all drafts, and keep a register of all orders drawn on the treasury, give ten days' previous notice of the district township meeting by posting notice in five conspicuous places, one of which shall be at or near the last place of meeting, and shall furnish a copy to the teacher of each school, to be read in the presence of the children; and such notices shall in all cases state the hour of meeting. He shall keep an accurate account of all the expenses incurred by the district, and shall present the same to the board of directors to be audited and paid as herein provided, notify the county superintendent when each school of the district begins and its length of term, and in a general report shall state the number of persons by sex 5 to 21 years in the district, the number of schools and branches taught, the num-

ber of pupils and the average attendance in each school, the number of teachers employed and the average compensation by sex, the length of school in days and the average cost of tuition per week for each pupil, the text-books used and the number of volumes in the district library and the value of apparatus belonging to the district, the number and value of the schoolhouses, the name, age, and post-office address of each deaf or blind person within the ages of 5 and 21 years, the number of trees set out and in thrifty condition on each school ground. Failure on the part of the secretary to file his report shall cause him to forfeit $25 and to make good all losses resulting from such failure by suit brought on his official bond.

The treasurer shall hold all moneys belonging to the district, and pay out the same on the order of the president, countersigned by the secretary, and shall keep a correct account of all expenses and receipts in a book provided for that purpose.

Subdirectors.—At the regular meeting of the board of directors of district townships in September, 1892, the board of directors shall specify what subdistricts, at the subdistrict election following in March, shall elect subdirectors for one year, two years, or three years respectively, making the three classes as nearly equal as possible. Thereafter subdirectors shall be elected and hold office for three years. Should a subdirector fail to qualify, the board of directors shall fill the office by appointment. Under such restrictions as the board of directors may prescribe, the subdirector shall negotiate and make in his subdistrict all necessary contracts for providing fuel for schools, employing teachers, repairing and furnishing schoolhouses, and for making all other provisions necessary for the convenience and prosperity of the schools within his subdistrict, and he shall have control of the schoolhouse, unless otherwise ordered by a vote of the district township meeting; but all contracts shall be approved by the president and reported to the board, which shall be responsible. He shall prepare a list of the names of heads of families in his subdistrict, together with the number of children between the ages of 5 and 21 years, by sex, and report the latter fact to the secretary of the district board. With the concurrence of the president of the board of directors he may dismiss any pupil from the schools in his subdistrict for gross immorality or persistent violation of the regulations of the schools. He shall visit the schools of his subdistrict at least twice during each term.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No person shall be employed to teach a common school, which is to receive its share in the distribution of the school fund, unless he shall have a certificate of qualification signed by the county superintendent of the county or other authorized person, and a person teaching without a certificate shall have no valid claim to compensation during the time he teaches without such certificate. All contracts with teachers shall be in writing, specifying the length of time in weeks the school is to be taught, the compensation, and such other matters as may be agreed on, and shall be signed by the subdirector or secretary of the district board of directors and the teacher, and be approved and filed with the president before the teacher enters upon duty.

Candidates for State certificates shall be examined upon the following branches: Orthography, reading, writing, arithmetic, geography, English grammar, bookkeeping, physiology, history of the United States, algebra, botany, natural philosophy, drawing, civil government, constitution and laws of Iowa, and didactics; and candidates for State diplomas shall, in addition thereto, pass in geometry, trigonometery, chemistry, zoology, geology, astronomy, political economy, rhetoric, English literature, and general history, and such other branches as the board of examiners may require. A state certificate shall authorize the person to whom it is issued to teach in any public school of the State for the term of five years from the date of its issue, and a State diploma shall be valid for the life of the person to whom issued; but both are revocable by the board of examiners for cause shown by a county superintendent. The fee for each State certificate shall be $3 and for the State diploma $5, the fees so received to be paid into the State treasury: *Provided*, That should the applicant fail one-half the fee shall be returned. On the last Saturday in each month the county superintendent shall meet all persons desirous of passing an examination as to their ability to teach orthography, reading, writing, arithmetic, geography, English grammar, physiology, and history of the United States. Persons desiring to teach only music, drawing, penmanship, bookkeeping, German, or other language, shall not be required to stand an examination for other than their specialty, nor shall they be permitted to teach branches upon which they have not been examined. If the examination is satisfactory, and the superintendent is satisfied that the respective applicants possess a good moral character and the essential qualifications for governing and instructing youth, he shall give them a certificate to that effect for not longer than one year. Any school officer or other

person shall be permitted to be present at the examination, and the superintendent shall make a record of the name, residence, age, and date of examination of all persons so examined, distinguishing between those to whom certificates were given and those rejected. The certificate given by any county superintendent is revocable for cause.

The teacher shall keep a correct daily register of the school, which shall exhibit the number or other designation thereof, the date, name, age, and attendance of each pupil, and the branches taught. When scholars reside in different districts, a register shall be kept for each district. The teacher shall, after the close of the school, immediately file in the office of the secretary of the board of directors a certified copy of the register. Incompetent teachers may be discharged by the board of directors at a regular meeting after defense.

Preliminary training.—A school for the special instruction and training of teachers for the common schools of this State is established at Cedar Falls. It shall be under the management and control of a board of directors, consisting of six members, no two of whom shall be from the same county, and the superintendent of public instruction shall be ex officio a member of said board and president thereof. The members shall be elected for six years, two to retire biennially; vacancies to be filled by the governor. No member shall be a teacher in the school nor receive any compensation other than his actual expenditures. The board shall employ competent teachers, shall control all State property for the use of the school and direct the expenditures, make rules and regulations for the government and admission to the school. Pupils shall be required to sign a statement of their intention to follow the business of teaching in the schools of the State. The board shall make all possible and necessary arrangements with the means at their disposal for the boarding and lodging of pupils, but the pupils shall pay the cost of the same as well as a contingent fee of not more than $1 a month, and they may be charged a tuition fee of $6 a term if it is necessary to support the school. The term shall not be shorter than twenty-six weeks. At the close of the year the board of trustees shall make a detailed report to the governor, showing the number of teachers employed in the school, their compensation, the number of pupils classified, an itemized account of the receipts and expenditures, and such information and recommendations as they may deem expedient.

The State University shall include a collegiate, scientific, normal, law, and such other departments, with such courses of instruction and elective studies as the board of regents may determine, and the board shall have authority to confer such degrees and grant such diplomas and other marks of distinction as are usually granted by other universities.

Meetings.—Whenever reasonable assurance shall be given by the county superintendent to the State superintendent of public instruction that not fewer than 20 teachers desire to assemble for the purpose of holding a teachers' institute, to remain in session for not fewer than six working days, he shall appoint the time and place of said meeting and give due notice to the county superintendent, and for the purpose of defraying the expenses of said institute $50 shall be appropriated annually from any moneys in the State treasury for one such institute in each county, to be expended by the county superintendent.

The county superintendent shall hold annually a normal institute for the instruction of teachers and of those who may desire to teach, and, with the concurrence of the superintendent of public instruction, procure such assistance as may be necessary to conduct the same, at such times as the schools in the county are generally closed. To defray the expenses of said institute he shall require the payment of a registration fee of $1 from each person attending the normal institute, and shall also require the payment in all cases of $1 from every applicant for a certificate, which he shall transmit to the county treasurer, to form, with the State appropriation for institutes, the institute fund. The board of supervisors may appropriate such additional sum as may be necessary for the further support of the institute. During the time of holding a teachers' institute in any county any school that may be in session shall be closed, and all teachers and persons desiring a teacher's certificate shall attend such institute or present to the county superintendent satisfactory reasons for not so attending before receiving such certificate.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—In each subdistrict there shall be taught one or more schools for the instruction of youth between the ages of 5 and 21 years for at least 24 weeks of 5 school days each, unless the county superintendent is satisfied that there is good cause for failure to comply with the law. Any person who was in the military service of the United States during his minority may be admitted to the schools on the same terms as youth 5 to 21 years. The majority of the board in independent dis-

tricts shall have power, with the concurrence of the board of directors, to dismiss or suspend pupils for cause.

Character of instruction.—The district township meeting shall have the power to determine what additional branches shall be taught in the schools of the district or to delegate the power to the board of directors, and may direct that German or other language shall be taught as a branch in one or more of the schools to pupils whose parents or guardians may so desire, provided that all other branches shall be taught in the English language. [With their power to establish and maintain graded schools all boards are invested with authority to prescribe a course of study in all branches taught.] The Bible shall not be excluded from any school or institution, but no pupil shall be required to read it contrary to the wishes of his parent or guardian.

Text-books.—The board of directors of each district, township, and independent district is authorized to adopt text-books for the teaching of all branches authorized to be taught in the public schools and to contract for and buy such books and all other necessary supplies from the contingent fund, and the board shall annually certify to the board of supervisors the additional amount necessary to levy for the contingent fund, not to exceed in any one year the sum of $1 for each pupil residing in the district, township, or independent school district, but the district shall contract no debt for that purpose. In the purchase of text-books it shall be the duty of the board of directors or the county board of education to take into consideration the books then in use in the respective districts, and they may buy such additional number of text-books as may from time to time become necessary to supply their schools, and they may arrange on equitable terms for exchange of books in use for new books adopted. If at any time the publishers of such books as have been adopted shall neglect or refuse to furnish them at lowest price furnished any other district or State board or were furnished in 1889, then the board of directors or county board of education shall bring suit upon the publishers' bond. Before purchasing text-books under the provisions of this act the board of directors or county board of education shall advertise, by publishing a notice for three consecutive weeks in one or more newspapers published in the county, stating the time up to which bids shall be received, the classes and grades for which text-books and other necessary supplies are to be bought, and the approximate quantity needed; and the board shall award the contract for the text-books and supplies to any responsible bidder or bidders offering suitable text-books and supplies at the lowest prices, taking into consideration the quality of material used, illustrations, binding, and all other things that go to make up a desirable text-book, and may, to the end that they may be fully advised, consult the county superintendent, or, in the case of city independent districts, with city superintendent or other competent persons, with reference to the selection of text-books. It shall be unlawful for any board of directors or county board of education to displace, except as provided for above, or change any text-book that has been regularly introduced before the expiration of five years, unless authorized to do so by a majority of the electors present and voting at their regular annual meeting, due notice having been given. Any person desiring to furnish books or supplies to the county shall deposit in the office of the county auditor samples of all text-books included in his bid, accompanied with lists giving the lowest wholesale and contract price for the same, and every successful bidder shall enter into sufficient bond and sureties for the performance of his contract.

Whenever a petition shall be signed by one-half of the school directors in a county, and the same shall be filed in the office of the county superintendent at least thirty days before the annual school elections in March, asking for uniformity of text-books in the county, then the county superintendent shall notify the county auditor and board of supervisors in writing, and the county board of education, to be composed of the county auditor, the superintendent, and supervisors, shall convene and arrange for a vote by the electors upon the question. Should a majority of the electors voting at such election favor a uniform series of text-books for use in the county, the county board of education shall select the text-books for the entire county and contract for the same, and the public schools of the county shall use the books so selected. The board may arrange for depositories, and may pay for the books from the county funds and sell them to the school districts at the same price, the proceeds to be returned to the county fund by the board of education monthly. But the above provisions regarding uniformity shall not apply to schools located within cities or towns, nor shall the electors of cities or towns vote upon the question of county uniformity, but they may vote to buy the books adopted at the prices fixed by the county board of education.

The district board of directors may use any unappropriated contingent fund in the treasury to purchase records, dictionaries, maps, charts, and apparatus for the use of the schools of their districts, but shall contract no debts for this purpose.

Buildings.—The school buildings and their appurtenances are under the charge of the subdirector and their construction and the purchase of their sites under that of the district board. All schoolhouses erected or repaired at a cost exceeding $300

shall be erected or repaired by contract, after advertisement in a newspaper of the county or one published nearest its boundaries if none there be published in the county.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The educational and school funds and lands shall be under the control and management of the general assembly of this State, and the money subject to the support and maintenance of common schools shall be distributed to the districts in proportion to the number of youths between the ages of 5 and 21 years in such manner as may be provided by the general assembly.

The university lands and the proceeds thereof, and all moneys belonging to said fund, shall be a permanent fund, for the sole use of the State University. The interest arising from the same shall be annually appropriated for the support and benefit of said university. The general assembly shall take measures for the protection, improvement, or other disposition of such lands as have been or may hereafter be reserved or granted by the United States or any person or persons to this State for the use of the university, and the funds accruing from the rents or sale of such lands or from any other source for the purpose aforesaid shall be and remain a permanent fund, the interest of which shall be applied to the support of the university, for the promotion of literature, the arts and sciences, as may be authorized by the terms of such grant. And it shall be the duty of the general assembly, as soon as may be, to provide effectual means for the improvement and permanent security of the funds of said university.

The proceeds of all lands that have been granted by the United States for the support of schools which shall hereafter (1857) be sold or disposed of, and the 500,000 acres of land granted to the new States under an act of Congress distributing the proceeds of the public lands among the several States of the Union, approved in the year of our Lord 1841, and all estates of persons who may have died without leaving a will or heir, and also such per cent as may have been granted by Congress on the sale of lands in this State, shall be and remain a perpetual fund, the interest of which, together with all rents of the unsold lands and such other means as the general assembly may provide, shall be inviolably appropriated to the support of common schools throughout the State.

The money which may have been or shall be paid by persons as an equivalent for exemption from military duty, and the clear proceeds of all fines collected in the several counties for any breach of the penal laws, shall be exclusively applied, in the several counties in which such money is paid or fine collected, among the several school districts of said counties in proportion to the number of youths subject to enumeration in such districts to the support of common schools or the establishment of libraries, as the board of education shall from time to time provide.

The financial agents of school funds shall be the same that by law receive and control the State and county revenue for other civil purposes, under such regulations as may be provided by law.

Taxation.—The board of directors shall, at their regular meeting in March or at a special meeting for the purpose before the first Monday in May, estimate the amount required for the contingent fund, not to exceed $5 a pupil, and also such sum as may be required for the teachers' fund in addition to the amount received from the semiannual apportionment of the income of the State fund, together not to exceed $15 a pupil residing in the district, and shall cause the secretary to certify the same, together with the amount voted for schoolhouse purposes, not to exceed 1 mill on the dollar, within five days thereafter to the board of supervisors, who shall levy the per centum upon the property of the district township, which shall be collected and paid over as are other district taxes; and they shall apportion any tax voted by the district township meeting for schoolhouse fund among the several subdistricts in a just and equitable manner, taking as the basis of such apportionment the respective amounts previously levied upon the subdistricts; but if the electors of a subdistrict have increased the sum for schoolhouses above that voted by the district township at its meeting, the county supervisors shall levy such excess on the subdistrict asking it, provided that not more than 15 mills on the dollar shall be levied on the taxable property of any subdistrict during any year for schoolhouse purposes. The board of supervisors shall also at the same time levy a tax for the support of schools within the county of not less than 1 nor more than 3 mills on the dollar on all property in the county, receivable only in cash.

MISSOURI.

1. Organization of the System.

State board of education.—State superintendent of public schools.—State school-book commission.—County commissioner of public schools.—County school superintendent.—County institute board of examiners.—District directors.—City, town, and village directors.

State board of education.—The State superintendent, the governor, secretary of state, and attorney-general shall form the State board of education, which shall have general supervision over the entire educational interests of the State. The board of education shall report to the general assembly concerning their proceedings.

State superintendent of public schools.—There shall be elected by the qualified voters of this State at the general election every four years a State superintendent of public schools, who shall give bond with sureties in the sum of $10,000. He shall reside and keep the records and other accumulations of his office at the seat of government in an office furnished by the State, where he shall be found when not called thence by public business. He shall exercise such supervision over the educational funds of the State as may be necessary to secure their safety and correct application and distribution according to law; shall require of county clerks or treasurers, boards of education or other school officers, recorders and treasurers of cities, towns, and villages copies of all records by them required to be made, and also such other information in relation to the funds and condition of schools and the management thereof as may be deemed important; and he shall cause copies of the law and instructions to be printed and distributed, as well as all blanks that may be necessary. He shall examine teachers and grant certificates of qualifications to those who pass a satisfactory examination, but the applicant shall not be charged a fee. He may employ a chief clerk at a salary of $1,500; shall make an annual report to the general assembly when in session and on the following year to the governor, in which he shall present a statement of the condition and amount of all funds and property appropriated to purposes of education, the number of schools in the State, the number and sex of pupils attending the schools, the branches taught, the number of teachers employed, the average amount of wages paid to teachers, the number of teachers' institutes formed and their condition, the number of teachers engaged in teaching within the State who have been trained for not fewer than six months in either of the State normal schools, the estimates and accounts of the expenditures of public school funds of every description, plans for the improvement and management of public schools, and such other matter as he may deem important; but no such report shall exceed 200 pages of printed matter of ordinary book form. He shall annually spend at least five days in each Congressional district conferring with the board of education and other school officers, counseling teachers, visiting schools, and delivering lectures. All reasonable sums expended by him in the execution of his duties shall be allowed him on due proof.

State school-book commission.—(See under Schools, Text-books.)

County commissioner of public schools.—There shall be elected every two years a county commissioner of public schools who shall be at least 21 years of age, a resident of the county for at least one year prior to his election, and shall hold a first-grade county, normal, or State certificate entitling him to teach in the public schools of such county. The county commissioner shall examine all persons applying for certificates to teach and grant them to those qualified. He shall condense and forward to the State superintendent the educational statistics of the county, and see that the local authorities are supplied with copies of the school law and blanks. He shall receive for making his reports and perfecting the record of his office in counties of fewer than 10,000 inhabitants $20, in counties containing 10,000 to 15,000 $30, of 15,000 to 20,000 $35, and of 20,000 or more $40.

County school superintendent.—Whenever the inhabitants of any county in this State may desire to establish county-school supervision in and for the county the matter may be accomplished by 100 freeholders petitioning county court for the same, and the court shall order an election. The county superintendent shall give bond, with sureties in double the amount of his salary, shall keep his office and its records, etc., at the county seat, where a room shall be provided for him, with stationery, postage, etc. He shall have general supervision over all the schools of his county, except in cities having more than 1,000 children and organized as a city school district, and shall perform all the duties now required by the county commissioner and receive like compensation therefor. He shall visit each school district in his county as often

as practicable, examining the records, the character of instruction, and the condition of school property and shall (privately) advise the teacher in matters calling therefor, shall consult with the district clerks and examine their accounts, shall organize a county institute, shall hold public meetings in each principal township in the county annually for the purpose of discussing educational questions of all kinds, shall formulate a course of study and a plan for grading the schools of his county, and require the same to be observed as nearly as practicable. His compensation shall be on the following scheme: In counties wherein the number of children of school age is less than 2,000, he shall receive $200; where the number is from 2,000 to 3,000, he shall receive $300; from 3,000 to 4,000, he shall receive $400; from 4,000 to 5,000, he shall receive $500; from 5,000 to 6,000, he shall receive $600; from 6,000 to 7,000, he shall receive $700; from 7,000 to 8,000, he shall receive $800; from 8,000 to 9,000, he shall receive $900; and for 9,000 or more, he shall receive $1,000.

County institute board of examiners.—(See Teachers, Meetings.)

District school directors.—Each county is divided into districts, which may be modified by the voters of the locality interested. The qualified voters at the annual school meeting, when not otherwise provided, shall have power by a majority to choose by ballot one director, who shall hold his office for the term of three years; to fill vacancies caused by his death, resignation, removal, or change of residence; to determine the length of school term in excess of six months that the schools shall be taught; to determine the rate of taxation, if any; to vote such sum as may be deemed necessary for the purchase of books for a district library; to direct the sale of any school property; to vote for the county commissioner; to determine the amount to be levied to procure schoolhouse and site and its location.

The government and control of the district shall be vested in a board of directors, composed of three members, who shall be citizens of the United States, resident taxpayers for one year, and qualified voters of the district. The directors shall be elected by the voters and shall hold for the term of three years, one retiring annually; vacancies are to be filled by the other members, but if they fail to agree or there is more than one vacancy, the county commissioner shall fill the vacancy or vacancies. The board shall have the care and keeping of the schoolhouse and other property. It shall furnish maps, globes, and other necessary apparatus, shall regulate the organization and government of the schools, shall have power at a meeting to contract with legally qualified teachers, shall visit the schools, may remove the district clerk for dereliction of duty, shall annually take an accurate census of persons 6 to 20 years of age by race and sex, with the full name and post-office address of parent on penalty of $100 for falsification, shall annually estimate the amount of funds necessary to sustain the schools for the time required by law or by the district, together with the amount required for building and other expenses.

City, town, and village schools.—Any city, town, or village having filed a plat in the recorder's office may be organized into a school district, to be governed by the same general laws as other school districts, and every city, town, or village which has been organized under any law of this State as a board of education shall be styled the school district of such city, town, or village. Whenever it is desired to become a city, town, or village district the question shall be submitted to the voters, and if the vote is affirmative, six directors shall be elected, each for three years after the first election, two to retire annually.

The school board of any city having more than 50,000 inhabitants may relieve itself of the duty of enumeration for four consecutive years by passing a resolution each year adopting the last enumeration.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Text-books.

Appointment, qualifications, and duties.—The board of directors shall contract with persons holding a teacher's certificate in full force for the time for which the contract is made; but the board shall not appoint one of its members as teacher nor shall a teacher serve as clerk. No person shall be granted a certificate to teach in any of the public schools who is not of good moral character, and qualified to teach orthography, reading in English, penmanship, arithmetic, English grammar, modern geography, history of the United States, civil government, theory and practice, and physiology and hygiene with special reference to the effects of alcoholic drinks and stimulants and narcotics generally upon the human system. Any teacher who shall enter a public school in this State to teach, govern, or discipline the same without being legally authorized shall be punished by a fine of not more than $100, as also any director indorsing or encouraging the unlawful act.

It shall be the duty of the county commissioner to examine all persons presenting

themselves for examination, and, if found qualified, to grant them certificates good in the county. Persons applying for examination shall pay $1.50. The county certificates shall be of two grades. The second grade shall contain all the branches enumerated above and shall entitle to teach one year; the first grade shall contain in addition to the branches required for a second-grade certificate etymology, algebra, zoology, rhetoric, botany, geometry, physics, and literature, and shall entitle to teach for two years. The applicant must obtain a general average of 80 per cent and not less than 60 in any one branch. The examination must be in writing. Each county superintendent shall hold one public examination each month at the county seat and shall be guided by the instructions of the State superintendent in the examination, grading, and licensing of teachers. The State superintendent may examine teachers and grant certificates of qualifications to those who pass a satisfactory examination, which are good anywhere in the State until revoked.

[For certificate granted by county institute board see Meeting, below.]

It shall be the duty of every teacher to keep a daily register and make monthly and term reports to the district clerk, giving the number of pupils in attendance during the month by sex, the average attendance, and such other statistics as the directors by order may require, and no warrant shall be ordered by the board for the month's salary until such reports have been filed when due. Every teacher shall attend the teachers' county institute as far as possible.

Preliminary training.—The following provisions shall apply to the normal departments of the University of Missouri and Lincoln Institute (for colored persons), as well as to the State normal schools proper: .

The normal diploma conferred upon pupils who have completed the "advanced course" shall entitle the holder thereof to teach in any county in the State, without further examination, until revoked for cause. The normal certificate, granted upon completing the "elementary course," shall bear the names of the branches of study completed and the grade obtained in each, and shall entitle the holder to teach the branches named in the certificate for a period of two years.

Meetings.—There shall be held in each county, in May, June, July, or August of each year, a teachers' institute for a period not less than two weeks. The compensation of conductors and instructors shall be fixed by the county board, but no conductor shall receive from the county institute fund more than $37.50 a week, and no instructor more than $25 per week for services rendered. The county institute board of examiners shall consist of the county commissioner of each county and the conductors and instructors of the institute. The county commissioner for this service shall receive $10, and when he is not an instructor $30 additional.

The board of examiners are authorized to issue three grades of certificates. Teachers shall be granted a third-grade certificate, valid for one year, who are of good moral character, who shall pass a satisfactory examination with an average of 80 upon the first year's work outlined in the institute course of study and upon the following branches: Arithmetic, language lessons, English grammar, geography, spelling, reading, penmanship, United States history, civil government, and physiology and hygiene, with special reference to the effects of alcoholic stimulants and narcotics. A second-grade certificate, valid for two years, shall be granted to teachers of moral character who have passed upon the branches given above, and upon the first and second year's work outlined in the institute course of study, with an average of 85. A first-grade certificate, valid for three years, shall be granted to teachers of moral character and one year's experience who pass on the forementioned subjects, and upon the three years' work of the institute, with an average grade of 90. No applicant shall receive a certificate if failing to obtain 60 on any branch. The last three days of the institute shall be devoted to these examinations. If the county commissioner is the only conductor or instructor, he shall be the board, and he may examine any applicant who for good and sufficient reasons did not attend the examination, and if found qualified may grant a certificate good until the next teachers' institute. Any institute board may accept the certificate of another board, and after close of the institute the county commissioner may also indorse certificates issued by the board of examiners of another county. For the formation of a county institute fund, each teacher shall pay to the county treasurer, on or before the opening of the institute each year, the sum of $3.

The State board of education shall appoint a committee of six, one of whom shall be the State superintendent, to prepare a course of study for teachers' institutes. The committee shall prepare a three-year's course in the branches to be taught in said institutes—arithmetic, language lessons, English grammar, geography, spelling, reading, penmanship, United States history, civil government, physiology and hygiene, methods, school management, and elementary mental science.

The State board is authorized to establish such teachers' institutes as may be necessary to train and license the colored teachers of the State.

These provisions for the examination of persons attending teachers' institutes do

not apply to cities having a population of 300,000 or more, nor to countries adopting county supervision.

[The public school board or boards of directors of cities having a population of 300,000 or more, have power to create a public school teachers' and administrative and clerical employees' pension and retirement fund, to constitute which the board may set apart an amount not exceeding 1 per cent of salaries of those who elect to participate, donations, and all other methods of increment coming into their hands for the purpose. Act of 1895.]

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—Separate free schools shall be established for the education of children of African descent, and it shall be unlawful in the public schools for any colored child to attend a school for whites or for a white child to attend a school for colored children. When there are within any school district in this State 15 or more colored children of school age, the district board shall maintain a separate free school for such colored children, and the length of the school term for the colored school and their advantages and privileges shall be the same as those enjoyed by white children in schools of corresponding grade. The board shall in all cases conduct, manage, and control the school as other schools of the district are conducted, managed, and controlled; and all indebtedness incurred by the board in providing suitable buildings, employing teachers, and maintaining schools shall be paid out of the appropriate funds of the district. The board shall provide a suitable building and furnish the same, using the credit of the building or incidental funds of the district; but should the average daily attendance of colored children for any one school month be less than 8 then the board may discontinue the school for not more than six months at any one time.

In school districts the annual meeting shall determine by ballot the length of school term for children 6 to 20 years of age in excess of six months that the public schools of the district shall be maintained for the next scholastic year. The district board is required to continue the public schools for six months in each scholastic year Should any board fail to comply with these provisions, the district shall be deprived of any part of the public-school moneys for the ensuing year. In city, town, and village, schools shall continue for not fewer than seven nor more than ten months when it will not increase the estimated expenditure to an amount exceeding 40 cents on the dollar.

Character of instruction.—The school board shall have power to make all needful rules and regulations for organization, grading, and government. In counties having a county superintendent, that officer shall formulate a course of study and a plan for grading the schools of his county, and forward a copy thereof to each district clerk and to each teacher, and require the same to be followed as nearly as practicable. When the demands of the city, town, or village district require more than one public-school building, the board shall, as soon as sufficient funds have been provided, establish an adequate number of primary or ward schools, corresponding in grade to those of other public-school districts, and for this purpose the board shall divide the district into school wards and fix the boundaries thereof, and erect a suitable school building thereon and furnish the same. The board may also establish a school of higher grade in which other studies than orthography, reading in English, penmanship, arithmetic, English grammar, modern geography, history of the United States, civil government, and temperance physiology and hygiene may be taught. All text-books [and instruction] shall be in English.

Text-books.—The governor shall appoint a commission of four persons, citizens of the State, chosen with special reference to their literary and business qualifications, as well as practical knowledge of the public-school system of the State, the State superintendent being ex officio a member. The school-book commission thus formed shall advertise for the lowest and best bids from all reliable publishing houses in the United States. If any bids be satisfactory to the commission, it shall select the cheapest and best course of text-books offered on the following subjects: Chart, reading, spelling, English grammar, arithmetic, geography, history, civil government, physiology, and penmanship, all of which shall be printed in the English language. The bidders shall give two prices, the contract price and the mailing price. No text-books upon the subjects name above shall be used in the public schools other than those selected by the commission, except in cities or districts containing over 100,000 inhabitants. Each successful bidder shall establish a depot in every city of 10,000 inhabitants or more, and any book dealer or merchant who shall file with the school commission of his county an application for an agency to buy for retail only the books contracted for, and agreeing therein that in consideration of

such agency he will not sell to any resident of this State any such books at a higher price than 10 per cent above the contract price thereof, shall be given authority by the commission to act as agent; but any resident of the State may purchase for his own use from the publisher.

Should any of the bids, or any considerable part thereof, be rejected by the commission, they shall compile, or cause to be compiled, a full series of text-books, or any part thereof, and shall let the contract for publishing and furnishing the same in sufficient quantities for the use of the common schools to the lowest and best bidder.

Buildings.—The annual meeting of the district fixes the location of the schoolhouse in new districts, and for the purpose of erecting schoolhouses and furnishing them the board of directors of cities, towns, or school districts are authorized to borrow money and issue bonds if directed by their constituents. The board of directors shall have the care and keeping of the schoolhouse and other property belonging to the district, and shall provide the necessary globes, etc., keep the building in good repair, and supplied with fuel, etc. The schoolhouse may be used for religious or agricultural, educational, or labor meetings if ordered by the voters. Every person who shall willfully injure or destroy any building used as a schoolhouse or for other educational purposes, or any furniture, fixtures, or apparatus thereto belonging, or who shall deface, mar, or disfigure the building or any of its appurtenances, shall be fined a sum double the damage done, and $10 to $50 for any pasting, painting, or cutting upon the building.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The proceeds of all lands that have been or hereafter may be granted by the United States to the State and not otherwise appropriated by the State or United States; also all moneys, stocks, bonds, lands, and other property now belonging to any State fund for education; the net proceeds of the State tobacco warehouse; also the net proceeds of all sales of lands and other property and effects that may accrue to the State by escheats from unclaimed dividends and distributive shares of the estates of diseased persons; also any proceeds of the sales of the public lands which may have been or hereafter may be paid over to the State (if Congress consent); also other grants, devises, or gifts that may be or may have been given to the State and not otherwise appropriated by the State or the terms of the grant, devise, or gift, shall be paid into the State treasury and securely invested and sacredly preserved as a public-school fund, the annual income of which, together with 25 per cent of the ordinary revenue of the State, shall be faithfully appropriated for establishing and maintaining the free public schools. The State superintendent of public schools shall annually apportion the public-school fund among the different counties upon the enumeration of persons 6 to 20 years of age, from the treasuries of which it shall be apportioned to the districts, towns, or cities which have made the enumeration required by law.

The county fund shall consist of all stocks, bonds, etc., known as such fund, and of the clear proceeds of all penalties and forfeitures and of all fines collected in the several counties for any breach of the penal or military laws of the State as well as exemptions from military duty, the income of which shall be appropriated to the support of the public schools.

The proceeds of the sixteenth section or other land selected in lieu thereof, the interest of such proceeds, the rents and profits of such lands, and all the public-school moneys which shall be apportioned to any unorganized township arising from dividends and profits of the public-school fund, shall constitute a township school fund, which shall be under the care and management of the county court.

Taxation.—For school purposes in districts the annual rate of taxation on property shall not exceed 40 cents on the $100 valuation; but in cities and towns the rate may be increased to an amount not to exceed $1 on the $100 of valuation, and in other districts to an amount not to exceed 65 cents on the $100 valuation, if a majority of the voters assent at an election held to decide the question. For the purpose of erecting public buildings in counties, cities, or school districts, the rates of taxation above limited may be increased when the rate of such increase and the purpose for which it is intended shall have been submitted to a vote of the people and two-thirds of the qualified voters of such county, city, or school district shall vote therefor.

NORTH DAKOTA.

1. Organization of the System.

State superintendent of public instruction.—Board of university and school lands.—County superintendent of schools.—District school board.—City board of education.

State superintendent of public instruction.—There shall be chosen by the qualified electors of the State at the times and places of choosing members of the legislative assembly a superintendent of public instruction, who shall have attained the age of 25 years, and shall have the qualifications of a State elector, and be the holder of a State certificate of the highest grade issued in some State, or be a graduate of some reputable university, college, or normal school. He shall hold his office at the seat of government for the term of two years from the first Monday in January following his election and until his successor is elected and qualified. Before entering upon his duties he shall give a bond in the penal sum of $5,000, with not fewer than two sureties. He shall preserve all the matter accumulated by virtue of his office and turn it over to his successor; shall have the general supervision of the schools, and shall be a member of the board of university and school lands and of the normal-school boards of the State. He shall furnish the necessary blanks and registers and lists of publications approved by him as suitable for district libraries, shall prepare questions to be used in examinations for teachers' certificates, prescribe rules for conducting such examinations, and issue certificates; shall prescribe a course of study for the State and the State normal schools, and the course of study, training, and practice of the professional department of schools designated and supported wholly or in part by the State; shall prescribe rules for the holding of teachers' institutes and assist thereat; shall print the school laws at least once in two years, meet the county superintendents of each judicial district or of two or more districts combined; shall make a biennial report to assembly through the governor, showing—

First, the number of school districts, schools, teachers employed, and pupils taught therein, and the attendance of pupils and studies pursued by them; second, the financial condition of the schools, their receipts and expenditures, value of schoolhouses and property, cost of tuition and wages of teachers; third, the condition, educational and financial, of the normal and higher institutions connected with the school system of the State, and, as far as it can be ascertained, of the private schools, academies, and colleges of the State; fourth, such general matters, information, and recommendations relating to the educational interests of the State as he may deem important.

Two thousand five hundred copies of his report shall be printed and distributed. In addition to his salary he shall receive not more than $600 in any year for traveling expenses.

Board of university and school lands.—See under Finances, Funds.

County superintendent of schools.—There shall be elected in each county a county superintendent of schools, to serve for two years, who shall give bond with surety to the amount of $500. No one is eligible to the office unless he or she holds a certificate of the highest county grade or its equivalent.

The county superintendent shall have the general superintendence of the public schools in his county, except those in cities, which are organized under special law. He shall visit every public school under his supervision within the county at least once each official year, and oftener, if he shall deem it necessary to increase its usefulness. He shall at such visit carefully observe the character and methods of instruction and the condition of the school, and shall advise the teacher and note in writing his proficiency. He shall carry into effect all instructions of the State superintendent given within his authority. He shall distribute to the proper officers and to teachers all blanks furnished him by the State superintendent and needed by such officers and teachers. He may arrange for meeting with school officers at designated times and places, due notice of which has been given, for the purpose of inspecting the district records and instructing in the manner of keeping the same and of preparing the reports of district officers. He shall visit the officers of the several school districts as often as may be necessary to secure the correct keeping of the records. He shall prepare for and furnish to each assessor a correct sectional map showing the boundaries of school districts, shall decide cases of controversy with appeal to State superintendent, and make an annual report upon such matters as the State superintendent may require. He may appoint a deputy, and is entitled to an office and postage.

The salary of the county superintendent shall be as follows: In each county having one school and not over five, $100; six schools and not over ten, $200; eleven schools and not over fifteen, $300; sixteen schools and not over twenty, $400; twenty-

one schools and not over twenty-five, $500; twenty-six schools and not over thirty, $600; thirty-one schools and not over thirty-five, $700; thirty-six schools and not over forty, $800; forty-one schools and not over fifty, $900; and for each additional ten schools or major fraction thereof, $100 additional: *Provided*, That in computing the salary of the county superintendent no school or separate department in graded schools, shall be included unless the same shall have been taught at least three months during the preceding year; but the compensation shall not exceed $1,500 in any county. In addition thereto he shall receive 7 cents a mile for the distance actually and necessarily traveled by him in the discharge of his duties, he shall, at the end of every three months, make and furnish to the county commissioners an itemized statement of the distance so traveled, which shall be audited by and ordered paid by the board of county commissioners out of the county general fund monthly, upon the warrant of the county. In every county which shall be organized for school purposes after the passage of this act the county superintendent shall be paid a salary at the rate of $100 a year until the first Monday in October next following his election, after which his salary shall be fixed as provided for in this paragraph.

District board of trustees.—Each civil township in every county not organized for school purposes under the district system is constituted a distinct school corporation, and when hereafter any civil township shall be organized it shall be a distinct school corporation, except as otherwise provided. There shall be elected at large in each school district three school directors and a school treasurer, the directors to serve for three years, one retiring annually, and the treasurer for two years. The three directors shall constitute the district school board. The board shall have the general charge, direction, and management of the schools, and the care, custody, and control of school property. It shall establish or discontinue schools, employ teachers, may introduce branches in the schools other than those prescribed by law, subject to the approval of the county superintendent; may levy tax, and may permit the use of the schoolhouse for purposes other than instruction when not occupied for school purposes. The board shall determine the length of time schools shall be kept beyond the four months required by law, and may establish high schools, if the voters sanction it. The board shall cause the clerk to take the school census annually, including all unmarried persons 6 to 20. All reports and records of school officers and proceedings of school meetings shall be kept in the English language.

City board of education.—Any city organized for school purposes under special laws and provided with a board of education may become incorporated as an independent school district by vote of the electors. The board of education of an independent district shall consist of one member from each ward in the city, and when the city is divided into an even number of wards then the city shall elect one member of said board at large; members shall hold their office for the terms of two years. The electors in each ward in said city shall elect one member of said board, and the electors of the said city each shall elect one member of said board at large. The wards having even numbers shall hold their election in each year ending with an even number, and the wards having odd numbers shall hold their election in the years ending with odd numbers. The member at large shall be elected biennially in the even-numbered years.

The board shall levy from time to time by tax such sums as may be determined by it to be necessary and proper for any of the following purposes:

First. To purchase, exchange, lease or improve sites for schoolhouses.

Second. To build, purchase, lease, enlarge, alter, improve, and repair schoolhouses and their outhouses and appurtenances.

Third. To purchase, exchange, improve and repair school apparatus, books, furniture, and appendages.

Fourth. To procure fuel and defray the contingent expenses of the board, including he expenses of the secretary.

t Fifth. To pay teachers' wages after the application of public moneys which may be by law appropriated and provided for that purpose.

In cities not organized as independent districts there shall be a board of seven members, who shall be elected by the electors at large.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No person shall be employed as a teacher or permitted to teach in any public school who is not, when so employed, 18 years of age and the holder of a valid teacher's certificate. Every contract made by the district board with a person who is qualified to teach must be in writing, and the salaries of teachers shall be graded according to the grades of their certificates.

The State superintendent shall prepare or cause to be prepared all questions for the examination of applicants for teachers' certificates, both county or State, and shall prescribe rules for conducting all examinations. He shall issue a State certificate to be valid for life, and to be known as a professional certificate. Such certificates shall be issued to those having a good moral character, who have passed a thorough examination in all the branches included in the courses of study prescribed for the common and high schools of the State, and shall entitle the holder to teach in any common or high school. Any person who is a graduate of the four years' normal course in the State University of North Dakota and has had three years successful experience as a teacher may be granted such professional certificate without further examination: *Provided*, That if the holder of a professional certificate shall at any time cease to teach or to be engaged in other active educational work for the space of three years he shall be liable to a reexamination and to the cancellation of his certificate, subject to the rules to be prescribed by the State superintendent.

The State superintendent shall issue a "normal certificate," to be valid in any school in the State for a term of five years unless sooner revoked. Such certificate shall be issued only to those persons of good moral character who have completed the prescribed course of study in one of the normal schools of the State or elsewhere in a normal school having an established reputation for thoroughness; but the State superintendent may examine any such applicant at his discretion. Such certificate shall not be granted unless the applicant shall have taught school successfully not less than two years: *Provided*, That any person who is a graduate of the four years' normal course in the State University of North Dakota, and who has had one year's successful experience as a teacher, may be granted such normal certificate without further examination: *Provided further*, That no State certificate shall hereafter be issued by any normal school in the State. The State superintendent shall require a fee of $5 from each applicant for a professional or normal certificate, which fee shall be used by him to aid in the establishment and maintenance of teachers' reading circles in the State. He shall revoke at any time any certificate issued in the State for any cause which would have been sufficient ground for refusing to issue the same had the cause existed or been known at the time it was issued.

The county superintendent shall hold public examination of all persons over 18 years of age offering themselves as candidates for teachers' common schools at the most suitable places in the county on the second Friday in January, March, May, July, September, and November of each year, and, when necessary, such examination may be continued on the following day, at which times he shall examine them by a series of written or printed questions, according to the rules prescribed by the State superintendent. If from the percentage of correct answers required by the rules and other evidence disclosed by the examination, including particularly the superintendent's knowledge and information of the candidate's successful experience, if any, the applicant is found to be a person of good moral character, to possess a knowledge and understanding, together with aptness to teach and govern, which will enable such applicant to teach in the common schools of the State the various branches required by law, said superintendent shall grant to such applicant a certificate of qualification.

Such certificates shall be of three regular grades—the first grade for a term of three years, renewable; the second grade for a term of two years—and the third grade for one year, may not be issued more than twice to same person, according to the ratio of correct answers of each applicant and other evidence of qualification appearing from the examination. No certificate shall be granted unless the applicant shall be found proficient in and qualified to teach the following branches of a common English education: Reading, writing, orthography, language lessons, and English grammar, geography, United States history, arithmetic, and physiology and hygiene, and for a first and second grade can pass a satisfactory examination in theory and practice of teaching. In addition to the above, applicants for first-grade certificates, who must be 20 years of age and have taught twelve months, shall pass a satisfactory examination in civil government, physical geography, elements of natural philosophy, elements of psychology, elementary geometry, and algebra. The percentage required to pass any branch shall be prescribed by the State superintendent. In addition to these regular grades of certificates, the county superintendent may grant a permission to teach until the next regular examination to any person applying at any other time than at a regular examination who can show satisfactory reasons for failing to attend such examination, subject to rules and regulations to be prescribed by the State superintendent. Such permit shall not be granted more than once to any person. The written answers of all candidates for county certificates, after being duly examined by the county superintendent, shall be kept by him for the space of six months after such examinations, and any candidate thinking an injustice has been done him or her, by paying a fee of $2 into the institute fund of the county and notifying both county and State superintendents

of the same, shall have his or her papers reexamined by the State superintendent; the county superintendent shall, on receipt of such notice from said complaining candidate, transfer said papers to the State superintendent, who shall reexamine such answers, and, if such answers warrant it, shall instruct the county superintendent to issue to such complaining candidate a county certificate of the proper grade, and the county superintendent shall carry out such instructions. Certificates shall be valid in the county where issued, but a first grade may be indorsed by the county superintendent of another county.

Every applicant for a county certificate shall pay $1 to the county superintendent, to be used in support of the teachers' institute.

No teacher shall be entitled to or receive any compensation without a certificate in force to at least six weeks of the close of the term. Every teacher shall keep a school register, and at the close of each term make a school report in duplicate, one to be filed with the district clerk and one sent to the county superintendent, and no teacher shall be paid the last month's wages in any term until such term report shall be filed with and approved by the district clerk. The teacher shall give notice of the opening and probable date of closing school, and may suspend for not more than five days any pupil for cause, notifying the parent and authorities.

Preliminary training.—Two normal schools are created for the instruction of persons in the science and art of teaching public schools, one of which is endowed with 30,000 acres of land and the other with 50,000. The schools are each under a board of five trustees, who, together with the governor and State superintendent, form the board of directors of the State normal schools. The members of the board shall be appointed by the governor, with the consent of the senate, for four years. The board of directors shall adopt a course of study which shall embrace the academic and professional studies usually taught in normal schools. The board of trustees shall have care of the property of its own school, and shall name the instructors to the board of directors, who shall employ them and fix their salaries, but not their duties.

Meetings—The State superintendent shall prescribe rules for the holding of teachers' institutes, and after counseling and advising with county superintendents shall appoint conductors therefor. He shall also prescribe the course of instruction for institutes and reading circles. Acting under the instructions of the State superintendent, he shall convene the teachers of his county at least one Saturday in each month during which the public schools may be in progress, or, if the distance is too great, he may convene the teachers of two or more districts in each of the several portions of his county in county or district institutes or teachers' circles for normal instruction and the study of methods of teaching, organizing, and governing schools. Each teacher shall attend the full session of such institute or circle or forfeit one day's wages for each day's absence, unless distance or sickness prevents.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—The district board shall determine and fix the length of time the schools in the district shall be taught in each year and when each term of school shall begin and end. It shall so arrange such terms as to accommodate and furnish school privileges equally and equitably to pupils of all ages: *Provided,* That every common school shall be kept in session for not less than four months in each school year; and in every district in which the number of persons of school age (6 to 20) is an average of 15 or more to the school, each school shall be kept in session for not less than six months in each school year: *Provided further,* That any school may be discontinued when the average attendance of pupils therein for ten consecutive days shall be less than 4, and all contracts between school boards and teachers shall contain a provision that no compensation shall be received by such teacher from the date of such discontinuance or when with the consent of a majority of the patrons of such school proper and convenient school facilities can be provided for the pupils therein in some other school.

If the majority of the patrons of any school averaging for its last term 12 or more pupils in daily attendance shall petition the board to continue such school for an additional time not exceeding nine months in any school year, the board shall continue such school for that length of time if there be funds in the treasury sufficient for that purpose.

Every parent, guardian, or other person having control of any child between 8 and 14 years of age shall be required to send such child to a public school in the district, city, town, or village in which he resides at least twelve weeks in each school year, six weeks of which shall be consecutive; and every parent, guardian, or other person having control of any deaf child or youth between 7 and 20 years of age shall

be required to send such child or youth to the School for the Deaf at the city of Devils Lake for at least eight months in each school year: *Provided*, That such parent, guardian, or other person having control of any child shall be excused from such duty by the school board of the district or the board of education of the city, town, or village whenever it shall be shown to their satisfaction, subject to appeal as provided by law, that one of the following reasons therefor exists, to wit:

First. That such child is taught for the same length of time in a private school approved by such board; but no school shall be approved by such board unless the branches usually taught in the public schools are taught in such school.

Second. That such child has already acquired the branches of learning taught in the public schools.

Third. That such child is in such a physical or mental condition (as declared by a competent physician, if required by the board) as to render such attendance inexpedient or impracticable. If no school be taught the requisite length of time within 2½ miles of the residence of such child by the nearest road such attendance shall not be enforced, but this provision shall not apply to deaf children in the State: *Provided further*, That the common schools provided for in this act shall be at all times equally free, open, and accessible to all children over 6 and under 20 years of age, residents of the school districts where they are held, or entitled to attend school under any special provisions of this act, subject to the regulations herein made and to such regulations as the several school boards and boards of education may prescribe equitably and justly and not in conflict with the provisions of law.

Any such parent, guardian, or other person failing to comply with the requirements of the foregoing section shall, upon conviction thereof, be deemed guilty of a misdemeanor, and shall be fined in a sum not less than $5 nor more than $20 for the first offense, nor less than $10 nor more than $50 for the second and every subsequent offense, with costs in each case.

It shall be the duty of the president of the board of education of any city, town, or village, or the president of the school board of any district to inquire into all cases of neglect of duty prescribed in these provisions, and ascertain from the person neglecting to perform such duty the reason, if any, and shall proceed to secure the prosecution of any offense occurring against the laws regarding compulsory attendance, and any such president neglecting to secure such prosecution for such offense within fifteen days after a written notice has been served by any taxpayer in a city, town, or village or district (unless such person so complained of shall be excused by the board of education) shall be liable to a fine of from $5 to $20.

No child between 8 and 14 years of age shall be employed in any mine, factory, or workshop, or mercantile establishment, or, except by his parents or guardian, in any other manner, during the hours when the public schools in the city, town, village, or district are in session, unless the person, firm, or corporation employing him shall first procure a certificate from the superintendent of the schools of the city, town, or village, if one be employed, otherwise from the clerk of the school board or board of education, stating that such child has attended school for the period of twelve weeks during the year, as required by law, or has been excused from attendance as provided in a foregoing section of this act; and it shall be the duty of such superintendent or clerk to furnish such certificate upon application of the parent, guardian, or other person having control of such child entitled to the same.

Every owner, superintendent, or overseer of any mine, factory, workshop, or mercantile establishment, and any other person who shall employ any child between 8 and 14 years of age, contrary to the provisions of this article, shall be deemed guilty of a misdemeanor, and for every such offense shall, upon conviction thereof, be fined not less than $20 nor more than $50 and costs. Every person authorized to sign a certificate, who certifies to any materially false statement therein, shall be fined not less than $20 nor more than $50 and costs.

Character of instruction.—If any money belonging to any district shall be expended in supporting a school in which the English language shall not be taught [used] exclusively, the county superintendent or any taxpayer of the school corporation may recover for the corporation all such money from the officer or officers so expending it or ordering or voting for its expenditure.

Every teacher in the common schools shall teach pupils, as they become sufficiently advanced to pursue the same, the following branches: Orthography, reading, spelling, writing, arithmetic, language lessons, English grammar, geography, United States history, physiology, and hygiene, giving special instruction concerning the nature of alcoholic drinks, stimulants, and narcotics and their effect upon the human system. Physiology and hygiene and the nature of alcoholic drinks, stimulants, and narcotics, and their effect upon the human system shall be taught as thoroughly as any branch is taught, by the use of a text-book, to all pupils able to use a text-book who have not thoroughly studied that branch, and orally to all other pupils, and when such oral instruction is given as herein required, a sufficient time, not less than fifteen

minutes, shall be given to such oral instruction for at least four days in each school week. Every teacher in the schools in special districts and in cities organized for school purposes under special law shall conform to and be governed by the provisions of this paragraph. The district board shall have power to determine what branches, if any, in addition to those required by law, shall be taught in any school, subject to the approval of the county superintendent.

It shall be the duty of the teacher to assign to each pupil such studies as he is qualified to pursue, and to place him in the proper class in any studies: *Provided*, That in a graded school under the charge of a principal or local superintendent, such principal or superintendent shall perform this duty. In case any parent or guardian is dissatisfied with such assignment or classification, the matter shall be referred to and decided by the county superintendent.

In any district containing four or more common schools and having an enumeration of 60 or more persons of school age residing therein, the board may call, and if petitioned so to do by ten or more voters in the district, shall call, a meeting of the voters of the district, and, if a majority of the voters at such meeting vote in favor of establishing such high school, the meeting shall further proceed to select a site therefor and to provide for the erection or purchase of a school building, or for the necessary addition to some school building therefor. Thereupon the board shall erect or purchase a building or make such addition for such high school, as voted at such meeting, and shall establish therein a district high school containing one or more departments, and employ a teacher or teachers therefor. Such school shall be kept in session for such time each year, not less than three months, as the board may determine. The board shall, subject to the approval of the county superintendent, grade such high school and prescribe the studies to be pursued therein, and shall have the same management and control thereof as of the common schools in the district. Two or more adjacent school districts may join in the establishment and maintenance of such high school, when empowered so to do by a majority of the voters in each district at a meeting.

Buildings.—The school board of any school district may take 2 acres or less for the site for a schoolhouse. If a petition signed by the persons charged with the support and having the care and custody of 9 or more children of school age, all of whom reside not less than 2½ miles from the nearest school, be presented to the board asking for the organization of a school for such children, if a suitable room can be leased or rented, and if the persons having the care and custody of 12 or more children and no suitable room can be leased or rented, the board shall call a meeting of the voters for the purpose of providing a suitable schoolhouse. In general the board has the care of school property, which it may purchase, build, or sell when directed by the voters.

4. Finances.

Funds (permanent and special).—Taxation.

Funds (permanent and special).—All proceeds of the public lands that have heretofore been or may hereafter be granted by the United States for the support of the common schools in this State; all such per cent as may be granted by the United States on the sale of public lands; the proceeds of property that shall fall to the State by escheat; the proceeds of all gifts and donations to the State for common schools, or not otherwise appropriated by the terms of the gift, and all other property otherwise acquired for common schools shall be and remain a perpetual fund for the maintenance of the common schools of the State. It shall be deemed a trust fund, the principal of which shall forever remain inviolate, and may be increased, but never diminished. The State shall make good all losses thereof.

The interest and income of this fund, together with the net proceeds of all fines for violation of State laws, and all other sums which may be added thereto by law, shall be faithfully used and applied each year for the benefit of the common schools of the State, and shall be for this purpose apportioned among and between all the several common-school corporations of the State in proportion to the number of children in each of school age, as may be fixed by law, and no part of the fund shall ever be diverted even temporarily from this purpose, or used for any other purpose whatever than the maintenance of common schools for the equal benefit of all the people of the State: *Provided, however,* That if any portion of the interest or income aforesaid be not expended during any year, said portion shall be added to and become a part of the school fund.

The superintendent of public instruction, governor, attorney-general, secretary of state, and State auditor shall constitute a board of commissioners, which shall be denominated the "board of university and school lands," and, subject to the provisions of this article and any law that may be passed by the legislative assembly,

said board shall have control of the appraisement, sale, rental, and disposal of all school and university lands, and shall direct the investment of the funds arising therefrom in the hands of the State treasurer.

Taxation.—Every district school board shall have power, and it shall be their duty, to levy upon all the property subject to taxation in the district a tax for school purposes of all kinds authorized by law not exceeding in the aggregate a rate of 30 mills on the dollar in any one year. Such tax shall be levied by resolution of the board. The clerk shall immediately thereafter notify the county auditor, in writing, of the amount of tax so levied.

The county auditor of each county shall, at the time of making the annual assessment and levy of taxes, levy a tax of $1 on each elector in the county for the support of common schools, and a further tax of 2 mills on the dollar upon all the taxable property in the county, to be collected at the same time and in the same manner as other taxes are collected, which shall be paid by the county treasurer to the State treasurer, as provided by law, and which shall constitute a part of the State tuition fund.

SOUTH DAKOTA.

1. Organization of the System.

State superintendent of public instruction.—County superintendent of schools.—District school board and director.—City board of education.

State superintendent of public instruction.—There shall be elected biennially a State superintendent of public instruction, who shall be charged with the general supervision of all the county schools and county superintendents. He shall meet the county superintendents once a year, prescribe rules for, attend, and assist at teachers' institutes as far as consistent with his other duties, render a written opinion to any county superintendent asking it touching the administration of school law, and determine cases appealed to him from the county superintendents. He shall be provided with an office at the seat of government, where the records and other accumulations of his department shall be kept open to the governor or committees of either branch of the legislature. He shall print and distribute laws and blank forms, shall make a report to the legislature in the year of its session, prepare examination questions, may appoint a deputy at $1,200 per annum, shall appoint the conductor and lecturers and the time and place of holding institutes, and may grant State certificates and diplomas after holding examinations. His compensation shall be fixed by law, and in addition he shall receive $500 for traveling expenses.

County superintendent of schools.—There shall be elected biennially a county superintendent of schools, who shall have the general supervision of the schools of his county. He shall visit each school in the county at least once annually, rectifying the government, instruction, and classification of the schools; shall encourage teachers' institutes and other meetings, holding a county institute annually; shall examine persons applying for positions in the schools and grant certificates to those qualified; shall report the school census to the commissioner of school and public lands; shall annually report to the State superintendent a full abstract of the reports made to himself by the district officers; shall hear appeals from district boards; shall levy a tax of $1 on each elector in the county and a further tax of 2 mills on the dollar upon all taxable property, apportion school money, and shall hold no other office.

He shall give bond, with two sureties, in the sum of $500; may provide and furnish at county's expense an office at the county seat where the accumulations of his department shall be kept, and shall receive a salary to be determined on the following basis: For the first 1,000 inhabitants he shall receive $200, for each additional 1,000 he shall receive $100. For the purpose of determining the number of such inhabitants in any county the total vote of the county at the preceding general election shall be multiplied by 5. Vacancy in the office is to be filled by the county commissioner. Failure to report to the State superintendent subjects the county superintendent to a fine of $100 and liability to damages caused by his neglect.

District school board and director.—In all counties organized for school purposes under the district system each school district shall be and remain a district school corporation, and each civil township in every county in the State not organized for school purposes under the district system is constituted a district-school corporation. Any township district may be subdivided by vote.

In every district containing one school a majority of the electors shall have authority to instruct the district school board concerning the management of the school and to levy taxes for the maintenance of the same.

There shall be elected annually one member of a district school board of three persons, who are to be styled respectively chairman, clerk, and treasurer. Boards

having under their control more than one school shall hold four regular meetings annually, but other boards shall meet annually, though special meetings may be called.

The board shall have the general charge, direction, and management of the school or schools of the district, which they shall organize, maintain, and conveniently locate, and for which they shall employ teachers.

In districts containing three or more schools one director for each school may be elected.

City boards of education.—When any city or town is divided into wards, there shall be elected annually a board of education consisting of two members from each ward, each to serve two years, one retiring annually. In cities and towns and all corporations not organized as such not divided into wards, there shall be as many members of the board of education as there are members of the council or board of trustees.

The board shall levy tax to support the schools, elect a superintendent of schools not a member of their body, who shall supervise the schools at such salary and time as the board may determine. The board shall also appoint two persons, who with the superintendent shall form the examining committee of the board.

All records must be kept and reports made in the English language.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—Teachers may be employed by the district board when holding a teacher's certificate valid in the county or city. The agreement shall be in the form of a written contract.

A State certificate shall be valid for five years and authorize to teach in any school of the State. Candidates for such certificate shall present evidence of three years' successful experience, and pass a satisfactory examination in algebra, geometry, natural philosophy, physiology, and hygiene, drawing, civil government, didactics, general history, and American literature. The character of the papers submitted shall determine the candidate's knowledge of English grammar, orthography, and penmanship. The possession of a good moral character shall be deemed a necessary requisite. Any resident graduate of either of the State normal schools shall be entitled to a State certificate. Any person receiving two successive five-year State certificates shall be entitled to renewal thereof on evidence of continued employment and success in teaching.

The State diploma shall be valid for life and authorizes to teach in any school of the State. It is granted under the following conditions: The presentation of a diploma of an institution, with its course of study, or passage of an examination, ample proof of ten years' successful experience as a teacher, a satisfactory examination in the science and art of education, an examination in two branches of the following: Geometry, trigonometry, astronomy, chemistry, zoology or geology; and two from the following: English literature, rhetoric, general history, political economy, or pyschology. The applicant must also write a thesis of 3,000 to 5,000 words upon a special topic in one of the branches in which examined, must show a correct and intimate knowledge of English, must be recommended by persons of liberal education, must present a thesis on a topic selected by the State superintendent, and must have a good moral character.

On the first Friday of March, June, September, and November of each year the county superintendent shall examine persons offering themselves as teachers, at least two of which examinations shall be held at the county seat. The percentage of correct answers, evidences revealed by the examination, and the superintendent's own knowledge of the candidate's ability to teach and govern shall be the motives that guide in granting a certificate to an applicant, who shall also possess a good moral character. County certificates shall be of three grades. Applicants for the first-grade certificate, good for three years, shall pass in orthography, reading, writing, arithmetic, geography, physical geography, English grammar, physiology, hygiene, history of the United States, civil government, current events, bookkeeping, American literature, drawing, and didactics. The papers, after being marked by the county superintendent, shall be forwarded to the State superintendent, who shall inspect them and after approval issue a certificate. The second-grade certificate, good for one year in the county, requires that the applicant pass in orthography, reading, writing, arithmetic, physiology and hygiene, geography, English grammar, history of the United States, civil government, and didactics. A third-grade certificate, good for one year or less, in the discretion of the county superintendent, in restricted localities, shall be granted on private examinations subject to rules laid down by the State superintendent, but not more than two third-grade cer-

tificates may be issued to the same party. No first or second grade certificate shall be issued to one under 18; no third grade to one under 17.

The county superintendent shall require a fee of $1 from every applicant, to be deposited to the credit of the county institute fund.

The board of education in cities of the first class shall appoint two competent persons, who with the city superintendent shall examine all persons who apply for positions as teachers, and no one who does not hold a State certificate or diploma shall be employed unless holding a certificate from the examining committee.

Teachers shall be allowed one-half a day pay for each day of attendance on county institute, shall keep the register and make the reports required on penalty of loss of one-tenth of her annual pay.

In cities and other independent districts persons exclusively engaged in teaching music, drawing, penmanship, bookkeeping, foreign languages, or kindergarten methods shall not be required to hold a county certificate.

Meetings.—The county superintendent shall annually hold a normal institute between April 1 and September 15, of not less than five days' duration, for the instruction of teachers and of those desiring to teach, the conductor of which shall be appointed by the State superintendent. At the close of the institute a public examination shall be held.

City teachers must attend county institutes. It is the duty of the county superintendent to hold two district institutes during the year, either in a district or group of districts.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—If any district fails to levy a sufficient tax to support a school for the six months, the board of county commissioners shall levy a tax on the property of the district that will be sufficient for the purpose: *Provided*, That such tax shall not exceed 2 per cent of the taxable property in the district. The patrons of any school may petition for the discontinuance of the same, and, if appearing wise, the county superintendent may discontinue the school; but if the nearest school is more than 2 miles by public highway, it shall be the duty of the board of the district to pay for transportation or to provide for the boarding of such pupils near the school. Schools shall be free to all 6 to 20 years of age.

Every person having under his control a child between the ages of 8 and 14 years shall annually cause such child to attend for at least twelve weeks, six of which shall be consecutive, in some public day school in the city, town, or independent district in which he resides, which time shall commence with the beginning of the first term of the school year or as soon thereafter as due notice shall be served upon the person having such control of his duty under this act. For every neglect of such duty the person offending shall forfeit to the use of the public schools of his school corporation a sum not less than $10 nor more than $20, and shall stand committed until such fine and costs of suit are paid. But if the person so neglecting shall show to the board of education or district school board, as the case may be, that such child has attended for a like period of time a private day school or that instruction has otherwise been given for a like period of time to such child in the branches commonly taught in a public school, that such child has already acquired the branches of learning taught in the public schools, or that his physical or mental condition as declared by a competent physician is such as to render such attendance inexpedient and impracticable, then such penalty shall not be incurred. Such fine shall be paid, when collected, to the county treasurer or the treasurer of such city or independent district in which such child and parents reside, to be accounted for by him as other money raised for school purposes.

It shall be the duty of the president of the board of education in every city or other independent district and the chairman of every district school board carefully to inquire concerning all supposed violations of this act and to enter complaint against all persons who shall appear to be guilty of such violation. It shall also be the duty of said officers to arrest children of a school-going age who habitually haunt public places and have no lawful occupation, and also truant children who absent themselves from school without leave, and to place them in charge of the teacher having charge of the public schools which said children are by law entitled to attend. And it shall be the duty of said teacher to assign such children to the proper classes and to instruct them in such studies as they are fitted to pursue. Any school officer failing or neglecting to perform the duty required of him by this chapter shall be liable to a fine of not less than $10 nor more than $20 for every such offense.

No child between eight and fourteen years of age shall be employed in any mine, factory, or workshop, or mercantile establishment, or, except by his parent or guardian, in any other manner during the hours when the public schools in the city, town, village, or district are in session, unless the person, firm, or corporation employing him shall first procure a certificate from the superintendent of the schools of the city, town, or village, if one be employed, otherwise from the clerk of the school board or board of education, stating that such child has attended school for the period of twelve weeks during the year, as required by law, or has been excused from attendance, and it shall be the duty of such superintendent or clerk to furnish such certificate upon application to those entitled to demand it. Every owner, superintendent, or overseer of any mine, factory, workshop, or mercantile establishment, and any other person who shall employ any child between 8 and 14 years contrary to these provisions shall be fined for every offense from $10 to $20 and costs. And any person having control of a child, who, with intent to evade these provisions, shall willfully make a false statement concerning the age of the child or the time the child has attended school, shall be fined for each offense from $10 to $20. The prosecutions are to be carried on in the name of the district school board or the chairman of the board of education.

Character of instruction.—Teachers shall classify the work in their schools in accordance with the suggestions, grades, and outlines as prescribed in the course of study recommended by a majority of the county superintendents of the State and the superintendent of public instruction, and shall hold examinations. Instruction shall be given in reading, writing, orthography, arithmetic, geography, English grammar, history of the United States, temperance, physiology and hygiene, and civil government. It shall be the duty of the district board to provide for such extra branches of study as may be desired by the electors.

Buildings.—The district board shall purchase or lease a site designated by voters, and build, hire, or purchase a schoolhouse, as directed by them.

Every person, pupil or other, who willfully molests or disturbs a public school when in session shall be fined $25 or less or by imprisonment in the county jail for not more than ten days, or both. Any pupil who cuts, defaces, or otherwise injures any schoolhouse or its appurtenances is liable to suspension or expulsion and the parents to damages.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—All proceeds of the sale of public lands that have heretofore been or may hereafter be given by the United States for the use of public schools in the State; all such per centum as may be granted by the United States on the sale of public lands; the proceeds of all property that shall fall to the State by escheat; the proceeds of all gifts or donations to the State for public schools or not otherwise appropriated by the terms of the gift; and all property otherwise acquired for public schools shall be and remain a perpetual fund for the maintenance of public schools in the State. It shall be deemed a trust fund held by the State. The principal shall forever remain inviolate, and may be increased but shall never be diminished, and the State shall make good all losses thereof which may in any manner occur.

The interest and income of this fund, together with the net proceeds of all fines for violation of State laws and all other sums which may be added thereto by law, shall be faithfully used and applied each year for the benefit of the public schools of the State, and shall be for this purpose apportioned among and between all the several public-school corporations of the State in proportion to the number of children in each of school age, as may be fixed by law; and no part of the fund, either principal or interest, shall ever be diverted, even temporarily, from this purpose or used for any other purpose whatever than the maintenance of public schools for the equal benefit of all the people of the State

Taxation.—The county commissioners shall, at the time of making the annual assessment and levy of taxes, levy a tax of $1 on each elector in the county for the support of common schools and a further general tax of 2 mills on the dollar upon all taxable property in the county to be applied to the same purpose, which shall, with the money received from the State, constitute and be known as "the county general school fund;" and they shall levy such further tax upon the taxable property of each school district as the board thereof shall certify is required for the support of the schools, and when collected shall be credited to the district to which it belongs. But the electors in every district containing one school shall have authority to levy taxes for the same, the tax not to exceed 2 per cent of the taxable property in the district, and in case of failure of any district to levy a sufficient tax to support school for six months, the board of county commissioners shall levy an amount not to exceed 2 per cent of the taxable property.

NEBRASKA.

1. Organization of the System.

State superintendent of public instruction.—Deputy State superintendent of public instruction.—State board of commissioners for managing school fund.—County superintendent of public instruction.—High school district trustees.—District board.—City board of education.

State superintendent of public instruction shall be elected biennially. He shall be furnished with an office at the seat of government, where he shall keep the records of his office, which are ever to be open to the governor, auditor, or committee of either branch of the legislature. He shall organize and, as far as practical, attend teachers' institutes and provide proper instructors.

Deputy State superintendent of public instruction.—The State superintendent may appoint a deputy at a salary of $1,500 per annum.

State board of commissioners for managing school lands.—(See Finances, Funds.)

County superintendent.—There shall be a county superintendent in each organized county, elected for two years, and whose compensation shall be fixed by the county commissioners, which shall not be less than $1,200 per annum in counties having a school population of 5,000 or more; and not less than $1,000 per annum in counties having a school population of 4,000 but less than 5,000; and not less than $800 per annum in counties having a school population of 3,000 but less than 4,000; and not less than $500 per annum in counties having a school population of 2,000 but less than 3,000; and in counties having a school population less than 2,000 a per diem of not less than $3.50 or more than $5 for each day actually employed in the duties of his office. The number of days necessary for the duties of the office shall be determined by the county superintendent, but the number of days so employed shall not be less than the number of school districts in said county, and one day for each precinct thereof, for the examination of teachers. The superintendent shall file in the office of the county clerk a sworn statement of his account.

The county superintendent shall examine all persons offering themselves as teachers for the public schools, shall grant certificates, and may indorse a certificate in force in any other county of any State. He shall visit each of the schools of his county at least once a year to examine carefully into the discipline and modes of instruction and into the progress and efficiency of the pupils, to counsel with the teachers and district boards as to the course of study to be pursued, to note the condition of the schoolhouse and appurtenances thereto, to suggest place for new schoolhouses to be erected, and plans for warming and ventilating, and the general improvement of the schoolhouse and grounds, to promote by public lectures, teachers' institutes, and such other means as he may devise the improvement of the schools in his county, to consult with the teachers and school boards to secure general and regular attendance of the children of his county upon the public schools, receive all such blanks and communications as may be directed to him by the State superintendent of public instruction, and to dispose of the same in the manner directed by the State superintendent, to examine into the correctness of the reports of the district boards, and, when necessary, to require the same to be amended.

The county superintendent shall be subjected to such rules and instructions as the State superintendent may from time to time prescribe, to whom he shall report annually.

Whenever, by death, resignation, or removal, or otherwise, the office of superintendent shall become vacant, the county board shall have power to fill such vacancy.

He shall report the names of every blind or deaf person (5 to 21) to the superintendent of the State institution for each class.

He shall visit such schools as he may have it in his power to do, and witness and advise with teachers and school officers upon the manner in which they are conducted; shall decide disputed points in school law; shall prescribe forms for making all reports and regulations for all proceedings under the general school laws of the State; shall cause to be printed, in pamphlet form, the school laws and laws relating to the school lands, with blank forms prescribed by him, and furnish each county superintendent with a sufficient number to supply the district officers within his jurisdiction; shall annually submit to the governor a report containing a statement of the school funds of the State, an account of the receipts and expenditures

for the purpose of schools, a statement of the condition of the common schools and other educational institutions chartered or fostered by the State, embracing the number of schools of the several grades, the number and average compensation of the teachers, the names and compensations of county superintendents, the number of pupils attending the several schools, the enumeration of youth by counties, the value of schoolhouses, sites, apparatus, and furniture; a statement of such plans as he may devise for the better management of the school funds and the school system, and such other statements as he may deem expedient to communicate relating to his office and popular education.

He shall cause his report to be printed by the State printers, and shall deliver at the commencement of each regular session of the legislature 100 copies thereof to the senate, and 400 copies to the house of representatives, and transmit one copy to each district director in the State, and one to each county superintendent.

He shall semiannually make an apportionment of the school funds according to the enumeration of youth.

High school district trustees.—Any district containing more than 150 children, 5 to 21, may elect a district board consisting of six trustees, two to retire annually, vacancies being filled, until the next meeting of the district, by the board. The board shall have power to classify and grade the scholars in such district, and cause them to be taught in such schools and departments as they may deem expedient; to establish in such district a high school, when ordered by a vote of the district at an annual meeting, and to determine the qualifications for admissions to such schools and the prices to be paid for tuition on any branch therein; to employ all teachers necessary for the several schools of said district; to prescribe courses of study and text-books for the use of said schools, and to make such rules and regulations as they may think needful for the government of the schools and for the preservation of the property of the district, and also to determine the rates of tuition to be paid by nonresident pupils attending any school in said district. It shall present annually a statement of all the receipts and expenditures and the net balance, and an estimate of the amount necessary to be raised by the district, in addition to the money received from the primary-school fund and other sources for the support of the school for the ensuing year, and the district annual meeting may vote the sums to be raised.

District board.—The term school district shall mean the territory under the jurisdiction of a single school board. Each organized county not already divided into school districts or any part of such counties not so divided shall be divided by the county superintendent into as many school districts as may be necessary, and on petition of one-third of the legal voters he may create a new district from organized territory, or on petition of one-half of the legal voters of each district affected to change the boundaries of a district.

There shall be elected at the annual meeting a director, a moderator, and a treasurer, each of whom shall serve for three years, and one of whom shall retire annually. The moderator shall preside at the district meetings and countersign all orders on the treasurer. The director shall be clerk of the board, take the school census, hire teachers (with the consent of another member of the board but not employ a district school officer without consent of two-thirds of the voters), draw orders on the treasurer, and report to the county superintendent the following particulars:

The whole number of children belonging to the district between the ages of 5 and 21 years (and any district board neglecting to take the enumeration and make return of the same shall be liable to said district for all school moneys which such district may lose by such neglect); the number attending school during the year under 5 and also the number over 21 years of age; the whole number that have attended school during the year; the whole number in the district between the ages of 8 and 14 years, inclusive; the whole number in the district between the ages of 8 and 14 years, inclusive, that have attended school not less than twelve weeks during the school year; the length of time the school has been taught during the year by a qualified teacher, the length of time taught by each teacher, and the wages paid to each; the total number of days all scholars between the ages of 5 and 21 years have attended school during the year; the amount of money received from the county treasurer during the year and the amount of money expended by the district during the year; the number of mills levied for all school purposes; the kind of books used in the school; number of children to whom text-books are furnished and kind of books; the amount of bonded indebtedness; such other facts and statistics as the superintendent shall direct.

The director shall have the care of the school and its organization, shall purchase or lease the site designated by the district, and shall build, hire, or purchase a building out of the fund provided for the purpose.

City boards of education.—Each incorporated city having more than 1,500 inhabitants, including such adjacent territory as may be attached for school purposes, shall constitute one school district and all schools within that district shall be under the direction and control of a board of education of 6, 9, or 15 members, elected for terms of three years each, one-third retiring annually.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—The district board shall hire no teacher who does not hold a certificate in force.

Permanent teachers of high character and broad scholarship, and who have a successful experience, may, upon examination by the State superintendent, or by a committee of 3 competent teachers appointed by him, receive a professional State certificate, which shall authorize the holder to teach in any public school in the State, without further examination; but no life certificate shall be in force after its holder shall permit a space of three years to elapse without following some educational pursuit, unless said certificate be indorsed by the State superintendent. Graduates of colleges and universities of good standing, who have received a certificate of the first grade in this State, and who shall have taught in any high school in the State with ability and success for at least three years, shall be entitled to a professional certificate without further examination.

The branches required for a professional State certificate shall be the following, to wit: Written arithmetic, United States history, reading and elocution, English grammar, common and physical geography, with map drawings, physiology, algebra, natural philosophy, chemistry, composition and rhetoric, bookkeeping, plane geometry, plane trigonometry, geology, zoology, botany, English literature, general history, intellectual philosophy, civil government and school laws, the theory and art of teaching, and temperance, physiology, and hygiene.

The county superintendent shall examine all persons offering themselves as teachers for the public schools, and shall attend at the county seat upon the third Saturday in each month in the year for that purpose, and at such other times and places as he may select. Any certificate granted at any other time or place than those specified above shall be null and void. And any county superintendent who shall violate any of these provisions shall, upon conviction of the same, be fined in any sum not less than $25. He may, however, indorse a certificate in force in any other county of this State or of any other State without examination, and the indorsement shall render the certificate valid in his county for such time as the superintendent may determine, not exceeding two years from the date of the indorsement, but in no instance for a longer time than the certificate was originally intended: *Provided*, That the superintendent shall have power to revoke said certificate for the same causes and in like manner as those granted by himself.

There shall be three grades of certificates of teachers to be granted by the county superintendent, in his discretion, to wit: The certificate of the third grade shall be granted to persons who shall have passed satisfactory examination in orthography, reading, writing, geography, arithmetic, physiology, English composition, and English grammar, and of good moral character, learning, and ability to instruct and govern a school, which certificate shall license the holder thereof to teach in some special district, and shall not continue in force for more than six months nor be issued more than three times to the same person. The certificate of the second grade may be granted to any person of approved learning and character who, in addition to the branches specified in the above section, shall pass a satisfactory examination in history of the United States, civil government, bookkeeping, blackboard drawing, theory and art of teaching, and temperance physiology and hygiene, which shall be valid throughout the county for one year. The certificate of the first grade shall be granted to no person who has not taught at least one year with approved ability and success and who shall not pass a satisfactory examination in all the branches required to obtain a second grade certificate, and in algebra, geometry, botany, and natural philosophy, the certificate shall be valid throughout the county in which it is granted for two years. Any certificate may be revoked for cause shown after due notice.

All persons making applications to boards of education as teachers in graded and high schools of cities shall be required to produce a legal certificate given by some authority authorized to grant teachers' certificates or from an examining committee appointed by the board. For such purpose the board of education is

authorized to appoint three competent persons, at such times as may be expedient, who shall be styled "the examining committee of the board of education," and whose duty it shall be to examine all persons who may apply to them for positions as teachers; and teachers receiving such certificates setting forth that such person is competent to teach in the public schools of the city, and is a person of good moral character, shall be entitled to all the benefits arising from a certificate issued to any teacher under the laws of this State. Any certificate granted by such committee may be revoked by the board of education for any reason which would have justified the withholding thereof when the same was granted, or for gross negligence of duty, incompetency, or immorality.

Every teacher shall make a monthly return to the director of the district of the number of pupils attending his or her school, the names and ages of each, the days attended, the studies pursued, and no teacher will be entitled to receive pay in full for a term's service till the term summary is properly filled out and approved by the director.

Preliminary training.—The State normal school shall be exclusively devoted to the training of persons for teaching and managing schools and in the principles and practice of the various branches of learning taught in the public schools and shall be under the direction of a board of education, consisting of seven members, five of whom shall be appointed by the governor for a term of five years each, and the State treasurer and the State superintendent of public instruction shall, by virtue of their office, be members of said board. The said board shall have power to appoint a principal, assistant teachers, and such other employees as may be required, to fix their compensation and prescribe their duties, and shall make regulations for the admission of pupils. The board of education shall receive no compensation for their services, but shall be reimbursed for actual expenses incurred in attending upon meetings of the board.

Any student having completed the "common-school course" shall be entitled to a certificate good for two years in any part of the State; and any student completing the higher course of study in a satisfactory manner shall be entitled to a diploma entitling the holder to teach in any school for three years; any graduate of the higher course, who shall, after graduation, teach two annual terms of school of not less than six months each, or their equivalent, and shall produce a certificate of good moral conduct and satisfactory discharge of professional duties from the board or boards of directors of the district or districts in which the applicant taught, countersigned by the county superintendent of the proper county or counties, shall be entitled to receive an additional diploma, good for life: *Provided*, That any teacher producing satisfactory proof of three years' successful teaching previous to graduation in the higher course of study may receive, upon graduation, a diploma good for life: *Provided*, That no life diploma shall be in force after its holder shall permit a space of three years to elapse without following some educational pursuit, unless said diploma be indorsed by the State superintendent: *Provided*, That each holder of a certificate from the common-school course, or a diploma from a higher course, shall, before he begins to teach, register the same in the office of the county superintendent of the county in which he shall teach; and for such registration he shall pay a fee of $1, which shall go into the institute fund of said county.

All funds appropriated for the use and benefit of the normal school, together with the income arising from the lease and sale of the endowment lands belonging to said school, shall be under the direction and control of said board of education, subject to the provisions herein contained.

All the lands remaining unsold of the 20 sections heretofore appropriated as an endowment fund for the State normal school and all the endowment fund hitherto derived from the sale of such lands shall be forever an endowment.

Meetings.—For the purpose of allowing teachers an opportunity to improve themselves in the art of teaching, two kinds of teachers' institutes shall be held in the State—normal institutes, to be organized by the State superintendent, and county institutes, to be organized by the county superintendents.

For the purpose of defraying the expenses of these institutes there is hereby appropriated the entire institute fund of the county in which the institute is located, and the further sum of $2, to be paid out of the institute fund of any county from which any teachers go to attend said institute, for each teacher who attends from such county. To form a fund to defray the expenses of institutes each teacher examined for a certificate, or who has a certificate renewed or indorsed by the county superintendent, shall pay the sum of $1 to the county superintendent, to which sum thus raised the county commissioners shall add each year that an institute is held in the county the sum of $25 to $100 from the general fund of the county.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—The legal voters determine the length of time school shall be taught, which, to entitle the district to any portion of the State fund, shall not be less than three months in the district which has fewer than 35 pupils, nor less than six months in districts that have between 35 and 100 pupils, inclusive, nor less than nine months in districts where there are more than 100 pupils. The schools are free to all 5 to 21 years of age whose parents or guardians reside within the district.

It shall be unlawful for any parent or guardian living in the State of Nebraska to neglect or refuse to cause or compel any one person or persons who are, or may be, under their control as their children or wards to attend and comply with the rules of some one or more public or private school or schools for a term of twelve weeks or more during each successive year from the time said children or wards are 8 years old until they are 14 years old, inclusive, unless they may be prevented by illness, poverty, inability, or by reason of already being proficient from attending such public or private school or schools: *And provided,* That in such case they shall be excused by the board of education of the school district in which said children or wards may live at the time of such failure to attend such public or private school or schools. That any person or persons violating this act shall be subject to a fine of not less than $10 nor more than $50 for each and every offense. Said fine shall be imposed by any court of justice having jurisdiction, on sufficient evidence of the same being furnished by two or more credible witnesses, and all fines so collected shall be placed in the general school fund the same as other fines and penalties.

Character of instruction.—The district board and boards of education shall have power to classify and grade the scholars in their district and cause them to be taught in such schools and departments as they may deem expedient; to provide a course of study, which may include all studies necessary for a first-grade certificate, and to make such rules and regulations as they may think necessary for the government and health of the scholars. (See also Organization, High school district trustees.)

Text-books.—District school boards and boards of trustees of high-school districts, and boards of education in cities of the first and second class, are hereby empowered and it is made their duty to purchase all text-books necessary for the schools of such district; and they are further authorized to enter into contract with the publishers of such books for a term of years, not to exceed five: *Provided,* That the contract prices of such books shall not exceed the lowest price then granted to any dealer, State, county, township, school district, or other individual or corporation in the United States, to be determined as hereinafter provided: *And provided further,* That such contract shall guarantee to such districts any further reduction that may be granted elsewhere during the life of such contract.

For the purpose of paying for school books the school-district officers may draw an order on the county or township treasurer for the amount of school books.

All books purchased by district boards shall be held as the property of the district, and loaned to pupils of the school while pursuing a course of study therein free of charge; but the district boards shall hold such pupils responsible for any damage to, loss of, or failure to return such books at the time and to the person that may be designated by the board of such district.

The provisions of this act shall include all school supplies: *Provided,* That nothing in this act shall be construed to prohibit any pupil or parent from purchasing from the board such books as may be necessary, at cost to the district: *Provided further,* That the board may designate some local dealer to handle books for the district, with such an increase above contract price to pay cost of transportation and handling as may be agreed upon between said board and said dealer.

Buildings.—The purchase, selection of site, erection of buildings, and sale thereof are in the hands of the district meeting. The district board has the general care of the school property and the director of its repair and its furnishing. The district shall not build a stone or brick house upon a site for which it does not hold a title in fee or a frame house upon unowned land unless under the provision that the house may be removed.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The governor, secretary of state, treasurer, attorney-general, and commissioner of public lands and buildings shall, under the direction of the legislature, constitute a board of commissioners for the sale, leasing, and general management of all lands and funds set apart for educational purposes and for the investment of school funds in such manner as may be prescribed by law. The following are hereby declared to be perpetual funds for common-school purposes, of which the annual interest or income only can be appropriated, to wit:

First. Such per cent as has been, or may hereafter be, granted by Congress on the sale of lands in this State.

Second. All moneys arising from the sale or leasing of sections No. 16 and 36 in each township in this State, and the land selected or that may be selected in lieu thereof.

Third. The proceeds of all lands that have been, or may hereafter be, granted to this State, where, by the terms and conditions of such grant, the same are not to be otherwise appropriated.

Fourth. The net proceeds of lands and other property and effects that may come to the State by escheat or forfeiture, or from unclaimed dividends, or distributive shares of the estates of deceased persons.

Fifth. All moneys, stocks, bonds, lands, and other property now belonging to the common-school fund.

All other grants, gifts, and devises that have been or may hereafter be made to this State, and not otherwise appropriated by the terms of the grant, gift, or devise, the interest arising from all the funds mentioned in the preceding section, together with all the rents of the unsold school lands, and such other means as the legislature may provide, shall be exclusively applied to the support and maintenance of common schools in each school district in the State.

All fines, penalties, and license moneys arising under the general laws of the State shall belong and be paid over to the counties respectively where the same may be levied or imposed, and all fines, penalties, and license moneys arising under the rules, by-laws, or ordinances of cities, villages, towns, precincts, or other municipal subdivisions less than a county shall belong and be paid over to the same respectively. All such fines, penalties, and license moneys shall be appropriated exclusively to the use and support of common schools in the respective subdivisions where the same may accrue.

Taxation.—For the purpose of affording the advantage of free education to all the youth of this State, the State common-school fund, in addition to the funds derived from the sale of school lands and interest thereon, and fines and forfeitures, as provided by statutes and the constitution, shall be further increased by annual levy and assessment of not to exceed 1½ mills upon the dollar valuation on the grand list of the taxable property of the State; and the amount so levied and assessed shall be collected in the same manner as other State taxes, and when collected, shall be semiannually distributed to the several counties of this State, in proportion to the enumeration of scholars, and be applied exclusively to the payment of teachers' wages.

The several county superintendents shall immediately, and within twenty days after receiving such apportionment, and after adding thereto all moneys received by the county treasurer on account of fines and licenses, apportion the entire amount as follows, to wit: One-fourth of the whole amount to be distributed equally to the several districts in the county, and the remaining three-fourths of the whole to be distributed to the several districts in his county pro rata, according to the enumeration of scholars last returned by the directors of the various districts, and no district, city, or village which shall have failed to sustain a school for the length of time required by law shall be entitled to receive any portion of the fund.

The legal voters at any annual meeting shall determine the number of mills on the dollar of assessed valuation which shall be levied for all purposes —except for the payment of bonded indebtedness and purchase or lease of schoolhouse—which number shall not exceed 25 mills in any one year, which shall be levied by the county board and collected as other county taxes are collected. The voters may also determine the number of mills, not exceeding 10, on the dollar of valuation, which shall be expended for the building, purchase, or lease of schoolhouse in said

district when there are no bonds voted for such purpose, which amount shall be reported, levied, and collected as above; but the aggregate number of mills voted shall not exceed 25 mills.

In "metropolitan cities" the board of education shall annually report to the city council an estimate of the amount of funds required for the support of the schools, for the purchase of school sites, the erection and furnishing of school buildings, the payment of interest upon all bonds issued for school purposes, and the creation of a sinking fund for the payment of such indebtedness; and the city council is hereby authorized and required to levy and collect said amount the same as other taxes: *Provided, however*, That in case the purchase of school sites and the erection of buildings shall require an expenditure exceeding $25,000 for any one calendar year, the question shall be submitted to a vote of the electors of the district, and that the aggregate school tax shall in no one year exceed 2 per cent upon all the taxable property of the district.

In cities of 1,500 and over the aggregate school tax shall in no one year exceed 2 per cent, and in cities of the first class having over 25,000 population the school tax shall not exceed 15 mills upon all the taxable property of the district; but the board of education may borrow money upon the bonds, which they are hereby authorized and empowered to issue, bearing a rate of interest not exceeding 6 per cent per annum, payable annually or semiannually at such place as may be mentioned upon the face of such bonds; which loan shall be paid and reimbursed in a period not exceeding thirty years from the date of said bonds: *Provided*, That no bonds shall be issued nor question of issue submitted to the electors without the consent of two-thirds of the members of the board of education, and be offered in open market and sold to the highest bidder for not less than par value on each dollar: *And provided further*, That no bond shall be issued by the board of education without first submitting the proposition of issuing said bonds at an election called for that purpose, or at any regular election, notice whereof shall be given for at least twenty days in one or more daily papers published within the district to the qualified voters of the district, and if a majority of the ballots cast at such an election shall be for issuing bonds, said board may issue bonds in such an amount as shall be named in their election notice: *Provided*, That in cities of the first class having over 25,000 inhabitants, if said question is submitted at a special election, it shall require to carry the same a two-thirds majority of the votes cast at said election.

KANSAS.

1. Organization of System.

State board of education.—State school fund commission.—State superintendent — County superintendent.—County high school trustees.—County board of examiners.—District board of directors.—City board of education.

State board of education.—See Teachers, Appointment, qualifications, and duties.

State school fund commissioners.—See Finances, Funds.

State superintendent of public instruction.—There shall be elected biennially a State superintendent of public instruction, who shall execute at the time of taking the oath of office a bond in the sum of $10,000, with two or more sureties, conditioned on his faithfully performing the duties of his office. The educational interests of the State shall be under his supervision and management, subject to such limitations as are prescribed by law. He may appoint an assistant superintendent of public instruction, who shall perform such duties, not inconsistent with law, as his principal may prescribe. He may also appoint a clerk, who shall also act as clerk of the board of commissioners for the management and investment of the school funds. The State superintendent shall distribute the income of the State school fund and the annual taxes collected by the State for the support of the common schools to the counties reporting to him in a proper manner. Upon a written statement of the facts he shall give an opinion on all questions regarding the rights, powers, and duties of school district boards, school officers, and county superintendents, advising with the attorney-general, if he deem it necessary. He shall publish the school laws not oftener than once in two years, and therewith such other forms, regulations, etc., as he may deem expedient. He shall prepare all forms and blanks necessary in the details of the common-school system, so as to secure its uniform operation, and cause them to be forwarded to the county superintendents. He shall visit the schools of each county at least once in two years, shall recommend the most approved text-books, and open such correspondence as may enable him to obtain all necessary information relating to the system of common schools in other States. He shall have an office at the capitol, where he shall

keep the records of his office and such school material or books as he may receive by virtue of his position. He shall make a report biennially, on the 1st day of December preceding each regular session of the legisature, to the governor in which he shall give (1) a statement of the number of common schools in the State, the number of scholars attending the same, their sex, and the branches taught; the number of normal schools in the State and the number of students attending them; the number of academies and colleges in the State and the number of students and their sex, and such other matters as he may deem expedient, drawn from the reports of the county superintendents or other local school officers; (2) a statement of the condition of the common school fund of the State for the support of common schools, and giving a full statement of the school land account of each county; (3) a statement of the receipts and expenditures for the year; (4) a statement of plans for the management and improvement of common schools, and such other information relating to the educational interests of the State as he may deem important.

County superintendent of public instruction.—A superintendent of public instruction shall be elected in each county biennially, who shall, when sworn in, give bond in the sum of $1,000, conditioned on the faithful discharge of his duties. It shall be his duty to visit each school in his county at least once during each half year, correcting any deficiency that may exist in the government of the school, the classification of the pupils, or the methods of instruction in the several branches taught, to make such suggestions in private to the teachers as he may deem proper and necessary to the welfare of the school; to note the character and condition of the schoolhouse, furniture, apparatus, and grounds, and report in writing to the district board, suggesting improvements; to examine the record books and accounts of district officers; to encourage the formation of teachers' associations and to attend their meetings; to attend the normal held in his county and inspect its daily work and assist therein; to hold a public meeting in each school district of his county at least once every year for the purpose of discussing school questions and elevating the standard of education; to keep his office open Saturday of each week, and when receiving more than $600 every day when not absent attending to his official duties; he shall keep and preserve a record of his official acts, of the teachers employed, and of candidates for employment in his county. He shall apportion the State school fund within five days, together with the unapportioned county school fund, among the school districts and parts of districts in the county, according to the population of school age, but no district in which a common school has not been taught at least three months the last preceding school year shall be entitled to receive any portion of either the State or county fund. He shall furnish the county clerk with a description of the boundary of each school district. He shall make out and transmit in writing to the State superintendent a report containing the following particulars: Number of school districts or parts of districts in each county, the number of children by sex resident in each county over 5 and under 21 years, the number of district schools in the county, the length of time school has been taught in each, the number of pupils attending the same by sex, the branches taught and the text-books used, the number of teachers employed in the same and their sex, the number of private or select schools in the county as far as ascertainable, and the number of teachers employed in the same, their sex, and the branches taught, the number of graded schools in the county, the duration of school, the attendance by sex, the branches taught, and the number and sex of the teachers employed in the same; the condition of the normal school, if any; the attendance by sex and the number and sex of the teachers employed in the same, and the same particulars for the normal institute; the amount of public money received in each district or parts of districts, and what portion of the same, if any, has been appropriated to the support of graded schools; the amount of money raised in each district by tax and paid for teachers' wages in addition to the public money paid therefor; the amount of money raised by tax or otherwise for the purpose of purchasing school sites, for building, hiring, purchasing, repairing, furnishing, or insuring such schoolhouse, or for any other purpose allowed by law, in the district or parts of districts. The annual compensation of the county superintendent shall be as follows:

In counties of 1,000 to 1,200 persons of school age, $600; 1,200 to 1,500, $700. In counties of more than 1,500 persons of school age he shall receive $700 and $20 for each additional 100. In counties having a school population of fewer than 1,000 the superintendent shall receive for every day actually and necessarily employed in the discharge of his duties the sum of $3 per diem, for a number of days not to exceed 150 in any one year. But no county superintendent shall receive more than $1,200, and in determining the salaries of county superintendents the school population of cities of the first and second class shall not be included. The county

superintendent shall fill vacancies occurring in the board of directors of any school district. In case of his death, resignation, or removal his successor shall be appointed by the board of county commissioners. He shall divide the county into a convenient number of school districts, which he shall be at liberty to change or abolish when public interest requires it. He shall purchase record books for district officers.

County high school trustees.—(See Schools, Character of instruction.)

County board of examiners.—(See Teachers, Appointment, qualifications, and duties.)

District board.—The county superintendent shall divide the county into a convenient number of school districts when the interests of the inhabitants require it, but no new school district shall be formed or shall continue to exist containing fewer than 15 persons of school age, and none having a bonded indebtedness shall be so reduced that such indebtedness shall exceed 5 per cent of its assessed property valuation. An annual meeting of each school district shall be held on the last Thursday of July of each year, at the schoolhouse belonging to the district, at 2 p. m. The powers of a district meeting shall be to choose a director, clerk, and treasurer, who shall have the qualifications of voters; to designate a site for a district schoolhouse; to vote a tax annually, not to exceed 2 per cent on the taxable property of the district, and distribute the amount between the payment of teachers and in purchasing or leasing a site; to determine the length of time a school shall be taught (but not fewer than three months), and whether the school money to which the district may be entitled shall be applied to the support of the summer or winter term or a certain portion to each.

The officers of each school district shall be a director, clerk, and treasurer, who shall constitute the district board; one member retiring annually after a term of three years. The director shall preside at all meetings and shall sign all orders drawn by the clerk for district money, and shall represent the district in all legal proceedings. The clerk, in addition to the usual perfunctory duties of his office, shall make a written report which he shall submit and read to the legal voters of the district at the annual meeting, which shall be forwarded to the county superintendent. The report shall contain the following matters: The number of children by sex, 5 to 21, the number attending school by sex and the branches studied, the length of time a school has been taught by a qualified teacher, the name of the teacher or teachers, with the length of service of each and the wages paid, the amount of money received from the county treasurer, arising from disbursement of the State annual school fund, from district taxes, and from all other sources during the year, and the manner in which the same has been expended, the amount raised by the district each year and the purposes for which it was raised, the kind of books used in the schools, and such other facts and statistics in regard to the district school as the county superintendent may require. Every school district clerk or treasurer who shall neglect or refuse to deliver to his successor in office all records, books, and papers belonging to his office shall be fined not more than $50. The district board shall purchase or lease such site for a schoolhouse as shall have been designated, shall have the care and keeping of the same and of the other school property belonging to the district, and shall have power to make such rules and regulations relating to the district library as they may deem proper, and to appoint some suitable person to act as librarian and to take charge of the school apparatus belonging to the district. The board shall contract with and hire qualified teachers for and in the name of the district, which contract shall be in writing and shall specify the wages per week or month, as agreed upon by the parties, and in conjunction with the county superintendent may dismiss for incompetency, cruelty, negligence, or immorality. They may suspend pupils for cause, but the suspended person may appeal to the county superintendent. The board shall either severally or jointly visit all the schools of their district at least once a term, making a thorough investigation into the character and results of instruction, and into the condition of the buildings and appliances, and shall make suggestions for the improvement of the same.

Boards of education of cities.—In all cities of more than 15,000 inhabitants and having not more than 4 wards there shall be a board of education consisting of 3 members from each ward, who shall be and remain residents of the wards from which they are elected during their term of office, to be elected by the qualified voters of the city at large for terms of three years, 1 to retire annually. In cities of 15,000 having more than 4 wards the board of education shall consist of 2 members from each ward, each to hold office for two years. In cities of 35,000 or more inhabitants the board of education shall consist of 6 members, 1 from each ward. The board shall make all necessary rules and regulations for the government of the schools, exercise sole control over the public schools and school prop-

erty, and shall have power to establish a high school, examine teachers, and appoint a superintendent.

All cities organized as cities of the second class and all cities attaining a population of from 2,000 to 15,000 shall maintain a system of free common schools. At each annual city election there shall be a board of education consisting of 2 members from each ward elected by the qualified voters thereof, each for a term of two years. The powers of the board of cities of the second class are in general those of cities of the first class.

Cities of 250 to 2,000, if not otherwise governed, shall be subject to the provisions laid down for cities of 2,000 to 15,000.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—The district board in each district shall contract with and hire qualified teachers, and shall in the written contract specify the wages per week or month as agreed upon by the parties. In incorporated cities of 250 and over no person shall be elected by the board as teacher who can not produce a certificate from the examining committee or the State board setting forth that the holder is competent to teach in a specified department of the public schools and is of good moral character. The county board shall publicly examine all persons proposing to teach in the common schools of the county as to their competency to teach the branches prescribed by law.

There shall be a State board of education, consisting of the State superintendent, the chancellor of the university, the president of the State agricultural college, the president of the State normal school, and 3 others, to be appointed with the concurrence of the senate, selected from among those engaged in school work in the schools of the State, who shall hold office for two years. The board is authorized to issue State diplomas to such professional teachers as may be found upon critical examination to possess the requisite scholarship and culture and produce satisfactory evidence of unexceptionable moral character, eminent professional experience and ability, and have taught for two years in the State. All such diplomas shall be countersigned by the State superintendent and are valid anywhere. The actual expenses of the members of the board and of holding such examinations as it may appoint shall be paid from the State treasury; but the sum total shall not exceed $300 per annum. Upon the application of any institution of higher education in Kansas, the State board shall examine its course of study, and if it appear to be as efficient as the four-years' courses of study in the State normal school the marking of such institution on academic subjects completed shall be adopted by the board as the standing of candidates coming before it on the subjects specified; but the candidate shall be examined upon the professional subjects of the normal school course, to wit: Philosophy of education, history of education, school laws, methods of teaching, school management, and upon other required subjects; and to those successfully filling all requirements a three-years' certificate shall be issued, and if, at the expiration of that time, the holder satisfies the board that he has taught successfully at least two years and has kept himself well informed in the general literature of his profession, a life certificate shall be granted. The State certificates of other States shall be recognized if testifying to a grade of scholarship equal to that required by the State board of Kansas. All life certificates are void if the holder shall not engage in school work for three consecutive years; but certificates may be renewed.

In each county there shall be a board of county examiners composed of the county superintendent, who shall be chairman of the board, and two competent persons, holders of first-grade or State certificates, or of diplomas from the State university, the State normal school, or the State agricultural college, who shall be appointed by the county commissioners on the nomination of the county superintendent, and shall serve for one year and receive $3 per diem for three days in any one quarter. The board shall, on the last Saturday of January, October, and April, and at the close of the county normal institute, only at such places as may be designated by the chairman, after ten days' notice, publicly examine all persons proposing to teach in the common schools of the county (cities excepted) as to their competency to teach the branches prescribed by law, and such board of examiners shall issue certificates to all applicants as shall pass the required examination and satisfy the board as to their good moral character and ability to teach and govern schools.

The State board shall prepare a series of questions for each examination, to be used in each county, which shall be printed and forwarded to the county superin-

tendents so as to reach them at least two days before the examination in each county, but shall not be opened except by the board on the day and hour of examinations. The board shall issue three grades of certificates, to wit: First grade, good for three years, certifies that the holder is proficient in and fully qualified to teach orthography, reading, writing, English grammar, composition, geography, arithmetic, United States history and Constitution, bookkeeping, physiology and hygiene, elements of natural philosophy, provided the person is 18 years of age and has taught successfully twelve school months, and has obtained an average of not less than 90 per cent and not less than 70 per cent in any one branch. A second-grade certificate may be issued to persons of not less than 17 years of age who have taught successfully no fewer than three school months and shall have satisfied the board as to their ability to teach all the branches prescribed for first-grade certificates except bookkeeping and the elements of natural philosophy, provided they make a general average of not less than 80 per cent and not less than 60 per cent in any one branch. The county superintendent, upon request made in writing by each district board, and after satisfying himself by examination of the ability and proficiency of an applicant, may grant a temporary certificate in case of necessity, valid only in the designated district and until the next regular examination by the county examiners; but no such certificate shall be granted to any applicant who has failed in examination at the last regular meeting of the board, nor shall it be granted twice to the same person. Though no certificate shall be of force except in the county where issued, nevertheless the county superintendent may indorse the unexpired certificates of first grade of any county on the payment of the usual fee of $1. As soon as any person has attended the normal school for twenty-two weeks and has been examined in the studies required by the board and has passed, that person shall receive a certificate, to be approved by the superintendent, and when the full course has been completed a full diploma shall be given, which shall serve as a legal certificate of qualification to teach in the common schools of the State.

In cities of the first and second class the board of education shall appoint three competent persons, one of whom shall be the city superintendent in second-class cities, to examine all persons who apply to them for teachers' positions except those holding State diplomas or certificates. Graduates of the county high-school normal course shall be entitled to a teacher's second-grade certificate.

Preliminary training.—The value of the diploma of the State normal school is given above.

Meetings.—The county superintendents shall hold annually in their respective counties, for a term of not less than four weeks, a normal institute for the instruction of teachers and those desiring to teach; but in sparsely settled portions of the State two or more counties may unite in holding one normal institute. The county superintendent shall determine the time and place of holding such normal institutes, and shall select a conductor and instructors for the same. But no person shall be paid from the institute funds for services as conductor or instructor of said institutes who has not received a certificate from the State board as to his special qualifications. To defray the expenses of the institute each candidate shall be required to pay $1 and $1 for registration. The county commissioners may appropriate money to further the support of the institute, but not to exceed $100. When 50 persons shall have registered as members of any normal institute and paid their registration fee, the State superintendent shall certify the fact to the auditor, who shall draw on the State treasurer for $50 in favor of the institute.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—The district schools shall be at all times equally free and accessible to all the children resident therein over 5 and under 21 years, subject to such regulations as the district board in each may prescribe, but if there be a good building for not fewer than four months. In each city of the second class there shall be maintained a system of free common schools which shall be kept open not fewer than three nor more than ten months in the year, and shall be free to all children residing in the city between the ages of 5 and 21 years; but the board may, where school accommodations are insufficient, exclude for the time being children between 5 and 7 years. In cities of the first class the board of education shall organize and maintain separate schools from three to nine months for the education of white and of colored children, except in the high school, where no discrimination shall be made on account of color. No pupil having a contagious disease shall be allowed to attend any common school.

Every parent, guardian, or other person having control of a child or children 8 to 14 years shall be required to send such child or children to a public or private school taught by a competent instructor for a period of at least twelve weeks, six weeks of which shall be consecutive, unless such child or children are excused from such attendance by the board of the school district or the board of education upon its being shown satisfactorily that the parent or guardian was unable to clothe the child properly, or that the child's mental or physical condition prevented attendance or application to study, or that the child is taught at home in such branches as are usually taught in the public schools, subject to the same examination as other pupils of the district or city in which the child resides, or has already acquired the ordinary branches required by law, or that there is no school taught within 2 miles by the nearest traveled road. It shall be the duty of any school director or president of the board of education to inquire into all cases of neglect of the foregoing provisions, and any director neglecting to prosecute for neglect to comply with such provisions after a written notice served on him by any taxpayer shall be fined not fewer than $20 nor more than $50, to be paid into the county treasury, unless the prosecution was malicious, when the costs shall be adjudged against the complainant.

Any parent, guardian, or other person failing to comply with the provisions of this act shall be deemed guilty of a misdemeanor, and fined not more than $5 nor more than $10 for the first offense nor fewer than $10 nor more than $20 for the second and every subsequent offense.

Character of instruction.—In each and every school district there shall be taught orthography, reading, writing, English grammar, geography, and arithmetic, and such other branches as may be determined by the district board, and the instruction in the several branches taught shall be in the English language. Each county having a population of 6,000 inhabitants or over, as shown by the last census, may establish a county high school for the purpose of affording better educational facilities for pupils more advanced than those attending district schools, and for persons who desire to fit themselves for the vocation of teaching, provided a majority of the voters of the county assent. The principal shall, with the approval of the high-school board of trustees, make such rules and regulations as he may deem proper in regard to the studies, conduct, and government of the pupils under his charge. City boards of education may establish high schools, if deemed necessary, and exact tuition fees for instruction given therein.

Text-books.—School districts may, at their annual meetings for the election of school officers, indicate by a majority their desire for county uniformity of text-books, which vote shall be transmitted to the county superintendent by the clerk of the district within ten days. If a majority of the districts in a county vote for uniformity in text-books, the county superintendent shall call for one delegate from each municipal township and city of the third class in the county, to be elected by the school board of each township. Any city of the first or second class may send the city superintendent and one person elected by the board. The delegates shall form the county text-book board, whose duty it shall be to select and prescribe the text-books to be used in each branch of study required by law to be taught in the public schools, and no change shall be made in any county having adopted uniformity of text-books during a period of five years. A county text-book board may be elected every five years.

It shall be the duty of the State superintendent to recommend the most approved text-books for the common schools of the State.

Buildings.—The district meeting shall have power to designate a site for a schoolhouse, which, when not included within the limits of a town or village, shall contain not less than 1 acre, and to build, hire, or purchase a schoolhouse and to keep it in repair and furnish the same with the necessary fuel and appendages, and to authorize the sale thereof. In cities the board of education exercises sole control over school property.

4. Finances.

Funds (permanent and special).—Taxation.

Funds (permanent and special).—The proceeds of all lands granted or to be granted by the United States for the support of schools, and the 500,000 acres of land granted to the new States under an act of Congress distributing the proceeds of public lands among the several States, approved September 4, 1841, and all estates of persons dying without will or heir, and such per cent as may be granted by Congress on the sale of lands in this State shall be the common property of the State, and shall be a perpetual school fund, which shall not be diminished, but

the interest of which, with all the rents of school lands and such other means as the legislature may provide, by tax or otherwise, shall be inviolably appropriated to the support of common schools.

The State superintendent, secretary of state, and attorney-general shall constitute a board of commissioners for the management and investment of the State permanent school, State normal school, and State university funds. The board shall invest moneys belonging to the permanent school fund, the State agricultural college, State normal, and State university funds in the bonds of the State of Kansas or of the United States, school-district bonds of the several school districts of the State, bridge bonds, court-house bonds, or in county, township, or city refunding bonds of the State, provided that the indebtedness of the locality issuing bonds shall not exceed 10 per cent of its assessed valuation.

The income of the State school funds shall be disbursed annually by order of the State superintendent to the several county treasurers and thence to the school districts in equitable proportion to the number of children 5 to 21 years, provided each school district has maintained a common school at least three months in each year.

All moneys paid by persons for exemption from military duty, the clear proceeds of estrays, and the proceeds of fines for any breach of the penal laws shall be exclusively applied in each county to the support of its common schools. Every insurance company doing business in the State shall, in addition to other charges, pay into the State treasury for the benefit of the annual school fund the sum of $50.

Taxation.—For the purpose of affording the advantages of a free education to the children of the State, the State annual school fund shall consist of the annual income derived from the interest and rents of the perpetual school fund and such sum as will be produced by the annual tax and assessment of 1 mill upon the dollar.

It is within the power of the school district to vote a tax annually, not exceeding 2 per cent, on the taxable property in the district for school purposes, which shall be distributed as the meeting shall deem proper in the payment of teachers' wages, to purchase or lease a site and to provide buildings and incidentals.

The board of (high-school) trustees shall estimate the amount needed for building purposes, for payment of teachers' wages, and building and contingent expenses, and the county commissioners shall levy a tax not to exceed 6 mills on the dollar for the purpose.

Cities of the first class (over 15,000 inhabitants) shall levy, for teachers' wages, repairs, incidental expenses, and maintenance of schools, not more than 8 mills on the dollar where the assessed value is greater than $3,000,000; but in cities of 40,000 or more, or having less than $3,000,000 of assessed value, the board of education may levy as high as 10 mills.

OKLAHOMA.

1. Organization of the System.

Territorial board of education.—Territorial superintendent.—County board of examiners.—County superintendent.—District school directors.—City boards of education.

Territorial board of education.—The Territorial superintendent, the principal of the Territorial normal school, and the president of the University of Oklahoma, superintendent of city schools, and one county superintendent to be appointed by the governor shall constitute the Territorial board of education. The board shall hold office for two years and shall have power to grant Territorial certificates and diplomas to teachers and certificates to conductors and instructors of normal institutes, shall prepare questions for county and city examinations, estimate the amount required to pay its expenses, to prepare such blanks as may be necessary to carry the provisions of this article into effect, and shall constitute an advisory board on all matters pertaining to the educational interests of the Territory. The members of the board shall receive no compensation for services, but shall be allowed all necessary expenses incurred in the discharge of their duties as members of the board.

Territorial superintendent.—The governor shall appoint, with the concurrence of the council, a Territorial superintendent of public instruction at $1,200 a year, who shall hold his office for the term of two years and shall be Territorial auditor. He shall have charge of the educational interests of the Territory, apportion the Territorial school fund and the annual taxes raised by the Territory for the support of public schools among the several counties, construe the school laws under

the advisement of the attorney-general, prepare and distribute the necessary blank books and forms, to visit each county at least once in every year, and in general to acquaint himself with the condition of school affairs. His seat shall be at the capital, where he shall preserve all the material of education that may come into his hands by gift, exchange, or purchase. His annual report shall contain a statement showing the number of public schools in the Territory, their attendance by sex, the branches taught, the number of private schools, the condition of the public-school funds and the school-land account for each county, the receipts and disbursements during the year, plans for the improvement of the public schools, and other important particulars.

County board of examiners.—In each county there shall be a board of county examiners composed of the county superintendent, who shall be chairman, and two competent persons, holders of first-grade certificates or of Territorial certificates or of diplomas from some State university, State normal school, or State agricultural college, who shall be appointed by the county commissioners on the nomination of the county superintendent, to serve at will, each to receive $3 a day for not more than three days in each quarter of the year. The board holds a session on the last Friday and Saturday of January, October, April, and at the close of the county normal institute, during which it shall examine applicants for teachers' positions and issue certificates to those qualified.

County superintendent.—A county superintendent shall be elected by the people every two years. It shall be his duty to visit each school in the county at least once during each term of six months, correcting errors in classification and methods, advising the teacher in private, noting the character and condition of the schoolhouse and its furniture and grounds, and advising with the district board in regard to the same; to see that the record is properly kept; to encourage the association of teachers and educators; to attend the normal institute and to connect himself with it; to hold a public meeting in each district of his county, and to inspect it and connect himself with its sessions; to hold a public meeting in each school district of his county at least once every year for the purpose of discussing school questions and elevating the standard of education; to keep his office at the county seat open on Saturday, and if receiving a salary of $600 or more to keep it open when not called elsewhere by necessary official business; to keep a record of his official acts; of the address, age, and qualifications of each candidate for a teacher's certificate; of each teacher, the salary paid, the grade, and time of opening and closing school; and shall keep a record of all receipts and disbursements. He shall make out quarterly a statement concerning the nature of his official visits; and until he shall have done so he shall not be paid. In addition he shall make an annual report concerning the number of school districts or parts thereof in his county; the number and sex of children 6 to 21 years of age; the number attending school, by sex; the branches taught and text-books used, and the teachers (by sex) employed; the number of graded, academic, collegiate, and other schools, public or private, and their attendance; the amount of money received in each district from taxation or otherwise; the amount paid for teachers' wages and school sites, buildings, or furniture. He shall lay out the school districts and shall change them as occasion may require. He shall receive in counties containing 1,000 to 1,200 persons, 6 to 21, $400 per annum; in counties having a school population of 1,200 to 1,500 he shall receive $500, and in counties of more than 1,500 he shall receive $500, and $20 for each additional 100 persons of school age; but in counties having fewer than 1,000 persons of school age the county superintendent shall receive $3 for each day actually and necessarily employed in the discharge of the duties of his office for a number of days not to exceed 100 in any one year. No superintendent, however, shall receive more than $1,000 per annum, and in determining their salaries the population of school age in cities of the first and second class shall not be included. Vacancies are filled by the county commissioners, and in case a superintendent is absent or temporarily incapable of performing the duties of his office, he shall employ a deputy who shall have the qualifications of a principal.

District school directors.—Each county shall be divided into school districts by the county superintendent, no district to contain fewer than 8 children of school age nor more than 9 square miles. The officers of each school district shall be a director, clerk, and treasurer, who shall constitute the district board, and be elected for three years, one to retire annually, vacancies to be filled by the county superintendent. The board shall purchase or lease the property designated by the voters as appropriate for a schoolhouse, and shall care for it and its appurtenances, and may appoint a custodian of the apparatus, maps, etc., and allow its use by societies. The board shall contract, in writing, with qualified persons to teach the schools; shall keep an accurate account of all expenditures for the necessary

appendages for the schoolhouses; shall visit the schools, inspect their scholastic and material condition, and confer with the teachers in regard to the same. The board shall cause the school-district clerk to certify to the county clerk the aggregate percentage by it levied on the real and personal property in each district, as returned on the assessment roll.

The director shall preside at the district meeting, sign all orders drawn by the clerk, and represent the district in suits. The clerk shall record the proceedings, keep the records, draw orders, make a written report to the district showing the number of children, by sex and color, 6 to 21 years, the attendance, the branches studied, the duration of school, the name of the teacher, the length of service and wages, the amount of money received from each source and the manner in which it was expended, the amount raised by taxation and the purpose for which raised, the number of taxpayers, the kind of text-books used, and such other facts as may be required of him by the county superintendent. The clerk falsifying the facts shall be deemed guilty of felony, punishable by imprisonment for not less than one year nor more than three years. Any member of the district school board who shall violate any of the duties incumbent upon him as such, shall be deemed guilty of a misdemeanor, and be subject to a fine of not less than $100 nor more than $500, or imprisonment in the county jail not fewer than six months, or both.

City boards of education.—Each city of the first class shall constitute a separate school district, which shall be governed by a board of education consisting of one member from each ward, who shall serve two years, vacancies being filled by the board, no member of the council being eligible. The board shall appoint its own officers, except its treasurer, who shall prepare and submit in writing a monthly report of the state of the finances of the district and shall, when required, exhibit all books and papers pertaining to his office. The superintendent that the board may appoint shall not be a member of it. His duty shall be to have a general supervision of the schools of the city, and with two competent persons appointed by the board, shall form the examining committee of the board of education. The superintendent holds office at the will of the board. The board shall annually make a report of the condition of all schools under its charge and provide for an enumeration of children.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—The district board shall hire qualified teachers. The board of county examiners, upon ten days' notice to those interested, shall publicly examine all persons proposing to teach in the public schools of the county as to their competency to teach the branches prescribed by law, and such board of examiners shall issue certificates to those who pass the required examination and satisfy the board as to their good moral character and ability to teach and govern schools successfully. The certificates shall be of three grades and shall continue in force, respectively, for a first-grade certificate, three years; for a second grade, two years; for a third grade, one year. Certificates of the first grade shall certify that the person to whom issued is proficient in and fully qualified to teach orthography, reading, writing, English grammar, composition, geography, arithmetic, United States history, bookkeeping, physiology and hygiene, civil government, the theory and practice of teaching, elements of natural philosophy, and shall not be issued to persons under 18 years of age or to such as have not taught successfully three school months, nor to a candidate who has not made a general average of at least 90 per cent and of 70 per cent in any branch. Certificates of the second grade may be issued to persons not less than 16 years of age and who shall fully satisfy the board as to their ability to teach all the branches prescribed for first-grade certificates and the elements of natural philosophy, provided that a person who receives a second-grade certificate shall have made a general average of not less than 80 per cent, nor less than 60 per cent in any one branch. Certificates of the third grade shall certify that the person to whom issued is proficient in and fully qualified to teach orthography, reading, spelling, writing, English grammar, composition, geography, arithmetic, and has made a general average of not less than 70 per cent, nor less than 50 per cent in any branch, nor shall any person be granted a third time a certificate of third grade. No certificate shall have force except in the county in which issued; provided that the county superintendent may indorse unexpired first-grade certificates issued in other counties on payment of the fee of $1, limited to their original term of validity. All certificates are revocable for cause by the board of examiners. But the county superintendent on request made to him in writing by any district board, and after

satisfying himself by examination of the ability and proficiency of an applicant, may grant a temporary certificate in case of necessity, valid only in a designated district, and then only until the next regular examination by the county board of examiners, provided that the person has not failed to pass a board examination. Such a certificate shall not be granted twice to the same person. County boards and superintendents who violate the provisions regarding the granting of certificates commit a misdemeanor, with penalty of $100 to $500.

Meetings.—County superintendents of public instruction shall hold annually in their respective counties, for a term of not less than two weeks, a normal institute for the instruction of teachers and those desiring to teach, provided that two or more counties may be united in holding one normal institute. The county superintendent, with the consent of the Territorial superintendent, shall determine the time and place of holding such normal institute, and shall select a conductor and instructors authorized by the Territorial board of examiners as qualified. Each candidate shall be required to pay a fee of $1 for registration and $1 for a certificate, which shall be the normal-institute fund, and shall be expended under the direction of the county superintendent.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—Colored children shall be taught in separate schools if the voters in each county shall so determine. In all districts in which there is a good school building schools shall be maintained for not fewer than three months, between the 1st day of October and the 1st day of June, and whenever there is not sufficient money belonging to any school district to support a public school for three months or for the period determined upon by the district, a tuition fee may be assessed upon each scholar, according to attendance; provided that no tuition shall be levied upon the pupils of any district unless the entire amount of 2 per cent for teachers' wages shall be assessed upon the taxable property of the district.

Character of instruction.—In each school district shall be taught orthography, reading, writing, English grammar, geography, and arithmetic, and such other branches as may be determined by the district board; provided that all instruction shall be given in the English language.

Text-books.—School districts may at their annual election of school officers indicate by a majority of all the votes cast at such meeting their desire for county uniformity of text-books, and when a majority of all the districts shall vote for uniformity the county superintendent shall notify the districts of such vote and at the same time call for one delegate from each municipal township or incorporated city in the county, and these, when elected, shall constitute the county text-book board, whose duty it shall be to select and prescribe the text-books to be used in each branch of study required to be taught in the public schools. No text-book shall be prescribed unless its publishers shall have first filed with the county superintendent a guaranty of its price, quality, and permanence of supply for five years, together with a good and sufficient bond. The county superintendent shall be ex officio chairman of such county text-book board and shall furnish each school district with a list of the text-books selected.

A county text-book board may be elected once in every five years in each county, having the powers and duties as above set forth, and no change shall be made in any series of text-books for five years after its adoption.

Buildings.—The inhabitants qualified to vote at a school meeting have power to select a site for the schoolhouse which shall not be more than one-half a mile from the center of the district nor, when not included in the limits of a town or village, contain less than 1 acre, to build, hire, or purchase a schoolhouse, to keep it in repair and furnish it, or, when of no further use, to sell it. School districts having schoolhouses the value of which is not less than $500 can only change to another site by a vote of at least three-fifths of the legal voters of the district. For the purpose of erecting or purchasing one or more school buildings the board of directors of the district shall have the power to issue the bonds of the district in the amount not to exceed 5 per cent of its taxable property. In cities of the first class the board of education has the power to issue bonds for the purchase or erection of school buildings.

Every person who shall willfully injure or deface or destroy any building used as a schoolhouse or for other educational purposes, or its appurtenances, shall be fined not fewer than $10 nor more than $50 in addition to the punishment provided by the statute regulating crimes.

4. Finances.

The inhabitants qualified to vote at a school meeting shall have power to vote a tax annually not to exceed 1 per cent on all the taxable property in the district as the meeting shall deem sufficient for the various school purposes, and distribute the amount as the meeting shall deem proper in the payment of teachers' wages and to purchase or lease a site.

(No information is at hand as to the fund to be distributed as Territorial and county fund.)

MONTANA.

1. Organization of the System.

State board of education.—State superintendent of public instruction.—County superintendent of schools.—District board of trustees—Truant officer.

State board of education.—The State board of education shall consist of 11 members, including the governor, State superintendent, and attorney-general, the others being appointed by the governor, with the consent of the senate, for terms of four years, 2 to retire annually. The board shall have the general control and supervision of the State institutions, shall recommend to the legislature a uniform system of text-books to be used in the public schools below the high school, shall grant State diplomas valid for six years and life diplomas, shall make an annual report of its proceedings, shall appoint experienced teachers to act as instructors in county institutes. The members of the board shall receive no compensation, but shall be allowed their actual traveling expenses in attending the meetings of the board.

State superintendent of public instruction.—There shall be chosen by the qualified electors of the State a superintendent of public instruction, who shall have attained the age of 30 years at the time of his election, shall have been a resident for the two years immediately preceding his election, and shall hold a State certificate of the highest grade issued in some State or be a graduate of some reputable university, college, or normal school. He shall be elected for four years and have his office at the seat of government, and shall give a bond in the penal sum of $10,000 with not fewer than two securities. He shall preserve the matters accumulated by virtue of his office and turn them over to his successor. He shall have the general supervision of the public schools of the State, shall prepare, print, and distribute the necessary blank books and forms, shall prepare and furnish county superintendents lists of publications approved by him as suitable for school libraries and prescribe rules for the same, shall prepare all questions to be used in the examination of applicants for teachers' county certificates and prescribe the rules for conducting such examinations, shall prepare and prescribe a course of study for all the public schools of the State, shall prescribe rules for holding teachers' institutes, shall counsel with the county superintendents and when requested shall give opinions concerning the school laws and decide all appeals from them, shall once in four years at most print the school laws with annotations, shall attend and assist at county institutes, and shall make a biennial report to the legislature through the governor, which shall contain the number of districts, schools, teachers, pupils, the attendance, and the studies; the financial particulars, value of schoolhouses, cost of tuition, and wages of teachers; the educational and financial condition of the State institutions connected with the public-school system, and, as far as ascertainable, of private schools, academies, and colleges of the State; finally, general matters, information, and recommendations, etc.

Fifteen hundred copies of the report of the State superintendent shall be printed. He shall apportion the State school fund among the several counties in proportion to the number of children of school age in each.

He may appoint a clerk at an annual salary of $1,500, and shall himself receive $2,500 and not more than $500 for traveling expenses.

County superintendent of schools.—A county superintendent of schools shall be elected in each organized county for a term of two years and give bond in an amount fixed by the county commissioners.

No one is eligible unless he has a certificate of the highest county grade, has resided one year in the State next preceding his election and one year in the county, and has had twelve months' successful experience in teaching in the State public schools. He shall have the general supervision of the public schools of the county and shall carry out the instructions of the State superintendent. He shall

visit every school, advising the teacher and noting in writing his judgment of her efficiency, shall decide all questions arising under the school law, shall apportion school moneys to the school districts, shall preside over teachers' institutes, and shall select suitable persons as instructors from the list commissioned by the State board. He shall have power to issue temporary certificates, shall make an annual report to the State superintendent containing such matters as that officer may require, under penalty of the loss of a month's salary. He shall see that the district boundaries are plainly marked, shall provide himself with an office at public expense, and shall be allowed postage and stationery. He shall not engage in teaching during his term of office.

District board of trustees.—The term "school district" is declared to mean the territory under the jurisdiction of a single board designated as "board of trustees." For the purpose of organizing a new district, a petition in writing shall be made to the county superintendent, signed by the parents or guardians of at least 10 census children residing within the boundaries of the proposed new district, but the boundaries of any district shall not be changed, except in forming new districts, unless a majority of heads of families resident therein present a petition to the county superintendent.

An annual meeting for the election of 3 school trustees or trustee shall be held, except in incorporated cities in districts containing a population of 500. The trustees hold for three years. In districts, cities, or towns having a population of from 500 to 1,000, the number of trustees shall be 5; in cities or towns of 1,000 and over the number shall be 7.

The board of trustees shall meet at least 4 times annually. The board shall employ teachers and other employees, fix and pay their wages, fix the charge for the tuition of nonresident students, and fix the compensation of the clerk for time spent in the service of the district, enforce the rules of the State superintendent, provide school furniture and other essentials of the schoolhouse, rent, repair, and insure, build, or remove them; hold in trust for the district all property, expel or suspend pupils, provide books for indigent children, make an annual report to the county superintendent, report directly to State superintendent when required, determine what branches, if any, shall be added to those required by law, subject to the approval of the county superintendent; visit every school in their district at least once in each term. The board has custody of all school property, and shall provide each schoolhouse with an American flag 4 by 6 feet at least, of durable material, and the necessary apparatus for flying it. The board may issue bonds and sell them to meet maturing bonds.

The district clerk shall make annually a census of the persons 6 to 21 years of age, by sex, together with the names of their parents or guardians. He shall take separately a census of children under 6, by sex. He shall be paid 10 cents for each child's name obtained, and he shall receive such other compensation for other services as may be allowed by the board of trustees. If, through the failure of the clerk to take the census, the district lose its share of the annual apportionment of school money, he shall be individually liable for the amount.

In districts having a population of 5,000 and upward, the board of trustees of such district may appoint a superintendent of schools, to hold at the pleasure of the board. The person so appointed shall hold a State certificate of the highest grade issued in some State or be the graduate of some reputable university, college, or normal school, and shall have taught at least five years. He shall perform the duties prescribed by the board, and he shall not engage in any work that will conflict with his duties as superintendent.

Truant officer.—See under Schools, Attendance.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No person shall be counted a qualified teacher who has not obtained a certificate from the county superintendent, or State certificate or life diploma from the State board of education, or a special certificate to teach either music, drawing, modern languages, or penmanship only.

The State board of education shall issue State diplomas to such persons as have a good moral character and who have held for one year and still hold in full force and effect a first grade county certificate, with the addition of English literature and mental philosophy, and who shall furnish satisfactory evidence of having been successfully engaged in teaching for at least five years. The term "five years" shall be construed to mean for five years of not less than seven months each; that is, the applicant must have taught a part of each year for five years—not necessarily

consecutive years—and in all thirty-five months, of which at least twenty-one months must have been in the public schools of Montana, provided that the State board of education shall have power to add such other studies to those enumerated in this paragraph as they may deem necessary.

Life diplomas may be issued upon all and the same conditions as State diplomas, except that the applicant must pass a satisfactory examination upon the rudiments of botany, geology, political economy, zoology, and general history, and must furnish satisfactory evidence of having been successfully engaged in teaching for at least ten years. "Ten years" shall be construed to mean ten years of not less than seven months each; that is, the applicant must have taught some part of each year for ten years—not necessarily consecutive years—and in all seventy months, of which at least twenty-one months must have been in the public schools of Montana.

A State or life diploma may be granted to any graduate of the State normal school of Montana or of the State University of Montana when the said graduate furnishes satisfactory evidence of having successfully taught, after graduation, a public school in this State for sixteen school months. State or life diplomas may be granted to graduates of other educational institutions, within or without the State, upon conditions established by the State board of education.

The county superintendent shall hold public examinations of all persons over 18 years offering themselves as candidates for teachers of common schools at the county seat on the third Fridays in February, April, August, and November of each year by a series of written or printed questions, according to the rules prescribed by the State superintendent. If from the percentage of correct answers required by the rules and from other evidences disclosed by the examination, including particularly the superintendent's knowledge and information of the candidate's successful experience, the applicant is found to be a person of good moral character, to possess a knowledge and understanding, together with an aptness to teach and govern, which shall enable such applicant to teach in the common schools of the State, the county superintendent shall grant such applicant a certificate of qualification.

Certificates shall be of three regular grades, the first of which shall be good for three years, the second for two years, and the third grade (only issued once to the same person) for a term of one year, according to the percentage of correct answers and other qualifications appearing from the examination. No certificate shall be granted unless the applicant shall be found proficient in and qualified to teach reading, penmanship, orthography, written arithmetic, mental arithmetic, geography, English grammar, physiology and hygiene, United States history, and theory and practice of teaching. In addition to the above, applicants for a second-grade certificate shall pass a satisfactory examination in civics of the United States and of Montana, physical geography, and elementary algebra. The examination for a first-grade certificate shall include all of the forementioned branches and also American literature, natural philosophy, and plane geometry, and the applicant must have taught twelve months acceptably. In addition to the 3 regular certificates the county superintendent may issue a temporary certificate to teach until the next regular examination to any person applying at any other time than that during which the regular examination is held under regulations fixed by the State superintendent, but such certificate may be issued but once to the same person. Any person thinking himself unjustly treated may have his papers reexamined by the State superintendent on paying a fee of $2.

To validate the first-grade certificate for any county in the State other than that for which it has been granted it must be registered by the superintendent of the county in which the possessor wishes to teach. Every applicant shall pay $1 for the benefit of teachers' institute in the county. The questions forwarded by the State superintendent shall not be opened until the day of examination.

Every teacher shall make an annual report to the county superintendent, a copy of which shall be delivered to the district clerk. The teacher shall also make such other reports as may be lawfully required, and no warrant shall be drawn for a teacher's salary until all reports have been furnished, but in districts having superintendents the reports shall be made to him. The teacher shall also keep a register in a proper manner or forfeit her last month's salary, as also enforce the course of study and obedience on the part of pupils, but any teacher who shall maltreat or abuse any pupil shall be fined not to exceed $100.

Preliminary training.—The object of the State normal school shall be the instruction and training of teachers for the common schools of the State, the control of which shall be vested in the State board, which shall elect all teachers and employees.

Meetings.—The county superintendent in every county in which there are five or more school districts must hold one teachesr' institute in each year, and every

teacher employed in the county must attend the institute on penalty of losing pay if teaching, or if not teaching of having certificate revoked. As to other counties the county superintendent shall confer with the State superintendent. The session of the institute shall last five to ten days. Funds for the institute shall be derived from the following sources: All moneys received from the issuance of teachers' certificates by the county superintendents, the appropriations from counties of the first class of $100, of the second class of $75, of the third class of $50. The State board shall appoint experienced teachers to act as instructors in county institutes.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—Every common school not otherwise provided for by law shall be open to the admission of all children 6 to 21 for at least three months in each year for six hours a day, exclusive of noon recess, but any board may reduce the time, provided it be not less than four hours for the primary schools, and any teacher may dismiss pupils under 8 after four hours of instruction.

Every parent, guardian, or other person in the State of Montana having control of any child or children between the ages of 8 and 14 years shall be required to send such child or children to a public school, or private school taught by a competent instructor, for a period of at least twelve weeks in each year, six weeks of which time shall be consecutive: *Provided*, That such parent, guardian, or other person having control of such child or children shall be excused from such duty by the school board of the district whenever it shall be shown to their satisfaction, subject to appeal as provided by law, that one of the following reasons exists therefor, to wit:

First. That such child is taught at home by a competent instructor in such branches as are usually taught in the public schools.

Second. That such child has already acquired the branches of learning taught in the public schools.

Third. That such parent, guardian, or other person is not able, by reason of poverty, to properly clothe such child.

Fourth. That such child is in such a physical or mental condition (as declared by a competent physician, if required by the board) to render such attendance inexpedient or impracticable.

Fifth. That there is no school taught the requisite length of time within 2½ miles of the residence of such child by the nearest traveled road: *Provided*, That no child shall be refused admission to any public school on account of race or color.

Any parent, guardian, or other person failing to comply with these provisions shall, upon conviction, be deemed guilty of a misdemeanor and fined in a sum not less than $5 nor more than $25 for each offense. Said action shall be prosecuted in the name of the State of Montana, before any court of competent jurisdiction, and all fines so collected shall be paid into the county treasury and placed to the credit of the school fund of the district in which the offense occurs.

It shall be the duty of the district clerk of each school district, not later than twenty days after the commencement of each school term, to furnish the board of trustees with a list of names of all children between 8 and 14 years of age in attendance at school; and any district clerk failing to furnish such lists within the time specified herein shall be guilty of a misdemeanor and be liable to a fine of not less than $5 nor more than $25 for each offense; and such fine, when collected, shall be paid into the county treasury and placed to the credit of the school fund of the district in which the offense occurs.

It shall be the duty of the school trustees of the district to inquire into all cases of neglect of the duty prescribed in this title and ascertain from the person neglecting the reason, if any, therefor, and they shall forthwith proceed to secure the prosecution of any offense occurring under this title; and any trustee neglecting to secure such prosecution for such offense within ten days after receiving the lists mentioned above, unless the person so complained of shall be excused by the board of trustees for the reason hereinbefore stated, shall be deemed guilty of a misdemeanor and liable to a fine in the sum not less than $10 nor more than $50: and such fine, when collected, shall be paid into the county treasury and placed to the credit of the school fund of the district in which the offense occurs.

In every school district having a population of 2,000 or more the board of trustees may appoint one person, who shall be designated as "truant officer," whose duty it shall be, acting discreetly, to apprehend on view all children between 8 and 14 years of age who are residents of the said district who habitually

frequent or loiter about public places and have no lawful occupation, and place such children when so apprehended in the public school. And such officer shall report all cases of truancy to his respective board of trustees immediately. Upon the receipt of such information from such "truant officer" any member of the board of school trustees shall forthwith proceed to prosecute the person so offending as prescribed. Such officer shall be entitled to such compensation as shall be fixed by the board appointing him, which shall be paid out of the school fund.

If, upon the trial of any offense as charged, it shall be made to appear to the satisfaction of the court or judge trying the same that such prosecution was malicious, then the costs in such case shall be adjudged against the complainant or person instituting such proceedings and collected as fines in other cases.

Character of instruction.—All common schools shall be taught in the English language and instruction shall be given in the following branches: Reading, penmanship, orthography, written arithmetic, mental arithmetic, geography, English grammar, physiology, and hygiene—with special reference to the effect of alcoholic stimulants and narcotics on the human system—history of the United States, civics of the United States and of Montana. Attention must be given during the entire course to the cultivation of manners, to the laws of health, physical exercise, ventilation, and the temperature of the school room. Whenever the interests of the district require it the board of trustees may establish a high school, employ a principal and other teachers, and grade the school; and the board may also determine what branches, in addition to those required by law, shall be taught in the public schools, subject, however, to the approval of the county superintendent.

Text-books.—The State board of education shall recommend to the legislature a uniform system of text-books to be used in the public schools of the State below the high schools.

Buildings.—The board of trustees shall have custody of all the district school property. Any pupil who shall in any way cut, deface, or otherwise injure any schoolhouse, furniture, fence, or outbuilding, or any book belonging to other pupils or to the district library shall be liable to suspension and punishment, and his parent or guardian for damage done. Any person willfully disturbing any public school or public-school meeting shall be fined from $10 to $100. The national flag must be displayed on or near each schoolhouse.

4. Finances.

The principal of the State school fund shall remain irreducible and permanent. The said fund shall be derived from the following sources, to wit: Appropriations and donations by the State to this fund; donations and bequests by individuals to the State or common schools; the proceeds of land and other property which revert to the State by escheat and forfeiture; the proceeds of all property granted to the State when the purpose of the grant is not specified or is uncertain; funds accumulated in the treasury of the State for the disbursement of which provision has not been made by law; the proceeds of the sale of timber, stone, materials, or other property from school lands other than those granted for specific purposes, and all moneys other than rental recovered from persons trespassing on said lands: 5 per cent of the proceeds of the sale of public lands lying within the State which shall be sold by the United States subsequent to the admission of the State into the Union as approved by section 15 of the enabling act; the principal of all funds arising from the sale of lands and other property which have been and may hereafter be granted to the State for the support of common schools. The board of trustees, at any time when in their judgment it is advisable, may submit to the qualified electors of the district the question whether a tax, not to exceed 10 mills on each dollar on the taxable property in the district, shall be raised to purchase lots and to furnish additional school facilities for said district, or to maintain any school or schools in such district, or for building one or more schoolhouses, or for removing or building additions to one already built, for the purchase of globes, maps, charts, books of reference, and other appliances or apparatus for teaching, or for any or all of these purposes. Such election shall be called by posting notices in three public places in the district for at least fifteen days before the election, and conducted as nearly as practicable according to the provisions herein made for holding annual school elections. The notice shall contain the time and place of holding the election, the amount of money proposed to be raised, and the purpose or purposes for which it is intended to be used.

All moneys arising from the sale of town lots in virtue of the several acts of the legislature shall be paid into the county treasury for the benefit of the common schools of the school district in which such city or town is situated.

The State superintendent shall annually apportion the State school fund among the several counties of the State in proportion to the number of children of school age, and it shall be the duty of the State board of land commissioners to notify the State auditor of the amount. The county superintendent shall apportion all school moneys to the district quarterly.

No school district shall be entitled to receive any apportionment of school money which shall not have maintained a free school for at least three months during the next preceding school year, and every school district using text-books other than those prescribed by the State legislature (except for supplementary purposes) shall forfeit 25 per cent of their school fund for that year, and the county superintendent shall deduct that amount from the apportionment to be made to any district.

The board of trustees of any school district may, when authorized by a majority of the voters, submit to the electors the question of issuing bonds at a rate of interest not greater than 6 per cent per annum, but in no case shall the whole issue of bonds exceed 3 per cent of the taxable property within the district, but not to exceed in gross $250,000.

WYOMING.

1. Organization of the System.

State superintendent of public instruction.—County superintendent of schools.—District board of directors.

State superintendent of public instruction.—There shall be elected quadrenially a State superintendent of public instruction, who must have attained the age of 25, be a citizen of the United States, and have the qualifications of State electors.

The duties of superintendent shall be as follows: He shall file all papers, reports, and public documents transmitted to him by the school officers of the several counties each year separately, and hold the same in readiness to be exhibited to the governor, or to any committees of either house of the legislative assembly; and shall keep a fair record of all matter pertaining to the business of his office. He shall have a general supervision of all the district schools of the State, and shall see that the school system is, as early as practicable, put in uniform operation. He shall prepare and have printed suitable forms for all reports required by this law, and shall transmit the same, with such instructions in reference to the course of studies as he may judge advisable, to the several officers intrusted with their management and care. He shall make all further rules and regulations that may be necessary to carry the law into full effect according to its spirit and intent, which shall have the same force and effect as though contained herein. He shall make a report to the legislative assembly on the first day of each regular session thereof, exhibiting the condition of the public schools, and such other matters relating to the affairs of his office as he may think proper to communicate. He may grant teachers' certificates and regulate the grade of county certificates. One copy of all books, maps, or specimens of apparatus, etc., when received by the State superintendent shall be placed in the public library of the State.

County superintendent of schools.—The duties of the county superintendent of schools are to annually transmit to the State superintendent a report containing an abstract of the several particulars set forth in the reports of the district clerks, together with a statement of the financial affairs of his office and such suggestions as he may think proper relative to the schools of his county. He shall distribute to the districts within his county such blank forms, circulars, and other communications as may be transmitted to him for that purpose by the superintendent of public instruction. He shall annually apportion the county school tax and all money in the county treasury belonging to the county school fund in the following manner: Each school district in his county shall be apportioned the sum of $150 for the payment of teachers in such district, and all moneys remaining after such apportionment shall be apportioned to each district pro rata, according to the number of pupils in attendance in the schools of said district reported to him by the several district clerks; but no district shall be entitled to the amount of $150 for the payment of teachers besides the pro rata apportionment as provided in this section when there are less than 8 scholars of school age in said district; and he shall record a statement thereof in his office, and he shall also notify the county treasurer of such apportionment. He may also make a supplementary apportionment of the money in the county school fund at any time after the first Monday in December prior to the 1st of the following June, and such supplementary apportionment shall be pro rata, according to the number of pupils in attendance in any and all schools in each district as reported to him by the several district clerks in their last annual reports. He shall divide the settled parts of the county

into school districts, and may alter and change the boundaries of districts thus formed from time to time, as the convenience of the inhabitants of the aforesaid districts may require, and shall proceed to make such change at any time when petitioned by two-thirds of the legal voters of any district. He shall examine every person offering himself or herself as teacher of public schools, and shall grant certificates. He shall have the general superintendence of the schools in his county, and shall visit each school at least once each term, and shall have power to dismiss all teachers he may find to be incompetent. Should the county superintendent fail to report, he shall forfeit $100 and shall be sued on his bond for the collection of the same with damages.

District board of directors.—The county superintendent shall divide the settled parts of the county into school districts, but a majority of the voters may appeal to the State superintendent if dissatisfied. The electors of the district shall elect by ballot three trustees, who shall form a board of directors, one of whom shall be chosen annually for a term of three years. One trustee shall be chosen as director, another treasurer, and the third clerk of the district. But in all districts containing a population of 2,000 or more there shall be a board of six directors, two of whom shall retire annually after serving three years.

The district meeting shall have power to determine the number of schools which shall be established in the district, and the length of time each shall be taught; to fix the site of each schoolhouse, taking into consideration in doing so the wants and necessities of the people of each portion of the district; to vote such sum of money as the meeting shall deem sufficient for any of the following purposes—to supply any deficiency in the fund for the payment of teachers; to purchase or lease a suitable site for a schoolhouse or schoolhouses; to build, rent, or purchase a schoolhouse or schoolhouses; and keep in repair and furnish the same with the necessary fuel and appendages; for procuring libraries for the schools, books and stationery for the use of the board and district meetings; for purchasing books for indigent scholars and to defray all other contingent expenses of the district: *Provided*, That the sum of money so voted shall not exceed 10 mills on the dollar of all taxable property in each school district: *Provided further*, That the tax to be levied and collected as authorized by this section shall not exceed 5 mills on the dollar of the assessed valuation of the taxable property in any one year in all school districts having a total valuation of property exceeding $3,000,000 or a valuation thereof of less than $200,000; to direct the sale or other disposition to be made of any schoolhouse or the site thereof, and of such other property, real or personal, as may belong to the district, and to direct the manner in which the proceeds arising therefrom shall be applied; to vote a sum not exceeding $100 in any one year to procure a district library, consisting of such books as they may direct any person to procure; to delegate any and all powers specified in the foregoing subdivisions to the district board; to transact generally such business as may tend to promote the cause of education.

The district board of directors shall make all contracts, purchases, payments, and sales necessary to carry out every vote of the district for procuring any site for a schoolhouse, renting, repairing, or furnishing the same and disposing thereof, or for keeping a school therein and performing such other duties as may be delegated to them by the district meeting. Vacancies occurring three months before an election must be filled by a special election, otherwise by the board. The director shall preside at the meetings of the board and countersign all orders for the payment of money, and shall appear for the district in court. The district clerk shall, in addition to other duties, submit a report to the county superintendent containing: First, the number of schools taught in such district, the number of days each scholar attended the same, and the aggregate number of days of attendance of said school, respectively, as certified by the teachers of the several schools of such district. Second, the number of schools and the branches taught in each. Third, the number of pupils in each school and of each sex. Fourth, the number of teachers employed in each school and the average compensation of each per month. Fifth, the number of days the school has been taught, and by whom. Sixth, the average cost of tuition for a pupil per month in each school. Seventh, books used in each school. Eighth, the number of volumes in the library of each school. Ninth, the aggregate amount paid teachers during the year, the source from which the same was received, and the amount of the teachers' fund in the hands of the treasurer. Tenth, the number of district schoolhouses and the cost of each. Eleventh, the amount raised in the district by tax for the erection of schoolhouses and for other purposes authorized in this title, and such other information as he may deem useful. Should the clerk fail to file his reports as above directed he shall forfeit the sum of $25, and shall be liable to make good all loss resulting to the district from such failure, suit to be brought in both cases by the director in the name of the district, on his official bond.

2. Teachers.

Appointment, qualifications, and duties.—Meetings.

Appointment, qualifications, and duties.—The State superintendent shall have power to grant certificates of qualification to teachers of proper learning and ability to teach in any public school of the State and to regulate the grade of county certificates. The county superintendent shall examine every person offering himself or herself as teacher of public schools, and if in his opinion such person is qualified to teach a public school he shall grant a certificate authorizing the holder to teach a public school in that county for one year. Whenever practicable the examination shall be competitive and the certificate shall be granted according to the qualifications of the applicant. The district board shall employ all teachers necessary for the schools of the district. But no certificate shall be granted to any person who shall not have passed a satisfactory examination in physiology and hygiene, with special reference to alcoholic stimulants and narcotics.

Meetings.—The county superintendent of public schools shall hold annually a county teachers' institute for the instruction and advancement of teachers. Said institute shall continue not less than four days nor more than five days. The county superintendent shall preside at all meetings and determine the time and place for holding such institute. It shall be the duty of all teachers actually engaged in teaching in such county to attend such institute unless they shall have a written excuse, signed by the county superintendent. It shall be the duty of each district board to pay all teachers who attend such institute the same salary per day they would have received had the same amount of time been spent in teaching. It shall be the duty of the county board of commissioners, in each county, to appropriate annually the sum of $100 for the payment of such instructors or lecturers as the county superintendent may employ to assist him in holding the county institute.

3. Schools.

Attendance.—Character of instruction.—Text-books.

Attendance.—The district schools established under the provisions of this title shall at all times be equally free and accessible to all children resident therein over 6 and under the age of 21 years, subject to such regulations as the district board in each district may prescribe. But where there are 15 or more colored children within any school district the board of directors and the county superintendent may provide a separate school for them. And it shall be the duty of all parents and guardians, or other persons having the control of children between the ages above mentioned, to send such children to some school at least three months in each and every year, except in case of invalids and others to whom the schoolroom would be injurious. [Cf. under Finances, subhead Taxation.] In such cases the district board shall, upon receipt of a physician's certificate, excuse such children: and the district board may, in its discretion, excuse children from attendance when a compliance with this title would work great hardship. In all such cases the clerk of the board shall state the reason for excuse and the name of the child or person excused, and the length of time for which excused, at large in the minutes of the proceedings of the board: *Provided*, That in all cases the applicant may appeal from the decision of the board to the county superintendent, whose decision shall be final.

Any parent or guardian, or other person having children in their charge between the ages of 7 and 16 years, who shall neglect or refuse to comply with the provisions of this chapter shall, on conviction, be punished by a fine not exceeding $25 for each and every offense, and it shall be the duty of all sheriffs, constables, or police officers, at all times, whenever it comes to their knowledge that any child is living idly and loitering about the streets or thoroughfares and spending its time in an idle and dissolute manner, to notify some member of the school board of the district in which such child is living, whose duty it shall be to immediately make all the proper inquiries to ascertain the reasons for the nonattendance of said child in some school of the county in which such child may be found by said board; if any such child or ward is willfully violating the conditions of this law, it shall become the duty of the county superintendent of schools, on written notice from the board, to make a complaint before some justice of the peace against the parent or guardian of said child or ward, or to make complaint against such child or ward, as provided in cases of vagrancy, under the laws of this Territory.

The district meeting determines the length of time schools shall be taught.

Character of instruction.—The legislature shall provide for the establishment and maintenance of a complete and uniform system of public instruction, embracing free elementary schools of every needed kind and grade, a university with such technical and professional departments as the public good may require and the means of the State allow, and such other institutions as may be necessary. The county superintendent and district board of directors may determine whether a school of a higher grade shall be established in the district, the number of teachers to be employed, and the course of instruction to be pursued therein, until the meeting of the teachers' institute, provided for by law, at which time the institute shall determine the studies to be pursued in all schools of like grade in the State; and the superintendent of public instruction shall have the same power to carry into effect the determination of the institute as is provided in other cases; and the board may erect for the purpose one or more permanent schoolhouses, and shall cause such classification of the pupils as they may deem necessary, but in selecting the site for such schoolhouse or schoolhouses the permanent interest and future welfare of the people of the entire district shall be consulted.

Physiology and hygiene, which shall include in each division of the subject special reference to the effects of alcohol and narcotics upon the human system, shall be included in the branches taught in the common schools.

Text-books.—Neither the legislature nor the superintendent of public instruction shall have power to prescribe text-books to be used in the schools. At the expiration of the period of five years, for which the books now in use are adopted, the county superintendents and city superintendents of schools in the State shall meet at a call of the State superintendent of public instruction to adopt a series of text-books, and the books thus adopted shall be the only legal text-books to be used in the public schools for the ensuing five years.

Buildings.—The school property is controlled by the district board of directors.

Any person who shall willfully break, cut, deface, despoil, injure, damage, or destroy any school property, or who shall cut, mark, write, or otherwise place or put on, or cause to be placed or put upon, any school property any language or pictures or figures or signs of an obscene character, shall be deemed guilty of a misdemeanor, and, upon conviction thereof, shall pay a fine of not less than $5 nor more than $100. The said fines shall be paid into the treasury of the school district in which the offense was committed.

Any person who shall use insulting and abusive language to and toward any teacher in or about any public schoolhouse, or who shall willfully disturb any public school or district meeting, shall be deemed guilty of a misdemeanor, and, upon conviction, shall be fined in any sum not less than $5 and not exceeding $100.

[See also under Organization, District board of directors, and Character of instruction, above.]

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The following are declared to be perpetual funds for school purposes, of which the annual income only can be appropriated, to wit: Such per cent as has been or may hereafter be granted by Congress on the sale of lands in this State; all moneys arising from the sale or lease of sections Nos. 16 and 36 in each township in the State and the lands selected or that may be selected in lieu thereof; the proceeds of all lands that have been or may hereafter be granted to this State where, by the terms and conditions of the grant, the same are not to be otherwise appropriated; the net proceeds of lands and other property and effects that may come to the State by escheat or forfeiture or from unclaimed dividends or distributive shares of the estates of deceased persons; all moneys, stocks, bonds, lands, and other property now belonging to the common-school fund.

To the sources of revenue above mentioned shall be added all other grants, gifts, and devises that have been or may hereafter be made to this State and not otherwise appropriated by the terms of the grant, gift, or devise.

All fines and penalties under general laws of the State shall belong to the public-school fund of the respective counties and be paid over to the custodians of such funds for the current support of the public schools therein.

All funds belonging to the State for public-school purposes, the interest and income of which only are to be used, shall be deemed trust funds in the care of the State, which shall keep them for the exclusive benefit of the public schools, and shall make good any losses that may in any manner occur, so that the same shall remain forever inviolate and undiminished. None of such funds shall ever

be invested or loaned except on the bonds issued by school districts, or registered county bonds of the State, or State securities of this State, or of the United States.

The income arising from the funds mentioned in the preceding section, together with all the rents of the unsold school lands and such other means as the legislature may provide, shall be exclusively applied to the support of free schools in every county in the State.

Provision shall be made by general law for the equitable distribution of such income among the several counties according to the number of children of school age in each; which several counties shall in like manner distribute the proportion of said fund by them received, respectively, to the several school districts embraced therein. But no appropriation shall be made from said fund to any district for the year in which a school has not been maintained for at least three months; nor shall any portion of any public-school fund ever be used to support or assist any private school, or any school, academy, seminary, college, or other institution of learning controlled by any church or sectarian organization or religious denomination whatsoever.

All moneys, stocks, bonds, lands, and other property belonging to a county school fund, except such moneys and property as may be provided by law for current use in aid of public schools, shall belong to and be securely invested and sacredly preserved in the several counties as a county public-school fund, the income of which shall be appropriated exclusively to the use and support of free public schools in the several counties of the State.

Taxation.—The legislature shall make such provision, by taxation or otherwise, as with the income arising from the general school fund will create and maintain a thorough and efficient system of public schools, adequate to the proper instruction of all the youth of the State, between the ages of 6 and 21 years, free of charge; and in view of such provision so made, the legislature shall require that every child of sufficient physical and mental ability shall attend a public school during the period between 6 and 18 years for a time equivalent to three years, unless educated by other means.

The county commissioners shall, at the time of levying tax for county purposes, cause to be levied a tax for the support of schools within the county, as provided by law, which shall be collected by the county collector at the same time and in the same manner as Territorial and county taxes are collected, with the exception that it shall be receivable in cash or warrants of the school. The county treasurer shall at all times hold, subject to the draft of the proper officers, all moneys belonging to teachers or schoolhouse fund.

Whenever a sum of money has been voted by a district, the clerk shall, under the supervision of the director, make out and certify, over his official signature, the amount of money voted in his district, and on or before the fourth Monday in May in each year cause the same to be filed in the office of the clerk of the board of county commissioners. The clerk shall also, at the same time, notify the county assessor in writing of the action of the district meeting. The county assessor shall, at the time of making the county assessment, also assess the property of each district from which he has received notification as aforesaid, and return to the county clerk at the time of returning the county assessment roll a separate roll of each district by him assessed, for which services he shall receive $5 per day for the time actually employed in making such separate assessment roll, which sum shall be paid out of the treasury of each district so assessed.

The amount collected by the county collector shall be paid over to the county treasurer like other taxes, but collector shall pay the money collected on the district tax rolls directly to the treasurer of the proper district.

The board of school trustees of any school district may, whenever a majority thereof so decide, submit to the electors of the district the question whether the board shall be authorized to issue the coupon bonds of the district to a certain amount, not to exceed 3 per cent of the taxable property in said district, and bearing a certain rate of interest, not exceeding 8 per cent per annum, and payable and redeemable at a certain time, not exceeding fifteen years, for the purpose of building one or more schoolhouses in said district and providing the same with necessary furniture.

COLORADO.

1. Organization of the System.

State board of education.—State board of examiners.—State superintendent of public instruction.—County superintendent of public schools.—District board of school directors.

State board of education and State board of examiners.—The superintendent of public instruction, the secretary of state and the attorney-general shall constitute a State board of education, of which the superintendent of public instruction shall be president. The board shall have power to adopt any rules and regulations not inconsistent with law for its own government and for the government of public schools. It may grant State diplomas under conditions specifically set forth under the head "Teachers," in connection with the State board of examiners.

State board of examiners.—See under Teachers, Appointment, qualifications, and duties.

Superintendent of public instruction.—There shall be elected every two years a State superintendent of public instruction, who shall give bond in the sum of $5,000, with sureties. He shall have an office at the seat of government, where he shall keep the records of his office. He shall decide all points touching the construction of the school law; shall prepare lists of questions for the use of county superintendents at examinations of teachers; shall have general supervision of all the county superintendents, and of the public schools of the State; shall prepare and distribute all necessary blanks and blank books, to be charged to the counties at cost; shall report to the governor concerning the condition of the public schools, the amount of the State school fund apportioned and sources from which derived, with such suggestions and recommendations relating to the affairs of his office as he may think proper to communicate. He shall visit annually such counties as most need his personal attendance, and all counties, if practicable, and he shall open a correspondence to enable him to obtain all necessary information relating to the system of public schools in other States. For traveling expenses he shall receive not more than $500, and the incidental expenses of his office shall be paid in the same manner as are those of other State officers. He shall apportion the school fund and may employ an assistant librarian, who shall have charge of the State library.

County superintendent of schools.—There shall be elected in each county biennially a county superintendent of public schools, who shall execute a bond in the sum of $2,000 (to be increased at discretion) with two sureties. He shall examine teachers, shall apportion the general school fund among the districts, supervise the schools of his county, visit each school at least once during the quarter to examine the accounts of district officers, and make a report to the State superintendent containing the abstracts of the reports made to him by the district secretaries, and also such other matters as the State superintendent may direct. The county superintendent may appoint a deputy who shall receive no compensation from public funds. He also shall appoint directors in districts failing to elect them. He shall record the boundaries of districts. His compensation shall be $5 per diem and 15 cents for each mile necessarily traveled one way; but his compensation shall in no case exceed $100 for each regularly organized public school in the county. He shall be provided with a suitable office at the county seat as also with all the office incidentals.

District board of school directors.—All school districts which shall continue to exercise undisputedly the prerogatives and enjoy the privileges of a district for the period of one year next succeeding the election of its officers shall be deemed to be a legally formed district. For the purpose of organizing a new district out of a portion of one or more old districts the parents of at least 10 children of school age, residing within the limits of the proposed district, shall petition the county superintendent in writing, who may call an election to determine the question.

There shall be elected in each school district annually a board of directors. The number of persons that shall constitute each board of directors shall be determined as follows: Districts containing a population of more than 1,000 shall be denominated districts of the first class; districts containing a population of from 350 to 1,000 shall be denominated districts of the second class, and districts containing a population of fewer than 350 shall be denominated districts of the third class; and districts of the first class shall annually elect one director for five years, while districts of the second and third classes shall annually elect one person to serve for three years as a member of the board; one member of the board of dis-

tricts of the second and third classes shall be elected as president, one as secretary, and one as treasurer. District boards in first-class districts shall fill vacancies until the next annual election.

Each school board shall have power to employ or discharge teachers, mechanics, or laborers, and to fix their salaries; to fix the compensation to be allowed the secretary; to enforce the general regulations of the State superintendent; to fix the course of study, the exercises, and the kind of text-books to be used; to provide for school furniture and for everything needed in the schoolhouses or for its own use; to rent, repair, and insure schoolhouses, and, when directed by the district, to build or remove schoolhouses, or to purchase or sell school lots. The board shall suspend or expel pupils from school; shall determine the number of teachers to be employed and the length of time over and above three months that the schools shall be taught; to provide books for indigent children on the written statement of the teachers that the parents of such children are not able to purchase them; to make an annual report to the county superintendent upon the forms furnished by the superintendent; to make a report to the State superintendent when instructed to do so. They shall purchase and display upon the schools the national flag.

The district board of any district of the third class may call a special meeting of the electors, who shall decide as to the location of a schoolhouse, lay a tax to pay teachers; purchase or lease suitable grounds and buildings for school purposes and furnish and repair the same and provide incidentals, procure libraries, books, and stationery for the board, etc., and direct the sale or other disposition of school property.

The secretary of the board shall give bond with sureties, and shall annually cause to be taken a census of all persons over 6 and under 21, and shall cause reasonable effort to be made respecting the number of blind and deaf persons 4 to 22. He shall make a report to the county superintendent containing the following facts: The number of persons, male and female, in his district between the ages of 6 and 21; the number of schools and the branches taught in each; the number of pupils in each school; the number of teachers employed and the compensation of each per month; the number of days the school was taught during the year; the number of pupils enrolled during the year and the average daily attendance; the average cost of each school a month for each pupil based upon the total enrollment and also the average cost based upon the average daily attendance (in estimating these averages the secretary shall take account of the teachers wages, all current expenses, and 6 per cent interest upon a fair valuation of all property belonging to the district); the kind of text-books used; the number of volumes in the library of each school; the aggregate amount paid teachers during the year and the average monthly pay; the number of public schoolhouses and their value; the amount raised by tax in the district during the year for school library; the amount raised by subscription or by other means than tax; the amount of special tax levied for the support of schools and for buildings, sites, and furniture; the amount of money on hand at the beginning of the year last past, and the amount received from all other sources. Should the secretary fail to make this report he shall forfeit the sum of $100, and be responsible for the loss occasioned by his negligence. In districts of the first class the secretary may, and the treasurer shall not, be a member of the board. In districts of the second and third classes both are elected as members of the board.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No district board shall employ any person to teach in any of the public schools unless such person shall have a license to teach, in full force at the time of employment.

The State board of education is hereby authorized to grant State diplomas to such teachers as may be found to possess the requisite scholarship and culture, and who may exhibit satisfactory evidence of a moral character, and whose eminent professional ability has been established by not less than two years' successful teaching in the public schools of the State. Such diplomas shall supersede the necessity of any and all other examinations by persons holding the same whether county, city, or local, and shall be valid anywhere in the State. They shall be granted upon public examination upon such branches and terms and by such examiners as the State superintendent, the president of the State university, the president of the State agricultural college, and the president of the State school of mines may prescribe. provided that the State board of education may, upon the recommendation of the State board of examiners, grant State diplomas without

examination to persons who, in addition to good moral character and scholarly attainments, have rendered eminent services in the educational work in the State for a period of not less than five years.

The county superintendent shall meet all persons desirous of passing an examination as teachers, in some suitable room at the county seat, where he shall examine all applicants in orthography, reading, writing, arithmetic, English grammar, geography, the history of the United States, including the Constitution, physiology, laws of health, the elements of the natural sciences, theory and practice of teaching, and the school law of the State. He may appoint a deputy at $5 a day to examine persons to whom it would be a hardship to attend at the county seat. If the applicant is to teach in a school of high grade, the examinations shall extend to such additional branches of study as are to be pursued in such school. The certificates shall be of three grades. The first grade shall be valid for two years, the second for one year, the third for six months. A county superintendent may renew a certificate of the first grade by indorsing such renewal thereon. It shall be deemed a violation of law to grant a certificate of either of the above-named grades without requiring the applicant to pass a thorough and satisfactory examination in the branches required by law and upon questions prepared by the superintendent of public instruction, but failure in the elements of the natural sciences shall not prevent the issuance of a third-grade certificate. The county superintendent may, upon evidence of competency, grant a temporary (unrenewable) certificate until the next following examination, but not more than one shall be granted to the same person.

In school districts of the first class the examination of teachers to fill vacancies may be conducted by the school boards of such districts, and a teacher thus examined and while thus employed shall not be required to hold a certificate from the county superintendent. If satisfied of the ability of the holder of a certificate from another county, a superintendent may grant a certificate to him to teach in the county of which he is superintendent. In case a certificate is revoked or refused an appeal may be made to the State board.

The teacher shall, at the close of every term (four months at longest), fill in the statistical summary in the register, and in ungraded schools file the register with the secretary of the district, but in graded schools the register aforesaid shall be filed with the principal or superintendent of the district, in which case the principal or superintendent shall make an abstract of the summaries of all such registers upon blanks prepared by the superintendent of public instruction and file the same with the secretary. The teacher, principal, or superintendent, as the case may be, who is in charge of the last term of school shall file with the secretary a summary of the statistics for the year, and until these registers, summaries, and abstracts have been filed it shall be unlawful for the officers of any district to draw a warrant for the last month's salary of any teacher, principal, or superintendent whose duty it is to make out such statements.

Preliminary training.—The purpose of the State normal school shall be to impart instruction in the science and art of teaching, with the aid of a suitable practice department, and in such branches of knowledge as shall qualify teachers for their profession. The school shall be under the control of a board of six trustees (appointed with the concurrence of the senate), two to retire annually, and the State superintendent. The normal school is an integral part of the public-school system and shall stand upon the same basis as to apportionment of State school funds as union high schools and shall be subject to the supervision of the State board of education, under which the board of trustees shall exercise their control. The school shall be open to all persons resident in this State who are 16 years of age, without charge for tuition. The school is authorized to grant diplomas to such students as shall have completed the full course of instruction, shall have been recommended by the faculty, and shall have passed a final examination upon the branches embraced in the prescribed course before a board consisting of the State superintendent of schools, a county superintendent, and the principal of the school. This diploma licenses the receiver to teach in any of the public schools of the State. The trustees shall receive $5 per diem and traveling expenses and shall report annually to the State board concerning the attendance, the curriculum, and the finances of the school.

Meetings.—The State is divided for the present into 13 normal institute districts. A normal institute for the instruction of teachers and those desiring to teach may be held annually for a term of not less than two weeks in each normal institute district. The county superintendents of each institute district shall annually select not more than three of their number as an executive committee, who, with the advice and consent of the superintendent of public instruction and the president of the State normal school, shall determine the time and place of holding the

normal institute, and shall select a conductor and instructor for the same. To defray the expense of such institute the executive committee shall require the payment of $1 registration fee for each person attending, and each county superintendent shall add 5 per cent to the standing in examination of teachers who shall so attend.

When a normal institute of not fewer than two weeks is held the number and names of the persons in attendance shall be certified to the county commissioners, who shall allow $2 for every person certified, and there shall be paid the sum of $50 to institutes having at least 20 persons in attendance who have paid registration fees.

No one shall be paid from the fund arising from fees and county appropriations as conductors or instructors unless holding a certificate of qualification for such work from the State board of education on recommendation of the State board of examiners, provided that a member of the State normal school faculty shall be ex-officio a conductor of normal institutes.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—Every public school, except high schools, shall be open for the admission of all children 6 to 21 residing in the district, for at least four school months in each year. A school day shall not exceed six hours.

It shall be unlawful for any person, persons, or corporation to employ any child under the age of 14 years to labor in any business whatever during the school hours of any school day of the school term of the public school, in the school district where such child is, unless such child shall have attended some public or private day school where instruction was given by a teacher qualified to instruct in those branches required to be taught in the public schools of the State of Colorado, or shall have been regularly instructed at home in such branches by some person qualified to instruct in the same, at least twelve weeks in each year, eight weeks at least of which shall be consecutive, and shall, at the time of such employment, deliver to the employer a certificate in writing, signed by the teacher, certifying to such attendance or instruction; and any person, persons, or corporation who shall employ any child contrary to the provisions of this section shall, upon conviction, be deemed guilty of a misdemeanor, and fined in a sum not less than $25 nor more than $50; and all fines so collected shall be paid into the county treasury and placed to the credit of the school district in which the offense occurs.

Every parent or guardian or other person in the State of Colorado having control of any child or children between the ages of 8 and 14 shall be required to send such child or children to a public school or private school taught by a competent instructor, for a period of at least twelve weeks in each year, at least eight weeks of which time shall be consecutive, unless such child or children are excused from such attendance by the board of the school district in which such parent, guardian, or person having control resides, upon its being shown to their satisfaction that such child's bodily or mental condition has been such as to prevent attendance at school, or application to study for the period required: *Provided*, That if such parent or guardian is not able, by reason of poverty, to properly clothe any such child, it shall be the duty of the school board of the proper district, upon the fact being shown to their satisfaction, to furnish the necessary clothing and pay for the same out of the school fund of such district, by warrant drawn as in other cases, or that such child or children are taught at home in such branches as are usually taught in the public schools, subject to the same examinations as other pupils of the district in which the child resides; or that there is no school taught within 2 miles by the nearest traveled road.

Any parent, guardian, or other person failing to comply with the provisions of the preceding paragraph shall, upon conviction, be deemed guilty of a misdemeanor, and fined in a sum not less than $5 nor more than $25 for each offense; and all fines so collected shall be paid into the county treasury and placed to the credit of the school district in which the offense occurs.

It shall be the duty of any school director of the district to inquire into all neglect of the duty prescribed for attendance of children, and ascertain from the person the reason, if any, therefor; and he shall forthwith proceed to secure the prosecution of any offense occurring under this act; and any director neglecting to secure such prosecution for such offense, within ten days after a written notice has been served on him by any taxpayer in said district, unless the person so complained of shall be excused by the district board of education for the reasons hereinbefore stated, shall, upon conviction, be deemed guilty of a misdemeanor, and

fined in a sum not less than $10 nor more than $50; and such fine, when collected, shall be paid into the county treasury and placed to the credit of the school district in which the offense occurs. All actions for offenses committed under this act shall be prosecuted for in the name of the State of Colorado.

That upon the trial of any offense as charged herein, before any court of competent jurisdiction, it shall be determined that such prosecution was malicious, then the costs in such case shall be adjudged against the complainant and collected as fines in other cases.

Two weeks' attendance at half time or night school shall be considered within the meaning of this article equivalent to an attendance of one week at a day school.

Character of instruction.—The public schools shall be taught in the English language, and the school boards shall have taught in such schools orthography, history of the United States, the Constitution of the United States, physiology, laws of health, the elements of the natural sciences, the effect of alcoholic drinks and narcotics, and such other branches of learning and other languages as may be deemed expedient. On the demand of the parents or guardians of twenty or more children of school age, the board of directors may procure efficient instructors and introduce the German and Spanish languages as a medium of instruction, one or either of them.

The school board of districts of the first and second classes shall have the power to establish a separate high school whenever they shall deem it expedient, and shall determine the qualifications for admission to such schools and shall exercise all the powers with reference to such high school which are accorded to them in relation to schools of the lower grade. Two or more adjoining districts may elect a high-school committee and establish and maintain a high school.

Kindergartens may be established by the school boards of any district for children 3 to 6, but this shall not change the law as to the taking of the school census or the apportionment of State and county school funds.

Text-books.—The district school board shall determine the kind of text-books to be used, provided that only one kind of text-book of the same grade or branch of study shall be used in the same department of a school, and that after the adoption of any book it shall not be changed in fewer than four years, unless the price thereof shall be unwarrantably advanced or the mechanical quality lowered or the supply stopped. The board shall also provide books for indigent children, on the written statement of the teachers that the parents of such children are not able to purchase them, and shall furnish free text-books for the use of all pupils, when authorized to do so by a majority vote of the district. The board shall also require that pupils be furnished with proper books as a condition of membership in school.

Buildings.—The property of the school district is under the control of the district school board, which may acquire or sell the same when directed by a vote of the district to do so. The national flag shall be displayed upon each school house.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The public-school fund of the State shall consist of the proceeds of such lands as have heretofore been, or may hereafter be, granted to the State by the General Government for educational purposes; all estates that may escheat to the State; also all other grants, gifts, or devises that may be made to this State for educational purposes.

The public-school fund of the State shall forever remain inviolate and intact. The interest thereon only shall be expended in the maintenance of the schools of the State, and shall be distributed among the several counties and school districts of the State in such manner as may be prescribed by law. No part of this fund, principal or interest, shall ever be transferred to any other fund or used or appropriated except as herein provided. The State treasurer shall be the custodian of this fund, and the same shall be securely and profitably invested as may be by law directed. The State shall supply all losses thereof that may in any manner occur.

The State superintendent shall semiannually apportion the public-school income fund among the several counties of the State from which reports have been received, according to the school population.

All fines, penalties, and forfeitures provided by this act may be recovered by action of debt, in the name of the people of the State of Colorado, for the use of the proper school district or county, and shall, when they accrue, belong to the respective districts, or counties, in which the same may have been incurred; and the county treasurers, for their counties, are hereby authorized to receive and cause to be placed to the proper credit such forfeitures. Except as otherwise pro-

vided by law, all sums of money derived from fines imposed for violation of orders of injunction, mandamus, and other like writs, or for contempt of court, shall be paid into the school fund of the county wherein the contempt or such violation was committed; and the clear proceeds of all fines collected within the several counties of the State for breach of the penal laws, and all funds arising from the sale of lost goods and estrays shall be paid over in cash by the person collecting the same within twenty days after the collection to the county treasurer of the county in which the same have accrued, and shall be by him credited to the general county school fund. [For the distribution of the county fund, see "Taxation," below.]

Taxation.—There shall be assessed and levied annually upon all the taxable property in the State taxes for the support and maintenance of certain State educational institutions as follows: One-sixth of 1 mill on each dollar of the assessed valuation of the taxable property of the State for the use of the agricultural college, and to be known as the agricultural college fund; one-sixth of 1 mill on each dollar of the assessed valuation of the taxable property of the State for the use of the State school of mines, to be known as the school of mines fund; one-sixth of 1 mill on each dollar of the assessed valuation of the taxable property of the State for the use of the State normal school, to be known as the normal school fund; one-sixth of 1 mill on each dollar of the assessed valuation of the taxable property of the State for the use of the institute for the mute and blind, to be known as the mute and blind fund. Such taxes shall be levied and collected at the same time and in the same manner provided by law for assessments and collection of other State taxes.

The county commissioners shall, at the time of levying the tax for county purposes, cause to be levied a tax for the support of schools within the county of not less than 2 mills on the dollar of the assessed value of all taxable property, real and personal, within the county, which tax shall be collected by the county treasurer at the same time and in the same manner as State and county taxes are collected, except that it shall be receivable only in cash. It is hereby made the duty of the county superintendent of schools to certify to the board of county commissioners at this time the amount of money needed per capita to enable each school district in the county to maintain a public school four months in each year, as required by law. In making his estimate the county superintendent shall not take into consideration districts whose school population is fewer than 15, as shown by the school census preceding the time of making the levy. He shall use as a basis for making his estimate the sum of $40 per month for the teacher's salary. All other expenses of the school must be provided for by the board of directors by special tax. It is hereby made the duty of the county commissioners to increase the minimum rate of 2 mills to what shall be required for the purpose as stated above: *Provided*, That such tax levy shall in no case exceed 5 mills: *Provided further*, If any school district shall fail to certify a special tax for other expenses of the district necessary to maintaining a public school each year four months, the county commissioners shall cause the same to be levied.

The county superintendent shall apportion the funds aforesaid among the districts entitled to the same according to the number of persons of school age as shown by the census lists and reports of the several districts for the school year immediately preceding.

The district meeting of third-class districts may order such tax as the voters deem sufficient for any of the following purposes: To pay teachers' wages, to hire or purchase property, and keep the same in repair.

On the petition of 20 legal voters of any school district, the question of issuing bonds for the purpose of erecting and furnishing school buildings or purchasing ground, or for funding floating debts, shall be submitted to the voters. But in no case shall the aggregate bonded debt exceed 3½ per cent of the assessed value of the property of the district.

NEVADA.

1. Organization of the System.

State board of education.—State superintendent of public instruction.—County superintendent of public schools.—County board of examination.—District board of school trustees.

State board of education.—The State board of education shall consist of the governor who shall act as president, the surveyor-general, and the superintendent of public instruction who shall be secretary. The board shall meet at least twice a year and has the following duties: To prescribe and cause to be adopted a uni-

form series of text-books, to regulate State and county examinations, to prescribe the course of study in the public schools, to recommend a list of books for district school libraries, to grant life diplomas, educational diplomas, and State certificates, and to determine appeals from decisions of county superintendents.

State superintendent of public instruction.—There shall be elected every four years a State superintendent of public instruction, who shall be paid an annual salary of $2,000 in addition to the sum of $400 received as curator of the State museum and secretary of the board of directors of the State Orphans' Home. He shall apportion, subject to the supervision of the State board of education, to the counties the State school money; shall report to the governor biennially, of which report 250 copies shall be delivered to the superintendent, who shall distribute the same among school officers of the State and the United States. The report shall contain a full statement of the condition of public instruction in the State, of the condition and amount of all funds and property appropriated to the purpose of education, the number and grade of schools in each county, the number of children in each county between 6 and 18, the number of such attending public schools, the number attending private schools, and the number attending no school; the number under 6 years of age, the number 18 to 21 years of age, the amount of public school money apportioned to each county, the amount raised by county taxation, district tax, rate bills, subscription, or otherwise; the amount raised for building schoolhouses, plans for the management and improvement of public schools, and other information of educational importance. He shall prescribe and distribute the forms and books required by the service, shall compile the laws regarding schools, and distribute copies thereof; shall visit each county in the State at least once in each year for the purpose of visiting schools, officers, or communities, and shall be allowed his traveling expenses to the amount of $1,000.

County superintendent of public schools.—The district attorneys, in addition to their duties as such, shall be ex officio county superintendents. It shall be the duty of the county superintendent to apportion the public-school moneys in the county treasury among the several school districts, to visit each school in his county within 10 miles of the county seat at least once in each term, provided he shall visit all the schools in his county once in each year, to exercise a general supervision over the interests of the public schools, to distribute promptly the blanks, etc., received from the State superintendent, to file the reports made to him, to report annually, such report to include an abstract of all the various annual reports of the city boards of education, school trustees, marshals, and teachers, to conduct all county institutes, to appoint school trustees where none have been elected, and to fill vacancies, and to draw warrants for the purchase of schoolbooks to be furnished to indigent children. Should the county superintendent fail to make a correct report to the State superintendent he shall forfeit $200 from his salary. He shall be paid such salary as the board of county commissioners shall allow, but such salary shall be sufficient at least to pay all his necessary traveling expenses. He may appoint a deputy, but the county shall not be responsible for the salary of the deputy. He or the deputy shall be present in his office during the business hours of each Saturday.

County board of examination.—(See Teachers, Appointment, qualifications, and duties.)

District board of school trustees.—Each village, town, or incorporated city of this State shall constitute but one school district, and the public schools therein shall be under the supervision and control of the trustees thereof. The board of commissioners of the county may create new districts, or change or abolish those already established, when in the judgment of the board it is expedient. There shall be elected in each school district every two years two trustees, one to serve two and the other four years, but in districts having a voting population of 1,500 or more there shall be elected one trustee to serve two years and two to serve four years. The board of trustees shall have the care and custody of all school property, and if directed by the district, shall sell any portion of it, or buy, build, or otherwise provide sites and buildings for school purposes. The board may repair buildings when the cost does not exceed $500, and supply schoolhouses with necessary furniture, fixtures, and fuel. The board shall cause the school census marshal to annually enumerate the children between the ages of 6 and 18 years; it shall also report the number of schools, specifying the grades, the number and sex of teachers, the number and sex of pupils, the average attendance, the length of term, the compensation of teachers by sex, the number and condition of schoolhouses and furniture, and the estimated value thereof, the number of books in public-school libraries, the text-books used in the schools, the value and kind of school apparatus, the amount raised by rate bills, district taxation, and sub-

scription for school purposes, the amount expended in erecting and furnishing schoolhouses, and such other statistics as the State superintendent may require. The board shall employ teachers, provide books for indigent pupils, grade the schools if possible, suspend or expel pupils, apportion the school fund among the several schools in proportion to the average number of pupils attending each, establish a union school district, levy a tax when necessary to support schools for six months, call an election as to laying a tax to furnish additional school facilities, and assess rate bills after school has been maintained six months in the year.

2. Teachers.

Appointment, qualifications, and duties.—Meetings.

Appointment, qualifications, and duties.—No teacher shall be paid from public school funds unless legally employed by the board of trustees, unless having had a certificate from the State board of education or the county board of examination in full force and effect, unless making a full report in manner and form prescribed by law, and taking oath to support the Constitution of the United States and the State and (in case of men) not to fight duels during the term of office.

State educational diplomas may be issued to such persons only as have held a State certificate or a first-grade county certificate for at least one year and shall furnish satisfactory evidence of having been successfully engaged in teaching for at least five years. Every application for an educational diploma must be accompanied by a certified copy of a resolution adopted by a board of trustees recommending the applicant as a successful teacher and as worthy of the diploma. Life diplomas may be issued by the State board upon all and the same conditions as educational diplomas, except that the applicant must furnish satisfactory evidence of having been successfully engaged in teaching for at least ten years. The State board may grant State certificates upon an appeal only after an examination held by a county superintendent.

The county superintendent shall appoint two competent persons, who, with himself, shall constitute the county board of examination. The board shall grant three grades of certificates, to wit: First grade, for teaching unclassified, grammar, and high schools, good for three years; second grade, for teaching primary schools, good for two years. Certificates shall be issued only to those having passed a satisfactory examination in all the branches of study pursued in each specified grade of the public schools and having given evidence of good moral character and fitness to teach. The board of examiners may renew the certificate of a teacher acceptably teaching in the schools of the county, and shall on presentation of any life certificate of any State or of a diploma of a California State normal school grant the holder a county certificate, provided the certificate or diploma be not more than 5 years old.

Examinations for teachers' certificates shall be held semiannually and the questions shall be prepared by the State board of education, so as to be uniform throughout the State. The questions shall not be opened by the county superintendent until the day of examination.

Meetings.—The superintendent of public instruction, with the consent of the State board of education, shall have power to convene two State teachers' institutes annually in different sections of the State and shall preside over them. Teachers who attend one shall not be required to attend the other. The sessions shall last from three to ten days. The purpose of the institutes shall be to train and instruct teachers of the State so far as may be necessary in practical and scientific methods of work, to simplify and unify the courses of study in the public schools, etc. Class work in common-school branches shall be a prominent feature of all institute programmes. All teachers shall be required to attend the institute held in the section where they are engaged, and without loss of salary. The State superintendent shall have power to engage lecturers and instructors.

The county superintendent shall have power to call one or more teachers' institutes annually, and the expenses to the sum of $100 of such institutes shall be paid out of the county general fund, provided they have been authorized by the board of commissioners.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—When the State and county money is not sufficient to keep a school open in a district for at least six months in a year they shall levy a district tax sufficient to keep a school open to children 6 to 18 years of age for six months. Every parent or guardian or other person having control or charge of a child or children

between the ages of 8 and 14 years shall be required to send such child or children to a public school for a period of at least sixteen weeks in each school year, at least eight of which shall be consecutive, unless such child or children are excused from such attendance by the board of school trustees of the school district in which such parents or guardians reside, upon its being shown to their satisfaction that the bodily or mental condition of such child or children has been such as to prevent his or her or their attendance at school or application to study for the period required, or that such child or children are taught in a private school or at home in such branches as are usually taught in primary schools, or have already acquired the ordinary branches of learning taught in the public schools; provided, in case a public school shall not be taught for the period of sixteen weeks, or any part thereof, during the year, within 2 miles by the nearest traveled road of the residence of any person within the school district, he or she shall not be liable to the provisions of this act.

It shall be the duty of the board of school trustees of each school district in the State, on or before the first Monday in September of each year, to furnish the principal of each public school taught in such district with a list of all children resident in the school district, between the ages of 8 and 14 years, said list to be taken from the report of the school census marshal. At the beginning of each school month thereafter it shall be the duty of the principal of each school in such district to report to the board of school trustees of such district the names of all children attending school during the previous school month; when, if it shall appear, at the expiration of four school months, to the board of school trustees that any parent, guardian, or other person having charge or control of any child or children shall have failed to comply with the provisions of this act, the board shall cause demand to be made upon such parent, guardian, or other person for the amount of the penalty hereinafter provided; when, if such parent, guardian, or other person shall neglect or refuse to pay the same within five days after the making of said demand, the board shall commence proceedings, in the name of the school district, for the recovery of the fine hereinafter provided, before any justice of the peace in the township in which said school district is located; or, if there shall be no justice of the peace therein, then before the nearest justice of the peace in the county.

Any parent, guardian, or other person having control or charge of any child or children failing to comply with the provisions of this act shall be liable to a fine of not less than $50 nor more than $100 for the first offense, nor less than $100 nor more than $200 for the second and each subsequent offense, besides the cost of collection.

Whenever it shall appear to the satisfaction of the board of school trustees of any school district in this State that the parents, guardians, or other persons having control and charge of any child or children in attendance upon the public school of said district, in accordance with the provisions of this act, are unable to procure suitable books, stationery, etc., for such child or children, it shall be the duty of such board to procure or cause to be procured for such child or children all necessary books, stationery, etc., the same to be paid for out of the fund of said school district, in the same way that other claims against the school district are now allowed and paid: *Provided*, That all books, stationery, etc., purchased under the provisions of this act shall be deemed to be the property of the school district, to be under the care and control of the school trustees when not in actual use.

All fines collected under the provisions of this act shall be paid into the county treasury on account of the State school fund.

It shall be the duty of the county superintendent of public schools in each county in this State to cause this law to be published in some newspaper in his county, if there be one, four consecutive times annually, for a period of two years, the expense of such publication to be allowed and paid out of the general school fund of the county. The board of school trustees in each school district shall cause to be posted annually, for a period of two years, in three public places in their district, notices of the requirements and penalties of this act.

Character of instruction.—There shall be taught in the public schools orthography, reading, writing, arithmetic, the elements of natural philosophy, and geography, and in each school above the primary grade there shall also be taught English grammar, history of the United States, chemistry, and elementary physiology and hygiene, which shall give special prominence to the effects of alcoholic drinks, stimulants, and narcotics upon the human system, and in such schools as the board of district trustees may direct algebra, geometry, drawing, natural history and philosophy, astronomy, and the elements of bookkeeping.

Text-books.—The State board of education shall have power, and it is hereby

made their duty, to prescribe and cause to be adopted a uniform series of text-books in the principal studies pursued in the public schools, to wit, spelling, reading, grammar, arithmetic, geography, and physiology; and no school district shall be entitled to its pro rata of public school moneys unless such text-books shall be adopted and used in all its public schools.

Buildings.—No public schoolhouse shall be erected unless its plan has been approved by the county superintendent. The care and control of school property are in the hands of the board of district trustees. It shall be a misdemeanor for any person to disturb the peace of any public school within the grounds or building of such school, and to this end the ground of every public school shall extend to a distance of 50 yards in all directions from the school building. It shall be a misdemeanor for any person to detain, beat, whip, or otherwise interfere with any pupil attending any public school on his way to or from school. Penalty in both the foregoing cases shall be fine to not more than $300 or imprisonment in the county jail for six months, or both.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The principal of all moneys accruing to this State from the sale of lands given or bequeathed for public school purposes, all fines collected under the penal laws of the State, 2 per cent of the gross proceeds from all toll roads and bridges, and all estates that may escheat to the State shall be, and the same are hereby, solemnly pledged for educational purposes, and shall not be transferred to any other fund for other uses, but shall constitute an irreducible and indivisible fund to be known as the State school fund, the interest accruing from which shall be divided semiannually among the counties in this State entitled by the provisions of this act to receive the same, in proportion to the number of persons 6 to 18 years of age, for the payment of qualified teachers, and no portion of the amount distributed shall, either directly or indirectly, be paid for the erection of schoolhouses, the use of schoolrooms, furniture, or any contingent expenses of public schools.

Taxation.—There shall be levied an ad valorem tax of one-half of 1 mill on the dollar of all taxable property in the State, to be known as the State school tax, which shall become a part of the State school fund. There shall be set apart semiannually 5 per cent out of all moneys received as State tax for school purposes, and such amount shall be distributed pro rata.

The board of county commissioners of each county shall annually levy a county school tax, not to exceed 50 nor less than 15 cents on each $100 of taxable property, which shall be collected into the county treasury as a special deposit.

The board of trustees of any school district may submit to the electors the question of taxing themselves to raise additional school facilities or to keep the schools open for a longer period than the ordinary funds will allow.

IDAHO.

1. Organization of the System.

State board of public instruction.—State superintendent of public instruction.—State board of text-book commissioners.—County superintendent of public instruction.—Board of school trustees.

State board of education.—The superintendent of public instruction, the secretary of state, and the attorney-general shall constitute the State board of public instruction, of which the State superintendent shall be president. The board shall have power to appoint a secretary, to adopt rules for its own government, and to meet on the call of the president at other times than on the first Mondays of June and December, the days of its regular meetings. It shall hold annually at least two public examinations of teachers, at each of which one member shall preside, assisted by not more than two persons, as the board may elect, who shall receive for such services not more than $5 a day. The board shall keep a full and correct record of its proceedings and a complete register of all persons to whom certificates are issued and is empowered to revoke any certificate or diploma for cause.

State superintendent.—Before entering upon the duties of his office the State superintendent shall take the oath of office and execute a bond in the sum of $2,000, conditioned upon the faithful performance of his duties, including the

delivery to his successor of all books, papers, and other property belonging to the office. He shall have an office at the capital and a seal. He shall file all papers, reports, and public documents transmitted to him by county superintendents and have them ready for public inspection. He shall have general supervision of all the county superintendents and of the public schools of the State, and shall prepare and prescribe a course of study for use in all such public schools, shall prepare or cause to be prepared all examination questions to be used by the county superintendents of the several counties in the examination of applicants for teachers' certificates, and shall prescribe the regulations for conducting them. He shall also prescribe regulations for the holding of teachers' institutes, and, after consulting and advising with county superintendents, shall appoint assistant conductors therefor, when necessary, and as far as possible assist at such institutes. He shall meet the county superintendents of each judicial district or of two or more districts combined, with the object of learning the condition of the schools and improving the teaching therein, and he shall have the law relating to the public schools printed in pamphlet form and shall supply copies to school officers, school libraries, and State librarians. He shall report to the governor every year preceding that in which a regular session of the legislature is held concerning the condition of the public schools, the amount of State school fund apportioned and sources from which derived, with such suggestions and recommendations relating to the affairs of his office as he may think proper. He shall visit such counties of the State as most need his personal attendance, or all if practicable, and shall institute such correspondence as may enable him to obtain information relating to the system of public schools in other States, and he shall receive out of the treasury for actual traveling expenses and other expenses while traveling on the business of the department not exceeding $750 per annum. His office expenses shall be furnished in the same manner as those of the other departments of the State government.

State board of text-book commissioners.—(See Schools, Text-books.)

County superintendent.—Before entering upon the duties of his office the county superintendent of public instruction shall take oath and give bond to the amount of $1.000 (to be increased at the discretion of the board of county commissioners) conditioned upon the faithful performance of his official duty. He shall have general supervision over all the public schools in the county, shall visit every public school in his county at least once in each year, and oftener, if necessary, carefully observing the methods employed by the teacher in giving instruction in the several branches taught, the discipline, and progress made by pupils. He shall advise and direct the teacher in regard to the course of study, the instruction and classification of the pupils, note the condition of the building and appurtenances, and shall report thereon to the district board in writing, with suggestions. He may require the trustees of any district to repair the school buildings or property, or to abate any nuisance in or about the premises. if such repair or abatement cost not over $75, there being money in the treasury to the credit of the district. He shall keep a complete record of all his official acts, preserve all books, documents, maps, etc., sent to him as a school officer; shall keep a register of all the teachers employed in his county, giving name of teacher, number of district, salary, grade of certificate, and date of State superintendent's visit. He shall be subject to instructions from the State superintendent, and shall distribute the forms and blanks received from him. He shall hold one regular examination annually and shall grant certificates of three grades, and for cause may revoke any certificate not granted by the State superintendent, and shall transmit an annual report to the State superintendent, which shall contain an abstract of the reports made by the district clerks, together with such statistics, items, and statements relative to the schools of the county as the State superintendent may require. He shall see that boundaries of school districts are accurately described in the records of the clerk of the board of county commissioners and shall keep in his office a transcript of such boundaries, and shall report incorrect descriptions to the board of county commissioners, which shall immediately rectify them. He shall appoint trustees for newly organized districts and fill vacancies that may occur; may call to his assistance for any public examination not more than two competent teachers, and shall be allowed all necessary expense for blank books and stationery, visiting the schools of the county, or attending the meeting of county superintendents. He may hold teachers' intitutes. When unable to perform his duties he shall appoint a deputy, who, though sworn in, shall not receive any compensation out of the public treasury. The salary of the superintendent shall be 10 per cent on the first $1,000 apportioned by him to the general school districts of his county, 4 per cent on all sums over $1.000 and up to and including $5,000, 3 per cent on all sums over $5,000 and up to and including $10,000, 2½ per cent on all sums over $10,000 and

up to and including $15,000, and 2 per cent on all sums over $15,000. All incidental expenses of his office shall be met by county commissioners from the general expense fund of the county. Failure to make full and correct reports to the State superintendent causes the county superintendent to forfeit $100.

Board of school trustees.—The board of county commissioners at its regular meeting shall have power to create new districts from unorganized territory or from old districts, to change the boundaries of any district, when petitioned to do so by parents or guardians of at least 10 children of school age. At each regular school election there shall be elected, by ballot, a board of three, each for three years, one member to retire annually. If the clerk of the board fails to give due notice of the election any two legal voters in the district may give such notice over their own names. The board shall meet at least four times during the year; shall employ teachers and fix and pay their compensation and that of the clerk of the board. It shall have charge of all school property in its district, and have power to accept property given to the district, and may buy or sell school property when directed by the district, also to repair and locate schoolhouses; but no trustee shall be pecuniarily interested in any contract made by the board. It shall decide on cases of insubordination reported by teachers.

The clerk of the board shall annually enumerate the children of 5 to 21 years of age, for which he shall be allowed 5 cents for each child enumerated.

When any school district has within its limits taxable property of the amount of $200,000 or over, it may be organized as an independent district, having a board of six trustees, two to retire annually.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No teacher shall be entitled to or shall receive any compensation for the time he or she teaches in any public school without a certificate valid for such time in the county where such school is taught, except that if a teacher's certificate shall expire within six weeks of the close of a term the teacher may finish the term. The State board shall issue State certificates, good for five years, to such as have passed a thorough examination in all the branches included in the course of study prescribed for the public schools of the State, didactics, and such other branches as the board may direct, as have a good moral character, an experience in teaching of at least three years, and as can furnish the board satisfactory evidence of their ability to instruct and properly manage any school in the State; the board shall also issue diplomas good for life to those who have taught at least five years, two of which shall have been in the State of Idaho, and possess the other qualifications requisite for a State certificate.

The county superintendent shall hold one regular public examination in each year for the purpose of examining all persons who may desire to teach in the public schools of the State. The examination shall be held at the county seat, and shall not continue longer than for three days. He may also hold three or fewer special public examinations, but fifteen days' notice must be given, but the first-grade certificate shall be granted only at the regular public examination. The State superintendent shall prepare or cause to be prepared all examination questions to be used, and shall prescribe the regulations and form of certificate. The county superintendent shall grant certificates to those only who are 16 years of age, who have passed a satisfactory examination in orthography, reading, writing, grammar, arithmetic, geography, history of the United States, civil government, physiology, and hygiene, with particular reference to the effects of alcoholic drinks and narcotics, theory and practice of teaching, and so much of the general school law as relates to the duties and responsibilities of teaching, and who have thorough scholarship, ability to instruct and govern a school, and good moral character. The certificates shall be of three grades. The first grade shall be granted to those only who have successfully taught for one year, and shall be valid for three years. The second grade shall be valid in the county of issue for two years, and the third grade for one year. But the county superintendent may grant a temporary certificate to teach in a specified district, good until the next public examination and no longer; and he may two select competent teachers, at a compensation of $4 a day, to assist him in holding examinations.

Teachers of the public schools must be furnished with a school register by the trustees of the district, which must be delivered to the board of trustees; and also a form which must be filled up according to the headings and transmitted to county superintendent; and no teacher shall be allowed an order for payment of

salary until the report is made out and transmitted by the clerk of the board. Every teacher must enforce the course of study, the use of text-books, and the regulations; hold pupils to a strict account for conduct on the way to or from school as well as on the playgrounds and during recess, and suspend pupils for cause, reporting the case to board of trustees, which may be appealed to county superintendent; shall make such additional reports as required, and endeavor to impress on the minds of the pupils the principles of morality, truth, justice, and patriotism, and teach them to avoid idleness, profanity, and falsehood. It is the duty of all teachers and holders of certificates to attend the county institute.

Preliminary training.—There shall be established two normal schools, the purpose of which shall be the training and education of teachers in the art of instruction and governing in the public schools of this grade, and of teaching the various branches that pertain to a good common-school education. Each school shall be under a board of trustees, which shall have control of the property; shall fix the course of study, establish, if deemed necessary, a training or model school, and make regulations for admission of pupils, who shall declare that they are 16 years of age if men and 15 years if women and that their purpose is to fit themselves for the profession of teaching and to teach in the public schools of the State.

Meetings.—The county superintendent having ten or more school districts may hold annually a teachers' institute for not fewer than five nor more than ten days, giving ten days' notice of the time and place in a newspaper, or by written notice to each teacher, each of whom shall close the school he teaches during the time the institute is in session, without loss of pay. The county superintendent must provide building, lights, stationery, etc., but shall not expend more than $150, which shall be paid from the current expense fund of the county.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—Every parent, guardian, or other person having control of a child or children between the ages of 8 and 14 years shall be required to send it or them to a public school for the period of twelve weeks in each school year, eight weeks of which shall be consecutive unless such child or children are excused from such attendance by the board of school trustees upon it being shown that the bodily or mental condition of such children has been such as to prevent their attendance, or that they are taught in a private school or at home in such branches as are usually taught in a private school, or have already acquired the ordinary branches of learning taught in the public schools; provided in case a public school shall not be taught for a period of twelve weeks during the year within 3 miles by the nearest traveled road of the residence of any such parent or guardian within the school district he or she shall not be liable to the provisions of this act.

It shall be the duty of the board of school trustees of each district in this State, on or before the first Monday in September in each year, to furnish the principal in each public school taught in such district with a list of all children in the school district between the ages of 8 and 14 years, said list to be taken from the report of the school census marshal.

At the beginning of each school month thereafter it shall be the duty of the principal of each school in such district to report to the board of school trustees of such district the names of all children attending school during the previous school month. When it shall appear at the expiration of three school months to the board of school trustees that any parent, guardian, or other person having charge or control of any child or children shall have failed to comply with the provisions of this act, the board shall cause demand to be made upon such parent, guardian, or other person for the amount of the penalty hereinafter provided; when, if such parent, guardian, or person shall neglect or refuse to pay the same within five days after the making of said demand, the board shall commence proceedings in the name of the school district for the recovery of the fine hereinafter provided before any court having jurisdiction: *Provided*, That nothing shall apply to any child or children who are actually and necessarily compelled to labor for the support of a parent or parents.

Any parent, guardian, or other person having control or charge of any child or children failing to comply with the provisions of this act shall be liable to a fine of not less than $5 for the first offense, nor less than $10 nor more than $50 for the second and each subsequent offense, besides the cost of collection.

Third. All fines collected under the provisions of this act shall be paid into the county treasury, to be placed to the credit of the school district collecting the same.

Fourth. The board of school trustees in each district shall cause to be posted annually in three public places notices of the requirements of this law.

If any school district shall during the period of one year fail to maintain a school for three months consecutively, or keep up its organization of officers as required by law, or the average attendance has been not more than five pupils, such district shall lapse.

Text-books.—The governor shall appoint four persons, one of whom shall be the State superintendent, who shall be engaged in educational work in the State, and who, together with the president of the University of Idaho, shall constitute a State board of text-book commissioners. The president of the State University shall be president. The board shall meet at the State capitol, in the senate chamber, on the second Monday of May, 1893, for the purpose of selecting and adopting a uniform series of text-books for use in all the public schools of the State.

The superintendent of public instruction shall advertise for at least thirty days in two daily newspapers published in the State, giving notice that the said board of text-book commissioners shall receive sealed proposals up to 12 o'clock noon of the day appointed for their meeting for supplying the State with a uniform series of text-books for use in all the public schools for a term of six years from and after the 1st day of September, 1893, in the following branches, namely: Spelling, reading, writing, arithmetic, geography, grammar, physiology and hygiene, civil government, history of the United States, and in all other branches taught in the common, graded, and high schools of the State. Said sealed proposals shall be addressed to the president of the State board of text-book commissioners, Boise, Idaho, and shall be indorsed, "Sealed proposals for supplying the State of Idaho with school text-books." Said proposals shall state the price at which said text-books will be delivered free on board cars, subject to order of the State superintendent of public instruction.

It shall be the duty of the board to open said sealed proposals in the presence of a majority of said board and in public, and to select and adopt such text-books for use in the public schools as in their opinion will best subserve the educational interests of the State. The series of text-books selected and adopted by the board shall be certified to by its chairman, and said certificate with a copy of all books named therein must be placed on file in the office of the State superintendent. Such certificate must contain a complete list of all the books adopted by the board, giving price for which each kind and grade will be furnished and the name of the publisher agreeing to furnish the same. The books named in the certificate shall for a period of six years from and after the 1st day of September, 1893, be used in all the public schools throughout the State, to the exclusion of all others.

The board shall have power to make such contracts and agreements with publishers as they shall deem necessary for the best interests of all the public schools in the State, and shall require of all publishers contracting and agreeing to furnish books adopted by the board bonds in double the amount of the value of the books to be furnished for the faithful performance of the conditions of the said contract.

Immediately after the filing of the said certificate in his office the State superintendent shall have prepared printed lists of the text-books adopted by the board, with the price of each of said books as certified to in the said certificate, and shall forward the same to the county superintendents, each of whom shall immediately forward one list to each of the trustees of every district in his county. Not later than the third Monday of June, 1893, and at such other times thereafter as may be necessary to properly supply the schools of the district, the chairman of each of the several boards of trustees of the county shall forward to the county superintendent a list of the kind of books and the number of each kind which will be required to supply the pupils of the public schools of his district. Abstracts of such lists showing the kinds of books and the number of each kind so forwarded shall be prepared by the county superintendent and transmitted to the State superintendent without delay, who shall order the same to be delivered by the contracting publishers of said text-books, and he shall, upon the receipt thereof, forward the same to the county superintendents for distribution among the several districts.

The trustees of every district shall purchase at the expense of each district all text-books used in the public schools, and shall immediately upon receipt thereof draw an order for a warrant in favor of the county superintendent for the payment of said books, which warrant shall be forwarded to the State treasurer, and shall be paid out of any moneys standing to the credit of the district. In case there is not a sufficient amount in the treasury to the credit of any district at the time of receiving the books the payment must be made out of the money appropriated by law and charged to said district, and refunded out of the first moneys placed to the credit of said district. Said books shall be loaned to the pupils of

said public schools free of charge, subject to the rules and regulations as to the care and custody prescribed by the State superintendent and such additional rules as the district board may see fit to make.

The State superintendent shall have control and supervision over the distribution and shipment of all books contracted for by the State board of text-book commissioners, but all payments made to the county superintendents for the purchase of school text-books by the several districts must be forwarded to the State treasurer, who shall have charge of the settlement of all accounts with the publishers contracting with the board to furnish the books for books ordered and received for use in the public schools throughout the State, and shall pay for the same upon the bills being audited and allowed by the State board of examiners. And it shall be unlawful for the trustees of any district in the State to purchase for the use in the public schools any series of text-books other than those adopted by the board of text-book commissioners. All orders for books must be made upon the State superintendent through the county superintendent of the county in which said district is situated.

The said board of text-book commissioners shall receive each the sum of $5 per day for each day necessarily engaged in transacting business while in session and 10 cents per mile each way for each mile necessarily traveled.

There is hereby appropriated the sum of $1,000, or so much thereof as may be necessary, to carry out the provisions of this act; and the additional sum of $2,000 for clerical assistance and labor in the office of the State superintendent for the ensuing two years. And the further sum of $20,000 is appropriated and set aside as a revolving text-book fund to meet the payments for text-books of districts having no money to their credit.

No books, papers, tracts, or documents of a political, sectarian, or denominational character must be used or introducd in any school established under the provisions of this act, and any and every political, sectarian, or denominational doctrine is hereby expressly forbidden to be taught therein; nor shall any teacher or any district receive any of the public-school moneys in which the schools have not been taught in accordance with the provisions of this act.

Trustees may determine whether pupils outside of their district may attend school in such district, and upon what terms.

Buildings.—The trustees shall have charge of all school property in their district, and have power to receive in trust all real estate or other property conveyed to said school district, and to convey by deed, duly executed or delivered, all the estate or interest of their district in any schoolhouse or site directed to be sold by a vote of their district. Said trustees have further power, when directed by a vote of their district, to purchase, receive, hold, and convey real and personal property for school purposes, and to hold, purchase, and repair schoolhouses and to supply the same with necessary furniture, and to fix the location of schoolhouses; provided that no trustee shall be pecuniarily interested in any contract made by the board of trustees of which he is a member, and any contract made in violation of this provision is null and void. The trustees of the respective districts must furnish all things, not herein otherwise provided for, necessary for the use and comfort of the schools in their district, such as fuel, improvements, maps, apparatus, and library, and for such purpose may audit and allow accounts against the school fund of their district not to exceed 25 per cent of the amount of such school fund in any one year; provided further that the trustees shall not draw an order for a warrant in excess of the amount to the credit of the district at the time the order is given.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The public-school fund of the State shall consist of the proceeds of such lands as have hitherto been granted, or may hereafter be granted, to the State by the General Government, known as "school lands," and those granted in lieu of such; lands acquired by gift or grant from any person or corporation under any law or grant, and of all other grants of land or money made to the State for general educational purposes, and all moneys accruing to the State from the estates of deceased persons. For the further support of the public schools there shall be set apart by the county treasurer of each county and placed in the county school fund all moneys arising from fines, forfeitures, or breaches of any of the public penal laws of the State.

The income of the State school fund and taxes collected by the State for the support of the public schools which shall be received up to the 1st day of January

and the 1st day of July of each year shall be distributed semiannually during said months, respectively, in each year among the several counties of the State from which reports have been received by the State superintendent of public instruction, as provided in this act, in proportion to the number of children of school age, as shown by the last school census list of each county, and the superintendent of public instruction shall certify such apportionment to the State auditor, who shall draw his warrant in favor of the county treasurer of each county.

Taxation.—For the purpose of establishing and maintaining public schools in the several counties of the State the board of county commissioners shall, at the time of levying the taxes for State and county purposes, levy a tax of not less than 5 mills nor more than 10 mills on each dollar of taxable property in their respective counties for school purposes. Said taxes must be assessed and collected in each county as other taxes for State and county purposes.

When any district has voted a tax for school purposes the board of trustees shall immediately make the levy and certify the facts to the board of county commissioners and the county assessor; but only one special tax may be levied in a year. Upon receiving such statement from the trustees the assessor must assess upon all property subject to taxation the tax so levied and certified to him; but for that purpose he is not required to take new statements from the owners of property, but his assessment of all special taxes so levied may be computed and made upon the valuation of property as fixed by the board of equalization for State and county purposes, and as appears upon the assessment roll in the same year. Said special taxes so levied as aforesaid shall become a lien upon the property so assessed from the date of assessment, and shall be due and payable at the same time as State and county taxes, and in all respects are to be collected in the same way, except that the assessor must keep a separate list or assessment roll thereof, and when paid must be named in his receipt to the taxpayer as a separate item, and he must pay them to the county treasurer as he pays other taxes; but at the time of payment he must specify to the treasurer what taxes they are and take a separate receipt therefor and keep separate accounts thereof.

The assessor shall receive 2 per cent on all such special taxes so collected by him, having first rendered his account thereof the same being allowed.

WASHINGTON.

1. Organization.

State board of education.—Superintendent of public instruction.—County superintendent.—County board of examiners.—District board of trustees.—City board of education.

State board of education.—The governor shall appoint, by and with the advice and consent of the senate, four suitable persons, at least two of whom shall be selected from those actually engaged in teaching in the common schools of the State, who, together with the superintendent of public instruction, shall constitute the State board of education. The persons appointed shall hold their office for two years. The board shall hold an annual session at the capital and necessary special meetings. The members shall be paid for their services at the rate of $5 per diem of actual service, and shall be reimbursed for necessary traveling expenses; but the expenses of the board shall not exceed $1,000 in any one year. [The duties of the board are given under Teachers, subhead Appointment, qualifications, and duties; and under Schools, subheads Character of instruction and Text-books.]

State superintendent of public instruction.—There shall be elected by the qualified electors in the State, for a term of four years, a State superintendent of public instruction. His salary shall be $2,500. He shall have supervision over all matters pertaining to the common schools, shall report to the governor biennially and said report, of which 3,000 copies shall be printed, shall contain a statement of the general condition of the common schools of the State, with full statistical tables, by counties, showing the number of schools and the attendance, the State and county school fund apportioned, amount received from special tax or other sources, amount expended for salaries of teachers, the salaries paid by the several counties to the superintendent of schools, the amount they are paid for visiting schools, and their mileage, the amount expended for building and providing schoolhouses, the amount of bonded or other school indebtedness, with rate of interest paid; a list of the school officers of the State, the reports of all State educational institutions, or such portions of them as he may think advisable, together with such other facts as he may deem of general interest. He shall also include in his report a statement of

plans for the management and improvement of the schools. He shall prepare and superintend the printing and distribution to county superintendents of such blanks, forms, registers, and blank books, copies of the school law as may be necessary to the proper discharge of the duties of county superintendents, teachers, and all other school officers charged with the administration of the laws relating to common schools; also the rules and regulations for the use and government of the common schools and the questions prepared for the examination of teachers. He shall, as far as possible, travel in the different counties of the State where common schools are taught, without neglecting his other official duties as superintendent of public instruction, for the purpose of visiting schools, of consulting the county superintendents, and addressing public assemblages on subjects pertaining to common schools; also to open such correspondence as may enable him to obtain all necessary information relating to the system of common schools in other States. His traveling expenses, shall be limited to the sum of $800 in any one year, and the actual amount expended for postage, stationery, and other expenses of his office at the capitol, in which he shall preserve the records of his office, shall be paid as are the incidental expenses of other State officers.

He shall be ex officio president of the board of education. He shall, biennially, on or before the 1st day of May following the election of county superintendents, call a convention of county superintendents of this State, at such time and place as he may deem most convenient, for the discussion of questions pertaining to the supervision and administration of the school laws, and such other subjects affecting the welfare and interests of the common schools as may be properly brought before it. He shall, between the 1st and 10th days of March and September of each year, apportion the State common-school funds subject to apportionment among the several counties of the State, in proportion to the number of children in each county between the ages of 5 and 21 years, as the same shall appear by the reports of the several county superintendents for the school year last closed: *Provided*, That in case no report of the enumeration of any county for the school year last closed has been received, the apportionment shall be made on the basis of the number of children in said county as shown by the last census received from said county. He shall certify said apportionment to the State auditor, and upon said certification the State auditor shall draw his warrant on the State treasurer in favor of the county treasurer of each county for the amount apportioned to said county, and transmit the same to the several county treasurers. The superintendent of public instruction shall also certify to the county superintendents of schools of each county the amount apportioned to that county. It shall be the duty of the State auditor to notify the superintendent of public instruction on or before the 1st day of March and September of each year of the amount of the State common-school fund subject to apportionment. He shall, annually, on or before the 15th day of August, require of the president, manager, or principal of every seminary, academy, and private school, and of the president, principal, or manager of every State educational institution in this State, a report of such facts, arranged in such forms as he may prescribe, and he shall furnish blanks for such reports, and it is made the duty of every such president, manager, or principal to fill up and return such blanks within such time as the State superintendent may require. He shall keep a directory of the school officers, boards of regents, and trustees of State educational institutions, of the faculties of said institutions, and of all teachers receiving certificates to teach in the common schools of the State.

He may appoint a clerk in his office at a salary of $500 or less per annum.

County superintendents.—A county superintendent of common schools shall be elected in each county for two years, who shall give bond. He may, at his own cost, appoint a deputy. Vacancy in the office shall be filled by the county commissioner. The duty of the county commissioner shall be to exercise a careful supervision over the schools; to visit each school one to three times during each year; provided, however, that he shall receive mileage in going to and returning from a school for not more than two trips annually, and in incorporated cities and towns where city superintendents are employed he shall receive pay for one visit only; to distribute promptly all reports, laws, forms, circulars, and instructions received from the State superintendent; to enforce the course of study adopted by the State board; to preserve all reports made to him; to keep a record of the teachers, with all necessary personal and pedagogical data; to make an annual report to the State superintendent, containing abstracts of the reports made to him by district clerks, and such other matters as the State superintendent shall require; to keep an accurate description of the boundaries of every district; to appoint district directors and clerks, to fill vacancies, and form new districts; to apportion the county school funds, and in the following manner: One-fourth of the total amount to be apportioned to each district in proportion to the number

of teachers employed therein, enumerating one for every 70 school census children and fraction thereof over 30; but each district shall be entitled to one teacher, and the remaining three-fourths shall be apportioned to each district in proportion to the number of census children; to appoint a county board of examiners, he himself being ex officio a member. Failure on the part of the county superintendent to make the reports required shall cause him to lose $50 from his salary. Any decision made by the county superintendent may be appealed to the State superintendent. The county superintendent, in addition to the salary fixed by law, shall be allowed $3 for each school visited and mileage at the rate of 10 cents for each mile necessarily traveled in making such visits and in attending conventions of county superintendents, but he shall be allowed no other emolument.

County board of examiners.—See under Teachers, Appointment, qualifications, and duties.

Board of district directors.—The term "school district" means the territory under the jurisdiction of a single school board. To organize a new district a petition in writing shall be made to the county superintendent signed by at least five heads of families residing in the district, but for the purpose of transferring territory from one district to another it is necessary that a majority of the heads of the families residing in the territory to be transferred should petition.

Directors of school districts shall be elected at the regular annual school election. At the first annual election in all new districts three directors shall be elected for one, two, and three years, respectively. The ballots shall specify the term for which each is to be elected. In all districts in which elections have been previously held, one director shall be elected for the term of three years, and if any vacancies are to be filled, a sufficient number to fill them for the unexpired term or terms; and the ballots shall specify the respective term for which each director is to be elected.

Every board of directors, unless otherwise specially provided by law, shall have power, and it shall be their duty to employ, and, for sufficient cause, discharge teachers, mechanics or laborers, and to fix, alter, allow, and order paid their salaries and compensation; to enforce the rules and regulations prescribed by the superintendent of public instruction and the State board of education for the government of the schools, pupils, and teachers, and to enforce the course of study prescribed by the State board of education; to provide and pay for school furniture and apparatus, and such other articles, materials, and supplies as may be necessary for the use of schools; to rent, repair, furnish, and insure schoolhouses; to build or remove schoolhouses, purchase or sell lots or other real estate, when directed by a vote of the district to do so; to purchase personal property in the name of the district, and to receive, lease, and hold for their district any real or personal property and to have custody of all school property; to suspend or expel pupils from school who refuse to obey the rules thereof, and may exclude from school all children under 6 years of age; to provide books for children of indigent parents on the written statement of the parents of such children that they are unable to purchase the same; to require all pupils to be furnished with such books as may have been adopted by the State board of education, as a condition to membership in the schools; to exclude from school and school libraries all books, tracts, papers, and other publications of an immoral or pernicious tendency, or of a sectarian or partisan character; to authorize the schoolroom to be used for summer and night schools, literary, scientific, religious, political, mechanical, or agricultural societies, with the consent of and under such regulations as the board of directors may adopt; to require teachers to conform to the provisions of the school law.

Any board of directors shall be liable as directors in the name of the district for any judgment against the district, for any salary due any teacher, and for any debts legally due, contracted under the provisions of this act, and they shall pay such judgment or liability out of the school funds to the credit of the district.

The district clerk shall annually take an exact census of all children and youth between the ages of 5 and 21 years, and shall designate the number of weeks each child between the ages of 6 and 21 years has attended school during the school year, the names and sex of all children subject to enumeration, noting defects of sight or hearing, and the names of their parents or guardians. He shall report the enumeration, and such information as the State superintendent shall require as to the duration, character of instruction, the attendance, the buildings, and the salary of the teacher. He shall receive $3 per diem for taking the census and making his report and such other allowances as the board of directors may deem reasonable, but he shall receive no compensation until he shall have made his reports.

Each incorporated city or town shall comprise one school district, and shall elect, when there is more than one school, a town school superintendent, who may be a teacher.

City board of education.—Whenever any incorporated city shall have a population of 10,000 or more inhabitants, together with any adjacent or contiguous territory that now is or may be hereafter attached to said city for school purposes, it shall constitute one school district, and the board of directors shall constitute the city board of education.

The board of education shall consist of 5 members, who shall be elected by ballot by the qualified electors of the directors of the district, and shall hold their offices for the term of three years, and until their successors are elected and qualified.

The regular district election for the election of members of the board of education shall be held annually in each district.

The board shall elect a secretary, who shall not be a member of the board, but shall act as its purchasing agent and in addition as superintendent of buildings, giving bond of $5,000 or more. The duty of the board is: (1) To employ a city superintendent of schools of the district, and for cause to dismiss him, and to fix his duties and compensation. (2) To enforce the rules and general regulations of the State superintendent and the State board of education; to prescribe the course of study, the exercises, and the kind of text-books to be used, in addition to the text-books prescribed by the State board of education, for use of the common schools of this State; provided that after the adoption of any text-book it shall not be changed in less than five years, unless the price thereof shall be unwarrantably advanced, or the mechanical quality lowered, or the supply stopped. (3) To provide for school furniture and for everything needed in the schoolhouses. (4) To make necessary by-laws for more effectively carrying out the provisions of this act and for facilitating the work of the board, as required by law. (5) To adopt and enforce such rules and regulations as may be deemed essential to the well-being of the schools, and to establish and maintain such grades and departments, including night schools, as shall, in the judgment of the board, best promote the interests of education in that district. (6) To suspend or expel pupils from school who refuse to obey the rules thereof. (7) To employ, and for cause dismiss, teachers; to determine the length of time over and above eight months that school shall be maintained; to fix the time for the annual opening and closing of schools and for the daily dismissal of primary pupils before the regular time for closing schools. (8) To provide books for indigent children, on the written statement of the superintendent that the parents of such children are not able to purchase them. (9) To require successful vaccination as a condition of school membership, and to provide free vaccination for all who are unable to pay for the same. (10) To make an annual printed report to the taxpayers of the district, showing in detail the receipts and disbursements of the school funds. The board shall annually cause the school census to be taken by the secretary and census marshals selected by him, at such compensation as the board shall fix. In cities of 10,000 or more there may be a board of examiners, consisting of the city superintendent and four other members. The board shall annually report to the county commissioners the amount of funds necessary to carry on the schools.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No person shall be accounted as a qualified teacher, within the meaning of the school law, who has not first appeared before the board of examiners of the county in which he proposes to teach, and received a certificate setting forth his qualifications, or has not a State certificate or a life diploma from the State board of education or a temporary certificate granted by the county superintendent. Nor shall any teacher be employed except by written order of a majority of the directors at a meeting.

The State board of education shall sit as a board of examination at their annual or special meetings and grant State certificates or life diplomas. State certificates shall be granted only to such applicants as shall file with the board satisfactory evidence that they have taught successfully twenty-seven months, at least nine of which have been in the public schools of the State. The applicant must also either pass a satisfactory examination in all the branches required for a first-grade county certificate, and also in pedagogy, plane geometry, geology, natural

nistory, civil government, psychology, bookkeeping, composition, English literature, and general history, or file with the board a certified copy of a diploma from some State normal school or of a State or Territorial certificate from any State or Territory, the requirements to obtain which shall not have been less than those required above. State certificates shall be valid for five years, and may be renewed without examination, and shall entitle the holder to teach in any common school in the State. They may be revoked at any time for cause deemed sufficient by the board. Life diplomas shall be granted to such applicants only as shall file with the board satisfactory evidence that they have taught successfully for ten years, not less than one of which shall have been in the common schools of this State. In other respects the requirements shall be the same as those required for State certificates, but life diplomas shall be valid during the life of the holder, unless revoked for cause deemed sufficient by the board, and shall entitle the holder to teach in any common school in the State. The fee for State certificates shall be $3, and for life diplomas $5. Said fees must be deposited with the application, and can not be refunded to the applicant unless the application be withdrawn before it has been considered by the board. The fees collected shall be paid into the State treasury. The board shall also prepare a uniform series of questions to be used by the county boards of examiners in the examination of teachers. Any member of said board who shall directly or indirectly disclose any questions thus prepared shall be deemed guilty of a misdemeanor, and on conviction thereof shall be fined in any sum not less than one hundred nor more than five hundred dollars.

The county superintendent shall appoint, for one year, two persons holding the highest grade certificate in his county, and such persons, with the county superintendent, shall constitute a board of examiners for the examination of teachers. It shall be the duty of the county board of examiners in all counties to be at the county seat on the second Thursday of the months of February, May, August, and November of each year for the purpose of examining teachers. The superintendent shall give ten days' notice of the same by publication in some newspaper of general circulation published in his county, or if there be no newspaper, then by posting up handbills, or otherwise. Such examination shall be conducted according to the rules prescribed by the State board of education, and no other questions shall be used except those furnished by the said board.

There shall be three grades of certificates—first, second, and third. Unless revoked for cause, first-grade certificates shall entitle the holder to teach for five years, second grade for two years, and third grade for one year; but the issuing of more than one third-grade certificate to any person shall be left to the discretion of the county board of examiners. No first-grade certificate shall be granted until the applicant shall have filed with the county superintendent satisfactory written evidence of having taught successfully one school year of nine months. Boards of examiners may, in their discretion, issue certificates without examination to the graduates of the normal department of the State university of Washington, or to the graduates of any State normal school, or to the holder of a State certificate or life diploma from any State or Territory. Those holding first-grade county certificates, and who shall have been actually engaged in teaching for three years, shall be eligible to examination for State certificates. Any teacher to whom a certificate has been granted by any county board of examiners in this State, or by lawful examiners in any other State or Territory, the requirements to obtain which shall not have been less than the requirements to obtain a certificate in this State, or any teacher holding a diploma or certificate of graduation from any State or Territorial normal school or university, or from the normal department of the university of Washington, may present the same or a certified copy thereof to the county superintendent of any county in this State where said teacher desires to teach, and it shall be the duty of said county superintendent, upon such evidence of fitness to teach, to grant to said person a temporary certificate which shall entitle him to teach in the common schools of the county wherein it is granted until the next examination of teachers: *Provided*, That the provisions of this clause shall apply only to such teachers as were not residents of the county at the time of the last preceding examination, or were unable by reason of sickness or other unavoidable cause to attend said examination: *And provided further*, That the county superintendent may require of such person a written statement of such facts, verified by affidavit: *And provided further*, That the county board may, at their discretion, indorse certificates from other counties in this State for the unexpired term thereof. All applicants for certificates shall be at least 17 years of age, shall have attended a teachers' institute, and shall be examined in reading, penmanship, orthography, written and mental arithmetic, geography, English grammar, physiology and hygiene, history and Constitution of the United States, school

law and constitution of the State of Washington, and the theory and art of teaching; but no person shall receive a first grade certificate who does not pass a satisfactory examination in the additional branches of natural philosophy, English literature, and algebra.

County examiners appointed by the county superintendent shall receive not less than $3 nor more than $5 per day for the time actually employed in the examination of teachers, and in addition thereto shall receive mileage from their homes to the place of meeting of said board and return by the most usual route at the rate of 10 cents per mile. In cities each board of examination shall have the duty: First. To adopt rules and regulations not inconsistent with the general school law of this State, subject to the approval of the State board of education, for its own government and for the examination of teachers. Second. To examine applicants, and to prescribe standards of proficiency which shall entitle the person examined to a certificate, and to grant city certificates of four grades: (1) High school certificates, valid for six years, and authorizing the holder to teach in any public school in the city; (2) grammar school certificates, valid for five years and authorizing the holder to teach any primary or grammar school in such city; (3) primary school certificates, valid for five years, and authorizing the holder to teach in any primary school in such city, provided that a second-class grammar school or primary certificate may, at the discretion of the board of examiners, be issued for two years, but no applicant shall receive a second-class certificate a second time; (4) special city certificates, valid for five years, may be issued to applicants to teach such special branches as may be authorized by the board of education of such city.

The board of examiners may also, without examination, grant city certificates and fix the grade thereof to holders of State and life diplomas or certificates, and city certificates issued by other cities in Washington; and may also, without examination, renew, and for immoral or unprofessional conduct, or incompetency, may revoke any certificate previously granted in such city. Such board may also issue a permit to such teachers as may not have the opportunity to pass the regular examination; but such permit shall be valid not to exceed six months, and shall not in any case be renewed or extended.

The city certificates issued shall be valid only in the district in and for which the same were granted: *Provided*, That no city certificate shall be granted to any person who is not the holder of a county certificate in full force and effect, granted in the county in which such city is located, or the holder of a life diploma or State certificate issued by the board of education of this State; and no teacher shall be employed in such city schools who does not hold a valid county or State certificate in full force.

Every teacher employed in any common school shall make a report to the county superintendent at the time of the contract to teach such school, the number of the district in which he is to teach, the grade of his certificate, date it expires, and the proposed length of term, and at the close of any school to report to the county superintendent on the blanks prescribed by the superintendent of public instruction. Any teacher who shall be teaching at the close of the school year, or who shall teach the last term of any school year in any school district, shall make a report to the county superintendent immediately upon the close of such school year or term, for the entire time taught in said school district since the beginning of the school year. Copies of all reports made by teachers shall be furnished to the clerk of the district, to be by him filed in his office. No board of directors shall draw any order or warrant for the salary of any teacher for the last month of his service until the reports herein required shall have been made and received; provided that in all schools acting under the direction of a city superintendent the report of such superintendent shall be accepted by the county superintendent and the directors in lieu of the teacher's report; and that when there is no city superintendent the report of the principal shall be accepted in lieu of the teacher's report.

Every teacher shall keep a school register in the manner provided for, and no board of directors shall draw any warrant for the salary of any teacher for the last month of his service in the school, at the end of any term or year, until they shall have received a certificate from the district clerk that the said register has been properly kept, the summaries made, and the statistics entered, or until by personal examination they shall have satisfied themselves that it has been done. Teachers shall faithfully enforce in the school the course of study and regulations prescribed, and if any teachers shall willfully refuse or neglect to comply with such regulations their salaries may be withheld. Teachers maltreating or abusing any pupil by administering undue or severe punishment or inflicting punishment on the head or face shall be deemed guilty of a misdemeanor and shall be fined in a sum not to exceed $100.

Teachers of special subjects shall not be required to pass a regular teachers' examination, but evidence of fitness to teach the specialty is required.

Preliminary training.—There are established three State normal schools for the training and education of teachers in the art of instructing and governing the schools of the State. The schools are under a board of five trustees who manage the affairs of the schools.

Meetings.—Whenever the number of school districts in any county is 25 or more, the county superintendent must hold a teachers' institute each year, and every teacher employed in a common school in the county must attend such institute during its whole time. In any county where there are less than 25 school districts the county superintendent may, in his discretion, hold an institute. Each session of the institute must continue not less than three days. When the institute is held during the time the teachers are employed in teaching, their pay shall not be diminished by reason of their attendance when certified to by the county superintendent. The county superintendent must keep an accurate account of the actual expenses of the institute, with vouchers for the same, and present the bill to the county commissioners, who will allow the same, but not to more than $200 in any one year. Any teacher who willfully neglects to attend an institute shall be deprived of his certificate.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—Every common school shall be open to all children 6 to 21 years [for at least three months]. The school day shall be six hours in length, inclusive of a noon intermission, but the time may be reduced by the board of directors. In cities the board of education shall determine the time over eight months that the schools shall be kept open.

Character of instruction.—Every school shall be taught in the English language and in the following subjects: Reading, penmanship, orthography, written and mental arithmetic, geography, English grammar, physiology and hygiene, with special reference to the effects of alcoholic stimulants and narcotics on the human system, history of the United States, and such other studies as may be prescribed by the board of education. Attention must be given during the entire course to the cultivation of manners, to the laws of health, physical exercise, and ventilation and temperature of the schoolroom.

Whenever the residents of two or more school districts unite to form a union or graded school district the boards of directors sitting as a union district board shall determine what grade or grades of pupils shall attend such schools and their course of study, including those required by law. Cities and towns must grade their school or schools. [For cities of 10,000 or more, see under Organization, City board of education.]

Text-books.—The State board of education shall have power to adopt or readopt, at their first regular meeting in June, 1890, a uniform series of text-books for the use of the common schools, including graded common schools, throughout the State, provided they can secure an exchange of books at any time in use for those of the same grade, or an exchange of those of a lower grade for those of the next higher grade, without a greater average cost to the people than two-fifths of the contract retail price of the books in use at the time of adoption; and enter into contract with the publishers for the supply of the same, to take effect on the 1st day of the following September; and the books so adopted shall not be changed within five years thereafter, unless the publishers of such adopted books shall fail to comply with the terms of the contract. Before making any adoption the superintendent of public instruction shall advertise for at least six weeks in such papers or periodicals of general circulation as he may determine that the board of education will receive sealed proposals for the supply of text-books to the people of the State. Said advertisements shall state the day and hour upon which said proposals shall cease to be received. It shall also name all the kinds of books for the supply of which proposals are invited, and be signed by the superintendent of public instruction, and that proposals so advertised for shall state the price at which the books proposed shall be exchanged for the books in use at the time of making such proposals, and it shall state the wholesale price which shall be maintained in the State and also the uniform retail price which shall be maintained in at least one place in every county in this State during the time the books shall continue in use. Said proposals shall be marked, "Sealed proposals to furnish text-books for the common schools of the State of Washington," and shall be

addressed to the superintendent of public instruction, and shall not be opened before the hour advertised nor in the presence of less than three members of the board. Immediately upon the opening of the bids they shall be read in open board, and adoption of books and award of the contract shall be made within ten days following. No books shall be adopted without a majority vote of the whole board, provided that the board shall have power to reject any and all proposals and to advertise again as before for new proposals, which may be considered at a special meeting to be called by the superintendent of public instruction, who shall readvertise for proposals as above provided. The publishers awarded the contract by the board shall guarantee all the terms of the proposal on which it is made by a bond with two or more sufficient sureties (citizens of the State) for its faithful performance.

Buildings.—The control of school property is vested in the board of directors, and such property may be acquired or sold by the board when authorized by the district meeting. Any pupil who shall in any way cut, deface, or otherwise injure any schoolhouse, furniture, fence, or outbuilding thereof, or any book belonging to other pupils, or any books belonging to the district library, shall be liable to suspension and punishment, and the parent or guardian of such pupil shall be liable for damage, on complaint of the teacher or any director, and proof of the same.

4. Finances.

Funds (permanent and special).—Taxation.

Funds (permanent and special).—The principal of the common-school fund shall remain permanent and irreducible. The said fund shall be derived from the following-named sources, to wit: Appropriations and donations by the State to this fund; donations and bequests by individuals to the State or public for common schools; the proceeds of lands and other property which revert to the State by escheat and forfeiture; the proceeds of all property granted to the State, when the purpose of the grant is not specified or is uncertain; funds accumulated in the treasury of the State for the disbursement of which provision has not been made by law; the proceeds of the sale of timber, stone, minerals, or other property from school and State lands, other than those granted for specific purposes; all moneys received from persons appropriating timber, stone, minerals, or other property from school and State lands other than those granted for specific purposes, and all moneys other than rental recovered from persons trespassing on said lands; 5 per cent of the proceeds of the sale of public lands lying within the State, which shall be sold by the United States subsequent to the admission of the State into the Union as approved by section 13 of the act of Congress enabling the admission of the State into the Union; the principal of all funds arising from the sale of lands and other property which have been and hereafter may be granted to the State for the support of common schools. The legislature may make further provisions for enlarging said fund. The interest accruing on said fund, together with all rentals and other revenues derived therefrom, and from lands and other property devoted to the common-school fund, shall be exclusively applied to the current use of the common schools.

All schools maintained or supported wholly or in part by the public funds shall be forever free from sectarian control or influence. All losses to the permanent common-school fund which shall be occasioned by defalcation, mismanagement, or fraud of the agent or officers controlling or managing the same shall be audited by the proper authorities of the State. The amount so audited shall be a permanent funded debt against the State in favor of the particular fund sustaining such loss, upon which not less than 6 per cent annual interest shall be paid.

Taxation.—In addition to the provisions for the support of the common schools hereinbefore provided, it shall be the duty of the county commissioners of each county in the State to levy an annual tax, which levy shall be made at the same time and in the manner provided by law for the levying of taxes for county purposes, and said levy shall not be less than 8 mills on a dollar of the assessed value of all taxable property, real and personal, within the county; which tax shall be collected by the county treasurer at the same time and in the same manner as State and county taxes are collected. For the support of the common schools there shall also be set apart by the county treasurer all moneys paid into the county treasury arising from fines for breach of any penal law of the State, and it is hereby made the duty of all county clerks, justices of the peace, or other officers receiving any money arising from such fines or licenses, or any other moneys belonging

to the school fund as above provided, to turn the same over to the county treasurer within thirty days after the date of its collection, taking his receipt therefor; and all such officers shall make a report to the county superintendent quarterly.

The board of directors may, for the purpose of furnishing additional school facilities for the district, the payment of teachers' wages, or for the building of one or more schoolhouses, or for the repairing of any school house or houses, or for the building of additions thereto, or for the purchase of fuel, supplies, globes, maps, charts, books of reference, or other appliances for teaching, levy a special tax not to exceed 10 mills on the dollar, provided that no tax exceeding 5 mills shall be levied until such levy shall have been ordered by a majority vote of the legal voters of the district at an election called for the purpose.

In cities of 10,000 or more inhabitants the board of education shall annually report to the county commissioners an estimate of the amount of funds required for the school system, which sum the county commissioners are required to levy and collect, but the aggregate school tax shall never exceed 1 per cent upon all the taxable property of the district. No county tax for school purposes shall be levied upon the property situate within the limits of any school district provided for in this act, nor shall any such district be entitled to or receive any portion of the common school fund raised by county tax. In case the purchase of sites and erection of buildings shall require more than $25,000 in any one year, the matter shall be submitted to the voters.

The board of directors of any school district when authorized by the voters in this State may borrow money and issue negotiable coupon bonds therefor to an amount not to exceed 5 per cent of the taxable property in such district, as shown by the last assessment roll for county and State purposes, provided that in incorporated cities the assessment shall be taken from the last assessment for city purposes, for the purpose of funding outstanding indebtedness, or bonds heretofore issued, or issued under the provisions of this act, or for the purchase of schoolhouse site or sites, or for building one or more schoolhouses, and providing the same with all necessary furniture and apparatus, or for any or all of these purposes, when authorized by vote of the district so to do, as provided, but the bonds so issued shall bear a rate of interest not to exceed 10 per cent per annum, interest payable annually or semi-annually, payable and redeemable at such time as may be designated in the bonds, but not to exceed twenty years from the date of issue.

OREGON.

1. Organization of the System

State board of education.—Board of commissioners for sale of school lands.—Superintendent of public instruction.—County school superintendent.—County board of examiners.—District school directors.

State board of education.—The governor, secretary of state, and State superintendent shall constitute the State board of education, which shall hold semiannual meetings, and shall have the following powers: To prescribe a series of rules for the general government of the schools, to print matter necessary to secure the discharge of its functions, and to sit as a board of examination.

Board of commissioners for sale of school lands.—See under Finances.

State superintendent of public instruction.—There shall be elected every four years a State superintendent of public instruction at an annual salary of $1,800. He shall be provided with an office in the capitol and furnished with the necessary incidentals. He shall exercise a general superintendence of the county and district school officers and the public schools of this State. He shall visit, as far as practicable, every county in the State annually, in the interests of education; he shall hold a teachers' institute in each judicial district biennially, and shall, when practicable, attend all the county institutes and assist in their organization; shall visit as often as practicable the principal schools of the State, and shall give such instruction as to discipline and teaching as he may deem necessary, and he shall keep statistics of the condition of the buildings and appurtenances, the conduct and standing of pupils, methods of instruction, and government. He shall visit, when possible, all the charitable institutions of the State and report material facts thereto relating; shall prepare and distribute blanks, school laws, and circulars; shall act as secretary of the State board; convoke the county superintendents in convention; shall decide disputed points regarding the school law; shall hold a meeting of teachers for the State. He shall report biennially to the legislative assembly, showing the

general condition of the public schools of the State, the amount of school money apportioned among the several counties and the sources whence such money was derived, amounts raised by county and district taxes, and the amount paid for teachers' salaries, buildings, furniture, etc., the series of text-books, and the general rules authorized by the State board, the number and grades of the school in each county, the number of persons between 4 and 20, the number attending public schools, and the number attending private schools, and the number not attending any school. He shall collect statistics concerning the chartered educational institutions of the State, including number of pupils, property, libraries, salaries of teachers, etc.; this shall include all institutions under the patronage of the State; also, all information that he may deem of service to the State.

County school superintendent of common schools.—There shall be elected biennially a county superintendent of common schools at an annual salary to be fixed by the county court. The county superintendent shall be liable to a fine of $100 if he fails to perform the duties imposed upon him. His duties shall be as follows: He shall lay off his county into convenient school districts, and may also make alterations and changes in the same when petitioned to do so by a majority of the legal voters of each district concerned in the change; shall apportion the school fund in the county treasury; shall keep a record of the school lands in the county; shall appoint two persons who with himself shall form a board for examining and licensing teachers; shall visit the schools at least once a year and supervise them; shall digest the reports received from the districts into a report to the State superintendent; shall make a financial report to the county court; shall decide appeals; shall arrange a course of study for the schools when practicable; shall have an advisory power in the location of schoolhouses and in the selection of teachers; shall make special reports of important matters relating to the public schools in his county when necessary and called for; shall be a member of the State board of examiners and shall assist in State examinations when directed by the State superintendent; may appoint, without compensation from the public-school fund, a deputy; shall advise with boards of directors about the warming and ventilation of school houses; shall use a uniform series of blank reports; shall hold institutes.

County board of examiners.—See Teachers' Appointment, qualifications, and duties.

District school directors.—Each district formed by the county superintendent shall annually elect three directors and a clerk. The duties of the directors shall be to authorize the clerk to call special meetings; to issue warrants to the clerks, authorizing them to collect all school taxes; to furnish the schools with fuel and school material; to purchase, build, or lease schoolhouses or sites and furnish them, and, if directed by the district, may borrow money not to exceed 5 per cent of the taxable property of the district and issue bonds to secure the indebtedness thus created; to employ teachers and assist them in the government of the school; to visit and inspect the schools; to exclude refractory pupils for a period not greater than the expiration of the current term; to audit all claims against the district; to require a bond from the district clerk, and to levy rate bills if necessary.

The district clerk shall annually take the census of persons 4 to 20 years of age and the names of their parents.

Any city or incorporated town of over 4,000 inhabitants shall form a separate school district in which the board of directors shall consist of five members, each holding office for five years, one member retiring annually. The board shall employ a superintendent, fix his term of service and salary, employ teachers, janitors, etc.; shall prescribe the course of study and may choose certain text-books in addition to those prescribed by the State; shall create a board of examiners, of which the county superintendent shall be a member, shall make a report to the tax payers, lease and build schoolhouses and sites and sell school property, and in other particulars act as school directors of ordinary districts.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—No person shall be permitted to teach in any public school who has not a valid certificate, and the contract with the board of directors shall be in writing; and if any board shall contract with an unqualified teacher the district shall forfeit its proportion of the school fund for the year.

In each county there shall be a board of county examiners, composed of the county superintendent, as chairman, and two competent persons, who shall be appointed by him, to serve for one year at a per diem of $3 for the time given in

conducting the quarterly examinations. Certificates granted by the board shall be of three grades, and shall cover the subjects given below under, "Character of instruction." Those of the first grade shall not be issued to persons under 18 nor to such as have not taught at least twelve months with approved success, and shall certify that the holder has passed a satisfactory examination in all the branches required by law, with a general average of 90 per cent, and not less than 70 per cent in any subject. Certificates of the second grade may be issued to persons not less than 17 years of age, having taught at least three months, who shall fully satisfy the examining board of their ability to teach all the branches required by law, and shall secure a general average of not less than 80 per cent nor below 60 per cent in any one branch; but a second-grade certificate shall not be issued to the same person more than once. Certificates of the third grade shall be valid for one year, and may be granted to those only who have secured a general average of 70 per cent in all branches required by law, nor less than 40 per cent in any one branch; but not more than one third-grade certificate shall issue to the same person. All certificates are valid only in the county, and a fee of $1 shall be charged, which shall go to defray the cost of teachers' institutes. A temporary certificate or permit may be granted once to the same person by the county superintendent, in case of necessity, valid until the next quarterly examination.

In cities or incorporated places of more than 4,000 inhabitants there shall be a board of examiners of which the county superintendent shall be ex officio chairman, but the certificate issued by such board shall not be valid outside the city or incorporated place.

If a holder of a first-grade certificate shall have taught acceptably for three years in the public schools of the State and be recommended by the county superintendent and the board of county examiners he shall be entitled to a first-grade State certificate, and teachers who hold State certificates and have taught four years acceptably in the schools of the State shall receive a State diploma on passing an examination in bookkeeping, composition, and physical geography, and are recommended by the county superintendent and county board of examiners. Teachers holding a State diploma and the graduates of colleges and universities of the State having taught not fewer than six years successfully in the public schools of the State shall be entitled to receive a State life diploma on passing an examination in the additional branches of algebra, English literature, Oregon school law, and general history, and presenting a recommendation from the county superintendent or the board of county examiners. The questions used in the examinations for State diplomas shall be of the same grade as those commonly used in State examinations, and shall be furnished by the State board of education.

The State board of education shall sit as a board of examination at its semi-annual meetings and grant life diplomas, State certificates, and two grades of certificates of the same force as those granted by the county superintendents. Life diplomas shall entitle the holder to teach in any public school in the State during the life of the holder; a State diploma shall entitle the holder to teach in any public school in the State for a period of six years. A State certificate of the first grade shall be good in any county for two years, and one of the second grade good in any county for six months. The fees charged shall be: For a State life diploma, $10; for a State diploma, $6; for State certificate, first grade, $4; for State certificate, second grade, $2.50; which shall constitute a fund for paying the expenses of such assistants in conducting the examination as the board may deem proper, but they shall not be fewer than four.

Preliminary training.—The control of the State normal schools, except that at Monmouth and that at Westor, shall be vested in a board of trustees for each. The course of study shall be prescribed by the joint action of the State board of education, and the president of each school. Persons who complete the required course and pass an examination approved by the State board shall be entitled to a State diploma, and after six years of acceptable teaching in the State shall be entitled to the State life diploma, provided they are, if men, over 21 years of age, and if women 18, and have attended the normal schools for a period of not less than one year. The board of trustees may extend the course of study so as to include the branches of a college course and confer degrees in the same, but the extended curriculum shall not interfere with the proper work of the school. Model training schools for professional practice in teaching shall be maintained in these normal schools.

The school at Monmouth and that at Westor shall be each under the complete control of a board of regents appointed by the governor, except that the board for Monmouth shall include the members of the State board of education. The board of regents confers diplomas, but the State board licenses to teach.

Meetings.—The county superintendent shall hold annually a teachers' county

institute for a term of not less than three days for the instruction of teachers and those desiring to teach, and all teachers in the public schools of the county shall be required to attend, and the county superintendent may revoke the certificate, reduce the grade, or refuse to grant a certificate to any teacher who refuses to attend the county institute without cause. Any teacher having closed school not more than two days in order to attend an institute shall receive pay for the same. The sum drawn from the county treasury to defray the cost of the institute shall not exceed the amount to the credit of the institute fund. In order to develop to a higher degree the work of public education the county superintendent shall organize local institutes and educational meetings in various parts of his county and for this purpose he shall receive a per diem of $3.

The State superintendent shall call district and State meetings of the several county superintendents for the purpose of considering the best manner of conducting schools, school management, duties of teachers, school officers, and superintendents, methods of teaching, the merits of mixed and graded schools, etc.

3. Schools.

Attendance.—Character of instruction.—Text-books.

Attendance.—Schools supported by a tax upon the district shall be free to all persons 4 to 21 where there are kindergartens, and 6 to 21 in districts not having kindergartens, and under penalty of forfeiture of State apportionment shall be open for at least sixty days.

Every parent, guardian, or other person in this State having control or charge of a child or children between the ages of 8 and 14 years shall be required to send such child or children to a public school for a period of at least twelve weeks in every school year, of which at least eight weeks' school shall be consecutive, unless the bodily or mental condition of such child or children has been such as to prevent his or her or their attendance at school or application to study for the period required, or unless such child or children are taught in a private school or at home in such branches as are usually taught in primary schools or have already acquired the ordinary branches of learning taught in the public schools: *Provided*, In case a public school shall not be taught for the period of twelve weeks, or any part thereof, during the year, within 2 miles by the nearest traveled road of the residence of any person within the school district, he or she shall not be liable to the provisons of this act.

Any parent, guardian, or other person having control or charge of any child or children failing to comply with the provisions of this act shall be liable to a fine of not less than $5 nor more than $25 for the first offense, nor less than $25 nor more than $50 for the second and each subsequent offense, besides the cost of the prosecution.

It shall be the duty of the directors and clerk of each school district to make diligent effort to see that this law is enforced in their respective districts.

Justices of the peace shall have concurrent jurisdiction with the circuit court in all prosecutions under the foregoing provisions regarding attendance.

Character of instruction.—All persons applying for certificates with the intention of teaching shall be examined in the following branches: Orthography, reading, writing, mental arithmetic, written arithmetic, English grammar, geography, modern history, theory of teaching, physiology, hygiene. The directors of any school district in the State which shall contain 500 inhabitants or more may, when authorized thereto by the qualified electors of such district, provide for the establishment and maintenance therein, as a part of the common-school system, of kindergartens. The directors of any school district containing 10,000 inhabitants or more may, upon petition of not fewer than 100 residents and qualified voters, provide that one or more of the common schools to be kept in that district shall be taught in the German language, and the teachers employed in such school or schools, in addition to other qualifications required of teachers under the existing school laws, shall be educated in the German language and qualified to teach the same. It shall be the duty of the teacher, under the direction of the board, to determine what branches shall be pursued by each pupil; but when practicable the county superintendent shall prescribe a course of study for county schools. In cities and incorporated towns of over 4,000 the board of directors prescribe the course of study and grade the schools.

Text-books.—The State superintendent shall, under the direction of the State board of education, issue a circular to each county superintendent and to each member of the State board of examiners (assistants?) containing a list of studies

required to be taught in the public schools, together with the wholesale, retail, exchange, and introductory prices of all books in the list. Each county superintendent and State examiner shall write opposite each study the text-book or series of text-books preferred, and when returned the State superintendent shall lay the answered circulars before the State board, and the text-book or series of text-books in any one branch receiving the majority of all the votes of the voters shall be the authorized text-book or series of text-books in that branch in the public schools of this State for six years next succeeding the official announcement of the superintendent of public instruction: *It is further provided*, That the publishers of the text-books or series of text-books that may be adopted under this act shall be required to file a good and sufficient bond for the performance of any or all of agreements made with them by the State board of education that they shall maintain the wholesale and retail prices for the period of their adoption, which prices shall be named in the proposals of publishers to the State board of education prior to the adoption of such text-book: *And it is further provided*, That publishers shall also file with each county superintendent and member of the State board of examiners a copy of the proposals furnished to and for the consideration of the State board of education, and also that the publishers (whose books are adopted) shall be required to place a printed card in each schoolhouse giving the wholesale and retail prices of all books published by them and selected for use in the public schools of this State: *Provided further*, That the said State board of education shall, prior to said election, issue a circular to all of the leading schoolbook publishers in the United States, which circular shall set forth all the details relative to said introduction of text-books for use in the public schools of Oregon, as said State board of education may deem for the best good of the public service, and said circular of the State board of education to publishers shall set forth all requirements in detail, as follows:

Relative to such samples of text-books as shall be forwarded by them to the State board of education, county superintendents, and State board of examiners for examination with a view to introduction.

The wholesale, retail, exchange, and introductory rates which publishers shall submit to the said members of the State board of education, county superintendents, and State examiners, also all copies of bids and propositions to be made by the said publishers to the State board of education, county superintendents, and State examiners: *Provided further*, That the said State board of education shall prepare and submit to all publishers competing such uniform schedules of price lists with which said publishers must comply in entering into competition for such adoption of text-books: *Provided further*, That the said State board of education may require said publishers to establish at such convenient points in this State principal depots of supply or depositories for general distribution of text-books: *And provided further*, That they may require said publishers to establish in each county sufficient and suitable depositories whereby all the wants of school patrons and school children may be supplied: *And it is further provided*, That said publishers, in competing for said election of text-books for use in the public schools of this State, must comply with all the rules and regulations relative thereto made by the said State board of education of the State of Oregon; and for which purpose and to secure full compliance with the same, the said State board of education shall require of said publishers such bonds as they may deem reasonable and sufficient for carrying out said rules and requirements.

If no text-book or series of text-books in any one branch shall receive a majority of the votes of the county superintendents and State examiners, then the superintendent of public instruction shall immediately report to the county superintendents and members of the State board of examiners the two text-books receiving the highest number of votes, and from them the superintendents and State examiners shall forthwith make a selection and transmit their votes to the superintendent of public instruction, which votes shall be canvassed and the result announced as above, and the text-books or series of text-books so selected shall be authorized text-books as provided by this act.

It is hereby provided that the superintendent of public instruction shall issue the next circular under this act within six years after the selection of text-books made in the year 1888, and shall issue a similar circular every six years thereafter, and require answer on or before the 1st day of January following, and immediately lay such answer before the State board of education, who shall canvass the answers and ascertain the series of text-books desired, and shall instruct the secretary of the board to officially inform each county superintendent of the result of such vote; and the county superintendents shall immediately instruct the district officers in their respective counties of the series of text-books authorized under this act; and it is hereby provided that said series shall be introduced in all the public

schools of this State on or before the 1st day of October next after the canvass of such vote by the State board of education in accordance with the provisions for changing text-books; and any district neglecting to provide for the introduction of the authorized series of text-books shall forfeit its proportion of the school fund for the succeeding year and every year thereafter until all of said series are introduced; provided that when the persons in any school district between the ages of 4 and 20 shall equal 1,000 or more the directors shall have the right to select text-books for the high schools only, but no change in the text-books shall be made at any other time than that provided in this act; provided further, that the State board of education may order the State superintendent to issue special circulars to the county superintendents and State examiners to select, as in the regular vote, any new text-books or series of text-books in use when, in the judgment of the State board, any text-books or series of text-books in use is supplied at an unreasonably high price or is found to be excelled by more recent publications in that branch or for any good and sufficient cause, and the voters shall each report their choice, and the text-book or books so adopted shall be introduced into the public schools within six months. Any district neglecting to provide for the introduction of such books shall forfeit its share of the State apportionment.

Buildings.—The power to locate and the care of schoolhouses is vested in the board of directors, and it shall be its duty to prosecute any person who shall willfully write or make marks upon the walls or other parts of any schoolhouse or furniture thereof.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The proceeds of all the lands which have been or hereafter may be granted to this State for educational purposes (excepting the lands heretofore granted to and [aid] in the establishment of a university); all the moneys and clear proceeds of all property which may accrue to the State by escheat or forfeiture; all moneys which may be paid as exemption from military duty; the proceeds of all gifts, devises, and bequests made by any person to the State for common-school purposes; the proceeds of all property granted to the State when the purposes of such grant shall not be stated; all the proceeds of the 500,000 acres of land to which this State is entitled by the provisions of an act of Congress entitled "An act to appropriate the proceeds of the sales of the public lands and to grant preemption rights," approved September 4, 1841. Ten per cent of all moneys hereafter received (1878) from the sale of swamp and overflowed and tide lands granted to the State by the United States, and also the 5 per cent of the net proceeds of the sales of the public lands to which this State shall become entitled on her admission into the Union (if Congress shall consent to such appropriation of the two grants last mentioned), shall be set apart as a separate and irreducible fund, to be called the common-school fund, the interest of which, together with all other revenues derived from the school lands, shall be exclusively applied to the support and maintenance of common schools in each school district and the purchase of suitable libraries and apparatus therefor.

Provision shall be made by law for the distribution of the income of the common-school fund among the several counties of the State in proportion to the number of children resident therein between the ages of 4 and 20 years.

The governor, secretary of state, and State treasurer shall constitute a board of commissioners for the sale of school and university lands, and for the investment of the funds arising therefrom, and their powers and duties shall be such as may be prescribed by law; provided that no part of the university funds, or of the interest arising therefrom, shall be expended until the period of ten years from the adoption of this constitution, unless the same shall be otherwise disposed of by the consent of Congress for common school purposes.

Taxation.—The county courts of the several counties of this State are hereby required to levy, at the same time they levy other taxes, a tax upon all taxable property in their counties for school purposes, "which shall aggregate an amount which shall be as much or more per capita for each and all of the children within the county between the ages of 4 and 20 years, as shown by the then last preceding school census, as the aggregate amount of the school tax levied in the county for the year 1892 amounted per capita for each and all of the children between the ages of 4 and 20 years then in the county, as shown by the school census next preceding the time of the levy of such tax for said year 1892, which shall be collected at the same time, in the same manner, and by the same officers that other taxes shall be collected."

The county superintendent shall, on the third Monday in April and the third Monday in August of each year, make an apportionment of the entire school fund

then in the county treasury in the following manner: Of the school fund in the treasury of his county that has been collected in pursuance of the school-tax levy of the county court of his county he shall apportion the sum of $50 once a year to each of the several districts of his county that has reported to him as required by law, and all the balance of the school funds of whatever nature thereafter remaining in the treasury of his county shall be apportioned by him among the several districts of his county that have reported to him as required by law in proportion to the number of persons in each district over the age of 4 years and under 20 years; provided that if at the time of making such apportionment there shall not be a sufficient sum of money in the treasury of his county of the school funds collected in pursuance of the school-tax levy of the county court of his county to enable him to apportion to each district in his county that has reported to him as required by law the sum of $50, then in that case he shall apportion the entire amount of the school fund then in the treasury that has been collected in pursuance of the school-tax levy of the county court of his county pro rata among such districts of his county as have reported to him according to law. All the taxes hereafter levied by any school district or incorporated town or city shall be levied upon the property therein respectively assessable upon the valuation of such property as shown by the assessment roll last compiled before said levy is made in the county in which such school district or incorporated town or city is included.

On petition of 10 legal voters of the district the board of directors may submit the question to the electors as to the issuance of bonds at 8 per cent interest annually and redeemable at pleasure after ten years and payable in twenty, but the amount of the bonded debt shall not exceed 5 per cent of the value of taxable property in the district.

CALIFORNIA.

1. Organization of the System.

State board of education.—State superintendent of public instruction.—County board of trustees of the "School Teachers' Annuity and Retirement Fund."—County board of education.—County superintendent of schools.—District board of school trustees.—City board of education.

State board of education.—The State board of education shall be the governor, the president of the university of California, the professor of pedagogy in that institution, the State superintendent, and the principals of the State normal schools, the governor being president and the superintendent secretary of the board. The duties of the board are to adopt regulations for the government of the public schools and the district school libraries; to grant diplomas entitling the holder to teach; to have done by the State printer or other officer having the management of the State printing any printing required by it, provided that all orders for printing shall first be approved by the State board of examiners; and to designate some educational monthly journal as the official organ of the department of public instruction. One copy of the journal so designated shall be furnished by the county superintendent to the clerk of each board of district trustees, to be placed by him in the district library, and the county superintendent of schools shall draw his warrant semiannually in favor of the publishers of such school journal for a sum not exceeding $1.50 a district for each school year and charge the same to the library fund of the district. The actual traveling expenses of the members incurred in attending the meetings of the board shall be paid out of the general fund in the State treasury.

State superintendent of public instruction.—Every four years there shall be elected a State superintendent of public instruction, whose duty shall be, First. To superintend the schools of this State. Second. To report to the governor, on or before the 15th day of September preceding each regular session of the legislature, a statement of the condition of the State normal schools and other educational institutions supported by the State, and of the public schools. Third. To accompany his report with tabular statements, showing the number of school children in the State; the number attending public schools, and the average attendance; the number attending private schools, and the number not attending schools; the amount of State school fund apportioned, and the sources from which derived; the amount raised by county and district taxes, or from other sources of revenue, for school purposes; and the amount expended for salaries of teachers, for building schoolhouses, for district school libraries, and for incidental expenses. Fourth. To apportion the State school fund, and to furnish an abstract of such apportionment to the State comptroller, the State board of examiners, and to the county audi-

tors, county treasurers, and county superintendents of the several counties of the State. Fifth. To draw his order on the comptroller in favor of each county treasurer for school moneys apportioned to the county. Sixth. To prepare, have printed, and furnish all officers charged with the administration of the laws relating to the public schools, and to teachers, such blank forms and books as may be necessary to the discharge of their duties, including blank teachers' certificates to be used by county boards of education. Seventh. To have the laws relating to the public schools printed in pamphlet form, and to supply school officers and school libraries with one copy each. Eighth. To visit the several orphan asylums to which State appropriations are made, and examine into the course of instruction therein. Ninth. To visit the schools in the different counties, and inquire into their condition; and the actual traveling expenses thus incurred (provided that they do not exceed $1,500 per annum) shall be allowed, audited, and paid out of the general fund in the same manner as other claims are audited and paid. Tenth. To authenticate with his official seal all drafts or orders drawn by him, and all papers and writings issued from his office. Eleventh. To have bound, at the State bindery, all valuable school reports, journals, and documents in his office, or hereafter received by him. Twelfth. To report to the comptroller, on or before the 10th day of July of each year, the total number of children in the State between the ages of 5 and 17 years, as shown by the latest reports of the county superintendents on file in his office. Thirteenth. To deliver over, at the expiration of his term of office, on demand to his successor, all property, books, documents, maps, records, reports, and other papers belonging to his office, or which may have been received by him for the use of his office.

He shall have power to call, biennially, a convention of the county and city superintendents, to assemble at such time and place as he shall deem most convenient, for the discussion of questions pertaining to the supervision and administration of the public schools, the expenses of the superintendents being met by the State.

County board of trustees of the school teachers' annuity and retirement fund.—[As this digest goes through the press opportunity is given of mentioning the law of 1895 which creates a public school teachers annuity and retirement fund, administered by a board composed of the superintendent of the county, the county treasurer, and the chairman of the county board of supervisors. Full particulars will appear in next report.]

County board of education.—Except in cities and counties determining otherwise,[1] there shall be a county board of education to consist of the county superintendent of schools and four other members appointed by the board of supervisors, but two at least of the appointed members shall be experienced teachers holding not lower than a grammar grade certificate in force. Each board shall meet semiannually, at such time as they may determine. Special meetings may be called by the superintendent whenever in his judgment the exigencies of the schools may require them to be held.

Examination of applicants for teachers' certificates shall be held only at the semiannual meetings of the board. Certificates upon credentials may be granted, and certificates may be renewed at any meeting of the board.

The board of supervisors shall allow to each member of the county board of education a compensation of $5 per day for his services, and the same rate of mileage as is allowed to the members of the board of supervisors of the county. The secretary shall be allowed the sum of $5 per day for the actual time that the board may be in session; said compensation of the members of the board, and of the superintendent, shall be payable out of the same fund and in the same manner as the salary of the county superintendent.

The board shall have power to examine teachers, and grant certificates, to prescribe and enforce the use of a uniform series of text-books and a course of study in the public schools, and adopt a list of books and apparatus for district school libraries, to issue diplomas of graduation from any of the public schools of the county, except in incorporated cities having boards of education.

County superintendents of schools.—Every four years there shall be elected a county superintendent of schools, whose duty shall be to superintend the schools of his county; to apportion the school moneys to each school district at least four times a year; to draw upon the county auditor for the sums due district or city schools; to keep, open to the inspection of the public, a register of requisitions, showing the fund upon which the requisitions have been drawn, the number

[1] The constitution contains a provision that city and county governments may be merged and consolidated into one municipal government, with one set of officers and may be incorporated under general laws providing for the incorporation and organization of corporations for municipal purposes.

thereof, in whose favor, and for what purpose they were drawn, and also a receipt from the person to whom the requisition was delivered; to visit and examine each school in his county at least once in each year, and for every school not so visited the board of supervisors must, on proof thereof, deduct $10 from his salary; to preside over teachers' institutes held in his county, and to secure the attendance thereat of lecturers competent to instruct in the art of teaching, and to report to the county board of education the names of all teachers in the county who fail to attend regularly the sessions of the institute; to enforce the course of study, the use of text-books, and the rules and regulations for the examination of teachers prescribed by the proper authority. He shall have power to issue, if he deem it proper to do so, temporary certificates, valid until the next semiannual meeting of the county board of education, to persons holding certificates of like grade granted in other counties, cities, or cities and counties, or upon any certificates or diplomas upon which county boards are empowered to grant certificates without examination, but no person shall receive such certificate more than once in the same county. He shall distribute all laws, reports, circulars, instructions, and blanks which he receives for the use of school officers; keep in his office the reports of the superintendent of public instruction; keep a record of his official acts, and of all the proceedings of the county board of education, including a record of the standing, in each study, of all applicants examined, which shall be open to the inspection of any applicant or his authorized agent; pass upon and approve or reject all plans for school-houses, except in incorporated cities having boards of education, (and to enable him to do so, all boards of trustees, before adopting any plans for school buildings, must submit the same to the county superintendent for his approval); appoint trustees to fill all vacancies, to hold until the 1st day of July succeeding such appointment; when new districts are organized, shall appoint trustees for the same, who shall hold office until the 1st day of July next succeeding their appointment; make reports, when directed by the superintendent of public instruction, showing such matters relating to the public schools in his county as may be required of him, and failure to do so causes him to lose $100 of his salary; preserve carefully all reports of school officers and teachers, and, at the close of his official term, deliver to his successor all records, books, documents, and papers belonging to the office, taking a receipt for the same, which will be filed in the office of the county clerk. He shall, unless otherwise provided by law, in the month of July of each year, grade each school, and a record thereof shall be made in a book to be kept by the county superintendent in his office for this purpose.

His traveling expenses shall be paid, provided they do not exceed $10 a district in the year. No superintendent who receives an annual salary of $1,500 or more may follow the profession of teaching or any vocation that can conflict with his duties as superintendent. The county superintendent may appoint a deputy, but the deputy shall receive no compensation.

District board of school trustees and city board of education.—No new school district shall be formed unless the parents or guardians of at least 15 children of school age, residents of the contemplated district and residing a greater distance than 2 miles by a traveled road from the public schoolhouse in the district in which said parents or guardians reside, present a petition to the county superintendent. Every city or incorporated town, unless subdivided by the legislative authority, shall constitute a separate school district, which shall be governed by the board of education or board of school trustees.

An election for school trustees must be held in each school district on the first Friday of June of each year, at the district schoolhouse, if there is one, and if there is none, at a place to be designated by the board of trustees. The number of school trustees for any school district, except where city boards are otherwise constituted by law, shall be three, each to serve three years.

Boards of education are elected in cities under the provisions of the laws governing such cities, and their powers and duties are as prescribed in such laws, except as otherwise provided. The powers and duties of trustees of school districts and of boards of education in cities are as follows:

First. To prescibe and enforce rules, not inconsistent with law or those prescribed by the State board of education, for their own government and government of schools, and to transact their business at regular or special meetings called for such purpose, notice of which shall be given each member.

Second. To manage and control the school property within their districts, and to pay all moneys collected by them, from any source whatever, for school purposes into the county treasury; to be placed to the credit of the special fund of their districts.

Third. To purchase text-books of the State series for the use of pupils whose parents are unable to purchase them; school furniture, including organs and

pianos, and apparatus and such other things as may be necessary for the use of schools: *Provided*, That, except in incorporated cities having boards of education, they purchase such books and apparatus only as have been adopted by the county board of education.

Fourth. To rent, furnish, repair, and insure the school property of their respective districts.

Fifth. When directed by a vote of their district, to build schoolhouses or to purchase or sell school lots.

Sixth. To make, in the name of the district, conveyances on all property belonging to the district and sold by them.

Seventh. To employ the teachers and, excepting in incorporated cities having boards of education, immediately notify the superintendent of schools, in writing, of such employment, naming the grade of certificate held by the teachers employed; and to employ janitors and other employees of the schools; to fix and order paid their compensation, unless the same be otherwise prescribed by law: *Provided*, That no board of trustees shall enter into any contract with such employees to extend beyond the 30th day of June next ensuing.

Eighth. To suspend and expel pupils for misconduct.

Ninth. To exclude from schools children under 6 years of age: *Provided*, That in cities and towns in which the kindergarten has been adopted, or may hereafter be adopted, as a part of the public primary schools children may be admitted to such kindergarten classes at the age of 4 years.

Tenth. To enforce in schools the course of study and the use of text-books prescribed and adopted by the proper authority.

Eleventh. To appoint district librarians and enforce the rules prescribed for the government of district libraries.

Twelfth. To exclude from school and school libraries all books, publications, or papers of a sectarian, partisan, or denominational character.

Thirteenth. To furnish books for the children of parents unable to purchase them, the books so furnished to belong to the school district and to be kept in the district school library when not in use.

Fourteenth. To keep a register, open to the inspection of the public, of all children applying for admission and entitled to be admitted into the public schools, and to notify the parents or guardians of such children when vacancies occur, and receive such children into the schools in the order in which they are registered.

Fifteenth. To permit children from other districts to attend the schools of their district only upon the consent of the trustees of the district in which such children reside: *Provided*, That should the trustees of the district in which children whose parents or guardians desire them to attend in other districts reside refuse to grant their consent, the parents or guardians of such children may appeal to the county superintendent, and his decision shall be final.

Sixteenth. On or before the 1st day of April in each year to appoint a school census marshal, and notify the superintendent of schools thereof, but in any city, or city and county, the appointment of all school census marshals shall be subject to the approval of the city superintendent of schools. In case of failure to so appoint marshals the board are jointly and severally liable for the amount the district loses of the apportionment of school moneys.

Seventeenth. To make an annual report on or before the 1st day of July to the superintendent of schools, in the manner and form and on the blanks prescribed by the superintendent of public instruction.

Eighteenth. To make a report, whenever required, directly to the superintendent of public instruction, of the text-books used in their schools.

Nineteenth. To visit every school in their district at least once in each term, and examine carefully into its management, condition, and wants. This clause to apply to each and every member of the board of trustees.

Twentieth. Boards of trustees may, and upon a petition signed by a majority of the heads of families resident in the district, as shown by the last preceding school census, must, call meetings of the qualified electors of the district for determining or changing the location of the schoolhouse or for consultation in regard to any litigation in which the district may be engaged or be likely to become engaged, or in regard to any affairs of the district. The board must sustain all the schools established by them for an equal length of time, and as far as practicable with equal rights and privileges.

The census marshal shall annually take an enumeration of all children, including Indians who pay taxes or who are not living in tribal relation, under 17 years of age.

2. Teachers.

Appointment, qualifications, and duties.—Preliminary training.—Meetings.

Appointment, qualifications, and duties.—Every teacher shall, previous to entering upon duty, file a valid certificate with the county superintendent of schools, and show that he is 18 years of age or more.

The State board of education shall have power to grant the following certificates:

Educational diplomas of two grades, valid throughout the State for the period of six years, as follows:

1. High school; authorizing the holder to teach in any primary or grammar school, and in any high school in which said holder is not required to teach languages other than the English.

2. Grammar school; authorizing the holder to teach in any primary or grammar school.

Life diplomas of two grades, valid throughout the State, as follows:

1. High school; authorizing the holder to teach in any primary or grammar school, and in any high school in which said holder is not required to teach languages other than the English.

2. Grammar school; authorizing the holder to teach in any primary or grammar school.

Diplomas may be issued only to such persons as have held for one year, and who still hold, a valid city, city and county, or county certificate corresponding in grade to the grade of the diploma applied for, and who shall furnish satisfactory evidence of having had a successful experience in teaching of at least five years when applying for an educational diploma, and of at least ten years when applying for a life diploma. Every application to the State board of education must be accompanied by a certified copy of a resolution adopted by at least a four-fifths vote of all the members composing a city or county board of education, recommending that the diploma be granted, and also by an affidavit of the applicant specifically setting forth the places in which and the dates between which said applicant has taught, and that said applicant has taught a part of each year for five or ten calendar years, respectively. The five or ten years need not be consecutive years, but the aggregate experience must be at least thirty-five months for an educational and seventy months for a life diploma; and in either case the applicant must have had twenty-one months' experience in the public schools of California. The application must also be accompanied by a fee of $2, for the purpose of defraying the expense of issuing the diploma.

To revoke or suspend for immoral or unprofessional conduct or for evident unfitness for teaching life diplomas or educational diplomas heretofore issued or that may hereafter be issued, and to adopt such rules for the revocation of diplomas as they may deem expedient or necessary.

Except as provided below, certificates shall be granted only to those who have passed a satisfactory examination in all the studies prescribed by the county board of education: *Provided*, That applicants for primary county certificates shall be required to pass an examination only in arithmetic, grammar, geography, composition, history of the United States, orthography, defining, penmanship, reading, methods of teaching, school law, industrial drawing, physiology, civil government, elementary bookkeeping, and vocal music.

All examinations shall be in writing, in answer to questions formulated by the board of education. The said board shall also examine all applicants orally touching the questions asked and upon other matters in connection therewith as shall have a tendency to demonstrate the fitness of the applicant to assume the duties of teacher. The said board shall ask questions of practical utility, with a view of ascertaining the knowledge and ability of the applicant. All examinations shall be public. The standing of each applicant in each study and in the class must be indorsed on the back of each certificate issued upon examination; otherwise it is not a valid certificate.

The board may, without examination, grant county certificates of either the grammar or the primary grade to the holders of life diplomas of other States: to holders of Nevada, Oregon, and Washington State educational diplomas, of San Francisco normal class diplomas when recommended by the superintendent of public schools of said city, of California State University diplomas when recommended by the faculty of the university, of State normal school diplomas of other States, of grammar grade certificates of any county, city, or city and county of California, and county certificates of the high-school grade, and to graduates of any other institution in the United States which the State board of education of this State shall have recommended as being of the same rank as the State University of Califor-

nia when the diploma of graduation from said institution shall be accompanied by a recommendation from the faculty thereof showing that the holder of the diploma has had academic and professional training equivalent to that required by the State university. The general conditions on which such recommendations may be accepted by the county boards of education as fulfilling these requirements shall be prescribed by the State board of education.

Whenever any holder of a diploma from the State University shall present to the State board of education satisfactory evidence of having had two years' successful experience as a teacher subsequent to graduation, accompanied by a recommendation from the faculty of the State University, showing that said graduate has completed the prescribed course in the pedagogical department of the State University, the State board of education shall grant to the holder of said university diploma a document signed by the president and secretary of the State board showing such fact, and the said diploma, accompanied by said document of the State board attached thereto, shall become a permanent certificate of qualification to teach in any primary, grammar, or high school in the State, valid until such time as the said document shall be revoked by said State board of education for cause.

The board may, without examination, renew unexpired certificates previously granted by said board; such renewed certificates to remain valid for the same length of time for which new certificates may be granted; and the grammar grade and primary certificates issued or renewed by the county board of education shall entitle the holders thereof to teach in any city or district school in the county, in grades corresponding to the grades of their certificates: *Provided*, That in cities having special departments in their schools, holders of credentials mentioned above may be examined by the city board of examination in the special studies of such departments. County boards of education may issue, upon proper examination or credentials, special certificates in any special branches taught in the schools of the county. All certificates must be issued upon the blank forms prepared for the purpose by the superintendent of public instruction.

In every city or city and county of the first, second, or third class having a board of education there may be a city board of examination, consisting of the city superintendent and four other members, residents of the city, all of whom shall be experienced teachers elected by the city board and shall hold office for two years. The duty of the board shall be to examine applicants and to prescribe a standard of proficiency which will entitle the person examined to receive (1) a high-school certificate, valid for six years, and authorizing the holder to teach any primary, grammar, or high school in such city; (2) a city certificate, grammar grade, valid for six years, authorizing the holder to teacher any primary or grammar school in such city; (3) a city certificate, primary grade, valid for two years, authorizing the holder to teach any primary school in such city. They shall report the result of the examination to the city board of education; and said board of education shall thereupon issue to the successful candidates the certificates to which they shall be entitled. The board shall recommend applicants for special certificates, valid for a period not to exceed six years, upon such special studies as may be authorized by the city board of education of such city.

City or city and county boards of examination may also recommend the granting of city certificates, and the renewal thereof, in the manner provided for the granting and renewal of county certificates by the county board of education.

The holders of city certificates are eligible to teach in the cities in which such certificates were granted, in schools of grades corresponding to the grades of such certificates.

The teacher shall enforce the course of study, the use of the legally authorized text-books, and the rules and regulations prescribed for schools; hold pupils to a strict account for their conduct on the way to or from school, on the playgrounds, or during recess; suspend, for good cause, any pupil from the school, and report such suspension to the board of school trustees or city board of education for review, and if such action is not sustained by them, the teacher may appeal to the county superintendent, whose decision shall be final; keep a State school register, in which shall be left at the close of the term a report showing programme of recitations, classification, and grading of all pupils who have attended school at any time during the school year and the superintendent shall in no case draw a requisition in favor of the teacher until the teacher has filed with him a certificate from the clerk of the board of school trustees to the effect that the provisions of this subdivision have been complied with; make an annual report to the county superintendent at the time and in the manner and on the blanks prescribed by the superintendent of public instruction. Any teacher who shall end any school term before the close of the school year shall make a report to the county superin-

tendent immediately after the close of such term; and any teacher who may be teaching any school at the end of the school year shall, in his or her annual report, include all statistics for the entire school year, notwithstanding any previous report for a part of the year, and the superintendent of schools shall in no case draw a requisition for the salary of any teacher for the last month of the school term until the report required by this subdivision has been filed, and by him approved; make such other reports as may be required by the superintendent of public instruction, county superintendent, board of school trustees, or city board of education.

Preliminary training.—The State normal schools have for their objects the education of teachers for the public schools of the State. They shall be under the management and control of boards consisting of five members, called trustees, who shall have the following powers and duties: To elect a secretary, who shall receive such salary, not to exceed $150 per annum, as may be allowed by the board; to prescribe rules for their own government and for the government of the school; to prescribe rules for the reports of officers and teachers of the school, and for visiting other schools and institutes; to provide for the purchase of school apparatus, furniture, stationery, and text-books for the use of the pupils; to establish and maintain training or model schools, and require the pupils of the normal school to teach and instruct classes therein; to elect a principal and other necessary teachers, fix their salaries, and prescribe their duties; to issue diplomas of graduation upon the recommendation of the faculty of the school having the force of grammar grade certificate; to control and expend all moneys appropriated for the support and maintenance of the school, and all money received from tuition or from donations; to cause a record of all their proceedings to be kept, which shall be open to public inspection at the school; to keep, open to public inspection, an account of receipts and expenditures; to annually report to the governor a statement of all their transactions, and of all matters pertaining to the school; to transmit with such report a copy of the principal teacher's annual report.

The age of admission is 16 years. Teachers holding first or second grade certificates may be admitted from the State at large. Every person making application for admission as a pupil in the normal school must file a declaration that he enters the school to fit himself for teaching and that it is his intention to engage in teaching in the public schools of the State.

The boards of the several schools shall hold joint meetings, at which the text-books and course of study to be used in the normal schools are to be selected.

Meetings.—The superintendent of every county in which there are twenty or more school districts, and of every city and county in the State, must hold at least one teachers' institute in each year; and every teacher employed in a public school in the county must attend such institute and participate in its proceedings: *Provided*, That cities employing seventy or more teachers may have a separate institute, to meet at least once a year, the sessions to be of not less than three nor more than five days: *And provided further*, That teachers attending such city institute shall not be required to attend the county institute. The expenses of such city institutes, not exceeding $200 annually, shall be paid from the special school funds of said city.

In any county in which there are less than 20 school districts, the county superintendent may, in his discretion, hold an institute. When directed by the county board of education, he shall hold an institute not oftener than once each year, at such time and place as the board may direct. Each session of the institute must continue not less than three nor more than five days. When the institute is held during the time that teachers are employed in teaching, their pay must not be diminished by reason of their attendance. The county superintendent must keep an accurate account of the actual expenses of said institute, with vouchers for the same, and draw his requisition upon the county auditor, who shall draw his warrant on the unapportioned county school fund to pay said amount: *Provided*, That such amount must not exceed $200 for any one year.

For public school teachers' retirement and annuity fund, see under Organization of system.

3. Schools.

Attendance.—Character of instruction.—Text-books.—Buildings.

Attendance.—Every school, unless otherwise provided by law, must be open for the admission of all children between 6 and 21 years of age residing in the district, and the board of school trustees, or city board of education, have power to admit adults and children not residing in the district whenever good reasons exist therefor. Whenever there is sufficient money in the fund of any school district to

support school for six months the county superintendent shall have school kept if the district fail to. Trustees shall have the power to exclude children of filthy or vicious habits, or children suffering from contagious or infectious diseases, and also to establish separate schools for Indian children and for children of Mongolian or Chinese descent. When such separate schools are established, Indian, Chinese, or Mongolian children must not be admitted into any other school: *Provided*, That in cities and towns in which the kindergarten has been adopted, or may hereafter be adopted as part of the public primary schools, children may be admitted to such kindergarten classes at the age of 4 years.

Every parent, guardian, or other person in the State of California having control and charge of any child or children between the ages of 8 and 14 years shall be required to send any such child or children to a public school for a period of at least two-thirds of the time during which a public school shall be taught in such city, or city and county, or school district, in each school year, commencing on the 1st day of July, in the year of our Lord 1874, at least twelve weeks of which shall be consecutive, unless such child or children are excused from such attendance by the board of education of the city, or city and county, or of the trustees of the school district in which such parents, guardians, or other persons reside, upon it being shown to their satisfaction that his or her bodily and mental condition has been such as to prevent attendance at school or application to study for the period required, or that the parents or guardians are extremely poor or sick, or that such child or children are taught in a private school or at home in such branches as are usually taught in the primary schools of this State, or have already acquired a good knowledge of such branches: *Provided*, In case a public school shall not be taught for three months during the year within 1 mile by the nearest traveled road of the residence of any person within the school district, he shall not be liable.

It shall be the duty of the president of each board of education and of the clerk of each board of district trustees in the State of California to cause to be posted three notices of this law in the most public places in the city, or city and county, or in the school district, or published in one newspaper therein for three weeks, in the month of June, in each year, the expenses of each publication to be paid out of the school fund of such city, or city and county, or school district, as the case may require.

In case any parent, guardian, or other person shall fail to comply with the provisions of this act, said parent, guardian, or other person shall be deemed guilty of a misdemeanor, and shall be liable to a fine of not more than $20; and for the second and each subsequent offense the fine shall not be less than $20 nor more than $50; and the parent, guardian, or other person so convicted shall pay all costs. Each such fine shall be paid to the clerk of the proper board of education or of the district trustees.

The district board shall exclude from schools children under 6 years of age: *Provided*, That in cities and towns in which the kindergarten has been adopted, or may hereafter be adopted, as a part of the public primary schools, children may be admitted to such kindergarten classes at the age of 4 years.

And it shall be the duty of the clerk of each board of education and of each board of district trustees, on complaint of any teacher or taxpayer, to prosecute all offenses occurring under the provisions of this act; and any clerk neglecting to prosecute such offense within ten days after a written notice has been served on him by any teacher or taxpayer within the limits of the authority of said board, unless the person so complained of shall be excused by the proper school board, shall himself be liable to a fine of not less than $20 nor more than $50, which fine shall be prosecuted for in the name of the people of the State of California, and the fine so collected shall be paid over to the clerk of the board of education or trustees of the proper city, or city and county, or school district, to be accounted for as in section 3 of this act; and in case such prosecution fail, the expenses thereof shall be paid out of the school fund of the city, or city and county, or school district in which the case arose.

And it shall be the duty of the census marshal to furnish each board of education and of district trustees with a complete list of all children living within the jurisdiction of said board, and to note on such lists all children not attending colleges, college schools, private schools, or being taught at home, who are liable to the provisions of this act; and each teacher teaching within the limits of the jurisdiction of such board shall be supplied with a list of all children within his or her department or school, and shall call such list each morning on the opening of school, and note the absentees, and the reason of such absence, if any, and at the close of each term of twelve weeks shall make a full report to the board of education, or of district trustees, of all such cases of absence, with the names

both of children and parents, guardians, or other persons having such children in charge, and said board shall thereupon forthwith proceed to prosecute such parents, guardians, or other persons.

Deaf or blind children are required to be sent to the State school for each class under the penalties of the compulsory law. Any justice of the peace of the proper city, or city and county, or school district shall have jurisdiction of all offenses committed under this act.

Character of instruction.—All schools must, unless otherwise provided by law, be divided into primary and grammar grades. The county board of education must, except in incorporated cities having boards of education, on or before the 1st day of July, prescribe the course of study in each grade for the ensuing year.

Except in incorporated cities having boards of education, the county board of education shall require that promotions, upon written examinations or otherwise, in each of said courses, shall take place at stated periods at least once in each school year. It shall also provide for conferring diplomas at the end of the course of study in the grammar grade for those who satisfactorily pass the required examination.

The county board of education may amend and change either of the above courses of study whenever necessary.

All schools must be taught in the English language. Instruction must be given in the following branches, in the several grades in which each may be required, viz: Reading, writing, orthography, arithmetic, geography, grammar, history of the United States, elements of physiology and hygiene, with special instruction as to the nature of alcoholic drinks and narcotics and their effects upon the human system; vocal music, elementary bookkeeping, industrial drawing, and civil government: *Provided*, That instruction in physiology and hygiene, elementary bookkeeping, and civil government may be oral, no text-books in these subjects being required to be purchased by the pupils: *Provided further*, That the board of education of any county may, in districts having less than 100 census children, confine the pupils to the studies of reading, orthography, arithmetic, grammar, geography, history, penmanship, and elementary bookkeeping until they have a practical knowledge of these subjects.

Other studies may be authorized by the board of education of any county, city, or city and county; but no such studies shall be pursued to the neglect or exclusion of the studies in the preceding section specified.

Instruction must be given, in all grades of school and in all classes during the entire school course, in manners and morals and upon the nature of alcoholic drinks and narcotics and their effects upon the human system.

Attention must be given to such physical exercises for the pupils as may be conducive to health and vigor of body, as well as mind, and to the ventilation and temperature of schoolrooms.

No publication of a sectarian, partisan, or denominational character must be used or distributed in any school, or be made a part of any school library; nor must any sectarian or denominational doctrine be taught therein. Any school district, town, or city the officers of which knowingly allow any schools to be taught in violation of these provisions forfeits all right to any State or county apportionment of school moneys; and upon satisfactory evidence of such violation, the superintendent of public instruction and school superintendent must withhold both State and county apportionments.

No school must be continued in session more than six hours a day: and no pupil under 8 years of age must be kept in school more than four hours per day. Any violation of the provisions of this section must be treated in the same manner as a violation of the provisions of the preceding paragraph. In all schools of more than two teachers beginners shall be taught by teachers having had two years' experience or by normal-school graduates.

Any city, incorporated town, or school district having a population of 1,000 inhabitants or more may, by a majority vote of the qualified electors voting at the election held for the purpose of determining the establishment and maintenance of such high school, establish and maintain a high school at the expense of such city, incorporated town, or school district.

Text-books.—The State board of education shall compile, or cause to be compiled, for use in the common schools of the State, a series of school text-books of the following description, viz: Three readers, 1 speller, 2 arithmetics, 2 grammars, 1 history of the United States, and 2 geographies, 1 physiology and hygiene, including a system of gymnastic exercises and special instructions as to the nature of alcoholic drinks upon the human system. The matter contained in the readers shall consist of lessons commencing with the simplest expressions of the language,

and, by a regular gradation, advancing o and including the highest styles of composition, both in prose and poetry.

The State board of education shall employ well-qualified persons to compile the books mentioned in the preceding paragraph, and shall fix the remuneration for the services thus rendered; provided, that if competent authors shall compile any one or more works of the first order of excellence, and shall offer the same as a free gift to the people of the State, together with the copyright of the same, and the exclusive right to manufacture and sell such works within the State of California, it shall be the duty of the State board of education to accept such gift, and to expend no money for the purpose of compiling works relating to the subjects treated of in the books thus donated. The State board of education shall furnish to the superintendent of State printing designs for all cuts and engravings to be used in the said series of text-books.

The printing of all the text-books provided for above, and all the mechanical work connected with their preparation, shall be done by and under the supervision of the superintendent of State printing, at the State printing office; *Provided*, That the purchase of paper for the schoolbooks, and the cardboards, cloth, and leather for covers shall be procured by advertising for proposals to furnish the same in the manner now provided for by section 532 of the political code, relating to paper supplies for the State printing office: *And provided further*, That when the State has its bindery in operation, all folding, stitching, binding, and ruling of the State shall be done in the State bindery; but the accounts of the schoolbook binding shall be kept separate from those of all other binding.

The State board of education shall secure copyrights to all the books that shall be compiled under the provisions of this act, and shall protect said copyrights from all infringement.

Whenever any one or more of the State series of school text-books shall have been compiled and adopted the State board of education shall issue an order requiring the uniform use of said book or books in the common schools of the State; but said order for the uniform use of said book or books shall not take effect till the expiration of at least one year from the time of the completion of the electrotype plates of said book or books. Nothing in this act shall be construed to prevent any county or school district from adopting any one or more of the State series of school text-books whenever said book or books shall have been published.

The process of distribution of the text-books shall follow this course: The county superintendents of schools shall make such requisitions for books as the schools under their jurisdiction may require upon the State superintendent of public instruction. The State superintendent of public instruction shall then make requisition for the same on the superintendent of State printing, who shall ship the books to their destination. All requisitions from county school superintendents for books shall be accompanied by the cash price fixed for the same by the State board of education, and the State superintendent of public instruction shall make no requisition for books upon the superintendent of State printing unless he shall have received the lawful price for the same. And it shall be the duty of the superintendent of public instruction to report to the State controller, on or before the 5th day of every month, the number of books sold by him during the preceding month, and to pay the moneys received for the same into the State treasury. It shall also be the duty of the superintendent of State printing to make a monthly report to the State controller of the number and value of the books shipped by him on the order of the State superintendent of public instruction and the number and value of the finished books on hand.

It shall be the duty of the district board to furnish books for the children of parents unable to purchase them; the books so furnished to belong to the school district, and to be kept in the district school library when not in use.

It shall be the duty of the boards of supervisors of the counties, or cities and counties, in this State to provide a revolving fund for the purpose of enabling the county school superintendents to purchase the State text-books; all moneys to be taken therefrom to be replaced by the moneys received from the teachers of the common schools in the several counties for the books furnished by them to the scholars.

The sum of $35,000, or so much thereof as may be necessary, is hereby appropriated, out of any money in the State treasury not otherwise appropriated, for the purpose of compiling, or causing to be compiled, the series of text-books for the common schools, as set forth above. The appropriation provided for in this paragraph shall be subject to the order of the State board of education, provided that all demands against said appropriation shall first be approved by said State board of education and presented to the State board of examiners in itemized form for their

approval, and upon the approval of the State board of examiners the comptroller is hereby authorized to draw his warrant upon the State treasurer.

The sum of $315,000, or so much thereof as may be necessary, is appropriated to purchase machinery and to properly maintain the same and to purchase such type and other materials as may be required in the manufacture of the text books, as well as pay the salaries or wages of the compositors, binders, and other persons employed in such manufacture, provided that the State board of education shall first approve the style of printing, engravings, and illustrations, kind of paper, size, and binding of volumes, said sum to be drawn by the superintendent of State printing.

The State board of education shall secure copyrights to all the books that shall be compiled under the provisions of this act, and shall protect said copyrights from all infringement.

All moneys that have been received or may hereafter be received from the State series of school text-books shall be kept by the State treasurer as a separate and distinct fund, to be known as the "State schoolbook fund," which said fund shall be subject to the following drafts, viz: By the superintendent of State printing for all moneys needed for manufacturing any editions of any book of the State series, over and above the first 50,000 copies manufactured of such book, the same to be drawn as provided in subdivision 4 of section 526 of the Political Code: *Provided*, That all demands on the State schoolbook fund shall be presented to the State board of examiners, in itemized form, for their approval; and upon the approval of the State board of examiners, the comptroller is hereby authorized to draw his warrant upon the State treasurer for the payment of said demands, and the State treasurer is authorized to pay the same.

The schoolbooks thus provided for shall be furnished to the common-school children of the State at cost, the same to be ascertained and fixed by the State board of education at the beginning of each school year.

[This is practically the text of the original schoolbook law of 1885. The original act was amended in 1887, 1891, and 1893. The constitution, however, was amended in November, 1894, so as to read as follows: "The State board shall compile or cause to be compiled and adopt a uniform series of text-books for use in common schools throughout the State. The State board may cause such text-books, when adopted, to be printed and published by the superintendent of State printing at the State printing office, and when so printed and published to be distributed and sold at the cost price of printing, publishing, and distributing the same. The text-books so adopted shall continue in use not fewer than four years."]

Buildings.—The board of trustees of any school district may, when in their judgment it is advisable and on petition of the majority of the heads of families, call an election concerning the issuance of bonds for the purpose of providing one or more schoolhouses. The clerk of each district must, under the direction of the board of trustees, provide all school supplies authorized by law (see Text-books above), keep the schoolhouse in repair during the time school is taught, and exercise a general care and supervision over the school premises and school property during the vacations of the schools.

4. Finances.

Funds (permanent or special).—Taxation.

Funds (permanent or special).—The proceeds of all lands that have been or may be be granted by the United States to this State for the support of common schools which may be or may have been sold or disposed of, and the 500,000 acres of land granted to the new States under an act of Congress distributing the proceeds of the public lands among the several States of the Union, approved A. D. 1841, and all estates of deceased persons who may have died without leaving a will or heir, and also such per cent as may be granted or may have been granted by Congress on the sale of lands in this State, shall be and remain a perpetual fund, the interest of which, together with all the rents of the unsold lands and such other means as the legislature may provide, shall be inviolably appropriated to the support of common schools throughout the State.

The public-school system shall include primary and grammar schools and such high schools, evening schools, normal schools, and technical schools as may be established by the legislature or by municipal or district authority; but the entire revenue derived from the State school fund and the State school tax shall be applied exclusively to the support of primary and grammar schools. The State superintendent must apportion the fund to the counties according to the number of school-census children.

Taxation.—The county superintendent of each county having a population of fewer than 200,000 must, on or before the first regular meeting of the board of supervisors hand in an estimate of the minimum amount of county school fund needed during the year. This amount he must compute as follows: He must calculate 1 teacher for every 70 school-census children or fraction thereof not smaller than 20; and then he must calculate the amount required to be raised at 500 per teacher. From this amount he must deduct the total amount of State apportionment and the remainder shall be the minimum amount of county school fund needed for the ensuing year: *Provided*, That if this amount is less than sufficient to raise a sum equal to $6 for each census child in the county, then the minimum amount shall be such a sum as will be equal to $6 for each census child in the county.

The board of supervisors of each county having fewer than 100,000 inhabitants must annually levy a tax to be known as the county school tax, the maximum rate of which must not exceed 50 cents on each $100 of taxable property in the county nor the minimum rate be less than sufficient to raise a minimum amount reported by the county superintendent. The minimum rate must be determined as follows: The supervisors must deduct 15 per cent from the equalized value of the last general assessment roll, and the amount required to be raised, divided by the remainder of the assessment roll, is the rate to be levied; but if any fraction of a cent occur, it must be taken as a full cent on each $100. If the county supervisors fail to levy the tax the auditor must, and all money derived from this tax must be paid into the county treasury to the credit of the school fund.

The county superintendent shall apportion the county school money as follows:

First. He must ascertain the number of teachers each district is entitled to by calculating one teacher for every 70 school census children, or fraction thereof, not fewer than 20 school census children, as shown by the next preceding school census, provided that all children in any asylum and not attending the public schools, of whom the authorities of said asylum are the guardians, shall not be included in making the estimate of the number of teachers to which the district in which the asylum is located is entitled.

Second. He must ascertain the total number of teachers for the county by adding together the number of teachers assigned to the several districts.

Third. Five hundred dollars shall be apportioned to each district for every teacher assigned to it: *Provided*, That to districts having 10 and less than 20 school census children shall be apportioned $400: *Provided further*, That to districts having over 70 school census children and a fraction of less than 20 there shall be apportioned $20 for each census child in said fraction.

Fourth. All school money remaining on hand after apportioning to the districts the moneys provided for in subdivision 3 of this section must be apportioned to the several districts in proportion to the average daily attendance in each district during the preceding school year. Census children, wherever mentioned in this chapter, shall be construed to mean those between the ages of 5 and 17 years.

Fifth. Whenever in any school year prior to the receipt by the counties, cities, or cities and counties of this State of their State, county, or city school fund the school districts or cities shall not have sufficient money to their credit to pay the lawful demands against them, the county, city, or city and county superintendent shall give the treasurer of said county, city, or city and county an estimate of the amount of school money that will next be paid into the county, city, or city and county treasury, stating the amount to be apportioned to each district. Upon the receipt of such estimate it shall be the duty of the treasurer of said county, city, or city and county to transfer from any fund not immediately needed to pay claims against it to the proper school fund an amount not to exceed 90 per cent of the amount estimated by the superintendent, and he shall immediately notify the superintendent of the amount so transferred. The funds so transferred to the school fund shall be retransferred by the treasurer to the fund from which they were taken from the first money paid into the school fund after the transfer.

No school district, except one newly formed, is entitled to receive any apportionment of State or county school moneys which has not maintained a public school for at least six months during the next preceding school year. A district which is prevented by fire, flood, or prevailing epidemic from maintaining a school for the length of time designated in this section is nevertheless entitled to its apportionment of State and county school moneys.

No school district is entitled to receive any apportionment of State or county school moneys unless the teachers employed in the schools of such district hold legal certificates of fitness for teaching in full force and effect.

The State school fund must be used for no other purpose than the payment of the salaries of teachers of primary and grammar schools.

The board of school trustees of any district may, prior to the 15th day of August in any year, when in their judgment it is advisable, call an election and submit to the electors of the district the question whether a tax shall be raised to furnish additional school facilities for the district, or to maintain any school in such district, or for building one or more schoolhouses, or for any two or all of these purposes: *Provided*, That where a tax has been collected for the purpose of building a schoolhouse, and the erection of said schoolhouse shall not have been commenced within two years from the time said tax was collected, the custodian of said money shall return the same to the parties from whom said tax was collected. The board of supervisors must, at the time of levying county taxes, levy the tax voted by the district; but the amount of tax levied by a district in any one year for building purposes must not exceed 75 cents on each $100, and the maximum rate levied for other school purposes must not exceed 30 cents on each $100 for any one year.

[Note: In Massachusetts instruction in the effects of alcoholic drinks and narcotics is now obligatory. Inadvertently this fact has been omitted at the bottom of p. 1087.]

The State constitutional provisions concerning sectarian instruction in the schools and, in general, concerning aid to religious institutions are given in Chapter I, of Part III, of the Annual Report of the Commissioner for 1892–93, and to these is to be added the provision of the 1895 constitution of South Carolina, which forbids the use of the property, credit, or money of the State, or any of its subdivisions, for such purpose. In Indiana, Superintendent Vories has decided that the bill of rights in the constitution of that State leaves it optional with the local board whether the Bible shall be read in the public schools. A circular inquiry was made several years ago regarding sectarian instruction in schools supported by public funds, and the results were compiled and published as a chapter of the annual report of this Bureau for 1888–89. A compilation regarding the eligibility of women as voters in school affairs and to hold school office has also been compiled from answers to a circular letter, and will appear in the next report of the Commissioner.

CHAPTER X.

SANITARY LEGISLATION AFFECTING SCHOOLS IN THE UNITED STATES.

By Hannah B. Clark, *University of Chicago.*

The attempt has been made in this compilation to include all the laws affecting the health and safety of school children which appear on the statute books of the States and Territories of the United States and those found in the city ordinances, rules of school boards, and of boards of health in seventeen representative cities. It has not, however, seemed necessary to refer to technical building laws except in the case of Massachusetts, where there are State statutes, and here only the titles have been cited.

Such a compilation must always be inadequate from one point of view, since it necessarily omits an important body of embryonic law made up of recommendations, more or less mandatory, from different authorities—health officers, architects, engineers, etc.—and of resolutions passed by school boards and boards of health which apply only to local and temporary conditions.

On the other hand, formal legislation is often in advance of popular knowledge, so that it is ignored in many communities. Many laws, also, are of recent enactment, and therefore do not apply to the older schools, which are, of course, most numerous.

Allowances for both forms of error must be made by the reader who would judge of school sanitation in the United States from the State statutes.

STATE AND TERRITORIAL LEGISLATION.

ALABAMA.

DUTIES OF COUNTY BOARD OF HEALTH.

4. To exercise a general superintendence over the sanitary regulations of the public institutions situate in the county, including hospitals, asylums, workhouses, prisons, markets, and public schools. (Civil Code, 1886, title 13, ch. 2, sec. 1282.)

ARKANSAS.

POWERS OF THE STATE BOARD OF HEALTH.

Said board may from time to time engage suitable persons to render sanitary service, and to make or supervise practical and scientific investigations and examinations requiring expert skill, and to prepare plans and report relative thereto. And it is hereby made the duty of all officers and agents having the control, charge, or custody of any public structure, work, ground, or erection, or of any plan, description, outlines, drawings, or charts thereof or relating thereto, made, kept, or controlled under any public authority, to permit and facilitate the examination and inspection and the making of copies of the same by any officer or person by said board authorized, and the members of said board and such other officers or persons as may at any time be by said board authorized, may, without fee or hindrance, enter, examine, and survey all grounds, erections, vehicles, structures, apartments, buildings, and plans whereby the public health may be promoted or in any wise preserved. (Digest of the Statutes, 1894, ch. 16, sec. 523.)

CALIFORNIA.

VACCINATION.

SEC. 1. The trustees of the several common-school districts in this State and boards of common-school government in the several cities and towns are directed to exclude from the benefits of the common schools therein any child or any person who has not been vaccinated until such time when said child or person shall be successfully vaccinated: *Provided*, That any practicing and licensed physician may certify that the child or person has used due diligence and can not be vaccinated so as to produce a successful vaccination, whereupon such child or person shall be excepted from the operation of this act.

SEC. 2. The trustees or local board, annually, or at such special times to be stated by the State board of health, must give at least ten days' notice, by posting a notice in two or more public or conspicuous places within their jurisdiction, that provision has been made for the vaccination of any child of suitable age who may desire to attend the common schools and whose parents or guardians are pecuniarily or otherwise unable to procure vaccination for such child.

SEC. 3. The said trustees or board must, within sixty days after the passage of this act, and every year thereafter, ascertain the number of children or persons in their respective school districts or subdivision of the city school government being of an age suitable to attend common schools who have not been already vaccinated, and make a list of the names of all such children or persons. It also shall be the duty of said trustees or board to provide for the vaccination of all such children or persons in their respective school districts a good and reliable vaccine virus wherewith to vaccinate such children or persons who have not been vaccinated; and, when so vaccinated, to give a certificate of vaccination, which certificate shall be evidence thereof for the purpose of complying with section 1.

SEC. 4. The necessary expenses incurred by the provisions of this act shall be paid out of the common-school moneys apportioned to the district, city, or town; and if there be not sufficient money, the trustees must notify the board of supervisors of the amount of money necessary, and the board must, at the time of levying the county tax, levy a tax upon the taxable property in the district sufficient to raise the amount needed. The rate of taxation is ascertained by deducting 15 per cent for delinquencies from the assessment, and the rate must be based upon the remainder. The tax so levied must be computed and entered upon the assessment roll by the county auditor and collected at the same time and in the same manner as State and county taxes, and when collected shall be paid into the county treasury for the use of the district.

SEC. 5. The trustees of the several school districts of this State are hereby required to include in their annual report and report to the secretary of the State board of health the number in their several districts between the ages of 5 and 17 years who are vaccinated and the number unvaccinated.

SEC. 6. This act shall take effect immediately. (Stat. 1889, Ch. XXIV, p. 32.)

DUTY OF COUNTY SUPERINTENDENT.

SEC. 7. Except in incorporated cities having boards of education, to pass upon and approve or reject all plans for schoolhouses. To enable him to do this all boards of trustees, before adopting any plans for school buildings, must submit the same to the county superintendent for his approval. (Code, Pt. III, Title III, Ch. III, Art. III, sec. 1543.)

RULES AND REGULATIONS OF THE PUBLIC SCHOOLS OF CALIFORNIA.

SEC. 8. Teachers shall prescribe such rules for the use of yards, basements, and outbuildings connected with the schoolhouses as shall insure their being kept in a neat and proper condition, and shall examine them as often as may be necessary for such purpose. Teachers shall be held responsible for any want of neatness or cleanliness about their school premises.

SEC. 9. Teachers shall give vigilant attention to the ventilation and temperature of their schoolrooms. At each recess the windows and doors shall be opened for the purpose of changing the atmosphere of the room.

* * * * * * *

SEC. 14. All pupils who go to school without proper attention having been given to personal cleanliness or neatness of dress shall be sent home to be properly pre-

pared for school or shall be required to prepare themselves for the schoolroom before entering. Every schoolroom shall be provided with a wash basin, soap, and towels.

SEC. 15. No pupils affected with any contagious disease shall be allowed to remain in any of the public schools.

* * * * * * *

SEC. 20. Trustees are required to employ a suitable person to sweep and take care of the schoolhouse, and they shall make suitable provision for supplying the school with water. (Adopted by State board of education; enforced in all public schools.)

COLORADO.

NUMBER AND WIDTH OF DOORS—PASSAGES.

Every room or building intended to be used as a theater, opera house, music hall, concert hall, public school, or church, or other like place of public assemblage hereafter built or constructed, shall be provided with at least one doorway of not less than 5 feet in width for each 250 persons which might be seated within such building in the part thereof intended for public assemblage, and with proper and sufficient ways and passages leading to and from every such doorway, so that in case of fire or other sudden alarm those who may be within such building may speedily and safely escape therefrom. (An. Sta. 1891, p. 521, sec. 284.)

NO ROOM SHALL BE OCCUPIED UNTIL IT CONFORM WITH THIS ACT.

No room or building intended for use as a theater, opera house, music hall, concert hall, public school, church, or other place of public assemblage heretofore constructed and not in conformity with the provisions of this act, shall be rented, leased, or occupied for any such purpose until the same shall be altered to conform to this act. (Ib., sec. 285.)

PENALTY OF VIOLATION OF THIS ACT.

Every proprietor who shall hereafter build or procure to be built, or shall lease or procure or permit to be used as a theater, opera house, music hall, concert hall, public school, church, or for any other like public assemblage, any building not in conformity to this act, shall be deemed guilty of a misdemeanor and, upon conviction thereof, fined in a sum not exceeding $500. (Ib., sec. 286.)

NO ACTION FOR RENT.

No action shall lie to recover the rent on any lease or contract made after this act shall take effect, for the use or occupation of any room or building used as a theater, opera house, music hall, concert hall, public school, church, or other like place unless said room or building was at the time of such renting, use, or occupation provided with doorways and passages and means of safe escape therefrom in case of fire, in conformity with this act. (Ib., sec. 287.)

DOORS MUST OPEN OUTWARDS.

All doors provided for the doorways of every such room or building shall open outwards, and every person using or occupying any such room or building as a theater, opera house, music hall, concert hall, public school, church, or for other like purposes, shall, during the whole of every exhibition, performance, or assemblage therein, cause all the doors thereof to be left unfastened or latched or barred upon the inner side only, and so that any person may readily and speedily open the same from the inner side of such room or building; and shall cause the stairways and other ways and passages leading to every such door to be kept open and free from persons seated or standing therein from other obstructions; and any person failing to observe this section shall be deemed guilty of a misdemeanor, and, upon conviction thereof, fined in a sum not exceeding two hundred dollars. (Ib., sec. 288.)

FIREPROOF STAIRWAYS.

Whenever any building or buildings shall be hereafter erected for the purpose of accommodating public assemblages, and the rooms intended for such purposes shall not be upon the first floor of such building, it shall be the duty of the per-

sons erecting the same to provide and erect at least two fireproof stairways of ample dimensions sufficient for the sudden egress of the assemblies of the same. (Ib., sec. 289.)

RESPONSIBILITY FOR LOSS OF LIFE.

If any lives shall be lost by reason of the willful negligence and failure to observe the provisions of this act, the person through whose default such loss of life was occasioned shall be deemed guilty of manslaughter and punished by a fine not less than $100 nor more than $5,000, or imprisonment in the penitentiary not less than six months nor more than ten years, or by both such fine and imprisonment, in the discretion of the court. (Ib., sec. 290.)

STATE BOARD OF HEALTH.

2. The State board of health shall have general supervision of the interests of health and life of the citizens of this State. * * * They shall, when required, or when they deem it best, advise with the officers of the government or other State boards in regard to the location, drainage, water supply, disposal of excreta, heating, and ventilation of any public structure or building. (An act to create a State board of health, approved April 15, 1893.)

DISTRICT OF COLUMBIA.

VACCINATION.

No child shall be admitted into the public schools who shall not have been duly vaccinated or otherwise protected against the smallpox. (Rev. Sta. 1873-74, ch. 12, sec. 274.)

FIRE ESCAPES.

It shall be the duty of the owner or owners, in fee or for life, of every building constructed and used or intended to be used as a hotel, factory, manufactory, theater, tenement house, seminary, college, academy, hospital, asylum, hall, or place of amusement, and of the trustee or trustees of every estate, association, society, college, academy, school, hospital, or asylum owning or using any building fifty feet high or upwards, used for any of the purposes hereinabove mentioned, to provide and cause to be erected and affixed to said building iron fire escapes and combined standpipes and ladders, or either of said appliances as may be approved and adopted by the Commissioners of the District of Columbia. (Act Jan. 26, 1887.)

DOOR OPEN OUTWARDS.

In all buildings of a public character already erected or hereafter built, such as halls, churches, and places of amusement and instruction, the doors shall open outward and remain open when the building is occupied, except fly doors opening both ways, which may be kept closed. The hall doors, stairways, seats, and aisles shall be so arranged as to facilitate egress in cases of fire or accident; and to afford the requisite and proper accommodation for the public protection in such cases all aisles and passageways in such buildings shall be kept free from camp stools, chairs, sofas, and other obstructions during any service, exhibition, lecture, performance, concert, ball, or any public assemblage. (Police Regulations, Oct. 23, 1891.)

CONNECTICUT.

SAFE EXITS.

In all cities the court of common council, in all boroughs the warden and burgesses, and in all towns and parts of towns not within the limits of any city or borough the selectmen shall require that all churches, schoolhouses, and all public halls that are used for lectures, amusements, exhibitions, or assemblages of people shall be provided with ample facilities for safe and speedy entrance and exit in case of necessity, and be arranged so as to promote the comfort and safety of persons visiting them, and be closed till such requisitions are complied with; and any city, borough, or town may make suitable by-laws regarding the same. (Gen. Sta. 1888, Title 43, ch. 158, sec. 2623.)

PENALTY.

Every person who shall let or use any such building for such purpose after it shall have been ordered to be so closed shall forfeit one hundred dollars to the city, borough, or town by the authorities of which such order was made. (Gen. Sta. 1888, Title 43, ch. 158, sec. 2624.)

APPEALS.

Any person aggrieved by any order closing such building may appeal therefrom to a judge of the supreme court, who shall, on notice, inquire into the facts by a committee or otherwise, and may make such order in the premises as to him may seem proper, and tax costs in favor of the prevailing party and issue execution therefor. (Gen. Sta. 1888, Title 43, ch. 158, sec. 2625.)

VACCINATION.

The board of school visitors of any town shall have authority to require that every child shall be vaccinated before being permitted to attend any public school under their jurisdiction. If the parents or guardians of any children are unable to pay for vaccination when so required, the expense of vaccinating such children shall, on the recommendation of said board, be paid out of the town treasury. Said board may exclude from any school under their supervision all children under five years of age whenever in their judgment the interest of such school will be thereby promoted. (Gen. Sta. 1888, Title 35, ch. 134, sec. 2137.)

SANITARY PROVISIONS AND VENTILATION.

SEC. 320. Every schoolhouse shall be kept in a cleanly state and free from effluvia arising from any drain, privy, or other nuisance, and shall be provided with a sufficient number of proper water-closets, earth-closets, or privies for the reasonable use of the pupils attending such schoolhouse.

SEC. 321. Every schoolhouse shall be ventilated in such a manner that the air shall not be injurious to the health of the persons present therein.

SEC. 322. Whenever it shall be found by the State board of education or by the board of school visitors or school committee of the town or district in which any schoolhouse is located that further or different sanitary provisions or means of lighting or ventilating are required in any schoolhouse and that the same can be provided without unreasonable expense, either of said boards or committees may recommend to the person or authority in charge of or controlling such schoolhouse such changes in or other and further means of ventilating, lighting, or sanitary provisions for such schoolhouse as they may deem necessary. In case such changes so recommended be not made substantially as recommended within two weeks of the date of service thereof, such board or committee may make complaint to the board of health, health committee, or health officer of the community in which such schoolhouse is situated, and said board of health, health officer, or health committee, after notice to and hearing of all the parties interested, shall order such changes in or such other and further provisions made in the lighting, ventilating, or sanitary provisions of such schoolhouse as they may deem necessary and proper.

SEC. 323. Any person violating any provision of the preceding sections shall be punished in the manner provided in section 2609 of the General Statutes.

SEC. 324. The word schoolhouse shall be held to mean any building or premises in which instruction is afforded to not less than ten pupils at one time. (Gen. Sta., 1893, ch. cclxv, sec. 1–5.)

DELAWARE.

DUTIES OF THE STATE BOARD OF HEALTH.

SEC. 3. * * * And said State board of health are authorized to require reports and information from all public dispensaries, asylums, prisons, and schools, and from the managers, principals, and officers thereof, * * * and if any * * * principal, superintendent, officer, or physician in charge shall refuse and neglect to make a report when requested to do so by the said State board of health, he, she, or they shall, upon conviction thereof before any justice of the peace of the county in which he, she, or they shall reside, be fined not less than five dollars nor more

than twenty-five, together with costs; and any justice of the peace shall have full cognizance thereof. But such reports and information shall only be required concerning matters and particulars in respect of which they may need information for the proper discharge of their duties. Said board shall, when requested by public authorities, or when they deem it best, advise officers of the State, county, or local governments in regard to drainage, and the location, drainage, ventilation, and sanitary provisions of any public institution, building, or public place.

SEC. 4. That said board shall be an advisory board to the authorities of the State in all matters pertaining to public hygiene; they shall have authority to make special inspections of hospitals, prisons, asylums, and other public institutions. * * * (Laws of Delaware, ch. 642, vol. 19.)

GEORGIA.

VACCINATION.

The county boards of education in the counties of this State, and the board of public education for the city of Savannah and the other cities of this State, are authorized and empowered to make such regulations as in their judgment shall seem requisite to insure the vaccination of the pupils in their respective schools, and may require all scholars or pupils to be vaccinated as a prerequisite to admission to their respective schools. (Code 1882, Title XIII, Ch. V, sec. 1275*b*.)

ILLINOIS.

DOORS OPEN OUTWARD.

SEC. 1. *Be it enacted by the people of the State of Illinois, represented in the general assembly*, That all public buildings now in process of construction, or hereafter to be built or constructed, which may or shall be used for churches, schoolhouses, operas, theaters, lecture rooms, hotels, public meetings, town halls, or which may or shall be used for any purpose whereby a collection of people may be assembled together for religious worship, amusement, or instruction, shall be so built or constructed that all doors leading from the main hall or place where said collection of people may be assembled, or from the principal room which may be used for any of the purposes aforesaid, shall be so swung upon their hinges and constructed that such doors shall open outward; and that all means of egress for the people from the main hall or principal room and from the building shall be by means of doors which shall open outward from the main hall or building.

SEC. 2. That any person or persons who shall fail or refuse to comply with the provisions of this act shall be fined in any sum not less than one hundred dollars nor more than one thousand. (Rev. Sta. 1874, Ch. III, approved Mar. 28, 1874.)

INDIANA.

NOT PROVIDING OUTSWINGING DOORS.

Whoever, being the owner, manager, lessee, trustee, or person having the charge of any theater, opera-house, museum, college, seminary, church, schoolhouse, or other public building, refuses or neglects to cause all the doors thereof constructed for the purpose of ingress or egress, whether inner or outer doors, to be so hung that the same shall swing outwardly, shall be fined in any sum not exceeding one thousand dollars nor less than ten dollars, to which may be added imprisonment in the county jail for any period not exceeding six months: *Provided*, That this section shall not apply to the outer doors of one-story churches and schoolhouses. (Rev. Sta. 1894, Ch. V, sec. 2276.)

IOWA.

SCHOOLHOUSES.

[Chapter 103, Laws of 1884.]

AN ACT to prohibit the use of barbed wire in inclosing public-school grounds.

Be it enacted by the general assembly of the State of Iowa:

SECTION 1. It is hereby made the duty of the board of directors of every independent district and of every district township to remove before the first day of

September, 1884, any barb-wire fence inclosing in whole or in part any public-school grounds in such district, and it is also made the duty of any person owning or controlling any barbed-wire fence within ten feet of any public-school grounds to remove the same within the time herein named.

SEC. 2. Hereafter barb wire shall not be used in inclosing in whole or in part any public-school building or the grounds upon which the same may stand; and no barbed-wire shall be used for a fence or other purpose within ten feet of any public-school grounds.

SEC. 3. For failure or neglect on the part of any board of directors of any independent district or of any district townships to carry out the provisions of this act any member of such board shall be fined on conviction not exceeding twenty-five dollars. Any person violating the provisions of this act shall, on conviction thereof, be fined not exceeding twenty-five dollars.

Approved, March 29, 1884.

SANITARIES.

It shall be the duty of the board [directors] to give especial attention to the matter of convenient water-closets or privies for every school, and expenses incurred for such purpose shall be paid from the contingent fund of the district. On every schoolhouse site not within an independent district including a city, town, or village, there shall be provided and kept in good repair, and in wholesome condition at least two separate buildings, which shall be located upon those portions of the site farthest from the main entrance to the schoolhouse, and as far from each other as the surrounding conditions will warrant. In independent districts including a city, town, or village, if it seems to the board undesirable to build several outhouses, separate closets may be included under one roof; but where closets of this kind are outside the schoolhouse each closet shall be as effectively separated from any other as possible, and a brick wall, a double partition, or some other solid and continuous barrier shall extend from the roof to the lowest part of the vault below, and a substantial close fence not less than seven feet in height, and at least thirty feet in length, shall separate the approaches to such outdoor closets for the two sexes. (Chap. 37, Laws of 1894.)

RULES AND REGULATIONS.

RULE 1. Every person entering any public school of Iowa must give satisfactory evidence of protection by vaccination.

RULE 2. The fact of vaccination and protection must be entered with each name on the school record, and on transfer and promotion lists.

RULE 3. Persons affected with diphtheria (membranous croup), measles, scarlet fever (scarlatina, scarlet rash), whooping cough, mumps, or smallpox must be excluded from school until by authority of the mayor or township clerk, as the case may be, approved by the health officer, permission for their admission is granted; and all persons from families where such diseases exist shall also be excluded.

RULE 4. It is the duty of every school-teacher and school officer who discovers, or who has knowledge of a case of these contagious diseases to cause the fact to be immediately reported to the local board of health.

RULE 5. If a person is ascertained to have attended school when affected with either of these contagious diseases, the local board of health shall immediately close the room wherein such person attended and direct its proper disinfection.

PREVENTION OF CONTAGIOUS DISEASES.

During the existence of any contagious or infectious disease in any family or household or place, and until after the recovery of the sick and the disinfection of the premises where such disease shall have existed, no person residing in such household, family, or place shall be permitted to attend any public or private school or any public place without written permission from the mayor (or clerk if in a township), countersigned by the health officer, and no superintendent, teacher, or officer of any school shall permit any child or person from any such family, household, or place to attend any school without a permit from the mayor (or township clerk), countersigned by the health officer, upon the recommendation of the attending physician, showing thorough disinfection of the person, clothing, and premises. * * *

No person, company, corporation, or association having charge of, or control of, any schoolhouse or church or of any building, room, or place used for school or

church purposes, or for any public assembly, shall permit the body of any person dead from any of the contagious or infectious diseases named in these regulations or any other dangerous contagious disease to be taken into such schoolhouse, church, building, room, or place for the purpose of holding funeral service over such body; and no sexton, undertaker, or other person having charge of, or direction of, the burial of anybody dead from any of the said diseases shall permit the coffin or casket containing such body to be opened in the presence of any child, nor shall any child be permitted to act as pallbearer or carrier at any such funeral. (Approved November 12, 1892.)

ORDER FOR VACCINATION.

At a meeting of the State board of health February 2, 1894, for the purpose of preserving and improving the public health, and prevent the spread of the disease known as smallpox, the following rules and regulations were ordered:

First. All persons in this State over the age of one year who have not been vaccinated, or who in the opinion of the local board of health of the district or jurisdiction in which such persons reside or are found, who do not furnish satisfactory evidence of protection from smallpox, are hereby ordered to be vaccinated.

Second. Local boards of health and all officers who compose said boards, and all sheriffs, constables, city marshals, and police officers within their respective jurisdictions are hereby directed to enforce the foregoing order as soon as practicable, and so far as said order shall apply to the pupils of any public or private school or to the teachers thereof. The officers of the school district in which such school is held shall also require its enforcement.

KANSAS.

BOARD OF HEALTH—SANITARY SERVICE.

The State board of health shall, when they think best to do so, appoint committees, or engage suitable persons to render special sanitary service, to make or supervise practical or scientific investigations and examinations, requiring expert skill, and prepare plans and report thereon. And it is hereby made the duty of all officers and agents having the control, charge, or custody of any public structure, work, ground, or erection, or any plan, description, outline, drawings, charts thereof or relating thereto, made, kept, or controlled under any public authority, to permit and facilitate any examination and inspection ordered by said board; and the members of said board and such other officer or person as may at any time be by said board authorized, may without fee or hindrance enter, examine, and survey all grounds, erections, vehicles, structures, apartments, buildings, and places; but the legislature shall first determine the amount which shall be expended during the year for such special sanitary work, and the expenditures shall not exceed the amount thus determined and set apart for the year. (Gen. Sta. 1889, ch. 99, sec. 6031.)

WATER-CLOSETS.

Be it enacted by the legislature of the State of Kansas:

SECTION 1. That the school boards and boards of education having supervision over any school district in this State shall provide and maintain suitable and convenient water-closets for each of the schools under their charge or supervision. These shall be at least two in number, which shall be entirely separate from each other. It shall be the duty of the officers aforesaid to see that the same are kept in a neat and wholesome condition; and failure to comply with the provisions of this act by the aforesaid officers shall be grounds for their removal from office.

SEC. 2. This act shall be in full force and effect on and after its publication in the statute book. (Approved March 10, 1891. Session laws of 1891, ch. 197.)

KENTUCKY.

POWER OF COUNTY SUPERINTENDENT.

* * * He shall condemn any schoolhouse which is dilapidated, unhealthy, or otherwise unfit to be occupied for the purpose of a common school, and any fence or other inclosure of a schoolhouse when such inclosure is for any reason insufficient for the protection of the house or ground. He shall condemn all school fur-

niture or apparatus insufficient in quantity or not of the required character and order the same replaced with the proper furniture or apparatus, as prescribed in section four thousand four hundred and forty. He shall, within thirty days after any such condemnation, notify the trustees in writing. He shall, at least once a year, make an official visit to each district school of his county, but shall not make more than three such official visits in any one day. At the time of such visit he shall note in a book, to be kept for that purpose, * * * the condition of the schoolhouse, furniture, apparatus, grounds, and appurtenances. * * * He shall admonish the teacher found remiss of duty in the matter of cleanliness of house, preservation of furniture, and necessary ventilation, and complain to the trustees in cases of gross neglect of duty in these respects. (Sta. 1894, ch. 113, sec. 4403.)

CONSTRUCTION OF SCHOOLHOUSES—FURNITURE.

* * * Each schoolhouse hereafter erected shall have a floor space of not less than ten square feet to each pupil in the district; shall be at least ten feet between floor and ceiling; shall have at least four windows, one or more fireplaces, with chimneys made entirely of brick or stone, or a sufficient number of stoves or other heating apparatus, with safe flues, to warm the room in the coldest weather. * * * The trustees shall furnish each schoolhouse with at least the following articles of furniture and apparatus, * * * a seat, patent or otherwise, with back, for each child, the height of the seat and its back to suit the age of the child. * * * (Sta. 1894, ch. 113, sec. 4440.)

BOARD OF TRUSTEES.

* * * They shall see that a sufficient supply of good water is furnished within easy access of the schoolhouse for the benefit of the school during the term of school. * * * (Sta. 1894, ch. 113, sec. 4447.)

INFECTIOUS DISEASE.

When any family shall have any infectious or contagious disease, no member of such family shall attend any school until the trustees thereof shall allow them to do so; and during the prevalence in the district of dangerous epidemics the trustees shall order the school closed; but the teacher shall not be required to lose the time of the forced suspension, unless so stipulated in his contract. (Sta. 1894, ch. 113, sec. 4448.)

VACCINATION.

All parents, guardians, and other persons having the care, custody, or control of any child or children, or who may have in their employ any minor or minors, shall have the same vaccinated; and every parent, guardian, and person who may have the care, custody, or control of any child born hereafter shall have said child vaccinated within twelve months after its birth, or after it comes under his or her care, custody, or control. (Sta. 1894, ch. 119, sec. 4609.)

MASSACHUSETTS.

DOORS OPEN OUTWARD.

All churches, schoolrooms, hotels, halls, theaters, and other buildings used for public assemblies shall have means of egress approved by said [factory] inspectors, and all doors to the main entrances in such buildings shall swing outwardly if said inspectors in writing so direct. No portable seats shall be allowed in the aisles or passageways of any such building during any service or entertainment held therein. (Pub. sta. 1882, ch. 104, sec. 20.)

MEANS OF EGRESS.

Every building now or hereafter used in whole or in part as a public building, public or private institution, schoolhouse, church, theater, public hall, place of assemblage, or place of public resort, * * * shall be provided with proper ways of egress or other means of escape from fire sufficient for the use of all persons accommodated, assembling, employed, lodging, or residing in such building; and such ways of egress and means of escape shall be kept free from obstruction, in good repair, and ready for use. * * * All doors and windows in any build-

ing subject to the provisions of this section shall open outwardly, if the inspector mentioned in the following section shall so direct in writing. No portable seats shall be allowed in the aisles or passageways of such buildings during any service or entertainment held therein. * * * (Supplement to Pub. Sta. 1882–1888, ch. 426, sec. 1.)

It shall be the duty of such inspectors of factories and public buildings as may be assigned to such duty by the chief of the district police force to examine, as soon as may be after the passage of this act, and thereafter from time to time, all buildings within his district subject to the provisions of this act; and it shall be the duty of the inspectors of buildings of the city of Boston so to examine all such buildings within said city. In case any such building conforms, in the judgment of such inspector, to the requirements of this act, he shall issue to the owner, lessee, or occupant of such building or of any portion thereof used as above mentioned in section one, a certificate to that effect, specifying the number of persons for whom the ways of egress or means of escape from fire are deemed to be sufficient. * * * Such certificate may be revoked by such inspector at any time. * * * (Ib., sec. 2.)

Application for certificate to be acknowledged by inspector. (Ib., sec. 3.)

Inspector to be notified of any change in building for which certificate has been given. (Ib., sec. 4.)

Inspector to notify owner if building fails to conform to provisions of this act. (Ib., sec. 5.)

No wooden duct or flue for heating or ventilating to be used in such buildings. (Ib., sec. 8.)

Every story above second must have means of extinguishing fire. (Ib., sec. 9.)

Inspection department of district police and building inspector in Boston to enforce these provisions. (Ib., sec. 10.)

UNSAFE BUILDINGS.

Any member of the inspection department of the district police force when called upon by the mayor and aldermen of any city, except the city of Boston, or by the selectmen of a town, shall inspect any building or other structure or anything attached to or connected therewith in such city or town which has been represented to be unsafe or dangerous to life or limb. (Ib., ch. 399, sec. 1.)

Inspector, in his judgment, to cause building to be removed or render the same safe. (Ib., sec 2.)

SANITARY PROVISIONS—VENTILATION.

1. Every public building and every schoolhouse shall be kept in a cleanly state and free from effluvia arising from any drain, privy, or other nuisance, and shall be provided with a sufficient number of water-closets, earth closets, or privies for the reasonable use of the persons admitted to such public building or pupils attending such schoolhouse.

2. Every public building and every schoolhouse shall be ventilated in such a proper manner that the air shall not become so exhausted as to be injurious to the health of the persons present therein. The provisions of this section and the preceding section shall be enforced by the inspection department of the district police force.

3. Whenever it shall appear to an inspector of factories and public buildings that further or different sanitary provisions or means of ventilation are required in any public building or schoolhouse in order to conform to the requirements of this act, and that the same can be provided without incurring unreasonable expense, such inspector may issue a written order to the proper person or authority directing such sanitary provisions or means of ventilation to be provided, and they shall thereupon be provided in accordance with such order by the public authority, corporation, or person having charge of, owning, or leasing such public building or schoolhouse.

4. Any school committee, public officer, corporation, or person neglecting for four weeks after the receipt of an order from an inspector, as provided in the preceding section, to provide the sanitary provisions or means of ventilation required thereby shall be punished by fine not exceeding one hundred dollars.

5. The expression "public building" used in this act means any building or premises used as a place of public entertainment, instruction, resort, or assemblage. The expression "schoolhouse" means any building or premises in which public or private instruction is afforded to not less than ten pupils at one time.

6. This act takes effect upon its passage. (Mar. 20, 1888, Ib., ch. 149.)

VACCINATION.

The school committee shall not allow a child who has not been duly vaccinated to be admitted to or connected with the public schools. (Acts of 1894, ch. 498, sec. 9.)

CONTAGIOUS DISEASES.

The school committees shall not allow any pupil to attend the public schools while any member of the household to which such pupil belongs is sick of smallpox, diphtheria, or scarlet fever, or during a period of two weeks after the death, recovery, or removal of such sick person, and any pupil coming from such household shall be required to present to the teacher of the school the pupil desires to attend a certificate from the attending physician or board of health of the facts necessary to entitle him to admission in accordance with the above regulation. (Ib., sec 10.)

FIRE ESCAPES.

In case a schoolhouse situated in any city has not been provided with a safe and proper way of egress or other means of escape from fire, as required by chapter four hundred and twenty-six of the acts of the year eighteen hundred and eighty-eight, within six months after the written notice therein provided for, the mayor of such city, for the purpose of carrying out such provisions of said act, may, upon petition of one hundred citizens or taxpayers in said city, authorize the expenditure upon any such schoolhouse of not exceeding fifteen per cent of the cost thereof, payable from any moneys in the treasury of said city not otherwise appropriated. (Ib., ch. 337.)

INSPECTION OF PLANS.

No building designed to be used, in whole or in part, as a public building, public or private institution, schoolhouse, * * * shall hereafter be erected until a copy of the plans of such building has been deposited with the inspector of factories and public buildings for the district in which such building is to be located by the person causing the erection or construction of such building, or by the architect who has drawn such plans, which plans shall include therein the system or method of ventilation provided for such building, together with a copy of such portion of the specifications of such building as such inspector may require, nor shall any such building be so erected without the provision of sufficient ways of egress and other means of escape from fire, properly located and constructed. The certificate of the inspector above named, indorsed with the approval of the chief of the district police force, shall be conclusive evidence of a compliance with the provisions of this act: *Provided*, That after the granting of such certificate no change is made in the plans or specifications of such ways of egress and means of escape unless a new certificate is obtained therefor. (Ib., ch. 338.)

MAINE.

DOORS OPEN OUTWARDS.

Every building intended temporarily or permanently for public use and every schoolhouse and schoolroom shall have all inner doors, intended for egress, open outwards. The outer doors of all such buildings shall be kept open when the same are used by the public, unless they open outwards; but fly doors opening each way may be kept closed. (Rev. Sta., 1883, Title II, ch. 26, sec. 25.)

SCHOOL COMMITTEES.

Superintending school committees shall perform the following duties:

* * * * * * *

VIII. Exclude, if they deem it expedient, any person not vaccinated, although otherwise entitled to admission. (Rev. Sta., 1883, Title II, ch. 11, sec. 87.)

CONTAGIOUS DISEASES.

SEC. 19. Whenever smallpox, diphtheria, scarlet fever, or other contagious disease shall appear in a town or a school district, it shall be the duty of the local board of health immediately to notify the teachers of the public schools in the

neighborhood of the fact, and it shall be the duty of all teachers and school officers, when thus notified or when otherwise they shall know or have good reason to believe that any such disease exists in any house in the neighborhood, to exclude from the schoolhouse all children and other persons living in such infected houses or who have called or visited at such houses, until such time as the local board of health (or attending physician) shall certify that such children or other persons may safely be readmitted.

SEC. 20. When persons from houses or places which are infected with any of the diseases specified in section nineteen have entered any schoolroom, or when, from any other cause, the schoolroom has probably become infected, it shall be the teacher's duty to dismiss the school and notify the school officers and local board of health, and no school shall be again held in such schoolroom until the room has been disinfected to the satisfaction of the local board of health, and it shall be the duty of the school officers and board of health to have the room disinfected as soon as possible. (Statutes, 1887, ch. 123.)

MARYLAND.

VACCINATION.

Every child, before being admitted to any public school, shall produce a certificate from a regular physician that he has been properly vaccinated. (Pub. Gen. Laws, 1888, Art. 77, ch. 9, par. 57.)

CERTIFICATE REQUIRED.

No teacher in any school shall receive into such school any person, as a scholar, until such person shall produce the certificate of some regular practicing physician that such applicant for admission into the school has been duly vaccinated. Any teacher so offending shall, on conviction thereof, forfeit and pay a fine of $10 for each offense; and no public school trustee or commissioner shall grant a permit to any child to enter any public school without certificate under the same penalty. (Pub. Gen. Laws, 1888, Art. 43, par. 31.)

INFECTIOUS DISEASES.

Any person, parent, or guardian, or other party who carelessly carries about children or others affected with infectious diseases, or who knowingly or willfully introduces infectious persons into other persons' houses, or permits infected children under his or her care to attend any school, theater, church, or any public place where they will be brought in contact with others, shall be liable to a penalty not exceeding $100 for each and every such offense. (Pub. Gen. Laws, 1888, Art. 43, par. 19.)

REGULATING SANITATION OF WATER-CLOSETS AND OUTHOUSES IN PUBLIC SCHOOLS.

[1894, ch. 524.]

AN ACT to regulate the construction and situation of water-closets or outhouses attached to the public schools of this State.

SECTION 1. *Be it enacted by the general assembly of Maryland*, That boards of school commissioners in every city and county of the State shall provide suitable and convenient water-closets or outhouses for each of the schools under their official jurisdiction, not less than two for each school or building, when both sexes are in attendance in their respective school districts, with separate means of access for each; and unless placed at a remote distance, one from the other, the approaches or walks thereto shall be separated by a substantial close fence, not less than seven feet high; and it shall be the duty of the said commissioners to make provisions for keeping the said water-closets or outhouses in clean, comfortable, and healthful condition.

SEC. 2. Any failure on the part of the said public school commissioners to comply with the provisions of this act shall make them liable to be removed from office by any court of competent jurisdiction, either in the city of Baltimore or in any county where the schools may be located, upon complaint made to the court, under oath or affirmation of not less than five taxable citizens, resident in the said school district in which the school complained of is located; provided, nothing in this act shall affect the counties of Caroline, Kent, Dorchester, Somerset, Baltimore, Worcester, Howard, Prince George's, and Frederick.

SEC. 3. That this act shall take effect on and after September first, 1895.

Approved, April 6, 1894.

MICHIGAN.

SAFE EXITS.

[1879, p. 204, May 24, Aug. 30, act 226.]

SEC. 1. *The people of the State of Michigan enact*, That it shall be unlawful for any hall, theater, opera house, church, schoolhouse, or building of any kind whatsoever, in any city or incorporated village, to be used for the assemblage of people unless the same is provided with ample means for the safe and speedy egress of the persons therein assembled in case of alarm.

SEC. 2. That in all cities or incorporated villages it shall be unlawful for any person or persons, society, corporation, or individual whatsoever who may be the owner or owners of or have the control of any hall, theater, opera house, church, schoolhouse, or building of whatsoever kind to use or permit the same to be used for schools or public assemblages of people, unless said person or persons, society, corporation, or individual shall have from the authorities, hereinafter designated, of the city or incorporated village in which said hall, theater, opera house, church, schoolhouse, or building is situated a certificate in writing certifying that they have examined the said hall, theater. opera house, church, schoolhouse, or building, as the case may be, and that the same is well and sufficiently provided with means of speedy and safe egress for public assemblages in cases of danger or sudden alarm: *Provided*, That the doors in the halls of passageways of all such buildings leading from the assembly room to the ground shall be made to open outward in case the proper examining officers shall so order. (An. Sta., 1882, Title XV, ch. 59, secs. 2096, 2097.)

[Am. 1881, p. 36, Mar. 18, Sept. 10, act 41, sec. 3.]

It shall be the duty of the mayor, by and with consent of the common council of every city, and of the president, by and with consent of the board of trustees or village council of every incorporated village in this State, on or before the first day of May in each year, to appoint, in and for their respective cities and villages, three competent mechanics, builders, or architects, to be known as the board of building inspectors of such cities and villages, respectively, who shall hold and execute the duties of their offices until their successors shall be appointed and enter upon the duties of their offices; and whose duty it shall be to make inspection of buildings and structures in their respective cities and villages as herein provided; and in every township in this State the township board is hereby constituted the board of building inspectors in such township, and shall perform and exercise the powers and duties of building inspectors as herein provided.

[Am., Ib., 1881, p. 36, sec. 4.]

Whenever any board of building inspectors, or any two of them, shall be requested to inspect any hall, opera house, schoolhouse, church, stand, platform, or other building or structure of any kind used, or intended to be used, or occupied for schools, or by public assemblages, or by any gatherings or assemblages of people in their city, village, or township, it shall be their duty forthwith to make a thorough inspection and examination of such building, stand, or other structure with reference to its condition. strength, and safety of use or occupation for schools, or by any public meetings, gatherings, or assemblages of people, and for the safe and speedy egress of the persons therein and thereon assembled in case of sudden danger or alarm; and if such board, or any two of them, shall find the same to be sufficiently strong and substantial and amply safe for the use, meeting, and assembling therein or thereon of so many persons as the size and capacity of such building or structure will permit at one and the same time, and for the safe and speedy egress of persons therein and thereon assembled in case of sudden danger or alarm, they shall so certify in writing under their hands and deliver such certificate to the person or persons requesting such examination, and shall state therein for what length of time such building or structure may be deemed safe for the purposes aforesaid. Said inspectors shall keep a record of all buildings and structures inspected by them, with the dates of such inspections, and copies of all certificates granted by them as aforesaid: *Provided*, That if any owner or owners, or person or persons having control of any hall or other building or structure hereinabove mentioned located in any city or incorporated village, shall feel himself or themselves aggrieved by the decision of said authorities, he or they may appeal therefrom to the city council or to the village board of

trustees, or village council, who shall give such person or persons a full and fair hearing, and shall sustain or reverse the action of said board of examiners, and from such decision there shall be no appeal: *And provided further*, That the common council, village council, board of trustees, or township board, as the case may be, may require a reexamination and inspection of any such buildings or structures whenever, from proper information, or otherwise, they shall deem such reexamination and inspection necessary.

SEC. 5. No such buildings or structures as are mentioned in sections two and four of this act shall be used or occupied for any purposes, meetings, or assemblages in those sections mentioned or referred to until after the same shall have been inspected and certified to be safe, as in said sections provided. And if any owner, occupant, lessee, manager, person or persons, officer or officers in charge of or having the management or control of any such building or structure shall permit or allow the same to be used or occupied for any of the purposes or by any such meetings, gatherings, or assemblages of people as are mentioned or referred to in this act, unless such building or structure shall have been first examined and inspected and certified as herein provided to be sufficient and safe for such purposes, meetings, and assemblages, or shall allow such building or structure to be so used or occupied after the time within which the same may be deemed safe, according to such certificate, then, and in every such case, every such owner, occupant, lessee, manager, person, or officer in charge of or having the management or control of any such building or structure so permitting, allowing, or consenting to any such use or occupation shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not less than one hundred nor more than five hundred dollars, or by imprisonment in the State house of correction not less than ninety days nor more than one year, or by both such fine and imprisonment, in the discretion of the court.

SEC. 6. If any owner of such building or structure as aforesaid, or any other person, shall procure or aid in procuring the granting of any such certificate as is mentioned in section four by means of any deceit, misrepresentation, or concealment of any defects in any such building or structure, or if any building inspector shall falsely, negligently, or collusively grant or sign any such certificate as is provided for in said section four, then each and every person so offending shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished in the same manner as provided in section five. (An. Sta. 1882, Title XV, ch. 59, secs. 2098-2101.)

MINNESOTA.

COUNTY SUPERINTENDENT—DUTIES.

County superintendents of schools shall * * * introduce to the notice of teachers and the people the best modes of instruction, the most approved plans of building and ventilating schoolhouses, of ornamenting and adapting school grounds to convenience and the healthful exercise of children. * * * (Sta. 1894, Title I, ch. 36, sec. 3743.)

VACCINATION.

That every person being the parent or guardian or having the care, custody, or control of any minor or other person, shall, to the extent of any means, power, or authority of said parent, guardian, or other person that could properly be used or exerted for such person, cause and procure such minor or person under control to be so promptly, frequently, and effectively vaccinated that such minor or individual should not take or be liable to take the smallpox. (Sta. 1894, Tit. 3, ch. 101, sec. 7069.)

PRECAUTIONS IN SCHOOLS.

That no principal, superintendent, or teacher of any school, and no parent, master, or guardian of any child or minor having the power and authority to prevent shall permit any child or minor having scarlet fever, diphtheria, smallpox, or any dangerous infectious or contagious disease, or any child residing in any house in which any such disease exists or has recently existed, to attend any public or private school until the board of health of the town, village, borough, or city shall have given its permission therefor; nor in any manner to be unnecessarily exposed or to needlessly expose any other person to the taking or to the infection of any contagious disease. (Sta. 1894, Tit. 3, ch. 101, sec. 7010.)

MISSOURI.

DOORS OPEN OUTWARDS.

All the doors for ingress and egress to and from all public schoolhouses and all other public buildings, and also of all theaters, assembly rooms, halls, churches, factories of more than twenty employees, and of all other buildings or places of public resort whatever, where people are wont to assemble, excepting schoolhouses and churches of one room and on the ground floor, which shall hereafter be erected, together with all those heretofore erected and which are still in use as such public buildings or places of resort, shall be so hung as to open outwardly from the audience rooms, halls, or workshops of such buildings or places: *Provided*, That said doors may be hung on double-jointed hinges, so as to open with equal ease outwardly and inwardly. (Rev. Sta. 1889, ch. 131, sec. 7388.)

PENALTY.

Any architect, superintendent, or other person or persons, or body corporate, who may have charge of the erection, or may have control or custody of, any of the said buildings or places of resort mentioned in the preceding section who shall refuse or fail to comply with the provisions of said section within six months from the passage of this chapter, in case of said buildings or places aforesaid which have been heretofore erected, and before the completion or occupation for said purposes of any of said buildings or places now in process of erection, shall, on proof of such refusal or failure before any court of competent jurisdiction, be adjudged to be guilty of a misdemeanor and be punished by a fine of not less than one hundred nor more than one thousand dollars, which said fine shall be collected as is now provided by law for the collection of fines in such cases, and when collected shall be paid into and become a part of the public-school fund of the county, city, or incorporated town in which said misdemeanor was committed. (Rev. Sta. 1889, ch. 131, sec. 7389.)

NEBRASKA.

DOORS OPEN OUTWARDS.

That all public buildings now in process of construction, or hereafter to be built or constructed, which may or shall be used for churches, schoolhouses, operas, theaters, lecture rooms, hotels, public meetings, town halls, or which may or shall be used for any purpose whereby a collection of people may be assembled together for religious worship, amusement, instruction, or other purpose, shall be so built and constructed that all doors leading from the main hall or place where said collection of people may be assembled or from the principal room which may be used for any of the purposes aforesaid, shall be so swung upon their hinges and constructed that they shall open outward, and that all means of egress for the public from the main hall or principal room and from the building shall be by means of doors which shall open outward from the main hall or building. (Comp. Sta. 1891, ch. 70, sec. 1.)

DOORS CHANGED.

That all public buildings now built and used for any of the purposes mentioned in section one of this act shall within one year from the first day of July, A. D. 1877, be so changed that their doors and means of egress shall be in conformity with the provisions of this act: *Provided*, That the provisions of this section shall not apply to churches and schoolhouses already erected in rural districts. (Ib., sec. 2.)

PENALTY.

That any person or persons who shall fail or refuse to comply with the provisions of this act shall be fined in any sum not less than one hundred dollars nor more than one thousand dollars. (Ib., sec. 3.)

BUILDINGS CLOSED.

That in all cities and towns having a population of one thousand inhabitants and upwards the mayor of said town or city shall be, and he is hereby, authorized to close and prohibit all public buildings from being used for any of the purposes mentioned in section one of this act until the provisions of this act shall be complied with. (Ib., sec. 4.)

CITIES OF THE SECOND CLASS AND VILLAGES.—POWERS.

LVI. To regulate, license, or suppress halls, opera houses, churches, places of amusement, entertainment, or instruction, or other buildings used for the assembly of citizens, and cause the same to be provided with sufficient and ample means of exit and entrance, and to be supplied with necessary and appropriate appliances for the extinguishment of fires and for escape from such places in case of fire, and to prevent the overcrowding, and to regulate the placing and using of seats, chairs, benches, scenery, curtains, blinds, screens, or other appliances therein, and to provide that for any violation of any such regulation a penalty of two hundred dollars shall be imposed, and that upon conviction of such license[e] of any violation of any ordinance regulating such places the license of any such place shall be revoked by the mayor and council, and whenever the mayor and council shall by resolution declare any such place to be unsafe the license shall be thereby revoked; and the council may provide that in any case where they have so revoked a license any owner, proprietor, manager, lessee, or person opening, using, or permitting such place to be opened or used for any purpose involving the assemblage of more than twelve persons shall, upon conviction thereof, be deemed guilty of a misdemeanor and fined in any sum not exceeding two hundred dollars. (Com. Sta. 1891, ch. 14, art. 2, LVI.)

NEVADA.

DOORS OPEN OUTWARDS.

SECTION 1. In all public buildings and edifices in this State, such as court-houses, churches, schoolhouses, theaters, and other places where the public assemble in large bodies, the doors whereby people enter and depart from such places shall open outwardly, or outwardly and inwardly, in all such buildings and edifices hereafter erected, and in all such buildings and edifices now in use. If such doors do not now conform to the foregoing requirement they must be made so to do prior to the first day of July, A. D. 1887.

SEC. 2. Any person or persons, agent or agents, of any corporations found guilty of violating any of the provisions of this act shall be punished by a fine not less than one hundred dollars nor exceeding one thousand dollars, or by imprisonment not exceeding one year in the State prison, or by both such fine and imprisonment, as the court shall adjudge. (Sta. 1887, Ch. CXLIII.)

WATER-CLOSETS.

SEC. 1. That boards of school directors and controllers shall provide suitable and convenient water-closets for each of the schools under their official jurisdiction, not less than two for each school or school building where both sexes are in attendance, in their respective school districts, with separate means of access for each, and unless placed at a remote distance one from the other, the approaches or walks thereto shall be separated by a substantial close fence not less than seven feet in height; and it shall be the duty of the directors or controllers to make provisions for keeping the water-closets in a clean, comfortable, and healthful condition.

SEC. 2. Any failure on the part of the school directors or controllers to comply with the provisions of this act shall make them liable to be removed from office by the court of quarter sessions of the county in which the schools are located, upon complaint made to the court, under oath or affirmation, of not less than five taxable citizens resident in the school district in which the school is located.

Approved June 6, 1893. (Laws of 1893, No. 279, pp. 339, 340.)

NEW HAMPSHIRE.

DOORS OPEN OUTWARDS.

The outer doors, and doors of passages leading outwards of churches, schoolhouses, public halls, and buildings to be used for public purposes, except depots, hereafter constructed shall open outwards. (Pub. Sta. 1891, ch. 116, sec. 7.)

PENALTY.

If any person shall refuse to comply with the provisions of the preceding section, he shall pay a fine not exceeding $500, for the benefit of the county where the building is located. (Ib., sec. 8.)

POWERS OF TOWNS AND VILLAGES.

Town and village districts may make by-laws requiring factories, hotels, tenement houses, public halls, schoolhouses, and other buildings used as places of public resort in their towns to be provided with ample means for escape in case of fire, and adequate facilities for entrance and exit on all occasions, and to be so erected as not to endanger the health and safety of persons who may occupy them; and they may provide thereby for the inspection of such buildings. (Pub. Sta. 1891, ch. 116, sec. 1.)

In the absence of such by-laws, the selectmen shall make regulations for the purposes named in the preceding section. (Ib., sec. 2.)

The firewardens and engineers, if any, otherwise the selectmen of the town or the commissioners of the village district, as the case may be, shall constitute a board for the inspection of the buildings and halls mentioned in the first section of this chapter, and shall inspect the same from time to time. (Ib., sec. 3.)

They shall notify and hear all parties interested, and may thereupon direct such alterations as may be necessary in any building or hall in accordance with such by-laws or regulations, and may order such building or hall to be closed until the alterations are made. The proceedings of such hearing shall be recorded in the records of the town or district. (Ib., sec. 4.)

Every person aggrieved by any decision of such inspectors may appeal therefrom to the supreme court. Any justice of any court, in term time or vacation, upon reasonable notice, may inquire into the facts by a committee or otherwise, and affirm or overrule the order appealed from, and may make such further orders as justice may require. (Ib., sec. 5.)

Every person who shall let or use any building for the purposes specified in this act, after such building shall have been ordered to be closed or altered as provided in the preceding sections, until the order has been complied with or reversed, shall be punished by a fine not exceeding $100, for the use of the town or district where the building is situated. (Ib., sec. 6.)

NO SLAUGHTERHOUSE NEAR.

If a person shall use or occupy a building or place near a dwelling house or schoolhouse or in the compact part of a town for a slaughterhouse, a place of deposit of green pelts or skins, or for trying tallow, currying leather, or carrying on any other business that is offensive to the public, without the written permission of the health officers of the town, he shall forfeit ten dollars for each month such building or place shall be so used or occupied, to be recovered for the use of the town. (Pub. Sta. 1891, ch. 108, sec. 15.)

VACCINATION.

No child shall attend any public school unless he has been vaccinated or has had the smallpox. (Pub. Sta. 1891, ch. 93, sec. 2.)

NEW JERSEY.

FIRE ESCAPES.

That all persons owning, leasing, or in any manner having charge or control of any hotel or boarding house, or any public school, or other public building, factory, manufactory, or workshop of any kind, or any other building (in which guests, students, employes, or operatives, or any persons whatsoever, to the number of thirty or more are accommodated, or are steadily or casually at work or do congregate), when any such buildings are three or more stories in height (or any dwelling house three or more stories in height, occupied by, or built to be occupied by, three or more families above the first story), said owners or lessees, or other persons having charge or control of said buildings, shall provide all such buildings with a permanent and safe external means of escape therefrom, which shall be so arranged that in case of fire the ground can be readily reached by the persons occupying the third and higher floors.

2. That it shall be the duty of the fire inspector or superintendent of buildings of any city, town, borough, or township in this State, or of any common council, board of aldermen, or other governing board of any city, town, borough, or township of this State, by whatever name such authorities may be known, in case there

is no fire inspector or superintendent of buildings in such city, town, borough, or township, to designate the number of and the kind and manner of erection of such external fire escapes to or upon any of said buildings, and shall give notice in writing to the owner or lessee or the person having charge or control of any such building, setting forth in said notice the number and kind of, and the manner in which said external fire escape or escapes is or are to be erected, as required by said fire inspector or superintendent of buildings, or by ordinance of said municipal authorities, or by resolution of any of said governing boards.

3. That any violation of this act, or neglect to comply with such notice to put up said fire escape or escapes within ninety days after said notice is received, shall be deemed a misdemeanor; and any person convicted thereof shall be liable to a fine not exceeding three hundred dollars in the discretion of the court; and any person or corporation failing to comply with the provisions of this act shall be liable in an action for damages in case of death or personal injuries sustained because of the absence or disrepair of such fire escape, or in case of fire breaking out in any building upon which there shall be no efficient fire escape; and such action may be maintained by any person now authorized by law to sue, as in other cases of similar injuries.

4. That this act shall take effect immediately, and that all acts or parts of acts inconsistent herewith be, and the same are hereby, repealed.

CONTAGIOUS DISEASES.

21. *And be it enacted*, That the board of health of any township, or any city, borough, town, or other local municipal government in this State shall have the right to declare any epidemic or cause of ill health to be so injurious or hazardous as to make it necessary to close any or all of the public or private schools in the limits of such township, or of such city, borough, town, or other local municipal government; but in case of public schools, the same shall not be closed except by the direction of the board of education, school trustees, or other body having the control or direction thereof; any such board of education, school trustees, or other body having control of public schools may in such case cause any or all of the schools under their control to be closed, if in their judgment such closing be necessary for sanitary purposes.

22. *And be it enacted*, That any board of education, school trustees, or other body having control of the public schools may, on account of the prevalence of any contagious disease, or to prevent the spread of such contagious disease, prohibit the attendance of any teacher or scholar upon any school under their control, and may specify the time during which such teacher or scholar shall remain away from such school, and may prohibit the attendance of any unvaccinated child who has not had the smallpox, and shall also have power to decide how far revaccination shall be required if a case or cases of smallpox have occurred in the city or district.

23. *And be it enacted*, That at the enrollment of the children by the clerk of the school districts in the townships of this State, or by other proper officers in the cities or municipalities, inquiry shall be made as to how many of the children within the school age are unvaccinated, and the same shall be designated by a mark on the said roll, and in case any are found to be unvaccinated whose parents desire them to be protected from smallpox, and who, in the judgment of the board of education or the trustees of the school districts, are unable to pay therefor, the clerk of said district, or other authorized persons, may give to the said child or children a permit to appear at the office of any regularly licensed physician in said district or municipality to be vaccinated, and such physician, on presentation of said permit, with his certificate appended thereto, that the said vaccination has been by him successfully performed, shall be entitled to receive from the said township or local municipal authority the sum of 50 cents for each case so certified, and the same shall be paid in the same manner that other bills for current expenses are paid therein. (Laws of New Jersey, approved Mar. 31, 1887.)

NEW YORK.

PLAN SUBMITTED TO SCHOOL COMMISSIONER.

* * * And no schoolhouse shall be built in any school district of this State until the plan of such schoolhouse, so far as ventilation, heat, and lighting is concerned, shall be approved in writing by said school commissioner. * * * (Rev. Sta. 1893, Com. Schools, sec. 103, p. 558.)

SUPERINTENDENT TO PROCURE PLANS.

The State superintendent of public instruction is hereby authorized and directed to procure architects' plans and specifications for a series of school buildings, to cost sums ranging from six hundred to ten thousand dollars, together with full detail working plans and directions for the erection of the same. After procuring said plans and specifications he shall accompany the same with blank forms for builder's contracts and with suggestions in relation to the preparation of the grounds and the arrangement of the buildings, with regard to lighting, heating, ventilating, and the health and convenience of teachers and pupils, and then publish the whole in convenient form for distribution to trustees and others having use for the same. (Ib., sec. 269, p. 592.)

WATER-CLOSETS.

From and after the 1st day of September, 1887, the board of education, or the trustee or trustees having supervision over any school district of this State, shall provide suitable and convenient water-closets or privies for each of the schools under their charge, at least two in number, which shall be entirely separated each from the other and having separate means of access, and the approaches thereto shall be separated by a substantial close fence not less than seven feet in height. It shall be the duty of the officers aforesaid to keep the same in a clean and wholesome condition, and a failure to comply with the provisions of this act on the part of the trustees shall be sufficient ground for removal from office and for withholding from the district any share of the public moneys of the State. Any expense incurred by the trustees aforesaid in carrying out the requirements of this act shall be a charge upon the district, when such expense shall have been approved by the school commissioner of the district within which the school district is located; and a tax may be levied therefor without a vote of the district. (Ib., sec. 268, p. 592.)

1. VACCINATION.

The trustees of the several common school districts in this State, and the proper local boards of common school government in the several cities of the State, are hereby directed and empowered, under the provisions hereinafter set forth, to exclude from the benefits of the common schools therein any child or any person who has not been vaccinated, and until such time when said child or person shall become vaccinated. (Ib., sec. 328, p. 602.)

2. RESOLUTION OF TRUSTEES.

The said trustees or local board may adopt a resolution to carry into effect the power conferred by the first section hereof; and whenever they shall do so, they shall give at least ten days' notice thereof by posting the same in two or more public or conspicuous places within the limits of their school government, and shall in said notice advertise due provision for the vaccination of any child or person of suitable age who may desire to attend the common school, and whose parents or guardians are unable to procure vaccination for them or for the children of suitable age of such parents as by reason of poverty may be exempted from taxation in such school districts. (Ib., sec. 329, p. 602.)

3. PROVISION FOR VACCINATING.

The said trustees or board may, in their or its discretion, appoint some competent physician and fix the compensation for his services, the duty of which physician shall be to ascertain the number of children or persons in the school district or subdivision of city school government being of an age suitable to attend the common school who have not been already vaccinated, and also to furnish to the said trustees or said board a list of the names of all such children or persons. It shall also be the duty of said physician to provide himself with good and reliable vaccine virus wherewith to vaccinate such of the number of children or persons aforesaid as have not been vaccinated according as the trustees or board shall direct, and to thereupon give certificates of vaccination when required, which certificates shall be evidence thereof for the purposes of a compliance with section first hereof. (Ib., sec. 330, p. 602.)

4. EXPENSES.

The necessary expenses incurred by the provisions of this act shall be included and collected in the annual tax bill of the district, town, village, or city as may be proper according to law. (Ib., sec. 331, p. 602.)

5. REPORT.

The trustees of the several school districts of this State are hereby required to include in their annual report the number in their several districts between the ages of 5 and 21 years who are vaccinated, and the number unvaccinated. (Ib., sec. 332, p. 602.)

NORTH CAROLINA.

CONTAGIOUS DISEASES.

SEC. 12. The county superintendents of health, or the board of health in the several cities and towns where organized, otherwise the authorities of said cities or towns, shall cause a record to be kept of all reports received in pursuance of the preceding sections, and such records shall contain the names of all persons who are sick, the localities in which they live, the diseases with which they are affected, together with the date and names of all persons reporting any such cases. The boards of health of cities and towns wherever organized, and where not the mayors of the same, and in other cases the county superintendent of health, shall give the school committee of the city or town, the principals of private schools, and the superintendent of public instruction of the county, when the schools are in session, notice of all such cases of contagious diseases reported to them according to the provisions of this act. A failure to perform this duty for twenty-four hours after the receipt of the notice shall be deemed a misdemeanor, and subject the delinquent upon conviction to a fine of not less than $10 nor more than $50.

SEC. 13. The school committees of public schools, superintendents of graded schools, and the principals of private schools shall not allow any pupil to attend the school under their control while any member of the household to which said pupil belongs is sick of either smallpox, diphtheria, measles, scarlet fever, yellow fever, typhus fever, or cholera, or during a period of two weeks after the death, recovery, or removal of such sick person; and any pupil coming from such household shall be required to present to the teacher of the school the pupil desires to attend a certificate from the attending physician, city health officer, or county superintendent of health of the facts necessary to entitle him to admission in accordance with the above regulations. A willful failure on the part of any school committee to perform the duty required in this section shall be deemed a misdemeanor, and upon conviction shall subject each and every member of the same to a fine of not less than one nor more than twenty-five dollars: *Provided*, That the instructions in accordance with the provisions of this section given to the teachers of the schools within twenty-four hours after the receipt of each and every notice shall be deemed performance of duty on the part of the school committee. Any teacher of a public school and any principal of a private school failing to carry out the requirements of this section shall be deemed guilty of a misdemeanor, and upon conviction shall be fined not less than one nor more than twenty-five dollars.

SEC. 23. *Vaccination.*—On the appearance of a case of smallpox in any neighborhood all due diligence shall be used by the superintendent of health that warning shall be given, and all persons not able to pay shall be vaccinated free of charge by him, and the county superintendent shall vaccinate every person admitted into a public institution (jail, county home, public school) as soon as practicable, unless he is satisfied upon examination that the person is already successfully vaccinated; the money for vaccine to be furnished by the county commissioners. The authorities of any city or town, or the board of county commissioners of any county, may make such regulations and provisions for the vaccination of its inhabitants under the direction of the local or county board of health or a committee chosen for the purpose, and impose such penalties as they may deem necessary to protect the public health. (Ratified March 1, 1893.)

OHIO.

CONSTRUCTION OF HALLS, ETC.

On application of the owner or person having control of an opera house, hall, theater, church, schoolhouse, or other building, except buildings where secret societies are held, used for public assemblages, in any municipal corporation, the mayor,

civil engineer, and chief engineer of the fire department, or if such corporation has no such engineer, the mayor and two members of council shall carefully make a joint examination of such opera house, hall, theater, church, schoolhouse, or other building, to ascertain the means provided thereat and therein for the speedy and safe egress of the persons that may at any time be there assembled, and the means provided for extinguishing a fire at or in such place; provided, that when the assembly rooms of such church are situated upon the ground floor, with a sufficient number of low windows, in the opinion of the commission above provided for, to secure safe and easy means of escape in case of alarm, they shall grant the certificate mentioned in the next following section. (Rev. Sta. 1890, Tit. XII, div. 8, ch. 8, sec. 2568.)

If upon such examination it is found that such opera house, hall, theater, church, schoolhouse, or other building is abundantly provided with means for the speedy and safe egress of the persons who may at any time be there assembled, and if above the first floor, that it is provided therein with water or other equally efficient agency, and proper means to apply it, so that any fire which may occur at such place can be immediately extinguished, the mayor, and persons so acting with him, or a majority of the three, shall issue to such owner or person having control as aforesaid, a certificate of the fact, which shall continue in force one year, unless sooner revoked by the council. (Ib., sec. 2569.)

If any change or alteration is made in such building, the owner or person having charge of it shall notify the mayor of the fact, who shall cause to be made a reexamination in all respects like that provided for in the last section, and if upon such examination such owner, or person having control, is entitled to such certificate as is mentioned in the last section it shall be issued to him with like effect. (Ib., sec. 2570.)

If any owner or person having control of such place as aforesaid shall feel himself aggrieved by the refusal of such officers to issue any such certificate, he may appeal from the decision of the council, which shall appoint three disinterested persons to examine the premises, any two of whom may issue the certificate provided for in sections two thousand five hundred and sixty-nine and two thousand five hundred and seventy. (Ib., sec. 2571.)

Whoever, being the owner or having control as an officer, agent, or otherwise, of any opera house, hall, theater, church, schoolhouse, or other place for [the] public assemblage of people in a municipal corporation, permits it to be used when any door affording exit therefrom is locked or barred or opens inwardly, when the place is not provided with ample means for the safe and speedy egress of the persons who may be so assembled; when, if it is on another than the first floor, sufficient water and proper means to apply it. or other efficient means, are not provided in such place to extinguish any fire which may occur thereat; or when the certificate provided for in section twenty-five hundred and sixty-nine or section twenty-five hundred and seventy, as the case may be, has not been issued or is not in full force, shall for each day or night he permits such place to be so used or occupied forfeit and pay any sum not more than one thousand dollars nor less than fifty dollars to be recovered with costs in a civil action, in the name and for the use of the municipal corporation, and it shall be the duty of the mayor, with the aid of the police, to see that the provisions of this section are strictly enforced. (Ib., sec. 2572.)

That whenever any structure referred to in section 2572 shall have been inspected by the State inspector of shops and factories, and such inspector shall have issued to the owner thereof or his agent a certificate that such structure is properly arranged for the safe and speedy egress of persons who may be assembled therein, and also properly provided for the extinguishment of fire at or in such structure as now provided by law, then such certificate shall dispense with all other inspections and certificates required by law in regard to the safety of such structures for public assemblages. (Ib., sec. 2572a.)

It shall be the duty of the State inspector of shops and factories to make such inspection whenever called upon by written demand of the agent or owner of such structure, or upon the written request of five or more citizens of the municipal corporation where such structure is located, and not otherwise. (Ib., sec. 2572b.)

PENALTY.

Whoever, being the owner of a hall, theater, opera house, church, or schoolhouse, having the control thereof, individually or by virtue of his office as agent of any society or corporation, permits the same to be used for the purpose of public assemblies or schools without having the certificate required by law that the

same is provided with the means of speedy and safe ingress and egress, shall be fined not more than one thousand dollars for each and every such offense. * * * (Ib., tit. 1, ch. 8, sec. 7010.)

FIRE ESCAPES.

That all buildings, except such as are used exclusively for private residences, in every city of the first and second grades of the first class, of three or more stories in height, shall each be provided with one or more good and suitable fire escapes, extending from the first story to the upper stories of such building and above the roof and on the outer walls thereof in such location and numbers and of such material and construction as will insure safe and convenient exit for all occupants of any such building in case of fire, and all passageways leading to such fire escapes shall at all times be kept open and free from obstruction, and any person in any manner obstructing the same or causing the same to be obstructed shall be fined not less than twenty-five dollars nor more than one hundred dollars for the first offense, and for any subsequent offense he shall be fined not less than one hundred dollars nor more than two hundred dollars and be imprisoned in the workhouse for a period of not less than ten nor more than sixty days. (Ib., Pt. V, ch. 33, 9209, sec. 1.)

VACCINATION.

The board of each district [board of education] may make and enforce such rules and regulations to secure the vaccination of, and to prevent the spread of smallpox among, the pupils attending or eligible to attend the schools of the district as in its opinion the safety and interest of the public require; and the boards of health and councils of municipal corporations, and the trustees of townships, shall, on application of the board of education of the district, provide at the public expense, without delay, the means of vaccination to such pupils as are not provided therewith by their parents or guardians. (Ib., Tit. III, ch. 7, sec. 3986.)

INSPECTION OF SCHOOLS.

SEC. 2135. The board of health may take measures and supply agents and afford inducements and facilities for gratuitous vaccination, and may furnish disinfectants and enforce disinfection. It may afford medical or other relief to and among the poor of the corporation as in its opinion the protection of the public health may require, and during the prevalence of any epidemic may provide temporary hospitals for such purposes; and the said board is hereby required to inspect semiannually, and oftener if in the judgment of the board it shall be deemed necessary, the sanitary condition of all schools and school buildings within its jurisdiction and may, during an epidemic or threatened epidemic, close any school and prohibit public gatherings for such time as it may deem necessary. (O. L., vol. 90, March 14, 1893.)

CONTAGIOUS DISEASES.

RULE 1. No person suffering with diphtheria, scarlet fever, smallpox, measles, whooping cough, or other dangerous communicable disease shall be admitted into any public, parochial, or private school or college or Sunday school, or shall enter any assemblage, or railway car, street car, vessel or steamer, or other public conveyance.

RULE 2. No person shall be admitted into any public, parochial, or private school or college or Sunday school from any house or building in which has recently occurred a case of dangerous communicable disease, without first presenting a certificate signed by a reputable physician that all danger of communicating such disease is past, and said certificate is endorsed by the board of health or its proper officer within whose jurisdiction the person may reside or be. (Rules and Regulations of the Ohio State Board of Health, adopted June 30, 1893.)

PENNSYLVANIA.

PLANS FOR SCHOOL BUILDINGS.

The superintendent of common schools shall be authorized to employ a competent person or persons to submit and propose plans and drawings for a school architecture for different grades and classes of school buildings that shall be adapted for furnishing good light and healthful ventilation, and if such plans and drawings are approved by the superintendent of common schools he is hereby directed

to have them engraved and printed, with full specifications and estimates for building in accordance therewith, and shall furnish a copy of the same to each school district. (Sta. 1883, XI, 116, p. 300.)

FIRE ESCAPES.

SECTION 1. That in addition to the means of escape required in section one of the act to which this is a supplement, it shall be the duty of the owner or owners, in fee or for life, of every building constructed more than two stories high and used or intended to be used as a * * * school, seminary, college, academy, * * * and of the board of education, or board of school directors having charge of any building constructed more than two stories high and used or intended to be used as a public school, to provide and cause to be securely affixed to a bolt through the wall over the window head inside of at least one window in each room on the third floor, and in each room on each higher floor of every such building a chain at least ten feet in length with a rope at least one inch in diameter, securely attached thereto, of sufficient length to extend to the ground, or such other appliance as may be approved by the board of fire commissioners of any city having a board of fire commissioners, or by the county commissioners of any county where there is no board of fire commissioners: *Provided, however*, That when the third floor or any higher floor of any such building is not subdivided into rooms, then at least six windows of each of such floors shall be provided with such chains and ropes or such other appliances as may be approved. * * * *And provided further*, That whenever any room on any third floor or on any higher floor of any such building shall contain more than three windows, then at least one window out of every three windows in every such room shall be provided with such chain and rope or other such appliances as may be approved. * * * And each of such ropes shall be coiled and kept in an unlocked box in an unobstructed place, near the inside sill of the window to which such rope is attached. * * * And in all * * * schools, seminaries, colleges, * * * the hallways and stairways shall be promptly lighted at night, and at the head and foot of each flight of stairs and at the intersection of all hallways with main corridors shall be kept during the night a red light, and one or more proper alarms or gongs, capable of being heard throughout the building, shall always remain easy of access and ready for use in each of said buildings to give notice to the inmates in case of fire. And every keeper of such * * * school, seminary, college, * * * shall keep posted in a conspicuous place in every sleeping room a notice descriptive of such means of escape. And the board of fire commissioners and the county commissioners of any county having no board of fire commissioners shall have the right to designate the location of the chains and ropes or other such appliances, * * * and shall grant certificates to every person, firm, corporation, trustees, board of education, and board of school directors complying with the requirements of this act, which certificates shall relieve the party or parties to whom the same shall be issued from the liabilities, fines, damages, and imprisonment imposed by this act. (Laws of 1889, No. 189, pp. 170–172.)

WATER-CLOSETS.

1. That boards of school directors and controllers shall provide suitable and convenient water-closets for each of the schools under their official jurisdiction, not less than two for each school or school building where both sexes are in attendance, in their respective school districts, with separate means of access for each, and unless placed at a remote distance one from the other the approaches or walks thereto shall be separated by a substantial, close fence, not less than seven feet in height, and it shall be the duty of the directors or controllers to make provision for keeping the water-closets in a clean, comfortable, and healthful condition.

2. Any failure on the part of school directors or controllers to comply with the provisions of this act shall make them liable to be removed from office by the court of quarter sessions of the county in which the schools are located upon complaint made to the court, under oath or affirmation, of not less than five taxable citizens resident in the school district in which the school is located. (Laws of 1893, No. 279.)

RHODE ISLAND.

NUISANCES PROHIBITED.

No person shall keep any swine in any pen or other inclosure, or shall keep or suffer to be kept any other nuisance, within one hundred feet of any schoolhouse or within one hundred feet of any fence inclosing the yard of any such schoolhouse. (Pub. Stat. 1882, Tit. IX, ch. 61, sec. 8.)

VACCINATION.

No person shall be permitted to attend any public school in this State as a pupil unless such person shall furnish to the teacher of such school a certificate of some practicing physician that such person has been properly vaccinated, as a protection against smallpox, and every teacher in the public schools shall keep a record of the names of such pupils in their respective schools as have presented such certificates. (Ib., sec. 14.)

PENALTY.

Every person violating any provisions of this chapter shall be fined not exceeding fifty dollars or be imprisoned not exceeding thirty days, unless herein otherwise provided. (Ib., sec. 15.)

TENNESSEE.

THE STATE BOARD OF HEALTH.

SEC. 6. * * * They shall, when they deem it necessary, advise in reference to location, water supply, drainage, and ventilation of any public institution. (An act to create a State board of health. Passed March 26, 1879; approved March 26, 1879.)

UTAH.

CONTAGIOUS DISEASES.

The district school boards shall not allow any pupil to attend the district schools while any member of the household to which such pupil belongs is sick of any infectious or contagious disease or during a period of two weeks after the death, recovery, or removal of such sick person. (Laws of Utah, 1890, Art. XIII, sec. 89.)

VIRGINIA.

CONSTRUCTION OF SCHOOLHOUSES.

In erecting or providing schoolhouses for public free schools the utmost economy shall be observed consistent with health and decency, and no house shall be erected without first consulting with the county superintendent concerning the style of the structure and the arrangements about the buildings and grounds. No public school shall be allowed in any building which is not in such condition and provided with such conveniences as are required by a due regard to decency and health; and when a schoolhouse appears to the county superintendent of schools to be thus unfit for occupancy it shall be his duty to condemn the same, and immediately to give notice thereof in writing to the chairman of the board of district school trustees; and thenceforth no public free school shall be held therein, nor shall any part of the State or county fund be applied to support any school in such house until the county superintendent shall certify in writing to the board of district school trustees that he is satisfied with the condition of such building and with the appliances thereto. (Code 1882, tit. 22, ch. 66, sec. 1489.)

CONTAGIOUS DISEASES.

Persons suffering with contagious diseases shall be excluded from the public free schools while in that condition, and the teachers shall require of the pupils cleanliness of person and good behavior during their attendance at the school and on the way thither and back to their homes, and no pupils shall be admitted unless they have been vaccinated; provided that the operation of this clause concerning vaccination may be suspended in whole or in part by the school board of any city or county. (Ib., sec. 1496.)

WEST VIRGINIA.

PLANS OF SCHOOLHOUSES.

No schoolhouse shall be erected unless the plan thereof shall have been submitted to the county superintendent and approved by him, and it is hereby made his duty to acquaint himself with the principles of schoolhouse architecture, and, in all his plans for such structures, to have regard to economy, convenience, health, and durability of structure. (Code 1891, ch. 45, par. 35.]

WISCONSIN.

DOORS OPEN OUTWARDS.

All churches, public and private schoolhouses, hotels, factories, or other manufacturing establishments constructed at any time after the passage of this act shall be so constructed that the doors shall swing outward, or both in and out, as the builders thereof elect. (An. Sta. 1889, Ch. LXXVIIa., sec. 1636c.)

PENALTY.

Any architect who shall draw plans for or superintend the erection of any schoolhouse, church, hall, factory, or hotel without providing in said plans the fire escapes and outward-swinging doors now required by law shall be guilty of a misdemeanor, and on conviction thereof shall be fined twenty-five dollars for the first offense and one hundred dollars for each subsequent offense. (An. Sta. 1889, Tit. XXXII, Ch. CLXXXI. sec. 4390a.)

Any person or persons, body corporate, official or officials who shall erect or cause to be erected any building named in this act [this and the preceding sections] without providing the fire escapes and outward-swinging doors, or who shall neglect to provide the same as required by law, shall be guilty of a misdemeanor, and upon conviction thereof shall be fined one hundred dollars. (Ib., sec. 4390b.)

STATE BOARD OF HEALTH.

* * * They shall voluntarily, or when required, advise public boards or officers in regard to the location, drainage, water supply, disposal of excreta, heating, and ventilation of any public building or institution. (Ib., Tit. XV, Ch. LVI, sec. 1407.)

VACCINATION.

SEC. 1. No child shall be allowed to be enrolled as a pupil in any public, private, or parochial school without first presenting to the principal or teacher of the school in which he applies for enrollment or attendance the certificate of a reputable physician that he has been successfully vaccinated, or in lieu of such certificate of successful vaccination a certificate from a reputable physician that such child has been vaccinated at least twice within a period of three months next preceding the date of such application. Such latter certificate, however, shall be void after the expiration of one year from its date.

SEC. 2. No parent or guardian of any child shall allow or permit such child to attend any public, private, or parochial school in this State, and no principal or teacher of any such school shall allow a child to be enrolled as a pupil or attend such school as such without the evidence of vaccination herein required, and it is hereby made the duty of the proper school authorities in their respective localities to enforce the foregoing rule. (Adopted by the State board of health of Wisconsin June 21, 1894.)

CITY LEGISLATION.

BALTIMORE.

CONSTRUCTION OF BUILDINGS.

Exits from public buildings shall be so arranged as to facilitate egress in case of fire or accident. All aisles and passageways in such buildings shall be kept free from chairs or other obstructions during any public assemblage. (Laws relating to the inspection and construction of buildings, p. 28.)

CONTAGIOUS DISEASES.

57 to 60. It shall be the duty of all physicians who may be in attendance in any family whose child or children may be attending any of the public schools of this city, which family may have a case or cases of scarlet fever, diphtheria, measles, smallpox, chicken pox, whooping cough, or any other contagious disease, to give a certificate of the same to the parents or parent of the child or children so diseased as soon as the disease is developed; and it shall be the duty of the parents or parent, as soon as the physician certifies that contagious disease exists in his, her, or their house, to notify the principal of the school attended by his, her, or their children within twenty-four hours. That if there be no physician attending in cases of disease mentioned in this ordinance, it shall be the duty of the parents or parent to report the disease to the principal of the school attended by his, her, or their child or children within twenty-four hours from the time the disease is known to be contagious; that if any parent or physician shall notify any public school teacher of the city that any contagious disease exists in any family whose child or children are attending any of the public schools of this city, then it shall be the duty of the principal of the school to exclude the child or children of said family from the school until the attending physician certifies that all danger from contagion has passed; that if any teacher or teachers reside, board, or lodge in any house where a child or children in such house are suffering with any contagious disease, of which fact said teacher has been cognizant, then it shall be the duty of said teacher to certify to the same to a member of the school board, and such teacher shall not perform his or her duties in any public school in this city until a physician attending such case or cases of contagious disease shall certify that all danger from contagion has passed. Failure to comply with the provisions of this ordinance will subject the offender to a fine of ten dollars.

61. When scarlet fever, diphtheria, measles, smallpox, chicken pox, whooping cough, or any other contagious disease has existed in any family whose child or children have been attending any of the public schools of this city, which child or children had not been attended by any practicing physician, then it shall be the duty of any vaccine physician who may be applied to for a certificate that all danger from contagion has passed to visit the premises, if in his district, where said child or children had been sick, and if there should exist no danger from contagion he should give the certificate applied for free of charge. (City Ordinances.)

COMMITTEE ON HEALTH.

The committee on health shall examine, consider, and report upon all matters relating to the sanitary condition of the schools. (Rules of Order of the Commissioners of Public Schools, 63, p. 14.)

ADMISSION OF PUPILS.

Children over six years of age, properly vaccinated or otherwise protected against smallpox, may be admitted at any time to any of the grades except that for beginners upon the assurance from the parents or guardians that the pupil shall attend regularly and shall always appear in school with proper neatness and cleanliness. (Ib., 129, p. 32.)

CONTAGIOUS DISEASES.

No teacher nor pupil having any contagious disease, as measles, scarlet fever, diphtheria, whooping cough, smallpox, or chicken pox, or residing in a house in which any such disease exists shall be permitted to attend any of the public schools until a physician shall certify that no danger from contagion exists. (Ib., 172, p. 41.)

DUTIES OF JANITRESSES.

Janitresses shall thoroughly sweep the schoolrooms, halls, stairways, &c., every school day after the close of the school. No sweeping shall be done in the morning. They shall dust carefully all the furniture, window sills, &c., every morning before the opening of school.

If stoves are used they shall start the fires in time to produce a temperature of 70° in the schoolrooms at the hour for opening the schools. * * *

They shall give daily attention to the water-closets, and keep them in proper condition.

They shall scrub the entire building, rooms, halls, &c., and wash the windows during the holidays at Easter and in August. * * * They shall wash the rooms and glass partitions during the Christmas holidays. * * * (Ib., Art. XXI, pp. 61, 62.)

BOSTON.

COMMITTEE ON SCHOOL-HOUSES.

SEC. 43. The committee on schoolhouses shall consider all applications for the erection, alterations, or repairs of schoolhouses; and they shall report to the board in writing before any action thereon is taken. They shall have the general supervision of the warming and ventilation of the several schoolhouses.

This committee shall consider the fitness of any location, and suitableness of any plans for any schoolhouse to be erected, or the plans for any addition to or alteration of any building to be used for school purposes, which may be submitted to the board for approval by the city council or any committee thereof. And this committee, after having obtained the opinion thereon in writing of the superintendent of schools and after reporting it to board, is then authorized, unless otherwise ordered, to approve or disapprove any such location or plans.

SUPERINTENDENT OF SCHOOLS.

SEC. 159. He [the superintendent] shall consult with those who have control of the building and altering of schoolhouses, and shall communicate to them such information on the subject as he may possess; he shall suggest such plans as he may consider best for the health and convenience of the teachers and pupils. * * *

DUTY OF PRINCIPALS.

SEC. 201. Each principal shall prescribe such rules for the use of the yards and outbuildings as shall insure their being kept in a neat and proper condition; he shall examine them as often as may be necessary for that purpose; he shall be held responsible for any want of cleanliness on the premises; and when anything is out of order he shall give immediate notice thereof to the auditing clerk. Each principal shall give such instructions to his assistants as will prepare them to act prudently and promptly in case of a fire in the school building; and he shall so train the pupils that at a given signal they will leave the schoolhouse in order and speedily. The fire alarm shall be given at least once each month from September to April. Each principal shall see that the outside doors of all the school buildings of his district are kept unlocked during school hours.

TEACHERS.

SEC. 223. Teachers shall give vigilant attention to the ventilation and temperature of their school-rooms, both in winter and summer, and see that the air of the rooms is effectually changed at each recess and at the end of each school session.

VACCINATION.

SEC. 233. No pupil shall be admitted to any of the public schools without a certificate of a physician that such pupil has been vaccinated, but this certificate shall not be required of pupils who are transferred from one public school to another. No child sick with the whooping cough shall be allowed to attend school, nor shall any child be allowed to attend any school in this city while any member of the household to which such child belongs is sick with smallpox, diphtheria, scarlet fever, or measles, or during a period of two weeks after the death, recovery, or

removal of such sick person, such length of time being certified in writing to a teacher by a physician or by the board of health. Whenever, by reason of the structure of tenement or other dwelling houses, families live in close contact with one another, so as to be practically as one family, the teachers and officers of the school board shall regard such houses in which the families do not live apart or are not removed from contagion as one household, within the meaning of chapter 64 of the laws of 1884 and the acts in addition thereto. When children are absent from school on account of sickness and whenever the principal has reason to suspect the existence of contagious diseases in any household he shall be authorized to exclude pupils from school until the cases can be properly investigated. Pupils shall not be sent during school hours to the houses of absent pupils to ascertain the reasons for such absence. The principal of any school, upon the receipt of information satisfactory to him that any pupil attending a school under his charge has visited a household where, at the time of such visit, smallpox, diphtheria, scarlet fever, or measles existed, shall suspend such pupil from school for a period of two weeks next following such visit.

CLEANLINESS.

SEC. 234. Every pupil must come to school cleanly in his person or dress and with his clothes in proper repair. In case of neglect in this respect it shall be the duty of the teacher to send him home to be suitably prepared for school. (Rules of the school committee and regulations of the public schools, 1893.)

BROOKLYN.

COMMITTEE ON HEALTH.

This committee shall consist of five members, whose duty it shall be to take into consideration all questions affecting the healthfulness of schoolhouses and the health of pupils and teachers, and to report upon such subjects in this relation as may be referred to them by the board; to make such recommendations and reports from time to time as they may deem promotive of the health of pupils and teachers; to prepare such schedule for and require from the teachers such records and memoranda as they may consider necessary to elicit information for the promotion and protection of the health of those who attend the schools, when directed by the board of education; and, in conjunction with the local committee, to carry into effect such measures in this regard as may be approved by the board. (By-laws of the Board of Education, Art. VI, sec. 18.)

DOORS TO BE UNFASTENED.

* * * All modes of egress from the building, including the visitors' doors, shall be unfastened during school hours. * * * (Ib., Art XIII, sec 2.)

FLOOR AND AIR SPACE.

The seats in all new school buildings hereafter to be erected shall be placed so as to allow at least 12 square feet of floor space and 200 cubic feet of air space for each primary pupil, 14 square feet, and 225 cubic feet for each grammar-grade pupil below the fifth grade, and 18 square feet, and 250 cubic feet for each grammar-grade pupil above the sixth grade; and no new school building shall be erected which does not provide outgo and income air flues of sufficient size, so planned as to insure a change of all air of each schoolroom in said building from three to six times per hour. (Ib., Art. XV, sec. 14.)

NUMBER OF SITTINGS.

The maximum number of sittings to be placed in a primary class room in any school building to be erected shall be 56; in grammar class rooms below the fifth grade, 48; and in grammar class rooms above the sixth grade, 40.

WINDOWS.

No seats in any school building to be erected shall face the windows. * * * (Ib., Art., XV sec. 15.)

VACCINATION CERTIFICATE.

When a child is presented for admission to a public school of this city the principal shall ascertain at the time that he or she has been satisfactorily vaccinated, or has had the smallpox, and record the fact with the child's name. And when it is known that a child has been sick of scarlet fever, diphtheria, smallpox, measles, or any dangerous infectious or contagious disease, or when a child resides in any house in which any such disease exists or has recently existed, it shall not again be received into the school without a permit from the department of health. (Ib., Regulations for the Schools, Pt. III, sec. 17.)

CHICAGO.

HEALTH AND SAFETY.

That no master, or teacher, or manager of or in any school, public or private, or in any Sunday school or gymnasium, nor the officers or managers thereof, nor officers or managers or persons having charge of any place of public worship, shall so far omit or neglect any duty or reasonable care or precaution respecting the safety or health of any scholar, pupil, or attendant, or respecting the temperature, ventilation, or cleanliness or strength of any church, hall of worship, schoolhouse, schoolroom, or place of practice or exercise, or relative to anything appurtenant thereto, as that by reason of such neglect or omission the health of any person shall suffer or incur any avoidable peril or detriment. (City ordinances, 1890, sec. 1376, passed July 21, 1884.)

VACCINATION.

That no principal of any public school, and no principal or teacher of any private, sectarian, or other school shall admit to such school any child or minor who shall not have been vaccinated within seven years next preceding the admission or application for admission to any such school of such child or minor; nor shall any such principal or teacher retain in, or permit to attend, any such school any child or minor who shall not have been vaccinated within seven years next preceding the taking effect of this article. (Ib., sec. 1479, passed Nov. 5, 1883.)

CERTIFICATE.

The evidence of such vaccination to be presented to any such principal or teacher as is mentioned in the preceding section shall be a certificate signed by the commissioner of health or any physician duly licensed by the State board of health. (Ib., sec. 1480.)

COMMISSIONER OF HEALTH.

The commissioner of health is hereby empowered to visit any and all public and private schools in the city and to make, or cause to be made, an examination of the children and minors in attendance thereon, as often as he may deem necessary to secure compliance with the provisions hereof. (Ib., sec. 1481.)

PENALTY.

Any principal of a public school, or principal or teacher of any private or other school, who shall violate the provisions of section 1479, or shall in any way prevent or attempt to prevent the commissioners of health from exercising the power conferred upon him by section 1481, shall be fined for each offense not less than five dollars nor more than two hundred dollars. (Ib., sec. 1482.)

COMMITTEE ON BUILDINGS AND GROUNDS.

The committee on buildings and grounds shall exercise a general supervision over all school buildings and grounds. It shall give attention to the heating, lighting, ventilation, and sanitary condition of all school buildings and premises, to the preparation of blackboards and other permanent fixtures, to the making of repairs, alterations, additions, and improvements to all school property, except as otherwise provided, and to the erection of all new buildings; and shall attend to the selection of new school sites, shall exercise a general supervision over the purchase thereof, in behalf of the board. * * * (Rules and regulations of the board of education, 1891, Pt. I, sec. 10.)

DUTIES OF THE CHIEF ENGINEER.

The chief engineer, with such assistance as shall be necessary, shall have the supervision and control of the engineers and janitors employed by the board, in respect to their duties connected with the heating and lighting apparatus, and the plumbing, sewerage, and ventilation of schools.

He shall visit the several school buildings as often as practicable, shall carefully examine the heating apparatus, plumbing, gas fitting, sewerage, and ventilation of the buildings; shall make prompt suggestions and recommendations to the committee on buildings and grounds in regard to desirable repairs, alterations, additions, and improvements, and see that the heating and ventilating apparatus is at all times kept in a proper and effective condition by the engineer or janitor in charge of the same. * * *

He shall consult and advise with the architect of the board in reference to all plans and specifications prepared by the architect for heating and ventilation, plumbing, gas fitting, and sewerage of new school buildings, and shall, under the direction of the architect, superintend the construction of the same.

He shall superintend all alterations, additions, and repairs to the heating and ventilating apparatus, also the plumbing, gas fitting, and sewerage of old buildings. * * * (Ib., sec. 38.)

TEMPERATURE.

During the season for fires the teachers shall carefully observe the state of the thermometers and endeavor to keep the temperature of the rooms from 65° to 70° Fahrenheit. If in any case the temperature is found to rise above 70° measures shall immediately be taken to reduce it, and if it is found to be below 65° measures shall immediately be taken to raise it. The thermometer should be located at a height of from three to five feet from the floor. (Ib., Pt. II, p. 18.)

DUTIES OF PRINCIPALS.

The principals of the several schools shall * * * give personal attention to the protection, health, and comfort of their pupils in the school building and on the school grounds, and shall see that the school buildings * * * are kept properly cleaned, warmed, and ventilated in strict conformity with the rules and regulations of the board in relation thereto. * * * (Ib., p. 19.)

GROUND FOR TRANSFER OF PUPILS.

The following grounds alone will be considered sufficient to warrant a transfer:

First. To relieve a school which has more pupils than seats, in which case transfers may be made to a school which has vacant seats.

Second. To prevent injury to health from greater distance, from additional flights of stairs, or from other special cause—the probable injury to be determined by the certificate of some well-accredited physician. * * *

VACCINATION.

No pupils shall be received into any public school without furnishing a physician's certificate that they have been vaccinated or otherwise secured against the smallpox; nor shall pupils who have not been vaccinated or revaccinated within seven years be allowed to remain in any school unless they have had either the smallpox or varioloid.

CLEANLINESS.

Any children coming to school without proper attention having been given to the cleanliness of their person or dress, or whose clothes need repairing, shall be sent home by the principals to be properly prepared for the schoolroom.

CONTAGIOUS DISEASES.

No pupils affected with any communicable disease or living in any building with persons thus affected shall be allowed to remain in any of the public schools. (Ib., p. 19.)

DUTIES OF JANITORS.

Janitors shall * * * before leaving their buildings at night see that the buildings have been carefully swept. * * * (Ib., p. 26.)

Janitors shall attend to the washing of windows, * * * to the removal of dust from the walls and ceilings of their respective school buildings, shall keep all the rooms and walls of the buildings in neat condition. * * *

During the winter, spring, and summer vacations the engineers and janitors of school buildings owned by the city shall thoroughly wash and scrub the floors, seats, desks, wainscoting, and other painted woodwork of their buildings. * * * (Ib., pp. 27, 28.)

CINCINNATI.

VENTILATION.

Teachers are required, for the preservation of the health of themselves and pupils, to give particular attention to the ventilating and warming of their rooms, and always to ventilate, except in summer, by lowering the upper sash of the windows, and on no account to suffer the children to sit in drafts of cold air: and, as a general rule, to cause all the windows to be opened for the free admission of air at recess, and at no time to raise the temperature of the room higher than 65 degrees Fahrenheit. (Rules of the board, 106, Nov. 5, 1853.)

CONTAGIOUS DISEASES.

No pupil known to be infected with a contagious or infectious disease, or coming from a family where any such disease prevails, shall be received or continued in the common schools; and no pupils shall be admitted who do not exhibit to their teachers satisfactory evidence of having been vaccinated. (Ib., 76, Dec. 26, 1854.)

JANITORS' DUTIES.

They shall do or shall cause to be done all the scrubbing and cleaning as required by the principal. * * * They shall scrub or mop the floors of the halls and the rooms and wash the stairs, the windows, and woodwork as often as may be necessary to cleanliness as indicated by the principal; keep the yards and the outbuildings thoroughly clean. * * * (Ib., March 19, 1894.)

CLEVELAND.

FIRE-ESCAPES.

[Vide State Legislation, Ohio.]

VACCINATION.

No teacher or pupil shall attend any school without furnishing a satisfactory certificate that he or she has been successfully vaccinated or otherwise protected from the smallpox, and no pupil affected with smallpox, scarlet fever, or diphtheria, or other contagious diseases, or directly exposed to the same, shall be allowed to attend the public schools till all danger shall have passed, as certified by the health officer. (Handbook of the Board of Education, 1894–95, sec. 24, p. 51.)

JANITORS.

They shall keep the school buildings, water-closets, basements, and outhouses thoroughly cleaned and free from lead-pencil and chalk marks. They shall sweep the schoolrooms, cloakrooms, and halls, the halls to be swept with damp sawdust, and thoroughly dust the woodwork and furniture thereof after each sweeping. All sweeping and dusting shall be finished thirty minutes prior to the opening of school. * * * They shall dust the walls of the schoolrooms and of the halls as often as may be necessary; they shall scrub the floors and wash the woodwork, windows, and transoms as often as they may be directed to do so by the assistant superintendent of buildings. * * * They shall give special attention to the ventilation of the schoolrooms, halls, and basement, under the direction of the principals and the assistant superintendent of buildings. (Ib., pp. 90, 91, 92.)

DENVER.

EXITS.

All doors shall open outwards; shall have the passages of exit and stairways at least five feet wide, and of an aggregate capacity in width of not less than twenty inches for each hundred persons.

No temporary seats shall be allowed in any aisle or passageway. (Vide ordinances, Art. II, secs. 75, 76.)

CONTAGIOUS DISEASES.

No pupil affected with any contagious disease, or coming from a house in which disease exists, shall be allowed to remain in any public school. For the instruction and guidance of teachers rule 61 of the board of education is further explained:

"Whooping cough, measles, mumps, and scarlet fever are among the most common of contagious diseases in our community.

"With measles and chicken pox no one is to be permitted to come to school from the house where the patient is during the continuance of the disease.

"With mumps or whooping cough the patient only is debarred the privilege of the school.

"With scarlatina, diphtheria, varioloid, or smallpox no one from the house is permitted to attend school during the continuance of the disease, including convalescence. The patient must not reenter school within six weeks from the attack.

"Principals are hereby instructed to receive no pupils at whose residence there has been any case of a contagious character until they present a certificate from the office of the health commissioner of the city of Denver. These instructions, however, apply only to those schools situated within the corporate limits of the municipality." (Rules of the Board of Education, 1894, 61, p. 87.)

CLEANLINESS.

Any child coming to school without proper attention having been given to the cleanliness of his person or dress, or whose clothes need repairing, shall be sent home to be properly prepared for the schoolroom. (Ib., 62, p. 82.)

JANITORS' DUTIES.

a. To sweep thoroughly every schoolroom, corridor, and stairway at least once each day—the stairways and corridors oftener, if necessary; and with a cloth or feather brush, to remove all the dust every morning from the chairs, seats, etc.

c. To wash, when requested by the principal, the platforms or rostrums and the unoccupied space about them; also the stairs and corriders; to wash all the inside woodwork and the windows at least twice during the year—once at the spring vacation and once at the close of the summer vacation.

d. To keep the closet seats and floors neat and perfectly clean, washing them as often as in the judgment of the principal may be deemed necessary. (Ib., pp. 84, 85.)

DES MOINES, IOWA.

COMMITTEE ON GROUNDS, ETC.

The committee on grounds, buildings, heating, and ventilation shall have general supervision of the grounds, building contracts, and the heating and ventilating apparatus. (Manual of the West Des Moines Public Schools, 1894–95, par. 16, p. 15.)

SUPERINTENDENT OF SUPPLIES.

* * * It shall be his duty to visit the buildings under his charge at least once in each school month and see that the school buildings, outhouses, and yards are in good repair and in a cleanly condition. * * * (Ib., par. 21, p. 16.)

PRINCIPALS' DUTIES.

It shall be the duty of the principals to see that the teachers give vigilant attention to the temperature and ventilation of the schoolrooms, and that a regular system of ventilation is practiced as well in winter as in summer, by which the air in the rooms shall be effectually changed at each recess. (Ib., par. 40, p. 19.)

TEACHERS' DUTIES.

Teachers shall attend carefully to the ventilation and temperature of their rooms, seeking to have fresh air without drafts and to avoid injudicious exposure of the pupils. (Ib., par. 52, p. 21.)

CLEANLINESS AND CONTAGIOUS DISEASES.

Pupils shall give due attention to personal neatness and cleanliness, and any who fail in this respect may be sent home to be properly prepared for school. No pupil who is afflicted with any contagious disease, or in whose family there may be any contagious disease, shall be allowed to remain in school, or to return to school without a certificate from the attending physician that all danger of contagion is past. There must be in every case compliance with the rules of the board of health. (Ib., par. 68, p. 23.)

CLEANLINESS.

* * * Pupils * * * are strictly enjoined * * * to be * * * cleanly in their persons and habits. * * * (Ib., par. 77, p. 25.)

JANITORS.

They shall sweep clean daily, at the close of school, every schoolroom, hall, and stairway, and upon the following morning shall thoroughly ventilate each room and remove all dust from the tables, desks, seats, chairs, window sills, charts, banisters, etc., and shall keep walls, ceilings, windows, pictures, and shutters free from cobwebs and dust. (Ib., par. 89, p. 27.)

They shall at least once each month scrub the floors, platforms, and stairways, and three times during the year, before the opening of each term, shall wash all windows and inside woodwork. They shall also keep all water-closets and outbuildings in good order, the walls free from marks, and the floors and seats clean. (Ib.. par. 90, p. 27.)

FIRE DRILL.

The principals of buildings shall, under the direction of the superintendent, instruct and train the pupils by means of drills, so that they may be able to leave the building on an emergency in the shortest possible time, and without confusion or panic. These drills shall usually take place at the time of regular dismissal; but at least once a month, at a given signal, which shall be the same for all buildings, the pupils shall, taking books, hat, and wraps, march down into the yard, form, and return to their rooms and seats as quickly and orderly as they can. The pupils shall not be marched out without having their wraps on when the weather is unfavorable, unless there is a real emergency or the alarm is turned on by the superintendent or by his permission. (Ib., par. 103, p. 29.)

DETROIT.

VENTILATION, ETC.

It shall be the duty of the committee on health and ventilation to inform themselves and to advise the board from time to time in regard to all matters relating to the warming, ventilating, and lighting of the schoolrooms, the sanitary condition of the buildings and grounds, and all matters relating to vaccination, contagious diseases, and the general health of the pupils and teachers, recommending to the board such action as they may deem necessary. (Rules of the board of education, 30.)

CONTAGIOUS DISEASES.

Teachers are directed to observe the following rules concerning contagious diseases:

(*a*) *Smallpox.*—Require pupils before admission to exhibit a physician's certificate of effectual vaccination. Exclude all pupils coming from houses where this disease exists until *thirty days* after the board of health have removed the placard.

(*b*) *Scarlet fever and diphtheria.*—Exclude all pupils coming from any house where the disease exists until *ten days* after the removal of the placard.

(*c*) *Mumps, measles, whooping cough, and chicken pox.*—Exclude the patient until complete recovery.

(*d*) In excluding pupils coming from any house in which smallpox, scarlet fever, or diphtheria exists two or several dwellings must be considered as one house if there is any direct communication between them—any openings from one into the others; if it is possible to enter or leave the two residences by means of the same hall, stairway, or door; or if the rear yards are used in common. If it comes to the teacher's knowledge that any pupil visits a house infected by or attends the funeral of any person dying of either of these diseases, exclude such pupil at once, and refer the case to the superintendent. Teachers are directed to follow the letter and intent of these rules, and to refer all questions that may arise to the superintendent, who shall consult with the health officer in all doubtful cases. (Ib., par. 76, p. 22.)

CLEANLINESS.

Any pupil not maintaining a due degree of cleanliness or decency in person or dress may be sent home by his teacher to be properly prepared for attendance at school. (Ib., par. 77, p. 22.)

VENTILATION AND TEMPERATURE.

After the close of school the windows shall be opened and an effectual change of air secured, and at all times every reasonable effort shall be made to prevent the accumulation of impure air in the schoolrooms, and at the same time to protect children against the danger of sitting in drafts of cold air. During the season of fires the temperature of the schoolrooms shall be kept between 65° and 70° F., according to the thermometers furnished by the board. (Ib., par. 78, p. 22.)

Teachers are required * * * to take every precaution against fire. (Ib., par. 92 (l.), p. 28.)

JANITORS' DUTIES.

All rooms, platforms, halls, stairs, water-closets, steps, and walks in yards shall be thoroughly swept each day after the afternoon session of school; and the sidewalks must be kept free from snow and ice. (Ib., par. 98, p. 31.)

DUSTING.

All walls, cornices, and ceilings shall be dusted at least once in two weeks; and all furniture, such as desks, tables, pianos, etc., shall be dusted every day after rooms have been swept, or in time for the next day's session. (Ib., par. 99, p. 31.)

SCRUBBING.

All hall floors and stairs shall be scrubbed at least once a week, and floors of rooms whenever directed by the principal. All windows and woodwork and basements shall be kept clean, and the floors of boys' water-closets shall be scrubbed every day. * * * (Ib., par. 100, p. 31.)

VENTILATION.

SEC. 15. Every public building and every schoolhouse shall be kept in a cleanly state, and free from effluvia arising from any drain, privy, or other nuisance, and shall be provided with a sufficient number of water-closets, earth closets, or privies for the reasonable use of the persons admitted to such public buildings, or of the pupils attending such schoolhouse in said city, and shall be ventilated in such a proper manner that the air shall not become so exhausted as to be injurious to the health of the persons present therein, and the provisions of this section shall be enforced by the board of health; and whenever it shall appear to said board that further or different sanitary provisions or means of ventilation are required in any public building or schoolhouse in order to conform to the provisions of this section, and that the same can be provided without incurring unreasonable expense, said board of health may issue a written order to the proper person or authority directing such sanitary provision or means of ventilation to be provided, and they shall thereupon be provided in accordance with such order by the public authority, corporation, or persons having charge of, owning, or leasing such public building or schoolhouse; and any public officer, corporation, or person neglecting for four weeks, after receipt of an order from said board of health, as provided

in this section, to provide the sanitary provisions or means of ventilation required thereby, shall be guilty of a misdemeanor, and be punished by a fine of not less than ten dollars nor more than five hundred dollars, or by imprisonment not exceeding six months, or by both fine and imprisonment, in the discretion of the court. The expression "public building," used in this section, means any building or premises used as a place of public entertainment, instruction, resort, or assemblage. The expression "schoolhouse" means a building, room, or premises in which public or private instruction is afforded to not less than ten pupils at one time. (An act to establish a board of health for Detroit, approved February 27, 1895.)

JERSEY CITY.

THE PRINCIPAL.

He shall * * * superintend the regulation of the ventilation and temperatures of the different class rooms. (Manual of the Board of Education, 1893, par. XL, p. 11.)

VACCINATION.

Previous successful vaccination or protection against smallpox shall be an essential condition of admission to any of the public schools, either as a pupil or a teacher, and it shall be the duty of the superintendent to require a strict compliance with said condition. (Ib., par. LVII, p. 22.)

CLEANLINESS, ETC.

No pupil who is not personally clean, or comes from a family afflicted with any contagious disease, or is an imbecile, shall be allowed to remain in school. (Ib., par. LVIII, p. 23.)

TEMPERATURE AND DISMISSAL.

(*a*) *Temperature.*—At 10.30 a. m. and 2 p. m. each teacher shall cause the temperature as recorded by the thermometer to be recorded in a conspicuous place.

(*b*) *Dismissal.*—Whenever it is found impossible to heat a class room in the primary department so as to reach 65° F., or 60° in the grammar department, and whenever the temperature can not be kept below 85° F. in the primary department, or 90° in the grammar department, with the best ventilation that can be obtained, the principal of the department shall be justified in dismissing such class for the session at 10 o'clock a. m. in winter, and at noon or at a later hour of that day in summer, and such dismissal shall be reported to the superintendent as soon as possible. (Ib., par. LXII, p. 24.)

JANITORS' DUTIES.

Each janitor shall * * * sweep and dust the rooms, halls, stairs, windows, sidewalks, and yards daily, and flush the troughs of closets twice a day, at noon and after school session, once a week; scrub or mop out all halls, stairs, and closets, and at least twice a year scrub or mop out all class rooms and clean all windows, wash all the floors and woodwork throughout, and give the whole building, yards, and outhouses a thorough cleaning. (Ibid, p. 31.)

* * * All modes of egress shall be left unfastened during school hours. (Ib., p. 31.)

MINNEAPOLIS.

EGRESS.

SEC. 1. In all places of public amusement and instruction in Minneapolis already erected, the halls, doors, stairways, seats, and aisles shall be arranged so as to facilitate egress in case of fire or accident as the inspector of buildings may deem necessary for the public protection in such cases.

And all aisles and passageways in said buildings devoted to said purposes of amusement or instruction shall be kept free from camp stools, chairs, sofas, stoves, or other obstructions. (Laws relating to buildings, plumbing, and wiring, 1893, p. 44.)

DUTIES OF PRINCIPAL.

There shall be fire-alarm drill in each school at least once, but not more than twice, in each month. (Seventeenth Annual Report of the Board of Education, By-laws, sec. 31, p. 151.)

DUTIES OF PUPILS.

Pupils in all respects qualified may enter the schools at any time during the year by applying to the principal of the building of the district in which they reside. They must be accompanied by a parent or guardian, who shall furnish satisfactory evidence as to the age and vaccination, or a physician's certificate that vaccination can not safely be had. * * * (Ib., sec. 39, p. 153.)

JANITORS' DUTIES.

He shall make all needful minor repairs and do all the scrubbing and cleaning. The schoolrooms shall be scrubbed at least once in each month, the halls and stairways at least twice in each month, and generally aim to keep his building in a cleanly condition. The principal shall report upon the monthly pay roll the general condition of the building. (Ib., sec. 99, p. 163.)

He shall aim to keep the temperature in the class rooms at a standard of 70° and shall from time to time consult with the principal as to the manner of heating. Pupils shall have nothing to do with the apparatus for heating, but the teacher shall regularly indicate the temperature on the register provided for that purpose. (Ib., sec. 100, p. 163.)

NEW YORK.

AN ACT to provide for improving the sanitary condition of the buildings of the common schools in the city of New York by alterations and additions in and to the heating and ventilating apparatus thereof.

[Approved by the governor April 19, 1893. Passed, three-fifths being present.]

The people of the State of New York, represented in senate and assembly, do enact as follows:

SECTION 1. The comptroller of the city of New York is authorized, upon the application of the board of education of said city and the approval of a majority of the board of estimate and apportionment of said city, to issue bonds, in the name and on behalf of the mayor, aldermen, and commonalty of the city of New York for an amount not exceeding two hundred and fifty thousand dollars, par value, to be known as sanitary improvement schoolhouse bonds.

SEC. 2. Said bonds shall be issued from time to time as they may be required by the said board of education, shall be payable from taxation, and shall run for such term or terms of years as the said comptroller shall direct, but no longer than twenty years, and shall draw interest at no more than three and one-half per centum per annum.

SEC. 3. Whenever said bonds shall be issued the comptroller of the city of New York shall invite proposals therefor, by public advertisement, for not less than ten days, and shall award the same to the highest bidder, provided that no proposal or proposals for said bonds shall be accepted for less than the par value of the same; and said proposals shall be publicly opened by the comptroller in the presence of the commissioners of the sinking fund, or such of them as shall attend at the time and place specified in said advertisement. The said comptroller, with the approval of said commissioners, shall determine what, if any, part of said proposals shall be accepted, and upon the payment into the city treasury of the amounts due by the persons whose bids are accepted, respectively, certificates therefor shall be issued to them as authorized by law.

SEC. 4. The proceeds of said bonds when received shall forthwith be deemed appropriated for improving the sanitary condition of the buildings of the common schools in the city of New York by alterations and additions in and to the heating and ventilating apparatus thereof, as the board of education of said city shall determine, and shall be thereafter disbursed by the comptroller of the city of New York in payment of the liabilities incurred by the said board of education for the purpose aforesaid upon the requisition of said board and in the same manner as other moneys appropriated for the maintenance of the common schools in said city are usually paid out, and no expenditure from said proceeds shall be authorized or made without the approval and requisition of the said board of education.

SEC. 5. This act shall take effect immediately.

CONSTRUCTION OF BUILDINGS.

Every building hereafter erected * * * or altered to be used * * * in whole or in any part as a school or place of instruction, the height of which exceeds thirty-five feet, except buildings for which specifications and plans have been heretofore submitted to and approved by the superintendent of buildings * * * shall be built fireproof. (Laws relating to the construction of buildings in the city of New York, 1892, ch. 275, sec. 484, p. 29.)

EXITS.

In all buildings * * * used or intended to be used for purposes of public assembly, amusement, or instruction the halls, doors, stairways, seats, passageways, and aisles and all lighting and heating appliances and apparatus shall be arranged as the superintendent of buildings shall direct to facilitate egress in case of fire. * * * All aisles and passageways in said buildings shall be kept free from camp stools, chairs, sofas, and other obstructions. * * * (Ib., sec. 499, p. 58.)

JANITORS.

Every applicant for the position of janitor of a school building must produce a certificate from the board of health that each and every member of the applicant's family, including help, has been properly vaccinated. * * * All modes of egress, including the visitors' doors, shall be left unfastened during school hours. (Manual of the Board of Education, 1894, sec. 74, pp. 190, 191.)

SANITARY REGULATIONS.

Seating capacity.—It shall be the duty of every principal to reject all applications for the admission of pupils into any school or class whenever the room occupied by the same is filled to the extent of its seating capacity. In fixing the seating capacity of rooms, the following shall be a minimum allowance of floor surface and air space per pupil: In the three lower classes of primary schools and departments, five square feet and seventy cubic feet; in the three higher grades, six square feet and eighty cubic feet; in the four lower grades of the grammar schools, seven square feet and ninety cubic feet; in the four higher grades, nine square feet and one hundred cubic feet. The seating capacity of each room in each school building (estimated in accordance with the provisions of this by-law) shall be conspicuously posted in each room.

Police surgeons.—The clerk of the board shall furnish the principals of the public schools in the several wards with a correct list of the names and residences of the police surgeons and health inspectors living nearest to such schools, respectively, with instructions that, in case of accidents, said principals shall send for and ask the medical officer herein named for such aid as the necessities of the case may require, and in case of the absence of such officers the principal of the school where the accident happens is empowered to employ the services of the first available medical practitioner at the expense of this board.

Vaccination.—1. No pupil shall be allowed to attend any school, nor shall any teacher be employed in the same, unless such pupil or teacher has been vaccinated.

2. Every principal of a school shall require a certificate of a physician in good standing as evidence of such vaccination as a requisite for the admission, employment, or continuance of a pupil or teacher, and the principal shall also enter in the register of the school the dates, as near as possible, of the respective vaccinations of the pupils and teachers, and shall cooperate with such agents of the board of health as may be authorized to visit the schools for the purpose of examining and vaccinating the pupils, and shall require a revaccination of all pupils ascertained by said agents of the board of health not to be fully protected by a former vaccination; and no pupil refusing to be so revaccinated, either by the agent of the board of health or by the physician of the family to which he or she may belong, shall be permitted to attend any public school until such requirement is fully complied with.

3. A certificate of any physician in good standing in his profession stating that the pupil does not require revaccination shall be accepted by the agents of the board of health in lieu of a personal examination.

Contagious diseases.—1. Whenever it becomes known to the principal or teacher in charge of a school that a contagious disease prevails in a house other than a

tenement, in which a child or children attending the school lives or live, such child or children shall be immediately excluded from the school and shall not be readmitted except as elsewhere in this section provided.

2. Whenever the principal or teacher in charge ascertains that a contagious disease other than smallpox or typhus fever exists in a tenement house, but on one floor only, a child or children living on another floor of the same house need not for this reason be excluded, but children thus situated must be questioned daily about their health and that of their respective families, and must be sent home at the first symptoms of illness or the first intelligence of contagion in their family.

3. But if a contagious disease of any description exists on more than one floor of a tenement house, or if the disease existing on only one floor be smallpox or typhus fever, all children living in the house must be promptly excluded from the school.

4. Children excluded pursuant to the above rules shall not be again permitted to attend school—

In case of scarlet fever, until three weeks from the beginning of the last case on the floor or in the house, according to whether the exclusion has applied to a floor or an entire house under the above rules.

In case of measles, until two weeks after the beginning of the last case on the floor or in the house, according to the extent of the exclusion.

In case of diphtheria, until one week after the termination of the last case on the floor or in the house, according to the exclusion.

In the case of scarlet fever, measles, or diphtheria, until a certificate of the board of health is produced stating that the apartments, bedding, and clothing affected by the contagion have been properly disinfected.

If the disease be smallpox or typhus fever, children who have been in such case excluded must not resume their attendance without producing a certificate from the board of health stating that it is safe for them to do so.

5. New scholars applying for admission and living in houses or on floors where a contagious disease prevails must be admitted or excluded in compliance with the above rules.

6. Principals and teachers in charge are required to communicate to the clerk of the board of education any information received by them relevant to this subject not known to be in his possession.

7. Hereafter all children attending the schools under the control of this board and residing in orphan asylums, infirmaries, homes, nurseries, or other institutions shall regularly furnish to their respective principals weekly certificates signed by a duly licensed and competent physician of good standing to the effect that during the week preceding the date of such certificate there were no contagious or infectious diseases of any kind in such asylum, infirmary, home, nursery, or institution, and no principal shall allow the attendance at school of any such children unless the certificate herein required is furnished as aforesaid; and all such certificates shall be preserved by said principals for one year.

8. If the certificate should show that there was any such disease in such orphan asylum, infirmary, home, nursery, or institution, or if any principal should, from any other source, ascertain the existence of any such disease in any such asylum, infirmary, home, nursery, or institution such principal shall forthwith dismiss from attendance all pupils residing in such orphan asylum, infirmary, home, nursery, or institution and such pupils shall not be allowed to attend until authorized by the committee on by-laws, elections, and qualifications of the board of education.

9. The regulations contained in the foregoing subdivisions of this section shall not, except as hereinafter provided, apply to any orphan asylum, infirmary, home, nursery, or other institution which shall be provided with a suitable hospital containing isolated compartments for contagious diseases; provided, however, that such hospital shall be in an independent building so separated as to be at a distance of not less than one hundred feet from the main building; and provided, likewise, that all children afflicted with any contagious disease shall be forthwith removed into said hospital, and be cared for by attendants, who shall have no communication with any of the other inmates of said institution; and provided, likewise, that where any contagious disease may have existed therein a certificate signed by the president or superintendent of said institution and a duly licensed and competent physician of good standing be furnished to the respective principals in charge of any and every school attended by the children of said institution, to the effect that at the time of signing said certificate and during the ten (10) days preceding the date of such certificate no case of scarlatina, measles, or diphtheria has occurred in such institution; or, if any contagious disease may have existed therein, that no pupil having such contagious disease has been permitted to remain in such institution, but has been removed to, and is an inmate of, said isolated hospital, and that proper disinfection and fumigation have been practiced; and further cer-

tifying to the fact that there has been no communication between any of the inmates of said institution and the inmates of said hospital or its attendants. No principal shall allow the attendance of any children residing in any orphan asylum, infirmary, home, nursery, or other institution, unless the certificate herein required is furnished as aforesaid; and all such certificates shall be preserved by said principal for one year.

10. If such certificate should show that there was any such disease in any of said institutions, or if the principal should from any source ascertain that there was any such disease in any of said institutions, and that the regulations and restrictions in the foregoing subdivision have not in all respects been duly complied with, such principal shall forthwith dismiss from attendance all pupils residing in such orphan asylum, infirmary, home, nursery, or other institution, and such pupils shall not be allowed to attend school until authorized by the committee on by-laws, elections, and qualifications of the board of education.

11. The certificate herein above provided for shall in no way dispense with the requirement for a weekly certificate hereinbefore provided for.

12. If the disease be smallpox or typhus fever, all children residing in any orphan asylum, infirmary, home, nursery, or other institution must, notwithstanding the provisions herein above contained with reference to other contagious diseases, be forthwith excluded from any school which they may be attending, and not be again permitted to attend school without providing a certificate from the board of health, stating that it is safe for them to do so.

13. In event of any emergency which may render the continuance of the privilege and exemption contained herein actually dangerous to public health, the committee on by-laws, elections, and qualifications shall be, and they hereby are, authorized to suspend the operation of such privilege and exemption for such length of time as in their judgment the public safety may require. (Ib., secs. 95–98, pp. 213–222.)

PHILADELPHIA.

INSPECTION OF PLANS.

That hereafter no permits shall be issued for the erection of places of worship, hotels, public halls, theaters, or schools by the building inspectors unless the applicants for said permits shall submit to said inspectors a plan or plans of the buildings proposed, showing the modes of ingress and egress, and in case they shall disapprove of the plans they shall decline to issue the permits. (City ordinance, approved May 31, 1877.)

DUTIES OF THE COMMITTEE ON HYGIENE.

They shall be of an advisory character, and they shall consult with the committee on property of the board upon matters pertaining to hygiene and sanitation in the construction and improvement of school buildings. (Seventy-fifth Annual Report of the Board of Education. By-Laws, XXV, p. 376).

VACCINATION.

No child shall be admitted to, or continued as a pupil in, any of the public schools of this district who has not been vaccinated. The principal of each school shall note on the register of pupils of the school, opposite the name of each pupil, the fact whether such pupil has been vaccinated. In determining this fact the principal shall be governed by the certificate of a vaccine or other physician, stating that the pupil has been vaccinated by such physician or is sufficiently protected by a former vaccination. Such certificates shall be kept on file by the respective principals and shall be given to pupils who may be transferred or promoted to other schools for presentation to and filing by the principles of those schools. It shall be the duty of the principals to report quarterly to the superintendent of schools the number of nonvaccinated children applying for admission to their respective schools, and the names of the pupils, if any, who have been admitted without the certificate hereinbefore required.

When smallpox, varioloid, scarlet fever, diphtheria, or measles shall exist in the family of any pupil of the public schools, such pupil shall not be permitted to attend school until he or she shall present the certificate of a physician stating that all liability to contract disease by contact with the members of the family of such pupil has passed away.

If any principal shall fail to obey the provisions of this rule, the salary of such principal shall be withheld until said provisions shall have been complied with. (Ib., Rule XXXI, October 9, 1894.)

HOUSEKEEPERS' DUTIES.

4. The privies, urinals, and water-closets must be kept scrupulously clean, and washed daily during the school term, except when hard freezing weather renders this impossible. The interiors of privies, when plastered, must be kept whitewashed.

5. The interiors of school buildings must likewise be kept scrupulously clean, the floors scrubbed, and the windows washed whenever necessary to this end. They must be swept daily, and carefully dusted at least one hour before the opening of the school.

6. Particular attention must be given to the cellars and basements of the buildings, and housekeepers will be held responsible for any uncleanliness in them or in any other parts of the premises under their charge. No waste paper or other rubbish should be allowed to be scattered about the cellar floors or other parts of the premises, and all ashes or other waste materials necessarily accumulated must be kept in compact piles.

7. The cellars must be kept well ventilated, and in spring and summer, when fires are out, the cellar windows must be kept open during the daytime.

8. When hot-air furnaces are in use the vapor pans must be kept supplied with water.

9. During the summer vacation housekeepers are required to thoroughly clean the schoolhouses and whitewash the cellars; they to furnish at their own cost and expense all the lime, brushes, and other implements, etc., therefor. (Rules for the government of housekeepers, December 9, 1884.)

ST. LOUIS.

DUTIES OF SUPERINTENDENT OF SCHOOLS.

In the event of the building or altering of schoolhouses, he shall communicate to the board such information on the subject as he may possess, and shall suggest such plans for the same as he may consider most economical and best for the health and convenience of the pupils and teachers. (Board of public schools. Rules and regulations, 1893. Rule 12, sec. V, p. 23.)

BUILDING COMMITTEE.

It shall be the duty of this committee to inspect, as often as practicable, the several schoolhouses, and note their condition in respect to cleanliness, ventilation, heating, and general sanitary regulations, and to recommend to the board, from time to time, such measures as they may deem conducive to the welfare of the schools. (Ib., rule 26, sec. V, p. 45.)

DUTIES OF TEACHERS.

They shall attend carefully to the ventilation and temperature of their schoolrooms. (Ib., rule 73, sec. VII, p. 73.)

VACCINATION.

No child shall be for the first time received into the public schools unless accompanied by the parent or guardian, who shall give satisfactory evidence that said child is of the age required for admission, as provided in Section III, and has been vaccinated. (Ib., rule 79, sec. I, p. 80.)

CLEANLINESS.

Cleanliness in person and clothing is required of every pupil, and repeated neglect or refusal to comply with this rule will be sufficient cause for suspension from school. (Ib., rule 80, sec. II, p. 82.)

JANITORS' DUTIES.

5. They are required to keep the schools and premises clean and neat at all times. The use of lye or soda is prohibited for all paint work.

6. They shall sweep the buildings after each daily session of the schools; dust the same properly. * * *

7. They shall keep the yards, outhouses, sidewalks, and gutters in a clean condition, clean the privies every evening, and when the same are connected with the city sewers, flush the vaults with the hose once a week.

8. They shall have their buildings thoroughly heated by 8.30 a. m. at a temperature of not less than sixty-five degrees Fahrenheit. (Circular letter to principals and janitors, board of public schools, building department, May 4, 1894.)

An ordinance amendatory of article 3, chapter 16, of "An ordinance in revision of the ordinances of the city of St. Louis, and to establish new ordinance provisions for the government of said city," approved April 12, 1887."

Be it ordained by the municipal assembly of the city of St. Louis as follows:

SECTION 1. Ordinance number 14,000, entitled "An ordinance in revision of the ordinances of the city of St. Louis, and to establish new ordinance provisions for the government of said city," approved April 12, 1887, is hereby amended by striking out section 723 of article 3, of chapter 16, and inserting in lieu thereof the following:

SEC. 723. In all buildings of a public character already erected or hereafter to be built in the city of St. Louis, such as hotels, churches, theaters, schoolhouses, flats, restaurants, railroad depots, public halls, and other buildings used or intended to be used for purposes of public amusement or instruction, the halls, doors, stairways, seats, and aisles shall be so arranged as to facilitate egress in case of fire or accident, and to afford the requisite and proper accommodation for the public protection in such cases; and all aisles and passageways in said buildings devoted to purposes of amusement or instruction shall be wide and capacious, and shall be kept free from camp-stools, chairs, sofas, and other obstructions during any performance, exhibition, lecture, concert, ball, or any public assemblage; and all doors of exit leading from any assembly room where crowds do congregate shall be so hinged as to open both inwards and outwards from the room or rooms. It shall be the duty of the owner or owners of every building used or intended to be used as a hotel, factory, manufactory, theater, tenement house, seminary, college, academy, hospital, asylum, hall, or place of amusement, and of the trustee or trustees of every estate, association, society, college, academy, school, hospital, or asylum owning or using any building forty feet high or upwards, used or intended to be used for any of the purposes above mentioned, to provide and cause to be erected and affixed to said building iron fire escapes and combined standpipes and ladders, the pattern of which shall be approved by the commissioner of public buildings, who shall also have the right to designate the location of said fire escapes and standpipes, in conformity with this section, and shall grant certificates of approval to every person, firm, corporation, trustee, or board of directors or trustees complying with the requirements of this section, which certificate shall relieve the party or parties from the liabilities of fines or damages imposed by this article.

Approved, August 1, 1887.

CONTAGIOUS DISEASES.

SEC. 381. The parents or guardians of children attending any private or public school who shall permit them to attend school after it becomes known to said parents or guardians that any of their family are infected with any infectious or contagious disease shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in a sum of not less than five nor more than ten dollars.

SEC. 382. Any principal or teacher of any private or public school in the city of St. Louis having official or authentic information of the existence of an infectious or contagious disease in the family of any pupil attending said school shall immediately cause the removal of said pupil from said school and until he (or she) shall have undoubted proof of the premises where the family reside being disinfected and the disease eradicated. Any failure on the part of any principal or teacher complying with the provisions of this article shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in a sum not less than five nor more than ten dollars. (Rev. Ord., ch. 14, art. 9, secs. 381–382.)

ST. PAUL

EXITS, ETC.

In all places of public amusement and instruction in St. Paul already erected the halls, doors, stairways, seats, and aisles shall be so arranged as to facilitate egress in case of fire or accident, as the inspector of buildings may deem necessary for the public protection in such cases, and all aisles and passageways in said buildings devoted to amusement or instruction shall be kept free from * * * obstructions. * * * (An act to regulate the construction of buildings or structures within the city of St. Paul used or intended to be used for public amusement, instruction, or entertainment of any kind. Approved March 7, 1887.)

DUTIES OF PRINCIPALS.

The principal of each school shall * * * see that the teachers * * * attend promptly to the ventilation of their rooms. (Manual of the Board of School Inspectors, 1894. By-laws, par. 36, p. 146.)

DUTY OF THE PRINCIPAL.

He shall have fire-alarm drill once each fortnight in his building. (Ib., par. 45, p. 147.)

DUTIES OF TEACHERS.

They shall carefully observe the temperature of the rooms and use all proper means to avoid those injurious extremes of heat and cold which neglect might produce. They shall make regular records of temperature upon the blanks provided for the purpose and report to the principal all marked deviations from the normal standard. (Ib., par. 55, p. 148.)

DUTIES OF JANITORS.

Janitors shall do all scrubbing and cleaning necessary to keep the rooms in order, without extra expense; they shall scrub and clean all the floors and woodwork in the several buildings under their care as often as necessary. (Ib., par. 92, p. 151.)

Each janitor is required to perform all needed repairs and renovations, as glazing, whitewashing the basements, closets, or rough-board fencing, cleaning the yards, and other work of this nature, the necessary materials and implements being furnished by the board. (Ib., par. 93, p. 151.)

During the summer months and at such other times as may be necessary to insure cleanliness the janitors shall attend to the washing of the windows. * * * They shall put all the rooms and walls of the building in good condition, * * * remove dust from the walls and ceilings in their respective school buildings. * * * (Ib., par. 94, p. 151.)

HEATING.

It shall be the duty of each janitor, engineer, and fireman to learn the proper management of the heating apparatus under his charge, keep the class rooms of his building at a uniform temperature of 70 degrees Fahrenheit, and prevent any waste of fuel. When convinced that the proper degree of warmth in the building is affected by injudicious opening of the windows, he shall immediately notify the principal of such fact. (Ib., par. 95, pp. 151, 152.)

SUPERVISOR OF BUILDINGS.

It shall be the duty of the supervisor of buildings, under the instruction of the committee on real estate and board of school inspectors, to carefully inspect all school buildings and their surroundings as to their safety, cleanliness, and sanitary condition at least once in every two weeks; and he shall see that all buildings are kept in a proper state of repair. He shall report monthly to the committee on real estate, in writing, upon all matters properly under his supervision and make such recommendations as he thinks proper. (Ib., par. 104, p. 153.)

VACCINATION.

* * * A pupil * * * applying for admission for the first time must be accompanied by a parent or guardian who will give satisfactory evidence that the child is at least five years old and has been vaccinated within five years. (Ib., par. 125, p. 155.)

CONTAGIOUS DISEASES.

No pupil who is afflicted with a contagious disease shall be allowed in any public school, and no pupil who has been exposed to such disease shall be admitted to school, except upon the presentation of a physician's certificate that all danger of contagion has been removed (Ib., par. 139, p. 157.)

CLEANLINESS.

Any child who comes to school uncleanly in person or dress may be sent home to be properly prepared for the schoolroom. (Ib., par. 138, p. 157.)

SAN FRANCISCO.

DUTIES OF PRINCIPALS.

(4) To see that the fire drill is practiced in their schools at least once a month. (Rules of the board of education, 1893, sec. 58, p. 27.)

CLEANLINESS.

Pupils shall give due attention to personal neatness and cleanliness, and any who fail in this respect must be sent home to be properly prepared for school. (Ib., sec. 122.)

CONTAGIOUS DISEASES.

Those who are affected with, or in whose families there may be, any contagious disease shall not be allowed to remain in or to return to school without a certificate from the attending physician, countersigned by the health officer, that all danger of contagion is past. (Ib., sec. 122.)

VACCINATION.

Teachers must require from all pupils, before admitting them to school, satisfactory evidence that they have been vaccinated. (Ib., sec. 126, p. 43.)

JANITORS' DUTIES.

* * * They shall keep school buildings, furniture, yards, and outbuildings neat and clean. (Ib., sec. 113, p. 40.)

SEATTLE.

FIRE DRILLS.

The principals shall have fire drills once each month. The fire alarm shall be several strokes of the gong in rapid succession, to be followed by two strokes as a signal to form in line without wraps, three strokes to form in line with wraps, four strokes to return to rooms, or five strokes to march out. (Annual Report of the Board of Education, 1892, rules and regulations, Art. V, sec. 10, p. 128.)

JANITORS' DUTIES.

Janitors shall sweep each room, hall, stairway, and outbuilding and thoroughly dust all furniture as often as the principal may direct, provided that it is not required oftener than once a day. They shall ascertain the temperature of rooms frequently and endeavor to keep the temperature of each room up to the standard at all times during the sessions of the school.

They shall remove chalk dust at least once a week from beneath the boards, * * * wash windows * * *. (Ib., Art. X, sec. 3, pp. 132, 133.)

CONTAGIOUS DISEASES.

No pupil afflicted with any contagious disease or exposed to the same shall be admitted to the schools. (Ib., Art. III, sec. 7, p. 126.)

VACCINATION.

A plain scar, the records of the schools, or a certificate by a reputable physician, showing to the satisfaction of the principal vaccination within the previous five years, shall be evidence sufficient to entitle a child to admission to school. Children unable to produce such evidence shall be refused admission; provided, however, that children of indigent parents may be vaccinated at the expense of the district upon written application of the parents therefor. (Ib., Art. III, sec. 8, p. 126.)

CLEANLINESS.

Pupils are required to be neat and clean both in dress and in person. When unfit to appear in school they may be sent home to be properly prepared for school. (Ib., Art. III, sec. 9, p. 126.)

ACTUAL AND POSSIBLE LEGISLATION CONCERNING SCHOOL SANITATION.

Whatever theory of political science it accepts, modern legislation has practically adopted the principle that the state is as largely responsible for the health as for the wealth of its citizens. It is in a measure recognized that a conditioning factor in the life of society is the physical soundness or unsoundness of its members, and that sickness and disease cause industrial as well as mental and moral losses. It is this perception, indeed, which underlies all sanitary legislation. Under its guidance governments have for many years taken measures of protection against fire and against the spread of contagious diseases—dangers which produce imme-

diate and marked results. Only within comparatively recent times, however, has it been understood that certain conditions which predispose to specific diseases or which tend to diminish vitality, and hence to lessen achievement, are in even greater need of scientific supervision.

It would seem quite unnecessary to say that society should feel a peculiar interest in and responsibility for those of its members who are still in the period of development, laying the foundation for future health or ill health, and that therefore it should exercise special care over the public schools. It would certainly seem quite unnecessary to state this were it not that 15 of the States and Territories of the United States have no legislation on this matter, and that 4 of the remaining 33 have only laws relating to protection from fire.

The legislation of these 33 States and Territories and of the 17 cities investigated may conveniently be summarized (vide Table I) that we may see what change or progress is possible along the lines already laid down.

Beginning with the subject of inspection, and comparing the other States with Massachusetts, we find that 16 of them provide for the inspection of schoolhouse plans or buildings by some higher authority than the local board, either by the board of health, the county superintendent, or school commissioners.

On the second point, vaccination, the example of Massachusetts is followed by 16 States.

The next most general subject is protection against fire. Massachusetts provides for ample exits, doors opening outward, fireproof construction. fire escapes in certain cases, and careful inspection. Fifteen other States touch the subject, but much less comprehensively. Of these, 12 require that the doors open outward; 5 insist on ample exits; 4 on fire escapes in certain cases: 1 on fireproof stairways.

The regulations of Massachusetts in regard to contagious diseases are found in slightly different form in 11 other States.

Provisions are made by Massachusetts for sufficient water-closets, earth closets, or privies in connection with each school, and for their proper care. Seven other States also provide for closets. The statutes of Kansas, Nebraska, and Pennsylvania employ the single term "water-closets," which we must suppose is not used in its strict meaning.

It is to be noted that Massachusetts is the only State which has regulations on all five of these subjects. Ohio stands next, considering four of them; 11 States provide for three of them, 6 for two of them.

Of those factors which concern health only a degree less potently than contagion, ventilation is the most important. Indeed, as a permanent rather than an accidental condition, it should be considered deserving of first attention. Yet Massachusetts and Connecticut are the only States which can be said to have taken any action in the matter. Pennsylvania provides for the circulation of plans for school buildings with "healthful ventilation;" New York has its plans accompanied with suggestions for lighting, heating, and ventilating; California, through the State board of education, instructs teachers to keep their schoolrooms ventilated, but Massachusetts and Connecticut alone present a standard of ventilation and require its enforcement under legal penalties.

A second condition of grave import, one which is closely connected with the preceding, is that of the area and cubic contents of the schoolrooms. When it is considered that overcrowding may render any system of ventilation ineffective, it seems strange that but one State has any legislation on the subject. Kentucky has led the way in this particular, giving, to be sure, a low minimum standard, yet one far above the actual conditions in many places.

Kentucky is also the only State which regulates at all the lighting of school buildings and which specifies that the seats shall fit the children.

Turning now to the cities, a reference to the list will show that with the exception of Seattle they are all in States which have some legislation on sanitation. In many instances the subject of the statutes is repeated by city ordinances or by rules of the board of health or school board, but there are also numerous cases of additional legislation on important matters. In the accompanying table repetition of laws is indicated by *. (Vide Table II.)

TABLE II.—*Subjects of city legislation.*

	Vaccination.	Contagious diseases.	Fire.	Fire drills.	Cleanliness.	Ventilation.	Temperature.	Floor space.
1	*Baltimore	*Baltimore	Baltimore				Baltimore	
2	*Boston	*Boston	*Boston	*Boston	Boston	*Boston		
3	*Brooklyn	Brooklyn	Brooklyn					Brooklyn.
4	Chicago	Chicago			Chicago	Chicago	Chicago	
5	*Cincinnati	*Cincinnati				Cincinnati	Cincinnati	
6	*Cleveland	*Cleveland						
7		Denver	*Denver		Denver			
8		*Des Moines		Des Moines	Des Moines	Des Moines		
9		Detroit				Detroit	Detroit	
10	Jersey City		*Jersey City		Jersey City	Jersey City	Jersey City	
11	*Minneapolis		Minneapolis	Minneapolis			Minneapolis	
12	*New York	New York	New York					New York.
13	Philadelphia		*Philadelphia					
14	St. Louis	St. Louis	*St. Louis		St. Louis	St. Louis	St. Louis	
15	*St. Paul	*St. Paul	St. Paul	St. Paul	St. Paul	St. Paul	St. Paul	
16	San Francisco	*San Francisco		San Francisco	San Francisco			
17	Seattle	Seattle		Seattle	Seattle			
	Totals 14	14	10	6	9	8	8	2

As the table shows, 9 cities order that children who are not cleanly shall be sent home from school. Eight cities have rules regarding ventilation. In 7 of them this simply means that the teachers are to use care that the air be pure in their schoolrooms. Detroit, however, by a recent act of the legislature, has a law similar in every respect to that of Massachusetts, which affects the construction of schoolhouses.

Eight cities fix a standard of temperature for the schools. In Cincinnati this is 65° F.; in Jersey City and St. Louis, not less than 65°; in Detroit, between 65° and 70°; in Baltimore, Chicago, Minneapolis, and St. Paul, 70°.

In one city, Brooklyn, the school board have ruled that the pupils' seats shall not face the light.

It is evident from this study of the laws concerning school sanitation that the United States has done comparatively little for this important phase of its educational work. Only about one-third of the States and Territories require vaccination; one-third take some slight precaution against fire; one-fourth guard the school children from contagious diseases; one-sixth require suitable sanitaries; two insist on proper ventilation, and one prescribes the space to be allotted each pupil.

Yet with all its limitations existing legislation is along the right lines; so future progress may be expected to be extension rather than reform. The laws of Massachusetts, for example, on vaccination, contagious diseases, and ventilation, are good models for other States, and need only to be copied in spirit if not in letter. But local governing bodies, such as city councils or school boards, may go further and formulate with more detail the minimum standard of ventilation now accepted by architects and engineers, viz, 30 cubic feet of fresh air per minute for each person.

One State has already prescribed the floor space and cubic space per pupil. Why can not others fix at least the approved minimum, 15 square feet or 200 cubic feet? The precedent is already established, but the requirements are too low, both in Kentucky and in Brooklyn and New York. The graded system used in the two cities is also discountenanced by leading physiologists on the ground that the differences in the amount of oxygen required by children of different ages are too small to be taken into account.

The method of lighting schoolrooms, of which Kentucky and Brooklyn alone take any note, and that vaguely in the one case and negatively in the other, should have at least two positive principles established, viz, the window space should equal, at the minimum, one-fourth the floor space, and the light should come from the left, or left and rear.

It is perhaps less important to insist that the principles be embodied in State statutes than to urge that they be given some permanent and legal form, but since each one of them is now recognized in at least one State, and they are of equal application to city and country schools, there seems to be no logical objection to their being the subjects of State legislation. There are, moreover, some advantages gained thereby for the country school, which is ordinarily the last to feel the effect of new discoveries in methods of construction and management.

In one particular we may point out a need for the reform of existing rules. The janitor's directions for cleaning school buildings are usually vague and the methods advised faulty. While the character of the building will condition to some degree the cleaning, the times appointed for scrubbing, washing windows, etc., are in many instances too far apart to secure the best possible results, i. e., perfect cleanliness and a large measure of protection from contagion. To secure these ends, also, dry dusting and sweeping should be replaced by the "damp" method, thus removing the dust instead of merely scattering it. Mopping should not be allowed except on hard-wood floors, because it fills the cracks of the floor with water and fails to remove the dirt.

From cleanliness of room to cleanliness of person is the natural order of a school board's thought, since the latter is less under its control than the former. The cleanliness which the nine cities on our list insist on is generally only external among many classes of poor children. The example of several German cities suggests a future subject of local legislation—provision for school baths. The need for them would probably always be confined to the schools of certain districts, but they would still be under permanent regulations. The experience in Germany shows that the assistance rendered the system of ventilation and the prevention of the spread of infection are physical gains quite equaled by increased mental freshness and vigor.

One final and most important suggestion for legislative action is suggested by the provision in a Kentucky statute that the school seat "shall be suited to the age of the child." Adjustable seats and desks should be required in all schools.

This is done in Germany, and our own physicians have repeatedly urged the need of furniture adapted to the individual child in order to secure proper physical development. Thus far their advice has been but slightly heeded, partly from ignorance, partly from a mechanical desire for uniformity, and partly from motives of economy. These objections must be overcome before the United States can be said to have grasped, even in theory, the general principles of school sanitation.

A PROPOSED SCHEDULE FOR A SANITARY INVESTIGATION OF SCHOOLHOUSES.

As far as possible these questions are so framed that an affirmative answer indicates conformity to the approved standard. If this is often found to be ideal rather than actual, it may still serve to indicate the direction in which progress should be made.

1. Site:
(*a*) Is the schoolhouse built on soil that is naturally dry and porous, or is it well underdrained?
(*b*) Is it protected from cold winds?
(*c*) Is it at a distance from marshes or stagnant pools, and from noisy or objectionable industries and from railroads?
(*d*) Is its distance from other buildings at least once and a half the height of those buildings?
(*e*) Is it near the center of the district?
2. Are there ample [1] playgrounds?
3. How old is the building?
4. How many stories has it?
5. If more than three stories high, has it fire escapes?
6. What is the material of the building?
7. Basement:
(*a*) Is it well lighted?
(*b*) Is it ventilated?
(*c*) Are the floor and walls impervious to moisture?
(*d*) Is it kept clean and free from rubbish?
(*e*) If there is no basement, is there a ventilated air space under the building?
8. Sanitaries:
(*a*) Are the water-closets outside the main building, but connected by covered passageways?
(*b*) If the building is more than two stories high, are there closets for each floor in a tower connected with the building by covered passageways?
(*c*) Are they well lighted, heated, and ventilated?
(*d*) Are the floors cemented or tiled?
(*e*) If there is no water-carriage system, are the privies at a distance from the building and the well?
(*f*) Are the receptacles of the privies cemented, and are the contents frequently removed?
9. Are the halls well lighted and of ample size?
10. Stairs:
(*a*) Are the stairs at least 5 feet wide and numerous enough to afford easy egress in case of fire?
(*b*) Are they fireproof?
11. Schoolrooms:
(*a*) How many rooms are there in the building?
(*b*) How many children are there in each?
(*c*) Are the rooms rectangular in shape, measuring not more than 32 by 27 feet?
(*d*) Are they from 12 to 15 feet high?
(*e*) Is there at least 15 square feet of floor space for each pupil?
12. Lighting:
(*a*) Is the lighting space equal to at least one-fourth of the entire floor space in each room?
(*b*) Does the light come from the left or from the left and rear?
(*c*) If the latter, are the windows in the rear 6 to 8 feet from the floor?
(*d*) Are the other windows 3 feet from the floor and not more than 1 foot from the ceiling?
(*e*) Is the light diffused and not reflected?
13. Heating:
(*a*) If stoves are used, are they "jacketed"?

[1] Dr. Burnham (Outlines of School Hygiene) allows 3 square meters per child.

(*b*) If furnaces or steam is used, is the heat in the schoolrooms indirect?
(*c*) Are there floor registers in the halls for drying wet clothing?
(*d*) Is the standard of temperature between 68° and 70° F.?
(*e*) Is a uniform temperature maintained?
14. Ventilation:
(*a*) Are the rooms ventilated by flues, either with fans (plenum and exhaust method) or with heated coils or stacks (gravity system)?
(*b*) Is the supply of fresh air taken from outside and not from the basement?
(*c*) Is the amount of fresh, warmed air equal to 30 cubic feet per minute for each person?
(*d*) Are the inlets and outlets equal to 20 square inches for each person?
(*e*) Is the inlet at least 6 feet from the floor in the inner wall and the outlet at the floor level of the same wall?
(*f*) Are the dressing rooms ventilated?
15. Seats and desks:
(*a*) Are the seats and desks adjustable?
(*b*) If not, are they graded in size in each room?
16. Cleaning:
(*a*) Are the floors swept with damp sawdust and the rooms dusted with damp cloths at least once a day?
(*b*) Are the floors, furniture, and windows thoroughly cleaned once a month?
(*c*) Are the sanitaries cleaned?

CHAPTER XI.

EDUCATION IN THE SEVERAL STATES.

ARIZONA.

[From the report for 1893-94 of Hon. F. J. Netherton, superintendent of public instruction.]

PRIMARY TEACHERS.

Too much importance can not be attached to the necessity for thorough work in the primary grades, yet, unfortunately, there still exists a sentiment, which is more or less prevalent, that "anybody can teach a primary school." Special examinations should be provided for primary teachers and none but those qualified in primary methods should be allowed to teach in primary schools.

In my opinion no second-grade certificate should be renewed except upon examination, and then not more than twice. A second-grade certificate is valid for two years, and if a teacher can not secure a first-grade certificate in six years it would seem to indicate a lack of energy and ambition that would not warrant keeping him in the service of the schools. * * *

Much annoyance is caused in the primary grades of graded schools by allowing children entering school for the first time to enter at any time during the term. It is not reasonable to suppose that a child that has never been to school can skip the first month or two months' work and keep up with his class. The result is that he gets no benefit by attending school under those circumstances, or the teacher must hold the other pupils back for him, which is manifestly unjust.

In graded schools all pupils entering for the first time should be required to enter during the first week at the beginning of the term, or during the first week after the mid-term promotions are made.

FREE TEXT-BOOKS.

There is a growing sentiment all over the country in favor of free text-books, and while the board of education was considering the change of books I took the trouble to ascertain the result financially to our people of a law providing for free text-books. I found that where books are purchased by the State authorities they are secured at a reduction of nearly 50 per cent on the prices above named. To those who desire an efficient and at the same time an economical school system this fact is worthy of consideration. In those States where free text-book laws have been passed only words of praise have been spoken of the system. We will not, in fact, have what we claim, free schools, until we have free text-books. Of all the appliances used in the schoolroom the books are of the first importance, and yet they are the only ones that the parents are required to furnish at their own expense. With free schoolhouses, free desks, free stoves, free fuel, free pencils, pens, paper, and ink, free teachers, and free books, we would have free schools. Aside from the assistance to the teacher, in being able to provide each pupil with the necessary books at the opening of school, thus avoiding much annoyance and delay, the child would be taught a practical lesson by being held responsible for the care of property not his own—a lesson that must be learned sooner or later, and the sooner the better.

THE COMPULSORY LAW.

We have on our statute books a compulsory educational law, which, from the time of its passage, has been a dead letter. The provisions of the law are reasonable and should be enforced, and the question arises, Why is it not done? In my opinion the duty of enforcing it devolves upon too many persons, and no compensation has been fixed for the persons whose duty it is to see that its provisions are

complied with. It is made the duty of the trustees to furnish the principal at the opening of school with a list of the children of school age residing in the district. At the end of each month the principal is required to furnish the clerk of the board of trustees with a list of all pupils that have not attended school during the month; the clerk, after two months, is then required to serve notice upon the parents, and if at the end of ten days the warning is not heeded the board of trustees is required to demand of the parents or guardian the amount of the penalty provided. If such parent or guardian refuse to pay, it becomes the duty of the trustees to commence action in the justice's court to collect the penalty. Thus it will be seen that there is so much red tape about the law that it is rendered impractical and inoperative. The constable in the precinct where the school is located should be made ex officio a truant officer, with a schedule of fees for the performance of his duties, and the principal should be required to furnish him monthly with a list of the children attending school. It should be made the duty of the truant officer to notify all persons not complying with the law, to make demand on parents and guardians for the penalty, and to file action in the justice's court when necessary for all violations of the law. He should be required to give bond for the faithful performance of his duties. If the law can not be amended so that it will become operative, it had better be stricken from the statute books.

CONSOLIDATION OF SCHOOL DISTRICTS.

The formation of so many small school districts is expensive and detrimental in more ways than one. The consolidation of a number of small districts, to be controlled by a board of education, to be elected as our trustees are now elected, with certain requirements and regulations as to the maximum distance apart of schoolhouses, would be an improvement on the present plan. It would be less expensive maintaining the schools and better supervision would follow.

This plan would also settle the often vexing question of allowing children living in one district to attend school in another because more convenient.

ARKANSAS.

[From the report for 1893-94 of Hon. Josiah H. Shinn, superintendent of public instruction.]

LOCAL TAXATION.

The really great question of educational statesmanship is the immediate removal of the limitation upon local taxation. Give the people more freedom in their localities, so that they may the more easily and surely adjust themselves to the demands of their environment. It is no burden to a locality already satisfied with local legislation to permit another locality to use its own means untrammeled and without limitations. Absolute freedom to the district is the perfection of home rule, and we should hasten to strike down any and all limitations upon the right of the home unit to tax itself as it may please. Our educational law thus amended will prepare the way for the widest solution of all school problems and enable our citizens to do for themselves anything and everything that other citizens have done in any hamlet or city of the world.

CERTIFICATION OF TEACHERS.

Third-grade certificates are in excess of all others. The statistical figures following will show that more of this grade are held than of both the other grades together. The statistics, however, indicate a gratifying increase of the number of higher grade certificates, and show that the true professional spirit is increasing. Ever the tribe increaseth that cries, "We are not satisfied with low attainments."

But the condition still exists that there is a large excess of third-grade teachers, even after admitting that there has been a steady decrease of the excess during the last four years.

There are several reasons for this condition. It is undoubtedly principally due to the fact that a large majority of the teachers, especially in the common-school districts, enter upon the work of teaching as a temporary makeshift, and consequently lack that interest and enthusiasm that would obtain if they intended to follow teaching as a permanent occupation. The idea is prevalent in many places that teaching is the only business that requires no antecedent preparation or experience. Hence any ignoramus, equally ignorant of pedagogy and law, may be permitted to practice teaching ignorantly in order that he may get the necessary means for the practice of law intelligently.

Another obstacle to a more general disposition to work for a higher grade certificate is the uncertainty of the teacher's tenure of office. In too many districts the position of teacher is looked upon as a perquisite attaching to the office of director, and is disposed of by him as a reward for some personal, religious, or political favor, the welfare of the children or the success or ability of the teacher being a secondary consideration. While it is true that one director has no more voice in the selection of a teacher than the other members of the board, still in many cases one man assumes the sole control, and, in defiance of law and of the rights or wishes of his associates, selects whomsoever he pleases as teacher. Wherever this condition exists it is soon discovered by the teacher, who gives more attention to securing the personal good will of the director than to personal study.

This is augmented in cities and towns by the political or religious pull which directors have upon teachers, or which the friends and relations of inferior teachers have upon the directory. Political and religious influences, wherever they have been employed in the past for the sole object of placing friends or relations in place, have been the enemies of growth and truth. * * * The greatest rebuke ever thundered against neglect of official duty is too small for those who subordinate the greater interests of the child and of society to the pitiful considerations of favoritism in the selection of teachers. The perpetuity of democracy lies in the successful development of the public schools, and there can be no proper development of these until capable, loving teachers are afforded every child.

Another obstacle, and a very serious one, is the demand by directors for the cheap teacher. "He is good enough to teach my children" is a current expression used by directors and patrons in asking favors from an examiner or superintendent for one lacking qualifications for even a third-grade certificate. Such teachers are dear at any price, and their existence drives many prospectively good teachers into other fields of labor.

So long as inferior field hands are recognized as superior teachers, so long will the third-grade class continue to dominate the other classes in number and influence.

COLORADO.

[From the report for 1893-94 of State Supt. J. F. Murray.]

KINDERGARTENS.

The law which authorizes the introduction of the kindergarten into the public schools of the State gave an important and sadly neglected department of education the encouragement of legislation. The best argument for the kindergarten schools is that they aim at the improvement of our educational system where improvement is most needed, viz, at the foundation.

It is too late to argue for the kindergarten. Everyone agrees that it ought to be, and yet there is much ignorance regarding why and what it should be. Wrong work therein is much worse than no work. It is in no sense a school, nor is it a kind of school. It is not like a school; it is not even a prelude to a school, but rather a getting ready for the prelude.

The kindergarten years are distinctively the social years, and whatever else is or is not done the child should learn the courtesies and etiquette of life so far as they come within his range; but more than this, he should be so trained as to eliminate from his disposition, so far as possible, envy, jealousy, covetousness, tendency to anger, etc.

The kindergarten years are the plastic years of the disposition, and at that time the disposition can be perfected by the eradication of many undesirable traits and the establishment of correct and pleasing tendencies of thought, sentiment, and action. The play must be genuine and not a mere mockery. Children are to do many things by themselves and of themselves as they would do them if unobserved. They are not to play merely by direction as to the time and manner.

Many a child is permanently maimed in disposition and crippled in intellect by being made to walk on crutches by misnamed kindergartens. How many parents can testify that as a direct result of sending a child to such a kindergarten he wanted somebody to "amuse" him all the time. A child is better off out of such a kindergarten with his imagination weaving engines out of pebbles; houses of marbles; villages, cities, rivers, railroads, etc., out of the figures of the carpet, thereby delighting himself in self-entertainment.

The real kindergarten is bright, animated, entertaining, but finds a way to have some of the play genuine, hearty, self-entertaining. The gifts and occupations are mere incidents—the mission is largely with those intellectual, emotional, and volitional activities which right the wrong and strengthen the right in the disposition of the child.

COMMON-SCHOOL GRADUATION.

When our elementary and secondary schools are made stronger, then, and not until then, will there be harmony from the kindergarten up to and through the university.

Each department of the public-school system should be somewhat complete in itself, should give that training which will prepare for society and the duties of citizenship. Higher education can never become popular until elementary and secondary education are strengthened.

When our forefathers established the first schools the prominent idea was the establishment of colleges and universities, as was evinced by the founding of Harvard and Yale.

This tendency led to educating the aristocracy. From that idea we are now swinging to the other extreme, and most attention is being given to elementary education. This is surely the correct position, for elementary and secondary education are intended to specially benefit the masses. In our large manufacturing centers the boys and girls leave school at about the age of 12 years.

The elementary school should be made as strong as possible, for it is the greatest leveler in our society. There is no democracy like that of the common school. Here friendships cross all social lines and make new combinations. The greatest equalizing force which is to-day at work in American society is the common school.

In line with this thought the State course of study has been prepared with special references to the needs of the common school. The department of public instruction is now prepared to furnish a diploma of graduation to each pupil who furnishes the prescribed course of study and passes a creditable examination on all the subjects.

[DIPLOMA.]

COLORADO PUBLIC SCHOOLS.

[Cut.]

"Learn to Think."

BE IT KNOWN, That_____
of school district No._____in the county of_____
has completed the course of study prescribed for the public schools of Colorado.

In testimony whereof this diploma is given under our hands this_____day of_____A. D. 189____

Class of 189 .

_____
County Superintendent.

_____
Teacher.

With but one or two exceptions every county in the State had graduating exercises for the common schools. The department sent suggestive questions for the examination; in most counties these questions were used.

In this way the rural schools have been given a new stimulus. If the rural schools can be strengthened, there will not be that marked tendency of people drifting into the great centers of population. The two great questions before the American people to-day are: "How to increase the efficiency of the rural and elementary schools;" and "The solution of the question of municipal government in large cities." Real wisdom and statecraft will have to be brought to their solution, instead of makeshift policy and politics.

CONNECTICUT.

[From report of Hon. Charles D. Hine, secretary of State board of education.]

TOWN MANAGEMENT OF SCHOOLS.

The substance of the law relating to town management is:

1. The town for school purposes becomes one district. The existing district lines become lines of attendance, and may be changed to suit the exigencies of school attendance.

2. Town officers, called the town committee, manage the schools. The functions of this committee include those of the district committee and school visitors.

3. Schoolhouses become the property of the town.

4. The expenses of schools are paid directly by the town instead of indirectly through the districts.

5. The business pertaining to schools is transacted in town meeting.

It should be noted:

1. Schools are not abolished nor united. Under the general law which applies to all towns the school visitors can close any school and send the scholars to adjoining districts.

2. Schools are managed just as roads, bridges, and the poor are managed—by the town.

3. The town does not assume district debts. Districts can maintain their organization for the purpose of paying debts or the town can by vote assume the debts, but the vote to consolidate does not carry either plan.

In behalf of the town system it can be said:

1. To secure good government we must have a community so constituted as to possess a vigorous independent public life. The towns have such a life. But if a town be divided into ten to twenty fractions, there must be feebleness and not strength, and the conditions of vigorous political activity do not exist. The districts become smaller and feebler from year to year. They have more to do and less ability to do it.

In small communities the selfishness of individuals is not neutralized by the public interest. Average public sentiment does not have opportunity to correct the action of the members. It follows that there is not an intelligent and progressive public sentiment which places the interest of children above all other interests.

To secure good schools the managers must feel a lively responsibility to an intelligent public opinion. Even if public sentiment exist, committees do not regard it, but act in brutal disregard of it. Out of irresponsibility grow up the worst abuses. The office becomes a kind of perquisite and is used for personal ends. By putting responsibility upon a larger community—the town—by enlarging within reasonable limits the scope of public activity, by giving the citizens of the town more to do, the interest in local public affairs will be increased; there will be a watchful and intelligent observation of schools as of other municipal interests. We often hear that town control will diminish local interest in schools, but we never find anybody who asserts that it actually has diminished interest in schools.

Those who wish to give this method a bad name say that it is "centralization." There is no centralization like an irresponsible and incompetent man. If the schools are managed in a small and narrow way, there is a despotism in which children suffer. The town system is a relief and escape from centralization; it imposes duties upon a body of men capable of performing them.

2. In many cases conditions have so altered that the district system is not workable.

The right to regulate the public-school system falls within the power of the legislature. No legitimate modification can be an infringement of private rights however much it may run counter to personal interests and to prejudices. The public welfare, the interests of children, not personal feeling, justly prevail.

The schools which the law has bequeathed to us have fallen out of harmony with the necessities of modern life. The system which was adapted to constantly increasing groups of people in a new country is out of joint where the groups are decreasing and the children few. In the former there might have been need of subdivision, but now the problem is to secure children enough to make a live school and taxpayers enough to maintain it. Many districts have lost their entire school population and others have dwindled to a mere fraction of their former size, and in some towns all have been greatly reduced. Evidently by a union of schools can the children be best cared for.

The exceptional districts in large towns supply no argument against the necessities of these smaller districts. These larger districts have practically sloughed the smaller and weaker districts, and organize and administer their schools independently, just as if they were towns. By their independence and selfish isolation they may secure good schools for themselves, but they impoverish the weaker districts. They subtract a large sum from the aggregate property available for school taxation; they diminish what should be a common fund for the children of the town.

3. Under the town system all children will secure an equality of privileges.

In most towns the money received from all sources is parceled out to the districts with the sole view of maintaining the schools for the time required by law and no

longer. In the same town, one child can go to school thirty weeks and another thirty-six. The line which divides these children is an imaginary and fortuitous one. The law creates it, and thus recognizes and enforces an unjust and hard condition. The town system obviates this inequality of schooling by giving all scholars the same and the longest period of schooling. The plea that there is not money enough to maintain schools for the longest period of time does not mitigate the injustice. In most cases there is money enough to give all children in the same town equal advantages, and a single committee acting for the town can arrange terms of school and places of attendance so as to afford to every child a good school.

But there are, under the district system, more serious inequalities in the schools themselves. On one side of the imaginary line children are well taught; on the other they are not taught at all or are mistaught. On one side their time is wasted and they do not grow at all; on the other they are busy and are improving. There is an injustice which has lasting consequences, and condemns any system or lack of system which favors or permits it.

A single town committee, hiring as well as examining, can definitely reject all who have disqualifications, natural or acquired, for teaching; can assign teachers to such schools as they are especially qualified to fill, and can adjust pay to skill and experience. Thus, the village school and the country school, the graded and the ungraded, can in respect of teaching be on an equality.

Such a united and continuous body can give to all the needed supplies, apparatus, and books. The most deplorable deficiency of all appliances which assist the teacher and arouse scholars is characteristic of isolated schools. In the generously equipped village school the child is introduced to books, allured to reading, and forms the habit of reading. His neighbor not a mile away has no books or aids, and must so far be at a disadvantage and fail. These inequalities exist in the same New England town because the "system" permits no liberal extension of advantages to all.

The district system does not admit of any businesslike, continuous, and steady policy. Committees are chosen for short periods and the changes of teachers are frequent. Committees are not elected because they are fitted to select teachers; they may be conspicuously unfit. They can not, or will not, spare the time to become acquainted with the schools and so judge intelligently of their needs. In the matter of teaching, they are not responsible for the result, though they must furnish the means, and the tendency is to furnish as little as possible. If they have the necessary qualifications, the district which can pay the most can secure the best teacher and the poor district must take the inexperienced and unskillful. Again the children suffer; they are subject to fitful and uncertain effort; they do not obtain an education equal either in quantity or quality to that of their favored neighbors. Such differences are not the natural outgrowth of locality or condition; they are the artificial creations of a dislocated system which makes equal educational advantages impossible.

4. School buildings are better cared for and are better equipped for school work.

Under the district system the district must purchase ground and erect, insure, furnish, and repair the building. The town assumes none of these duties, and can simply compel action by the district when the building is "unsatisfactory." In practice, school visitors wait long before acting, and generally do not act at all.

To make necessary repairs, to obtain needed supplies and conveniences, to keep the rooms in suitable condition, a tax must from time to time be laid. The day of tax gathering may be postponed, but it can not be averted. This fact deters many districts from obtaining supplies and libraries and from making the changes which convenience, good teaching, and even health require. The money must be paid; the burden is borne by small and often poor communities, and frequently presses with greatest weight upon a few. If the few have no interest in the existing school there will be indefinite postponement or niggardly action. With the utmost willingness to pay, the expense of laying a tax is considerable and the labor not small, so that no citizen, certainly no busy and competent citizen, desires to undertake the task, and it is performed, if performed at all, with protest and sometimes with irritation.

That this accurately states the case is evident from the fact that only 122 districts in this State laid a tax in the year last past.

The freedom from district taxation is evidence of the relief from the demands which well-kept buildings make. Depredations are committed, cuts and marks multiply, paint vanishes, glass is broken, until the schoolhouse is the shabbiest, most unclean, most neglected building in the whole neighborhood. The outbuildings are often in a disgraceful condition, and upon both schoolhouse and outbuildings are placards of impurity. The desks are uncomfortable, the blackboards

poor and inadequate, the stove cracked, the windows without shades, and the floor unwashed and perhaps unswept.

An enlightened and interested committee can not supply the deficiencies and make needed changes, but must wait the slow and uncertain action of the district. Moreover, in the course of years under the administration of many men elected for many different reasons, some will not be so solicitous for the preservation of the building as for the construction of some scheme of their own.

The town system has the supreme advantage that it permits and encourages, indeed compels, the town committee to act promptly in the interest of economy and good schools, because neglect of even a single building brings criticism and reproach.

There can be and there is a probability of a steady and continuous care for and improvement of buildings. All parts of the town, and especially the remote parts, equally share in the benefits and constant encouragement which appliances, books, and well-equipped schoolhouses dispense. There is no spasmodic effort, with long lapses of inactivity and neglect; but the committee, being a continuing body, can carry out a policy of wise and liberal improvement.

Schoolhouses, the homes of our children for one quarter of their whole time, can, under the town system, be made permanently convenient and attractive. Besides the interested and steady care there may be external and internal ornamentation on the part of succeeding teachers and classes of children who know that their effort has not been in vain.

5. Town management is economical.

The towns acting under this system spend less for each scholar in attendance than the average for the State. It can not be said that school expenses will be less, but it can be confidently asserted that the same sum will produce better results. The object of the school system is to educate the most children in the best manner in the shortest time, and the town management is the most economical plan of working to this end. Wages of teachers can conform to skill and experience. Supplies, maps, globes, apparatus, books, incidentals, and fuel can be purchased for the whole town at once. Repairs can be made so as to prevent waste. Efficient business management under public criticism and oversight can govern every transaction of school management.

6. Town management offers a well-ordered and effective school organization with control residing in a continuous body.

Control and supervision involve:

(1) Making a plan of work.

(2) Employment of a worker, the teacher, which includes:

(*a*) Ascertaining qualifications and character.

(*b*) Hiring.

(*c*) Paying.

(3) Providing a schoolroom where the work is to be performed and all necessary helps.

(4) Direction and supervision of the teaching.

(5) Judging and testing the result.

School visitors represent the town, which furnishes the money; but they are unable to fulfill the above conditions of control.

They may lay out a course and provide a plan, but they can not designate the person to whom the execution of their plans shall be intrusted. Another and independent officer, unmindful and even ignorant of their plan, sends a teacher for their simple approval or rejection. The officer who selects the teacher is not chosen because of eminent fitness for this duty; he is not obliged to nominate persons of the highest qualifications and character, nor persons acquainted with their plan, or any plan; indeed, he may pass by persons of known or approved skill, and select immature, unfit, and disqualified persons. The examiners are obliged to set the very lowest standard, and thus these unfit and disqualified persons are given charge of the children.

From this separation of selection and approbation arises a brood of evils.

(*a*) The visitors do not have a plan of work nor see that there is classification of scholars according to fitness, nor a course of study, knowing well that they can not secure persons acquainted with their plans or even able to carry them out.

(*b*) There is danger of collision and irritation if any are rejected. It follows that examiners often record the choice of the district, permit the nominee to enter the school for better or for worse, as chance may determine. The visitor has not the initial as well as the final steps to take, and therefore can not be justly held responsible if failure is the outcome. He is among friends and neighbors, and may be accused of officiousness if he insists upon a high standard and thor-

ough preparation. The school must begin, and a tentative or limited license is issued. Thus there is indecision and compromise, and the schools suffer.

(c) There is no steady policy looking to constant improvement of schools. There is a palpable absurdity in first selecting a person to teach and afterwards judging of qualification and character. There is entire rejection of all business principles in separating the employer from the supervisor and final judge of competence. There can be under such a system no continuous policy looking to the steady employment, year after year, of skilled and competent teachers; uniformly good teaching is not possible. The notions, prejudices, interests of the committees, the nominating bodies, will constantly tinge and discolor, if they do not decide, the character of the school.

(d) The visitor can put no tools in the hands of the teacher. If the teacher needs maps, books, apparatus, or material for the school, they can not be supplied by the persons who direct their use. All these depend upon the committee, who do not direct their use, or upon the uncertain generosity of the parents at the solicitation of the teachers. The schoolhouse itself may be so inconvenient that work is let and hindered; it may offend against health and decency; but the visitors can only say that the building is "unsatisfactory." The school may be discontinued if the visitors think public money should be withheld, but this is the extent of their coercive power. Practically they can not determine the conditions under which the work they are expected to supervise is performed. There is generally compromise, and again children are the sufferers.

(e) Visitors can make rules for management, but the disciplining power is in the committee. They may make wise and beneficial regulations, but they can not directly enforce them. This powerlessness leaves teachers without the strong support which comes from knowing where well-defined authority rests.

In fine, real supervision and steady improvement is impossible under such a system. No attempt to control the schools is made. The law recognizes the futility of endeavoring to regulate the process and to improve the quality of teaching by requiring but two visits in a term, and fixing the remuneration for each visit at $2 a day. No one pretends that schools can be kept to any high or even decent standard under such a system. The result can be annually commended or deplored, but no officer, town or district, understands that he is chargeable with success or failure.

7. This vacillating and dislocated system is directly chargeable with absenteeism and irregularity, which have assumed alarming proportions.

Schools are often considered of small importance because they interfere with local interests, and have been tampered with to promote personal ends. They are weakened by constant change of teachers, and perhaps by long-continued poor teaching. It follows easily that parents regard the loss of a day or of a week of trifling importance. No officer feels responsibility nor does authority so certainly reside in any that he can act with courage and fidelity. Hence, parents assert their alleged rights or consult their convenience in sending their children, because they tacitly assume that what is neglected by the public authorities can not be of private importance.

The schools managed as town institutions are of sufficient importance to secure interested care. Those to whom they are committed have a continuous, undivided, and weighty responsibility, and understand that they will be held to public account. Schools because remote do not escape notice, and because small are not treated with contempt. They can not become the schools of the committee or of the teacher, the football, year after year, of petty and unworthy interests. Elections can not be held in loneliness and haste. On the contrary, schools become and remain public institutions worthy of the generous care of every man and woman.

This town system tends to give life to every part of the school work. A standard of excellence can be set up and maintained. There is something besides a perfunctory examination or oversight by visitors, and mere hiring and paying teachers and providing premises by committees. A body of teachers can be organized whose compentency is certain, and who work with ambition because they feel the stimulus of a high standard and wise oversight.

A just and generous management by the town sends a current of vitality through every part of the educational machine, a new bond between the center and the different localities is formed, and isolation ceases to confine and crush the education of children. A haphazard and defective organization is superseded by one which, with continuing life and energy, has a standard and can maintain it. There is coordination, a working together of all the parts to a fit end.

The following-named towns have abolished their school districts:

Andover, 1888.
Ansonia, 1890.
Beacon Falls, 1892.
Bethel, 1888.
Branford, 1867.
Bridgeport, 1876.

WOMEN VOTING.

At the session of 1893 a law was passed providing that "every woman who shall have attained the age of 21 years, who shall be a citizen of this State, or of the United States, and who shall have resided in the State one year, and in the town for six months, and can read the English language, shall have the right to vote at any meeting held for the purpose of choosing any officer of schools or for any educational purpose under the general or special laws of this State."

Under this law 4,471 women voted for school officers in 1893, and 4,117 in 1894. There are approximately 230,000 women of voting age in the State.

EXPENDITURE FOR ROADS AND PAUPERS COMPARED WITH THAT FOR SCHOOLS.

The following table shows the amounts spent for schools, roads and bridges, and paupers in the several towns of Fairfield County for the year 1893-94:

Towns.	Schools.*	Roads and bridges.	Paupers.	Grand list.
Bridgeport	$182,520.21	$60,414.71	$53,510.83	$25,522,181
Danbury	30,420.38	23,828.15	30,183.36	7,327,882
Bethel	7,103.04	1,930.64	2,328.47	1,158,935
Brookfield	1,927.57	2,464.61	633.41	480,930
Darien	3,498.23	2,206.81	3,424.14	1,596,410
Easton	1,917.63	2,078.57	1,137.00	408,145
Fairfield	9,312.71	8,353.64	4,797.72	2,145,545
Greenwich	12,656.10	48,506.89	14,080.05	5,385,464
Huntington	7,273.52	4,207.27	1,864.67	1,481,265
Monroe	1,565.31	1,384.34	579.26	398,215
New Canaan	5,051.44	7,772.71	2,691.27	1,246,332
New Fairfield	1,175.05	1,306.04	901.34	348,136
Newtown	6,027.24	2,732.60	3,245.57	1,563,545
Norwalk	54,090.87	13,234.06	12,030.00	6,461,289
Redding	1,552.50	3,641.29	900.80	518,614
Ridgefield	4,348.51	9,734.18	2,447.99	1,335,417
Sherman	981.70	1,311.70	580.00	345,358
Stamford	72,317.72	38,096.77	18,371.33	9,536,691
Stratford	4,325.73	1,412.84	1,512.05	1,023,940
Trumbull	1,942.36	4,213.11	625.72	597,444
Weston	718.06	1,039.66	412.60	332,069
Westport	3,618.76	6,597.02	3,295.33	2,175,728
Wilton	2,239.83	1,821.14	1,369.02	676,384
Total (23 towns)				72,036,919

*The money paid by the State is not included in the amounts expended for schools. The amounts expended for new buildings are included.

In eleven towns more is expended for roads and bridges than for schools.

In one town more is expended for paupers than for schools.

In seven towns more is expended for schools than for roads and paupers together.

This illustrates the expenses which towns must carry. If the grand lists are justly constructed, the taxation in some towns is heavy. The question is whether the sum expended for paupers might not be diminished and the sum for schools by so much increased.

THE CREATION OF AN EDUCATIONAL MACHINE.

The graded schools have become complex organizations. When each school was complete in itself and children were taught the rudiments of knowledge, teachers were easily obtained and supervision simple. But population has increased, and changes have necessarily been introduced into school management. The simple class organization has been replaced by courses of study requiring a definite number of years for completion. Pupils must enter these classes and conform to the grading; thus larger numbers can be gathered in the same establishment and educated together. With diversified studies, definite classes, frequent examinations, and minute markings there is "system." This system requires teachers especially trained to work it.

The public school in large cities has thus outgrown its original form. The liberty of the teacher has disappeared and regulation by central authority has taken its place. A machine has been created which is expected to turn out scholars with unerring certainty if no time be lost. Children are dealt with in masses. The school system considers very little or not at all the important fact that children are individuals and should not be sacrificed to a system.

Without question, the greater the number of children the less attention can be given to each personally. This implies that the same treatment is good for every child—an assumption which is radically untrue. Children differ widely in physical endurance, power of attention, ability to remember words and their meanings, the power of quickly forming new images, and power of self-restraint. To put them all through exactly the same process is to disregard individual peculiarities. To secure good instruction with due regard to individuals there must be small classes and a teacher for every 25 or 30 children. Unless this is attained the children are sacrificed to system.

School managers are very susceptible to the beauties of a smoothly running educational machine. They are business men, and it is inevitable that they be satisfied with the annual promotions without regard to the process. Teachers, too, observe only the necessity of pushing those who can, by the leveling system, keep the average or above, and thus be promoted. The classes must conform to the course of study.

A proposal to intrust the control of schools to teachers would meet with opposition. To ignore teachers in the management of schools and to commit education to amateurs or retired teachers, or to men wholly engaged in other pursuits, subjects a great public interest entirely to persons not in touch with that interest. Such removal of school management from the influence and advice of teachers inevitably deadens the spirit of those actively engaged in teaching.

One of the most discouraging results of any machinery is that it tends to diminish the apparent necessity for independent and spontaneous exertion on the part of workers. As legal requirements and official activity approach perfection they are more and more easily accepted as final and sufficiently powerful. Many who are capable of doing better fix their whole attention upon and direct their energies to the surest means of satisfying a course of study or conforming to the known hobby of a superintendent.

THE OFFICE OF SCHOOL REPORTS.

In considering schools we must take into account local circumstances and difficulties. They may have been caused by circumstances for which neither the school officers nor teachers nor scholars were to blame. But the office of the agents is to give plain and accurate reports. The fact that peculiar circumstances have contributed to poor schools in a particular locality may excuse the failure but ought not to withhold the knowledge of the imperfections so that they may be repaired. Certainly neither suppression of faults, nor excuses, nor undeserved praise ought to shelter a state of things or a system under which it is possible for this or that local hindrance to render a school inefficient and to waste the time of children.

The business of the agents is not to make out a case either for or against anything, but to report the condition of schools and of teaching as they are evolved under a system, and so to furnish grounds for judging the system. Certainly if everything were represented as hopeful or prosperous, so as to prolong poor teaching or wasteful expenditure, then a delusion is fostered and prolonged, and the children again suffer. The picture should be faithful and vivid and frank.

It is often ungracious to state the truth, but consideration and indulgence for faults, the virtues of the private man easily become the vices of the public servant. We often enter schools where the purpose of the teacher is good, perhaps high, but

she has no knowledge of what to teach or how to teach. It may not be her fault that she is in the school. Here it is easy to bear witness to earnestness and zeal and pass over in silence lack of discipline and total failure of instruction. It is lamentably true that little children are neglected while the teacher is actively employed with the older children, or that the bright children are getting all the attention, while the plodders are wasting their time. It is easy to fasten to the good and to commend it in such cases and suppress the evident failure to fulfill the purpose of the school. Here is a positive and palpable fault, and it should be noted and corrected. A matter-of-fact statement should be made of this, and it should be so stated that it will correct the fault.

REPORT OF AN EXAMINATION OF THE SCHOOLS OF FAIRFIELD COUNTY, BY MR. M. A. WARREN.—DEMONSTRATION OF THE SUPERIORITY OF GRADED SCHOOLS.

To CHARLES D. HINE, *Secretary.*

SIR: The examination of the schools of Fairfield County reveals their need of skilled supervision. That need exists, not only in the rural districts, but in most village graded schools as well. In the rural districts the teacher is wholly unaided; in many graded schools he is practically so. What is needed is a constant, skilled, and kindly authority, which shall direct the teacher, and which shall see to it that each child is regular in attendance, is provided with books, and is receiving adequate instruction. If it be said that such supervision is impossible until the district system be abolished and free text-books provided, the answer is that those objections are details.

Of the 23 towns of Fairfield County, 8 (Brookfield, Easton, Monroe, New Fairfield, Sherman, Redding, Weston, and Wilton) have no graded schools. If to these 8 towns we add such parts of others as are similarly situated (i. e., the rural portions of every other town in the county, Bridgeport and Stamford excepted), we have a territory wherein exists a distinct class of schools working under distinct conditions. Every teacher at work within this territory must do his work unaided. He has no superintendent or principal teacher with whom he may advise. He has no associates with whom he may confer; he has no school library or apparatus from which to get books to make vivid the study of geography and history, or to make plain some elementary law of nature; there are no teachers' meetings. If these schools are good, they are good because the teacher needs no supervision. If they are poor, the question arises, might they not be made better if the teacher were properly supported? Schools of this class, by your direction, are treated separately in this report. Wherever the word "ungraded" is used, it is used to designate schools of this class.

But more remains to be said. The territory called ungraded must be enlarged; for the fact is, that many teachers at work in many graded schools of two, three, or four departments are practically unsupported and undirected in their work. These schools show no better results than schools of a single department. Indeed, many a country ungraded school may be instanced as doing better work than many village graded schools. We must add, therefore, to our long list of country teachers who stand in need of helpful supervision, another considerable number of teachers at work in graded schools whose need of direction is fully as great. When we have made this addition, we shall have a class of workers, about one-half of the total number, who are working without direction.

Fairfield County, then, is divided, educationally, into two distinct portions: (1) That territory within which the children may attend schools taught and managed by a single teacher; (2) that territory within which children may attend schools where the teacher has the direction and support of a skilled supervisor and not unfrequently the direction and support of departmental instructors. The question is, are the children of one territory getting advantages which the children of the other do not have? If so, then the condition of affairs is unequal.

Let us turn to the tables which follow, and in their illumination study that question. Bridgeport is the first town named. Bridgeport, however, has no ungraded schools. Every school in town is conducted by two or more teachers, and must therefore be classed as graded. All teachers follow, more or less closely, a course of study; all are visited by a superintendent and departmental instructors. The next town, and, indeed, the only other town in the county which provides like conditions to every school within its limits, is Stamford. That is to say, in Stamford every teacher, both in city and country, is visited by a superintendent and departmental instructors, follows more or less closely the same course of study, and attends more or less regularly teachers' meetings. In Stamford there are several ungraded schools. If these ungraded schools of Stamford, having had for three or four years the advantages of skilled supervision under town management,

show better results than those of other towns which lack that supervision, what follows? Either that these advantages should be taken away from Stamford, or that other towns should likewise have them. The State is bound to treat all alike.

Let us inquire with what success the schools in question teach writing. Not penmanship, but the ability to express thought. In order to get at the amount and kind of instruction they have received, let us test their familiarity with the technique. Doubtless, the four things of most importance in the art are to know that a sentence must begin with a capital and close with a period; that proper nouns and the pronoun I must be written with initial capitals. Tests of the ability of the pupils to do this were made in all the schools visited. They were made by dictating the six following sentences to be written by pupils:

Does John know which pencil to use?
No, he is writing with Mary's pencil.
The fourth day of the week is Wednesday.
You and I wear shoes.
The scholars all said: "Two and two are four."
Whose knife is this?

As will be seen, there are fourteen chances for the pupil to err; there are six sentences, any one of which begun with a small letter counts a failure; there are four sentences to be followed with periods; there are three proper nouns to be begun with capitals, and there is one instance of the use of the pronoun I. The uses of the interrogation point, the possessive apostrophe, and the quotation marks, some of which are more difficult to master, we are not now considering. Nor do we now consider the spelling.

Turning now to the tabular summary of the town of Stamford, and adding the number of errors on the four points there given, we find, on reducing to the basis of 100 pupils, that, omitting fractions, 47 errors were made. Turning next in succession to the nine towns which have no graded schools, and taking the corresponding figures and submitting them to the same operation, we obtain results which may fairly be called interesting. Monroe, the town making the best showing, has 100 errors to her 100 pupils, or more than twice as many as Stamford. Easton, the town next lower in rank, has 139 failures to her 100 pupils, while the average for the nine towns is 169 errors to 100 pupils. The results, arranged in alphabetical order, are as follows:

Town having supervision of its ungraded schools under town system:	
Stamford	47
Nine towns having none but ungraded schools, and having no skilled supervision (all managing their schools under district system):	
Brookfield	223
Easton	139
Monroe	100
New Fairfield	167
Redding	160
Sherman	207
Weston	216
Westport	152
Wilton	161
Average	169

We must bear in mind that these figures apply in every case to ungraded schools. The only difference between one town and the others is that in the one town the teachers feel the continuous support of a man whose entire business is to see to it that their work brings results, while in the other towns the teachers lack that feeling of support.

I may add, as a matter of interest, that in the graded schools of Stamford the failures are but 22 per 100 pupils.

Even in the same town we sometimes find painful contrasts. There are towns in Fairfield County having one or two graded schools under the care of a supervising principal, and at the same time outlying rural schools which have practically no supervision. The question is, "How do the two classes of schools compare?" In other words, "Are these towns treating all their children alike well?"

Town A has, since it was visited, abolished its school districts and assumed immediate management of its schools. Whether it has as yet placed all its schools under the care of a single skilled supervisor—one who gives all his time to the work—does not appear. Doubtless that step will follow in time. Whatever is said, consequently, of the former condition of the schools is said with this understanding—that possibly the same contrasts are not to be found now.

In Town A was found, a mile or so away from the elegant village school building, a mean little schoolhouse with mean appointments. The desks were of the box pattern and were embellished with carvings, decent and indecent. The teacher made complaint of the great irregularity of attendance, indorsing on one paper, "Five years since he first went to school, but probably hasn't averaged more than two years during that time." Similar statements made concerning other pupils.

Many pupils were unable to write well enough to take the primary examination; only 9 in all attempted it. Out of that 9, 6 failed; 1 did fairly well, and 2 did as well as did pupils of the same age in the village school. Now, if the principal of the graded school, or some other person equally competent, had had for the last half-dozen years charge of the rural school as well as his own, and had done his duty, none of these ill conditions could possibly have prevailed. Irregular attendance would have been investigated; penmanship would have been taught to the little children on convenient desks; teachers would not have been frequently changed, and if they were the same method and system would have gone on unchanged. At all times the teachers would have felt the support of the supervisor.

Let us compare the one graded school of the same town with the ten ungraded schools in the single matter of penmanship. Here and there among the papers of the ungraded schools are to be found papers on which the penmanship is as good as the penmanship on the papers of the graded school, but it is plainly the average of success which indicates the teaching. That average we find to be in the ungraded schools only 35 per cent, while in the graded schools it is 83 per cent. That is to say, that out of 100 pupils in the ungraded schools 35 pupils write currently and legibly, while out of 100 pupils in the graded school 83 write currently and legibly.

Compare the condition of the two classes of schools in this same town with respect to the teaching ability of the instructors. This can be done with some exactness, for note was made of the language, manner, cheerfulness, education of the teacher; note also was taken of the appearance of the pupils, the conveniences and condition of the schoolroom and school buildings, and all with reference to the question whether each child is getting his rights. How, then, are the children of this town being treated? Are they all getting their rights, and are their rights equally respected in the two classes of schools?

The teachers of neither class of schools in Town A were faultless. There is this difference, however—the 9 teachers of the supervised school know what they are aiming at, while the 10 teachers of the unsupervised school have never yet heard that there is anything at which to aim. That is simply saying that the 9 teachers are directed in their work, while the 10 teachers are working without direction. It is also saying that the time of the 500 children in the graded school is put to a fairly good use, while the time of the 200 children in the ungraded schools is almost wasted.

Descending to particulars and studying the written descriptions of the work being done by each teacher in Town A, we find these things noted to praise and criticise of the graded school: Some of the teachers lack cheerfulness; of one it is recorded that the order was not very good and that she seemed to have too much the idea of assigning and hearing lessons; yet all were hard at work and some were models; of the entire establishment it would be said that it is a good school; the order in passing through the halls was good.

Coming now to the description of the work of the teachers of the ten ungraded schools, we find it said of only one that her work was fair; that one is a graduate of a Massachusetts normal school. All the rest were "hearing lessons;" they were not teaching. Two were waiting with a sweet patience for the children to learn their lessons; one was absent "necessarily"—taking examinations, it was reported, in a professional school, while his younger brother, a boy of about 17, was going through the routine. To several classes which read perfunctorily from texts in history or physiology no instruction was given either on the subject-matter or on the reading, except possibly the mispronunciation of a word; in only one or two instances was there shown ability to express thought with a pen; the penmanship, as has already been said, averaged very low; the air was stifling; the outhouses would better be left undescribed. Perhaps the one worst fault of the ungraded school is the neglect of the little children.

Town A, then, divides her children into two classes. The one class she houses in a fine brick building; warms them with steam heat, provides them with comfortable desks, provides them with good teachers, makes every surrounding such as would have a good influence upon children, directs a supervising principal to look after their rights. To the other class, with inconsiderable exceptions, she gives no one of these advantages. Moreover, if a little child, as he sometimes does, attempts to cross the line and to smuggle himself into the graded school, he

is driven back again. Wickedness like that does not long go undiscovered in Town A. And these two classes of schools are under the direction of the same school authorities, are discussed in the same annual town report, and are maintained by the same tax-paying citizens.

The teaching of arithmetic.—In every school tests in number and arithmetical problems were given, and made in five divisions, the first three being trials of mental ability, the last two consisting of written work. They were as follows:

Mental, { 1. Memory work. 2. Fractions. 3. Number stories.
Written, { 4. Fundamental operations. 5. Problems.

* * * Good results should follow the teaching of arithmetic. There is but one other subject to which so much time is given in our ungraded schools, and no subject on which more care is bestowed in our best graded schools. In our country schools arithmetic is a fetish; no subdivision of the book and no problem in the book may be omitted; "to go through the arithmetic" is the ambition of the child and the ambition of the parent for the child. The time given to this subject and to the older pupils who are pursuing it is a rank robbery of the younger pupils who need to be taught to read. Let us see, then, what results follow the teaching of a subject to which so much care and time are given.

In the memory test we find the average failure per 100 to be 17 for the graded and 27 for the ungraded schools. The following table shows how many out of every 100 failed:

Town.	Graded.	Ungraded.	Town.	Graded.	Ungraded.
Bridgeport	17		Newtown	24	38
Danbury	15	28	Norwalk	16	
Bethel	13	8	Redding		23
Brookfield		16	Ridgefield	10	18
Darien	9	14	Sherman		45
Easton		35	Stamford	11	20
Fairfield	45	31	Stratford	9	21
Greenwich	10	20	Trumbull	19	47
Huntington	18	30	Weston		24
Monroe		25	Westport		36
New Canaan	17	32	Wilton		17
New Fairfield		36			

The failures per cent on the eight problems of the easier examination are as follows:

Town.	Graded.	Ungraded.	Town.	Graded.	Ungraded.
Bridgeport	38		Newtown	45	52
Danbury	23	46	Norwalk	31	
Bethel	43	63	Redding		54
Brookfield		49	Ridgefield	22	56
Darien	24	41	Sherman		63
Easton		47	Stamford	29	38
Fairfield	58	47	Stratford	32	55
Greenwich	38	48	Trumbull	26	62
Huntington	34	49	Weston		44
Monroe		49	Westport		55
New Canaan	39	62	Wilton		35
New Fairfield		53			

Other comparisons may readily be made from the tables. The conclusion that can be drawn is that arithmetic, in the sense of following the book, is not wholly a failure in the graded and ungraded schools of Fairfield County, but that, in a higher sense, the teaching of arithmetic in both the graded and ungraded schools comes far short of doing what it ought for the child. Our teachers follow the book, they study "methods" and "devices," but they do not study the child. Whether the subject to be taught bears any relation to knowledge already the child's; how to fasten the new to the old so as to make the old completer and the new welcome; whether this subject would not be better omitted and that taught rudimentarily; how to secure drill on the tables until the memory work be completely

done; how to so treat this lesson as to clarify and not to obscure the child's judgment—questions like these do not seem to disturb the great majority of our teachers. To illustrate:

One of the tests given was this question: What is the interest at 5 per cent of $300 from to-day to January next? Ought not a moment's thought to show to any child that the answer could not possibly be more than $15? If the question be asked in March, are not the remaining months eight? Are not the remaining eight months two-thirds of a year, and consequently must not the result be about $10? When an estimate like that is so easily formed; when the power to form it gives its possessor such conscious strength and is of so much more value than mere figuring, then a failure to teach it is a failure to teach arithmetic.

Absurd answers to that question come from graded and ungraded schools alike. Nor will they ever cease until, by the exclusion of useless subjects and intricate problems, bookwork is reduced one-half and time is gained for the teacher to teach and for the pupils to grow.

The teaching of reading.—Of every child we say, at some point in his career, that he has learned to read. We do not mean, when we say it, that he can read everything; we mean that he readily understands what he sees on the page, provided the thought be within his comprehension.

For what is reading? Reading is the gathering of thought from the printed or written page. The one condition on which the eye continues to gather is that the mind continues to enjoy. Reading matter must therefore be fresh. The child should read many books after he has learned to read. In one school in the State the number of books read within a year was 50; but that school is not in Fairfield County.

Oral reading must not be neglected in our schools. Much drill on a few pieces and some drill on many others is necessary; but such drill is not reading; it is an exercise in elocution or articulation; real reading is the mastery of the printed page; it may be silent or oral; usually it is silent.

All teaching of reading is therefore easily divisible into two parts: (1) teaching the child to read, and (2) guiding him in his reading. The first part should be accomplished with the average pupil in a comparatively short time. Bright pupils have learned to read within a year and within even less time. As to how this first part of the work should be accomplished much has been written and more said. The tabular statements which follow will declare in a general way how it is done in Fairfield County. No comment is made upon those tabular statements; attention will be limited to the second part of the work—the guidance of the child after he has learned to read.

When the child has once learned to read, it is plain that he should be encouraged to read, that he should be guided in his choice of books, and that he should be encouraged to talk about books. Thus do we inform his mind and cultivate his judgment and taste. Next to the teaching of morality this work is the most important the teacher can do for the child. Every child in these days of cheap books has a right to be so guided. The poorer the home of the child the greater the obligation resting upon his school. The question is, How much of this work are the schools of Fairfield County doing? The answer to that question is, The graded schools are doing something and doing more and more; the ungraded schools are doing nothing, nor do they see the need of doing anything.

In every school in Fairfield County the question has been asked whether any attention is given to silent reading. Answers to that question will be found in tabulated form in the pages which follow. In this connection inquiries were also made as to whether any books for class reading supplementary to the authorized reader were provided. If there were a district library, a catalogue was secured, and inquiries were made as to the use and condition of the books. Catalogues of Sunday-school libraries and the town library, if any, were, when possible, secured. The practical summary to all these inquiries is this: In the graded schools something is being done to direct the reading of the child; in the ungraded schools such direction is unknown.

What is done to teach reading is well illustrated by the children themselves. If a visitor ask to hear reading, the children begin to search for their reading books. These books have been traversed again and again; they yield no further information or enjoyment; much of the book, perhaps, is known by heart; yet the children expect to "read" from these books; they would think it not a little unusual and perhaps unfair if asked to read from another book, although that other book were well within their powers. No doubt a single book well mastered, and until mastered, is necessary while a child is learning to read; no doubt single pieces in a single book should be well practiced for elocutionary and enunciatory drill after the child has learned to read; the point is that neither is reading, and

that in this sense very little real reading is taught in our country schools and not enough in our graded schools. It seems to be thought no part of the teacher's duty to lead the child to read after he has been taught to read.

Whenever a defect in school work is pointed out there is always at hand a ready reply: There is no time to do differently. That reply is not, however, applicable here. Unless it be arithmetic, there is no subject to which more time is given. The average child spends four or five years in school, the largest share of which time is given to reading. Clearly it is not time which is wanting here. What is wanted is somebody to surpervise who shall get books somehow and encourage and show the teacher how to use them.

Of the graded schools of Fairfield County (not now including those of Bethel, Darien, Norwalk, or Ridgefield), those of Bridgeport and Stamford seem to be doing most to teach real reading. This is not saying that other towns are doing nothing; it is saying that these towns are doing something. In Bridgeport, for example, books are regularly passed on from school to school by direction of the superintendent. At least two school principals have bookcases in their rooms within which to store books borrowed from the free town library. In Stamford the principals give entertainments to secure funds for the purchase of books and periodicals. The spirit prevailing in the last-named place is illustrated by the remark of one of the principals, who said, "I owe my start in life to a teacher who loaned me a book, saying, 'I think you will like to read it.'"

We have now briefly passed in review the schools of Fairfield County with respect to their success in teaching reading, writing, and arithmetic. Schools which do not successfully teach the three R's can never be called good. We find that most supervised graded schools are teaching these three branches well; we find a few unsupervised, ungraded schools here and there which are doing good work. We do also find that many graded schools of two or three departments which are practically unsupervised, and most ungraded schools which are wholly unsupervised, are doing very poor work. We find, moreover, that almost all teachers of the latter class are grateful for suggestions, and we find reason to believe that all who are worthy to continue their work would welcome the aid which competent supervision would furnish. The question is, Ought not the State to furnish such helpful supervision, and at once?

M. A. WARREN.

DISTRICT OF COLUMBIA.

It will be seen that a large portion of the appropriation is used for materials that perish by first use—paper, ink, etc. This portion of the expenditure is made larger by the fact of much independent work on the part of the child. Didactic teaching has been almost eliminated from our processes on the part of the teacher, and memoriter work on the part of the child. The pupil being expected and trained to help himself, must have materials upon which, and tools with which, to work.

The small per capita cost of books, that do not perish by first using, is noticeable, and is an evidence of good management and conscientious discharge of responsibility on the part of our teachers and a gratifying care on the part of the pupils. The per capita cost was less than it will be in the future, though I believe it will never be a very great deal more than it is shown to be in this report. The per capita cost of books in the seventh and eighth grades appears to be large. This is because the cost last year was for first introduction of free books in these grades. As these books will wear out gradually, the annual per capita cost in these grades will be but a small fraction of that shown above for the past year, although it will undoubtedly be much larger than the annual per capita cost for the grades below.

The estimated cost for free text-books for the school year ending June 30, 1896, is $5,000 larger than that already appropriated for the year ending June 30, 1895. This additional amount is made necessary because there will be considerable increase of loss occasioned by wear and tear incident to three years' use of books in the fifth and sixth grades and of two years' use in the seventh and eighth grades. In addition to this, provision must be made for the growth of the schools.

It must be seen that to the community at large the cost of text-books when furnished by the authorities and cared for by the administrators of schools is very much less than when pupils buy their own books to be cared for mainly at home.

It has been our custom to destroy books in use by pupils in families where contagious diseases have been developed while children from such families have attended school. The loss of books thus occasioned has been relatively inconsiderable, however, whereas it is believed that the spread of contagion has been to a large degree prevented. In this matter the school authorities have acted in most cases on the advice of the health department of the District.

Every consideration of economy, whether relating to the conduct and management of schools by the instructors or to the convenience, welfare, and advancement of the children, warrants the belief that the furnishing of books and supplies is wise and the continuance of the same advisable.

FLORIDA.

[From the report for 1893-94 of State Supt. William N. Sheats.]

COMPARATIVE RACIAL STATISTICS.

The remark is now often heard that the negroes make better use of public-school privileges than the whites; in fact, some go so far as to allege that they get the benefit of the greater part of the school fund. The statistical totals, and more particularly the items recorded in the tables, show that such is not the case.

Not only a much larger percentage of white children of school age enter the schools, but the facts show that those entering attend more regularly than do the negro children.

The fact is also brought out that the average number of pupils to the negro teacher is much larger than the average number in charge of white teachers. This is partly due to the fact that the tendency of the negroes is to congregate in villages, cities, and densely populated neighborhoods, making it easy to assemble large numbers of children in schools, and is partly due to the difficulty of obtaining as yet a sufficient number of suitable teachers for their schools. On the other hand, the whites are scattered over large areas of sparsely settled country districts, and their schools are from necessity small. The above fact also accounts in part for the difference in the relative cost per capita of the two races in some sections of the State, it being granted that it costs less to provide teachers and facilities for educating a large number of pupils in one school than the same number in several small schools.

NEGRO EDUCATION.

It is due to the negroes to say that they are manifesting, in the main, as commendable ambition to obtain an education as any race in like social and financial conditions anywhere in the world. While the great body of them do not appear as eager for an education as when the doors of the schools were first thrown open to them, still many are laboring and sacrificing to obtain a degree of education far beyond that which at first satisfied their ambition; namely, to scrawl and read, after a fashion. It may be truthfully said that no appreciable number of intelligent whites begrudge them their educational advantages, but that taxes are cheerfully paid to give them school privileges. This will continue to be the case if their unwise friends will not intermeddle, but permit them to be educated as the people are willing that they should be, in their own schools separately, without any efforts at coeducation of the races. Any effort to enforce mixed education of the races as it obtains in many of the States would forever destroy the public-school system at one swoop, and cause the whites to abandon all efforts at their education. The efforts Northern benevolent associations are making in this State to educate a few of them in schools with the whites are exceedingly exasperating to the negro's Southern friends, who bear the burden of their education; and in the aggregate, such help ends in harm to the race. The truth is, the race has too many loving guardians.

For the most part, there is no discrimination against them in school matters; they are given as nearly equal advantages as under their present conditions they are able to make use of or to materially appreciate. Negro teachers are paid as liberal salaries as teachers of similar qualifications receive anywhere in the United States.

There are quite a number of prominent negro educators getting splendid salaries, that are working industriously to advance the intellectual and material welfare and progress of their race. Many others are constantly fitting themselves for a better grade of work, and as a result they are receiving constantly increasing salaries.

If the present examination law is wisely enforced, the time is not far distant when there will be a much better grade of negro teachers than has heretofore existed, and the advantage will be that their race will get more value out of their schools. Some schools may go untaught for a time, but this need cause no alarm, and it will end in gain rather than a loss; as they would be much better not taught at all than taught by such teachers as are too often obtained.

There is no necessity for making exceptions in school laws for the benefit of negro teachers; only be firm and they will very soon work up to required demands. In order that they may be encouraged to properly fit themselves to do the teaching of their race, and to prevent the worthy from being crowded out by others with an overweening desire to have a share in their education, it is our judgment that the time has arrived when a law should be passed protecting the educated negro in the right to teach his own race. They are fully able to stand alone in this respect.

I have the temerity to ask the legislature to enact a law prohibiting, in both public and private schools, any but negroes from teaching schools for negroes, excepting in the matter of normal instruction to their teachers in institutes and summer schools.

The race is prevented by constitutional and statutory provisions from intermarrying or attending schools with the whites. Why not give them some exclusive privileges?

I would at the same time fortify the statute preventing amalgamation by mak-

ing it a penal offense to teach whites and negroes in the same schools in either public, private, or benevolent institutions. I request this as an act of friendship to the race, to shield them from the folly of some of their friends.

The sentiment of the negro and his race pride, which it is especially desirable to develop, is strongly opposed to having white teachers placed in charge of their schools, and they do not seek coeducation of the races.

NUMBER OF SCHOOLS.

While there has been an increase of 36 schools during the past two years, I would have been equally as well pleased to have reported no increase. The policy of this administration has been better schools, and fewer, if necessary to produce that result. Finding that too much satisfaction had been taken in the number of schools rather than in their quality, and that school funds and efforts were being greatly dissipated and neutralized by the establishment of too great a number of small schools with weak teachers, the tendency being toward still greater subdivision, to satisfy unthinking patrons, early in my term of office a circular letter was issued counseling school boards to adopt the policy of reducing rather than of increasing the number of schools, unless absolutely necessary to give school privileges to youth of school age.

The object of this policy, of course, was to leave more fund for each school, that a better grade teacher might be employed for a longer time, and not, as some suppose, to deprive any of school privileges.

It is honestly believed that it would be far better for every child in the State to be compelled to walk from 1½ to 2 miles to school, and, after it gets there, to receive instruction from a true teacher, than to multiply the schools beyond the ability of the fund to reach competent teachers and secure a walk of half a mile or less for half of the children of the State in reaching a poor school. Twenty years ago children thought nothing of walking 3 miles to school. It is too often the case that requests to subdivide or to create new schools have as their real foundation, not the chief interests of the children, though the children are placed first in the plea to secure favorable action by boards, the real object being to provide places for friends and kin-people of the patrons petitioning.

The policy contained in this circular letter to school officers was afterwards indorsed and promulgated by the State board of education.

The reported efforts of these officers in various counties to prevent the multiplication of schools and to reduce their number by combining, where possible, 2 and even 3 schools into 1, led to the belief that the number of schools would be rather diminished than increased. The reported disestablishment of old sites where they had been ill-advisedly or too nearly located for the prosperous conduct of schools, led to the same belief. So it is more a matter of surprise than of gratification that the statistical tables really show the number of schools increased 36 during the year 1893–94, since the fact was published five years ago that a school was within reach of every child.

NEW GRADES AND FORMS OF TEACHERS' CERTIFICATES.

The legislature of 1893 created six grades of teachers' certificates in lieu of three grades in existence prior to that time. Two of the latter, called second and third grade certificates, were issuable in the county on annual examinations, and good for only one year; but the annual-examination provision was faithfully carried out only in a very few counties. The other was called a first-grade or State certificate, good for five years, issuable on examination in the high-school course of study, but oftener granted on recommendation and renewable upon request; hence it was practically a complimentary life certificate, with the privileges attached to it very much abused.

The six certificates created by the last legislature are divided into three county grades and three State grades; the county grades are known as the first, second, and third grade certificates, issuable only upon examination held in the county as prescribed by law, on set days and on branches specified by law, the questions being prepared in all cases by the State superintendent of public instruction. They are good for three, two, and one year, respectively. The average required for the first grade is 80 per cent, with no grade below 60, on each of the following 14 branches: Orthography, reading, penmanship, arithmetic, English grammar, geography, United States history, physiology, composition, theory and practice of teaching, algebra, physical geography, bookkeeping, and civil government. This certificate is good in any part of the State if indorsed by the county superintendent where presented.

The second and third grade certificates differ from the above: (1) In being good for two and one year, respectively, and only in the county where issued; (2) in requiring examination only in the first 10 of the above branches; (3) the second requiring a general average of 75 per cent, with no grade on any branch below 50; the third grade requiring an average of 60 per cent, with no grade on any subject below 40 per cent.

The three grades of State certificates are known as the State, life, and primary life, all good in any part of the State. The State certificate is issuable only upon examination by the State superintendent on the 14 branches required for the first grade, with examination on the 10 additional branches: Geometry, trigonometry, physics, botany, zoology, English literature, general history, mental science, rhetoric, and Latin. The general average grade required is 85 per cent, with no grade below 60 per cent. This certificate is good in any part of the State for a term of five years, and not issuable to one who has not taught at least twenty-four months, eight of which must have been successfully taught within the State.

The life certificate, as its name implies, is good for life within the State, and is issuable, without examination, only to eminently successful teachers who are indorsed in a prescribed way and have taught at least thirty months in this State under a State certificate.

The primary life certificate is good for life, and, as its name further implies, is good only in the primary department of regularly graded schools, and is issuable only to eminently successful primary teachers who have received special training in kindergarten or primary work, and who have taught successfully for three years in this State.

THE STATE UNIFORM EXAMINATION LAW.

With an experience running through twelve years as county superintendent of schools, and from frequent and close contact with the leading teachers and school officers of the State at annual gatherings and other times, I had become firmly convinced years ago that the chief defect in our public-school system was the loose manner in which teachers were selected, and the evident lack of regard paid to qualifications of teachers, and the almost entire absence of any form of examination that could be called such in many of the counties.

In short, the great need of the system was not only a corps of better qualified teachers, but a band of acquiring, researching, and growing teachers, not satisfied with present attainments, but keeping step to the march of progress in educational movement all over the country. I felt that the standard of the ideal teacher was entirely too low in every respect. Consequently, upon assuming the duties of the office of State superintendent of public instruction, I conceived it to be my duty, as I was capable of seeing it, to inaugurate some system of examination that would improve the scholarship of the teaching force, which, to say the least, is one of the fundamental essentials to a successful teacher. I felt that the whole force needed to be set to work again. To do this successfully, I realized that the matter of examination would of necessity have to be taken partially out of the hands of local authorities, often incapable, in point of education, of properly conducting them, and too often biased in their judgment of the fitness of candidates to teach by questions of necessity, relationship, politics, personal advantage, spite, or other influence.

I had realized by actual experience the force of the truism, "As is the teacher, so is the school," and, from witnessing the magic influence over a community of a qualified, earnest, and enthusiastic teacher, I had reached the conclusion that the welfare of the State and its future citizenship demanded a larger body of the same kind.

There was too little distinction recognized between the different grades of teachers and too great disparity in the requirements for the same grade of certificates in the few counties in which anything like examinations were held. It was apparent that if there was to be anything like a State school system in fact as well as in name, the mode of examinations and the requirements in the same could not be left to the caprice of county school authorities, even as good as some were.

The fact is admitted that up to this point the State had made wonderful progress in the matter of education, and had many teachers of which any State might feel proud, and it was earnestly believed that this class were broad and patriotic enough to be willing to sacrifice something of personal pride or gain in any efforts that might be made to elevate the whole body of colaborers; especially since, under existing state of affairs, such teachers were neither in the matter of salary nor in recognition of their qualifications, sufficiently differentiated from the gen-

eral mass. As a result, proper incentives to progressive study and the attainment of a high grade of qualification were lacking.

So to provide both for the present need and future growth of our public-school system, I drafted and presented to the last legislature a bill providing for a system of State uniform examinations, embodying the general features of the system which I, as county superintendent, had for years been successfully operating in Alachua County. This is essentially the same system as was first put into operation in the State of New York, afterwards in Indiana, thence rapidly passing into many of the leading States educationally in the Union; and is destined to become in the near future the universal method in the United States. The bill, with but little opposition, passed both houses and became a law by the signature of the governor June 8, 1893.

MAIN FEATURES.

That part of the bill providing for the different grades of certificates has already been mentioned. It provides for two annual examinations, to be held the first Tuesday after the first Monday in May and September of each year, lodging with the State superintendent authority to order examinations on other dates for any county or counties, when necessity to him seems apparent.

All questions for these examinations are prepared by the State superintendent and by him transmitted under seal to every county superintendent, who in each county is the examining officer.

A uniform method of procedure is prescribed for the details of the examination. The papers of the candidates are all prepared in the presence of the county superintendent or his assistant, and, unmarked as to authorship, are deposited with the county superintendent and by him numbered to denote authorship, and turned over to a grading committee composed of three teachers selected from the best by the county school board. This committee grades the papers, whose authorship is unknown, and their own personality is supposed to be unknown to the examinees. The work of this committee completed, a gradation sheet containing the grade of each examinee, who is denoted by a number, on each branch, is delivered to the county superintendent, who under conditions prescribed issues certificates therefrom.

So far as it affected county certificates this law met with little opposition on the part of intelligent teachers, conscious of their ability to stand the examination. In fact, it was heartily indorsed as being fair; and was favorably received because it abolished the heretofore annual examination by giving longer term certificates, offered an increasing premium to competency and progress, and drew a sharper distinction between the various grades of qualifications.

It provided for a system of State certificates articulating with the system of county certificates and based like them upon written examination, so far as the first one is concerned, but unlike them in that successful experience in teaching for a number of months, a part of which must have been in the schools of this State, is precedent to eligibility to one of these certificates, and in that with continued success and growth as a teacher they may terminate in a professional life certificate without further examination. The whole system is progressive in every respect from the lowest to the highest grade of certificate.

OPPOSITION TO THE LAW.

Like all pronounced reforms, especially in school matters, this law met with its share of opposition on the part of the class from which it was naturally expected, and more particularly because it contained a provision which canceled several hundred unexpired five-year certificates. (They were five-year ostensibly, but, as custom had run, in reality perpetual certificates.) These certificates had been scattered so profusely and indiscriminately over the State that they had become worthless as signifying teaching ability or even scholarship.

While worthily held, of course, by all prominent and leading teachers, still hundreds of inexperienced boys and girls and incompetent older teachers had managed to intrench themselves behind this safe protection, forming a dangerous gangrene about the vitals of our educational body. This had to be reached.

It would have been a pleasing task, had it been possible, to have framed a law that would, while effectually reaching the latter, have recognized and protected the former; but to reach the deep-seated disease it was found necessary to cut through some good sound flesh. None regretted this more than myself.

Opposition on the part of a certain class was anticipated and fortified against, as the history of the law shows it to have met such in every State into which it has been introduced. Vampires on the body politic always make a death struggle when their hold is loosened.

Opposition to the law has everywhere, however, soon died away, and in many cases its most violent opposers in the beginning have become its most ardent advocates in the end.

The opposition in this State was never so extensive nor consequential as the public was led to believe from the amount of noise made by a few concerted and in many cases wholly unworthy opponents, operating in ambush under a nom de plume or through the pen of an irresponsible newsgatherer. The opposition in general grew out of motives of a personal or selfish nature, and such as was from worthy and conscientious sources was confined to a very few as compared to the whole body of officers and teachers.

In the three or four counties where this opposition was appreciable, it was readily traceable to two or three persons of influence in school positions, and if it were just to deal with motives even these might be stated.

Given time and faithful execution, the law will fully vindicate its wisdom and verify to the fullest extent the promises and fondest hopes of its friends, and accomplish for our own State what is claimed it has done for other States in which it has been tested.

It is unnecessary to repeat and to refute here the many charges made against it as being inoperative, impossible to put into execution, and the like, by those hunting some way to evade it. We have only to report that the impossible has been accomplished and the system is everywhere in operation and working smoothly and harmoniously, the slight friction incident to the starting of new machinery having almost or quite disappeared.

It is admitted that a missing link or two in the law had to be supplied by official interpretation. These were promptly furnished and there was not the least difficulty found in putting in operation the provisions of the law in seven-eighths of the counties of the State. In the one-eighth, it existed more in the imagination and obstinate blindness of those charged with its execution and who were at the same time hunting grounds for evasion.

EVIDENCES OF APPRECIATION OF THE UNIFORM LAW.

In order to be able to acquaint the legislature with the practical workings of the law after a few months' operation and to disprove the predictions of some of the opponents of the law, on November 25, 1894, a circular letter was addressed to the county superintendents, soliciting information with regard to the number of certificates issued under the new law, in which the following questions were submitted for answer:

1. How many of the failures to obtain certificates do you regard as unfortunate for the educational interests of your county?
2. How many of your regular and efficient teachers failed to apply for examination under the new law?
3. How many of these efficient teachers failing to apply do you think were driven out of the profession by the new examination law?
4. To what extent and in what direction have the educational interests of your county been affected by the uniform examinations?
6. Have the places thus made vacant in the ranks of your teachers been filled by better or by worse material?
7. How do your teachers this year compare with those of the year previous in general qualification and interest in school work?
8. Have you always heretofore been able to open all your schools, at the beginning of the school year, with satisfactory teachers?
9. How many schools of your county will not be opened at all this year on account of insufficiency of teaching force?
10. How does the popular interest in public education in your county this year compare with that of the year previous?
11. From what you have seen of its practical workings, what do you think will be the effect of the uniform examination law if faithfully and discreetly executed?
12. Do you favor or oppose uniform examinations? Give your reasons for your answer.

PLENTY OF TEACHERS.

From information thus elicited, it appears that in the regular examinations in May and September, and the special examination of October, there were 2,829 certificates issued, 280 first grade, 1,209 second grade, and 1,340 third grade—a sufficient number to enable every school in the State to be taught during the year, when we take into consideration the fact that 280 of these teachers are not circumscribed by county lines and may teach two or even three schools.

THE LAW IN OPERATION.

To the questions above submitted, the superintendents answered as follows:

To Question No. 1—32 answered, "None;" 2, "Not one;" 2, "Not any;" 1, "Possibly none;" 1, "Can't say;" 2, "One;" 1, "Two;" 1, "Three;" and 1, "Four."

To question No. 2—21, "None;" 1, "None, a few school keepers;" 1, "Few, if any;" the rest reporting from 1 to 9, 75 in all, as failing to apply.

To Question No. 3—22, "None;" 1, "None, they never were 'in it;'" 1, "Few, if any;" 2, "Do not know;" the rest reporting from 1 to 12.

To Question No. 4—26 expressed great satisfaction at the results, answering as follows: "Better teachers by 50 per cent;" "Teachers feel their profession protected;" "Gives us more competent teachers;" "Greatly beneficial;" "Considerably for the better," etc. Eleven saw no appreciable difference; 5 expressed disapprobation in the following language: "Causes dissatisfaction among patrons;" "Closed a few schools;" "A temporary set-back;" "Good teachers were lost;" "Hurts small schools."

To question No. 6—27 answered, "By better material;" 8, "Equally as good" or "about the same;" few noncommittal, and 1 said, "Worse."

To Question No. 7—36 expressed a gratifying showing as follows: "Decidedly better;" "Better qualified;" "More interested;" "The best we have ever had;" "Far better;" "50 per cent better;" "Better both as to qualification and interest;" "More earnest;" "More enthusiastic," etc.; 6, undecided; 1 says, "Improvement, but not the result of the law."

To Question No. 8—36 answered, "No;" 8, "Yes."

To Question No. 9—27, "None;" others, answering from 1 to 30, mostly colored, aggregating 116.

To Question No. 10—36 express a gratifying showing, as follows: "Better by 100 per cent;" "A great deal better;" "Very favorably;" "Greatly enhanced;" "Unusual interest," etc.; 7 report, "About the same;" 2 not reporting.

To Question No. 11—40 are most enthusiastic over the promise of the new law, expressing themselves as follows: "It gives a better system in every particular;" "Will insure us much better teachers;" "Will advance educational interests generally;" "Will give a superior class of teachers;" "Will give better teachers, the law is good;" "Its permanent effects will certainly be good;" "Good, it has stimulated the teachers and induced much study;" "The result will be better teachers, better schools, better and more systematic work;" "Will bring us into line with the leading States and encourage good teachers;" "Will give teachers who know something and pupils who can pass examinations;" "Improved schools and assured good teaching;" "It will prove a lasting benefit to the children of the State;" "Will drive out lazy incompetents and inspire a wholesome respect for the teacher;" "Will prove a blessing," etc. Five express themselves as follows: "The law is an injustice;" "With some amendments, it would be all right;" "Needs some amendments;" "Can not answer;" 1 evades answer.

To Question No. 12—40 put themselves on record as heartily favoring the system, fortifying their answers with well written and carefully thought-out discussions on the subject, the length of which precludes their publication. Of the remaining 5, 3 evade answer; 1 says, "I would favor it with changes;" and the other has made the astonishing discovery that "The law is a failure!"

ONE HIGH SCHOOL FOR EVERY COUNTY.

The systems of primary and grammar schools have reached such a degree of perfection that anyone reared in the State can, if he will only avail himself of the advantages afforded, obtain before he reaches maturity a good education of grammar-school grade.

The seminaries, normal schools, and State agricultural college, aided by the various denominational institutions, provide admirably for the collegiate education of all privileged or disposed to seek that grade.

In my judgment, there is missing the middle link in the educational system of the State, and every county is able and now ready to supply that link, if encouraged to do so; and the backbone of the men charged with the duty can be so strengthened that they will turn a deaf ear to the voice of demagogy. One good secondary school for every county for whites, and one for blacks in populous negro counties, is now necessary to complete the system and strengthen both the common public school and the higher institutions.

At first each of these schools need not be strictly a high school, but a graded and high school—that is, a regular graded school with a high-school department.

I believe it would be a wise step on the part of the legislature to amend section 242, paragraph 5, of the revised statutes, and make it mandatory, instead of conditional, upon each county board of public instruction to establish and maintain for eight months in every year either a county high school or a graded and high school.

This school should be located at the county seat or at the most important cen-

ter in the county. There is so much jealousy between country and town, which largely controls the country or town representatives on the county boards, that I do not believe that many counties will ever have such a school unless it is made mandatory to establish one, and the very counties needing them worst are the ones least likely to get them.

Now, no one is further from advocating the concentration of all school effort or school funds in the towns than I am, nor do I believe that anyone would cry out more vigorously or promptly against any abuse of that kind.

There is no necessity, as some suppose, for making any very great discrimination in the per capita appropriation to sustain such a school, because a large number of children can be given equal school privileges at a less cost per capita than the same number at many points. So such a school, being located at the most populous center of a county, this principle would help to reduce the apparent discrimination in cost per pupil. It is a fact in almost every county that the smallest country schools receive the largest per capita appropriation on the basis of average attendance.

It is admitted that a high school carries a local advantage to the community receiving it. At the same time it is a great advantage to every part of a county, in that every advanced pupil in the county is privileged to get a high-school education or to prepare for college at the very lowest cost, and spend all his money at home. Such a school would improve the educational tone of a county, and not only enable them to obtain one but cause many to seek a higher degree of education as fitness both for teaching and for business who would not do so if compelled to seek an education outside their own county. Many of the best public-school teachers now in the counties having such a school receive their instruction at the county graded or high school. I know that there is a spirit of selfishness, in nearly every county, which opposes one high school, because the county fund will not justify a high-grade teacher and an eight-months' term for every small school in the county. But if allowed to prevail the same selfish spirit of dog in the manger would immediately close the doors of every college, normal school, and university supported by the State fund in the land, because no State would be able to sustain one such school at every town or in every county.

So far from the accusation being true, that the taxes of the countrymen are taken to build up fine schools for long terms in the towns, there is not a large town in the State, where school finances are properly managed, that gets back as much money through its schools as its citizens pay school tax. Where does the excess go?

Under the present system of examination it will be almost impossible to keep a supply of competent teachers in some of the counties unless steps are taken to educate in the counties those being reared in and who are likely to remain in the county.

KANSAS.

[From the report for 1893-94 of State Supt. H. N. Gaines.]

COUNTY HIGH SCHOOLS.

The founders of our school system doubtless thought that they were placing a free higher education within the reach of every boy and girl in the State. To anyone familiar with the workings of the present system, no argument need be advanced to disclose the fact that only a few, indeed, reach the coveted goal. There is a break between the common schools and the university system. Those who complete the course of study in the district schools are not prepared to enter any of the State institutions. In order to prepare themselves for higher training, they are compelled to turn from the free school to the fee system. A number of cases came under the observation of this office within the past two years where cities would not permit nonresident pupils to attend the city schools even for tuition. But few counties in the State have towns within their limits large enough to support high schools, and still a smaller number of these larger towns furnish educational advantages which are satisfactory or adequate. Under the present system no provision is made for higher training for the great population living in the rural districts and villages. The State should place a free higher education within the reach of every one of her citizens, no matter how humbly born.

At the session in 1886 the legislature recognized the break that exists in the system and endeavored to fill it by establishing county high schools. The principle has proved to be excellent, but the law has been almost a failure. Only two schools have been established under the act—one in Dickinson County, the other in Atchison County. At the last session of the legislature the third one was established,

in Labette County, by a special act. The two schools founded under the general act have demonstrated that they completely fill the break that exists in our educational system. The enrollment in the Dickinson County High School last year was 263. Of this number, only 4 came from the city schools of the county. Fully 80 per cent of the enrollment were young men and women who would never have attended any institution of learning other than the district school had it not been that a free school of higher learning was established in their midst. The expense of maintaining such a school is small; only 1-mill tax has been levied for the support of the Dickinson County High School since its establishment, excepting buildings and grounds. Atchison County High School makes nearly as good a showing, notwithstanding its building was totally destroyed by fire the past year. The Labette County High School begins its first year with an enrollment of nearly 150. Many counties have voted upon the proposition within the past two years, but in each case it was defeated. The failure was due mainly to the interest of rival towns. The present law is inadequate, and should be amended.

MAINE.

[From the report for 1893-94 of State Supt. N. A. Luce.]

CHANGE FROM THE DISTRICT TO THE TOWN SYSTEM.

The act of the last legislature, entitled "An act to abolish school districts and to provide for more efficient supervision of public schools," which became law on the 1st day of March, 1894, makes radical change in the management of the common schools. The law, in terms, is as follows:

AN ACT to abolish school districts and to provide for more efficient supervision of public schools.

SEC. 1. The school districts in all towns in this State are hereby abolished: Provided, however, That school districts organized with special powers by act of the legislature may retain such organization and special powers; but said districts * * * shall be entitled to such portion of the common-school funds of the town as said committees shall determine, which sum shall not be less than is necessary for the maintenance of their schools for a period equal to that of the other schools of the town.

SEC. 2. Immediately after this act shall have become a law, towns shall take possession of all schoolhouses, lands, apparatus, and other property owned and used by the school districts hereby abolished, which districts may lawfully sell and convey. The property so taken shall forthwith be appraised by the assessors of said towns, and at the first annual assessment thereafter a tax shall be levied upon the whole town, or such part thereof as is included within the districts abolished, equal to the whole of said appraisal, and there shall be remitted to the taxpayers of each of said districts the said appraised value of its property so taken. In case of districts comprising parts of two or more towns, the assessors of said towns shall jointly appraise the school property belonging to said districts, and shall determine the part thereof belonging to each of the said towns, and each town shall remit to the taxpayers in its part of such district the part so determined, in the same manner as in case of districts wholly within said town, except that cities or towns, which have or shall reimburse districts or parts of districts for their school property, shall receive for the use of such city or town, the money to which such districts or parts of districts shall be entitled under this act.

SEC. 3. This act shall not abolish or change the location of any school legally established at the time of its passage; but any town at its annual meeting, or at a meeting called for the purpose, may determine the number and location of its schools, and may discontinue them or change their location; but such discontinuance or change of location shall be made only on the written recommendation of the superintending school committee, and on conditions proper to preserve the just rights and privileges of the inhabitants for whose benefit such schools were established; provided, however, that in case of any school having, as now established, or which shall hereafter have, too few scholars for its profitable maintenance, the superintending school committee may suspend the operation of such school for not more than one year, unless otherwise instructed by the town, and may provide for the scholars belonging thereto, in other schools, for which purpose they may, if in their judgment necessary, procure the conveyance of said scholars to such other schools and pay for the same from the school moneys of the town.

SEC. 4. The corporate powers of every school district shall continue under this act so far as the same may be necessary for the meeting of its liabilities and the enforcing of its rights; and any property held in trust by any school district by virtue of a gift, devise, or bequest for the benefit of said district shall continue to be held and used according to the terms thereof.

SEC. 5. The school moneys of every town shall be so expended as to give as nearly as practicable the same aggregate annual length of terms in all its schools, and every town shall make provision for the maintenance of all its schools for not less than twenty weeks annually. Any town failing to maintain its schools as provided in this section, shall be debarred from drawing its State school moneys, till it shall have made suitable provisions for so maintaining them thereafter.

SEC. 6. Adjoining towns, upon the written recommendation of the school committee of said towns, may by concurrent action maintain union schools for the benefit of parts of said towns in what are now union school districts, or may establish such schools, and shall contribute to their support each in proportion to the number of scholars in each of said towns attending such schools. Said schools shall be under the management of the school committee of the town in which their schoolhouses are located.

* * * * * * *

SEC. 8. The management of the schools and the custody and care of all school property in every town shall devolve upon a superintending school committee consisting of three, five, or seven

members in each town, as the town may elect, who shall be chosen by ballot at the annual meeting of the town, and shall hold office for three years. * * * Said committee shall have power to fill vacancies occurring during the interim between annual meetings, and shall annually elect one of its members supervisor of schools, who shall be, ex officio, secretary of the committee, shall make the annual enumeration of scholars required by law, and shall examine the schools and inquire into the regulations and discipline thereof and the proficiency of the scholars, for which purpose he shall visit each school at least twice each term. He shall make all reports and returns relating to the schools of the town which are now or may be required by law to be made by superintending school committees, and perform such other duties as said committee shall direct: *Provided further*, That in case the town so authorize, in lieu of the supervisor herein provided for, a superintendent may be elected who may or may not be a member of the committee. Said committee shall serve without pay, but the supervisor, or superintendent by them elected, shall receive for his services such sum as the town shall annually vote therefor, which sum shall in no case be less than two dollars per day for every day of actual service.

SEC. 9. All laws and parts of laws inconsistent herewith, except private and special laws authorizing towns, cities, and incorporated districts to choose school committees other than those herein provided for, are hereby repealed.

SEC. 10. This act shall take effect on the first day of March, eighteen hundred and ninety-four.

PURPOSE OF THE LAW.

The purpose of this act is to secure equality of school privileges, equality of school burdens, efficiency of instruction, better schoolhouses better furnished, more responsible and efficient supervision, and greater economy in school expenditures. That it will secure these is more than hoped—is confidently expected; for its provisions are such as have proved efficient for securing them in other States, and in many towns in our own State.

1. *Equality of school privileges.*—The district system here abolished was framed to suit conditions existing a century ago. Those conditions were such that most towns could be divided into very nearly equal sections containing very nearly the same number of children, and a number large enough to make efficient and profitable schools. Hence the amounts available for schools in each of these sections, determined by apportioning money to each in proportion to the number of children, were such as to give all very nearly equal length of schools of very nearly equal quality. These conditions no longer exist. To-day there are few towns in the State in which by voluntary action the district system has not been abolished, whose schools are all of equal or nearly equal length and quality. In most of such towns there is a wide disparity in this regard, so wide that in numerous cases the difference in different districts is as three to one. For this inequity and iniquity the act provides the only practicable and efficient remedy by the abolition of the system which compels its existence, and by the special requirement that all schools in the same town shall be of equal length.

2. *Equality of school burdens.*—Under the district system the burden of building schoolhouses and keeping them in repair rests upon the district. By a change in the distribution of wealth similar to that which has taken place in the distribution of population, this burden has come to be very unequally borne. The wealthier districts have been able to furnish suitable schoolhouses, well furnished, at a comparatively small tax rate, while the poorer have been heavily burdened to furnish houses poor and poorly furnished. The new law, in conjunction with others heretofore enacted, transfers the responsibility for the building, furnishing, and keeping in repair of schoolhouses to the town as a whole, and hence equalizes the burden.

3. *Better schoolhouses.*—This change of responsibility for fit schoolhouses, from the part to the whole of the town, with consequent equalization and lightening of burden, results naturally in better schoolhouses. Indeed, in most towns in which the change has been made by voluntary action of the town, this improvement in schoolhouses has been very noticeable.

4. *More efficient instruction.*—Instruction to be at its best requires suitable and fitly furnished schoolrooms, schools large enough to be interesting, teachers fitted for their work, adapted to the special school, and continued permanently in charge, and responsible, intelligent, vigilant, and, hence, efficient supervision. Under the town system, as it exists now by voluntary action of a large number of our towns, all these essentials exist in much greater degree than under the district system. What have been the results of change from district to town system under optional law may confidently be expected to be the results under the new law.

5. *More efficient supervision.*—Under the town system, supervision becomes at once wholly responsible. The division of functions between town school committee or supervisor and district agent, in such manner as to render neither party responsible, ceases to exist. The entire charge of school affairs devolves upon the committee. With complete responsibility naturally comes greater care and watchfulness. Moreover, the new law provides for such an organization of the supervisory machinery as has, by experience, been proved most efficient, including as

it does the most desirable features of the two forms heretofore existing in the State—the supervisor and the school board.

6. *Greater economy in school expenditures.*—Under the district system, as it has come to be, there have been large wastes of public money. These wastes may be classified under three heads. First, the employing of incompetent teachers, sometimes as the result of favoritism, sometimes from want of care or intelligence on the part of agents employing, has practically wasted not only the money paid for wages of teachers and warming of schoolrooms, but also the time of pupils attending the schools. Second, the maintenance of unnecessary small and weak schools has led to large waste. In this way has been annually wasted, as could be easily shown by dependable data, money enough to increase the annual length of the necessary schools by nearly two weeks. Third, the almost universal custom of using at least 10 per cent of the money raised by towns and apportioned to towns from the State for the support of schools, allowed by law to be used for annual repairs on schoolhouses, has wasted another sum about equal to that wasted on unnecessary schools.

These wastes will be largely or wholly stopped under the operation of the new law. Favoritism and carelessness, leading to the employment of incompetent teachers, will be reduced to their lowest terms under the responsible supervision for which it provides. Unnecessary schools will be gradually abolished under its provisions, as it comes to be understood that the abolition of every such school inures to the benefit of every other school in the town; and with the provision of law allowing the use of school money for repairs repealed, as it is by the provisions of the new law, the waste in this direction must entirely cease.

7. *More and better schooling for the money.*—From the greater economy in expenditure of school money in the directions just outlined and in other directions the average length and the quality of schools may be confidently expected to increase very materially under the new system.

PROVISIONS OF THE LAW.

By the first section, all school districts, except the few having special charters from the legislature, are abolished. So far as the management of schools is concerned, their existence terminates. They can hold no meetings and elect no officers having anything in anyway to do with the schools. Such of them, however, as are in debt for school buildings, or have rights in property held in trust by virtue of gifts, devises, or bequests for their benefit, still hold their corporate powers, by provision of section 4, so far as may be necessary for the meeting of their liabilities and the enforcing of their rights.

By the provisions of section 2 all school property held by districts, except property held in trust by virtue of gifts, devises, or bequests for their benefit, passes into possession of the town and into custody of the town's school committee. Such property the town is to pay for at such appraisal as the assessors may place upon it, and by the method prescribed in the section, which is such as to equalize the property interest of all property owners in all the school property so passing into the town's possession. By this process the town does not assume liability for any debts which districts may owe for their schoolhouses, and pay the district for the appraised value of its school property less such debt, but pays the full appraised value, leaving the district still holden for such debt, as provided in section 4.

Section 3 provides that all schools having legal existence when the law takes effect shall continue to exist and be supported till abolished by vote of the town on recommendation of the school committee. There is such legally existing school in every legally existing school district, even when the operation of such school has been suspended by action of the municipal officers and school committee under provisions of law heretofore in force. Hence, during the coming school year, after the going into effect of this law, schools must be supported in every locality in the town in which they have heretofore been supported, unless the town shall by vote abolish any such schools; or unless the school committee to be elected at this year's annual meeting shall suspend the operation of some such school or schools, providing for the instruction of those who would attend in other schools, as they are by this section authorized to do. It will be seen by examination of this section, therefore, that the law does not of itself change the location of or abolish any school, as many have mistakenly assumed. It leaves the authority so to do in the town, where it has always resided, and throws around that authority proper safeguards against its possible abuse.

Section 5 makes it certain that all of the schools of any town shall be equal in annual length, and that no town can give less than five months' annual schooling

to every child of school age who will attend school by affixing a penalty for failure which is easily and readily inflicted.

Section 6 provides for the continuance of schools in what have been heretofore union districts composed of parts of two or more towns, and for the establishing of such union schools.

Section 8 makes radical change in the supervision of the schools. None of the features of the method prescribed, however, are without the sanction of proved and successful experience either in our own State or in others. It puts the general oversight and management of all school affairs in charge of a permanent school board, and the special oversight and management in the charge of a supervisor or superintendent, who is to be practically the executive officer of such board, performing all save certain specially prescribed duties under the board's authority and direction. The practical outcome of the plan provided for should and probably will be, in most towns, a committee or board of five or seven members chosen from different sections of the town. As this board is necessarily to exercise only a general oversight of school affairs it need not be made up of school men or liberally educated men wholly. The ideal board of five would be made up of an intelligent farmer, a sensible mechanic, a good business man, and two teachers or ex-teachers. As its members are to serve without pay, it will necessarily be made up of those not seeking the position for what can be gotten out of it, but accepting it because of deep interest in the well-being of the schools. So constituted and so serving it will be more independent in action.

The first duty of this board will be to meet as early as practicable, elect a supervisor or superintendent, and determine what duties he shall perform outside of those specifically fixed by the law. He may, and probably will, be authorized and directed to employ teachers under limitations fixed by the board, and to examine and certificate them; to purchase fuel and supplies for the schools; to take charge of the furnishing of books; to look after repairs to be made upon schoolhouses, and to direct truant officers in the performance of their duties. Judicial functions, like the discharging of incompetent teachers and the expelling of obstinately disobedient pupils, can hardly be properly devolved upon him. At this meeting, too, action may be taken suspending schools as authorized in section 3. These matters being attended to the board may adjourn, subject to call in special session by the supervisor, who is its secretary, till some date before the opening of the fall terms, when another meeting would be desirable. Finally, a meeting will probably be had in the winter, before the annual town meeting, to determine what recommendations they will submit to the town regarding abolition or change in location of schools, appropriations for erection of new buildings and repair of old ones, and similar matters. It will be seen, therefore, that while the actual work and time required of the school committee is only such as any citizen deeply interested in the schools of his town may cheerfully give, it is nevertheless important work, in that it will call for the exercise of discretion and sound common sense. It forms an important part in a system of supervision which shall be intelligent, responsible, vigilant, and efficient.

The provision in this section by which the school board, when authorized by vote of the town, may choose, instead of one of their own number as supervisor, one not of their number as superintendent, is worthy of special attention. It is intended primarily for the benefit of cities and larger towns, which are able and may desire to put the direct supervision of their schools under the charge of an efficient and trained educator. To enable them to do this has hitherto required special acts of the legislature. Under this provision, also, two or more towns may, by a mutual understanding, and by cooperation of their school committees, unite in procuring a skilled superintendent, as is done in Massachusetts and in one instance in Maine.

The amount to be paid the supervisor or superintendent for services is left for the town to determine, with the proviso that such amount must be at least $2 per day for every day of actual service.

CONCLUSION.

All good citizens will hold the well being of the schools paramount to all personal interests and prejudices. Such citizens, while perhaps honestly doubting the wisdom of some or all of the provisions of this new law, will yet, because it is the law, heartily aid in making it a success. Those who have favored its enactment have done so with the sole hope and desire to lift our schools to a higher level of efficiency. They firmly believe that it will do so. They invoke for it a fair and unprejudiced trial. If it shall fall short of their expectations after such

fair trial, if the schools under its operation shall not be an improvement upon those under the system which it displaces, they will not be among the last to urge its repeal.

MASSACHUSETTS.

[From the report of Hon. Frank A. Hill, secretary of the State board of education.]

FREE TEXT-BOOKS.

It is now ten years since the free text-book law went into full effect. The expenditure for the year 1893–94 was $581,684.57, against $588,760.38 for the ear 1883–84. In this first year under the law the cost for each child attending school was $2.08; the present year the cost per child is $1.77—an increase of 2 cents over that of the year 1892–93, and 13 cents above the average of ten years.

The supply of books and other means of teaching, especially the latter, under the operation of this law, is more abundant than when they were provided at the expense of individual parents. The law has relieved many families of what often proved a hardship. There has been no complaint of the law by taxpayers; it has been deemed to be consistent with the free-school system. The law has been operated generally with a wise economy. In some towns complaints have been made, and with reason, of the soiled and tattered condition of many of the books from too long use before they are condemned. I am inclined to think it wise to modify the free text-book law, as suggested in the last annual report of the secretary of this board, so that towns and cities, under such safeguards as they may devise, may permit books of a certain class or of a certain degree of wear to become the property of the pupils using them upon their leaving school. If discarded text-books should go to the home rather than to the paper mill or the furnace, they would be replaced earlier in their life, the schools would have cleaner books, and the homes of the people would not be without profit.

EXPENSE OF CONVEYING CHILDREN.

Table showing the amount expended for transporting children to school for the past six years.

Year.	Sum expended.	Year.	Sum expended.
1888–89	$22,118.38	1891–92	$38,726.07
1889–90	24,145.12	1892–93	50,590.41
1890–91	30,648.68	1893–94	63,617.68

In the year 1887 the attention of the secretary of the board was specially attracted to the large sums applied in certain towns for the transportation of children to school. Since that year returns of this item have been made annually to this office. The purpose of the law authorizing towns to expend money for conveyance was to enable children living remote from central schools, especially from schools "kept for the benefit of all the inhabitants of the towns," to gain ready access to these schools. The law was enacted in 1869. Montague, in Franklin County, early availed herself of its provisions for conveying children to her central high school. In general, towns were slow to take advantage of the law as a means of consolidating their feebler lower-grade schools. Concord was among the first to apply it on a large scale for this purpose. Her example was speedily followed by her neighbors. The success of the plan wherever applied has secured for it an extended application. The expenditure, beginning with $22,118.38 in the year 1888–89, has advanced to $63,617.68 the present year. This is an advance of $13,027.27 from the expenditure of $50,590.41 a year ago. The results are in general highly satisfactory to parents and to voters of the towns. Of these towns, 199 make returns of expenditures for transportation, varying from $5 per annum in Shutesbury, to $2,366 per annum in Lexington. Wisdom is needed in adjusting the details of the plan to individual cases. But this has been exercised to such a degree, and the law is so beneficial, that in operation it meets with almost universal favor. It is helping to solve the question, What can be done for the small ungraded schools scattered over the sparsely populated portions of the State? These schools are steadily disappearing under the operation of this law.

CONSOLIDATION AND TRANSPORTATION.

[The following regarding the consolidation of schools and transportation of pupils is from the report of A. W. Edson, agent of the State board.]

There is a decided tendency on the part of intelligent and progressive communities to close the small schools in remote districts and to transport children to the graded schools of the villages, where better classification, better grading, and better teaching are the rule. This is done not so much from an economic standpoint as because of the firm conviction that the children receive greater educational advantages there than in the small ungraded schools.

The number of children in the back districts is small, and growing less every year. With few children and small classes there can be but little enthusiasm and progress.

The leading arguments in favor of this movement are:

1. It permits a better grading of the schools and classification of pupils. Consolidation allows pupils to be placed where they can work to the best advantage; the various subjects of study to be wisely selected and correlated, and more time to be given to recitation.

2. It affords an opportunity for thorough work in special branches, such as drawing, music, and nature study. It also allows an enrichment in other lines.

3. It opens the doors to more weeks of schooling and to schools of a higher grade. The people in villages almost invariably lengthen the school year and support a high school for advanced pupils.

4. It insures the employment and retention of better teachers. Teachers in small ungraded schools are usually of limited education, training, or experience, or are past the age of competition. The salaries paid in cities and villages allow a wide range in the selection of teachers.

5. It makes the work of the specialist and supervisor far more effective. Their plans and efforts can all be concentrated into something tangible.

6. It adds the stimulating influences of large classes, with the resulting enthusiasm and generous rivalry. The discipline and training obtained are invaluable.

7. It affords the broader companionship and culture that come from association with large numbers.

8. It results in a better attendance of pupils, as proved by experience in towns where the plan has been thoroughly tried.

9. It leads to better school buildings, better equipment, a larger supply of books, charts, maps, and apparatus. All these naturally follow a concentration of people, wealth, and effort, and aid in making good schools.

The large expenditure implied in these better appointments is wise economy, for the cost per pupil is really much less than the cost in small and widely separated schools.

10. And, again, it quickens public interest in the schools. Pride in the quality of the work done secures a greater sympathy and better fellowship throughout the town.

These reasons for consolidating schools and concentrating effort have great force with people interested in the proper education of the coming generation. The future is likely to see increased attention given to this movement.

There are, however, ojections raised to the plan, some of them frivolous, others deserving careful attention, chief among which are—

(1) Depreciation of property; decreased valuation of farms in districts where schools are closed.

(2) Dislike to send young children to school far from home, away from the oversight of parents, and to provide a cold lunch for them rather than a warm dinner.

(3) Danger to health and morals; children obliged to travel too far in cold and stormy weather; obliged to walk a portion of the way to meet the team, and then to ride to school in damp clothing and with wet feet; unsuitable conveyance and uncertain driver; association with so many children of all classes and conditions; lack of proper oversight during the noon hour.

(4) Insufficient and unsuitable clothing; expense to parents of properly clothing their children.

(5) Difficulty of securing a proper conveyance on reasonable terms; or, if the parent is allowed compensation, of agreeing upon terms satisfactory to both parties, parents and town officials.

(6) Local jealousy; an acknowledgment that some other section of the town has greater advantages and is outstripping any other locality.

(7) Natural proneness of some people to object to the removal of any ancient landmark or to any innovation, however worthy the measure or however well received elsewhere.

To these objections it may properly be said:

The first one is more imaginary than real, for any level-headed man with children to be educated will place a higher value on the quality of the schools and the school spirit in the community than upon the number and accessibility of the schools. Experience has demonstrated the fact that property in towns committed to this plan has appreciated rather than depreciated in value.

The second and third objections are the most serious. It behooves school authorities to see that the danger is reduced to a minimum. Suitable conveyances, covered, should be provided, and competent and careful drivers selected. No risks should be taken. During the noon hour some teacher should remain with the children who carry luncheon.

The fourth, fifth, and sixth objections have no great weight. The last one has great influence with those people who choose to live, move, and die as did their ancestors—on the theory that this is the last generation, and that any special efforts at improvement are just so much more than is wise or necessary.

NEW NORMAL SCHOOLS.

The legislature of 1894, by "An act to establish additional State normal schools," approved June 6, directed this board to establish a State normal school in each of the following places: North Adams, Fitchburg, and Lowell, and in such town in Barnstable County as the board might select. * * *

Building sites have been selected and purchased for North Adams, Fitchburg, and Lowell; a building site in Hyannis is now under consideration, and will receive early action. Building committees have been appointed for each school, and preliminary steps are under consideration for the erection of the school buildings during the coming year.

There are now five regular normal schools, not including the Normal Art School, in operation in the Commonwealth, which afford altogether accommodations for a little less than one thousand pupils. The whole number graduated in any one year seldom exceeds 250, while probably six times that number of teachers retire from the schools yearly, whose places the present normal schools can not, of course, fill.

Only 36 per cent of the teachers in the public schools have ever attended a normal school, and only 30 per cent have graduated therefrom. Ever since the establishment of normal schools in Massachusetts (and the first one on the continent was organized in this State), it has been the uniform testimony of their principals, past and present, that the demand for their graduates, as teachers, has far exceeded the supply. During the public hearing given by this board, one year since, to the petitioners for more normal schools, the most noticeable feature of the occasion was the earnest desire, repeatedly expressed by the petitioners, for more trained teachers for their schools. When the four new normal schools are opened the Commonwealth will have an equipment for meeting the demand for teachers specially trained for their work in larger measure than has been possible in the past.

THE TRAINING OF TEACHERS.

Good work in the schools presupposes good teachers. The best of conditions in the way of attractive and healthful rooms, suitable equipment, well-developed courses of study, and popular support may be neutralized by inefficiency in the teacher, while the worst of conditions may be ameliorated by the competency and devotion he brings to his work. The main endeavor for improving the schools must always, therefore, be made in the direction of improving the teaching force. During the past two years new and important steps have been taken by the legislature and the board of education to lift the standards of professional training. Chief among them are the following:

1. The board of education voted, April 7, 1893, that candidates for admission to the normal schools in September, 1894, and thereafter, should be graduates of high schools whose courses of study have been approved by the board, or have an equivalent education. For the current year (1894) it was ordered that the principals of the normal schools should be authorized to admit to examination for admission graduates of high schools whose course of study covers three or more years

2. It was voted by the board, on May 3, 1894, that the examinations for admission to the normal schools in 1895 and thereafter should cover high-school subjects as well as elementary.

3. The legislature of 1894 made it the duty of the board of education to prepare a plan for the State examination and certification of teachers, the plan to be permissive and not compulsory.[1] Under this plan the certificate of the board may be accepted by any school committee in lieu of the personal examination required by law. * * *

LOCAL TRAINING SCHOOLS FOR TEACHERS.

Several towns and cities of the State have established training or practice schools, to which untried persons are admitted as teachers under varying conditions, either with small pay or with none at all. If such candidates do satisfactory work, they may in time be promoted to the regular teaching force. If they fail, their services usually end with experience in the training school, and the community is spared the loss that it might otherwise have suffered. The training school itself is usually under regular and permanent teachers, selected with special reference to their real or supposed power to guide the neophytes and to keep the tone of the school good. Such schools, in general, have done and are now doing good work on the practical side, and some of them have made earnest attempts, necessarily meager, to require pedagogical study. They have also done great general service to the cause of education, in emphasizing the necessity of practice work for the young teacher, as well as great local service in opening a way to distinguish between those who are fitted and those who are unfitted to teach; but they fall seriously short of giving a complete professional outfit. It is the consensus of our deepest thinkers, as well as of the world's practice, that that outfit presupposes, in addition to certain native endowments, (1) high academic attainments, (2) good theoretical acquaintance with the principles of education, and (3) successful experience in actual practice.

The New England Association of Superintendents is on record as favoring such an outfit. The policy of the State, as expressed in legislative action and in that of the board of education, is clearly in favor of such an outfit. This policy is in its permissive or voluntary stage, indeed, but its definition is so sharp that no one can fail to apprehend it.

It is the duty of our towns and cities to place themselves in line with that policy in the management of their many schools. The almost lavish provision for new normal schools and the new and higher standards of admission make it specially imperative to discourage all policies that tend to defeat the integrity and completeness of the professional outfit as outlined above. If high standards are not required for admission to these training schools, if they serve as short cuts to teachers' positions—cuts that dispense largely with that kind of training which the normal schools are specially fitted to give—then the towns that support these training schools and the State are working at cross purposes, and not in the mutually helpful spirit that best advances the interests of our schools. It can not be too strenuously urged that we want teachers for the schools and not schools for the teachers; that the interests of the children in the schools are the transcendent ones, and not the interests of those who want to teach them; that, therefore, the whole subject of providing teachers should be viewed primarily from the needs of the school, and not from the needs, however pressing, of candidates for positions in them.

All this leads up to the conclusion that the normal school diploma or some satisfactory equivalent, if there is any, should be insisted on as a prerequisite for admission to a local training school. This is the clear, ringing utterance of the New England superintendents; this is the practice, for instance, in the city of Cambridge; and this policy would raise the tone of every training school in the State, and, therefore, in time, of the teaching in the community that supports it. The idea of the training school is admirable; the State is committed, and wisely, to the policy of having model and practice schools in connection with each of its normal schools. The additional practice to be obtained in a local training school should be viewed as an additional provision for insuring the selection of good teachers. But let the local training school work with, and not against, the declared policy of the experts and of the State.

As an illustration, to show the untoward effect of the local training school on

[1] Such a plan was prepared by Secretary Hill and adopted by the State board December, 1894.

normal school attendance, I cite the following figures from the records of the Salem Normal School:

	Pupils admitted.		De-crease.
	1884–1888.	1889–1893.	
Lynn	69	38	31
Lowell	40	7	33
Gloucester	39	17	22
Cambridge	21	22	*1
Total	169	84	85

*Increase.

All these cities have training schools; in only one of them is graduation from a normal school or other equivalent experience required as a condition for entrance, and that city is Cambridge. In all these cities except Cambridge there has been a serious falling off in the patronage of the normal school; for which only one explanation is possible, and that is what may be called the "short circuiting" of a desirable professional preparation.

School boards are earnestly requested to give this subject their serious attention, not only to the end that their own schools may be helped, but also to the end that the local policy may contribute to the strengthening of the general policy.

WHAT IS A HIGH SCHOOL?

The action of the legislature of 1894 in making it compulsory for the nonhigh-school towns to pay the tuition of their properly qualified children in such high schools of adjoining towns as will receive them has raised some interesting questions. The law practically places the best and strongest high schools of the State, if such schools assent, as they generally do, at the service of the nonhigh-school towns. This means that any properly qualified child from a nonhigh-school town may select a high school in which he may fit for the normal school, for the high scientific school, or for college, as he may elect.

Thus a high-school standard is practically set for our smallest and weakest towns, and that standard is, in any particular case, the standard of the outside high school where the tuition is paid. Such a standard may, in some instances, be as high as the highest in the State. Should nonhigh-school towns, therefore, desire to set up high schools of their own, they would seem to be under a moral obligation, at least, to do as well by their high-school children as when they are called upon to pay their tuition outside. Certainly the establishment of small, poorly equipped, and inadequately taught high schools is to be deprecated, not only (1) because the results in such a school are likely to be inadequate, but also (2) because such schools, if they are real high schools, are likely, in spite of all their deficiencies and economies, to be a greater burden to the towns than the payment of tuition outside.

The school conditions of Massachusetts are now such that a town ought either to support a good high school or to have none at all. The choice between an inferior high school at home that is not required by law and a good one abroad that is accessible through tuition should be instantly made, and that, too, in favor of the latter.

The statutes recognize two grades of high schools. These grades are distinguished by the subjects they are required by law to teach. There are certain subjects which must be taught in every high school, while in towns of 4,000 inhabitants or more the high school must be able to teach specified additional branches. The distinction between these two grades of schools may be approximately expressed by saying that high schools of the higher grade, whatever else they may provide for, must be competent to prepare pupils for college in accordance with existing standards, while high schools of the lower grade may stop considerably short of such preparation, or have courses of study that ignore the colleges altogether. Of the 255 high schools in 234 towns of the State, only 102 are required to be high schools of the higher grade. The fact that 146 high schools maintain, in addition to their popular courses, college preparatory courses, shows that many towns not required by law to maintain schools of the higher grade nevertheless do so.

There are 198 high schools that maintain nonpreparatory courses of study four years long. In 146 of these schools these courses run parallel with the preparatory curricula; in the remaining 52 schools the nonpreparatory courses are the only

long ones. The great majority of high school pupils are pursuing these general courses, but when they graduate, and a late desire to enter college is kindled, they discover that from one to two years' additional work must be done before they can enter satisfactorily.

It is not contended here that the main object of a high school is to fit its pupils for college. The great majority of its pupils have not the remotest thought of going higher. It is only claimed that there ought to be no course whatever in a high school that is not a good course in itself—good without reference to college, and good enough to close one's public school career with it. I can not conceive of such a course, however—that is, if the course is suitable for the high school graduate who is going out at once into his life work—without thinking of it as an eminently proper one for the college to recognize side by side with the old Hellenic routes.

The cause of the deplorable break between the popular high school course and the college is easily pointed out. The college course in a high school is practically shaped by the colleges; the popular course is practically shaped by the people. The college course does not meet the wants and needs of the masses; the popular course has not hitherto commended itself to the colleges. The former has too often received the lion's share of attention; the latter has, in consequence, too often been slighted. Methods of teaching the classics and mathematics—the staple subjects of the one—have been perfected through long experience; not so with the methods of teaching English, history, and the sciences—important subjects of the other—although in our best high schools excellent progress is making. Teaching in the college course is subjected to searching and stimulating tests from above; teaching in the popular course seldom feels the thrill of such stimulus.

And so there has been in the past a widespread feeling, with something to justify it, that the popular course makes lighter demands upon pupils than that which prepares for college, that it is less earnestly and effectively taught, and that, on the whole, in spite of the large numbers who take it, it belongs to an inferior educational caste. This feeling has not tended to close the break between the popular course and the college, or to reduce the difficulty of giving instruction to noncollege pupils in such quantity and with such thoroughness as they are clearly entitled to receive.

There is, however, an important modification of views going on about the relations that should exist between the high schools and the colleges. The anomaly as well as the absurdity of the break between them is obvious. It is settled, too, that the entire high school system ought not to be warped into conformity with conventional college demands that, in spite of their changes for the better, are still too classical and antique for the majority of high school pupils. The trend of educational thought to-day, as may be seen in the now famous Report of the Committee of Ten, is towards a distinct and generous recognition of the more popular courses in our high schools as suitable for college purposes, provided only they are pursued with greater seriousness and thoroughness. This closer articulation all along the upper line between the high schools and institutions above them is earnestly to be desired. It would hasten this union if the colleges would generally follow the example of Williams and Tufts in offering a course in Greek for beginners, and of Harvard, Williams, and Tufts in abandoning their insistence on Greek as a prerequisite to granting the degree of A. B. This union once effected, it would become possible for struggling high schools to do away with their expensive Greek courses and to tone up the teaching in their hitherto nonpreparatory courses. All this would be to the advantage not only of the colleges and the high schools in their closer relation, but also of the thousands of high school graduates who will never enter college.

When a good general course of four years, adapted to popular demands, is also accepted as a satisfactory preparatory course by the colleges, it will then be feasible to give a good minimum definition of the statutory high school that will not only embody the spirit of the laws but also provide for the needs and aspirations of the people. This definition, as inferred from old and recent legislation, from the character of the high schools in existence, and from any fair interpretation of their purpose, will include such elements as the following:

1. Primarily, a provision for a good liberal training in recognized secondary subjects and by approved methods for those pupils who end their schooling with the high school.

2. The preparation of pupils for the normal schools. This will be adequately provided for if the provision mentioned under number 1 is made.

3. The preparation of pupils for high technical schools, such as the Massachusetts Institute of Technology, the Lawrence Scientific School, the Worcester Polytechnic Institute, the Massachusetts Agricultural College, and others. This, too,

will be adequately provided for if the provision mentioned under number 1 is made.

4. The preparation of pupils for college. This will become generally feasible if the colleges finally accept, as now seems probable, a good general four years' course as a suitable preparatory course.

5. At least one course of study that is four years long. For the current year the graduate from a three years' course in a high school will be permitted by the board of education to take the entrance examinations of the normal schools. But this is a reluctant concession to certain high-school conditions that now exist, and not an expression of opinion that a three years' course is an adequate one. On the contrary, a course of not less than four years, as is provided in four-fifths of our high schools, is earnestly advised for every candidate.

6. An adequate teaching force and an adequate equipment for the accomplishment of the foregoing aims.

Even under present conditions, no high school should be regarded as worthy of the name, no community should tolerate such a high school, that does not meet at least the first two requirements. Four-fifths of our high schools, if we judge from their courses of study, need only the strengthening that comes from a competent teaching force to meet the first five requirements.

Unless a nonhigh-school town sees its way to meet substantially the foregoing requirements, it had better send its pupils to towns that are able to meet them.

Schools like the following ought not to be treated as high schools in any sense that is likely to defeat the securing of a good high-school education by any properly qualified child:

1. A grammar school in which a few high-school subjects are taught.

2. A so-called high school that in its first year or in its first two years is strictly a grammar school.

3. A so-called high school in which, as in an ungraded school, the pupils select such studies as they please, without following a carefully thought-out plan.

4. And, in general, any high school that falls seriously short of fulfilling the mission of a high school as already defined.

The establishment of schools ranking above the grammar school but falling below the true high school is commendable so far as it indicates a desire to give children higher opportunities, however incomplete they may be. Out of such schools high schools of satisfactory grade may sometimes issue. The objection to starting such schools lies, as has already been intimated, not so much in the schools themselves as in the fear and the prospect that they may contribute to the defeat of what is now the legal right of every properly qualified child in every nonhigh-school town—the free right to as good a high school education as he can secure outside.

VALUE OF THE HIGH SCHOOL.

The value of a good high school to its pupils, to the community, to the schools below, and the schools above can not be easily overrated. It has been customary for people in their public utterances, even when they have been strong advocates of the most liberal high school policy, to speak of high schools as an inconsiderable part of our school system, since, as they say, but a small percentage of the school population (about 7 per cent) ever enter the high school. Presidents of colleges, members of school boards, editors of the public press—all these have unwittingly given more or less currency to this error. The fact is—at least in Massachusetts—that it is not 7 per cent of the school population that enter the high school, but, on an average, 25 to 30 per cent, and, in many of our old and typical New England communities, the percentage rises as high as 40, or even 50.

If in most of our communities the numbers of pupils in attendance in the 13 grades should be graphically presented in the form of a pyramid, the slope of that pyramid in the upper four years would vary far less than is commonly supposed from the slope in the lower nine years. Any inference to the contrary is drawn from a thoughtless misuse of a percentage that in itself is correct, namely, that small percentage (7.6 for 1894) which represents the ratio at any one time of the entire enrollment in the high schools of the State to the enrollment in all of the schools of the State.

Great as is the value of the high school to the State, even under present conditions, this value is only a part of what is promised when the high school, through the inevitable adjustments of the future, is placed, in all its serious courses, in harmonious connection with the normal schools, the scientific schools, the colleges, and other high institutions above it; and this greater value, it can not be too earnestly urged, will not be simply that nor chiefly that which accrues to those who

pass through the high-school gateway to these higher institutions, but it will be that which is destined to come through improvements in high-school work to the children of the people who do not go beyond the high school.

INSTRUCTION IN TEMPERANCE.

It is the misfortune sometimes of a noble movement to be indiscreetly pushed. Such advocacy leads to reaction, and the cause suffers. In this way temperance is sometimes wounded in the house of its friends. The very commonness, too, of its presentation tends to take off the edge of that presentation, to permit the introduction of an element of cant, and to make of that which should be vital and effective something mechanical and inoperative. Thus temperance, either in its narrower sense of abjuring that which intoxicates, or in its broader sense of high self-control and self-respect, loses something of caste where it should be one of the royal themes. It is a common experience for genuine believers in temperance and workers for temperance to have moods in which they prefer not to hear the subject discussed—at least if the discussion promises to follow certain stereotyped ways.

And yet the conviction is strong and deep, and among no class of people is it stronger and deeper than among teachers, that the young should be trained to temperance as well as to the other virtues. How shall it be done? The earlier laws say, "By moral measures." The later laws say, "By a scientific presentation of the effects of alcoholic drinks, stimulants, and narcotics." Both these classes of laws still stand; both methods are therefore obligatory, and it is the duty of school boards and of teachers to respect them. But when we inquire as to what precise methods shall be employed for the moral or scientific enforcement of temperance the laws are silent. It is safe to say that, whatever those methods may be, they should be in harmony with such pedagogical principles as command general acceptance. In teaching spelling, for instance, it is not regarded as a sound principle to put bad spelling before the children to correct. There is great danger that the wrong thing a child is cautioned against may make the deeper impression upon him and sway him more than the right thing. Of course, since the child goes frequently astray, it becomes the duty of the teacher to look sharply after his blunders, and in this way attention is necessarily focused for a time on departures from good standards. But this does not affect the main principle that, in the initiative of all instruction, the sound thing, the wholesome thing, the right thing, should be presented first; that the minds of children should be directed upward and not downward; that love of higher things is a stronger motive than fear of baser things—or if, unfortunately, not a stronger motive a better motive for first presentation; that, in short, the true way to keep bad things out of the mind is to put good things into the mind.

Applying this principle to instruction in temperance, it seems to be psychologically a bad method to make the woes of intemperance the main reliance in an endeavor to save people from them. The sad fact, indeed, remains that innocent children are frequently exposed to the repulsive pictures of intemperance, and that in certain cases effective lessons for good can be drawn from such experiences; but, as a general principle, there is more virtue in setting before children the joy of right living, with the scientific basis therefor, than the sorrow of wrong living. It is difficult to draw a satisfactory line between the two policies, but the principle is sufficiently conveyed if we say that, whatever attention it may be necessary to give the diseased, the criminal, and the awful in intemperance, these are pictures upon which the curtain, if raised at all, should be quickly let fall. The main policy should still be the higher one of filling the soul with good ideals and of inspiring the pupil, through the exercise of his will, to strive for their attainment.

Instruction in temperance should be scientific, it is true; but science for little children must be exceedingly simple—very much like the science involved in that nature study which is now growing in favor with so many of our schools.

It must not be overlooked that lessons have a deeper meaning and weight for children if they are given and enforced by teachers whom the children respect and love, so that we finally get back in temperance instruction, as in every other kind of instruction, to the living teacher as the most potent influence for good.

In the revised Course of Studies for Elementary Schools recently issued by the board of education some general principles are given for the guidance of the teacher in his temperance work, as follows:

ORAL.

Alcoholic drinks, stimulants, and narcotics.—Pupils should be taught (1) to know what is right in the use and care of the body, and why; (2) to know what is wrong in the use and care of the

body, particularly such wrong as may be near and threatening, and why; (3) to feel the obligation to do right in all that pertains to such use and care; and (4) steadily to choose the right, which is the main thing to be accomplished in studying hygiene. So far as the instruction relates to alcoholic drinks, stimulants, and narcotics, the great object is to develop and strengthen the purpose in children to do without them.

The necessary information about the evil effects of alcoholic drinks, stimulants, and narcotics may be obtained from such observations as the pupils have been led to make themselves from casual or unavoidable notice of such effects, and from judicious statements made by the teacher about such effects as can not be directly observed. Right choice in the pupil is determined somewhat by knowledge of what is right and what is wrong, somewhat by a desire to attain strong and upright manhood, somewhat by stories of noble and pure lives, and very largely by the consistent and winning example of those who are near to him, particularly by that of the high-toned and earnest teacher.

Stories which have a simple moral point well illustrated are adapted to the youngest children. Teach them how important it is to keep the body well and strong and sweet and beautiful, that the mind needs such a body, that we can not hope to be comfortable and happy ourselves or agreeable to others without it, and that personal care in forming good habits and avoiding bad ones has much to do with the health of the body and, therefore, with successful living. If children thoughtlessly incline to make merry over the weakness or folly or misfortunes of persons visibly under the influence of alcohol, try to lead them into a truer and more serious attitude toward such things. Do this discreetly, privately, if necessary, so as to avoid the possibility of wounding any whom the advice is designed to protect. Tact and loveableness in the teacher will do more at this tender age of the child to determine his attitude toward things objectionable than any persistent dwelling upon details of disease and horror that may arise from their use.

THIRD YEAR.

Teach that alcoholic liquors injure and weaken the muscles, so that one addicted to them can neither play nor work so well as he might without them; that they hurt the nerves, and so interfere with what is done by them; that they make the blood poorer, so that the body is not nourished so well; and so on. Cite kinds of business, duty, sport for which people with drinking habits will not be employed, with reasons for their exclusion. Impress the moral obligation that only those things should be taken into the system that make one strong and well.

FOURTH YEAR.

Give simple accounts of fermentation and distillation—enough to show that alcohol is not a natural product, but comes from changes in fruit juices after they have been pressed out, or in food substances after they have been mashed with water. Teach that alcohol, in whatever liquors found, is the same dangerous thing, variously threatening or harmful in its so-called moderate use, disastrous and even fatal in its excessive use, and in any form or degree of use unsafe and treacherous in its trend toward creating an uncontrollable desire for more.

Teach that tobacco contains a poisonous substance called nicotine; that it frequently injures the throat, lungs, heart, and other organs in adults; that it is far more harmful to young and growing persons than to adults; that it is particularly objectionable in the form of the cigarette; that children should avoid it in all its forms, and that the more sparingly grown people use it the better, as a rule, they are off.

FIFTH YEAR.

Review and elaborate the teachings of the preceding years. Teach what a stimulant is, what a narcotic is, and what each may cause. Teach that alcohol, even if at first it behaves as a stimulant, is really a narcotic; that, unlike healthful food, it promotes neither strength nor vigor; that athletes in training are forbidden its use; that much of it partly paralyzes the muscles, so that one "talks thick," can not control the movements of vision, is unsteady in hand and leg and unfitted for work, and that lack of confidence in one who drinks often debars him from holding responsible positions. Show that the natural appetite is a safer guide in eating than any artificially stimulated appetite, and that condiments, pungent and peppery substances, tea, coffee, and the like, should be sparingly used, if at all, by children, however safe their moderate use may be for adults. Enforce frequently the lesson of simplicity, naturalness, and purity of taste for young people who are still growing.

FURTHER INSTRUCTION.

Teach the evil effects of alcohol on the digestive system, particularly on the stomach, the gastric juice, and the liver; on the circulatory system, particularly on the blood, the blood vessels, and the heart; on the muscular system, as in preceding lessons; and on the nervous system, particularly on the brain, in warping the judgment, blunting the moral sense, reducing the will power, and releasing such foolish, bad, or savage impulses as are usually kept in check by habits of sobriety. Teach some of the effects of tobacco upon the same systems. Show how alcohol and tobacco may affect the health, acuteness, and precision of the special organs of sense. Consider with the children why the Commonwealth of Massachusetts should make "special instruction as to the effect of alcoholic drinks, stimulants, and narcotics on the human system" mandatory in her schools.

Avoid details and technicalities, particularly with the younger pupils. Deal only with the more serious consequences—just enough to attain the purpose of mentioning them at all. Keep constantly and conspicuously in the foreground the ideal of a strong, wholesome, and unabused body as best fitting one for successful and happy living.

Special delicacy of treatment is needed in those unfortunate cases in which children find themselves between the safe teaching of the school and the counter practices and influences of the home. Refrain from assertions of what is uncertain or sincerely doubted by high authority or likely to be repudiated by the pupil when he is mature enough to judge for himself, since the admitted and unquestioned facts about the more dangerous stimulants and narcotics, and alcoholic drinks in particular, furnish invincible reasons why people in general should do without them, and young people above all others.

MANUAL TRAINING.

In accordance with an act passed by the last legislature, every city of 20,000 inhabitants or more is required to teach manual training as a part of its high-school system, the act to take effect after September 1, 1895, and the course of instruction to be subject to the approval of the State board of education.

When all these cities conform to the law, manual training will be brought within reach of more than half the population of the State (1,249,298 out of 2,238,943).

It is much more difficult to establish and organize a high manual-training school than an ordinary high school. Practically but little more than a year was allowed the cities by the legislature in which to obey its mandate—rather scant time under other than the most favorable conditions.

A high manual-training school has come to be a sharply defined institution. The definition of such a school, as inferred from the courses of study generally pursued in the high manual-training schools of the country, contains the following elements:

1. A course of study from three to four years in length, with a marked trend toward that of the greater length.
2. Free-hand and mechanical drawing throughout the course, one hour daily.
3. Shop exercises, two hours daily.
4. Academic work, three hours daily, two or more of them devoted to recitations.
5. The use of power.
6. Woodworking, including the study of tools, materials, and the elementary processes of carpentry, joinery, wood turning, pattern making, and, if advisable, carving.
7. Ironworking, including forging, chipping, and filing, and the elementary processes of machine work.
8. A session six hours long or longer, with a suitable allowance for recess and lunch.
9. A correlation of the academic work, so far as feasible, with that of the drawing-room and the shops.

It is not possible, of course, to attain this standard at once; but a standard like the foregoing, modified by local conditions and improved as experience suggests should be kept steadily in view if a city would do as well by its pupils as other cities with fully established manual-training schools have done.

Whatever plan, in view of proper economies, may be deemed advisable in the initial stages of organizing such a school, or in the smaller cities, it is more satisfactory in the long run, at least for the larger places, to give the school a full plant of its own and a separate management.

MINNESOTA.

[From the report for 1893–94 of State Supt. W. W. Pendergast.]

SCHOOL LIBRARIES.

Nowhere in the Union have better provisions been made for public school libraries than in Minnesota. Some other States have appropriated more money, but none have thrown wiser safeguards around its expenditure. There is little doubt that the amount distributed among the districts that have availed themselves of the advantages offered by the library law has been productive of more real good than any equal sum appropriated by the State for the benefit of the common schools.

The library commission consists of the presidents of the four normal schools and the superintendent of public instruction, and though working without pay, their duties have been faithfully and conscientiously discharged. Every book in the catalogue from which districts can make their selections has been carefully examined and has received the unanimous approval of the commission. Libraries are now formed in 1,728 districts, scattered over every portion of the State. From every quarter the most encouraging reports have been received. To the most distant frontier settlements these books have gone like angels of mercy, elevating and refining both teacher and pupil. The parents and older brothers and sisters, too, have reaped a share of the benefit. Old and young alike have had their thoughts turned into new channels, and a brighter life is dawning on them in consequence, These libraries have not only met the "long-felt want" of those who had already learned to appreciate books and were pining for something to read, but they have stimulated a taste for good reading among the young people to whom a spare hour meant an opportunity to do or learn something harmful. Send one of this class home with Tom Brown or Kingsley's Water Babies under his arm, and for the rest of the week his anxious mother will have no occasion to inquire "Where is my boy to-night?"

In most States little has been done in the way of providing libraries for the country districts, and wherever they do exist the shelves, as a rule, are filled with sentimental rubbish, which has received the indorsement of the teacher and the board for the reason that it was recommended by some callow youth or romantic girl, or because it was offered for sale at the village bookstore. Sometimes, it is true, a board of "grave and reverend seigniors" will insist upon having only the best books placed before the young folks, and as a result we see through the seldom-opened glass doors of the bookcase such titles as Baxter's Saint's Rest, D'Aubigne's History of the Reformation and Rollin's Ancient History. In the latter case the money was simply wasted; in the former, worse than wasted. By the Minnesota plan none but the best, and, at the same time, the most readable and attractive, can get placed upon the list from which the districts may make choice. From the entire catalogue of about 1,350 volumes this department has selected 150 of the most desirable for ungraded schools and had the list printed on the cover of the teachers' register, where it will be always accessible and where it will naturally be consulted in ordering, thus making sure not only of the best but also of the most appropriate books.

The districts, before purchasing books, are required to provide a proper case and make all necessary provisions for their care and preservation. So far as I have been able to ascertain, the libraries have generally been well cared for, and their number is increasing every year.

FREE TEXT-BOOKS.

The law of 1893, providing for free text-books, has already borne excellent fruit. At the present time nearly half the districts are loaning text-books free of charge and a third of the remaining ones are furnishing them at cost. The latter plan, however, is not satisfactory, and the remaining step will, in most cases, soon be taken. The influence of the more progressive districts is being felt by the conservative ones, and the prospect now is that the old plan of compelling each pupil to buy his own books will, in a few years more, be practically at an end. As nearly as can be ascertained the first cost of the books averages about a dollar per pupil. This outlay carries the district through one year. After that the annual expense will be about 30 cents. This reduction in the cost of books is but one in the list of advantages to be gained. Organization can be completed the first day of the session, lessons assigned and all the classes put in good working order. Pupils are supplied at once with everything needed; they know what to do; they have the means to do it, and there is no excuse for delay. In districts working under the old plan, whole weeks, and sometimes the whole term, passes away before a large percentage of the pupils are prepared to do the work which would render their presence of any value to themselves or the school. During these weeks of waiting they become restless, inattentive, and often mischievous and unmanageable. They contract indolent and vicious habits, from which they seldom fully recover. Besides, their example is contagious, and the usefulness of the school is materially impaired. Parents frequently cut the Gordian knot by keeping their children out of school altogether. This is true to an extent not even suspected, except by those who have given the matter serious consideration. It is now a common remark among county superintendents that there has been a great improvement in attendance wherever the free text-book system has gone into operation.

The following table gives the aggregate number of scholars in the State, returned by the county superintendents in their annual reports as entitled to share in the apportionment of the current school fund for each year since the present law making an attendance of forty days the basis went into operation.

This table is introduced to show the effect of the free text-book law upon attendance:

Year.	Number of scholars.	Gain for the year.	Gain, per cent.	Total gain in four years without free text-books.	Total gain two years with free text-books.
1888	212,490				
1889	214,568	2,078	1		
1890	221,186	6,618	3		
1891	227,966	6,780	3		
1892	233,298	5,332	2⅓	20,808	
1893	244,794	11,496	5		
1894	275,258	30,464	12		41,960

It will be seen by inspection of the foregoing table that during the four years prior to the enactment of this law the average annual gain in the number of scholars receiving public money was 2¼ per cent, while in the two years that have elapsed since its passage the average gain has been 8½ per cent. This table would seem to indicate that since the last session of the legislature about 11,000 regular pupils have been added to our public schools by natural increase in population and 30,000 by the free text-books, unless some other cause, not apparent upon the surface, has been in operation to bring about such surprising and gratifying results.

OUR RURAL SCHOOLS.

Notwithstanding the many disadvantages inseparable from our country schools, it must still be admitted that these schools have some points of superiority over those of the cities. There is a certain freedom and individuality among the children that is inspiring. They are in touch with nature at every point. Their earliest and most valuable lessons may be received at first hand. With proper guidance on the part of the teacher, their minds may be turned into original channels of investigation as alluring as they may be made profitable. Objects of the greatest interest are all around them. With their innate love of flowers, what is more natural than a desire to learn more about these beautiful creations? They will take intense delight in trying to discover how they grow; why the blossoms have such bright colors; if bees are attracted by them; if the bees pay the flowers for the honey they abstract; how they pay; how the seeds are produced and fertilized; the use of the seeds, the sap, the bark; if the plants are really alive; if they breathe; how they breathe; whether they have their likes and dislikes; how they manifest them; why they turn toward the sun and light. They may be easily led to see that every part has its use, and that it is exactly adapted to the end for which it was designed. Turning to the animal kingdom, the more observing ones will be found to have noticed that rabbits and weasels put on a white coat in winter when the ground is covered with snow, and that they are brown like their surroundings in summer; that the turtle has a hard shell, the deer swift limbs, the crane long legs and bill; the fox, the mink, and the muskrat warm fur suits; that the cat family have velvet feet and sheathed claws, a rough tongue and peculiar eyes. Being acquainted with the facts they are more than willing to learn why they are facts. Watching the birds, they discover that often the male is more gaudily dressed than the female. In this case, which sits on the nest? Sometimes the females wear the showy jackets. When that is the case, do they guard the nest? Do the birds know that their eggs and little ones would be in danger from enemies that would be attracted by the bright colors? By directing the young minds along such lines of thought, encouraging them to find the answers for themselves, and giving a little assistance occasionally when necessary, by means of questions calculated to set them on the right track, a lively interest can always be awakened, and the boys and girls will readily form the habit of closely observing familiar things—the true basis of scientific knowledge. This is the first step toward a valuable education. They can then be easily taught to compare, to note resemblances, to detect differences—another great step in the same direction. Thinking out the reasons for the points of similarity, the causes of the differences, and drawing just conclusions, will place the young student far on the road toward the goal at which he is aiming. No matter what particular course he may intend to pursue, his loins are well girded, the proper sandals are on his feet, and progress will now be rapid. With such a preparation the work of the higher grades, so severe to those whose early training has been neglected or conducted without due reference to future needs, will be easily mastered. No lessons learned by rote will satisfy such a student, but the various subjects presented will be studied philosophically. Results will be traced to their causes, and then followed on to their legitimate outcome. It will not be enough for such scholars to be assured by teacher or text-book that certain things are true. They will undertake to find out how it is known that they are true and what were the causes that determined them. In digging out the answers to these and similar questions which well-trained scholars will ask themselves, the reasoning powers are still further unfolded, the judgment strengthened, the intellect developed, the brain quickened. When these boys leave school and go out to do battle in the great world, they will carry with them stouter hearts, since they have been used to struggling against obstacles and overcoming them; more sublime courage, from the fact that in all their encounters, no matter how formidable the foes, they have come off victorious; more resolute will, for that, too, has been trained and strengthened at every step of their course.

If the teacher is equal to the occasion and is permanently employed, much can be made of these advantages. But as it takes time to become acquainted with individual wants and capacities, the constant changes leave little room to hope for a high standard of education till some remedy is devised.

Again, in the ungraded country schools, the younger and less advanced pupils have the older and more proficient ones constantly before their eyes as models for their imitation. Many an easy-going pupil has got an idea of what he ought to do, in the reading class, for instance, by listening to the stirring words as they fall from the lips of that cultured girl who "understands and feels" what she is reading, and so impresses upon all who hear the burning thoughts of a Phillips, a Webster, or a Whittier. In geography he is charmed by the descriptions of other lands given by the true scholars in the higher classes. In history, too, the best recitations rivet his attention, and he wants to know more about the exploits of those ancient peoples who have been so pleasingly introduced by one who is studying history for a purpose, and knows not only how to study but how to tell what he has learned. But all these advantages are of no avail if the teacher be "a blind guide;" if he simply assigns lessons to be committed to memory, and asks only stereotyped questions to be answered perfunctorily in the words of the author. More attention, then, must be paid to the hiring of teachers. The weeding-out process must be begun and must continue till only those are left who understand what education really is, and how to make every blow struck count one toward its attainment. The best teachers must be held in the ranks and not driven to other employments. If this means higher wages—and there is no disguising the fact that it does—let them prevail. It will still be cheaper for the taxpayers and better for the schools, as one year under a good teacher is worth half a dozen under a poor one. We must have well-trained teachers of a high grade of scholarship for our country schools, or poor work will be the result of poorer economy. Our country schools comprise about two-thirds of all the pupils of the State. On account of their smaller size, to be equally as efficient as those in the village, they must be more expensive or the year must be shortened. As a matter of fact the year is shorter, the wages lower, equipments fewer. With so many untoward circumstances against which to contend, the teachers should be the very best. The trustees and parents should cooperate with them faithfully and cordially, remembering that to work together for the common good is much more pleasant and profitable than to sink into apathy or to spend the time in petty quarrels that destroy good fellowship, ruin the schools, and defraud the children of the education which is theirs of right and for which the State will hold the district responsible.

No system, be it ever so good, no government machinery, be it ever so perfect, can breathe the breath of life into a school which has died of neglect or been strangled by those to whose care it was intrusted. A live, enthusiastic teacher of good judgment, bright, magnetic, and full of tact, may succeed in interesting the people and bringing them into harmony with himself, with each other, and the school, so that surprisingly good results will follow. If, on the other hand, the teacher be out of tune with his environments; if he be cold, unsympathetic, or simply dead; if he be an eyeservant, taking no interest in the work assigned him, but only in drawing the monthly stipend for which his contract calls, and if possessed of a genius for nothing but blundering, failure must be expected. But this one will "keep the school" for less wages than the other, and in many places that consideration alone is sufficient to decide the matter. He is employed, and the successful one is driven into some occupation where his talents are better appreciated.

These schools demand the highest grade of talent in the teacher. His work is multifarious and exacting—more so than in the graded schools. His pay is small in comparison with the requirements. Those who are best qualified for such positions can not afford to take them. They are wanted in other places at better salaries. Unlike their city brothers, the rural teachers must manage to control and teach all the different grades. They have no superintendent to help them lay their plans. They are thrown entirely on their own resources. It calls for the versatility of a Cæsar to meet all the different demands made upon them. Besides, the attendance is irregular; the schools continue but half the year; salaries commensurate with the amount and kind of service required are seldom paid. These things are not alluring. The consequence is that teachers are constantly changing, and in the midst of all this chaos no permanent plan for the improvement of the schools is possible. Supervision by the county superintendent helps but little. Distances are great and districts numerous. The very thought of giving them all a proper supervision is overwhelming. Frequent visits are impossible.

THE STATE UNIVERSITY.

No department of our educational system has made greater progress during the past few years than the State University. Its growth in numbers, in the strength of its teaching force, in its hold upon the people of the State, and in the extent and thoroughness of the work accomplished is phenomenal. New and commodious buildings have been erected and fully occupied, additional instructors appointed, and courses of study readjusted and expanded. The attendance in the several professional departments has from the beginning been, to say the least, surprising, and

each year swells the roll beyond all precedent in other States. About 800 students are now receiving instruction in these departments, whereas only ten years ago all who desired to take a professional course were obliged to patronize some other State.

The increase in the number of students has been so rapid as to prove embarrassing, taxing the resources of the university to their utmost limit to meet the demands made upon it for the extra facilities required. Last year the gain in all departments was 246. This year the indications are that it will nearly if not quite reach 300, giving a total enrollment of 2,100, and placing it third in the list of State universities. If coming legislatures continue to furnish the necessary funds, there is scarcely room for doubt that the close of the present century will see but one university in the country furnishing instruction to a greater number of students, and it is not at all unlikely that ours will have the leading place. The influence it has had in infusing new life into the high schools of the State, as well as in raising the standard of education throughout our whole educational system, is everywhere apparent. Each school is stimulated to higher effort by the progress made by the next one in advance, which in turn is drawn forward by one that is doing still higher grade work. So, now that there is a complete articulation from the kindergarten all the way up through the intervening grades to the noble institution that stands at the head, it is easy to see that any forward movement inaugurated by the university will be participated in by the entire column. With proper leaders placed at the right intervals along the lines diverging from the university, and reaching out to every district in the State, all will keep step and advance together. All see something desirable ahead which they wish to reach. The school life of each child is thus lengthened, and more is accomplished during each year of that life. We must see to it that the courses of study are so arranged that wherever in the march any student may chance to fall from the line he will have the satisfaction of knowing that he has received the very training, or at least as good training, as if the curriculum had been planned for his especial benefit. The committee of ten, and all the conferences organized by them, unanimously say that every subject taught in the high schools "should be taught in the same way, and to the same extent, to every pupil, no matter what the probable destination of the pupil may be or at what point his education is to cease." The question discussed was presented in these words: "Should the subject be treated differently for pupils who are going to college, for those who are going to a scientific school, and for those who presumably are going to neither?" The answer was "No," and it was unanimous. If the committee were right—and such absolute unanimity among ninety-eight of the best educators of America ought to carry immense weight, if not perfect conviction—the question of courses of study for our high schools will be comparatively easy of solution. It will only be necessary to change one or two subjects now on the list for as many others deemed more important for those whose studies end with the high school, if indeed such other subjects can be found and agreed upon.

MISSOURI.

[From the Report for 1893-94 of State Supt. L. E. Wolfe.]

HOW EARLY CAN THE RESPECTIVE BRANCHES BE TAUGHT?

I have but little sympathy with that course of study that postpones even an elementary knowledge of several branches in the domain of man—history, civil government, political economy, literature—and all the branches in the domain of nature to a late period in school life. Divinity spoke both domains into being and unified them for all time. No course of study can, with impunity, put these domains asunder, or drive the departments of either domain tandem. The illustrations given elsewhere in this discussion show beyond any doubt that each of the so-called branches of the domains of nature and man has its elementary truths that can be taught very early—from the first to the fourth year of school life. Most of these branches can be profitably begun with the first year of school life; some of them before the child enters school. To assert that a subject, or part of a subject, can be early taught in its elementary phases, is not to contend that the subject can be exhausted thus early. Some people are always talking about "exhausting" a subject, and teaching it "thoroughly." We never exhaust a subject. A child can, however, get from a subject what is suited to him, what his intellectual and spiritual nature demands at that stage of its development.

He can begin the study of physics, chemistry, astronomy, civil government, political economy, very early—third to fifth year of school life; the study of botany, zoology, geology, history and literature still earlier—first to third year of school life. History and literature have their beginnings in fairy tale, myth, folk-story, fable, and easy biography. The study of nature has its beginnings in those simpler phenomena that greet the child at every step and weave themselves into his very life.

The child, beginning with the muscular force that tosses his ball into the air (as it were, pushes it from him), and the simple fact that a body falls toward the earth, passes successively and gradually, through several years, to the laws governing falling bodies; to the foot-pound, foot-pound-second, dyne, erg, gravity unit, mechanical equivalent of heat, weighing the earth (finding mass) against a mountain, weighing the planets against their satellites; to the abstruse physico-mathematical investigations that demonstrate the permanency of the universe, so far as planetary perturbations are concerned; to the hitherto unsolved "problem of three bodies;" passes from the simplest electric toys to the severest measurements in electricity—amperes, volts, ohms, exterior and interior resistance; passes from the simplest manifestations of heat and light till he measures the heat and light of the sun in calories and candlepower; from simplest facts concerning gases to the laws of Dalton, Boyle, Gay Lussac, and Avogadro.

THE TWO GREAT CHANNELS OF KNOWLEDGE—ACQUISITION.

These are observation and reading. Observation admits the learner to the temple of knowledge through the study of things; reading admits him through the study of words, the representatives of ideas. By means of the one we read what Divinity has written in nature; by the other we read what man has written in books.

(*A*) *Observation.*—It is difficult to overestimate the importance of the careful training of the powers of observation in the domains of nature and man, from earliest childhood to latest life, to the end that the learner may enter fully into the temple of knowledge—intellectually, esthetically, ethically, and spiritually; a training in observation not alone through the sense of sight, but through the senses of touch, taste, smell, and hearing. While sight is the great knowledge-acquiring sense, the training of the other senses should not be neglected, especially hearing, which is second only to sight as a knowlege-getting sense. The child could early learn to distinguish pitch, loudness, and quality in sound, and later to make the experiments that will produce a desired pitch, loudness, or quality. Nature, indeed, with lavish hand fills our every moment with a wealth of phenomena of infinite variety, graded to tender, tentative childhood, mature manhood, and decrepit age. During the past hour there have raced past my car window a wealth and variety of phenomena that beggar description—hill and dale decked in evergreen and gold, crystal stream, deep ravine, and high-piled ledge, whispering winds and floating clouds, and over all and through all the great canopy and the greater sun. But whatever Nature's lavish variety and wealth, to interpret her aright the child needs careful, systematic direction and inspiration from his teacher. That teacher who hopes rightly to direct a human being, from tender childhood, in the acquisition of knowledge through observation and experiment, must devote his days and nights to the study of the child itself—its tastes, capabilities, the laws of its growth. He should, first of all, prevail upon the god Eolus, or some like potent personage, to imprison "thoroughness" and "exhaust," in his deepest and strongest cavern, to be let out in homeopathic installments, during all the years, from lowest primary to highest university. The little child is a butterfly, flitting from flower to flower—a bee, getting a little nectar here and a little there. But with coming years he returns to the same flowers, departing each time on heavier wing, getting at each visit deeper and richer drafts of Divine truth, beauty, right, and love. All along life's voyage of calms and storms, from tiny rill to boundless sea, God is whispering to his soul—

> Build thee more stately mansions, O, my soul,
> As the swift seasons roll.
> Leave thy low-vaulted past;
> Let each new temple, nobler than the last,
> Shut thee from heaven with a dome more vast,
> Till thou at length art free,
> Leaving thine outgrown shell by life's unresting sea.

(*B*) *Reading.*—Observation and experiment limit man to the acquisition of knowledge through the senses. Reading enables him to transcend the bounds of time and space and put himself in possession of the knowledge of the race—to know what is transpiring on another continent, what transpired during a past century; to know what Plato thought and to feel what Homer sung. To read is to get what the author put into his book, to live over with him those ecstacies of thought and feeling, that thrill of high purpose attending the birth of literature. Then, reading being the key to the accumulated knowledge of the race, embalmed in literature, how important its mastery. By reading is not meant the word calling of one set of school readers, in the eight years of school life; but getting, as nearly as may be, during these eight years, the thought and feeling from fifty or sixty books, covering every department of the domain of nature and man, and adapted to the learner's tastes and capabilities; books that will go hand in hand with rational observation and experiment,

stimulating the pupil to more critical and profitable observation and more ingenious experiment; books that will not surfeit or gorge, but direct, stimulate, and inspire.

While reading supplements observation, observation gives that mental equipment that makes intelligent reading possible. The more critically one deals with phenomena and things the better equipped is he for dealing with words. Again, some pupils are better fitted by nature to enter the temple of knowledge through things—through observation and experiment; others through words—through literature. Here (in reading), as in observation, let us put "thoroughness" in durance vile, to be let out in small installments. In reading, a child (after a certain mastery of word calling) naturally passes hurriedly from page to page, from book to book, getting what his mental appetite craves at that time, just as in observation he passes from phenomenon to phenomenon, from object to object. Just as in observation there should be a teacher to skillfully incite to a more critical reading of the book of nature, so in reading there should be a teacher to incite to a more critical reading of the books of man. But let us be careful how we insist upon thoroughness far beyond the tastes and capacity of the child. What seems thoroughness to us may be nausea and disgust to him. Let us beware how we insist upon difficult philological, ethical, or esthetic distinctions that appeal to the mature intellect only. When we think we have taught them, the poor child, in obedience to the ukase of his ignorant teacher, has learned only to mouth them. The attempt to teach thoroughly a set of school readers (without other supplementary reading) a page or a paragraph at a lesson does gross violence to the fundamental constitution of the child's soul. Having done a reasonable amount of skillful inciting, directing, and inspiring don't lose sleep over want of thoroughness. Just as the bee will return again to the flower, so the child, under proper direction, will return again to the book, to get what he could not get on first reading; or he may get its equivalent from another book. The child presides over a little world of his own, ever widening as the years go by. That mysterious self-active, self-conscious self is day by day and year by year unfolding itself. At any certain period of childlife, for any certain individual child, there are certain soul chords corresponding to certain elements in the domain of nature and man. The more bungling the teacher, the more frequently he strikes into space, there being no soul chord to strike into harmony. While juvenile books, founded upon child nature, can be successfully prepared in the natural sciences, history, civil government, political economy, and literature, the masterpieces of the world's literature can not be duplicated every day to order.

Many of these world classics contain lessons for children as well as for mature philosophers. They can thus be read and reread as the years go by. Nature and books spoke not to us in childhood as they speak now. The cloud, the stream, the sunlight come fraught with deeper lessons. To-day you read Emerson, Carlyle, or Gœthe. In ten years the coming and going years of pleasure and sorrow, success and defeat, will enable you to read them with deeper insight.

> Heaven is not reached at a single bound;
> But we build the ladder by which we rise
> From the lowly earth to the vaulted skies,
> And we mount to its summit round by round.

NATURAL SCIENCE VERSUS LITERATURE.

Much has been said and written upon the relative merits of natural science and literature. Each has its advocates and enthusiasts. We are told, on the one hand, that natural science is materialistic, of the earth earthy, and that the genuinely humanizing and spiritual study is literature. On the other hand, we are told that natural science is peculiarly God's handiwork, and that through its study we rise to the Divine self-activity that spoke nature into being; that literature deals with words, with mere shadows of things. Both are extremes. Both literature and natural science are parts of one great whole. Each is complementary of the other. Both are equally Divine. On the one hand, God has unfolded Himself in a universe of enrapturing beauty and grandeur. Each bears this Divine stamp—from trembling atom to bowling world. On the other hand, God "made man in His own image, and breathed into him the breath of life." The world literature spans every height and sounds every depth of this image of God. May it be ours to know more of the heights and depths of both literature and natural science.

MATHEMATICS.

Mathematics is a general branch applicable to both the domains of nature and man, and should be so taught as to vitally relate to the branches of these domains. Improbable, artificial, far-fetched, so-called "mental arithmetic" examples flagrantly violate the above principles. Such examples are semialgebraic, and, while furnishing a good mental discipline, lack close relation to actual life, and hence are not of

the highest utility. The hare and the hound still continue their unequal leaps across the pages of many of our "intellectual" arithmetics. While these animals are important, from a zoological standpoint, they do not figure arithmetically in the business world so extensively as these authors would have us believe.

In the opinion of the writer too large a place is given, in the elementary course in mathematics, to arithmetic; and too large a place in arithmetic to value. Much pertinent work in arithmetic would grow out of the elementary study of nature. Upon reflection, it will occur to one how rich this field is; but here, as elsewhere, we should be careful not to go far out of our road to manufacture artificial and far-fetched examples, not bearing vitally upon the important parts of the natural science work in hand—all this, lest the fundamental law of unity be violated, and the child's time and energies be squandered.

Lines, surfaces, and solids—geometry—in an elementary form, could be successfully taught in grades 7 and 8, and possibly lower. The subject of arithmetic could be much simplified and unified by omitting cause and effect, six per cent rule, twelve per cent rule, Connecticut rule, and other unnecessary and mystifying methods. Quite frequently the pupil gets these extra methods mixed in such proportions as to result in an incorrect solution. What the pupil (soon to face practical life) needs is one direct, common-sense method of solving examples, and such abundant practice in miscellaneous examples as will insure accuracy and rapidity. The great method of methods in arithmetic is analysis. The method that will find the cost of one orange at 5 cents and a doll at 10 cents, the change in return when an orange at 5 cents is exchanged for a stick of candy at 1 cent, the cost of two lemons at 4 cents each, the cost of one lemon when two cost 10 cents, will solve most of the examples of arithmetic. In this way arithmetic can be unified. But the greatest stride in unification will come with the adoption of the metric system, thus unifying all denominate numbers and calculations to the simple decimal system—ten units of one order making one unit of the next higher order. While this system has taken a strong hold upon continental Europe, notably France and Germany, the prospects now are that it will be many years before it takes much hold upon the United States. It is true that the metric system is now in all our text-books, but it has no practical hold upon the people. The old, cumbersome system of weights and measures is still universally used in the transaction of business. It is a matter of deep regret that this wonderful labor-saving metric system still knocks in vain for admittance in the United States and insular Europe.

EXPRESSION.

All mental growth consists (1) of the acquisition of knowledge through (*a*) observation, (*b*) reading, and (*c*) elaboration; and (2) in the expression of this knowledge (*a*) in language; oral and written, (*b*) in drawing, (*c*) in modeling, and (*d*) in making. It is only through these four methods of expression that man attains complete communication of himself to his fellow-man. Besides, some pupils are naturally weak in language, but strong in drawing, modeling, and making. Unable to enter the temple of knowledge through words, they enter it through things. I therefore advocate the teaching of these four methods of expression, without attempting to decide the relative importance of these four methods. To what extent it will ever be practicable to teach the fourth method—making—in all the district schools, time only can determine. Just now, it seems that modeling is more universally applicable to the common schools than making; likewise, drawing than modeling. Certain it is that in the common schools of this country, as a whole, comparatively little drawing is taught, less modeling, and still less making. Language is the universal channel of expression. Obeying the guiding principle of unification, acquisition and expression of knowledge should be linked together. Years of practice should be given to the expression of knowledge at the moment of its birth; not to the memorizing of multiplied rules and minute directions for expressing knowledge and dissecting sentences, but to expressing ourselves as we will be called upon to do in life—in business and the professions—on the farm, at the carpenter's bench, and the merchant's counter; at the draftman's table and the artist's easel; in printed page; from pulpit, bar, and rostrum; linking this rich and varied expression closely and vitally to the entire line of work, in observation, experiment, and reading, in the domains of nature and man, from lowest primary to highest university. Admitting, as we gladly do, the importance of a few fundamental rules, principles, and directions to guide in the expression of thought, we most deeply deplore the burdening of grammars and rhetorics with infinite minor rule and direction, memorized without adequate practice, and disgorged as soon as examinations are over. These fundamental rules, principles, and directions should grow out of infinite concrete practice, and be memorized only when the mind has fully grasped their concrete contents. Just as no mere memorizing of a cook book can make a good cook, so no memorizing of directions alone can make one proficient in the use

of the English language. Let us keep close to living thought and living expression, remembering that the chief value of grammatical analysis is to enable the learner to interpret literature and to communicate himself to others. Here seems to be the heart of the whole matter; to read man in his works—books, drawing, modeling, making—and God in nature, and to communicate oneself most fully and completely to his fellow-man, in language (including music), drawing (including painting), modeling, and making (including the work of the artisan and sculptor).

NEBRASKA.

[From the Report for 1893–94 of State Supt. A. K. Goudy.]

HIGH SCHOOLS—VARIOUS PLANS FOR A STATE SYSTEM CONSIDERED.

In Nebraska a high school is a school organized under our common-school law, doing work in subjects in advance of those required for a first-grade county certificate. These schools are next in importance to the primary schools. They constitute the ninth, tenth, eleventh, and twelfth grades, or years, of the common-school course. They are of importance from two distinct considerations: First, they are the preparatory schools for the college or university, and second, they are the schools in which a vast number of our boys and girls finish their school life. Under our statute any school district having a school population of more than 150 may, by a vote of the district, establish a high school—that is, such district may make provisions for carrying the pupils forward until they have completed a course of study which will fit them to enter college. It is unfortunate that more of our boys and girls have not these opportunities, and many plans for extending the provisions of high-school instruction have been attempted. In our own State, in some of the counties, a plan for admission to convenient high school of city or village from the rural or ungraded schools has been successfully adopted. The objection to this is that the pupils attending the high school under this plan must pay a tuition fee.

A further objection is that high schools are thus likely to be crowded beyond their ability to do the best work for their pupils. If these objections could be overcome, it seems to me to be the ideal plan, for the reason that it brings the country schools into close relation to that high school which is most convenient to them, thus making it possible to take the high-school course while at home, under the home influence and home restrictions, at the most critical period of their school life. Another plan, adopted in some States, is a provision for establishing a high school in each township for the free tuition of the children of the township. This makes it possible for all the youth of the township to pursue a high-school course while at home. This plan would be most feasible under the system of "township districts," in which each township becomes a school district.

A third plan suggested is that of the establishment of a high school for each county in the State. Some of the objections to this plan are: Children must go away from home to attend; it involves the further complication of our school system; it involves a large additional tax for school purposes; it involves the establishing of a high school for the county, besides another high school established and maintained by a city or village; it introduces an element of friction between the city and village high schools in a county and the county high school of that county; it further introduces local politics into the schools, the location of the county high school being made the occasion of local jealousies and trades in connection with county seats and other local affairs which are foreign to the schools. The history of county high schools in Iowa and in Kansas, where the system has been introduced into their statutes, does not seem to be encouraging, the Kansas law being enacted in 1883, since which time but three or four county high schools have been established in the 105 counties of that State, and the Iowa law being enacted in 1869, since which time I am informed that but one county high school has been established.

The ideal plan, and one which is not difficult of realization, which obviates most of the difficulties named above, is the following: The arrangement of a course of study for the rural schools, which, complete in itself so far as it goes, is also preparatory to the first year of a local high school, into which pupils completing the course in the rural school may graduate; the arrangement of a course of study for the local high school, which, while complete in itself so far as it goes, is also preparatory to the first year of the university course, into which the pupils of the high schools may graduate; the high schools to receive from the county general fund, or from a special fund created for that purpose, a sum sufficient to pay the expenses incurred by the tuition of the nonresident pupils attending such high school. In such a system there are no divided interests; there are no local jealousies; the pupils are educated practically at home; there are no duplicating of the things attempted; each part leads to the next—in short, there is a system leading from the elementary school to the university.

The problem of secondary education, included in high-school work, lying between the elementary school and the college, university, and normal school, is one most difficult of solution. This problem has been attacked in many of the States, and nowhere has a satisfactory solution been reached.

Massachusetts has probably come nearer a satisfactory disposal of this question than any of the other States which have seriously moved in the matter. Her theory, like that of other States, is that free instruction of all the youth of the State from the primary school to the university should be afforded. The conditions in Massachusetts are so different from those existing in Nebraska and other Western States as to make the details of her system impracticable in our own State; and still Massachusetts has furnished the key to the situation by providing for the tuition of pupils attending a high school outside their home district when they have no such school in their home district, one of the provisions of the high-school act being "that any town in which a high school is not maintained shall pay for the tuition of any of its qualified children who may attend the high school of another town or city. In other words, free high-school tuition is the legal right of every qualified child in the Commonwealth." The foregoing quotation is from the report of the secretary of the board of education, adopted by unanimous vote of the board.

Minnesota provides for State aid to the extent of $400 annually to each high school in any city, village, or township district which shall provide a course of study preparatory to entrance to the State university. Of a total of 64 high schools in the State 14 were reported, in 1891, as complying with the university preparation requirement; 21 were reported as substantial and complete in organization and instruction, though not quite up to the standard indicated above, and 29 were reported as not meeting the conditions of a well-equipped high school. Not more than 5 high schools in any one county to receive aid in any one year, and not more than $20,000 per annum may be given by the State to aid high schools.

So it appears that Minnesota is working for the solution of the same problem, with some progress toward the result.

Wisconsin has a high-school law, which, unlike that of Minnesota, stops short of making the high school free to nonresident pupils; and so does not in the largest sense stand between the ungraded district school and the college, university, or normal school.

There can be no doubt of the excellence of existing high schools in Wisconsin; but the futility of attempting to build up this grade of school where there is not an existing sentiment in the locality favorable to its establishment and maintenance is demonstrated by the fact that while there is a State tax, the proceeds of which are to be divided among those high schools established and maintained amounting to one-half of the entire sum expended for instruction therein, the State superintendent, in commenting on this matter, says: "By this act an annual appropriation of not more than $25,000 is made to encourage the establishment and maintenance of free high schools in towns where there are none but ungraded district schools. This was the principal purpose of the first act proffering aid to free high schools. But few of these places took advantage of the assistance thus tendered, and the remainder of the appropriation is now devoted to the high schools established in connection with graded schools."

In Wisconsin the State superintendent prepares a course of study for free high schools; he exercises a personal supervision over them; he personally visits and inspects them; he appoints a suitable person to assist him in inspecting and supervising them; he furnishes suitable blanks for annual and special reports for these schools. He is, in short, the responsible head of the high-school system of the State, an amendment to the law, increasing his power and authority, being made to carry out this plan.

In order to establish a connection between the ungraded district school and the schools beyond the high school, viz, the college, university, and normal school, so that all the youth who desire to do so may have free high-school privileges, there remains in Wisconsin but a single step—the payment by the State of the tuition of all the youth of the State who may elect to attend such high schools as now exist. This being done, there is free high-school training for all, whether a high school exists in their home district or not.

What are the conditions in Nebraska? We have many local high schools, a number of them fitting for college, or university, or normal school, their graduates admitted without examination to these institutions.

Then there is a still larger number of local high schools, which, while not fully preparing their students for the institutions of higher learning, do carry them materially beyond the last point possible of attainment in the "district school." Pupils from the district schools should be permitted to enter those high schools most convenient to them; the county or the State should provide for the payment of a suitable tuition; thus, in most cases, could the boys and girls advance beyond the last possible step taken in the district school. Then, if in their further attainments they must go

from home (as in most cases they must under any possible arrangements) for the completion of their secondary education, let the county or the State follow them with money to pay their tuition, until, as now, they reach the college, the university, or the normal school, where their higher education is provided by the State at no expense to themselves. A high school can not be placed at every door until our population has become much more dense than it now is, but we can make provision for the high-school instruction of all the youth of the State in those districts where high schools are impracticable, by paying a suitable tuition fee for all pupils so situated who attend a high school in a district other than their own.

The county, or the State, may make provisions for doing this from the general fund of county or State, or by the creation of a special fund for this purpose. In a large part of the State there are now high schools within comparatively short distances from the mass of the country pupils. As the population increases this condition will gradually improve until, as now in the States of denser population, there is a high school within easy reach of almost all.

NEW HAMPSHIRE.

[From the report for 1893-94 of State Supt. Fred Gowing.]

SCHOOL ATTENDANCE.

The public schools are for all the children of the State. The law requires attendance of all children between certain ages for a certain minimum period of time, unless evidence of inability or equal advantages is shown.

Difficulties arise in dealing with habitual truants and children employed in manufacturing establishments. To the average teacher a greater source of vexation and bewilderment is irregularity of attendance of pupils enrolled as members of the school in good standing. This irregularity of attendance, in the gross, results in great loss of time and school privileges, easily calculable in hours or school months. The loss of interest consequent upon interrupted attendance, the waste from gaps in individual progress as compared with school or class progress, the formation of pernicious habits in inexactness and irresponsibility, are not so easily represented by symbols.

Some causes of absence are poor teaching, false methods of discipline, lack of home influence and parental cooperation resulting in neglect or indifference, importunity on the part of the child to remain at home "to help" in trivial matters, perversity, ignorance of consequences of absence, and poverty. Distance from school and insufficient school accommodations are more infrequent causes.

The work of the school is the business of the child, and every child should be impressed with the idea that his business can no more be neglected without detriment than the business of adults. Tendencies to tardiness and absence seem "to run in families," along with other family traits. The responsibility for negligence of school duties through absence or idleness rests not wholly upon the child, but quite largely upon the parent who knows, or ought to know, the general conduct of his child, and who, by inaction, tacitly assents to such conduct.

The first concern of the school official in this matter is to find out the causes of absence in his own school. There must be no diminution or cessation of attention until general habits of punctuality are formed in the community. Spasmodic revivals are impossible here. The woful waste of absence should be held before parents and children alike continually, although the unfair and inefficient scolding of pupils present for the faults of absentees is to be deprecated. Cooperation of parents is to be sought. Too often parents are ignored until there is trouble. Calm weather is the favorable time for acquaintanceship, and an acquaintance with parents gives occasion to inculcate the importance of school privileges, to inform of the policy and methods of the school, and to strengthen the personal hold of the teacher. Appearances at times indicate that to the teacher pupils are simply pupils, and not human beings in certain definite relations to the community and to life.

Strong teachers with heart power succeed well in gaining and holding pupils in school. Good teaching is essential. Every pupil should feel that by absence he suffers personal loss irretrievable. If poverty prevents attendance, kindly charity should be so administered as not to offend the personal dignity of any pupil, or to cause him to lose caste among his fellows.

However desirable perfect attendance may be for the prosperity of the school and the progress of the individual, it is not to be purchased too dearly. Every child who ought, should be in school every day, but no detriment should come to anybody, pupil or parent, in health or in any valuable thing, by his attendance.

Attendance is a means, and all pupils may rightly feel that partial attendance is considerably better than no attendance. Avoidable absence alone is culpable. In

struggling for long "rolls of honor" and high percentages of attendance, it is so easy to put the whole matter in wrong relations. While inertia on the part of the teacher, and a bare perfunctory discharge of duty in always securing "a proper excuse," are deplorable, deceitful, and doubtful acts performed for prizes of any sort whatsoever, "banners," applause of committee, or any other, weaken the morals of the school. A wholesome rivalry is possible and stimulating. It is common, for instance, to excuse children immediately after the roll call in order to avoid a technical absence, a dismissal not being regarded in the record of attendance percentage. The pupil actually loses the whole session. If absence in cases of this sort is necessary, the coming to school to report is a hardship. Such a method is an unworthy subterfuge and a trick. If tardiness is the especial matter under attempted improvement, it is intimated that absence is preferable, and tardiness, sometimes unavoidable, becomes almost criminal in the judgment of a pupil. It is difficult to maintain the perspective. Teachers, presumably somewhat masters of their circumstances, are occasionally late in their arrival at school. The fetich worship of marks and records leads to extraordinary devices and regulations. Things simple become warped beyond recognition.

In many places there is a custom to drop from the roll the name of any pupil absent for ten consecutive half-days. Under such a rule, engaged in hot rivalry for the highest percentage of attendance, or without adequate conception of the physical, intellectual, and moral purposes of schools, unable to withstand the stress of circumstances, some teachers prefer continued absence to occasional presence.

General rules governing the matter of attendance and establishing uniformity in recording and reporting, applicable throughout a State, are desirable in the interest of honest statistics and sound morality.

A pupil should be in his seat ready for duty at the signal for beginning a session. Failing in this, or arriving before the middle of a session, he may be regarded as tardy. If he arrives after the middle of a session, or leaves before that time, he may be regarded as absent, and the loss of time recorded. To be marked present a pupil should be in attendance at least during one-half of the session. If he leaves after the middle of a session the record should show a dismissal. Actual absence or presence during a whole session involves no doubt in recording. Since it may be desirable for uniformity in reporting to set an arbitrary limit to absence, the end of ten consecutive half-days, a school week, may be as good as any. This time lost should be reckoned in ascertaining average membership and attendance if the pupil returns. In case the pupil does not return these days may be omitted in reporting. The actual loss of time incurred by tardiness or dismissal should be recorded against the pupil's name in the register. Statistics should be in sight of truth. Notwithstanding the advantages of some such system, objections not altogether trivial may be made to these suggestions. Uniformity throughout a town at least is to be insisted upon. The ratio of enrollment to whole number of children, of average membership to enrollment, of average attendance to average membership, may indicate the efficiency of the schools, their influence, and the esteem in which they are held.

It is the duty of the school to reach every possible pupil, and to keep him for as much time and for as long time as possible under beneficent educational influences. When this is accomplished the records and reports should show exactly what they purport to show—how generally and how constantly the provisions for education are applied.

A more systematic and energetic enforcement of the truant laws by school boards of small towns is essential. A deplorable laissez-faire policy exists in altogether too many places. The provision of the law relating to the penalty to be imposed upon such parents or guardians as do not comply with the statutory requirements for attendance of children upon public schools is defective and should be amended so that failures to send children to school should constitute a misdemeanor punishable by payment of a fine.

The law relating to child labor should be so amended as to include mercantile houses and establishments employing children other than manufacturing establishments.

The minimum age limit at which children may work while schools are in session should be raised to 14 years.

NEW JERSEY.

[From the Report for 1893-94 of State Supt. A. B. Poland.]

Since the adoption of the general school act of 1871, twenty-three years ago, no other succeeding year has witnessed so many nor so vital changes in the organic school law of the State as the year just closed.

Chief among the many important changes effected by the legislation of this year are the following:

The township school act.

The free text-book act.
The temperance instruction act.
The reorganizaion of the State school board.
The restoring riparian moneys to the State school fund.

In all some twenty-one bills designed to modify to a greater or less extent the organization and administration of the schools of the State were passed by the legislature of 1894. It may safely be said that no legislature for a quarter of a century has considered more carefully all matters affecting the educational interests of the State, and no legislature for a quarter of a century has done more to uplift the schools of the State and place them upon a basis of permanent growth and efficiency.

Foremost among the many measures intended to improve the condition of the schools was the so-called "township" act, which abolished all the existing school districts in the State, except those of cities and boroughs, and provided that the township boundaries should hereafter be the dividing lines between contiguous school districts.

This measure was introduced in the assembly by Hon. George P. Olcott, of East Orange, to whose indefatigable industry, patience, and fidelity its final passage is largely attributable.

I doubt whether any legislative enactment during the past two decades, whatever its subject-matter or its avowed object, will be more far-reaching and productive of good than this radical reorganization of the State school system upon the township basis.

The chief object of this measure was to effect the following ends:

1. By enlargement of school districts, to make the cost of maintaining good schools considerably less to each taxpayer.

2. By bringing a large number of schools under one and the same jurisdiction to make possible effective grading and supervision.

3. By throwing rural and village communities into the same taxing district to equalize the burdens of maintaining good schools.

4. By making all the schools of a township free to all the resident children of a township to afford equal school privileges to all.

5. By making the school trustee a township officer, to create governing school boards who should take a broader and more enlightened view of the purpose, scope, and results of public school education.

It was not a hastily devised nor an ill-considered measure. The experience of a dozen or more States that had taken the step in advance of New Jersey was appealed to for guidance.

It was found that no State which had abolished its district system and had substituted the township system therefor was dissatisfied with the change. On the contrary, the testimony of all such States was uniformly and unequivocally favorable to the township system.

In fact, the question of the township against the school district as the natural geographical division for educational purposes had been studied and discussed so generally throughout the country during the past twenty-five years or more that opinion had become crystallized. Scores of opinions of the most competent educational experts were laboriously collected by the State superintendent, and all were found to be in accord; there were actually no dissenting voices to be heard anywhere; hence the promoters of the change felt assured that they were incurring no risk of disorganizing the school system of the State by advocating the township plan, but were recommending a system which in its general features would command the unqualified approval of all intelligent and right-minded citizens.

It was to be expected, however, that the first operation of the new law would result in more or less misunderstanding and friction. It could not be avoided. The change might indeed work a temporary hardship in not a few communities, especially where district lines could not well follow township lines under existing conditions of population and settlement. It was believed, however, that a remedy might be easily devised for these specific cases of hardship. The greatest difficulty to be overcome arose where the township lines cut a district in two, leaving the children, or a considerable part of them, on one side and the school building upon the other. Several methods to meet this objection had been tried in other States, but none seemed to be wholly satisfactory. As a temporary expedient and until a permanent plan could be devised to meet the difficulty, county superintendents were authorized in their discretion to transfer pupils to the nearest school. It was believed that this would obviate any immediate hardship and afford an opportunity to consider carefully the best plan for permanent relief. After a careful study of the situation I would recommend that the next legislature be asked to enact a law enabling boards of education of adjacent townships to create special lines where the same are actually needed. These lines should be temporary, say, for three years only, when they should be subject to revision. By this means the advantages of the township system will be secured and all the hardships incident thereto avoided.

With this amendment nine-tenths of all the opposition to the township law will cease. I am not aware that this method has been tried elsewhere, but I believe it will prove entirely satisfactory. The manner of appraising the property of school districts and covering the same back to the taxpayers of the old districts by remitting one-tenth each year has been quite generally accepted as a just and equitable disposition of this perplexing question. I would beg to suggest, however, that three or five years would be quite as acceptable as ten years in which to make these adjustments. The shorter period has this advantage, also, that it sooner obliterates the recollection of the old district dividing lines. In some other details, especially concerning method of appraisement and disbursement, the act should state in somewhat clearer language the mode of its operation and enforcement. Other changes in the township law of a minor sort will doubtless be found desirable.

It is no reflection, however, upon those who were responsible for the act of 1894 that it is not altogether perfect. It is true of all legislation that no man or body of men can devise a perfect system at a single effort. If it were otherwise there would be no need of annual, nor indeed of biennial, legislatures to remedy old laws and enact new.

Experience of the actual operation of a law is the surest and, in fact, the only test by which its merits and defects can be ascertained.

The wonder, therefore, is not that the legislature of 1894 failed to devise a system of school organization complete in all its details, but rather that the system inaugurated is so remarkably free from objections that it will require comparatively slight amendment in order to make its operation entirely satisfactory.

That the repeal of the township law should be earnestly and honestly sought for by many is not to be wondered at in the least. Accustomed by long use to a system so diametrically opposed, familiar with the minutest details of the old, it was to be expected that a large minority, if not indeed a majority, should for a while at least look upon the tearing down of the old idols as scarcely less than sacrilege. With a better knowledge of the advantages of the new system, to be had only by trial and study, these same unfriendly critics may be expected to become the warmest friends of the new order. Why? Because the very intensity of their opposition shows a love for good schools and a determination to secure them. It is not, as a rule, dislike of innovation—except in rare cases, as, for instance, where school trustees of many years' standing are ousted by their neighbors from further control—but an honest fear that the schools will be injured, which has prompted the misguided opposition of many. I am satisfied, therefore, that a better knowledge of the beneficent operation of the law—assuming that it be an improvement upon the old, as it unquestionably will show itself to be on due trial—will cause most of this opposition to vanish like a cloud at sunrise. Indeed, opposition will change to admiration. Improvements, as for instance better roads, may be a long time coming, but no people, when once convinced of the utility of any alleged improvements, will cling to them more tenaciously or push them more effectively than the intelligent and progressive people of New Jersey.

Hence it is I feel confident in affirming that the State of New Jersey will never permit the repeal of the township school act of 1894 until after due trial and admitted failure. The due trial is now being had; a failure the law can not be.

I desire, therefore, to repeat that all who contributed to the reorganization of the State school system should be abundantly satisfied with their labors. The passage of the Olcott school bill of 1894 will stand for years to come as one of the epochs in the school history of New Jersey.

So far as the State department contributed in any degree to secure this advanced school legislation it will gladly assume the responsibility. Years of routine service at the head of a great State school system could not give me the pleased satisfaction that I feel in having assisted in this one great educational uplift. * * *

Just prior to the adoption of the township act there were 7 districts having each less than 10 resident children of school age. It is fair to assume that the average enrollment in these 7 schools was not more than 6 or 7 pupils, and the average attendance not more than 5 pupils. For the education of these 5 pupils the State under the old law would have paid $270 per annum, that is, $54 per child. Surely this can not be considered economy, for the average cost per child for the State at large for the year of this report was only $18.12. There were 7 districts, also having between 10 and 15 children of school age; 17 districts having between 15 and 20; 28 districts having between 20 and 25; in all, 278 districts having each less than 45 children of school age. * * *

Eighty-six districts under the old law enrolled less than 10 pupils each. What wastefulness of public-school moneys! One hundred and seventy-two districts enrolled between 10 and 15 pupils; 221 districts, between 15 and 20 pupils; in all, 479 school districts enrolled less than 20 pupils each; 161 additional districts enrolled less than 25 pupils each. * * *

Facts such as these prove conclusively the necessity of legislation to enable con-

solidation of small districts that are contiguous. Under the old system these small districts were likely to remain separate for an indefinite period if not forever; under the township act they will be united wherever the same can be done advantageously. Isolation was the fundamental principle of the old system; union that of the new. In union there is strength.

No one factor has cut so large a figure in the remarkable industrial progress of the last twenty-five years as that of combination and cooperation. Witness it in the large manufacturing and commercial enterprises of the present day; witness it in the unions of various kinds to control labor and production.

It would be surprising if, with our eyes wide open to what is going on around us in the industrial world, we should fail to catch the spirit of the times, and hence not be able to utilize it in the improvement of public school education.

FREE TEXT-BOOKS.

Next in importance to the township act is the free text-book act passed by the same legislature, but as a separate measure from the township act. Hereafter no child will be cut off from the advantages of an education because of its cost. Heretofore each district has provided, at public expense, land, buildings, furniture, equipment, and instruction, but text-books and ordinary school supplies have remained a tax upon the individual—the only remaining impediment to making the schools absolutely free. This last obstacle has now been removed. Hereafter the whole cost of educating its children and youth will be assumed by the district. This is consistent; it is just; it is right. By no process of correct reasoning can taxation by the State for buildings and instruction be justified that will not also justify the supplying of text-books and supplies at public cost.

It is still too early to appreciate to its full extent the benefits to be derived from this measure. Certain it is, however, that the act, though temporarily unpopular, will eventually be looked upon as among the wisest of the many excellent features of our improved State school system. Among the advantages of supplying text-books at public expense are the following:

1. Greater economy, since books purchased at wholesale can be supplied at a less cost.
2. All pupils will be supplied with the same kind of books, thereby facilitating the organization of classes and enabling more systematic grading and instruction.
3. The transfer of pupils from one school to another without the expense of purchasing new books.
4. The saving of a great deal of time now lost at the beginning of a school term, and on the occasion of promotions, by reason of the delay of pupils in purchasing their own books.
5. The use of books under proper care and restrictions until the same are fully worn out, i. e., extending the life of a book almost twofold.

The objections to district ownership and supply of books are these:

1. The loss to pupils, whatever it may be, of a sense of ownership, and the possession of his books after leaving school.
2. The danger of contagion by the use of infected books.

The answer to the first objection is this: That the habit acquired of careful usage of trust property will fully offset any sentimental gain arising from a sense of personal ownership. Indeed, the supply of free books does not prevent pupils from owning their own if they so desire. To the second objection it may be replied that the chances of contagion from books are much less than from the bodies and clothing of seat mates and other pupils. Of course, due care should always be taken to disinfect or destroy all books that have been used under circumstances that render them at all dangerous as carriers of contagious disease. The means for thorough disinfection now employed are so numerous and well known that boards may safely be trusted to use the necessary precautions. * * *

Of course, the immediate operation of the free text-book act will bear hardest upon those counties which up to the present time have made the least provision.

These counties, however, are in the main the least populous, so that we may congratulate ourselves that the free text-book act has been so largely anticipated that its operation will give rise to the minimum amount of inconvenience and additional expense.

After the benefits of the free text-book act have been enjoyed for a full year, I shall expect to be able to record a number of important and interesting facts due to its operation.

It may be a little early to predict with accuracy, but I anticipate a gain in registration of at least 3 to 5 per cent, and a still larger increase in average attendance; this gain being in excess of that naturally arising from year to year, due to increasing population and greater school accommodations.

The advantages to be derived from uniformity of text-books, namely, the ability

of the teacher to organize and instruct classes on the very first day of the term, etc., will not appear in statistical percentages, but are none the less real and important.

TEMPERANCE INSTRUCTION ACT.

During the last session of the legislature an act was passed requiring all schools supported wholly or in part at State expense to give instruction in the nature and effects of alcoholic stimulants and narcotics. As was to be expected, this law met with no little opposition on the part of many. The objections raised were numerous, of which the following are chief:

1. That instruction of this sort, if necessary, may best be left to the pupil's parents.
2. That there is danger of formal text-book study making the subject of temperance obnoxious to pupils, and hence of producing the counter effect to the one desired.
3. That the State is going beyond its appropriate function in prescribing and enforcing such instruction.
4. That the enforced purchase and supply of books impose an unnecessary burden upon the taxpayers.

Despite, however, all objections that were raised, the majority of districts readily acquiesced in the law, and took steps at once to carry out its provision.

There can be no doubt that the most effective means of counteracting any widespread social evil is to be found in judicious and timely instruction of the young. Whether this instruction should be given at home or at school will depend upon several considerations, as, whether parents are competent and willing to instruct, and whether parental instruction will be as effective in the majority of cases as school instruction.

If the State could be assured that all children would receive at home, or outside the school, the kind and amount of instruction needed to make them good and temperate citizens, then the school might safely be relieved of this duty. It is, however, a fact patent to every intelligent observer that a considerable number of children in every community do not receive at home any adequate hygienic instruction, especially in respect to the nature of alcoholic stimulants and their physiological effects. Instruction as to the immorality and grossness of intemperance is important and should not be omitted, but instruction as to the injurious physical effects upon the organs and functions of the body is needed to impress children with the undesirableness of acquiring the alcoholic or narcotic habit. This phase of instruction is particularly adapted to the school, in connection with the study of general physiology and hygiene.

The objection that such teaching will make temperate living obnoxious to pupils is not worth considering. If it were granted, then all text-book study that bears any relation to the life and habits of pupils would be dangerous.

The last objection, namely, that the enforced purchase of text-books imposes an unnecessary burden upon the taxpayers is the only real cause for complaint.

It is not impossible that the law goes too far in prescribing that books should be used in all grades. It would satisfy all the ends sought for if instruction by text-book were confined to one or two years of the school course.

NEW YORK.

[From the report for 1893–94 of Hon. Jas. F. Crooker, superintendent of public instruction.]

CONSOLIDATION OF SCHOOL DISTRICTS—DISTRIBUTION OF THE STATE SCHOOL MONEYS.

There has been a further decrease in the number of school districts during the past year. In July, 1894, the latest date in connection with the statistical data covered by this report, there were 11,121 school districts, a decrease of 49 since the preceding report. This makes a total decrease during the three years of the present administration of 75 districts, and a decrease of 118 in the past eleven years. This shrinkage in number has been, as a general rule, for the best interests of the schools, for it has resulted mainly in the union of weak districts with stronger ones, and, therefore, in the establishment of better ones. It is certainly more in line with the opinion of modern educators to consolidate weak districts so as to enable them to sustain, adequately, schools of the required standard of excellence, than to keep in operation untenable buildings, poorly paid teachers, and uncouth surroundings.

To maintain the supremacy of our common-school system there must be some standard of excellence demanded of all, and such standard can not be attained without a certain degree of liberal support. It is one of the duties of school commissioners to ascertain the cause of poor, unprofitable schools, wherein there is a lack of thrift and a small attendance, and to apply the remedy of consolidation should it be

deemed expedient. The decrease in the number of districts has also been caused by the annexation of large tracts of territory to some of the cities of the State, notably that of thirteen in Kings County alone by the extension of the corporate limits of Brooklyn. The consolidation of small and weak districts is earnestly advocated by the Department, with the necessary limitation that the schools be not placed thereby too far from the homes of the children. In dealing with this question there are cases often which require the exercise of wise judgment and circumspection on the part of school commissioners. Poverty or small assessed valuation of property in districts is not the only cause of weak schools. In many districts it is due to the parsimony and indifference of the inhabitants and the short-sighted policy of school officers. They endeavor to make the necessarily limited apportionment from the State supply all the wants of the school, and thereby limit school privileges to the use of dilapidated buildings, old furniture, cheap and consequently inefficient teachers, to escape local taxation for school purposes.

This is wrong in principle and in justice. The State is liberal in its appropriations for schools, but it should not be expected to furnish all the funds for current expenses. Each locality should do its share toward supporting its schools by supplementing the school moneys received from the State treasury. There are but few districts whose assessed valuation is so small that it would be a great hardship for them to raise by local taxation an amount equal at least to that received from the State for the support of schools. A law requiring each district to raise an amount equal at least to that apportioned on the present basis, in order to entitle that district to participate in the general apportionment, would provide sufficient funds to pay a fair salary and secure the services of a competent teacher. The present stinted salaries paid in many districts offer no inducement to competent teachers, and the result is that incompetent ones are often employed, with no substantial benefits to the pupils—almost a wasteful use of the public money. There are but few districts in which local aid can not be given to make the schools profitable and worthy of our admirable system.

I must, in justice, again refer to the wrongful system in the distribution of the State school moneys which gives large sums to strong districts at the expense of weak ones. It is unquestionably wrong to divert one dollar even of the public school moneys to foster higher education at the loss of primary and secondary schools. Most, if not all, of the high schools which receive aid beyond their regular and proportionate quota with the small country districts are rich in resources and do not require the aid that the State extends to them through the present double-dealing system. Some are private institutions and practically independent of State control. Every dollar given to them out of the school funds by the regents is so much paid to them in addition to their pro rata apportionment, and a like amount is kept from the poor country schools that represent our common-school system more substantially than do the academies and seminaries. The common district schools need all the support the State is able to extend. When all taxable property throughout the State is equally taxed to support our common schools there is neither right nor justice in diverting any portion of it, however small, for the purpose of paying premiums for special examinations held in wealthy districts where academies, seminaries, and other advanced institutions of learning are maintained. It is idle to say that liberality toward higher institutions is beneficial to the common schools if that liberality is exercised at the expense of the common schools.

The smallest and poorest country district should receive its full share of the school moneys, and should not suffer through favoritism to the larger and richer ones, for it is undeniable that it needs aid far more than any seminary or academy controlled by wealthy corporations or individuals. Another objection to the diversion of any part of the public school moneys from their legitimate purpose by the present double-headed system is that a portion of it is used mainly for the objectionable purpose of paying premiums for results obtained at special examinations, the influence of which is dangerous and detrimental to honest and thorough educational work. The plan is condemned by a large majority of the educators throughout the State for its vicious tendencies, and is strongly censured even by many who participate in its results.

THE EVILS OF THE REGENTS' EXAMINATION SYSTEM.

The evils growing out of examinations of pupils, upon the results of which depend the popularity and often the permanency of a teacher's position, and on which is based the amount of premium the school receives, are universally acknowledged. The plan tends to encourage superficial work, with the sole end in view of "passing" as many pupils as possible, and often leads to dishonesty on the part of both pupil and teacher, an instance of which is fresh in the memory of many. The main object for every teacher to aim at, that of thorough work in the general development of the pupil's faculties, is lost sight of in the aspiration to "pass" as many as possible through that sort of catechism system that will bring the largest revenue to the school.

It encourages a system of "cramming" for examinations, which will continue just so long as money inducements are offered to boards of education as a premium for adopting the present system of regents' examinations.

HOW TO CHECK THE DEPOPULATION OF THE COUNTRY DISTRICTS.

The progress in the country districts would be more marked were it not for the constant tendency of the rural population in many parts of the State toward the great centers, where better facilities for education are offered. It is the earnest desire of parents to send their children to the best schools, and that influences them in numerous instances to give up their homes in the country and to move into the larger towns and cities. This is an additional argument in favor of a fair apportionment of the school moneys, which can not be had while the present inequitable plan diverts a considerable portion of such funds for the benefit of a favored class. I repeat here what I maintained in my last report, that agricultural as well as educational interests are involved in this diversion of the school moneys from their legitimate ends. The depopulation of rural districts will continue without intermission so long as they are not furnished with adequate school facilities. * * *

That parents in rural districts are anxious to give their children a good education may be seen from the statistical record. Over 74 per cent of the school population in the country districts attended school during some portion of the past year, while in the cities it was less than 49 per cent. With such an exhibit there should be no question as to the right of all country districts to obtain their full share of State aid for public instruction. They certainly can not be accused of indifference or neglect in regard to sending their children to school. And from such schools have come many of the most eminent men in the State in every branch of material, industrial, and educational progress. Statesmen whose fame shed luster on the historical records of New York, commercial magnates, who have contributed no small share toward making this the Empire State, distinguished lawyers and jurists, legislators and eminent physicians have each received their first training in rural district schools. Many persons who have gained literary celebrity, masters of science and art and world-famed inventors have received their earliest impressions, and in some cases their only instruction, at the common district school, that humble, unpretentious schoolhouse by the country wayside. Thence also comes the sturdy yeomanry of the State, the farmer and mechanic, upon whose industry and patriotism the welfare of our State so largely depends. Those modest educational nurseries of the great masses of the sterling people, where alone they can hope for their school privileges, since the pressing necessity of earning a livelihood obliges many to quit even the elementary school for daily work, should be fostered and cared for with tenderness and protected with the utmost diligence and encouragement.

SCHOOL TERM.

The law, placing the minimum number of days which schools must be in session at one hundred and sixty to entitle them to share in the public money, is having an excellent effect. The penalty attached to a violation of this law, that of withholding the public money by the superintendent from districts which fail to have one hundred and sixty days of school during the year, removes nearly all danger of nonobservance. The legal term has been fixed at a reasonable limit, for no school kept open for a shorter period should be regarded as having done justice to the school population of such a district. The new law also forbids the custom of holding school on Saturdays in order to make up for lost days to complete the required term—a pernicious practice, obnoxious and irksome to both pupils and teacher. In order to make schoolwork pleasant and profitable to those in attendance it must be interspersed with a reasonable amount of time for rest and recreation. An attempt to crowd six days of continuous schoolwork into the week to shorten the school period or to make up for time unnecessarily lost, is calculated to injure instead of to benefit those on whom such a burden is imposed. The most approved methods recognize a fair proportion of time for the rest of the mind and the exercise of the body. It is no longer considered the true province of the teacher to force intellectual growth at the expense of health by neglecting to protect and properly develop the physical part of the child.

TEACHERS—NORMAL SCHOOL GRADUATES—RESULTS OF UNIFORM EXAMINATIONS.

The records show that the whole number of teachers employed during some portion of the year was 32,929, of whom 5,096 were men and 27,833 women, being 16 per cent males and 84 per cent females. * * *

Among the whole number of teachers employed there were 3,177 normal school graduates, of which the cities are credited with 847 and the country and village districts with 2,330. This number is an increase over that of last year of only 140, while

there were graduated during this year 8,247. It seems to me, as it will appear to everyone, that this is a very small percentage employed in the State service from the 11 normal schools, for the support of which the State is so liberal.

The purpose of these normal schools, and the plain intent of the law which provides so liberally and wisely is to train and fit teachers for its educational service. The plan, so far as training is concerned, is a great success, but the policy of securing and retaining their services after they have been trained is something of a failure and disappointment. To carry out the original purpose of the normal school system the increase each year in the number of graduates employed in the State should be many times as large as it is at present, or has ever been. What is the cause of such a small proportion being employed in the State's service, and what is the remedy, it may be asked.

The intent of the State in the establishment of normal schools, and the liberal provisions made for their maintenance can not be considered as directed toward providing teachers for other States and countries. Yet an undue number of applicants for admission to them consists of just such members. They come from various States, even remote, and from foreign countries in some cases, all attracted by the deserved fame of the efficiency of these institutions. These students are, under the law, obliged to pay tuition fees, but such fees are trivial when compared with the great cost per capita of maintaining these schools. The popularity of the normal schools has filled them nearly all to their utmost capacity, and it may happen that applicants from this State may be unable to obtain admission on account of the crowded condition, caused in part by the admission not being confined to applicants of the State. The only law governing admission to these schools is chapter 466 of the laws of 1866.

I would recommend such legislation as would modify the permissive provisions of that law, so that our normal schools may be devoted solely to training and graduating teachers whose residences are within the borders of the State. To secure and retain their services after having been fitted, is another and an important consideration. This is the vital question connected with the system and intent of the law. Fair wages for services of teachers in the public schools is the desideratum. This is the key to the situation. Skilled labor must receive an equivalent for its services, and skilled labor in the schoolroom of its common schools is what the State seeks by training teachers in the normal schools. Their graduates are naturally inclined to seek positions where the best remuneration for services is offered, rather than to accept the starvation wages now being paid by many country, yes, even city, districts; and they, therefore, are forced to seek employment elsewhere. Trustees must learn that they can not obtain the services of good teachers unless they pay them corresponding wages. Teaching is a business, and the laws of equity govern it as such like any other. A skilled and competent mechanic commands and deserves better wages than a novice or a tinker. Until the time arrives when well-trained and efficient teachers are better paid for their work, the State will continue to lose her most valuable teachers and fail to elevate the standard of her schools to a higher plane of excellence.

The reports of school commissioners and city and village superintendents show that the best results in teaching come from the employment of normal school graduates. There should be no obstacle placed in the path of extending such employment to the most remote country districts. The barrier is in most cases the shortsighted and parsimonious management of boards of education and trustees, who regard the teacher as an object of purchase, to be obtained at the lowest terms possible.

When it becomes thoroughly understood in all those districts that the best teacher is the only one calculated to serve their educational interests, there will be a greater demand for professionally trained teachers. Then will the purpose of the State in the founding and supporting of normal schools be carried out to the fullest extent, and those admirable institutions be represented in every district, as they should be.

Normal graduates may be depended upon, as a general rule, to furnish the most advanced theories of education, and able to apply them in the most practical manner, for they receive thorough training, and are not sent out with the seal of approbation until they are fully equipped for their profession.

The number of teachers licensed by the superintendent of public instruction during the year was 1,018, an increase of 119 over that of the preceding year, and the number licensed by local officers was 28,734, a gain of 194.

The agency of the teachers' institutes and the means employed to carry forward the now more complete system of uniform examinations to keep all teachers up to a required standard of qualifications, are producing most excellent results. The good influences of the recent change of the former custom of having the answer papers of candidates for licenses to teach examined by the commissioners in each county, to the present one of having them examined and marked by a committee of disinterested persons at the office of the department, is already being felt throughout the entire State, but the good results to the schools have only begun to develop. This reform, supplemented by the healthful influences of the institutes and teachers'

training classes in all sections of the State, must do much toward providing a more competent corps of teachers in every county. The institute is a school for teachers, in which, under the guidance of the most capable and experienced instructors, they meet for the purpose of an exchange of views, the discussion of methods and system, and to formulate more improved plans of instruction and school management. The uniform examination system, though not perfect in the past, has long since demonstrated its utility by requiring teachers to keep abreast of the progress of public education.

I have found in every part of the State, from personal observation, that both the institutes and uniform examinations produce the very best results in their influence on the teaching force of the common schools. I can not speak too highly, or earnestly also, of the splendid results obtained from the constantly increasing number of teachers' training classes, and the deep interest taken in them, which have been organized in the academies, union, free, and high schools in nearly every county of the State. The liberal appropriations made by the State for this purpose could not be more wisely or profitably expended. They admirably supplement the work of the normal schools and contribute to the common schools a valuable addition to the number of teachers furnished by those schools. With these admirable educational nurseries for the training of persons to become teachers, guarded by the present plan of examinations, our system is bound to hold the foremost rank among all others.

TEACHERS' SALARIES.

The average annual salary for each teacher was as follows: Cities, $707.77; country districts, $306.32; general average, $465.44. Ten years ago the average was as follows: Cities, $682.82; country districts, $262.72; total average, $401.52. The average yearly salary paid to each teacher during the year covered by this report was $20.59 less for the cities and $2.75 more for the country districts than during the previous year. The average weekly salaries for teachers in the cities were $18.06, and for those in the country $8.75, a decrease of 61 cents for the cities and an increase of 15 cents for the country. While it must be acknowledged that the living expenses of the teacher in the country district are considerably less than those of the one employed in the city school, it must be remembered that the responsibilities of the former, his work, the multiplicity of grades, the inconvenient and uncomfortable school accommodations, and the general difficulties surrounding his position, entitle him to a more generous remuneration for his services than he receives. The country teacher seldom has any of the advantages of his city brother in a well-organized graded school, where he has only to carry out the carefully planned, well-matured system which the experience of many years in the same school has furnished him. A new teacher each succeeding year, and often each term, is the rule, and there are but few exceptions in country districts. He has to build up a system out of the most unpromising untrained element, to contend against parsimony, and, in many instances, ignorance and indifference in trustees, of exacting and often exasperatingly dictatorial parents who compose a sort of heterogeneous sub-board of education in themselves, without the least knowledge of what is required for a good school, or the wisdom to confess their ignorance by not meddling with the teacher's methods and discipline. With such environments a country teacher's road is bordered with thorns and full of pitfalls. For services, under such circumstances, the teacher of the average country district school generally receives a compensation of the most meager kind, and, too often, he becomes discouraged with his small salary, and disheartened in his attempt to bring order out of chaos, and in an effort to please everybody benefits nobody, very naturally. This is all wrong. The teacher in the common school in country and hamlet districts should be regarded as one of the most important factors in that community, his labor largely contributing to its welfare and prosperity, and his salary should be equivalent for services up to the highest standard the district can afford. Besides his salary every worthy teacher is entitled to that public recognition, support, and esteem which a high mission honestly deserves. Poor schools are an unerring sign of parsimonious and unprogressive people. There are but few districts in the State that can not afford to pay at least living wages to their teachers, and yet there are many which pay wages equal to those of the ordinary house servant. Districts that are willing to pay fair salaries to teachers and to treat them with the consideration due them will not fail to attract and secure the right kind of instructors, and their schools will advance proportionately. In this enlightened age no one can expect to get along with any degree of success without at least the solid foundation of a good elementary education. The school is exercising far more influence at the present time in every walk of life than in the past period when a liberal education was restricted to the scions of wealth and nobility.

The incompetent teacher is as hurtful to a district as would be the failure of crops or business depression, for he interposes obstacles or robs the rising generation of

the chances of entering the field of industry on equal terms with their neighbors. At a time when dangerous and subversive elements of mankind are abroad in the land, threatening the very foundations of the social and industrial fabric of the nation, it is necessary that the American youth should be fully equipped with educational weapons to preserve our institutions and liberties intact. Those means of defense can not be supplied by a continued practice of parsimony and intolerance on the part of school officers and parents.

SCHOOL COMMISSIONERS.

The office of school commissioner is one of the most important functions in the State system of public instruction. To those officers is intrusted the supervisory care of the rural schools, and it is through their influence and the faithful discharge of their duties that the educational interests of a large portion of the State are progressed or retarded. The development of a proper educational spirit in their respective districts in securing good teachers, obtaining comfortable and convenient school accommodations, comprehensively speaking, the molding of public opinion on a liberal basis for furnishing the best facilities for the youth to obtain a sound, practical education, depends very largely upon their efforts and influence. Their opportunities for doing valuable service to the cause are so numerous that only the most proficient should be selected, those possessing exceptional qualifications for the varied and exacting duties of the office. By law the term of office is limited to three years. This period is too long for an incompetent or unfaithful officer, yet too limited for the faithful and competent one. The reelection of those who have proven their abilities and shown a disposition to do their duty is often uncertain, owing to the numerous chances they have of creating personal prejudice and dislike in the minds of some who look for favors at the sacrifice of duty, and as a result they are subjected to the ever varying changes brought about through the caprice of politics and the bias of individuals. It is my opinion that educational interests would be better served could the tenure of office be made more permanent by the adoption, through legislative enactment, of a standard of qualifications, which should embrace scholarship and a certain number of years of experience in teaching, to be determined by examination, and by making the office an appointive instead of an elective one. * * *

I am of the opinion that the present plan of electing school commissioners might be profitably changed by having them appointed by some competent authority.

I do not think that an educational office charged with such vast responsibilities and scholarly requirements should be left to the mercy of a political caucus or a county convention of professional politicians. The office should be appointive and the appointment should be made by those who are conversant with its duties and responsibilities and who are regarded as true representatives of educational interests. No person can be a good school commissioner unless he or she is educated and is besides interested in the cause of educational progress. Those essential qualifications can not be ascertained at a political caucus or county convention.

UNIFORM EXAMINATIONS FOR TEACHERS.

Important changes have been made in this branch of the department work during the past year. In my last annual report I recommended to the legislature the propriety of making an appropriation sufficient to enable the department to establish a board of examiners for the purpose of passing upon the answer papers submitted by all candidates for commissioners' certificates to teach in this State. The legislature cheerfully complied with my recommendation in this matter, and on June 1, 1894, a permanent board of State examiners was organized. * * * The examining members of this board have all had large experience as teachers and supervisory officers, and have long been actively identified with the educational work of the State.

The experience which these men have and will gain through the steady performance of the work will be of great value in properly determining the value of answer papers. They should not be subject to the frequent changes which political results bring about in administrations, and for this reason they were chosen entirely irrespective of their political faith. This board has been placed on the same nonpartisan basis that our institute board has been for many years.

The four examinations held by commissioners during the year of 1894, after the organization of this board, were attended by 20,000 candidates, and 125,000 papers were submitted by them and passed upon by this board.

This change in the method of determining who are entitled to certificates is one of the greatest reforms that has been inaugurated in our school system for many years. It gives New York the most perfect system of determining the qualifications of teachers that is to be found in any State of the Union. It removes the possibility

of any commissioner exercising unfair discretion for or against any teacher. It has lifted the system of examining and licensing teachers above all considerations except their fitness to enter the service.

The system is now uniform throughout the State except in certain school districts organized under special acts. The questions used throughout the State are prepared at this department and are uniform. Examinations occur on the same dates in every commissioner district in the State. The answer papers submitted by candidates in these examinations are forwarded to this department and examined and marked by the board of examiners, who are removed from all influences of favoritism or personal prejudice. It is consequently fair and just to all. After the papers are examined, a report of the standings of candidates is made to each commissioner, who issues certificates to those who are entitled to them.

The uniform system is of great advantage and convenience to teachers. Under this system a certificate of any grade issued in one county stands for the same value as a certificate of corresponding grade issued in any other county in the State; and a teacher who becomes entitled to a certificate of any grade may receive the benefits to which he or she is entitled under such certificate in any commissioner district in the State without further examination.

By this arrangement the commissioners are justly relieved of a large amount of clerical work, and now have time to visit and supervise the schools under their jurisdiction more thoroughly. The amount of good which they are able to render the schools by proper supervision will more than compensate the State for the additional expense by furnishing the schools more and better supervisory work from the commissioners. * * *

It is gratifying to report that the system is meeting with success from every standpoint, is giving entire satisfaction, and has the hearty support of all the educational forces of the State. Its adoption received the sanction of nearly every school commissioner in the State; and the State Association of Academic Principals, at a recent meeting in Syracuse, adopted a strong resolution indorsing the system and pledging the department its hearty support in carrying it out. The results thus far have more than met our most sanguine expectations. The department is able to report to commissioners the result of each examination previous to the date of the next examination, so that candidates who fail in any subject will have an opportunity to take such subjects in the next examination. * * *

The one thing most needed by teachers in this State is better scholarship. It is impossible for a teacher to teach a subject well without having a thorough knowledge of that subject. Under this system of licensing teachers they must be progressive; they must acquire better scholarship from year to year. A person entering the service for the first time may teach but one year on a third-grade certificate. Should such teacher desire to remain longer in the service, she must obtain a certificate of the second grade—the requirements for which are much broader than for a third-grade certificate. The requirements for a subsequent certificate of the second grade are still greater than for the first certificate of that grade; so that a teacher who desires to remain in the service must be progressive. The adoption of the uniform system of examinations has been the means of sending thousands of young men and women who desired to become teachers to normal schools and union free schools to better prepare for their work. During the past year over 10,000 different persons were refused certificates because they did not have the necessary scholarship. A greater number of first-grade certificates were issued than during the previous year. The Department has, in every way possible, encouraged teachers to procure first-grade certificates, and has also encouraged teachers of that grade to remain in the service by renewing their certificates from time to time for a period equal to that which they have taught under such certificates. All commissioners know of many successful teachers in their respective districts who could easily procure certificates of this grade by pursuing the required course of study for one year, and I earnestly recommend that commissioners and supervisory officers urge all their live, progressive teachers to enter the first-grade examinations during the ensuing year.

THE TRUANT LAW.

The new compulsory educational law, which went into effect at the beginning of the present calendar year, has been hailed by all friends of education as one calculated to bring most excellent results for the benefit of the community at large. The State is bound by considerations of the most potent kind—its own interests and welfare—to provide all the children within its limits a good and liberal education, and to reasonably enforce such provisions when necessary.

Ignorance is one of the most dangerous foes of any commonwealth, and a fruitful source of evil in the smallest community. Recent events, not only in European countries, but in our own, admonish us as a people to guard against the most dangerous elements that are appearing in our midst. When anarchy, socialism, and communism

are openly taught and advocated, it behooves the State to use its most efficient means, the most effective weapon at its command—the education of the masses. Respect for law and order is the chief object aimed at by the State in furnishing free public education. The compulsory education law makes it a duty to the State on the part of parents and those in parental relations to send their children to school for a reasonable length of time to make them intelligent, and to fit them to become law-observing and good citizens. In our large cities, particularly, which are composed of mixed nationalities, there is great necessity of educating the cosmopolitan so that he may be able to understand our laws, and the most beneficial results must follow from the faithful execution of this order of the State. Any measure rescuing thousands of children from the dangers of crime and vagabondism incident to the streets, abolishing idleness and loafing, by substituting for such temptations the influences of education, can not fail to benefit the commonwealth.

The new truant law is not perfect, yet it is much better than the old one. It will need to be revised in some particulars to become well adapted to its purposes. It is new, and to some may seem arbitrary and offensive, yet its aims are right and should be wisely and honestly supported. It may be made ineffective and odious without the hearty cooperation of each community or by unwise execution of its provisions. School districts (cities in particular) must first place themselves in proper conditions to provide for its enforcement before all its functions can be fully exercised. It is folly to attempt to compel children to go to school unless there are ample school accommodations. It is a notorious and lamentable fact that in some of our large cities the school accommodations are far short of the capacity that is demanded by those seeking admission voluntarily. This is the greatest hindrance to the immediate enforcement of the truant act. The remedy can be obtained only by furnishing additional school room. It seems not only equitable, but necessary, that steps be taken to supply such deficiency, and that as promptly as possible. School accommodations are, as a general rule, by no means commensurate with the demands of cities at any time, for the reason that provisions are not made in time to meet and keep pace with their constant and rapid growth. Growth in school population should be anticipated somewhat, and school buildings provided beforehand. A liberal, well-regulated plan can remedy this constant lack of school room in large cities, and I think that the legislature should enact laws to compel more prompt action in some of our municipalities in furnishing ample and proper school buildings for all their children. Until the necessary accommodations are provided, the present law can not be adequately and justly enforced.

Under the circumstances the duties of truant officers call for the exercise of considerable good judgment and delicacy of treatment.

It is very easy for them to make the law obnoxious, and even tyrannical, by inconsiderate action and harsh interpretation of their duties. I believe the law should be at first enforced moderately and with wise and due consideration of contingent circumstances. Go slowly until the benefits are appreciated.

Officers should always bear in mind that every child is a ward of the State, in an educational sense, and should never be regarded as a criminal when simply discovered as a truant. Firmness should be united with gentleness, discrimination with circumstances. A thorough knowledge of the family circumstances in each case should be obtained, and then a considerate and tactful application of the law should be decided upon to make the truant officer effective and respected and the law popular.

NORTH DAKOTA.

[From the report for 1893–94 of Mrs. Laura J. Eisenhuth, State superintendent of public instruction.]

THE COMMON SCHOOL.

We have just cause to be proud of all our schools, but especially so of the schools in the rural districts. In the thinly populated country districts, far from traveled centers, we have teachers of superior intelligence and culture who are working with enthusiasm and self-sacrificing spirit seldom equaled, displaying great professional pride in small schools with no greater attendance than six to ten pupils, and doing all in their power to raise the standard of education in their vicinity. And this is as it should be; from the country districts should come our best citizens, physically, mentally, and morally. And this being a State largely of rural interests, it is of no small moment that her country schools should take high rank. But high as they rank now, and favorably as they compare with the same class of schools in other States, they have need of improved facilities in order that they may accomplish all that is desirable that they should. They need a means for scientific physical development. We obtain this now with but little argument in city and village schools, but in the country schools we are met by the statement that they have chores and work which give plenty of exercise, and which is true in part; but work, especially in

youth, develops only one set of muscles and faculties, and exercise undirected may do more harm than good in a growing child. Work without scientific muscular exercise will produce the stooped shoulders, narrow chests, large joints, and slouching gait which detract so materially from the social as well as physical achievements of after life. Scientific muscular training gives the quick eye, the skillful hand, the strong, flexible, and enduring physical being, perfect in development and obedient to the will, possessed of the grace that comes only from ease and strength. From our rural districts come our best statesmen and business and professional men. They should come as nearly perfect as physical training can make them, and if they never leave the farm, what calling has more need of physical strength and endurance? They need a system of manual training, a course of civics, political economy, and agriculture. With the magnificent endowment of land and the large fund already at their disposal, they should be well equipped with apparatus, libraries, gymnasiums, and all the means to develop every quality we require in a citizen. More attention should be paid to making the school house and grounds more homelike, in order that they may inculcate by example the essential elements of thrift, neatness, beauty, and love of home which are the very foundation of patriotism and good citizenship.

COMPULSORY EDUCATION.

Our compulsory-attendance law is almost a dead letter. It is not impossible to enforce the law as it now stands, but it seldom is enforced, and then almost always as a means of personal revenge upon a neighbor. One neighbor will not complain of another, and if he does his motive is misconstrued. It is a weak law that places responsibility upon anyone who may please to take it up, or is inoperative if no one chooses to incur the anger of a neighbor. A compulsory-attendance law is no hardship (with free text-books), but a just and wise measure on the part of the State to protect society and perpetuate enlightened self-government. A parent, no matter how straitened the circumstances, does a child a great injustice who prevents a thorough training in youth for the battle of life. What is a dollar saved or earned to-day by forcing immature intellects and bodies into the "bread-winning acts," if the whole after life of that child is marred and cramped by reason of that forcing? Thorough preparation in youth is the only economy of time in life work, and if parents do not realize this, the State must, and compel every child to take, according to ability, the necessary training for industrious, successful, and intelligent living.

There are 2,375 children who did not attend any school during the year ending June 30, 1892, and 2,139 who did not attend any school in 1893. While many of this number may be detained by sickness, and some are not within the two and one-half miles limit, and more are detained by the circumstances of their parents, being obliged to aid in gaining a living, another and perhaps greater part are growing up in ignorance, depriving our schools of their present support and the future society of a culture they should have attained and would not, and the State of the skilled labor and intelligent support it has a right to demand of every citizen, without valid excuses, simply from indifference and lack of ambition.

The law should be so changed as to have the teacher furnished with a list of all pupils enumerated in the district, and have him report at the end of the term all pupils that have not attended the required twelve weeks (six weeks of which must be consecutive) and the district be deprived of the pro rata apportionment for every pupil of required age not attending and not excused under the safe provisions of law. The amount so forfeited should be returned to the State treasury at the end of each school term. As such a law would affect the entire school district, it would, I am confident, operate toward a more general and regular attendance, and be eminently just.

HEALTH OF PUPILS.

The mental achievements of life and the moral status gained by any individual are dependent upon the perfection of the physical being. The ablest reformatory institutions of the world are now acting upon this truth and diseased minds and morals are now known to be the result of some physical cause and are so treated. The foundation of disease, the tendency to which is not inherited, is in 95 per cent of cases laid before the age of 20 years, and 98 per cent of that number can safely be placed at the door of the poor sanitary conditions of homes and schools, and carelessness or ignorance upon the part of parents and teachers. No race of people can be mentally strong that are not morally and physically strong. In this age of inventions and machine labor one must not only be mentally active and able, but must be physically perfect to endure the great strain laid upon even the humblest in earning an honest living. Our schools must not only give this physical development, but must counteract the unhealthful influence of unclean homes. Chicago this year took one of the most progressive steps toward a better civilization of the masses

that has been taken in many a year, when she put in bath tubs in all her public schools. While we are not ready for that yet in country districts, our cities and more advanced villages are, and I recommend that it be done as soon as possible. It can be done where there are waterworks at very little expense. The great objection is always—we may offend the parents. Tact will introduce it as a luxury, a public comfort and benefit, a privilege of modern times which places us in a sanitary sense on a footing with the best Grecian civilization.

Our schoolhouses in a majority of district schools have been built without regard to ventilation. The one thought has been to keep them warm, and as a result the children sit through the winter term with hot heads and cold feet, breathing in vitiated air, until it is a wonder that they are able to accomplish anything, and that their health is not entirely ruined, instead of only impaired, and seed germs laid for a harvest of future suffering. It is imperative that a plan of a one-room building, lighted, heated, and ventilated properly, be furnished by the State, and that school boards be compelled to build all new schoolhouses according to this plan and as soon as possible to rearrange the old buildings so that they can be properly heated, ventilated, and lighted. Fifty children in one room require 100,000 cubic feet of air each hour. To properly seat 50 children it requires 800 feet of floor space. The light must be arranged to come from the left of the pupil when seated, and must not strike a white or highly-reflective surface. Slate blackboard gives the best satisfaction for the eyes, but if that can not be afforded (it is the cheapest in time), in no case use paint on a hard-finished surface; more eyes are ruined by the reflection of light than by the direct rays. Poor eyesight in children is becoming all too common. Visit any school and you will find little children wearing glasses—constitutional weakness in some cases, we grant, but more often abuse of nature in this generation.

Wardrobes should be so placed that they can be ventilated. Stand in a hall when a class of children are passing through with their wraps on and detect the foul odors as they pass and you will be convinced that it is a serious mistake to have dark, close cloak rooms in our schools. If all the children came from clean, well-ventilated homes this would be a serious mistake, for the children take active exercise and their wraps are permeated with the gases from their bodies and should be aired when taken off. But in every public school we have some children whose clothing smell of the cooking done at home, or of the medicines and sick room if there is illness, and this is a menace to the health of all whose garments hang in the same unventilated room. The entrance steps should all be vestibuled to prevent ice from forming on them, as icy steps are dangerous and many a person has gone through life crippled from a fall on them. Stairs should not have more than a 5½ to 6-inch rise. A child throws his whole body out of position in climbing the usual stair that is easy for a grown person. Foot-warmers in the lower halls of buildings heated by other means than stoves are an excellent thing and save the timid from much suffering.

A wise supervision of the school-yard games is also needed, not only for the health of the pupils but their morals. I would not hesitate to recommend the no-recess plan in this connection were it not for the fact that in some schoolhouses the only way to ventilate thoroughly is to have recess and open windows and doors, and I question if even in such cases it would not be better to have an active and vigorous calisthenic drill and march while this was being done.

FREE TEXT-BOOKS.

I am pleased to report that public sentiment in favor of free text-books has grown in the two years from interest to enthusiasm on the part of the educators. In many counties it has already been tried, although we have no law on the subject, but the sentiment of the people warranted it, and in every case it has been a great improvement over individual purchase, and where a few in some districts were opposed to it, after a trial they have been completely won over and declare they would not go back to the old system. It has materially cheapened the cost of books, and has made county uniformity possible. Where two years ago the educators of the State were divided upon the subject, and partly indifferent, or looked upon it as too great an undertaking, they are now united, determined, and in earnest, and have done much to educate the people, which gives me hope that this legislature will pass an excellent free text-book bill. I would advise that it be so arranged that it admit of two or more supplementary readers for each grade, and that it supply at least three books to be used by the teacher in giving additional work in history, language, civil government, mathematics, geography, etc. Volumes might be added in argument for this measure. But eloquence of tongue or pen, while it might embellish and render more attractive, could not make more plain the simple truth that humanity, the times, and God demand that every source for the enlightenment of the people be free.

That the institution of public education is not free to all classes alike until the text-books are free, until the child of the poor, hard-pressed laborer, the orphan

depending upon charity for clothing and food, the child of misfortune, can have in their hands books as good and as varied as the child born in better circumstances, but thanks to this free Government not born to greater destiny.

KINDERGARTEN.

I would respectfully recommend that a kindergarten be established in connection with every public school in villeges of 300 inhabitants and over. That the teacher be an experienced kindergartner, and governed by a separate law for qualifications as teacher.

That she be not compelled to pass the examination for county certificates as other teachers are, but hold a certificate of graduation from some reputable institution for the training of teachers in kindergarten principles, and that this diploma be countersigned by those in authority to issue State certificates, and that she must have recommendations of at least one year's successful experience as a teacher of a kindergarten school, signed by the county superintendent of the county where the experience was obtained.

That she be employed to assist at county institutes and aid in training the country teachers in the principles and kindergarten methods, and that the school age of children in this State be changed so as to admit children of three or four years into the country districts for the summer term, where there are or can be obtained, proper facilities to teach them, and proper seats to accommodate them. That the material necessary for kindergarten teaching be furnished by the district, and the teacher be paid from the common-school fund, as other teachers are.

At a recent prison association held at St. Paul, where the best known and ablest prison men and penological students of the United States were present, President Brinkerhoff, of Ohio, cited the schools as one of the best means of preventing crime, and stated that, "if our schools would do all that they could do the swelling river of crime would dwindle to a rivulet in a single generation," and said that the schools took the children too late in life, giving an earnest plea for better education and kindergarten schools. I quote him to show that others beside educators believe that in education lies the solution of the problems that are vexing the social and political worlds. Our kindergarten schools, to be effective in elevating the masses, must be free. They are necessarily expensive when undertaken as a private enterprise, and only those well to do in life can afford to send their children to them. They could be run to a very much greater financial advantage as a part of our public-school system, and could reach all classes. And what a boon to the laboring mother, who leaves her helpless little ones while she earns their scant clothing and living, fear for their safety adding to her over-burdened hands the haste of anxiety. And what a difference to their after life must be the comfortable room, the sweet songs, the just treatment, the lively games, wisely directing little hands and feet into ways of beautiful usefulness through the avenues of play. I trust that North Dakota will lead the States in taking this progressive step. She has done much, but where much is given much in time will be returned.

OHIO.

[From the report for 1893-94 of Hon. Oscar T. Corson, State school commissioner.]

THE TOWNSHIP SYSTEM.

Comparatively few changes were made in the school laws of the State at the last session of the legislature. Several attempts were made to repeal the law providing for the more efficient organization of common schools in township districts (commonly known as the Workman law), which went into effect April 1, 1893; but no changes of any kind were made in its provisions, and it remains as originally enacted. It is now confidently believed that this very important law, the main features of which have been recommended by all the leading schoolmen of the State for the last forty years, will have a fair trial. It is, perhaps, imperfect in some respects, but its friends still believe that it is correct in principle, and that if it be enforced in the proper manner good results will follow. The fact that some boards of education have refused to be governed by either the letter or the spirit of this law is no argument against its efficiency when its provisions are carefully followed.

It may be true that in some townships the schools are controlled, to a certain extent, by the "one-man power," the board authorizing the director of each district to select his teacher, but such action is made possible only by the violation of the plainest provisions of the law. There certainly can be no misunderstanding of the language of section 3982, which reads as follows:

A majority of the board of education shall constitute a quorum for the transaction of business. Upon a motion to adopt a resolution authorizing the purchase or sale of property, either real or personal, or to employ a superintendent, teacher, janitor, or other employee, or to elect or appoint an

officer, or to pay any debt or claim, or to adopt any text-book, the clerk of the board shall call, publicly, the roll of all the members composing the board, and enter on the record required to be kept the names of those voting "aye," and the names of those voting "no;" if a majority of all the members of the board vote "aye," the president shall declare the motion carried; and upon any motion or resolution any member of the board may demand the yeas and nays, and thereupon the clerk shall call the roll, and record the names of those voting "aye" and those voting "no."

The recent decision of the supreme court that the provisions of this section are mandatory, and not simply directory, makes it imperative on all boards of education to follow the letter of the law in the election of teachers or other employees.

Of course a committee on teachers appointed by the board of education, or the director of a subdistrict, may make recommendations to the board; but no teacher or other employee can be legally elected except at a meeting of the board of education, by a majority vote of the entire board, after the manner directed in section 3982.

The fact that the salaries of teachers have been reduced in some townships can not justly be charged to the operation of this law; in other townships, under the same law, the salaries have been increased. It is also very evident to everyone that the hard times have naturally brought about reduction in expenses. Economy is the watchword of the day, and, in too many instances, this economy begins and ends with a reduction of teachers' salaries—the last place where it should begin and the first where it should end. The fact that similar reductions have been made in several of our towns and cities, which are not controlled in any way by the provisions of this law, is good evidence that it is not responsible for such reductions. The fact is that reports received at this office indicate that in the State at large there has been no reduction in the average wages paid to teachers of the subdistrict schools, but, on the other hand, a slight increase. In 1893 the average monthly wages paid to teachers of these schools were: Male, $37; female, $28; in 1894, male, $37; female, $29.

While there is some evidence of the failure of this law to bring about the best results on account of the failure to enforce its provisions, on the other hand there is abundant evidence that it is accomplishing great good where it is carefully executed. Many townships have, within the past year, adopted a course of study for the first time, and have made a more complete organization of their schools, which must result in more efficient work. Reports received at this office indicate that at least 150 townships have elected superintendents, and many others are contemplating similar action. Last year 125 superintendents were reported, and the increase of 20 per cent this year over last year is very encouraging. It is most earnestly hoped that all friends of education, whether friends of this law or not, will unite in giving it such a fair trial that its merits, whatever they may be, can be fully tested, and that its faults may be so clearly shown that amendments can be made to correct them.

COMMON-SCHOOL GRADUATES' EXAMINATIONS—BOXWELL LAW.

The Boxwell law was so amended as to provide that pupils residing in one county and desiring to attend a high school in any adjoining county shall be examined in the county in which the high school which they wish to attend is situated; also that the examinations provided for under this law shall be held on the first Saturday of March and April, or of April and May of each year. Out of 1,347 townships in the State, 722 sent applicants to the examination; that there were in all 4,653 applicants, and that 2,289 passed.

The number of failures in the great majority of the counties indicates that the questions were of sufficient difficulty to insure that the successful applicants are prepared for the high-school work, but the fact that in a few counties all, or nearly all, of the applicants were successful creates the suspicion that the examiners may not have been as diligent in the performance of their duty as the good of both the schools and the pupils demand. This law is, in my judgment, doing more for the betterment of the subdistrict schools than any other single measure ever enacted in the State, and its continued success in the future depends very largely upon the wisdom, fairness, and firmness of the county examiners in conducting the examinations held under it. The questions should be fair and the grading reasonable, but any examination which will result in the wholesale passing of applicants, whether worthy or not, must necessarily bring into bad repute this very excellent law.

SCHOOLBOOK LAW.

The schoolbook law, passed May 4, 1891, has proved itself to be one of the most satisfactory in the history of the State. Since the prices fixed by the State board under this law are about 35 per cent less than the retail prices existing prior to its enactment, it can readily be seen that there has been a large saving to the State in the cost of books without any deterioration in their value.

The provision in this law that books after being adopted can not be changed for five years except by the consent of three-fourths of all the members of the board,

given by formal action at a regular meeting of the board, is wise in that it renders changes without good reasons almost impossible, while at the same time it empowers the board to change any book which may have been adopted through a mistaken idea as to its real merit, and whose trial has proved it to be unsatisfactory.

The "optional free text-book law," passed at the last session of the legislature, is a very valuable addition to this law. It provides that any board of education in the State may furnish the necessary school books free of charge, and pay for them out of the contingent fund at its disposal. It also provides for such additional levy each year as may be necessary to meet this expense. The books so furnished are considered the property of the district, and are loaned to the pupils on such terms and conditions as the board of education may prescribe.

The passage of a law similar to that which I have just outlined was recommended in my report for 1892, and I am still of the opinion that each community in the State should be permitted to dispose of this question as it may deem best. In those districts in which the sentiment of the people is in favor of free books, and the financial condition is such as to admit of it, the wishes of the people can be gratified; while, on the other hand, those districts not desiring free books or not able financially to purchase them are not compelled to do so.

The first two cities to take advantage of this law are Toledo and Tiffin. In reply to a letter of inquiry Supt. H. W. Compton, of Toledo, says:

> The free text-book plan is working very well with us and giving general satisfaction. The books cost the general public less than under the old plan.

Supt. J. H. Snyder, of Tiffin, gives the following valuable information concerning the operation of the law in his city:

> Number of pupils in Grades I, II, III, IV, and V, 970. Cost of books in these grades, $457.04. Number of pupils in Grades VI, VII, and VIII, 420. Cost of books for same, $516.43. Number of pupils in high school, 220. Cost of books for high school, $650.61. Total number of pupils, 1,610. Total cost of books, including cost of book covers, freight, and boxing, $1,651.35.
>
> As these figures show cost of books at State contract prices, which are 75 per cent of list prices at which books were retailed before the schoolbook law was enacted in 1891, the books necessary to supply our schools would have cost, under the method of supplying schoolbooks prior to the passage of that law, 33⅓ per cent more, or $2,201.79.
>
> Our regulations concerning the care of books loaned to pupils contain one which requires pupils to purchase books damaged by them through carelessness or willfulness. Thus far three books have been sold to pupils under that rule. An inspection of all books at the end of the third month shows them to be in very good condition, and with the same care I believe books will last at least four, if not five, years. I am a firm believer in the wisdom as well as the economy of the free book law.

The statements made by Superintendent Snyder regarding the cost of books will no doubt apply, in the main, to the State at large, and hence are of value to every person interested in the public schools. They show that the average cost of furnishing books per pupil, in the entire school at Tiffin is, under the present contract, $1.03. Making allowance for the fact that probably one-fourth of the school was supplied by old books donated by the pupils, it will be readily seen that the actual cost per pupil is about $1.40. If the books last four years—the minimum time given—the average annual cost per pupil will be 35 cents; if for five years—the maximum time given—the average cost will be 28 cents.

WOMAN SUFFRAGE IN SCHOOL AFFAIRS.

By the provisions of the new law, passed April 24, 1894, women are now entitled to vote and be voted for for members of the boards of education. On account of the great importance of this measure it is here published in full:

> SECTION 1. *Be it enacted by the general assembly of the State of Ohio:* That every woman born or naturalized in the United States, of the age of twenty-one years and upward, who shall have been a resident of the State one year and of the county, town, township, or other election district such time as the law provides for men preceding any election held for the purpose of choosing any school director, member of the board of education, or school council under the general or special laws of the State, shall be entitled to vote and be voted for at such election for any such officer or officers.
>
> SEC. 2. A separate box shall be provided for the ballots for those voting for any such office mentioned in section one of this act.
>
> SEC. 3. All laws relating to the registration of voters shall apply to women upon whom the right to vote is herein conferred: *Provided*, That the names of such women may be placed upon a separate list.
>
> SEC. 4. That all acts or parts of acts in so far as they are inconsistent herewith are hereby repealed.
>
> SEC. 5. This act shall take effect and be in force from and after its passage.

Since the enactment of this law several special elections for school directors have been held in the State, and in one district at least the entire membership of the board is composed of women. Believing that a knowledge of the operation of similar laws in other States would be valuable, a circular letter was sent to each of the State superintendents of schools, asking whether such a law was in existence or not, and if so, what was its effect on the schools of the State.

Replies have been received from 30 States. In 10 of these—Alabama, Arkansas, Delaware, Georgia, Missouri, North Carolina, South Carolina, Tennessee, Virginia,

and West Virginia—women are not permitted to vote on any question connected with the management of schools.

In Connecticut—

Every woman who shall have attained the age of twenty-one years, who shall be a citizen of this State or of the United States, and who shall have resided in the State one year and in the town for six months, and can read the English language, shall have the right to vote at any meeting held for the purpose of choosing any officer of schools or for any educational purpose under the general or specific laws of this State.

The State superintendent of Illinois writes as follows:

For several years—since 1873—women have been eligible to any public school office in the State of Illinois. The effect of this law has not been marked. School affairs, in the aggregate, have not been materially changed by it. In 1891 an enactment was passed which gives women the privilege of voting for all school officers except those named in the constitution of the State. Its operation is of such recent date that comparatively few women have yet voted, and I am unable to predict with certainty its exact effect on the schools.

In Indiana school trustees in the cities and towns are appointed by the city or town council, and the law provides: "Any woman, married or single, of the age of 21 years and upward, and possessing the qualifications prescribed for men, shall be eligible to any office under the general or special school laws of this State." The attorney-general holds: "There is a serious doubt whether the statute itself is constitutional," and the State superintendent writes:

I know of but one woman who holds a position as member of the board of city or town. Women have, in a few instances, asked for such position, but I know of only the one case in which a woman was appointed by the council.

In Iowa, in 1876, the following provision was added to the school law: "No person shall be deemed ineligible by reason of sex to any school office in the State of Iowa," and on April 13, 1893, a law was enacted providing: "That in any election hereafter held in any city, incorporated town, or school district for the purpose of issuing any bonds for municipal or school purposes, or for the purpose of borrowing money, or for the purpose of increasing the tax levy, the right of any citizen to vote shall not be denied or abridged on account of sex, and women may vote at such elections the same as men under the same restrictions and qualifications."

The State superintendent of Kansas says:

Kansas has had for a number of years a law permitting women to vote and be voted for for members of school boards. No objections have ever been raised against their voting. The mother, having a more tender feeling for her offspring, has been brought in contact with the workings of the schools, and as a result her interest has gone out from the home to the school, and consequently the schools have been made better.

In Kentucky, at the election for district trustees, the laws of that State provide: "Any widow having a child between 6 and 20 years of age or any widow or spinster having a ward between the ages of 6 and 20 years may also vote." The State superintendent says:

It is held by this department that any woman who can vote for district trustees can hold the office of trustee or of district treasurer. You will note that even in this case woman suffrage is limited, and the exercise of the power is so little insisted upon by even those who have the right to vote and hold office that I am unable to give you any definite opinion as to its effect upon the common schools.

The State superintendent of Louisiana writes:

Women are allowed by the constitution of this State to hold any office of control or management under the school laws of the State. They are not permitted to vote for officers, however. We find that wherever women hold offices of trust and responsibility they are scrupulous and careful public servants. Whether this is because being unused to administrative positions they fear the results of mismanagement, or that unused to having the control of large sums of money they attach a greater value to it than men, or that moral impulses impel them to watchfulness, it is certain that they perform all duties conscientiously and zealously. As members of the school boards they are always good economists, and see that each expenditure is fully warranted by the needs of the schools.

In Maine the school law provides for the election in each town at its annual meeting of a superintending school committee of from three to seven persons. One clause of this law reads as follows:

No person is ineligible to the office of superintending school committee on account of sex.

The laws of Massachusetts provide "that no person shall be deemed to be ineligible to serve upon a school committee by reason of sex," and the secretary of the board of education for that State says:

The general effect of the service of women on our school boards has been excellent. They, however, do not generally avail themselves of that feature of the law which permits them to vote for members of school boards. In a few communities school questions of unusual interest have sometimes brought them out as voters in large numbers. As a general rule, women may be regarded in Massachusetts in their relation to voting for the school committee as a kind of reserve force that seldom goes into action. Those that vote are generally strong and thoughtful characters from the better classes.

The Michigan law [says the State superintendent] gives to women the same rights as men possess as to voting and holding of school offices. No intelligent man in Michigan, who has the best interests

of our schools at heart, and who has had an opportunity to know of the workings of our school system, has any desire to deprive women of this right. In many localities women attend the school meeting and take an active part, and in many instances their work and influence have done much good.

In Minnesota women are permitted to vote on all matters pertaining to the management of schools, and also to hold any office which has to do solely with their management. The State superintendent writes:

There are at present about 15 lady county superintendents. In one of our counties a lady who has held that office for ten years, I think, did not receive a single adverse vote this fall. In several of our cities, ladies have been members of boards of education, and so far as I know, have shown good business qualifications and have exerted an elevating influence upon the school boards and the schools themselves.

Under the Nebraska statutes women are on just the same footing as men as to voting and being voted for for members of school boards. The superintendent of that State says:

A considerable proportion of the membership of school district boards, both in country and city districts, is composed of women, and we find their work as such as satisfactory as the work of men occupying similar positions.

The State superintendent of New Jersey gives the following information:

The legislature of New Jersey passed an act in 1887 authorizing women to vote at school elections. We have acted under this law up to the present time, and it has proven very satisfactory. The question as to the constitutionality of the act was raised for the first time this year, and our courts have decided that the constitution limits the franchise to male voters, and, therefore, in the future, women will not be able to vote for the election of school officers. On all other questions that arise at school meetings they may still vote. Women have been eligible as members of local school boards in this State since 1870. A number of our districts have elected women to office, and they have proven themselves capable and energetic officers.

The deputy State superintendent of New York says:

In this State every person of full age and possessed of certain qualifications prescribed by statute, is a qualified voter in our school districts for school officers. I do not know that the provisions of our statutes allowing women to vote, have had, in general, any serious effect on the school interests of this State.

The laws of Oregon contain the following:

Women who are widows, and have children to educate and taxable property in the district, and who have resided thirty days in the district, shall be entitled to vote. A woman over the age of 21 years, who is a citizen of the United States and of this State, shall be eligible to all educational offices within the State.

The constitution of 1873 of Pennsylvania provides: "Women 21 years of age and upward shall be eligible to any office of control or management under the school laws of this State." The State superintendent says:

There are probably 40 women now serving as school directors. There are 2 county superintendents and 1 borough superintendent.

The State superintendent of Vermont says:

For six years we have had a law in this State giving women the same right as men to vote for school officers and hold school offices, but the provision has had no particular effect upon our schools, for the women have not availed themselves of the right, except in a few instances when some local issue has been agitated.

The State superintendent of Wisconsin says:

In this State every woman 21 years of age, a citizen and a resident of the precinct, may vote at a school meeting on all propositions that may legally come before such meeting. Women may also be elected or appointed as directors, treasurers, or clerks of school districts, directors or secretaries of town boards, members of boards of education in cities, or county superintendents. As a rule, they have made efficient officers, and the State and the school system have certainly gained by the extension of these privileges to women.

"Equal suffrage" is the law in Wyoming. Through the kindness of the superintendent of that State, I have been furnished with the following, expressive of the views of Mr. Groesbeck, chief justice of the supreme court of the State of Wyoming, on the effect of woman suffrage in that State:

1. It has been weighed and not found wanting. Adopted by a statute passed by the first legislative assembly of the Territory in 1869, and approved by the governor, it has continued without interruption and with but one unsuccessful demand for the repeal of the law. The constitutional convention which assembled in 1889 adopted the equal-suffrage provision and refused to submit the question to a separate vote by a large majority. The continuance of the measure for nearly a quarter of a century and the determination to incorporate it in the fundamental law, even at the risk of failing to secure statehood, are the strongest arguments of its benefits and permanency.
2. It has tended to secure good nominations for the public offices. The women, as a class, will not knowingly vote for incompetent, immoral, or inefficient candidates.
3. It has tended to make our women self-reliant and independent, and to turn their attention to the study of the science of government—an education that is needed by the mothers of the race.
4. It has made our elections quiet and orderly. No rudeness, brawling, or disorder appears or would be tolerated at the polling booths. There is no more difficulty or indelicacy in depositing a ballot in the urn than in dropping a letter in the post-office.
5. It has not marred domestic harmony. Husband and wife frequently vote opposing tickets without disturbing the peace of the home. Divorces are not as frequent here as in other communities, even

taking into consideration our small population. Many applications for divorces are from those who have a husband or wife elsewhere, and the number of divorces granted for causes arising in this State are comparatively few.

6. It has not resulted in unsexing women. They have not been office seekers. Women are generally selected for county superintendents of schools—offices for which they seem particularly adapted; but they have not been applicants for other positions.

7. Equal suffrage brings together at the ballot box the enlightened common sense of American manhood and the unselfish moral sentiment of American womanhood. Both of these elements govern a well-regulated household, and both should sway the political destinies of the entire human family. Particularly do we need in this new commonwealth the home influence at the primaries and at the polls. We believe with Emerson, that if all of the vices are represented in our politics some of the virtues should be.

It will be noticed from the above summary that two-thirds of the States making reports have laws giving to women either the right to vote for members of boards of education or to serve as members of such boards, or both; also that in these States, in the great majority of instances, such privileges have resulted in good to the schools.

It is hoped that the women of Ohio will take advantage of the power granted them under the new law, and aid in removing from the management of the public schools that narrow partisanship which, in some localities, is their greatest curse.

EXAMINATION OF TEACHERS.

It is very gratifying to the progressive teachers of the State that the bill proposing to grant certificates for five years, without examination, to applicants who have had ten years' experience did not become a law. It is no doubt true that there are teachers in nearly every county of the State whose successful experience is such as to prove beyond question that they are deserving of special recognition, and having given evidence of good scholarship at different examinations, should, perhaps, be granted certificates without being asked to answer the regular list of questions, or, having reached a certain grade in the common branches, should be permitted to substitute for these branches some of the higher ones. In such instances county boards of examiners, under the present law, can act legally, and should act in such a manner as to encourage successful and progressive work on the part of teachers; but to grant immunity from examinations simply on account of length of experience would be a very dangerous precedent, and would, in many instances, do far more to encourage indolence and laziness than to reward progressive teaching and faithful work. Everyone knows that there are teachers in Ohio who have been pretending to teach for ten, or perhaps twenty years, and who are not as well informed to-day as when they began; and while it is the duty of every board of examiners to know the successful teachers of their county and to give them every encouragement, it is also their imperative duty to rid the profession, just as rapidly as possible, of that class who will not work themselves, and hence are entirely unfitted for progressive work in the schoolroom.

Liberality for the hard-working, earnest, successful teacher, but strictness for the lazy, indifferent, unsuccessful one should be the motto of every county examiner in Ohio.

PUPILS' READING COURSE.

There is no more important branch of study taught in the public school than reading. In fact, it is the key to all other branches, and should receive most careful consideration by both teachers and patrons of the schools.

Section 3995 of the school law provides:

> In any district the board of education may appropriate money from the contingent fund for the purchase of such books, other than school books, as it may be deemed suitable for the use and improvement of the scholars and teachers of the district, and in the purchase of philosophical or other apparatus for the demonstration of such branches of education as may be taught in the schools of the district, or for either of such purposes; but not more than one-half of the amount herein authorized to be appropriated shall be expended in the purchase of such apparatus; such appropriations shall not exceed, in any one year, twelve hundred dollars in city districts containing cities of the first grade of the first class, three hundred dollars in other city districts of the first class, one hundred and fifty dollars in city districts of the second class, and seventy-five dollars in other districts; and the books so purchased shall constitute a school library, the control and management of which shall be vested in the board of education. The board of education of any city of the second class, fourth grade, having a free public library organized, in pursuance of law, may allow such free public library association the use and control of the public school library, subject, however, to such rules, regulations, and restrictions as said board of education may prescribe for the use and control thereof.

In many communities of this State there is no public library, and thousands of children who are not so fortunate as to have libraries in their homes leave school with no fixed habits of reading good books, and hence fall an easy prey to the vicious literature which will, in all probability, be brought to their attention in some way. The State can not afford to have its children grow up in ignorance, and hence provides the means of education and compels attendance at school. Neither can it afford to have bad literature in the hands of the young, and the only sure way to avoid this is to furnish the best through the medium of school libraries.

If every board of education in Ohio would take advantage of the power granted in section 3995, and place in the hands of all the pupils under their control the very best books, and then insist upon their being read with the same persistence with which they insist that arithmetic, spelling, writing, etc., shall be taught, in a short time a moral and intellectual revolution would take place.

The selection of books suitable for such work is a very important matter. It is not sufficient that pupils should have access to a dictionary, encyclopedia, and other books of reference. These should be found and are found in every good library. Neither will books which can be read only by the more advanced pupils meet the demand. As a rule, the great majority of boys and girls never reach the advanced grades. If the problem is to be solved satisfactorily, something must be done for the children. I have no doubt that some members of boards of education, and in some instances parents themselves, hesitate to make the purchase of books because they do not feel competent to make the selection. In order to aid all such persons, the following course, adopted by the State board of control at its last meeting, is given. Every book in this list is safe, and I most earnestly recommend it to the favorable consideration of teachers, boards of education, and all friends of the public school:

PUPILS' ELEMENTARY COURSE, 1894-95.

REQUIRED.

Fourth year—A primary.—Scudder's Fables and Folk Stories; Seven Little Sisters; My Saturday Bird Class.

Fifth year—D grammar.—De Foe's Robinson Crusoe; Dodge's Stories of American History; The Birds' Christmas Carol.

Sixth year—C grammar.—Sea-Side and Way-Side, No. 3; Eggleston's First Book of American History; Big Brother.

Seventh year—B grammar.—Hawthorne's Tanglewood Tales or Wonder Book; Whittier's Snow Bound, Among the Hills, and Songs of Labor; Beautiful Joe; Lucy Larcom's New England Girlhood, or one book selected from the following of Abbott's Histories: Alexander, Hannibal, Cæsar, Alfred the Great.

Eighth year—A grammar.—Longfellow's Evangeline and Miles Standish; Sprague's Six Selections from Irving's Sketch Book; Fiske's War of Independence.

HIGH-SCHOOL COURSE.

REQUIRED.

First year.—Shakespeare's Merchant of Venice; Irving's Alhambra; The Ancient Mariner; Enoch Arden.

Second year.—Shakespeare's Julius Cæsar; Bryant's Poems (English Classics, No. 47); Roger De Coverly Papers; Guerber's Myths of Greece and Rome.

Third year.—Shakespeare's Hamlet; Morse's John Quincy Adams; Webster's Reply to Hayne; Lowell's Vision of Sir Launfal, and other pieces, (Riverside Series, No. 30).

PUPILS' ELEMENTARY COURSE.

RECOMMENDED.

Fourth year—A primary.—Sea-Side and Way-Side, No. 1; Ruskin's King of the Golden River; Lucy Larcom's Childhood Songs; King's Geographical Reader—First Book; Friends in Feathers and Fur; Frye's Brooks and Brook Basins.

Fifth year—D grammar.—Sea-Side and Way-Side, No. 2; Higginson's Young Folks' History of the United States; Stories of Heroic Deeds; Stories of Our Country; Our Own Country; Young Folks' Queries; Little Lord Fauntleroy; Neighbors with Wings and Fins; Curious Flyers, Creepers and Swimmers; Each and All; Our Fatherland.

Sixth year—C grammar.—Arabian Nights; Black Beauty; Stories of Other Lands; Stories of the Olden Times; Boston Tea Party; Noble Deeds of Our Fathers; Young Folks' Whys and Wherefores; Alice and Phoebe Carey's Ballads for Little Folks; Miss Olcott's Little Men and Little Women.

Seventh year—B grammar.—Rolf's Young People's Tennyson; Open Sesame II; Tom Brown at Rugby; Swiss Family Robinson; Shepard's Our Young Folks' Roman Empire; Laing's Heroes of Seven Hills; Dickens's Child's History of England; Lady Brassey's Voyage in a Sunbeam; Blaisdell's Stories of the Civil War; Kingsley's Madam How and Lady Why; The Young Folks' Series.

Eighth year—A grammar.—Hiawatha; Sharp Eyes and Other Papers, Burroughs; Open Sesame III; Ballou's Footprints of Travel; Lamb's Adventures of Ulysses; Dickens's Christmas Carol and Cricket on the Hearth; Franklin's Autobiography; Kauffman's Young Folks' Plutarch; Johnson's Rasselas; Lamb's Tales from Shakespeare; Stewart's Tale of Troy; Kingsley's Town Geology.

Information readers.—No. 1, Foods and Beverages, E. A. Beal; No. 2, Every-Day Occupations, H. Warren Clifford; No. 3, Man and Materials, W. G. Parker; Modern Industries and Commerce, Robert Lewis. These books can be used in the sixth, seventh, and eighth years.

HIGH-SCHOOL COURSE.

RECOMMENDED.

First year.—Scott's Lady of the Lake; Scott's Lay of the Last Minstrel; Scott's Ivanhoe; Shakespeare's As You Like It; Whittier's Poems, complete; Macaulay's Second Essay on the Earl of Chatham; The Five Gateways of Knowledge; The Spy; Cooper.

Second year.—Morse's Life of Jefferson; Webster's Oration on Adams and Jefferson; Webster's Bunker Hill Orations; Shakespeare's Henry VIII; Goldsmith's Vicar of Wakefield; Bryant's Poems, complete; Dickens's David Copperfield; Hale's Lights of Two Centuries; Lodge's Alexander Hamilton; King's Ohio; Bulwer's Last Days of Pompeii.

Third year.—George Eliot's Silas Marner; Tennyson's Poems, complete; Hawthorne's The House of the Seven Gables; Scudder's Introduction to the Writings of John Ruskin; Grimm's Selections from Plutarch's Lives; Thackeray's Vanity Fair; Schurz's Henry Clay; Uncle Tom's Cabin; Titcomb Letters; A Ballad Book, K. L. Bates; Palgrave's Golden Treasury of Songs and Lyrics; Two Great Retreats; Fiske's Civil Government.

At the last meeting of the Ohio State Teachers' Association the following resolution was unanimously adopted:

Resolved, That the Ohio State Teachers' Association recognizes in the pupil's reading course one of the most efficient agencies in the hands of the teacher for the promotion of the intellectual and moral welfare of the children of the State, and would therefore urge its adoption by every school in the State.

No membership fees are charged in this circle, and upon the completion of the four years' elementary course, or three years' high-school course, diplomas will be given free of charge upon the recommendation of the teacher or superintendent of the school with which the pupil is connected.

OKLAHOMA.

[From the Report for 1893–94 of Territorial Supt. E. D. Cameron.]

GENERAL OBSERVATIONS.

The two years ending June 30, 1894, have been a period of gratifying growth and advancement in the educational interest of Oklahoma. With the material progress of the Territory the cause of education has kept equal pace. The people of the Territory generally have not been without a proper appreciation of the great good to be obtained through the agency of the free public schools, and have shown a willingness to further its work commensurate with the means at their command. Difficulties have been met and overcome that would have baffled a people less determined or with a faith less strong in the power of the common school for good. Inconsistencies in the law have often been the cause of annoyance and obstruction. Personal property alone has had to bear the brunt of taxation for school purposes in most districts, land titles being yet generally vested in the General Government. The vexatious separate school question, which seems to defy satisfactory adjustment, has been a source of continual strife and discord. Obligations incurred by the townships under the old system have also been a fruitful cause of trouble to those districts formed from the same territory. These are but a few of the many obstacles that have stood in the way of the people in their efforts to secure better facilities for the education of their children. That they have succeeded as well as they have is cause for satisfaction to all who appreciate the value of free public instruction.

SUPERIORITY OF THE DISTRICT SYSTEM.

The district system of school government has been in use sufficiently long to prove its superiority over the old township system which it displaced. A district is more wieldy and more cooperative than the township. A district is one neighborhood with common wants; a township may be several neighborhoods with varied wants—the elements of strife and obstruction. The general plan of the law is, in my opinion, as well adapted to the conditions of Oklahoma as any that could be devised. In detail, however, the practical application of the law for two years has clearly shown the necessity of revision. Appended to these remarks will be found a brief of changes in the present law that seem to be demanded.

SEPARATE SCHOOLS FOR WHITE AND COLORED PUPILS.

There is no longer reason to doubt that the weight of public opinion in Oklahoma is in favor of separate schools for the education of the white and colored races. Nearly all of the counties have submitted the question to a vote of the people for determination, as provided in the separate-school law enacted by the legislative assembly. In every instance the proposition to establish and maintain separate schools for the two races has met with popular approval. The law provides that in all counties where the electors have voted to establish separate schools the county commissioners shall levy an annual tax sufficient to maintain such schools. As far as I am aware county commissioners have complied with this requirement. But here the law stops. Concerning all details it is silent. No provision is made for disbursing the separate-school fund, for establishing school districts for colored children, for the election of district officers, or for the erection of schoolhouses. The effect of this incomplete law is to deprive colored children of the privilege of attending white schools without providing adequate school facilities for their exclusive benefit. If the present law is to answer the purpose for which it was enacted it must

be revised and expanded so that no doubt can exist as to its proper application. I am of the opinion that a general law providing for the establishment and maintenance of separate schools throughout the Territory would answer the purpose to a better advantage.

LEADING INSTITUTIONS.

The Agricultural and Mechanical College, the Normal School, and University are all in a flourishing condition. Each succeeding year has seen a satisfactory increase in the attendance at these institutions, and a continually growing appreciation of the work they are doing is observed throughout the Territory. Oklahoma is justly proud of these schools, and no effort should be spared to make them equal to the best of their kind in any of the States. One of the great needs of the Territory is an institution of higher education for the colored people. I earnestly recommend that provision be made for the establishment of one institution of higher education, combining the features of a normal school, an industrial school, and a university, for the exclusive use of the colored people of the Territory. Our colored citizens are rightfully and justly entitled to all educational advantages enjoyed by the white race.

OREGON.

[From the report for 1893–94 of State Supt. E. B. McElroy.]

COMPULSORY SCHOOL LAW.

The compulsory law passed by the legislative assembly and approved February 25, 1889, compelling the attendance of children in public schools, has largely failed in the primary purposes sought in its enactment. As to the necessity for a compulsory educational law there is no argument, and as to the expediency of passing some sufficient law in this line for the advancement of our schools there is no question. The objects sought by the authors of this measure were to secure greater intelligent citizenship by granting to children in the State an elementary education, and to see that the State secures a sufficient return for the investment of the public funds raised by public taxation.

The annual enrollment and average attendance in the public schools in Oregon have been largely increased during the past few years, but the opinion is expressed here that no important part of this increase has been due to the compulsory law. Other agencies more powerful and more effectual have been at work to secure these important ends. As an illustration, one of the most efficient of these may be mentioned here. Prior to the session of the legislature held in 1889, school districts (in order to draw public-school moneys) were required to have a three months' school within each calendar year only; and this without any provision or regulation. This law has been amended so that the entire school funds received annually from the State and county must be expended within and during the year for which such apportionments are made, and, furthermore, that all such funds must be expended for school purposes only. This law has done more to increase the enrollment, average attendance, and general efficiency of our public schools than all other agencies combined. For, as will be seen, the tendency of this law is to reach the pockets of the people directly.

SCHOOLHOUSES.

It is important that our teachers be systematically drilled and taught in the whole field of ventilation of school buildings. The sanitary condition of the public school must necessarily be bad unless the sewerage system be carefully looked after. It is probable that the major portion of the disease prevalent among school children may be attributed to the carelessness and oversight in these two important particulars. When we come to consider that school children are confined for the most part for five hours in the schoolroom each day, and, in numerous instances, subjected to poor ventilation, cold drafts, bad drainage, and wretched sewerage, we may well conclude that contagious disease may be established because of the foul air in the schoolroom which the children are breathing and rebreathing, time after time, for several hours. In many of the cities and towns of our State much attention has been paid to these features, and the friends of public-school education are correcting, so far as practicable, the unfortunate mistakes that have heretofore marked the consideration of school buildings and outhouses during the past few years.

Boards of directors, in preparing to build a schoolhouse, should take great care in the selection of a site. Swamps should be avoided, and it is not a good plan to build on the top of a hill. A moderate elevation with good drainage is to be preferred. Ordinarily the country schoolhouse is closed for four or five months in the year. It is therefore necessary that all such houses should be substantially built,

with good doors and window shutters. The health and comfort of the teachers and children depend very much upon the immediate surroundings and upon the furniture and fixtures within the house. The influence upon the mind and character of children by beautiful buildings and beautiful surroundings is very great, and yet in our State we have hundreds of buildings with no attractive surroundings and no proper inclosures to make the interior of the buildings sufficiently comfortable for occupancy.

The outbuildings should be carefully and substantially built. It is pleasant to note that much more attention is being given this important feature of school work. Many of our most intelligent and active school officers are awake to their duties in this respect, and usually give personal attention to the matter of having comfortable and convenient outbuildings. Much yet remains to be done in establishing a proper sentiment in favor of the proper care and keeping of school outhouses. We have barely hinted at what is meant in this connection. There are hundreds of school buildings scattered over the land whose outhouses are an absolute disgrace to civilization. And while we have a compulsory law applicable to school attendance, we certainly should have compulsory school laws that should apply to other features. There is no greater and more general public improvement that can be suggested as connected with our schools than that some uniform plan be adopted for building and caring for proper school outhouses.

TEACHERS' EXAMINATIONS AND CERTIFICATES.

The inefficiency, carelessness, and indolence of teachers, and the absolute necessity of uniform and constant advancement in the teacher's work, caused the legislature to pass, as they did, the rigid and advanced law governing teachers' examinations and certificates, February 21, 1887. This law established at once a high standard of work, and the law expected that teachers should prepare themselves for the profession of teaching before entering the same. The law presupposed that every teacher would prove to be an active agent in the service, and would take advantage of every possible means for self-improvement. During the biennial period subsequent to the enactment of the law of 1887 there was an immediate awakening among the teachers to the importance of their work and to the necessity of better educational qualifications if they remained in the profession, and there was an immediate strife for higher grades of certificates, and an effort to secure better educational books, papers, and other aids. As was expected, considerable criticism was heard from many of the old-time, migratory teachers, who had been accustomed for many years to secure certificates without examination. The new law created a high standard in this, that it eliminated, for the most part, from the profession the teachers then known as spiritless, stupid, and indifferent. However, the vigorous criticisms of these indifferent teachers brought about, unfortunately, many liberal amendments to the law, establishing, for example, the lowest grade certificate known in any State—that is to say, a certificate of the third grade. This has been the cause, for the most part, during the past two years in lowering the proficiency of teachers and for the best good of our public schools. County certificates should be advanced at once to two grades—first and second. In addition to these, requirements for State certificates and State diplomas should be largely increased, and liberal legislation should be enacted for this more than anything else. It will tend to promote the efficiency of our teachers and will be a great benefit, not only to individual schools, but to the school system in general.

PENNSYLVANIA.

[From the report for 1893–94 of Hon. Nathan C. Schaeffer, superintendent of public instruction.]

FREE TEXT-BOOKS.

During the school year which closed on the first Monday of last June the act of May 18, 1893, which provides for the introduction of free text-books and school supplies, was carried into effect in all the districts of the Commonwealth with the exception of Pittsburg. The obstacles which in that city prevented immediate compliance with the act were overcome during the progress of the year, and in the summer vacation of 1894 upward of 125,000 text-books were purchased and prepared for use at the fall opening of the schools.

Without doubt the introduction of free text-books has been the most important step of progress since the year 1867. One of the immediate effects was a large increase in the attendance. Several superintendents specify an increase ranging from 20 to 30 per cent. Others report better classification, better grading, and better teaching as the result of free text-books. Pupils can no longer plead a lack of the necessary books as an excuse for not studying all the branches required by law,

The care of the books has been an important lesson in the care of public property, and from this point of view an important help in preparing the pupils for the duties of citizenship. In one borough, which adopted free text-books two years ago, the average cost per pupil for text-books and supplies during the past year was 83 cents. Those whose experience enables them to know claim that after the first outlay of money the annual expense is only half as great as when parents buy the books; and the chief cost of the books and supplies no longer falls upon the poor man, but upon those who are much better able to bear this expense. The superintendents, almost without exception, give favorable reports concerning the practical workings of the law. From but one county comes the report that the free text-book law has caused the directors to shorten the school term and reduce the teacher's wages. There can be very little justification for such a short-sighted policy in view of the fact that the legislature added half a million dollars to the annual appropriation for each of the two years 1893-94 and 1894-95.

The supplies in the shape of slates, pens, writing materials, and the like were not always wisely distributed. Experience will help to correct this defect. Here, indeed, tact and skill are required to prevent waste, and teachers who fail to develop habits of economy in their pupils will ultimately be obliged to quit the profession.

A CONTINUOUS TERM.

The last annual report called attention to the requirement of the law that the minimum term shall be six months, and with commendable zeal the directors arranged the school year for a continuous term without change of teachers. The boy who works on the farm will, henceforth, get the benefit of schooling during the months in which he has no work, whereas heretofore in some cases he did not get more than a month or two of schooling. The testimony of the annual reports of the superintendents is, without exception, in favor of the continuous term.

PERMANENT CERTIFICATES AND COLLEGE GRADUATES.

Under the act of May 10, 1893, over a hundred permanent certificates have been granted to college graduates. In accordance with the text of the act as given in the pamphlet laws for 1893, this grade of certificate is now granted to the graduates of colleges who have taught three years in the public schools and complied with all the other requirements of the law.

LAWS TO ENFORCE SCHOOL ATTENDANCE.

There are children who can not be made to attend school by any laws that have thus far been enacted. From one township, for instance, directors report two families with four children to be provided for. For convenience let us call this township A. In a neighboring township, which we will call township B, there are five children to whom no schoolhouse is accessible except the one erected for the four children in township A. The directors in township B have offered to pay the tuition of the five pupils, but the parents refuse to let them go across township lines. Of the two families dwelling in township A, one lives elsewhere from October to May, so that a school must be kept open for two pupils, or special provision must be made for them in homes near other schoolhouses. To the latter arrangement the parents will not give their consent. To hire a teacher for two pupils is justly considered an unreasonable expense. Thus seven children, through the perverseness of their parents, are growing up in ignorance of the merest rudiments of an education.

In legislating for these and similar cases great care should be exercised not to put the public conscience to sleep by a law that will be a dead letter upon the statute books. Laws that can not be enforced are worse than no laws at all. During the recent panic no law would have been effective in bringing absentees to school under which a plea by the parents that the help of the children was needed to support the family would have been accepted as a valid excuse. The appointment of a truant officer to arrest all idle youths who are found in public places during school hours would remedy many evils in our cities and towns. If a certificate of school attendance at day or night schools during three or four months in the preceding year were required to be filed with the employers of boys and girls under the age of 15, it would prevent an increase of illiteracy and serve to fit some wayward and neglected young people for their future duties as citizens.

In all legislation of this kind there is one fact which should never be forgotten: The majority of the pupils in the public schools are destined to become wage earners. Mere school going does not in all cases beget that training of the will which is essential to the highest success. Manual labor that is not too severe or too prolonged is very valuable in the bringing up of a boy who is likely to earn his bread in the sweat of his brow. It does not even harm the son of a rich man to find out by actual experience how much backache is represented in a dollar earned by manual

toil. Laws which shut boys out from work, or postpone the day when they may begin work to riper and riper years, make it increasingly difficult for the man who earns but a dollar a day to bring up a family of children or even to provide them with the barest necessities of existence

HIGH SCHOOLS.

"Children," says Supt. Joseph Walton in his annual report, "are still taken out of the public schools at an earlier and an earlier age. Those with means are sent away to school long before any thorough knowledge of the common branches has been acquired. The poor man's child quits when its associates leave. As a consequence the grade of our public schools is lowered, the efficiency of our higher institutions is weakened, and, while expenditures for free education are increased, illiteracy waxes stronger and the children of the poor are neglected."

The remedy for this condition is found in the extension of the high-school system to rural districts. A dozen township high schools have been established in different sections of the Commonwealth. Instruction in higher branches is thus offered to the advanced pupils of a whole township, and the time during which pupils attend the public schools is increased by one or more years. Since it is important to offer each pupil the best education of which he can avail himself, and since it is impossible to foretell the varying needs of different communities, the wisest policy will be to follow the example of the school systems which fix special qualifications for high-school teachers.

Although there are many high schools of whose work and courses of study our citizens feel justly proud, it can not be denied that our legislature has not been as liberal in fostering a system of high schools as the legislatures of Minnesota, Massachusetts, and other States. * * *

The wisdom of such a liberal policy can not be doubted by anyone who has observed the preponderance of men with high-school training in all the walks of civil, professional, and industrial life. Let a boy of average mind acquire the ideas and instruments of thought furnished by a good high-school course, and in point of ability to think and draw correct conclusions he will all his life long be the superior of a much brighter boy whose educational development is never carried beyond the grammar grade. The youth who has mastered the concepts and symbols of chemistry and other sciences is, in many lines of thinking, as much superior to a man lacking these sciences as a boy managing a self-binder is superior, in reaping grain, to a giant equipped with nothing but the sickle of our grandfathers. He who gets only a knowledge of the common branches is compelled to fight life's battles lacking very many of the effective weapons by which our modern civilization achieves its marvelous triumphs. Is it not a criminal waste of intellect to keep young people perpetually at work upon the common branches, even though mental power may be begotten by the solution of problems involving conditions and difficulties impossible in actual life?

Inquiry was made to ascertain what branches are studied in our high schools. Of 145 from which reports were received, 30 have no better claim to be called high schools than the fact that one or more classes in algebra are maintained; in all the others some geometry is taught. In two-thirds of the entire number physics, rhetoric, and Latin are studied. Twenty-three report classes in Greek, 29 in German, 7 in French. In 99 civics is taught as a separate branch; in nearly all the others it is taught in connection with the history of the United States. Thirty-six report libraries containing 500 volumes and upward; many report no books and very little apparatus. The courses range from two to four years, and in most cases the work is done by less than three teachers. The most superficial glance generally reveals whether the course of study was prepared by the holder of a permanent certificate, or of a normal-school diploma, or by a college graduate. A school never rises above the scholarship and attainments of its teachers. The quickest way to foster a more efficient system of high schools will be to fix a standard of scholarship for high-school teachers and to offer a stimulus in the shape of money to all schools which keep up to the required standard.

PATRIOTISM.

He who could be satisfied with a mere display of the Stars and Stripes in and upon our school buildings would have an equally inadequate conception of that for which the flag stands. The flag should be made to symbolize a love of country in the heart of the pupil that shall follow him to the ballot box as well as to the battlefield, and make him as willing to pay tax for the support of the Government as to spend money for a display of fireworks on the Fourth of July. Here, indeed, is a most important work for the teachers in connection with the lessons in history and civics. The future citizen should not merely acquire a knowledge of our State and National Governments, enabling him to vote intelligently, but he should also be imbued with a spirit of

devotion to the country as a whole that is based upon a knowledge of what it cost to achieve our independence, to found and save our Republic, and that will make him rise superior to the selfish interests of a section, or a class, or a party, so that he can subordinate these to the higher interests of the nation as a whole. America needs a patriotism which is not content with being on the side of one's country, right or wrong—for that is practically where we all are in spite of ourselves—but a patriotism which will cause the citizen to work and vote and agitate until the country is right on all moral, national, and international questions.

Here we reach a point of view that embraces all the nations of the globe. "The sky," says Joseph Cook, "is the roof of one family." Our teaching should never lose sight of the fact that we are all members of the great human family and owe duties to all mankind. Ten thousand human beings, scattered over every grand division of the globe, contribute to our food and raiment, to our comforts and luxuries. Opinions differ as to the advisability of introducing military instruction into our schools. All are agreed that the public schools should teach the arts of peace rather than the art of war. The rising generation should be taught to value ballots above bullets, to cherish, instead of a love of war, an aversion to the horrors of war, to esteem it more noble to do justice to a weaker nation than to conquer that nation in battle, to consider the elevation of the whole human race more glorious than the aggrandizement of ourselves at the expense of weaker neighbors. If history be taught from this point of view it can not fail to exert an elevating and ennobling influence upon the pupils in our public schools; for the youth growing up under this kind of tuition patriotism will not be synonymous with hatred of those whose views and interests and language are different from his own, nor will the love of country which he cherishes be incompatible with a just regard for the rights of all mankind.

SECTARIAN INSTRUCTION.

It is clearly not the function of the public schools to give sectarian instruction. The genius of our State and national constitutions demands in all schools supported by taxation the separation of secular from sectarian instruction. The former, which includes preparation for the duties of citizenship, is clearly the legitimate function of the schools established by the State. Religious instruction, on the other hand, is the duty of the home, the church, the Christian society, the Sabbath school. A comparison of the Christianity of our land with that of countries in which church and state are united leaves no room for doubt as to the wisdom of our American policy of keeping church and state separate, and of allowing each religious society to look after its own interests without interference from or with the civil power. And the praises bestowed by visitors from abroad upon American education are evidence of the fact that our schools have not suffered by the separation of secular from sectarian instruction.

THE EMPLOYMENT OF TEACHERS.

The employment of good teachers is a fundamental question in every system of public instruction. The power of selection, which by law is vested in the school directors elected by the people themselves, is guarded by no checks except the possession of a valid certificate. In all cases teachers should be selected upon the basis of merit. Scholarship, aptness to teach, ability to stimulate the intellectual activity and to mold the moral nature of childhood should be controlling factors in the appointment of teachers. The policy which some boards are accused of tacitly adopting, namely, to employ only teachers of their own religious faith, or political party, or secret society, can not be too strongly condemned. Equally reprehensible is the practice of favoring near relatives in these appointments. New York has passed an act forbidding a trustee (the officer who in that State corresponds to the director of Pennsylvania) to hire any person who is within two degress of relationship by blood or marriage. A similar law would be of service in our State.

In his own realm the teacher is vested with extraordinary powers of government. He makes laws for the government of the school; he passes judgment upon those who violate the laws promulgated by himself; finally, he executes the sentence which he himself as judge has pronounced against the offender. Excepting the parent in whose place the teacher stands, no one in the land is vested with more varied functions of government. And yet the creator is greater than the creature; greater than the teachers are the directors who select and employ the teachers.

RHODE ISLAND.

[From the report for 1893–94 of Hon. Thos. B. Stockwell, State school commissioner.]

FREE TEXT-BOOKS—FIRST YEAR.

The cost of text-books and pupils' supplies for the whole State upon the basis of the enrollment was $1.80 per pupil; upon the basis of average number belonging it was $2.34. This is more than has been found to be the case elsewhere on the average. Of course the first year would necessarily call for an extra large amount, but I am inclined to think the source of the greatest excess is in the line of supplies, so called. There is no doubt but that the enterprising publisher has been active in bringing his wares before the schools, and many teachers and pupils, on being supplied freely with materials they were unaccustomed to use, have been lavish with them. But this is an evil, if it does exist, which will soon correct itself. Comparison of methods and costs on the part of committees will tend to rectify such errors. Then, too, there have been great differences between towns in the manner of supplying what was needed. Some have been very liberal, others have provided only just barely enough to answer pressing demands. I am glad to report, however, that every town has at last complied with the law, and as a rule the schools throughout the State have been better supplied with text-books than ever before, and none are worse off; so that on the whole there is a great gain.

CONVEYANCE OF CHILDREN.

There are 64 schools in the State having less than 10 pupils each. These are divided among 18 of the towns of the State, showing that the evil of small schools is quite well distributed. Now, for the purposes of a school less than 10 children are worth but little. Such small numbers give no chance for any system of classification; they afford no opportunity for the cultivation of the healthy spirit of emulation and interest which numbers always foster; the pupils fail to learn the lessons of personal adjustment and adaptation, which are so essential a preparation for life, and for which the public school, if it be of good size, affords almost the ideal conditions.

Now, it is very clear that it is useless to expect that, save in rare instances, these schools will ever attain to any larger size; hence, if we are to have larger schools, the only way is to bring these pupils together in a smaller number of schools. But this is impossible in many cases unless provision is made at public expense for carrying the children to and from school, instead of bringing the school to the child, which has always been the idea. We now reverse and carry the child to the school. The result is the same in both cases—the best facilities and advantages possible for the child.

In our neighbor on the north and east (Massachusetts) this experiment has been tried for several years, until it has passed beyond the experimental stage and has become recognized and advocated as one of the best and most satisfactory schemes of modern times.

The last report from one of the agents of the Massachusetts State board of education, Mr. George A. Walton, says that 8 out of 15 towns in Barnstable County and 36 out of 54 in Middlesex County pursue the policy of concentrating their schools into one or two, and transporting the children to and from school without charge. The gross sum expended last year in those two counties for the transportation of children was $21,189.21. It is their experience also that after the people have once realized the difference between the two methods they are never ready to go back to the old.

I think, therefore, the time has fully come to advocate this plan as a policy to be taken up and adopted. We have a number of towns where there are several of these small schools scattered all over the town. Not only the matter of keeping up the school must be taken into account, but the schoolhouse itself is in need of attention. Before more money is spent upon all of these small, scattered buildings, it should be carefully considered whether the time has not come to leave them and erect one or two houses in their place.

SCHOOLS FOR "WORK PUPILS."

PAWTUCKET.—More than a year ago the attention of the school committee was called to the condition of what are called "work pupils"—those pupils who attend school only so much time each year as they are compelled to by law. It was found that they were making little progress; that year after year, as a pupil's work certificate ran out, he entered school in the same grade as the year before, and entering naturally at the same time of year he would practically go over the same ground year after year. As time passed on he found himself a "big boy," attending school with children much younger than himself. This was bad for the discipline of the school, while he was getting little benefit from his school attendance. A careful

investigation of the matter revealed the fact that an all-grade school in each of the Broadway, Hancock Street, and Garden Street districts would accommodate nearly all this class of pupils, and there are enough of them for three schools the year through, provided that they continue to enter and leave school at the same time of year as heretofore, which, from the nature of the case, they will be likely to do. They will not enter school until the work certificate runs out, and the certificates must of necessity run out at about the same time each year. A school of this sort was established a year ago in the Broadway district, in the Middle Street schoolhouse, as an experiment, and the experiment was most satisfactory. It is doubtful if better work were done last year in any school in this city than was done in this all-grade school. The pupils were at once put upon a different footing, and they felt it. Although the school represented four or five grades, the pupils being nearer of an age felt more equal and worked better together. They all evidenced more of a desire to learn than ever before, and took hold of their studies with a vim, while the discipline was well-nigh perfect. It was a new idea to them—this having a school of their own—and, being pleased with it, they seemed imbued with the spirit of making the most of it. The committee think it would be for the best interests of the city, in an educational point of view, to at once open two more of these schools. (E. P. Tobie, chairman.)

The "all-grade" school at Middle street.—An all-grade school for work-certificate pupils was opened at the beginning of the year in the vacant room of the Middle Street building, and was, so far as I know, the first experiment of its kind in this section. The following letter was sent to the parents of pupils required to attend the school, and is inserted here by way of general explanation:

Mr. and Mrs. —— ——

It is found that the interests of the work-certificate pupils suffer under the graded system. Let us suppose a case: A boy 11 years old goes out to work, let us say, January 1, 1894. He is then in the fourth grade. Under the present law he can remain out, at most, eight months. This brings him to September 1, 1894. He must then come back to school for eighty days. If he does not miss a day he can attend school the required length of time in four school months. This brings him to January 1, 1895, when he goes out to work again; comes back September 1, 1895; goes out January 1, 1896, and so on. Each time he comes back it is found necessary to place him in the same old fourth grade again, to go over the same old work. He becomes discouraged and simply sits out his time. Now, we are determined to reach down a hand to help this class of pupils, and so have opened a new room in the Middle Street schoolhouse for them—especially those living in the Middle Street, East Street, and Broadway districts. We have placed one of our best teachers in charge of the room, and mean to adapt the work to the individual needs of the pupils. For instance, if we think the subject of interest should be taken up earlier than is laid down in the course of study, we shall take it up. We mean to bend the system to suit the pupils, and not sacrifice the pupils to suit the system or suit other pupils.

This explains why we have sent your child to the Middle Street school. We want to do more than we have ever done in the past for those boys and girls whose school life is broken by work in the mills. We want to put them along as fast as they can safely go, and make their last school days not only pleasant to look back upon, but as profitable in every way as the circumstances will permit.

The results attending the opening of this school have been so beneficial, not only to the children themselves, but to the schools from which the pupils were taken, as to justify, when the opportunity presents itself, the opening of one or two other schools of the same character at the right points. Unfortunately there are at present no rooms available for this purpose. (G. C. Fisher, superintendent.)

SCHOOLS FOR SPECIAL DISCIPLINE AND INSTRUCTION.

PROVIDENCE.—Some time ago the committee on grammar and primary schools was authorized to establish schools for special discipline and instruction, in number and location as recommended by the executive committee, which last-named committee is placed in charge of these schools.

Short-time pupils.—The great value of such a school as this for the pupils from the mills and others who can attend but a few weeks at a time is evident. The great majority of the pupils of this school would have failed entirely in getting into the regular schools, for these were full, and even had there been places for them the regular schools would have been greatly interrupted by their entrance, disorganized by their presence, and discouraged by their leaving. The pupils themselves would have felt out of place in the regular schools, would have been embarrassed by the requirements of the course of study, and disheartened by being placed with much younger pupils who would surpass them in school work. As it has been, they have found themselves with their fellows, have studied what seemed best to them and their teachers, have gone on as fast as they could, or as slowly as they must, have had a teacher to sit down by them when occasion required, and carefully, step by step, as the steps could be taken, explain the matters difficult of comprehension. They have enjoyed this work. The only requirements upon them have been such as they themselves approved, attendance as punctual and regular as possible, quiet industry, respectful obedience. These requirements they have not failed to conform to. The fear that the presence of the disciplinary class would be distasteful or harmful has proved groundless.

Results.—All these schools are succeeding well. The teachers in charge of them have proved themselves well fitted for their places. The schoolrooms are as quiet and orderly as any. A visitor would see no signs of friction. There has been no defiance and but little mischief. The attendance has been as regular as in the average school. The discipline has been good, and the formation of good habits has been the main effort.

The disciplinary classes.—If the pupils sent for misconduct and irregular attendance can have established in them habits of industry and respectful manners, with a feeling of good nature, the main purpose of the school will be accomplished. These boys have been sent to these schools mainly because a chronic condition of ill will had grown up between them and their teachers. To meet this, the teachers of these special schools have received them kindly, have shown a personal interest in learning their attainments and preferences, and in pointing out to them what could be done. The past has been ignored and a new start taken.

Management.—Special requirements for the teachers of such schools are evidently necessary. They must be sympathetic and disposed to deal with the individual rather than the class. They must be quiet, patient, and tactful, while decided and masterful. As to corporal punishment, the advice to the teachers has been, use it if it seems useful in any case, don't endure disrespect and impertinence tamely because you are trying to make the reputation of being able to manage bad boys without punishment. At the same time avoid it when it will arouse antagonism, and by all means so far as possible have no altercation with a pupil in the presence of others. Your reputation will depend upon the habits and dispositions which your pupils exhibit. Either very many or no cases of corporal punishment in such schools would arouse in my mind the suspicion of weakness on the part of the teacher. I find by inquiry that all the cases in the three schools now in progress have been eight since the opening of the schools. The number of these schools ought to be increased to five or six as soon as suitable places and teachers can be found for them.

Age of pupils.—The establishment of these schools has made conspicuous a fact long noticed by the school-teacher, namely, that there is a certain age and degree of attainment that furnishes the greater proportion of the boys who require these schools. Nearly all the cases are boys of the higher primary or lower grammar grades, or of the fourth, fifth, and sixth school years. Only two have been sent to these schools from grades higher than the sixth, and but a half dozen or so from grades lower than the fourth. This statement is suggestive enough for an essay on school management.

Promotion to regular grades.—It is the intention to send back to the regular school pupils from these special schools who have made due progress in the two essentials of habit and disposition. Several have already gone back to their former schools. Others will go at the opening of next term. To some the privilege of return has been offered who preferred to remain where they were.

Effect on other schools.—After any discussion by which we persuade ourselves that these schools are valuable in themselves, we ought still to consider that their chief value lies in their effect upon the regular schools. The boys sent out may not be really bad boys. Usually, if you observe them in the special school you will conclude it strange that their teachers should have wished to have them sent away; but for some reason they have not got along well with their teachers or have played truant so much that they needed to be sent to schools at which a more effective watch could be kept over them. Whatever the cause, their absence is a relief to the schools from which they have been sent. This relief should appear in better order and industry in the regular schools, and especially in greater sympathy between teachers and pupils. We must insist that our teachers be kind, and our pupils courteous. The general reputation of a teacher as cross or a scold should in every case be a cause for investigation, which should result in exoneration, reform, or removal.

Individual instruction.—There is another kind of schools recently organized in our grammar schools, often confounded in the public mind with the schools we have been considering. They are the rooms for "individual instruction." The great distinction in these schools is that one kind is established for disciplinary reasons mainly, the other to assist pupils in obtaining desired promotions. This it does by giving capable and ambitious pupils the opportunity by extra work to gain promotions in advance of their classes, and by careful explanation, assistance, and drill to enable another class, faithful, but not so capable, to save themselves from losing grade.

These schools, those for "special discipline and instruction," and those for "individual instruction"—the disciplinary or ungraded, and the schools for promotion—illustrate the fact which can be found exhibited in many directions that our public schools, growing as they are with a rapidity even greater than the city, are likewise increasing in complexity and in adaptation to all classes of pupils." (H. S. Tarbell, superintendent.

EVENING SCHOOLS.

[Report of chairman of Providence City school committee.]

Changes in management.—After consultation with the visiting principal, and the approval of the superintendent of schools, the following changes in the management of the evening schools were adopted by the committee, and went into effect January 1, 1894:

1. The policy of cutting down the enrollment and increasing the average attendance. For this purpose we prepared forms of application, and all pupils attending the evening schools after January 1, 1894, were required to sign the same, pledging themselves to regular attendance, studious effort, and good behavior. Every applicant under 18 years of age was required to obtain on his application the written indorsement of some reputable citizen.

The enrollment under the new method was less than one-half the enrollment when the schools were opened in the fall, while the average attendance remained about the same.

2. The attendance of the principals of the several schools, with two or three assistants on two evenings, enrolling, examining, and classifying applicants. On the evenings of December 28 and 29, 1893, the principals, with such assistants as the visiting principal thought necessary, were in attendance at the several schools for the purpose of enrolling, examining, and classifying applicants for admission for the second term beginning January 1, 1894.

3. That only the number who can be conveniently taught be admitted, and a school not allowed to be crowded. This policy was rigidly adhered to during the season of 1893–94 after January 1.

4. The admission of fewer children under 12 years of age. The by-laws prohibit the attendance of any pupil under 12 years of age without the permit of the superintendent, and special forms of applications for such pupils, giving reasons for the request, and printed forms for the permits, were furnished by the committee. No pupil under 12 years of age was admitted to the evening schools after January 1, 1894, except upon the permit signed by the superintendent.

5. Grading was attempted throughout the season with varying degrees of success. Specific instruction at the beginning of the season, that the grading should be done on the basis of the reader used by the pupil, was observed, and the weekly report blanks were printed to report the reader used by each class.

Classification.—Most of these methods adopted proved to be improvements. We believe the system of written application for membership with proper guarantee should be continued. We doubt the ability of a principal and two assistants to properly classify a school in two preparatory evenings, unless they are experienced teachers and more or less familiar with their pupils. In Boston they attempt nothing but the enrollment and classification of applicants during the entire first week of the term. The elementary schools in Boston are very similar to ours, except that they are in school buildings and with better facilities for class work than we have. Of course the sooner the work can be accomplished the better. The work must vary under different circumstances—character of pupils, numbers, class room, facilities, etc. It should be in charge of someone thoroughly familiar with the schools, who should have charge early enough to formulate a definite plan for each school.

Overcrowding an injury.—We are satisfied that nothing but demoralization comes from overcrowding a school, and that where the facilities are insufficient the admissions should not be beyond ability to properly teach. We can, however, in nearly all localities accommodate, not the number heretofore enrolled, but the number who have attended throughout the season with fair regularity.

Difficulties of grading.—In the matter of grading, the success attending the efforts of last season was not satisfactory. With due deference we state our belief that to grade on the basis of the reader used is a mistake. In the day schools, where the pupils take regular steps from grade to grade, the reader used would be an indication of grade, but in higher grades would hardly serve as a basis for examination. In the evening schools the reader used is very largely at first the stated whim of the applicant. Again, an adult, even without much ability to read, has an extensive vocabulary, coupled with a fair and sometimes full appreciation of the meaning and significance of the words. For a child, the words in his reader must be graded as much in their meaning and signifiance as on their phonetic difficulty, and a reader for a child would be filled with words expressing simple ideas, while an adult could as readily learn words of more profound meaning, but simple in their form and utterance. It would seem better, in determining degree of scholarship, to examine in some definite science like arithmetic, and grade accordingly.

Other difficulties in grading present themselves. We have a large number of pupils who have regularly attended evening schools for years, and who have formed companionships and become attached to teachers to such a degree that these circumstances

greatly enhance the zeal and pleasure of their winter evening work. Several teachers have classes, sometimes quite large, that from reasons above stated they manage more successfully than they could half the number of unwilling though better graded pupils. These teachers are doing excellent work, and the results to the pupils are satisfactory. It would not seem wise to disturb such favorable conditions, even to obtain a perfect theoretic grade. As a rule, Armenian, French, and Italian pupils do better in classes by themselves, although the grades may not be absolutely uniform throughout the classes.

Evening-school pupils have not been held to a prescribed course of study and some have advanced more in some branches than in others, as their tastes and inclinations have led them to greater effort in some lines. Given a class of evening-school pupils all using the same reader, and you will find widely varying degrees of proficiency and advancement in the other branches. One of the reforms which must be brought about is the adoption of some tolerably well-defined course of study for evening-school pupils.

Some pupils can attend every evening in the week, others but three evenings. Quite a large part of the instruction given in our evening schools must continue to be individual instruction in ungraded classes.

There are two methods of grading the whole or part of an evening school into classes. The first method is to select a suitable number of pupils equally advanced in all studies and form a class, repeating the process. Given, then, regular attendance and suitable class room, and teachers of such classes can each care for about as many pupils as in the day schools. This is what was intended in our advanced evening schools. The results were very satisfactory. At the Candace street advanced school, however, the principal insisted upon following the old method of individual instruction. Results were decidedly in favor of the class method. The second method is to provide, in suitable class rooms, teachers who will occupy the time of the session in teaching classes sent in from the main schoolroom, hearing three classes each evening. One teacher might teach arithmetic, another language, another spelling, etc. These classes would be formed of pupils equally advanced in certain studies, and would be of varying size. It would often happen that pupils would be in the advanced classes in some studies and in elementary classes in others. To arrange the membership of such classes so as to enable all to attend their proper classes in each study is a difficult task, and irregular attendance greatly interferes with its success. Suitable class rooms are also necessary, and much passing from room to room is demanded by this plan.

The vital essential in successful management of evening schools is securing efficient and skillful principals. Some of the schools suffered greatly by the poor service in this position, while the same schools became orderly and studious after a few evenings under the control of an expert principal. A most rare combination of qualities is needed in a principal—a conception of what a school ought to be and ought to accomplish, firm control coupled with a kindly sympathy and interest, the power to lead to harmonious and well-directed effort both teachers and pupils.

The work of a good principal is not confined to the two hours that the schools are in session. He is frequently called upon for conference or instruction by the committee, and must devote much time and thought to the work outside of school hours. This is true to a marked degree of the visiting principal; not one-half of his duties are performed during the hour he is visiting the schools in session.

SOUTH CAROLINA.

From the report for 1893–94 of Hon. W. D. Mayfield, State superintendent of education.]

ENROLLMENT.

The attendance upon the public schools during the year closing October 31st has been most gratifying. It is in excess of that of any previous year, and exceeds that of last year by 3,616. Year by year it is increasing. All of this shows that our people are more and more relying on the public schools for the primary education of their children, and the subject therefore becomes more and more a serious matter for the proper consideration of the legislature at each succeeding session.

The total enrollment for the year is 226,766. Of this 106,176 were white children and 120,590 were colored, a majority of 14,414 in favor of the colored.

SESSION.

The average school session for the year is 4.3 months. Last year it was 3.7 months. This increase in the length of the average session, the enrollment having at the same time increased, is due to the extra tax levied and collected by special school districts

in aid of the constitutional 2-mill tax and the poll tax. Most of the cities, towns, and villages levy this special tax, and also many country districts. Year by year this work is spreading, as the people become convinced of its necessity and their ability to bear it.

There is no necessity for any further legislation on this subject, the act of 1893 being quite sufficient.

The session can not be made longer with the present amount of money. It is true the public schools do not meet the wants of the people, but it is likewise true that they have the remedy now in their own hands, under act of 1893, by levying a special tax. This is the only practicable way open to longer sessions and better schools. In some States they have what is known as a central or county school in each county. Our present condition does not warrant an attempt at establishing such schools, unless it is deemed advisable to divert the county funds, or the larger part, to establishing and maintaining a central or county school of a different character in which a sufficient number of advanced students should be taught and supported (the school to run the entire year) to supply teachers for the schools of the county, the student teachers to teach by sections, free of charge. This would keep the public schools open the entire year, and parents would have an opportunity to patronize them at such times during the year as they could spare their children. Such schools, if established at all, should be located outside of and somewhat removed from cities and towns where they could be made as inexpensive as possible. The public funds of most of the counties would be quite sufficient to establish and maintain such schools, and the schools could supply the county schools with teachers sufficient to keep them open the entire year.

SCHOOLBOOKS.

Complaint has been made from some counties that the books adopted by the State board of examiners are not being sold at the prices agreed on, while in other counties the school commissioners report that the prices are adhered to. In all cases where complaints have been made the matter has been called to the attention of the book publishers, with the request that they see that their books are sold at the agreed prices. The local dealers claim that they buy the books direct from the publishers, that they are their own property, and they have a right to sell them at such prices as they choose to charge for them. In such cases the State board of examiners are powerless to grant any relief. It has been suggested that it would be advisable for the legislature to authorize the county boards of examiners in their discretion to appropriate a certain sum from the school funds of their counties, and make the same a permanent fund to be invested by the school commissioners in purchasing the prescribed books, and charge these officers with the duty of furnishing the books to the pupils of their counties at actual cost and carriage. There is no doubt but that the books, with proper management on the part of the commissioners, could be had at greatly reduced prices.

TEACHERS AS BOOK AGENTS.

It has been charged that some of the teachers of the public schools act as agents of schoolbook publishers, some as avowed agents and some as silent agents. Many of the best teachers of the State are outspoken in condemnation of the practice. It is insisted that they can not free themselves from their interest in having the books they represent adopted for use in the schools taught by them. This, if true, is radically wrong, and should be prohibited by statute.

In some of the States it has been found necessary to pass stringent laws with heavy penalties on this subject, making it a misdemeanor for any person who receives public money as a teacher to act as an avowed or silent agent of any schoolbook publisher. I respectfully recommend the passage of a similar law for this State.

TEXAS.

[From the report for 1893-94 of Hon. James M. Carlisle, superintendent of public instruction.]

COUNTRY SCHOOLS THE FIRST IN IMPORTANCE.

Under the present constitution we have never had adequate available school funds. The average term for the country schools has usually been about five months in the year, sometimes a little longer and sometimes a little shorter. Of course, when the average is five months, many of the schools continue a little longer and many of them stop short of five months. It will require no argument to convince anyone that a system of schools that provides for an average school term of only five months is not adequate to the education of the children.

It is true that the cities and towns have managed, by local taxation, to extend the average school term to about eight and one-half months. The result is that in almost

every city the public schools are the pride and delight of the people. It is believed by many that the superior school facilities of the cities will account, in some measure, for the growing tendency of the people to desert their country homes and move to the cities, a tendency that has often been noted of late years by students of social conditions and progress as one of the unfavorable signs of the times.

However that may be, there will be no disagreement upon the proposition that our country schools are first in importance and should be the objects of our most constant and most anxious care. All the independent districts in the State, including not only the larger cities and towns, but many of the small towns and villages, contain but little more than one-fifth of our scholastic population. In other words, about four-fifths of our scholastic population must depend upon the country schools for instruction. The character of our material resources, the extent and richness of our agricultural and grazing lands, and all our industrial conditions make it certain that for many years, at least, our population will continue to reside chiefly in the country. Hence the leading purpose of our school laws should be to provide adequate school facilities for the country people.

What is the condition of our country schools? That the average term is too short has already been noted. In addition to this, the houses are usually poor makeshifts, unattractive, uncomfortable, and unhealthful. Many of the schools are taught in church houses or rented cabins. There is a general lack of suitable furniture; the teachers are poorly paid, in consequence of which many of the best teachers drift to the cities or enter more lucrative employments; and while these adverse circumstances have not prevented improvement in our teaching talent, they have made progress more difficult and less rapid than otherwise it would have been. If we are to meet these difficulties and surround our schools with conditions favorable to success, it is evident we must increase our revenues.

SCHOLASTIC CENSUS.

The system of collecting and reporting the scholastic census needs revision. There are at present no checks upon the returns, no provisions for revising or correcting them. The reports of the various census takers are received as conclusive. No one is authorized to question them. The result is that not only numerous mistakes occur—costly mistakes—but in some cases there are charges of gross frauds. It is probable that some of these charges are true, and that the half of the inaccuracies of the census has never been suspected. It is incredible that the reports of the hundreds of census takers and returning officers, subject to no sort of revision or correction, should be free from error. I recommend, therefore, that the law be amended so as to require the census rolls to be closely scrutinized and thoroughly corrected before they can be accepted and made the basis of the distribution of the school funds. This is a matter of business involving thousands of dollars of money, and should be placed upon a strict business basis.

CHANGES IN CERTIFICATE LAW.

The law authorizing county superintendents to issue local permanent certificates has proved to be quite unsatisfactory. It has been abused in some cases by issuing certificates to teachers who had long since quit teaching, and in others by using such certificates to reward political favorites. On the other hand, county superintendents who have been earnest in their efforts to build up the schools by insisting on increased scholarship and superior professional attainments among the teachers, have been put to great embarrassment by applications for these local permanent certificates. If one county superintendent issues these certificates indiscriminately, it increases the difficulties of neighboring county superintendents who wish to hold up the standard of teaching talent in the schools of their counties. The best superintendents and the best teachers seem to be quite agreed that this feature of the law should be repealed. The truth is, that since our law provides that a teacher beginning with a second-grade certificate may advance by taking the examination in sections until he obtains a permanent certificate, there is no reason for a provision in the law to grant a certificate except upon examination. It is therefore recommended that the law authorizing the issuance of local permanent certificates be repealed, and that all outstanding permanent certificates be annulled.

For a similar reason, since the law provides for granting permanent State certificates upon examination, it is not believed that the law for granting permanent State certificates to college graduates serves any good purpose, except to encourage young people to complete a college course, if possible, before beginning to teach, or at least before giving up their academic studies. This consideration is not of sufficient weight to justify the granting of this special privilege. It would, in my opinion, be better to level all distinctions by repealing this law and canceling all certificates heretofore issued under it.

SECTARIAN SCHOOLS.

The constitution of this State provides that no part of the public-school fund shall "ever be appropriated for the support of any sectarian school." The statute simply repeats the injunction of the constitution. The practical difficulty encountered in the administration of the law is to determine precisely what is to be understood by a "sectarian school." During the school year 1893–94 it was charged that certain schools in Victoria County and elsewhere, supported as public schools, were sectarian in character. It became necessary for this department to prescribe rules for determining what characteristics should determine a school to be sectarian. It was found upon this question that there was a difference of opinion, both among the school officers of the country and among the courts. A conclusion was ultimately reached and a ruling was made. This ruling was embodied in a circular of instruction dated September 23, 1894, and mailed to all the county superintendents and ex officio superintendents of the State. The following extract will show the material points of the ruling:

The following classes of schools should all be regarded as "sectarian" within the meaning of our constitution and statute:

(1) Any school in which any sectarian instruction is given, directly or indirectly, by any teacher of the school or other person, during the hours of the daily school session or at any other time when the pupils are subject in any manner or degree to the control, direction, or supervision of any teacher or officer of the school, at the schoolhouse or at any other place to which the pupils or any number of them repair for that purpose by consent or connivance of any teacher or school officer.

Within the meaning of giving sectarian instruction shall be included the performance of any ceremony or the wearing of any garb or dress, or the assuming of any title or appellation, or the use of any device whatever, reasonably tending to impress upon the minds of the children any sectarian bias or prejudice.

(2) Any school which in whole or in part is directly or indirectly subject to the control or management of any sectarian or denominational church, society, or organization of whatever name, or the officers or agents of any such organization or society.

(3) Any school conducted or taught in whole or in part by persons who, by virtue of any relation to any sectarian or denominational church, society, or organization, are required to turn over to such organization or its officers or agents any part of their earnings in conducting or teaching such school, or to account in any manner for the same to any such organization or its officers or agents, or to use any part of their earnings for the benefit of such organization or any enterprise under its control.

It is my opinion that so important a question should not be left to the determination of any department. The legislature can best define what it means by sectarian schools, and I recommend the enactment of a statute for this purpose and providing appropriate and specific means of enforcing the law.

VERMONT.

[From the report for 1893–94 of Hon. Mason S. Stone, superintendent of education.]

THE TOWN SYSTEM.

During the brief period the new law (making the town system compulsory) has been in operation there are some evidences of its salutary effects in our educational policy.

I. Better teachers.—Statistics in the improvement in quality of teachers are not easily obtainable, but it is generally conceded that better work has been done. This is not due to any educational advancement on the part of the teachers, nor to the introduction of new teachers, but to the system and method of control. Teachers in general have felt a new impulse for the past year, a better moral support. More specific directions have been given and less vagueness of policy; more interest in themselves and their work manifested and less indifference after engagement.

These gains in the quality of teachers and their work can not be measured by numbers; they are facts which can not be compiled in statistics. It is a noticeable fact that there has been quite an elimination of the low-priced, inexperienced, inefficient teacher who formerly taught the small or remote schools, and whose only merit for her position was her cheapness. With the discontinuance of the small school and the alienation of the remote school from the stringency of local economy the services of the immature, unequipped teacher have not been in demand, and the average quality of teachers improved accordingly.

Not every teacher can teach any school. Under the old régime a teacher's nonsuccess was frequently due to her misfit—sometimes to the school, sometimes to the community. Inadaptation was frequently either unconsidered or stifled in the eager search for a teacher. It is too much so now. But these serious disadvantages to which some teachers were subjected are largely removed. The school directors have appointive power, can exercise discretion in the fitness of teacher to place, appoint accordingly, and if mistake is made an interchange is possible and easy.

It is an accepted truth that a teacher's most efficient service is after the period of mutual adjustment and acquaintance of teacher and pupil. Likewise it is generally

true that the continuance of the same teacher in the same school for a second term is far more profitable to the pupil than the first term. Herein the evidence of figures can be furnished in support of improvement.

In the year ending March 31, 1893, there were 1,813 teachers retained one term only; but in the year ending 1894 the number was reduced to 1,666. From this longer tenure of office better work must inevitably result. Better teachers means better teaching and better schools.

A teacher's efficiency is frequently measured by the moral support afforded her by the school authority. Under the present system the school official is rarely confronted with the dilemma whether he shall join with his neighbor or with the transient teacher; he is not now seriously agitated by the struggle between conscience and comfort. He does not reside in a factional school district to whose baseless complaints he must listen, and to whose unjust demands he must cater for peace. Now he is largely untrammeled in dispensing his advice and rendering his support.

In many towns the school directors have called the teachers together before the commencement of a term and given to them specific directions in regard to management, so that the teachers have entered upon their work and carried out plans and instructions with courage and confidence.

In addition to the instructions in regard to management and assurances of support teachers have been called together in teachers' meetings oftener and in more towns than in previous years. In 1894, 46 towns held teachers' meetings; in 1893, 22 towns held such meetings, a balance of 24 towns in favor of 1894.

In these meetings methods of instruction, pyschology, ethics, discipline, and school management were discussed and all the elements that enter into the composition of a successful school considered.

Also teachers have been visited by school officials more. In 1893, 5,352 visits were made by town superintendents 1,765 visits by school committees; in 1894, 6,982 visits by town superintendents and 3,933 visits were made by school directors.

II. Better schoolhouses.—A portion of the legacy left to school officials from the previous system is the shambling and almost uninhabitable condition of some schoolhouses.

This entailed upon the school directors the duty and upon the town the expense of extensive repairs. School property generally has received such renovations, and more, evidently, than in any previous year.

III. Better supplies.—It is fast becoming a recognized fact in this State that a teacher is unable to accomplish efficient work unless suitably equipped with needed appliances. The improved methods in primary reading and number work, the practical treatment of geography and history, the elementary instruction in the simple sciences, all demand such.

The dearth of such in previous years has been a sad impediment to practical work; the book has been magnified and the subject suppressed.

The past year has witnessed a more extensive but less expensive purchase of needed equipments in the line of dictionaries, globes, charts, maps, primary appliances and other apparatus than in the previous year.

Such a tendency is a healthy sign of healthier school work. The disclosure of lack of proper appliances in many of the remote schoolhouses is a cogent argument in favor of free text-books and supplies.

IV. Better management.—There have been held in the State, since the initiation of the new law, more than twenty county meetings of school officials. In these meetings have been discussed the educational policy of the State, the administrative duties of school officials, and the efficient means for speedy improvement of our schools. Such meetings are unprecedented in the educational history of the State. These meetings, together with the new impulse given teachers through the teachers' meetings, the longer continuance of the same teacher in the same school, the larger educational interest awakened in towns by school rallies at close of school year, must at least suggest better management.

And if the closure of the small unprofitable schools was wise, if a better selection of teachers has been made, if inadaptibility has been lessened, if there has been larger support to teachers, if there has been a closer oversight of work and property, if the quality of school officials has been improved, then there certainly has been better management. Better teachers, better schoolhouses, better supplies, better management, all argue better schools, better advantages, better results, and these are what we are seeking. * * *

The present law was born amid much apprehension and misapprehension. The fear was that a reckless consolidation of schools would ensue. This is antagonistic to its spirit. It means consolidation of management; not schools, except in cases where the larger profit to pupils unquestionably justifies the action.

The average length of schools in weeks for the past year was 31.09; for the year ending 1893 was 28.29. If we multiply the number of legal schools, 2,292, by 28.29 we have only 64,863.6. The difference between this and the aggregate number of

weeks for 1894 of schooling is 6,411.2, the number of additional weeks of schooling given to the children of the State by the town system. This excess should be credited to the ungraded schools, which number about 1,945, for our graded schools were rarely affected by the extension of time. Dividing the excess by 1,945, we have an average of three weeks to be added to each of our ungraded schools.

Furthermore, the average cost per week in 1894 was only $10.90; that for 1893 was $11.69, making average cost per week, with an average increase of three weeks for ungraded schools, 79 cents less per week than under the district system. The cost per week for this extra 6,411 weeks was only $2.75.

The facts submitted on the face may seem small gains, but measured by time and circumstances they are great. The inexperience of school officials and consequent trepidation, the general distrust of the people, and the prevalent ignorance concerning the law's intent, its crudity and incommensurateness with its purposes, all militate against a facile and successful operation.

Yet it is apparent that wherever its virtue and purpose have been exhibited it has invariably commended itself to the intelligence and approval of the people. It is doubtful if any law enacted in the State of Vermont, received under such antagonistic and discouraging circumstances, ever won more or stancher supporters than our present law during the short time it has been in operation. This in itself is sufficient reason for its continuance.

FREE TEXT-BOOKS.

Free text-books have been supplied by the towns of Hartford, Rockingham, Cavendish, and Westmore, and herewith is appended opinions concerning the workings of the same.

Supt. H. D. Ryder, of Rockingham, says:

The system of free text-books was introduced by vote of the town in 1877, and has proved eminently satisfactory, as is proved by the fact that no effort has ever been made to rescind that vote. The cost the first year was about $1.25 per scholar, the cost the last year was less than 60 cents per scholar, or about 3⅛ of the grand list for the first year, and about 1⅛ per cent of the grand list for last year. The average cost per year per scholar is not far from 80 cents. In towns where there is no high school the cost would be less.

Supt. N. B. Hazen, of Hartford, says:

Hartford voted for free text-books in 1879. At the last annual town meeting it was voted that the town purchase and hold text-books for use in the common schools, and a sum not to exceed $600 was placed at my disposal for that purpose. I purchased books at a cost of $532.72. I also paid for labels and 20 boxes with locks, $36.41. These books were intrusted to the teachers in each district with the following directions:

"These books are charged to you, and you will be held responsible for a proper oversight of them during term time. Loan them to the pupils as from a library. The loss or material injury of a book by a pupil is to be made good at once by such pupil. Books must be accounted for at the end of the term to the prudential committee."

The practical advantages are:

(1) *Cost.*—These books at retail prices would have cost about $1,200. They will be for use in the schools until worn out instead of being used one or more terms and thrown aside with other old school books.

(2) Books, and the right ones, can now be put into the hands of every pupil the first hour of the first day of school.

(3) Books are of the same kind, and the teacher is able to classify the school according to the advancement of the pupils, making fewer and larger classes and enabling the teacher to give more time to each class, and each class being larger incites the pupils to more emulation than in smaller classes.

(4) Pupils who are troubled to obtain money for the necessary books are not kept out of school on that account. No odious distinctions are made between the rich and the poor. In support of this, I call attention to the fact that so many more pupils attended school this winter than last, and many of them are boys who work for their board and who would not have been able to attend had they been obliged to purchase books.

(5) I call attention of teachers and pupils to the care of books. It is almost the universal testimony of teachers that pupils take better care of the town books than they had been accustomed to of their own. It makes the money appropriated for schools go further and do more good for the reasons above stated, the total cost for fifteen years being $4,359.20, or an average of $290.61 per year. The average grand list of Hartford has been $19,031, and 1⅙ per cent of this grand list has paid the expense of the text-books. During this time the number of pupils has averaged 693 each year, therefore the cost of text-books has been between 41 and 42 cents per pupil each year. In addition to books the town supplies pads, drawing paper, pencils, writing books, ink, numerical frames, etc.

I will only add that the system of free text-books recommended itself from the first to the citizens of Hartford, and there has been no fault found with it since it came into use. Teachers are enthusiastic in its favor.

Supt. S. A. Hunt, of Westmore, says:

The cost of free text-books can only be estimated, but I am satisfied that two-thirds of the money and books supply the pupils much better than the other plan. In one district many books have been wantonly destroyed, owing largely to lack of supervision, or responsibility for the safety and care of books. In schools where there have been places provided to keep them and some one to see that they were taken care of, books have lasted as well or better than under the old plan. I have been interested in our schools as superintendent, prudential committee, and teacher most of the time for seventeen years, and say emphatically, free text-books.

UNGRADED SCHOOLS.

The common country school is the typical school of the nation, and is the school that should receive the stanchest support on account of the excellent work it is doing and on account of its influence upon future government and citizenship. On account of the large influx to the cities from the country, the political salvation of the former is due to the salvation of the latter.

It is stated that over 90 per cent of the children of our public schools do not complete a high-school course. The number in Vermont will approximate this per cent, but probably 50 per cent enter such institutions. Confronted by this fact of the large number who are deprived of a high-school course, it is imperative that our State give the largest pecuniary aid possible in support of our common schools of primary period, for it is far better that the commonalty be moderately well educated than that a few favored ones form a scholastic aristocracy.

The ungraded school has this advantage over the city graded school: In the high-pressure graded school the pupils are assigned certain periods for the study of certain subjects, and frequently, too, the recitation period is as long as the study period, so that the tendency of the teacher is to do a large share of the pupils' work, which is a mechanical and stifling process. In the country school what the pupil gets is largely by his own effort, on account of the brevity of the recitation period.

This self-dependent getting is what gives the mental power to the country boy—he has better disciplined faculties for acquisition. It is for this reason that the ungraded student on entering the high school so frequently excels his graded competitor of equal ability. He can apply himself longer, and more intently seeks the substance and grasps the salient points of the lesson. Too frequently the graded school pupil is machine-made on account of the rigidity of periods for study and recitation. Also his pabulum may be of such dilute character that he is unable to acquire mental robustness which comes through vigorous mental exercise. He may be more systematic and have a more general knowledge and ornamentation, but he lacks the power of concentration and ability for hard study.

In the common ungraded school the problem of promotion is practically solved. The small number in a class makes the distinction in ability more apparent. The more rapidly-developing pupil can be allowed to leap ahead or be promoted into another class, while those requiring a more moderate pace can progress as their mental constitution will allow. The transition from one class to another is easy; for the pupils are in the same room and under the tuition of the same teacher.

COURSE OF STUDY.

Probably nothing can help our common schools to a more complete and systematic organization of the individual school and solidarity of our school system than the publication and distribution, at State expense, of a course of study. Such would insure continuity of work and mitigate to a large extent the disadvantages and interruptions resulting from the frequent change of teachers. From such a course any teacher would be able to know more definitely the amount of work performed by a predecessor in a given term. Also a teacher would be relieved of much of the random work now performed resulting from inexperience or aimlessness on the part of some of our teachers.

A course of study is not a rigid chart, but a guide in the conduct of a teacher's work; gives some definite end to reach, and anchor to essentials. The effect upon the pupil would be most salutary. In whatever way the teacher is benefited the pupil is benefited to an equal degree. The pupil will be better taught, for the teacher will be more vital and concentrated. But better than this, a goal will be placed before the pupil which will challenge his best endeavors. This focuses his efforts, stimulates his ambition, makes him systematic, and affords a standard for self-measurement. Children need definiteness of aim and work as much as the business or professional man.

VIRGINIA.

[From the report for 1892-93 of Hon. John E. Massey, superintendent of public instruction.]

EXAMINATION AND CERTIFICATION OF TEACHERS.

While it is yet too soon to estimate the full value of uniform examinations for teacher's certificates, there is general concurrence in the opinion that this important movement has produced good results in Virginia. Its tendency is to diminish the number of incompetent teachers and to stimulate to higher attainments many who are already proficient. No one claims that the system is perfect. But, in my judgment, with all its imperfections, it is vastly superior to the methods heretofore pursued. I hope to see the system fully introduced during the coming year, when the cause of some objections now urged against it will be removed.

The action of the board of education last year, looking to the improvement of teachers by a revision of the regulations governing the licensing of applicants for teacher's positions, has already had a good effect. These regulations provide for the issuance by county and city superintendents of schools of three grades of certificates—first, second, and third. The first-grade certificate continues in force for a term of three years, and may be renewed for any period not exceeding two years; the second grade continues in force for a term of two years, and the third grade one year. The subjects embraced in the examination are: Orthography, reading, writing, arithmetic, grammar, geography, history, physiology, and hygiene, and, for a first and second grade certificate, the theory and practice of teaching also. In case an applicant desires to apply for a school in which the higher branches have been or will be introduced, he must be examined on such higher branches also. No certificate or permission to teach can be issued to any person who is under 18 years of age, and no first-grade certificate can be issued to any person who is under 20 years of age and who has not taught successfully ten school months. The certificates issued by county and city superintendents are valid only in the county or city where issued, except that the first-grade certificate is valid in any other county or city of the State when indorsed by the superintendent of such county or city.

The board, furthermore, authorized the superintendent of public instruction to issue two grades of State certificates, one to be valid for the term of seven years, known as the professional certificate; the other to be valid for life, known as the life diploma. These certificates can be issued only to those persons of good moral character who passed thorough examination in all the branches prescribed for a first-grade county certificate and such other branches as the State superintendent may direct.

Such certificates can in no case be granted unless the applicant has had an experience as a teacher of at least two years, and can satisfy the State superintendent of his ability to instruct and manage a school. These certificates are valid in any county or city, and the holder is authorized to teach in any of the public schools of the State without further examination; provided that if the holder desires to take charge of a school in which other branches are taught than those on which these certificates are based he must be examined on such branches also; provided further, that if a holder of a life diploma shall at any time cease to teach or to be engaged in other active educational work for the space of three years he shall be liable to a reexamination and to a cancellation of his certificate, subject to rules prescribed by the superintendent of public instruction.

The subjects embraced in the examination of applicants for professional certificates are: Orthography, reading, writing, arithmetic, grammar, geography, history of the United States, general history, algebra, physiology, civil government, Virginia school laws, elementary physics, and theory and practice of teaching.

Applicants for life diplomas, in addition to the above-named branches, are examined in geometry, chemistry, natural history, botany, geology, English literature, composition and rhetoric, psychology.

Diplomas and certificates are issued to applicants who show a standing of 75 per cent in reading, writing, spelling, arithmetic, grammar, geography, history, algebra, and physiology, and an average of 75 per cent in the other branches required, and who do not fall below 50 per cent on any one subject.

If applicants so elect, they may be given two years in which to complete the examination, and will be credited the first year with those subjects in which they shall have made the required percentage.

The holder of a professional certificate may obtain a life diploma by passing examination in all the additional branches, as stated above, and furnishing satisfactory evidence of continued success in teaching.

Before the examination begins applicants are required to present to the examiners satisfactory testimonials of good character and proof of at least two years of successful experience. When possible, testimonials should be presented from the super-

intendent of the county in which the applicant last taught and the superintendent who gave the last certificate under which he taught.

In conformity with the requirements of the regulations examinations were held at Bedford City July 25, 26, and 27, 1892, and at Salem July 24, 25, and 26, 1893. At the first examination 9 or 10 applicants presented themselves, but none making the required marks on all subjects no certificates were issued. Several candidates acquitted themselves well. Credits were given for subjects on which the required percentage was reached. Last July 36 teachers presented themselves for the test. Two of those retired after perusing the first paper. Two withdrew after attempting one or two subjects. Twenty-four left part of the work for next year. Eight essayed answers on every branch demanded for the professional certificate, and one nearly completed the work for life diploma. * * *

These certificates should be held only by teachers of experience and ability, and it is a grievous error to encourage others to hope for them. At the examination last summer teachers appeared with the strongest indorsements whose educational qualifications scarcely entitled them to a third-grade certificate in a district where the teaching force is unusually weak. * * *

I believe that the granting of State certificates will give a vigorous impulse to larger academic and professional attainments and a more distinctive and permanent character to teaching as a profession.

WASHINGTON.

[From the report for 1893–94 of Hon. C. W. Bean, superintendent of public instruction.]

APPORTIONMENT OF SCHOOL FUNDS.

The manner of apportioning the common-school fund among the various districts is a matter that has often been the subject of interesting discussions, and, while the method at present in vogue seems not to have been very seriously criticized since its adoption, there are grave doubts as to its efficacy in accomplishing the best results possible with the fund at our disposal. It has been urged by a number of our experienced county superintendents that the average daily attendance at our schools might be largely increased by the policy of basing the apportionment upon the average daily attendance of the respective districts rather than upon their enumeration of children of school age. It must be admitted that there is a manifest justice in applying the school funds to the maintenance of schools in those districts where most children are inclined to attend school. It is also evident that with such a provision school officers and patrons would be much more diligent in the enforcement of our compulsory law in regard to attendance. There would be tangible inducements to them to see that all pupils of school age were not only enrolled in the schools, but that they were in actual attendance as many days as possible during the school year. It is sometimes urged against this method of apportionment that it leads to a wholesale falsification of register entries on the part of teachers with the connivance of district clerks. To this it may be answered that the present method presents equal temptations to false enumeration of pupils, and that the former class of false entries is much more easily detected than the latter. A more serious objection is the contention that an epidemic or serious contagion might disastrously reduce the average attendance in a district through no fault of the officers or patrons, thus cutting off a large portion of the appropriation from a district whose patrons, pupils, and officers had used their utmost endeavors to avert the calamity. While this argument is entitled to great weight, I am of the opinion that the great gain to the whole State by reason of its salutary effect on the attendance at our schools, renders the proposition worthy of the careful consideration of the legislature.

UNIFORM TEXT-BOOKS.

Whether it is best to have State, county, or school district uniformity, are questions upon which the best judges differ. In older States where the same pupils reside in a district from year to year, the only changes in the school enrollment being caused by the appearance of the younger children as they grow old enough to attend school, and the disappearance of the older as they complete the prescribed course or leave the school to engage in the work of breadwinning, it matters little what division is taken as the unit in the adoption of books. But in a new State where many families change residence at least once in a year, often leaving not only the district but also the county, it is very desirable that the division chosen as a unit for adoption should be larger. The first State legislature, after due consideration, decided upon State uniformity, and I think that it has so far been, in the main, satisfactory. The plan of district uniformity has few advocates in a State so new as ours, and

about the only thing that can be said for county as against State uniformity is that the scandals connected with adoption would be less notorious, even if no less certain. It is a significant fact that among all the resolutions passed by teachers' institutes on the subject of text books, not one has been reported to this department as favoring a smaller division as a unit. The principal argument used against State uniformity is the fact that the interests at stake in such extensive adoptions are so great as to vastly increase the temptation to corruption. In answer to this objection it may be said that only corruptible men can be bribed, whether the interests at stake be large or small, and it is evident that the probabilities are largely in favor of securing one small board of incorruptible men for State adoption, with the entire State from which to select, more easily and certainly than can one such small, incorruptible board be selected in each of the 34 counties or in each of the 1,800 districts. The same considerations serve as a complete refutation of the argument that corruption in connection with adoptions can be prevented by enlarging the board of adoption. This is to proceed upon the assumption that the probabilities of securing a majority of honest and incorruptible men increase with the number of men selected. A sister State, with a board of adoption consisting of more than two score men, has not entirely escaped intimations of crookedness in the matter of adoptions, and cases are not entirely wanting, indeed, where corruption has been suspected when books were adopted by an entire legislature. No, the fact of corruption can be prevented only by the selection of an incorruptible board, whether large or small; the intimations and charges of corruption can not be prevented by any means.

FREE TEXT-BOOKS.

It is not generally known, perhaps, that a number of districts in the State have free text-books already, and yet such is the case. Without any specific warrant of law several districts have supplied their pupils with free books, and the plan is reported as entirely satisfactory. The least the legislature can do in this matter is to enact a law specifically authorizing boards of directors, when in their judgment it is feasible, to apply a portion of their school fund to the maintenance of a free text-book library for their respective districts. Even with this small concession, I venture to say that within the next year a large number of free libraries would be reported. But it is wise to go still further. A law may properly be enacted providing for the furnishing by the State, in such manner as may be determined by the wisdom of the legislature, of free text-books in one or more branches for all pupils in the State. A similar plan has worked admirably in at least one of the States. Such a plan would give the school patrons a foretaste of the benefits arising from free books, and would, in connection with the law before suggested, doubtless result in the establishment of free text-book libraries in most of the districts in the State within a few years.

EXAMINATION OF TEACHERS.

A system of examination and certification of those who wish to engage in the occupation of teaching has long been considered an essential part of the public-school machinery of a State. Futile as is the attempt in many cases, and unsatisfactory as are the results, we still try to measure the teacher's grasp of mind, her knowledge of the various branches, and tact in administering school discipline by a system of set questions, record the results in terms of that great scientific touchstone, the centesimal scale, and certify therefrom that the applicant "is competent to teach any school in ——— county for a period of —— years from date." The many absurdities of an examination as a test of a teacher's ability have often been paraded before the public, and superintendents, committees, and educators generally have long felt the need of a satisfactory test. So great is this unrest, indeed, that an open outburst of this sentiment against examinations is to be expected periodically under any system that undertakes to make it more than a formality. But what shall be done in the premises no sage appears to be able to say, and we continue to follow the old plan and hope for a deliverer.

UNIFICATION OF THE SCHOOL SYSTEM.

Section 2 of the constitution of Washington requires that "The legislature shall provide for a general and uniform system of public schools. The public-school system shall include common schools, and such high schools, normal schools, and technical schools as may hereafter be established." To complete the list of schools controlled by the State, we must mention with the above the State University and the Agricultural College and School of Sciences. Though the latter is supported mainly by the General Government, at present it is, with certain necessary restrictions as to the character of the work done, under State control. This list of schools is designed to constitute the machinery to be used by the State in furnishing her subjects not only a liberal education, but also such special training as is necessary for the successful following of the more common trades and professions.

Tuition in all of these schools is provided at public expense, and the poor man's child may pass from the primer to a degree in the university with no charge for instruction. Such a system, when fully completed in detail and properly directed, may with good reason be considered the crowning glory of any State. But it is not to be expected that such a system will be found to exist in a State so young as ours, without showing blemishes and defects of greater or less concern to its friends. Passing over the less prominent hindrances to the most harmonious and satisfactory working of our system, it must be apparent to a moderately close observer that one of the defects which can fairly be charged against our system is that, for lack of sufficient central control and general unity of plan, much energy is lost. While uniformity is certainly not desirable simply for the monotony it suggests, yet when the lack of it results in a serious loss of energy, it is a matter worthy of great concern and prompt attention.

A very good common-school course of nine years has been prepared for our rural and village schools; our larger cities have been provided with complete graded courses from the first year to the close of excellent high-school courses, the whole being of such character as not to suffer by comparison with any cities in the Union; our normals are conducted according to a uniform course; the university and the agricultural college have definitely prescribed courses worthy of such institutions. In fact each part of the system does its own work according to a wisely contrived scheme; but the articulation, or rather lack of articulation, of the various parts results in a vast amount of energy being dissipated by unnecessary duplication of work.

The courses of study in the larger cities, wherein they do coincide, are uniform largely by accident, and hence the high-school course in no one of them can be taken as a standard from which to measure the attainment to be prescribed for the graduate from the common school. There is no articulation between the high schools and the university and agricultural college, nor has the course for normal schools been prepared with any special reference to any high school or the common schools as a feeder. The boards of directors of the graded schools of our villages are left to prescribe such a course for their respective schools as may suit their fancy, and the result is great dissimilarity. As a consequence of this chaotic state, at every point where two departments of the system should articulate there is a more or less extensive duplication of work. The college and university find it necessary to maintain subfreshmen classes in order to supplement the work of weak high schools; strong high schools are tempted to do work properly belonging to the higher institutions; and in a degree probably unnecessary there is an overlapping of work among common schools, high schools, and normals. The student who has not yet learned there is no royal road to learning is thus permitted to flit about among all the schools, seeking a pleasant and easy road to knowledge and wasting golden moments and opportunities. He does so because the lack of unity in the system permits him to find work of his grade, at least approximately, in more than one class of schools.

But a still worse feature is the fact that the same work which is being done in one school or class of schools, perhaps to the partial exclusion of the legitimate work of those schools, is being paid for unnecessarily in another.

It seems to me this useless waste of money and energy might be prevented in large measure by the appointment of a competent commission to so unify the courses of study in the various schools of the same grade, where necessary, and so arrange for the proper articulation of the different grade of schools, from the common school to the university, that the whole would constitute what the constitution really designs—a uniform system. The board of education could be utilized as a part of that commission, and to it could be added representatives from the different schools of the system. Under more auspicious conditions I would recommend that the board of education be permanently enlarged by the addition of representatives as above indicated, and constituted a general board of regents or supervisors with power to control the graduation of candidates from schools of all kinds, and to fix the conditions of admission, promotion, and graduation. The temporary commission for the purpose of unification of the work seems more suitable, however, to present conditions. Economy alone, all other considerations aside, calls for some action of the legislature at a very early date.

WEST VIRGINIA.

[From the report for 1893–94 of Hon. Virgil A. Lewis, State superintendent of free schools.]

A GRADED COURSE OF STUDY FOR COUNTRY AND VILLAGE SCHOOLS.

Of the 282,933 children of school age in West Virginia it is fair to assume that more than 200,000 either attend or are enumerated in country districts. The city and town schools are carefully graded, and in this particular the State need have no con-

cern. But ever since the establishment of our school system, the work in the country and village schools has been as diversified almost as the teachers employed therein could make it.

Thousands of these country schools have been in operation nearly a quarter of a century, and for the greater part of that time not so much as an effort was made to secure systematic work and consequent uniformity of method in them. But in later years the attention of the leading educators of the State has been turned to the subject of a proper course of study for country and village schools, and to such an extent was it advocated and agitated by the school men of the State that our law-making power has caused such a course to be prescribed; but, with an exception in Jefferson and a few other counties, year after year the same routine work has gone on, and instead of one teacher beginning where another ended, all have begun and ended at the same place.

The time has gone by when our system of free schools can be regarded as a kind of charitable institution, and it must now be regarded as the vastest business enterprise of the State, for it to-day invests more money in it than in all other interests combined. There is an implied contract existing between the State as the one party and every child on the soil of the State as the other party, and this contract obligates the former to give to the latter the opportunity to secure, at least, a common-school education. The State is now endeavoring to comply with its part of the contract. Heretofore our school work has been of the most fragmentary character; but now, when so much money is being invested in it, it is time to systematize it.

"The greatest possible return for the money invested," has long been a business maxim, and now it has become an educational maxim. Realizing this, almost every one of the American States is acting upon it, and at last, in the interest of economy, is looking in the right direction—viz, toward the country schools. Our own people are in line with the most advanced thought upon this subject, and in 1891 our law-makers amended our school law so as to read as follows:

It shall be the duty of the State superintendent to prescribe a manual and graded course of primary instruction to be followed in the country and village schools throughout the State, arranging the order in which the several branches shall be taken up and studied and the time to be devoted to them, respectively, with provisions for advancement from class to class; also for the examination and graduation of all pupils who satisfactorily complete the prescribed course.

PREPARATION OF THE COURSE.

In preparing this course of study in compliance with the legal requirement, the aim throughout has been: First, to supply a plain, practical, and progressive outline, which, if followed carefully, will give the pupils a thorough common-school education and secure a systematic development of their intellectual powers; second, to unify the work of teachers and superintendents throughout the State; third, to introduce the common-school branches only; fourth, to simplify classification and regulate gradation and promotion, thereby making the work of the teacher lighter, but more systematic and effective; fifth, to divide the entire course into definite portions, so that a record of the progress and standing of each pupil may be preserved and the confusion and loss of time usually resulting from frequent changes of teachers avoided.

BRANCHES TO BE TAUGHT IN THE PRIMARY SCHOOLS.

These are enumerated in the school law, as follows: Orthography, reading, penmanship, arithmetic, English grammar, physiology, general United States and State history, general and State geography, bookkeeping, civil government.

The work of grading and classifying the village and country schools goes on rapidly, almost the entire teaching force of the State having engaged earnestly in its introduction. Here the work in the primary schools of the State is being unified and system and order have taken the place of disorganization and disorder.

Far above these schools stand the State university and normal schools at the head of our educational system, but there is a great gap between them. The almost entire failure of

OUR HIGH-SCHOOL WORK,

with the causes of the same, is matter for the most serious consideration on the part of our legislators. * * * Secondary education or high school work has been sadly neglected, so much so that there are at this time 30 counties of the State that have neither high nor graded schools. The failure has been so complete that there are but 17 high schools in the State, and only 7 of these have been established under the provision of the general law, the other 10 having been organized in independent districts under the provisions of special statutes creating the said independent districts. Why is this? The answer is plain. The magisterial districts into which the counties are divided have been, in many instances, overburdened by tax-

ation necessary to defray the expenses of primary schools, and they have been therefore unable to support a high school, and thus the great middle link in the educational chain which should connect our primary school work with the higher school work of the State has never been present and never will be under the present law. * * *

The remedy lies in the establishment of thorough high-school work upon a different basis. "If it be true that in 1892 there were but 17 free high schools for the 200,000 children and youth of the State, only 5 of these maintaining a three years' course, 'the other 12 comprising the higher grades in graded schools, the amount of work being quite limited and irregular;' and that 'only 11 per cent of the school population of the State enjoy the advantages of high-school instruction,' there is evidently a loud call for a movement in this direction. This deprivation is all the more felt by reason of the comparatively small number of reliable academies in West Virginia, which in this respect seems to lag behind all the States of the South. It is difficult to understand why the prosperous city of Wheeling—foremost in the days 'before the war' in the organization of public schools—should still 'linger shivering on the brink and fear to launch away' in the establishment of a high school that would be a model and inspiration to the Commonwealth. The admirable service of the superintendent and able principals of the several grammar schools of that city in caring for the higher grades in these buildings seem to have persuaded the educational public to let them go on indefinitely trying to perform this double duty. But sooner or later, despite the most conscientious service of teachers in the primary and grammar grades, a school system bereft of its proper arrangement for the secondary education will become like the fabled tribe of men who go about 'carrying their own heads under their arms.' God created the head to rise above the shoulders; and the idea of an educational system that has not the high school in a community able to bear its expense is supplying one illustration more of the favorite doctrine of the small politician—knocking out the brains of things to save money. The feet do not move the head, but the head moves the feet, is a maxim as true in the common school as in physiology. Without an effective head, any common-school system inevitably falls under popular disrepute, as an efficient arrangement that looks up to another and a radically different system to piece out its work. The State of Massachusetts has followed out the irresistible logic of the common-school idea, by making the support of a high school, with a classical department of forty weeks, compulsory on all places of a certain population and valuation; and of an English high school in all towns of a certain lower standard, with the provision that any one of its 350 towns not included in these two classes may, by vote in town meeting, establish a school of the same grade. By the act of the legislature in the past season, every town in the State is now compelled to pay tuition for the high-school instruction of all its children who may require and are prepared for it.

"Of course no State of the type of West Virginia, with a people so dispersed over a wide area, and few towns of sufficient size and valuation to support a proper high school, can expect to adopt a system of this sort. The deprivation of the children of all the Southern States of high-school opportunities is one of the chief disabilities of their educational system. We have always hoped to see in these States a fair trial of the support of a proper free high school by each county, in which all youth of suitable acquirements could be educated. Established at the county town, with a department for instruction in pedagogics and arrangements for industrial training, it would easily become the most attractive institution in the county, and be a constant stimulant to the entire system of rural district instruction. Especially in West Virginia, where the present system of grading and graduation for country schools is in operation, it would be practicable, and place the State in the front rank of educational commonwealths. The proper way to begin would be that some enterprising county should try the experiment. One year's success—and with proper management there need be no failure—would put the movement on wheels and send it 'booming' up and down the State.

"Meanwhile, as already suggested, it behooves the cities and districts that attempt to sustain a public high school to make it so efficient that it will attract a larger number of pupils. One of the most serious features of the school life of the South is the small number of boys over 15 years of age found in the schoolroom. One reason we believe is the weariness and disgust of the average boy at a great deal of the 'fooling' in the lower grades, from the inexperience and weakness of the teachers. Long before he reaches the perilous age of 14, this youngster has a very definite idea that he will get out of that sort of life as soon as may be. But a good high school, presided over by a competent man or an exceptional woman, will be an elevator to lift up large numbers of boys who need especially that school training between the years of 14 and 18 which will tell on their entire future life. The chronic defect of the present English system of public instruction, established the same year as the public schools in Virginia, is that it can not obtain parliamentary aid above the elementary grades. As a consequence, it is regularly avoided by the 'middle class,'

and remains, with all its undeniable merits, a school for the poor. It is not well that a State that thirty years ago cast in its lot with the new American ideal of public and private life should linger longer in the cold shadow cast across the ocean by the conservatism of the mother land."

NORMAL SCHOOLS—THE REQUIREMENTS THEY SHOULD FULFILL.

Our normal schools seek to lead the student to acquire a thorough scientific knowledge of the branches he is to teach. This knowledge is the prime condition of any success in the schoolroom. The teacher's instruction in a given subject can never rise above his own knowledge of that subject. No knowledge of methods of instruction however excellent in themselves, no fund of general information however accurate and extensive, can be substituted for the specific and thorough knowledge of the subjects which the individual is required to teach. He must, at least, know these. General culture and information will greatly augment the teaching power of one already possessing the requisite knowledge of what is to be taught, as will also correct methods of instruction; but these are auxiliaries to, not substitutes for, a definite understanding of the matter of instruction. The teacher must himself know that which the pupils are expected to acquire under his tuition. His mastery of these subjects must be thorough and complete. Other things equal, he is the best teacher of a subject who has the most thorough and complete knowledge of it. Not only must the teacher be conversant with the facts of various branches he teaches, but he must know them in their logical connection; it is only thus that they form a subject of study. Many persons, under the usual tests, show a fair degree of familiarity with the subject-matter of this or that branch of learning; but when required to think of the subject as a system, independent of a text-book treatment of it, they are found to possess no adequate coherent knowledge of it.

Therefore, as the primary requirement, then, the normal school seeks to ground its students thoroughly in the knowledge of the branches to be taught in the common schools of our State. For this reason the greatest degree of encouragement should be given this department of our school work.

WISCONSIN.

[From the Report for 1893–94 of State Supt. Oliver E. Wells.]

SCHOOL LIBRARIES—THEIR OBJECT.

A love of good reading by a people is regarded as one of the best guarantees of good government, and therefore of general prosperity and happiness. It gives not only the diffusion of knowledge that causes general intelligence, but it promotes right living and thinking. One of the best founded causes of complaint against our schools, both public and private, has been the fact that the masses of our people, who have obtained their education in these schools, are not habitual readers of good literature. They have not formed such habits and tastes in childhood as to make all the years of their lives add knowledge by reading. They do not draw inspiration and information easily, lovingly, and habitually from books, the great cold-storage houses of the best of the world's experience. They believe in good reading, but in their homes many of them read little or go by choice to literature that is worthless or morally and socially debilitating. The schools have trained children in the mechanics of reading, but have not given that enjoyment in good literature, that zest for books that comes only from continued interest and pleasure in their perusal. Recent experience in the schools has proved what has long been claimed by our wisest teachers—that the study of text-books must be supplemented by much practice in reading interesting books. Children need plenty of opportunity to read attractive stories, biographies, tales of travel, and adventure, till the zest for information and interest, growing by what it feeds upon, begets a craving for wholesome knowledge which can best be satisfied by reading.

Children need opportunity in order to become habitual readers. They must not only know how to read, but must have plenty of fresh and interesting material to read while the mind is most rapidly developing and fixing its habits. Give the average child mental food for good wholesome thoughts and he will build up a healthy, vigorous mind. The opportunity to read somewhat widely should be offered to every boy and girl in Wisconsin, no matter how poor their parents may be. The text-book work of every school should be supplemented by a good school library.

In 1887 the legislature passed a law authorizing the town treasurers to withhold annually from the school-fund income which passes through their hands, 10 cents for each person of school age in their respective towns.

Five hundred and sixty-two towns have purchased libraries under this law. These towns have 3,643 district schoolhouses located in them. The more populous towns

have, as a rule, been most easily persuaded to comply with the law, partly because they are usually wealthier in proportion to their population, and partly because many of them contain graded schools whose teachers have been more earnest and active in their efforts to secure libraries.

In many cases where teachers and county superintendents have failed to induce township officers to purchase libraries, they have aroused an interest that has caused district officers to buy. A careful estimate shows that nearly two-thirds of the pupils who are attending the district schools in Wisconsin have the use of fair school libraries. The interest in such libraries has been even more marked in the cities, and a large proportion of them have fair and some of them excellent libraries.

Under the law it is the duty of the State superintendent to recommend lists of books suitable for such libraries. The books for these lists have been selected with great care. The department has first decided upon a number of books which are worthy in style, matter, and form. The experience of teachers, librarians, and parents is then drawn upon to find which of these worthy books have the crowning merit of being interesting to children.

An illustration of the interest excited by such volumes is found in the fact that of the 80 townships which made their first purchases of town libraries in 1891, 67 have made other purchases, and in the remaining 13 the failure to buy has been due to other causes than popular disapproval of the books.

Unfortunately, more than one-third of the pupils in our district schools have no access to school libraries, and many of them are children who have the fewest home advantages. The towns now unprovided with libraries are the least progressive in school matters, and from present appearances some of them are not likely to get libraries until the present generation of pupils have gone out from school.

It is high time for the State to decree that even the poorest boys and girls may have access to small libraries of the best children's books, that some small portion of our great school-fund income shall be set aside until every district has a small free library. The library law should say "the town treasurer shall set aside 10 cents for every person of school age for the purchase of school libraries," and not leave it, as now frequently happens, to time-serving officials to deprive the boys and girls of a birthright which the State constitution intended to guarantee to them.

COMMON SCHOOLS.

There is little chance of overestimating the importance of the wayside schools as factors in our educational progress. It is true that the leaders of thought in every forward movement come in ever-increasing numbers from the university, the colleges, the normal and high schools; but the advantages that these institutions offer are still beyond the reach of the great majority of our people. The destiny of States is in the keeping of that great body of people whose only intellectual quickening comes from the country schools. The stability of our own State rests on the morality, intelligence, and contentment of that uncounted multitude who go into life with no other mental equipment than such as the wayside schools furnish. If these schools inculcate respect for law, deference for the organized institutions of society, the body of our people will be fortified against those appeals to prejudice and passion which are a constant menace to orderly government.

The best work done by the schools.—But the duties imposed by citizenship become more difficult as civilization becomes more complex. To meet the responsibilities thus imposed men need an ever-enlarging mental furniture. This growing intelligence must, in the main, be derived from reading, and so it is imperative that the schools teach boys and girls to read and to love reading. To teach the young to take thought quickly and easily from the printed page, and to beget a hunger for the world of pleasant and profitable knowledge embalmed in books, is the best work done in schools. Pupils who go from school wanting this training and without this awakening are likely to remain illiterate. Knowledge of the simple computations necessary to the farmer and the wage earner may consist with the densest ignorance. They whose school life terminates while reading is still a laborious process, and the thought of the printed page is apprehended with difficulty, are little likely to meet the growing demands of citzenship. It is manifest that this preparation can be imparted only by schools that share in the general progress. The university, the colleges, normal and high schools of the State recognize the changing conditions, and year by year are adapting their curricula and methods to the new demands. While much remains to be done for and by all these agencies, there is no doubt that their efficiency is steadily increasing.

The common school does not meet expectation.—If the contention be correct that the common school is the most important agency that the State has instituted for the equipment of its future citizens, it is pertinent to inquire how this agency is discharging its trust; whether its efficiency increases with the augmenting demands made upon it.

Much has been done during the incumbency of the present superintendent to aid, encourage, and stimulate country teachers. Normal-school pupils have found their way in increased numbers to the wayside schools. These carry with them better conceptions of the work of teaching, and awaken in their several neighborhoods a better appreciation of the worth of schools.

Summer schools and teachers' institutes have done much to stimulate the zeal and increase the power of teachers. Conventions of county superintendents have wrought good for the schools in unifying the work both of superintending and of supervising these schools. Superintendents themselves have become more active, intelligent, and aggressive. And yet the average district school is not adequate to the demands of public needs, nor is it meeting the reasonable expectation of intelligent people. Indeed, those who have been long and intimately acquainted with the common schools of the State doubt whether they are doing better work now than they did twenty-five or thirty years ago. If the doubt be well founded it certainly furnishes cause for anxiety. It is trite to say that a chain is no stronger than its weakest link. It is worth while to reiterate that common schools are fundamental in our system. If these be inefficient the reliance of the State upon the intelligence of its citizens will be misplaced, and the power of other schools will be sapped. If any of the causes that prevent the progress of these schools are irremediable, it is doubly important that we know and apply the remedy to those that may be cured. The tendency of population, especially of the brighter and better educated part of it, toward business and social centers is constantly robbing the rural schools of the direction and support of those who best appreciate their worth. Increase in the number and efficiency of high schools attracts the brighter pupils from the country schools, thus depriving them of the power of begetting that mental hunger in which learning forever roots. But this tendency toward urban life is as wide as civilization and can not be controlled by legislative enactment.

The school district—Its defects.—Reference has been made to the fact that the neighborhoods in which country schools are situated are but slightly affected by those movements of thought to which urban communities respond quickly. The refluent wave has spent much of its force before it reaches the remote settlements. But, in my judgment, the main causes that retard the progress and impair the usefulness of the common school inheres in our system. The management and support of these schools is imposed upon the inhabitants of districts whose geographical outlines have been determined by interests that are oblivious of public good. These districts are unnecessarily unequal in wealth and school population; many of them are so small and their resources so meager that to equip and maintain efficient schools would necessitate unreasonable taxation. The country schools are, in large measure, dependent upon the support and guidance of communities that have no adequate conception of the methods by which good schools are made. Petty jealousies and neighborhood dissensions are reflected in their management. Untoward influences that would be impotent in wider fields distract their councils and often destroy their usefulness. Families are retained in districts whose schoolhouses are inaccessible to their children because the electors and officers are unable or unwilling to part with any source of revenue. Many schoolhouses are situated on byways, away from main thoroughfares of travel, and as the districts are too poor to provide for breaking roads or for transporting the pupils these schools are depleted at a time when children are freest to attend.

In the organization of districts and in the conduct of district schools the interests of private and parochial schools are often regarded as paramount, and in any real or supposed conflict of interests it is the public school that suffers. It is no part of the purpose of this report to disparage parochial schools. Many of them have done and are doing excellent work. In commercial centers where the increase of population constantly crowds public school facilities they seem to be indispensable. But the primal thought in the foundation and maintenance of these schools is to train for church membership, not for citizenship. In the settlement of these perplexing questions that cloud the future, the hope of the country must rest on that great body of people who have come up to citizenship through the training that the public schools alone give.

The township system recommended.—In my judgment, the substitution of the township for the district as the unit of the system would result in the increased efficiency of the common schools. I think it would obviate many of the difficulties that impair their usefulness, and would modify others. No human system of government is perfect, and no method in the administration of school affairs is exempt from the necessity of constant and intelligent care. The following are some of the advantages that it is thought will result from the adoption of the township system: It would greatly reduce the cost by reducing the number of district schools. There are few congressional townships that could not be furnished with abundant school facilities at six schoolhouses well located. Most of the districts were formed and their schoolhouses located as the exigencies of settlement seemed to require. The conditions that

determined the outlines of these districts and the positions of their schoolhouses long since disappeared. These outlines are now more grotesque than are those of a political gerrymander. Local pride and neighborhood jealousies almost uniformly resist a rational readjustment of boundaries. Schoolhouse sites that are no longer central or convenient can be changed only by a struggle, and the result is generally determined by the number of votes that one or another faction can muster, seldom by the equities of the case. Now, it is submitted that a board of directors having a representative of every district in the town can not be indifferent to local interests, while the larger school interest of the town will in the main dictate its policy. Such a board could not limit its vision or its activity to a single district, but must be guided by the school interests of the town as a whole. It would readjust district boundaries so as to allow children to attend the most convenient schools. It would reduce cost in the town by suspending or suppressing those schools that are too small in school population to maintain interesting or efficient schools, and would provide for carrying the remaining children to convenient and accessible schoolhouses. How much this would save to the average town may be inferred when it is remembered that last year there were in the State 183 districts whose average attendance did not exceed 5; 858 in which it was not above 10; 2,418 in which it was not above 20. Schools with larger attendance would attract better teachers and boards would be able to continue them longer in place. Boards of directors would be less influenced by the nepotism that is so baneful in the districts. When taxation is made equal throughout the town, the smaller districts will demand equal consideration with the larger ones in the selection of teachers and in the equipment of the schoolhouses. Larger schools and longer terms will greatly facilitate the classification and gradation of pupils; will impart to the schools the zest that is born of numbers, to the pupils the ambitions that spring from rivalry, and will offer to teachers a field for and an incentive to their best work. It is reasonable to expect that the adoption of this system will result in giving to the State more competent school officers. Five men fit to guide school affairs may be found in each of a host of towns that can not each furnish 15 men. The change of which we are writing would equalize school advantages and burdens. Under our present system it is not uncommon for school district taxes to be from four to seven times greater in one district than they are in another district of the same town, while the newer portions of many towns are deprived of any school privileges. Finally, the adoption of the township system would offer the possibility of effective school supervision. Every year a multitude of young people find their way into the teacher's calling who have no practical knowledge of the teacher's work. These must learn to manage and instruct amid the perplexities of the schoolroom—learn their trade at the expense of their pupils. How much these young people might be aided and their schools improved by the advice and suggestions that a teacher of experience can give only they who have charge of a system of schools may know. The county superintendent can, in general, visit a district but once. Often his visit is so near the end of the term that his suggestions are worthless to the school, however valuable to the teacher. Many of these officers are invaluable as superintendents; as supervisors, their work is and must be nearly barren. A better system must be established if we are to secure harmony and efficiency in the common schools.

HIGH SCHOOLS.

What class of pupils attend them.—The free high school extends to the child of every citizen the possibility of higher education. Few are so poor that they can not by labor and self-denial complete its course of study. Having done this, the door to lucrative employment and a collegiate and professional course is open to them. The special reports from 119 high schools published in the last biennial report show that the children of farmers constitute by far the largest class of pupils in the high schools. The next largest class is formed by the children of unclassified day laborers. The fourth largest class are pupils supported by widowed mothers. More than one-half of all the parents or guardians who have children in the high schools pay no tax or are assessed at less than $1,000. The claim that these schools are maintained by the many for the benefit of the few rich can not be maintained.

These schools perform three important offices. They form the connecting link between the common schools and higher institutions of learning; they are the local academies in which many persons are given their only opportunity for higher learning; and they are the chief instrumentalities for the better training of teachers for the common schools.

Tendencies to be guarded against.—There are some tendencies, however, to be guarded against. In some communities there is a desire to make them commercial colleges, manual training schools, or otherwise to warp them from their legitimate sphere. Too often this effort comes from the desire of the principal to "popularize" his school. It has sometimes been necessary to notify the authorities that the State has made no appropriation of public money for such purposes. A more common evil is the

attempt of inexperienced teachers to expand the courses of study and to ride their hobbies. They seem to forget that the State does not purpose to support two hundred little colleges or universities. It is for this reason that it has required the State superintendent to prepare courses of study for them and made his approval a prerequisite to the apportionment of money. In the effort to hold them to their proper work the department receives strong moral support from the university's control of the accredited schools. It will not retain on this list schools which are not able to do fairly well the work of the recommended courses and it disapproves attempts greatly in excess of these requirements. As it would appear discreditable to the management of a school to allow it to be degraded from the list after having once obtained recognition, the authorities have great respect for the recommendations of the university. Authority granted in 1891 to withhold the appropriation of money from any district for failure to comply with the laws adds weight to the recommendatians of the State superintendent. I have in a few instances notified the authorities of my purpose to withhold aid, but compliance with the requirements followed so promptly that only one school has been excluded.

The growing demand for specially trained assistants in the various departments of the high schools is full of promise. The number of university and normal-school graduates is now so large that there is no excuse for employing teachers not properly qualified. Not every graduate who desires to do so can teach school, yet a judicious principal or superintendent can soon make a reasonably satisfactory teacher out of an inexperienced but well-trained and ambitious person.

NORMAL SCHOOLS—BETTER ACADEMIC INSTRUCTION WANTED.

The normal schools seem to me to be open to criticism on the ground that they have been unwilling to define their sphere and occupy it. Within the territory occupied by the normal schools are more than 400 graded schools, 175 high schools, and several academies, and yet they say it is impossible to get students suitably prepared to meet their moderate requirements for admission. A large proportion of their instruction is clearly that of the common and high schools, and yet they attempt the curriculum of considerable colleges. Their attendance is large but the number of graduate pupils is small. The performance does not equal the promise. The maturity of their students and the intensity of their efforts justify expectation of better scholarship. Divided attention dissipates acquirement. The student usually undertakes to pursue not less than four academic branches. In addition he must have music, drawing, gymnastics, practice teaching, observations, and discussions and rhetoricals. Such a multitude of heterogeneous subjects preclude that prolonged attention necessary to accurate and permanent impressions. There is also a fatal lack of continuity in the prosecution of studies. To illustrate, algebra is taught as "elementary" and "advance" algebra. The former means the completion of equations of the first degree in an elementary text-book and the subject is distributed by ten-week periods through the two years of the elementary course. The latter contemplates the completion of this same elementary text-book to proportion or series, and is likewise distributed through the advanced course. Their practice may be, perhaps often is, better than their programme, but a pupil who is obliged to teach before graduating often has his algebra or geometry distributed over 6 or 8 years. Many other studies are thus illogically divided. I see no reason why the work should not be more nearly continuous nor why many of the elementary branches should not be completed in the elementary course. The normal schools do not equal the old-time academies in their power to impart a love for learning and an appreciation of its worth. A diminution of the agony and effort elicited by the so-called professional studies and better academic instruction would furnish teachers better trained professionally. The quality of the instruction to which the pupils are subjected is a more potent factor in their professional training than their random observations, loose discussions, and factitious practice.

Pupils who have had no experience in teaching have little to which they can relate the great mass of professional instruction given. In the Oswego normal school the opportunity for real teaching is afforded by adopting one of the ward schools as its school of practice. A portion of the city containing 500 school children is consigned to the school, which becomes responsible for the progress of the pupils parallel with the other city schools, observing the same course of study under the supervision of the city superintendent. There is no serious obstacle to the adoption of a similar plan in some of our schools. Under such an arrangement, or after independent teaching by the pupils, careful professional study and training would find its appropriate place.

AGRICULTURAL COLLEGES—IT IS NOT CLEAR THAT THEY HAVE JUSTIFIED THEIR EXISTENCE.

It is no part of the purpose of this report to question the wisdom displayed by the State in the establishment of any of its educational institutions. The agencies that qualify men to bring to their several occupations and callings the power of sober and accurate thought can never be too efficient, and there is little danger that they will become too numerous. The function of government that imposes on the State the duty of giving to its citizens their professional or technical training has never been clearly stated. Indeed, the line that separates public function from private duty is evidently growing obscure. The motives that impel the State to teach the farmer rather than the shoemaker or the carpenter his trade are certainly far to seek.

The duty of the State to train its boys and girls for intelligent citizenship rests on unassailable grounds. When it goes beyond this and assumes to teach them professions and handicrafts it seems to be entering upon a policy whose sequence is the absorption of individual rights and responsibilities. But toward this kind of socialism the pendulum of opinion seems to be swinging. They who believe that a sturdier manhood comes from self-reliance and self-direction must wait for the refluent wave. It is not easy to overestimate the importance of our farming interests, and any agency that tends to impart to those who are engaged in this pursuit that quickness of apprehension and alertness of thought that characterize those engaged in commercial and manufacturing enterprises is to be welcomed. But agriculture is not a science. It has no body of established doctrines that may be formulated and taught as law or medicine is taught. Mathematics, science, history, language, literature, and allied topics are the same for the farmer's boy as for others. Neither for him nor for others is there a short cut or a royal road to learning. The power of clear and consecutive thinking is the result of severe and protracted mental training. Farmers need it as much as men in other nonprofessional pursuits. Agricultural colleges can offer no superior facilities for the acquisition of mental power. In so far as these schools resort to the same methods that literary colleges adopt to train men and women, it is simply a multiplication of agencies to secure the same results.

The instructional force in our own agricultural college involves an annual outlay of nearly $20,000, and it has graduated 9 students in ten years. The last catalogue showed an attendance of two, one of whom graduated in June. It seems absurd to call such a faculty with so many students a "college." An attendance at the dairy school of boys from the farm for twelve weeks in the winter gives them scant title to enrollment as university students and affords little occupation to the professors. The value of this instruction to the dairy interests of the State is not underestimated, but the cost of maintenance of the college seems disproportionate to the benefits conferred upon those who seek its aid. There has seemed to me to be a serious lack of adjustment to the needs of students that the college has not attracted more to itself. The duplication of the work of the high schools and colleges in the independent agricultural schools of other States indicates that there is no body of organized knowledge to be imparted. The chemistry and botany of the farm are but applications of the general principles of these subjects which must first be mastered. The university proper affords the best facilities for this purpose. The student then needs little assistance in making the application. The school, therefore, seems embarrassed by lack of knowledge upon which to base an extended course of study. It is not clear that these schools have yet justified their existence.

CHAPTER XII.

REPORT ON EDUCATION IN ALASKA.

DEPARTMENT OF THE INTERIOR,
BUREAU OF EDUCATION, ALASKA DIVISION,
Washington, D. C., June 30, 1894.

SIR: I have the honor to submit my tenth annual report on education in Alaska.

The year closing June 30, 1894, has been one of gratifying progress and success, when we consider the small sum of $30,000 which was appropriated for this purpose by Congress.

Each succeeding year emphasizes the need for increased appropriations for education in Alaska. From 1889 to June, 1892, Congress voted each year $50,000 for this purpose. In 1892-93 this amount was reduced to $40,000; in 1893-94 it was again reduced to $30,000, at which figure it has been left this year. It was only by strict economy that the expense of the school system had been kept within the limits of the appropriation of $50,000, but when the appropriation was reduced $10,000 and $20,000 there was no help but to close some of the schools. Consequently the three schools at Klawack, Kake, and Karluk were suspended. The salaries of some of the teachers were reduced, and also the amounts paid to the contract schools. The organic act creating a government for the District of Alaska declares that the Secretary of the Interior shall make all needful provision for the education of the children of Alaska, without distinction of race; but the small sums placed at his disposal by Congress for this purpose practically prevent the fulfillment of the law.

It is very desirable that the pressing needs of the schools should be brought more forcibly to the attention of Congress.

NUMBER AND GENERAL CONDITION OF THE SCHOOLS OF ALASKA.

There is in Alaska a school population of from 8,000 to 10,000; of these, 1,438 were enrolled in the 24 schools in operation during the year. Fifteen day schools, with an enrollment of 846 pupils, were supported entirely by the Government, at an expense of $18,453.20. Nine contract schools, with an enrollment of 592 pupils, were supported jointly by the Government and the missionary societies of the Presbyterian, Moravian, Lutheran, and Roman Catholic churches. Toward the support of these contract schools the Government contributed $8,000 and the missionary societies $77,968.01.

UNALASKA DISTRICT.

Point Barrow Contract School.—Presbyterian; population, Eskimo; T. E. Beaupre, M. D., teacher. The attendance was larger than that of any previous year since the opening of the school, and entirely too large for the accommodations of the schoolroom.

Toward spring, when the whaling season commenced (through which industry the population secure almost their entire living for the year), it was very difficult to keep up the interest of the pupils in the school.

Through the inability of the Presbyterian Mission Board to secure lumber, the school has been kept, through the courtesy of the Treasury Department, in the Government refuge station. At the close of this year lumber has at length been secured, and we may now expect to increase the efficiency of the school through the better facilities afforded the teacher for his work.

Cape Prince of Wales.—This school was closed during the year on account of the inability to secure a teacher to take the place of Mr. H. R. Thornton, who was murdered on the night of August 19, 1893. The murder was committed by a native desperado, Titalk, assisted by two other young men who had previously committed depredations. Mrs. Thornton gives the following account of the occurrence:

"On Saturday night, the 19th of August, about midnight, we were both of us

awakened by a very loud rap. It was very, very dark. We thought that perhaps someone was sick and needed medicine, for the people were all very friendly and were in the habit of coming to us. Mr. Thornton felt sure that no one was going to harm us, and when he went out he said he might be gone a few minutes. Everything was quiet, and oh! the first thing I heard was this awful report. I think he must have opened the door a very little. The hole in the door was the size of a doorknob, and the bullet had gone straight through. This was done with a whaling gun, but there was also a rifle shot in the door. The whaling gun was so close to the outside door that the door was burned. The shot came through and cut through his body. How he ever did it I do not know, but Mr. Thornton shut both doors as he came toward me. He said in quite a strong voice, 'I am shot.' Then I lighted a lamp, for it was dark. He was just inside the sitting-room door, unconscious, and covered with blood. I got the brandy right away and put it to his lips; he did not move; I do not think he suffered; he was not conscious; he could not speak. I do not know what I did until daylight, and then I did not know what to do. I just stayed in the room and walked to and fro until daylight; then I looked through the hole in the door and saw the whaling gun, and lying down beside it a shoulder gun. I could not tell whether anyone was there; I thought perhaps they were still there. I did not know whether to go out or not; I opened the window, and looking out saw a boy halfway between our house and the next. I did not dare to go out, and I took the field glass and looked out, and thought it was surely Titalk. When he was gone I went to one of the windows and shouted to an Eskimo who lived two or three hundred yards from our house to come out. He is a friendly man, and attends to his own business. His wife came out, and they came over to the house and saw everything that was there, and took up the guns and threw them down the hill; she helped me to lift Mr. Thornton to the couch, and stayed with me. He went out and said there was going to be some shooting. Pretty soon I heard a shot, and there was a man killed on the beach. I did not know what was going to happen. I did not see them kill the second man. They dragged the two men up the hill, and insisted on my going to the door to see that they had really killed them. This was about noon.

"Then my next step was to go to Port Clarence, as I did not know what the natives were going to do to me. This man Ipsenook said his daughter should go with me, but we could not go that day, and I stayed in their house with them. Then I heard that the *Bear* was coming, and thought it was so fortunate; perhaps it might stop. I saw it coming and had the sign of distress put up on our house, but they did not see it. That was the same day, Saturday. When I found the *Bear* had gone past I wrote a letter and gave it to a trusty native, addressing it to Captain Healy, and saying, 'Mrs. Thornton in peril,' and asking him to stop at Port Clarence and take me to San Francisco. The next day I got off. The Indians were going down to get salmon at Port Clarence. There were 19 in the canoe, and a great many bags of oil and all the natives' provisions. Ipsenook put me in charge of another man, and sent his daughter with me. We were four days on the way, and arrived a little after midnight. My first question was, 'Is the *Bear* coming back, and will it stop at the cape?' The sea was very heavy when Captain Healy was going up, but coming down he did stop and whistle, but no natives came to the bank, but the young native with my note went out to the *Bear*. This was on Monday of the following week. When Captain Healy found out what was the matter, he sent a lieutenant on shore and up to the house with one of our natives, and they buried Mr. Thornton. Then they came right down to Port Clarence and took me back to Cape Prince of Wales. Mr. Lopp went with us. I tried to take everything that I thought the association would like to have. Captain Healy sent the lieutenant on shore to pack the books for me. I do not know if it was Captain Healy's suggestion, but the carpenter on board the *Bear* had made a cross of wood. Of course it would not last very long, but it was some kind of good wood, well oiled, with Mr. Thornton's name and the date of his birth, etc. I am glad it was a cross; it will remind them of what we told them about Jesus, and of the sacrifice of Mr. Thornton's life while seeking their good. We stayed at the cape until afternoon. Of course I did not like to stay in the house. Mr. Lopp was with me all the time, and he got some children to bring some flowers and put them on the grave. Mr. Thornton was buried on the hill in the ground. The natives do not do that, but we, of course, wished it so, and large stones were heaped over the grave."

With the close of the year Mr. W. T. Lopp, who was formerly associated with Mr. Thornton at the cape, will return with his family and resume the mission.

Teller Reindeer Training School, Port Clarence.—Population, Eskimo; teacher, Mrs. W. T. Lopp. A school was kept mainly for the benefit of the herders connected with the station, a few children from the outside availing themselves of its opportunities.

In addition to teaching Eskimo young men the management and care of domestic reindeer, it has also been considered desirable to give them a sufficient knowledge of English to enable them to become an English-speaking people as they grow up.

Upon the arrival of Mr. W. Thomas Lopp, July, 1893, to take the superintendency

of the Teller Reindeer Station, Capt. M. A. Healy, of the United States revenue cutter *Bear*, very considerately sent ashore his carpenter and two sailors to repair the house and make it habitable for a family. During the erection of the house in 1892 the supply of lumber had given out, and the completion of the building had to be postponed. Now the barn-like structure was finished up and divided into six comfortable rooms. At the rear of the building, across its entire length, a "lean-to" 12 by 60 feet was erected, furnishing comfortable quarters for the apprentices.

During the fall the Eskimo apprentices, under the direction of Mr. Lopp, erected a small frame storehouse for the supplies, and two comfortable log houses 12 by 15 feet for the use of the married herders. These houses were plastered with cement and clay, sheathed with the odds and ends of boxes broken up for the purpose, and stuffed with moss between the sheaths and logs. As these are the first log houses north of Norton Sound, they have attracted much attention from the Eskimos. A scow for carrying wood and a small boat for fishing were also made.

In the fall of 1894, to accommodate the party at the station, increased by the arrival of the Lapps, a log residence 16 by 35 feet was put up. A log building was also erected at the east end of Grantly Harbor for the use of the herders in the winter, that section having been selected for the next pasturage of the herd. These log buildings are built from the driftwood found strewn along the ocean beach in the neighborhood.

Personnel.—Mr. W. T. Lopp, of Indiana, was in charge as superintendent from July, 1893, to August, 1894. Desiring to reopen at Cape Prince of Wales the Congregational mission which had been closed by the murder of the missionary, Mr. Harry R. Thornton, August 19, 1893, Mr. Lopp asked to be relieved from the charge of the station at the end of the fiscal year. His request was granted, and Mr. William A. Kjellmann, of Madison, Wis., was appointed in his place. Mr. Kjellmann arrived on the brig *W. H. Myers*, July 29, 1894, and at once took possession. In July, 1893, upon the removal of Mr. Bruce Gibson as assistant superintendent, there being no opportunity of securing a suitable successor, Captain Healy, of the cutter *Bear*, discharged Mr. John Grubin, quartermaster, in order that he might be appointed assistant superintendent. In August, 1894, Mr. Grubin was suceeeded by Rev. T. L. Brevig, a Norwegian pastor from Stoughton, Wis. Mr. Brevig was born in Norway in 1857, but accompanied his parents to America when he was 10 years old, and settled in Iowa. His training as a teacher was secured in a four years' course at Decorah, Iowa, and he received a State certificate as teacher of public schools in both the English and Norwegian languages. In 1888, feeling impelled to enter the ministry, he took a three years' course at the Lutheran Theological School at Minneapolis, Minn., at the close of which he was ordained a minister of the Norwegian synod.

Mr. Brevig is expected not only to assist in the administration of the station, but also to have charge of the school at the station. For the fiscal year ending June 30, 1894, the school was taught by Mrs. Eleanor Kittredge Lopp, with an attendance of 69 pupils.

Herders.—During the winter of 1893-94 Mr. Lopp had the assistance of three Siberian herders—Anker and Dantin, from the South Cape of St. Lawrence Bay, and Nootadlgoot, from near Cape Serdze Kamen. While their help was essential, and could not have been safely dispensed with, they were far from satisfactory. They proved so passionate, obstinate, jealous, and conceited at times that Mr. Lopp wished them back in Siberia. Anker, especially, became so insubordinate that in February he was discharged. Upon one occasion, becoming angry because a tired deer lay down in his harness and refused to rise, Anker jumped upon his head and stamped him to death. During the season several of the sled deer were killed by the cruel treatment of the Siberian drivers. It has also since been ascertained that they were accustomed to kill and eat deer from the herd on the sly when out herding.

The Siberian herders were employed at the beginning of the enterprise, not because they were considered the best, but because they were near by and were the only ones that could be had at the time. It was realized from the first that if the Alaskan Eskimos were to be taught the management and care of the reindeer, it was important that they should have the benefit of the most intelligent instructors and of the most improved methods that were in use. By universal consent it is admitted that the Lapps of northern Europe, because of their superior intelligence (nearly all of them being able to read and write, and some of them being acquainted with several languages), are much superior to the Samyoed deer men of northern Europe and Asia and the barbarous deer men of northeastern Siberia.[1] Intelligence applied to the raising of reindeer, just as to any other industry, produces the best results.

---

[1]Those who have read, in the appendix of the reindeer report of 1894, the letters of the various Scandinavians in the United States who are acquainted with the management of the reindeer in Europe can not fail to have been impressed with the unanimity with which they testify that the employment of expert Lapp herders is essential to the most successful introduction of domestic reindeer into Alaska.

Therefore, when in 1893 it was ascertained that the herd at Port Clarence had safely passed its first winter (thus assuring its permanence), I at once set about making plans to secure herders from Lapland. There being no public funds available to meet the expense of sending an agent to Norway in order to secure skilled Lapp herders, I had recourse again to the private benefaction of friends of the enterprise, and $1,000 was contributed.[1] With your approval I at once sent Mr. William A. Kjellmann, the new superintendent, to Lapland. He sailed from New York City February 21, 1894, on the steamship *Majestic* to Liverpool. He then crossed England to Hull, and taking a steamer for Norway, reached Hammerfest, 300 miles north of the Arctic Circle (70° 40′ N. latitude), on March 8. In the face of an arctic winter and raging snowstorms, the mercury 39° below zero, he pushed back into the mountains with reindeer and sled to Kautokeino, the center of the Finmarken district, where there were 65,000 reindeer.

Great difficulty was experienced in procuring the consent of the herders to leave their country and their people. The fact that there is not a single colony of Lapps in the United States or elsewhere shows their intense love of home and great unwillingness to leave it. In addition to their aversion to leave home and friends, they were afraid of the barbarous people among whom they were to be taken. However, after being assured of safe conduct and final return home, the following persons were secured:

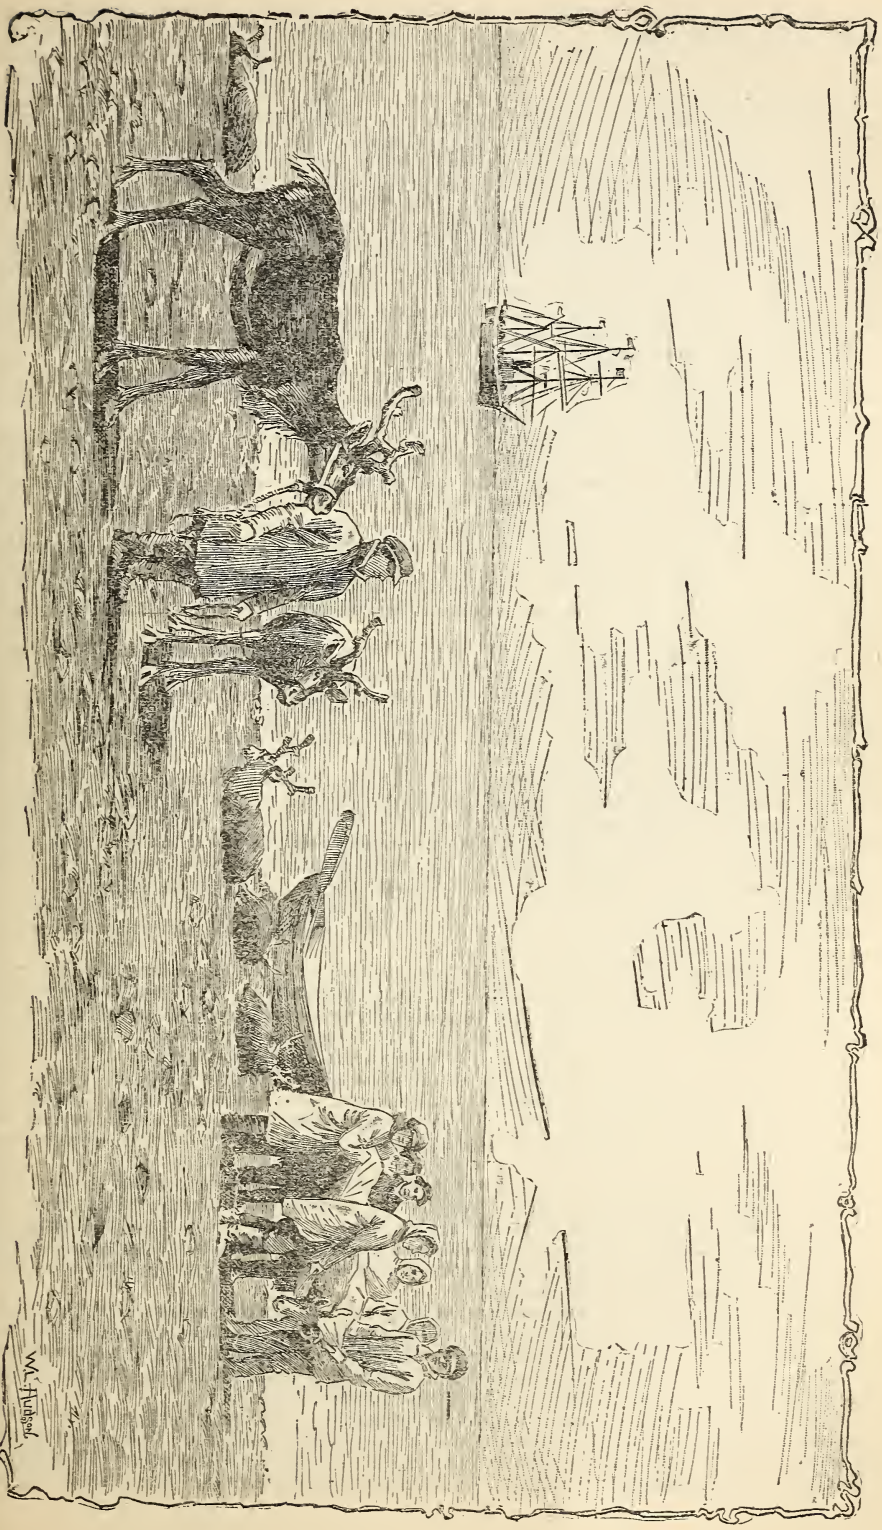
Johan Spemsen Tornensis, wife, and one child under 1 year of age; Samuel Johnsen Kemi, wife, and two children, ages 1 and 4 years; Mathis Aslaksen Eira, wife, and one child 4 years of age; Mikkel Josefsen Nakkila and wife; Per Aslaksen Rist; Frederick Larsen. Some of these are men of property, owning large herds of reindeer, and have several thousand dollars deposited in bank. They can all read and write, and some of them speak the Finnish, Russian, and Norwegian languages. They brought with them a full supply of Lapp literature, including hymn books and Bibles.

Leaving Kautokeino on April 10, Hammerfest the 17th, and Christiania the 26th, they reached New York City May 12, 1894, the first colony of Lapps that ever set foot on the North American continent. Passing directly westward to Madison, Wis., they tarried there until Mr. Kjellmann, the superintendent, concluded his preparations for removing his family to Alaska. Leaving Madison May 21 over the Great Northern Railway, the party were caught in washouts in Montana. Transferring to the Northern Pacific, they finally reached Seattle June 2, and ultimately San Francisco, by steamer, June 5. At San Francisco, after twelve days' delay, the party was taken on board the whaling brig *W. H. Myers*, and sailed from San Francisco for the Teller Reindeer Station, Port Clarence, Alaska, where they arrived safely July 29, having traveled over 12,500 miles.

Contract labor.—The importation of skilled Lapp herders raised the question among a few of the newspapers whether it was not an infringement of the law "to prohibit the importation and immigration of foreigners to perform labor in the United States, its Territories, and the District of Columbia," approved February 26, 1885. The legality of the transaction was given early attention. The proposed action was brought to the attention of Mr. Herman Stump, United States Superintendent of Immigration, who, upon learning all the circumstances, decided that the case was provided for by section 5 of the above act, which reads:

"Nor shall this act be so construed as to prevent any person or persons, partnership, or corporation from engaging under contract or agreement skilled workmen in foreign countries to perform labor in the United States in or upon any new industry not at present established in the United States: *Provided*, That skilled labor for that purpose can not be otherwise obtained." (23 Stat., 332.)

As herding reindeer was first established in the United States in 1892, and as there were no skilled reindeer herders in the country, their importation from abroad was very clearly within the law.



Apprentices.—During the year fifteen Eskimo men were employed in the care of the herd and in securing supplies for the station.

Constant changes are taking place in the band. Some become tired of regular duty and return home. Others are dismissed because of habitual carelessness. Those that remained regularly made good progress and manifested an adaptation to the work that augurs well for their future success.

One of the tendencies observed in the apprentices is a feeling that as soon as they can throw a lasso and drive a team they have learned all that they need to know, and that after a few months' service they are fully competent to take the entire charge of the herd. I have noticed the same disposition among the natives of southeast Alaska in learning the carpenter or other trades.

---

[1] The contributors to the above fund were: Mrs. William Thaw, Pittsburg, $350; Mrs. Elliot F. Shepard, New York, $250; Miss Mary L. Kennedy, New York, $200; Mr. John Nicholas Brown, Providence, R. I., $100; Mrs. Helen Sinclair Robinson, Hawaiian Islands, $50; Mr. H. O. Houghton, Boston, $50.

Dr. Sheldon Jackson landing the first tame reindeer in Alaska. Unalaska and Aniaknak Islands, September 21, 1891.

Because a fireman on a locomotive learns to open and shut certain valves, and start, slow down, or stop the engine, it does not follow that he is competent to take the engineer's place. No more does it follow because an Eskimo man gains a little experience with reindeer that he is able to take charge of a herd. In Lapland, where the people have greater intelligence and the advantage of heredity, a young man is required to serve an apprenticeship of five years before he is considered competent to manage for himself. Mr. William A. Kjellmann, who was brought up among the Lapps and spent much of his life in dealing with reindeer, writes wisely that—

"To learn to be a good herder or deer man takes as much time as to learn any other trade. It is not only necessary to learn how to throw a lasso, how to drive or keep good watch while with the herd, but the main part is to know how to take care of the fawns so that the herd can increase, to select a good sheltered place to keep the herd when the fawns are born, to know how to make use of every particle of the deer so that nothing is thrown away, and to learn to think and act quickly in an emergency, and stand any hardship when necessary to save the herd. All this may be looked upon by outsiders as soon learned, but it is not so. It is only acquired by attention and long practice."

In addition to their duties with the herd, a small amount of schooling was furnished, and arrangements have been made by which during the present year each apprentice will have four full months of school.

Besides food, clothing, and instruction each apprentice that does well throughout the entire year is given 2 female deer, at the end of the second year 5, and at the end of the third and each succeeding year that he remains at the station, 10. This, at the end of a five years' course, will give each one 37 deer, with the increase which will probably bring his holding up to 50.

Herd.—On the 30th of September, 1893, a count of the herd showed 343 head of reindeer. During the winter 20 were lost by disease and accident. During April, May, and June, 1894, 186 fawns were born, of which 41 were lost by being frozen or deserted by their mothers, the thermometer registering during the calving season 30° below zero.

During the summer of 1894, 120 head of deer were purchased in Siberia and transported to the Teller Station, making a total of 588.

Breaking and driving.—Special attention was given during the year in breaking the deer to harness and practicing the apprentices in driving.

In the fall of 1893 there were only 11 trained deer in the herd. During the winter 13 additional ones were broken in.

Harness.—Experiments were also continued with regard to harness. The Siberian harness consists of a strap around the neck of the deer and connected with a trace which passes between the forelegs and outside the hind legs to the sled. In long drives or hauling heavy loads the trace necessarily chafes the hind leg, and often disables the animal. Superintendent Lopp tried a harness consisting of collar, back and belly band, and two traces, which doubled the drawing powers of the deer.

Milking.—Experiments with milking were not much of a success. For 6 herders to catch 5 cows, throw and hold them down, and milk with thumb and forefinger 1 quart of milk, usually required two hours.

Upon the arrival of the Lapps in the summer of 1894, a change was at once inaugurated. The Lapps milk the deer standing, just as cows are milked in the States. When I left the station in the fall the Lapps were securing about 60 quarts of milk per day, which was being manufactured into cheese for winter use. Under their management much better results should be obtained this present year.

Distribution.—In August last 118 head of deer were given to Mr. W. T. Lopp, in charge of the mission of the American Missionary Association at Cape Prince of Wales, for the use of that station. This is the commencement of the policy of the Government to secure the active cooperation and assistance of all the missionaries in Alaska.

The missionaries being the most intelligent and disinterested friends of the natives, the Government naturally looks to them as the best agents through whom to reach them. From their position and work, having learned the character and needs of the people, they are best fitted to wisely plan and carry out methods for transferring the ownership of the deer from the Government to the natives in such a manner as will best facilitate the reindeer industry.

The Government further realizes the fact that the natives who most completely come under mission influence, civilization, and education are the coming men of affairs among their own people, and therefore are the best men to lead in a new movement.

At an early day herds will be turned over to the Episcopalian, Presbyterian, Roman Catholic, Moravian, Methodist, and Swedish mission stations.

I have also perfected arrangements by which on January 1, 1895, a herd of 100 should be loaned to Antesilook, Iziksic, Koktowak, Iupuk, and Soovawhasie (natives) for five years, at the expiration of which time they are to return 100 head of deer to the Government, and retain the increase for themselves. This herd will be

located about a day's journey south of the Teller Station, and will be under the general supervision of the Government superintendent. The natives will be accompanied and assisted by a family of Lapps.

The progress of this latter herd will be watched with special interest.

Caribou.—A large herd of wild reindeer exists from 600 to 700 miles inland, in the neighborhood of Fort Yukon, Porcupine River, and the Lower Mackenzie River. In small bands they are found within 100 miles of the coast, and extending from the Arctic south to the Alaskan peninsula. They are not accessible, however, to large numbers of the people, and it is much easier, speedier, and cheaper to procure those that have come down through generations of taming than to attempt to catch and tame the wild ones.

Reindeer at Unalaska.—In 1891 sixteen head of reindeer were purchased to disprove the assertions that the Siberians would not sell, and to prove by actual trial that the reindeer could be successfully transported by sea. No arrangements at the time having been perfected for herding them, they were turned loose upon the islands of Unalaska and Amaknak in Unalaska Harbor, where, uncared for, they have maintained themselves from that time to the present. Last winter four of the herd on Amaknak Island walked out on a ledge of snow which overhung a precipice, and the ledge breaking off under their weight, they were killed on the rocks below.

Stocking the Aleutian Islands.—The success of the reindeer on the islands of Unalaska and Amaknak suggests the wisdom of stocking the whole Aleutian group. This remarkable chain of islands reaches out from the mainland of Alaska 1,000 miles toward Asia. It is composed of many islands sufficient in area and pasturage to maintain large herds of reindeer. The scattered Aleutian population, in the past supported by sea-otter hunting, are now being reduced to want by the disappearance and destruction of the otter. The introduction of reindeer would be to them a new and valuable source of food supply.

Again, between the islands are the passes which lead from the Pacific Ocean to Bering Sea and the Arctic. On the 11th of May, 1894, the whaling bark *James Allen*, attempting to sail through, struck a sunken reef off the east end of Amlia Island and went down, the crew taking to their boats. Twenty-five persons were drowned or died from exposure. And when, on June 14, Captain Healy, of the *Bear*, took the last nine survivors off of Umnak Island, they were found eating the dead body of a companion who had died two weeks previous. If those islands had been supplied with reindeer much of this starvation and loss of life could have been prevented. In view of the importance of increasing the food supply throughout that desolate region, I would recommend that early steps be taken to turn loose a few reindeer upon the principal islands of the Aleutian group and the larger islands of the Bering Sea.

Reindeer transportation.—From year to year increasing numbers of the whalers are wintering at Herschell Island, off the Arctic coast, northwest from the mouth of the Mackenzie River. Millions of dollars of capital are invested in these vessels and their outfits. If their owners in San Francisco, Cal., and New Bedford, Mass., could hear from them during the winter, it might make a difference of thousands of dollars in the supplies sent the following spring. With the general introduction of domestic reindeer throughout Arctic Alaska, it will be entirely feasible to send the mail from the whaling fleet, between four and five hundred miles across, to the mining settlements on the upper Yukon River, from the mining settlements, over the range, 850 miles, to southeast Alaska and civilization. The Postmaster-General is already arranging for a mail service to the Yukon mines.

During last summer unusually rich placer mines were discovered in the Yukon country, and with the large number of men in the United States out of employment, it is probable that increasing numbers will find their way to the Alaska mines. But a large number of miners can not be maintained in that barren country without increased facilities for taking in food supplies. Two river steamers make two round trips a season upon the Yukon for a distance of about 2,000 miles. But these steamers can not ascend the tributaries of that mighty river, and it is upon the tributaries that the rich mines, so far as known, are situated. The river steamers land their supplies at trading posts at the mouths of these tributaries, and then the difficult question presents itself of getting the supplies to the mines. They can partly be taken on dog sleds, and partly packed upon the backs of Indians. The latter is very expensive and the former insufficient. There are not dogs enough in the country to take in an ample supply. Hence the miners are clamorous that reindeer should be secured in larger numbers so that they can have some for transportation purposes.

Again, at intervals of from 200 to 500 miles Government schools and missionary stations are distributed along the coast from Point Barrow southward, and in the valleys of the great rivers. It is important to the greater efficiency of these stations that they have more frequent communication with the outside world than once a year, as at present. It is also an act of common humanity to bring them more closely

in touch and sympathy with their friends. This can be done with the general introduction of the domestic reindeer.

At Point Barrow there is a Presbyterian mission and school, a Government refuge station, and two shore whaling stations in charge of white men. From Point Barrow a reindeer express can carry the mail 360 to 400 miles down the coast to Point Hope. At Point Hope is an Episcopal mission and school and two shore whaling stations. From Point Hope the express would go southeast 420 to 500 miles to Nulato, on the Yukon River.

Commencing another line at Bering Straits it would convey the mail from the Congregational mission at Cape Prince of Wales, the Government reindeer station at Port Clarence, and the Swedish mission at Golovin Bay to Nulato. From Nulato the express could go southward, taking in a large number of mission stations and trading posts, across the Alaskan peninsula to Katmai on Shelikoff Straits, where it could connect by steamship with San Francisco. From Nulato to Katmai would be, approximately, 850 to 900 miles.

But as the Post-Office Department will first open mail communications with the mining camps on the upper Yukon, it will be more feasible for the present to run the reindeer express up the Yukon River to the mining settlements, and connect the southwestern settlements with this trunk line. At Nushagak (Carmel), on Bristol Bay, southwestern Alaska, is a Moravian mission and school, a Russo-Greek mission, and several large salmon canneries. Starting at Carmel the express can carry the mail via the Moravian station at Quinehaha and the salmon canneries in the vicinity of Bethel, 400 miles. At Bethel is a Moravian mission school and trading place. From Bethel up the Kuskoquim River via Moravian mission Ogavigamute, the Russo-Greek mission Oogovigamute, the Roman Catholic mission, Okhagamute, thence across to the Russo-Greek mission at Ikogmute, on the Yukon River, up the Yukon River to the Roman Catholic mission at Koserefski, the Episcopal mission at Anvik, the Russo-Greek mission and seaport trading place at St. Michael, and the Swedish mission at Unalaklik to Nulato, about 500 miles from Bethel. At Nulato the branch lines from Point Barrow, Cape Prince of Wales, and Carmel unite in a trunk line up the Yukon River to St. James Mission (Episcopal), 200 miles.

In the future, if found necessary, a route can be had up the Tanana River, across to the Copper River and down the Copper to Nutchek, on an island in Prince Williams Sound. But for some years to come there will be no need to go that way.

Continuing up the Yukon River from St. James Mission the route would lead to Fort Yukon (250 miles), where it would be joined by the branch line from the whaling fleet (400 miles); from thence to Buxton, in the mines (200 miles), where it would connect with the mail to Haines and southeast Alaska (770 miles). The trunk line, with its several branches, would number 4,000 miles. To Katmai and Nutchek would add 900 to 1,000 additional miles.

To make this express possible it is essential that the reindeer shall be widely distributed throughout all northern Alaska, and to accomplish this in the near future will require some more rapid method of securing the animals.

A purchase station in Siberia.—The experience of the past three years has demonstrated the fact that the present system of purchasing deer is too slow and tedious. The season when the ice conditions are favorable on the coast of Siberia is usually confined to about six weeks in July and August. The ship visits a village in the neighborhood of a small herd, and sometimes a week is consumed in securing a load. As a result, notwithstanding constant diligence during the few weeks that could be devoted to it by the cutter *Bear*, we only succeeded in purchasing, in 1892, 171; in 1893, 124, and in 1894, 120 head of deer. At this rate of increase it will take many years to accomplish the purposes of the Government. What is now necessary is some method by which the deer can be procured in large numbers. If, instead of delaying the ship while tedious negotiations are pending, someone could be sent on in advance to make the purchases and have the animals gathered ready for shipment, it would greatly facilitate matters. Instead of transporting 100 or 200 head a season, there is no reason why 1,000 should not be secured.

Last season a movement was made in this direction by Captain Healy detailing Lieut. C. M. White and a seaman and sending them up the coast to negotiate for deer. This experiment was not very successful. Although Lieutenant White secured the promise of a large number, yet when a ship came along to collect them many of the owners backed down and failed to deliver according to promise.

I think, however, that if, with the consent of the Russian Government, a party could be placed on the Siberian coast in the fall with a supply of trade goods, and left through the winter to barter with the deer men, a large number of animals could be secured.

With a supply store within reach, the deer men would come as often as their necessities required, and in the place of money (of which they have no knowledge) barter deer in exchange for supplies. As the deer came in from time to time they could be made into a station herd, and Siberians employed to herd them. The following sum-

mer, being gathered into one place, the ship would have nothing to do but to transport them, which could be easily done. Such a course might not meet expectations, but in the absence of some better plan I would like to see it tried, and therefore respectfully recommend it to your favorable consideration.

St. Lawrence Island School.—Population, Eskimo. This important village still remains without a teacher, and the schoolhouse closed. Mr. V. C. Gambell, superintendent of the public schools of Wapello, Iowa, has arranged to open this school in the fall of 1894, and he and his wife are now en route to their distant field.

Unalaklik.—Population, Eskimo; Unalaska Contract School; Swedish Evangelical; Axel E. Karlson, teacher. No report.

Koserefeki Contract School.—Holy Cross Mission; Roman Catholic; Father Tosi, superior; teachers, Sisters of St. Ann and Brothers of Jesus; enrollment, 72; population, Indian and Eskimo. This is the leading Roman Catholic school in the Territory. No report.

Bethel contract school.—Moravian; population, Eskimo; Rev. John H. Kilbuck, teacher. To this school the year proved one of very great hardship. During last summer and fall the season was so wet, and there was so much high water in the river that there was a very small catch of fish. The wet weather also prevented the proper curing of the fish, which are dried in the sun; accordingly, over one-third of the fish taken were spoiled in the curing. By Christmas many of the people were short of food, and from thence on until the spring the people were often in great straits for food, and great fears were entertained of many starving to death. The hunger was so extreme that dogs that had been dead for weeks were eaten. Owing to the famine the school was necessarily closed in January when the supply of food had completely given out, and the children were sent to the mountains to trap such game as they could procure. During the year a sawmill has been built in connection with the school, and before winter set in 25,000 feet of lumber was sawed. This will enable the mission to secure an abundance of lumber at a reasonable rate, and means better facilities for carrying on the school and mission work. This important school is gaining a stronger hold every year upon the people in the valley of the Kuskoquim, and its influence is felt to the remotest villages along the stream.

As an illustration of the character and customs of the people, among whom many of the schools are situated, I give the following extracts from Mrs. J. H. Kilbuck's diary:

"*September 6, 1887.*—Lomuck, father of one of our schoolboys, sent for a saw, stating that he had a sick child which was going to die, and he wished a saw to make a coffin.

"*September 26, 1887.*—A few days ago we were shocked by the news of a very heathenish and cruel attempt to kill a little child, a sickly boy about 2 years old. He was taken away from the village and tied down at the water's edge at low tide, without any clothes on. A passer-by heard his cry and found the child with the water nearly to its neck. It was taken to the post and cared for. The child's mother is dead, and the father had left it in the care of an old woman of Mumtreckhlagamute, who most likely did the deed, as she was on her way to winter in her village. The only thing that surprised the natives was the fact that it was a boy. They often kill their little girl babies.

"*February 17, 1888.*—Girls are not very welcome among these people. Sometimes they kill them or give them away.

"*August 19, 1888.*—An old woman at the post, who stayed with us for awhile when we first came, is dead. The natives accused her of killing 2 children by witchery, for which they clubbed her to death, severed all her joints, and burned her with oil, as is their custom of treating such persons. Superstition has a strong hold here, and is one of our greatest hindrances.

"*December 2, 1888.*—An old woman, insane and hard to care for, was brought down the river, and when strangers refused to keep her, her nephew took her back and deliberately froze her to death. He had offered pay for someone to kill her, but as no one would do it for him he did it himself, contrary to the strict orders of Mr. Lind, not to take her life. Such cruel things are hard to believe; but the natives do not seem the least surprised, nor think any the less of those who commit these acts.

"*April 15, 1890.*—On the 5th our native helper, Brother Hooker, at Quichtlamute, a brave, good man, was killed by the natives, by clubbing, because of temporary insanity.

"*Shamanism.*—Mr. Kilbuck reproved an old Shaman here for having two wives. The old man said he would Shaman the missionary and prejudice the natives against him. We find that many men have two and some even three wives.

"I think we have gained the love and confidence of all around us, except the old Shamans, who are fast losing their influence.

"*February, 1889.*—When Mr. Kilbuck, the missionary, was delayed in the mountains on a trip to Bristol Bay, and was given up by all for lost, the old Shaman said that he had brought on this bad weather for the purpose of killing Mr. Kilbuck

for reproving him for his bigamy; and for a time he seemed to regain power over the natives, who feared him, although they hated him at the same time. But when Mr. Kilbuck returned, the natives said the Shaman might have made the bad weather, but that did not kill him nor keep him from coming home. Two old women Shamaned for his return. One confessed she had no power over storms, and the other said it was because the missionaries had left fish exposed to the night air. The next night the fish were all stored away by some unknown person. The power of the Shamans is greatly damaged, and their future is not promising around Bethel.

"*December 10, 1889.*—Our schoolboy, Eddie, is sick. An old Shaman hung around the place all day, hoping to make a few dollars off the child's parents for Shamanning him. But, finding himself defeated by our care, he did a considerable amount of growling before he left. I have no mercy on the Shamans. They are barefaced liars, deceiving the people and living off them.

"*Sickness and diseases.*—Pneumonia is a dreadful disease here. The people who take it nearly all die for want of better care. On the river below us fifty-five deaths are reported, but those near us whom we have treated have all recovered.

"One old Shaman, after having failed to cure himself, sent for Mr. Kilbuck, and he is now well.

"*December 3, 1886.*—Every day some cases come here for treatment. Some we can cure; others it is impossible to benefit in any way. They have great faith in everything that we do, and this is one great advantage. Many pitiable cases present themselves; many children with spinal troubles. We see some of the most loathsome sights that you can well imagine—sores that look like some of the extreme illustrations given in surgical books, and then so crusted with dirt that no part of the skin is visible, the sore being angry looking and full of moving insect life. To first cleanse and then care for such a thing is by no means a pleasant task, and yet it is pleasing to see how grateful they are for the care we give them.

"*Domestic help.*—Procopi's wife is the most faithful help I have ever had. She is never idle, despite her family of three children to care for, and does as much work as any woman I have had, with or without children. She used to be a great trial to us before she became a Christian. We knew that she would steal at every chance. We caught her at it and were obliged to limit her liberties about the premises, but now we can place the utmost confidence in her.

"*December 22, 1889.*—Christmas. This afternoon we had a short service to practice our boys in singing their Christmas pieces. It would have done you good to see them, all so clean and happy, as they followed the words in the hymn books and sang. The natives from Quichtlamute are here. They live about twenty-five miles distant.

"*December 27, 1889.*—At the Christmas services 150 natives were present, and the best of order prevailed. The addresses in both English and native were good. The children's eyes danced as they saw the ornamented and lighted trees. George and Augustus aided in distributing the presents, and I was proud of them as they calmly and manfully performed their parts.

"*January 24, 1890.*—A note from Mr. Kilbuck, from Quichtlamute, reads as follows: 'We had a big meeting last night and a good one, too. The people say Shamanning and masquerading must go, because they want to follow Jesus Christ.'

"*December 13, 1891.*—Our first hymn translated. We have often been asked to translate some of our hymns and gospel songs into native. And now, at last, at last we have one translated. It is the hymn 'Jesus Loves Me.' We have had one stanza completed for some time, and lately Mr. Kilbuck, with the aid of the schoolboys and two natives, has gotten out the chorus and the remaining two stanzas. The natives are almost wild over 'their hymn,' as they call it. On Sunday, instead of an address, we drilled the natives for two hours on our new hymn, and before the service closed they made the house ring with about 75 voices. I will write out the hymn, although you will not understand it. Yet I wish it recorded here in my journal.

JESUS KIMN-KANG-A.

"Ang-nex-twa xa At-ta-vut whong-u-ta
Kah-nax-jah-xah-nick Xok tochi-ki-xa-kut
To chal-li-lou kah-nax-jah-xang-x-li-ni
Whing-a Xok kimn-kang-a Jesus Christus.

Chorus.

"Ang-nex-twa-xa Jesus kimn-kang-a
Lien kimn-kang-a Lien kimn-kang-a
Ang-nex-twa-xa Jesus kimn-kang-a
Whong-ung-ax-nah whing a.

"Everyone is delighted with the hymn, and the trader says it is all he hears around the trading post. The native helper, Lomuck, has come from his village up the river, having heard of the hymn. He could not rest until he had heard it sung in the chapel. 'Now,' he says, 'the natives see that we have a meaning to our songs, and think of God when we sing.' Other hymns have since been translated."

UNALASKA DISTRICT.

Unalaska school.—John A. Tuck and Miss Anna Fulcomer, teachers; attendance, 24; population, Russian creoles. This school is made up mainly of the girls that are in the Jessie Lee Memorial Home. Being regular in attendance, they have made very rapid progress during the year. Indeed, this is one of the model schools of western Alaska, and through its efficiency has attracted much attention from the officers of the Bering Sea fleet, as well as others who have had a chance to visit it.

In Senate Ex. Doc. No. 107, Fifty-second Congress, second session, containing the reports of the United States Treasury agents to the seal islands, occur the following allusions:

"The Hon. William H. Williams, Treasury agent to the seal islands, reporting to the honorable the Secretary of the Treasury on the condition of the natives on those islands, writes:

"'Especial attention is invited to the schools on the seal islands. They have been in operation over twenty years, and yet they have not succeeded in teaching a pupil to read or write a sentence in the English language. * * *

"'Radical changes are absolutely necessary in these respects, if it is the desire of our Government to civilize, educate, and improve this people. They should not only be taught the rudiments of the English language, but also habits of industry, economy, cleanliness, and morality. That these people are quick to learn and susceptible to rapid improvement is demonstrated in the charity school at Unalaska, conducted by Mr. and Mrs. Tuck. Six of the most promising orphans on the islands were sent there in September, 1890, and I found on visiting the school this year that they could talk the English language quite fluently and read and write quite intelligently.'

"Mr. Joseph Stanley Brown, acting Treasury agent in charge of the seal islands, in an official report to the Secretary of the Treasury, writes December 1, 1892:

"'For over twenty years the Government has maintained an English school upon the islands, and yet not ten natives on both of them can make themselves even fairly well understood in English, nor has any appreciable advance been made in the direction of American citizenship. * * *

"'*An illustration of what can be done.*—That it is not impossible to establish schools that will be entirely successful, not only in teaching these people to speak, to read, and to write the English language, but to train them in more upright and useful methods of domestic life, is shown by the history of the Lee school at Unalaska, presided over by Mr. and Mrs. Tuck. At this school have been gathered children from all parts of the Aleutian chain, and some from the islands of St. Paul and St. George, whose intellectual advancement seemed to be hopeless. Before two years had passed these children were able to make themselves well understood in English, while their improvement in manner and character was simply astonishing. This I know from personal observation. The success of the Lee school is due to the personal equation of the individuals presiding over it, and to the fact that the children are removed from their native home influences.'"

Unga school.—Teacher, O. R. McKinney; enrollment, 36; population, Russian creole. When Mr. McKinney took charge of this school on the 12th of October, 1891, he found the children shy and suspicious. Very few of them could be induced even to try to speak English, and the few who did try spoke it very imperfectly. The key of the school building had been left in the hands of a half-breed who has since been driven from the place for embezzlement and stealing. The schoolhouse had been thrown open for drunken dances and carousing, and was in such bad repair as to be unfit for use. The driving rains of that region came in at the windows and kept the sides of the floor wet most of the time. The ceiling was not quite 7 feet high, with no means of ventilation in the room. The lumber and furniture for the teacher's residence had been left at Pirate Cove, on Popof Island, 20 miles distant, so it was necessary to charter a small schooner to bring it to the village. During the winter of 1892 and 1893 Mr. McKinney put a ventilator into the schoolroom and built a coal shed and a storm porch. He then went to work and raised the ceiling of the schoolroom, added 8 feet to the length, lined it throughout with beaded red wood ceiling, and gave it one coat of paint. Last vacation, with his own hands, he took up the floor, which was badly out of order, relaid it, and gave it a good coat of red-rock paint. Last fall the Government sent 3 dozen new desks. So that after these years of repairs and attention the schoolhouse has been brought into a suitable condition for the use of the school. Encouraged by the improvement of the schoolroom, the people of the village took hold and raised a sum of money with which has been purchased a circulating library.

KADIAK DISTRICT.

Kadiak school.—Rev. C. C. Solter, teacher; enrollment, 59; population, Russian creole. The school opened on the first Monday in September, with a fair attendance. This being the season of the year when the children are frequently sent to the woods for berries, which are put up for winter use, many of the children were kept

away. Soon after the opening la grippe made its appearance and not one of the pupils escaped. The winter there, as elsewhere in Alaska, was one of unprecedented storms and unusual severity. Such a season has not been known for twenty-five years. From these several causes the attendance of pupils was less than usual. Those that were able to attend, however, made marked progress in their studies and have shown improvement not only intellectually, but also morally.

At Christmas the school gave an entertainment, which had an excellent effect upon the parents of the children, who seemed to grasp the possibility of their children doing the same things as those of more favored people. Although the people are very poor, they have manifested their growing interest in the school by subscribing for and procuring a fine set of school maps. The universal use of the Russian language in the homes of the children is a great barrier in their progress of acquiring the English language. Another drawback in the homes of the people is the prevalence of intemperance, especially upon holidays. The teacher makes an earnest appeal for a standard manikin showing the effect of alcohol upon the human system as an aid to temperance instruction.

Afognak school.—Teacher, Mrs. C. M. Colwell; enrollment, 38; population, Russian creoles.

Carlook school.—Population, Eskimo. This school is suspended for want of sufficient appropriation.

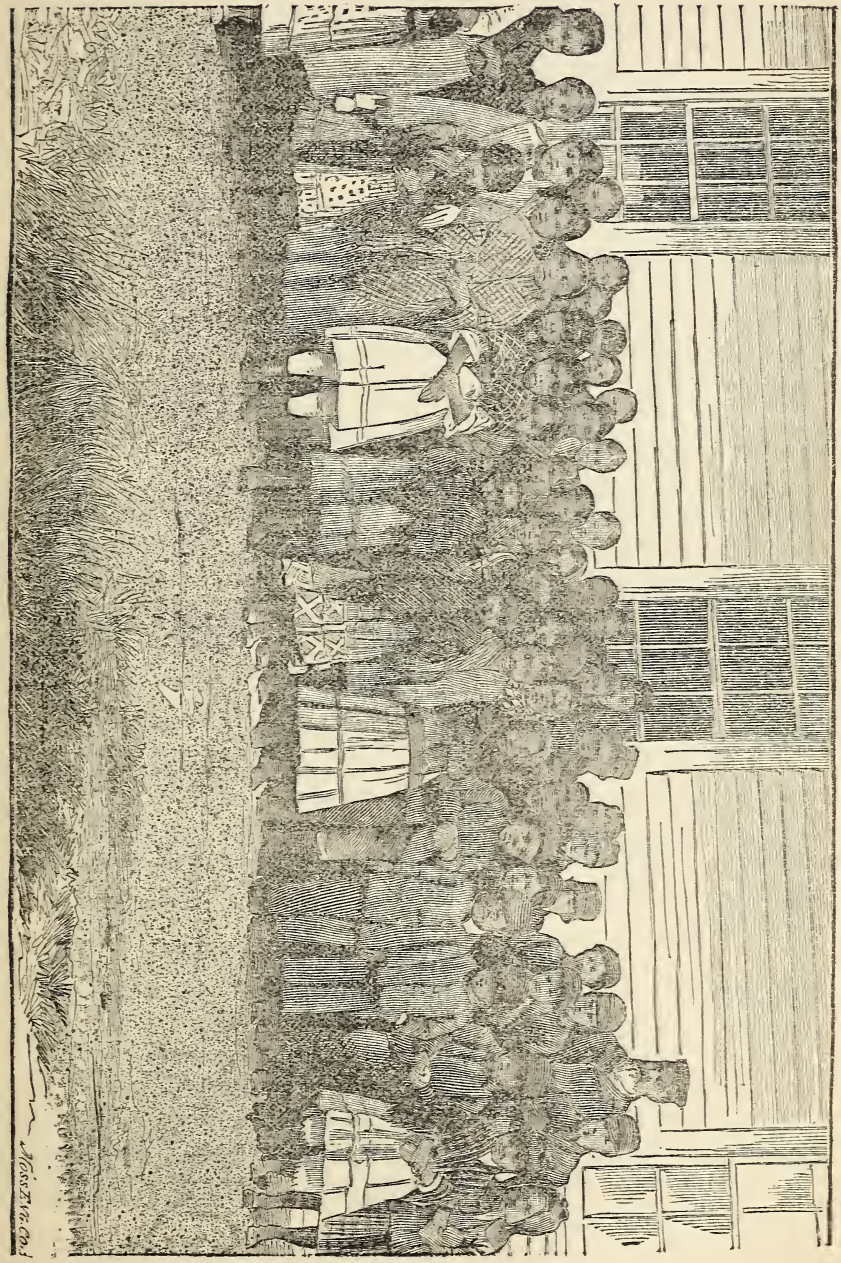
SITKA DISTRICT.

Yakutat contract school.—Swedish Evangelical mission; Rev. A. J. Hendrickson and Rev. Alvin Johnson, teachers; population, Thlingets; enrollment, 105. During the year progress has been made in the erection of one new building and in the more regular attendance of the native children. The erection of a sawmill in connection with the school has provided the necessary lumber by which the natives have been influenced to pull down their former houses and erect more comfortable and improved ones.

Hoonah contract school.—Presbyterian; population, Thlinget. This school met with a great loss in the death of Rev. John W. McFarland. Mr. and Mrs. McFarland went to Hoonah in 1883. They found the people barbarous, and have labored in season and out of season until a church has been established, with over 100 native communicants, and nearly the entire child population have been brought under instruction. There are no stations in southeast Alaska where the work has been more fruitful with the same number of laborers.

Jackson school.—Mrs. Clara G. McLeod, teacher; enrollment, 90; population, Hydah. This school has kept on its even way during its entire life under one teacher, the good effects of which are shown in the progress made by the pupils.

Killisnoo school.—L. F. Jones, teacher; enrollment, 75; population, Thlingets and Russian Creoles. On the morning of February 18, 1894, the schoolhouse was destroyed by fire. The wind at the time blowing a gale, and the water being frozen in the reservoir, there was nothing to be done but to get out as much of the property as possible and see the building burn to the ground. Upon the joint recommendation of Governor James Sheakley and Supt. William A. Kelly, it has been decided not to rebuild at present, but wait until a larger appropriation can be secured.



Haines.—W. W. Warne, teacher; enrollment, 41; population, Thlinget. The children in the mission home at Haines, Alaska, not only receive instruction, but the children of the village, which is about 2 miles from the mission building, are also gathered in as day school pupils. The teacher writes: "Frequently I go down to the village to hunt up my children. I often find them still in bed. It doesn't take long for these village children to get ready for school; they sleep with all their clothes on. In the morning they jump out of bed, smooth their hair, wash their faces and hands and they are ready. Sometimes they perform their morning ablution at the spring on the way to school."

Concerning them one of the missionaries writes:

"The Chilcat tribe is divided into two clans, namely, the Wolf and the Raven. Each clan is divided into phratries or tribes, each phratry having its own headsman or chief. What little power the chiefs had over their phratries has almost disappeared.

"The Chilcats are, perhaps, the tallest and best formed of all the Thlinget people. They are shrewd traders, and will generally get the best of a bargain, even in some instances outwitting their white brothers. Where Christianity has not softened and refined them they are self-assertive, arrogant, and boastful to an almost ludicrous degree. They, more than any other Thlinget tribes, hold most tenaciously to their old-time customs.

"The 'potlatch' is one of the most interesting of the customs which the Chilcats practice. Any such event as death, the building of a new house, making reparation for real or imaginary wrongs received, and the attainment of higher rank is made the occasion for a potlatch.

School on St. Paul Island, Bering Sea. (Aleutes.)

"When a man or family of the Raven clan gives a potlatch, all the Ravens of the neighborhood are expected to contribute their share of blankets, calicoes, food, or any and all kinds of property for distribution among those of the opposite clan, the Wolf. The guests are seated by families or totems. The master of ceremonies opens the potlatch with a long-winded speech on ancestry, or some equally dry theme, and generally concludes with a coarse jest or joke, which is received by the crowd with hilarious uproar. The ceremony is not conducted by any rule or law. Whenever the master of the potlatch sees fit the bales of blankets, bolts of calico, boxes and barrels of white man's food are distributed by men stationed all over the room for that purpose. The master of the feast holds up a blanket and tears it into strips. In a voice that can be heard far above the general bustle and hubbub he calls out the name of that particular person upon whom he wishes to bestow that piece of blanket, and the expectant recipient calls out 'Ha day!' which, being interpreted, means 'Here!' or 'This way!' The gift is immediately passed on to him by the attendants.

"Dancing forms the chief feature of a potlatch. Each Thlinget tribe has its own individual dances. At a large potlatch, where several tribes are present, all the tribal dances are danced. Dancing is kept up incessantly for days at a time.

"The Thlinget dancing is decidedly ungraceful. Here is the dance for the dead, danced by women. A dozen or fifteen women, with their faces blackened, black silk handkerchiefs wound around their heads, and wearing fancy blankets, take their places at one end of the room, facing the audience. A shrill song in the minor key is struck up, something like this: 'Yah hee nay—oh-ho,' the 'nay' and 'oh-ho' being prolonged. To this song the women keep time by a long swaying of the body, the knees being slightly bent, but the feet perfectly stationary, swaying first toward the right, then toward the left. Other dances consist of raising one's self on the toes and coming down upon the heels with sharp, quick thumps, at the same time turning the body from right to left.

"The totem pole is almost a thing of the past among the Chilcats. Just here let me say that the Thlinget people never at any time worshiped the totem poles. The totem pole is a monument erected, either during the lifetime or after the death of an individual; it is to show to the world his genealogy, achievements, and social standing. In other words, a biography carved in wood instead of printed on paper. These monuments are generally erected in front of houses, although totemic carvings are found on the pillars and posts of houses, emblazoned upon the fronts of houses, and painted and carved upon boxes, and every implement and utensil.

"The universal mode of disposing of the dead is by cremation. The cremation of long ago differs radically from that of to-day. Then the burning of a body was attended by the most cruel and revolting scenes. Now, aside from a most peculiar and distressing form of wailing by the mourners, the body is quietly burned, after which a potlach is given by the relatives of the deceased.

"The strongest trait of the Chilcats and of all the Thlingets as well is imitativeness. This faculty, coupled with the grand lever of Christianity, has done much toward their acquiring the more simple features of civilization."

Juneau school No. 1.—Teacher, D. Davies; enrollment, 25; population, whites. The school has been so crowded in the little room assigned to it that arrangements are under foot for the erection of a new building for the use of school No. 2, and the refitting of the entire present building for the use of school No. 1. With enlarged and improved accommodations it is expected that this school will attract a larger number of pupils.

Juneau school No. 2.—Teacher, Elizabeth Saxman; enrollment, 65; population, Thlingets. The school as usual has had many newcomers who could not speak or understand a word of English. Juneau being the center of the gold-mining region of southeast Alaska, attracts native people from all sections who flock in to secure employment. The larger portion of these people come from villages where there are no schools; spending the summer in Juneau, their children are placed in school for the first time. Many of these beginners have mastered the chart reader and have reached the first reader, reading and writing quite well. The older pupils have made fair progress in all their studies except arithmetic, which seems to be difficult for them. They excel in drawing. Considerable kindergarten work has been done among the small children, and with considerable success. The teacher of this school, in common with other teachers in that region, pleads for some law by which a more regular attendance can be secured. This has for years been brought to the attention of Congress, but without action.

Fort Wrangell school.—Anna R. Kelsey, teacher; enrollment, 54; population, Thlingets. The teacher writes:

"I was troubled for easy, interesting first readers. I could get Sabbath-school papers and easy books, as Babyland, Nursery, etc., for those in the more advanced readers. Rereading has a tendency to make careless readers. Swinton's readers ten years ago were considered good. Now I am not informed as to the best. These children are so apt to read without getting the idea; their entire attention is given

to the words. Not being familiar with our language, it is slow work for them. One needs to have many amusing little conversational exercises. The pupils memorize quickly, think little. I have striven hard to stimulate thought.

"The native children are naturally destructive; only the most careful training, long continued, can overcome this. The greatest drawback to these children is the irregular attendance. An intelligent gentleman who has been here since 1884 told me that with scarcely an exception the children were not obliged to attend school unless they chose to do so themselves. They do not all get home until late in November or December; then in February they are starting out to hunt again.

"The dancing interfered with the attendance the past winter. The young children seven and eight years old took part, and there was more dancing in Alaska last winter than at any time since I came to the Territory, in 1885. If there could be some place provided where these parents could leave their children when they go away, and then they were made to do so, it would do more for the people than has ever been done to elevate the mass of them.

"At Christmas I gave the children a treat of candy, nuts, and apples; also each one a present. February 22 the afternoon was devoted to appropriate exercises in which nearly all the pupils took part. There was a good attendance of both natives and whites. Some interesting speeches from the minister and civil officials, and also some native men added to the occasion. At the close of school we had a very satisfactory picnic; some of the whites were very generous and contributed largely. We had four boats, one for provisions and the others of pupils and whites. We found such a delightful grassy nook, shaded, and a little brook of cool refreshing water running on one side, and an abundance of flowers. Games and a swing, with plenty to eat, made the children very happy. Some of them were loath to leave when the day was over. These native children are bright and love their books; if we could only have them in a school. Two of the schoolgirls were married during the winter; I presume they were not more than 15."

Douglas school No. 1.—S. A. Keller; enrollment, 30; population, whites. Mr. Keller has proved an excellent and efficient teacher, and popular with all classes of population.

Douglas school No. 2.—James E. Connett, teacher; population, Thlingets; enrollment, 87. The school has labored under the great difficulty of being some distance from the native population, and also from the fact that mining has been commenced only a few rods from the schoolhouse, the noise of blasting rock interfering considerably with the comfort of the school. Notwithstanding these drawbacks the children have been loyal to their teachers during the entire year. Some of them have completed their books in which they started at the beginning of the year. The class in grammar, especially, seemed to do effective work, and the same was true of those in history and geography. After once learning the English language the children make the same progress as the children of the Caucasian race.

A serious drawback in this, as well as in other native schools in Alaska, is the character of the published schoolbooks. Take, for instance, Fuller's illustrated primer, which is an excellent beginner in the ordinary schools of the country, but to be of complete service among the native schools of Alaska it ought to be rearranged. It can be seen that a picture of a haying scene conveys no impression to the Alaska child, as this is a scene that they have never met. The primer, to be adapted to them, should be illustrated with scenes familiar to them in their own country. The difficulty of getting suitable text-books has been felt from the beginning in the school work, but the fund available for education in Alaska has been so small that nothing could be done toward securing more suitable works.

Sitka school No. 1.—Teachers, Miss Cassia Patton and Mrs. Gertrude Knapp; enrollment, 43; population, white. Being at the seat of government, and comprising the children of the Government officials, as well as those of the merchants and leading citizens, this is one of the most advanced and efficient schools in the Territory.

Sitka school No. 2.—Mrs. Lena de Groff, teacher; enrollment, 110; population, Thlingets. The school opened on the first of September with an attendance of 65 pupils, which increased to 110. This increase of attendance was due greatly to the efforts of Governor James Sheakley, who very kindly sent the native policemen through the village several times a week, insisting that the children should be sent to school. During the year 6 of the more advanced pupils were taken into the industrial training school for more advanced instruction.

Sitka industrial school.—Contract; Presbyterian; population, Thlingets; enrollment, 141; boarding pupils (boys, 86; girls, 55); teachers, 19. The schoolrooms remained during the year in charge of Mrs. Heizer and Mrs. S. A. Saxman. The success of the departments has proven the excellence of their teachers. In methods and instruction they are abreast of the times, and in discipline they are natural and rational. The school is well supplied with text-books and apparatus. As in other industrial schools, half the day of each pupil is spent in the day school, and the other half at manual labor. Mr. Kelly writes:

"In the industrial departments I found most of the work of the school being done

by the pupils. The shoes for the school are handmade in the shop, and regular custom work for the people of the town is done at the school. Bedroom furniture, sash, and doors are manufactured in the carpentry department under the direction of a competent foreman. The bakery turns out an average of 100 loaves of bread per day.

"Much outdoor work is necessarily performed by the boys, such as ditching, laying water and sewer pipes, grading the grounds and beautifying them. I do not approve of the old-time method of heating the buildings—a stove in each room. With so many buildings, requiring in all 25 or 30 stoves, the method used is unsafe, unsatisfactory, and inadequate. The buildings should be heated by steam.

"The girls do the housework for the school and for the teachers. They are skillfully trained in all kinds of household duties. The work departments, as well as the children's, are clean and neat in appearance. The force of teachers employed is in keeping with the needs of the school, there being one teacher for every ten pupils.

"I commend the system of establishing separate homes for couples marrying from the school. This method is proving very successful. In a frontier country there is little sympathy for natives struggling to better their condition. Frontier public sentiment is opposed to their amelioration; hence the law is inadequate to protect them in their rights and in their new surroundings. The helpful, sympathetic counsel of those directly interested in their welfare is most essential to their ultimate triumph over the old customs and to a healthy and permanent ingrafting into their new environments and home life."

Dr. Wilber, who is in charge of the medical department at Sitka, with Miss Gibson as trained nurse, reports: "Over 1,400 prescriptions and 50 operations in the last half year. The hospital, which has been remodeled, is now quite complete in its arrangement, while its general appointments are much better than could be reasonably expected. Our wards, two in number, accommodate twenty beds, with room for five more in each room, should necessity demand such increase. There is no doubt that the hospital offers a powerful influence in reaching the people. Would that our finances were such that all might be received without distinction! Miss Gibson holds short religious services in each ward every evening, while I conduct prayers each morning. Some of the needs of the hospital are a fracture bed, a set of operative ophthalmic instruments, and a set of test lenses."

One of the Sitka boys who received his instructions in the mission training school has become very proficient in house painting and decorating, and is steadily employed at $2 per day. Of another pupil his teacher reports: "One of our oldest boys, who has been taught the carpenter's trade, brought me his work, greatly pleased. He had been given specifications for a two-story house, and he filled the order or bill perfectly, with but one error." This young man leaves the mission soon, having been there eight years, though he has only been two years studying the carpenter's trade.

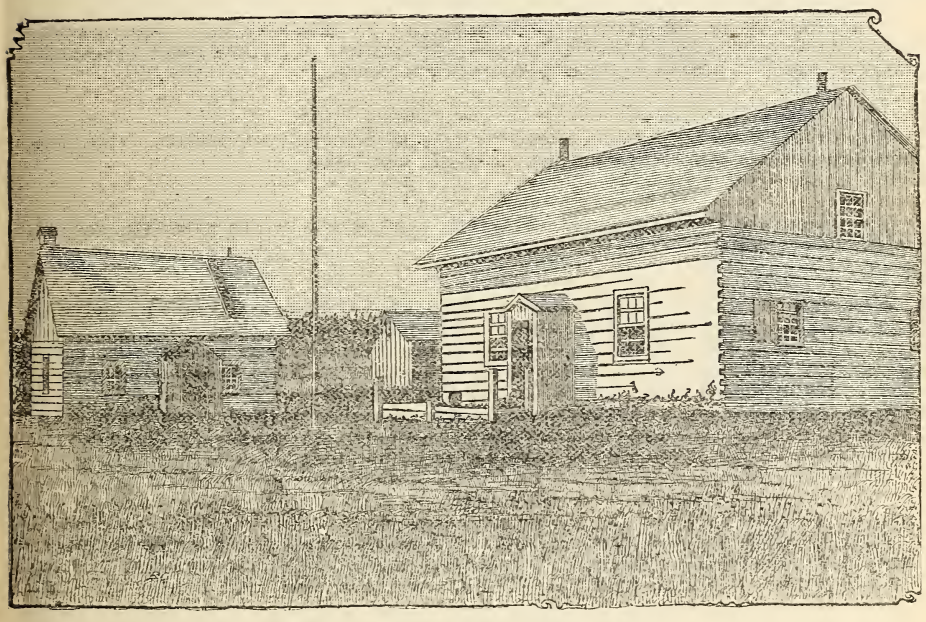
The publication of the North Star, the little sheet sent out by the Sitka mission, has been resumed. The paper contains items of much interest to all who are concerned for the redemption of Alaska.

INDEPENDENT MISSION SCHOOLS.

EPISCOPALIAN.

Fort Adams.—Protestant Episcopal. In the year 1891 the Rev. Jules L. Prevost was sent by the Domestic and Foreign Missionary Society of the Protestant Episcopal Church as a missionary to the Indians on the Yukon River. The field selected was Fort Adams. This place, at the mouth of the Tanana River, is about 850 miles from the mouth of the Yukon River, and is the center of a region hundreds of miles in every direction without a school. The Tanana River, 800 miles in length, has a population of more than 700, over one-half of whom are baptized members of the Episcopal Church. Near by is a valley of the Kcokuk River, 800 miles long, with a number of Indian villages. Also in the same vicinity is Nowikokat, a trading station and Indian village, where 400 natives gather in midwinter and spring, over two-thirds of whom are baptized members of the Church. A few hundred miles above Fort Adams is Fort Yukon, the center of a population of 400 natives. These are all baptized, and about 50 of them are communicants. They have the whole of the New Testament, the English Book of Common Prayer, and the hymn book translated and printed in their language.

For all these places, covering an area of 100,000 square miles, St. James Mission, at Fort Adams, is the center. These people often bring their dead from 25 to 300 miles to be buried at the mission. Adults sometimes go distances of 400 miles to be instructed and baptized. Many of the natives, away from the mission, still live in underground houses, but at the mission they have built good log houses, with windows, doors, and floors. Each one of these houses is heated with a stove and furnished with rudely constructed chairs, tables, bedsteads, closets, dishes, clocks, washtubs, and boards, with pictures upon the walls. One family has a wringing machine and another a sewing machine.



Mr. Prevost, in this far-northern region, has established a printing office and begun the publication of a journal called the Yukon Press.

Point Hope Mission school.—Protestant Episcopal; population, Eskimo; teacher, John B. Driggs, M. D. The work is gradually making progress, but the shifting character of the population, going here and there to secure support, makes the education of the children a difficult problem to deal with. There are so many who go away each year that, although the teacher retains the scholars who have remained in the village, each fall it is almost like beginning over again. When the time comes in which schools are kept at the leading villages the children will have school advantages wherever they may be located for the time being. The daily average and number of pupils was about the same as last year.

In addition to the demands of the schoolroom, Dr. Driggs gave out books to the few men living around the station who were desirous of learning but were too far away to enroll their names as pupils of the mission. This seemed to be greatly appreciated by them, and they gave evidence of progress.

The pupils, when they leave for whaling, are very fond of writing notes to the teacher, which he encourages.

On the 13th of October last, through a very severe blizzard, the sea broke over the site of the village, driving natives from their houses and submerging the first floor of the school building. After remaining away a week, the teacher returned to his house only to be again driven away by the sea to repeat his former experience of

Saint James Mission, Fort Adams, Alaska.

dodging the waves and wading some distance through ice water and slush as he sought a place of safety on the hills, where he was compelled to live in a brush-wood shelter on uncooked, frozen fish for two or three weeks, until the storm had sufficiently abated for him to return to his house.

One of his pupils, a young woman who had taken refuge upon a cliff, is supposed to have been blown off into the ocean, as no trace of her has since been found. The experience of the past fall has led to the recommendation to remove the mission building some 300 yards farther inland.

During July and August, 1893, Point Hope was visited by a terrible epidemic of capillary bronchitis. Dr. Driggs ministered to 25 in one afternoon. Going through the village one afternoon he found an old man dying out in the rain. The family had taken him out so that he should not die in the house. Close by, under a tent cloth, was a dead woman. Under an adjoining cloth, hearing a moan and lifting up the cloth, found a sick child clinging to its dead mother. There were 5 dead in that group. Three-fourths of the adult population were sick and one out of every six died. There were not sufficient well persons in the village to bury the dead, and the corpses were left outside of the houses to be eaten by the dogs of the village. Their bones are still seen scattered through the village or whitening in the stagnant pools from which the people procure their drinking water.

A white man living in the village with a native wife says that during the time of

the epidemic he was disturbed for several nights by a noise around his house. Thinking that it was a dog prowling around for something to eat he got up, and, arming himself with a club, went out to investigate. In place of a dog he found a little four-year-old boy picking up scraps of shoe leather and seal skin to eat. Upon seeing the man the child fled home. He was followed, and found to be, with his little brother, the only living occupants of the hut. But in the same room lay the corpses of father and mother and the maternal grandfather. The man took the boys to his own home.

The number of pupils enrolled during the year was 54, and the average daily attendance 38. The school was in session one hundred and sixty-one days. The principal instruction given was in reading, translating, arithmetic, and writing. Some attention was given also to geography and drawing.

Anvik school.—Mission; Protestant Episcopal Church; Rev. J. W. Chapman in charge; population, Thlingets. This mission during the year has been in charge of the white assistant, Mr. Chapman having returned to the States for additional help. Miss Mary V. Glenton, M. D., has been appointed medical missionary, and Miss Bertha W. Sabine teacher; they will go up in company with Mr. and Mrs. Chapman during the summer. This will give an impetus to the work at that station.

ROMAN CATHOLICS.

In addition to the school at Koserefski, carried on with assistance from the Government, the Roman Catholic Church has small schools at Nulato, Cape Vancouver, and Juneau, from which no reports have been received.

SWEDISH EVANGELICAL UNION.

The Swedes have established a good school at Golovin Bay, Alaska. This is in addition to their contract schools at Unalaklik and Yakutat.

MORAVIANS.

The Moravians sustain a school at Ugavig, Kuskokwim River, as well as the contract schools at Bethel and Carmel.

BAPTISTS.

Wood Island school.—Baptist mission; teachers, W. E. Roscoe and wife and Miss C. C. Currant; enrollment, 30; population, Russian Creole. During the spring and summer of 1893 the ladies connected with the Woman's American Baptist Home Missionary Society erected a large two-story building at Wood Island as an orphanage. This orphanage was completed and opened upon the 4th of July, 1893. It is a house of refuge and of hope, and the one bright light in all that section of ignorance, immorality, and superstition; the only place in all that region where the rising generation can be taught the beauty, purity, and value of a Christian home.

A few sample cases from the diary of Mr. Roscoe will give a more vivid impression of the character of the work of educating and civilizing the population, and the self-denial and heroism of the missionaries engaged.

Last fall Willie Schmakof, whose father was dead, and mother too poor to support him, was taken to the orphanage; the mother made out regular papers of indenture, duly signed and attested, until the child should be of age. Mr. Roscoe, in behalf of the Woman's Missionary Society of the Baptist Church, obligated himself and society to supply the boy with comfortable clothing, lodging, and food, and give him a good common school education. The Russian Greek priest, through the grandmother of the boy, who, by the way, lived 600 miles away, went before Judge Rogers, United States commissioner at Sitka, and asked that the boy should be removed from the care of the school. The judge, ignoring the legal papers placing the child in the custody of the school, took him away from the school and from his mother and gave him into the custody of his grandmother. It is true that the mother gets drunk and is immoral, but it was not on that account the mother's authority was set aside, as she was privately informed that after the boy was taken out of the school she could have him again. The whole move was to remove the child from a good school, which was done. The boy was taken from the school by a United States deputy marshal and turned loose on the streets, where he often goes hungry and in rags, and is living in filth and dirt and is growing up a hoodlum. The mother of the boy sent in a written remonstrance against this outrage of the court. A remonstrance was also drawn up and signed by all the white men at Wood Island and Kadiak.

Last season a widow woman (Russian Creole) with three children came from Nuchek to Wood Island with the hope of getting sufficient washing to support herself and children, but she was rapidly dying of consumption and had no strength to wash; her own people refused to take her into their houses, and in desperation, not knowing which way to turn, she applied to the Baptist orphanage. Mr. Roscoe took her three children into the home and then found a place for the dying mother, he and the agent of the trading company sharing the expense of supporting the

woman until she died. The three children, through inherited scrofula and from impoverished blood from want of proper care, clothing, and sufficient food, were a mass of sores and running ulcers from head to foot. These children were nursed by Mr. and Mrs. Roscoe as tenderly as if they were their own; the offensive sores were dressed and the children doctored until their sores were largely healed, and they are becoming healthy and vigorous; and now the Russian Greek priest, who would do nothing to help the dying mother and starving children, is very active in trying to get the children out of the home and force them back to their former miserable condition. This priest has since been removed by the bishop.

A mother died, leaving a young babe. The father, unable to properly care for it, and being compelled to go off hunting work for a living, intrusted the babe to some of the relatives of the mother, but like so many others of that class of people, they had their occasional spells of drinking and carousals. Upon returning home the father found his child in a dying condition, and, through neglect, covered with sores and ulcers. The sixteen-months-old babe was taken by Mr. Roscoe and placed in the home where it was a very great care, but through judicious treatment and constant attention it is becoming healthy and is doing well.

Last winter a man at Unga was accidentally shot while hunting and his family was left entirely destitute; the widow, unable to clothe and feed her three little children, sent the two older ones to Mr. Roscoe and wanted to send her babe also, but it was too young to be received.

Two boys, hoodlums, were sent there from Unga, both covered with sores; the leg of one was swollen to double its normal size, and the ulcers discharged a cupfull at a time. Both these offensive cases were treated and relieved by Mr. and Mrs. Roscoe.

A boy received from Dutch Harbor was so covered with sores and ulcers from head to foot that his limbs and body had to be bandaged; these bandages were changed every twenty-four hours, and in order to get the old bandages off it was necessary to put the boy in a bath tub and soak them off; his condition was so offensive that he had to be kept in a room by himself. Under the treatment of Mr. and Mrs. Roscoe his sores are healing up and his flesh commences to show a healthy condition.

Two small boys were left orphans and were cared for by a white man who was their uncle. After a while he made out papers transferring the children to the orphanage until they should become 18 years of age. A drunken relative of the boys' deceased mother made so bitter a fight that the boys have so far been prevented from entering the home where they would be well clothed and properly educated, but are left to run wild, with insufficient clothing, and almost constantly hungry.

PRESBYTERIANS.

In addition to the industrial training school at Sitka the Presbyterians have successful boarding and home schools at Haines, Juneau, and Jackson. No reports. Haines has 4 missionaries, Juneau 5, and Jackson 5.

FRIENDS.

The Friends have boarding and home schools at Douglass and Kake. No reports.

TEACHERS AND EMPLOYEES IN CONTRACT SCHOOLS.

Metlakahtla.—William Duncan, Mr. and Mrs. E. W. Weesner.

Bethel.—John H. Kilbuck, Mrs. J. H. Kilbuck, Benjamin Helmick, Mrs. B. Helmick, Miss Mary Mack, and George Nokochluk (native).

Carmel.—F. E. Wolff, Mrs. F. E. Wolff, John Schvechert, Mrs. J. Schvechert, Miss Mary Huber, and Miss Emma Huber.

Sitka Industrial Training School.—Rev. L. F. Jones, Rev. A. E. Austin, R. A. Clarke, Miss Nellie Covert, Mrs. A. E. Austin, Mrs. Margaret C. Wade, Miss Hattie E. Weaver, Mrs. Matilda K. Paul (native), Mrs. Ella C. Heizer, Mrs. Margaret A. Saxman, Mrs. Sadie L. Wallace, Miss Essie Gibson, A. T. Simson, Mrs. A. T. Simson, J. A. Shields, John E. Gamble, Willie Wells (native), B. K. Wilbur, M. D., Mrs. Adelia H. Carter, U. P. Shull.

Hoonah.—Rev. John W. McFarland, Mrs. J. W. McFarland, and Mrs. Mary E. Howell.

Point Barrow.—T. E. Beaupre, M. D.

Koserefski.—Holy Cross boarding school; superintendent, Rev. P. Tosi; assistants, Revs. A. Robaut, Fr. Barnum, Fr. Monroe; industrial teachers, Marchisio, J. T. Sullivan, J. Negro, and nine sisters.

Unalaklik.—Rev. A. E. Karlson, Mr. David Johnson, Miss Hanna Svenson, Miss Malvina Johnson.

Yakutat.—Rev. A. J. Hendrickson, Rev. Albin Johnson, Mrs. Albin Johnson, Miss Selma Peterson.

TEACHERS IN PRIVATE AND CHURCH SCHOOLS.

Point Hope (Protestant Episcopal).—J. B. Driggs, M. D.

Anvik (Protestant Episcopal).—Rev. J. W. Chapman, Mrs. J. W. Chapman, Miss Mary V. Glenton, M. D., Miss Bertha W. Sabine.

Fort Adams.—Rev. J. L. Prevost.

Golovin Bay (Swedish Evangelical).—Rev. August Anderson, Rev. N. O. Hultberg, Mrs. N. O. Hultberg, Mr. Frank Kameroff (native assistant).

Nulato (Roman Catholic).—St. Peter Claver day school; Rev. William Judge, superintendent; assistants, Rev. A. Ragaru, C. Giorano, and J. Rosati.

Cape Vancouver (Roman Catholic.)—Rev. J. Treca and Rev. A. Parodi; assistants, B. Cunningham and J. Twohig.

Ugavig (Moravian).—Rev. Ernest L. Weber, Mrs. E. L. Weber, Miss Philippone Ring; David Skuviuk (native assistant teacher).

Wood Island (Baptist).—Rev. Wesley E. Roscoe, Mrs. W. E. Roscoe, Miss C. C. Currant.

Douglas (Friends).—J. E. Connett, M. D., Charles N. Reploge, Mrs. C. N. Reploge, and Sybil Hanson.

Kake (Friends).—Silas E. Moon, Mrs. S. E. Moon.

Haines (Presbyterian).—Rev. W. W. Warne, Miss Frances H. Willard, Miss Anna May Sheets, Miss Mary A. Cadenhead.

ITINERARY.

Leaving Washington City on the 16th of April, I reached San Francisco on the 24th. After arranging for the transportation of the Lap colony to the reindeer station in Alaska, and also of the supplies for that station, I left San Francisco on the evening of the 25th and joined the United States revenue-cutter *Bear* at Seattle, Wash., on the 28th. Under instructions from Washington, the *Bear* got under way for Sitka on the 5th of May. The trip up the coast was a rough and stormy one; snow squalls were encountered almost every day. On the morning of May 10, off Dixon's Entrance, in a driving snowstorm, the gale became so severe as to split the fore-staysail, carry away the grips of the third cutter, and deluge the galley with water. At the same time the wheel ropes parted and the ship had to lie to; the sea was so rough that no attempt was made to set the table in the captain's cabin, but we took our meals in our hands in the pilot house as best we could.

Dixon's Entrance was named for Capt. George Dixon, commanding the English ship *Queen Charlotte*, which visited this region between 1775–76. The straits, however, had been discovered by Capt. Juan Perez, of the Spanish expedition of 1774. The first white man to navigate these waters was Captain Douglass, in the *Iphigenia*, in 1789. These waters mark the boundary line between British Columbia and Alaska.

Crossing the mouth of Dixon's Entrance, we were again in American waters—in Alaska—the region of the celebrated exploring expeditions of a century ago.

In 1741 Vitus Bering, in the *St. Peter*, reached as far eastward along the coast of Alaska as Kayak Island and looked upon the glories of Mount St. Elias. The same season his second in command, Alexei Chirikof, in the *St. Paul*, reached the region of Sitka and Cape Prince of Wales Island. The discoveries of Bering and Chirikof, together with their report of the abundance of furs, set the merchants of Siberia wild with excitement. As in later days, there was a rush to the newly discovered gold fields of California, so in Siberia more than sixty companies were organized to gather in the harvest of furs. Unwilling to await the proper construction of seagoing vessels, flatboats and small schooners were hastily constructed of hewn planks lashed together with raw-hide thongs—vessels that would float in fair weather but were unable to hold together in storms. In these frail crafts expedition after expedition followed one another in rapid succession and the half of them were lost, but those that did return in safety with a fair cargo divided profits of from $1,500 to $3,000 per man.

In the eager search for furs new sections were visited, until the whole southern coast from Attou to Sitka became known. Among these early adventurers were Capt. Emilian Bassof, 1743 (the first white man to land on the island of Attou); Mikhail Nevodchikof, 1745; Andrei Tolstykh, 1747; Nicofor Trapeznikof, 1749; Emilian Yugof, 1750; Peter Bashnakf, Feodor Kholodilof, and Simeon Krassilnikof, 1753; Radion Durnef, 1755; Andrei Tolfstykh, 1756; Ivan Shilkin, 1757; Stepan Glotlof, Demetri Paikof, 1758; Gerassim Pribylof, Grigor Shelikof, Alexander Baranof, Lastochkin Lebedef, Ferdinand P. Wrangell, and hundreds of others of lesser note. These trading expeditions were supplemented by explorations under the auspices of the Russian Government and Russian-American companies.

In 1778 the *Trekh Sviatiteli*, in command of Masters Ismailof and Bocharof of the Imperial navy, was dispatched by Shelikof in search of new lands to the eastward of Kadiak. Capt. Joseph Billings, commanding the *Slava Rossie* (*Glory of Russia*), was sent in 1790 on a secret "Astronomical and geographical expedition for navigating the frozen sea, describing its coasts, and ascertaining the situation of the islands in the seas between the two continents of Asia and America."

On the 7th of August, 1803, Lieutenant Krusenstern, in the *Nadeshda*, and Uri Lisiansky, in the *Neva*, sailed from Kronstadt with a party of scientists (among them being the naturalist, Langsdorf), a force of shipwrights and skilled workmen for shipbuilding, supplies of charts, instruments, and nautical works. In April, 1804, the two ships rounded Cape Horn. In June they visited the Sandwich Islands, where they separated, the *Nadeshda* proceeding to Petropavlovsk in Kamchatka, and Captain Lisiansky in the *Neva* continuing on to Alaska, arriving at Kadiak on the 13th of July, 1804, the first Russian expedition to visit Alaska around Cape Horn.

Otto von Kotzebue, commanding the brig *Rurik*, sailed from Petropavlovsk in the summer of 1816 in search of a "northwest passage." He was accompanied by the scientists, Chamisso and Wormskloid, Dr. Escholtz, and Artist Choris. Passing through Bering Strait and discovering a large inlet to the eastward, he rejoiced to believe that he had found the long-looked-for passage. On August 1, 1816, he entered the new sound with the *Rurik* only to find a few days later his mistake.

In 1822 Captains Khramchenco and Etholin, and Master Vassilaief, in the brig *Golovnin*, and schooner *Baranof*, made a detailed survey of the Alaska coast of Bering Sea from Bristol Bay to the mouth of the Kuskokwim, and from St. Michael to Golovin Sound.

In 1827 Capt. Feodor P. Lütke, by directions of the Russian Government, made a careful survey of the northern coast of the Alaska Peninsula.

In 1828 Captain Hagemeister, in the *Krotky*, and Captain Staninkovich, in the *Möller*, made important surveys on the coast of Bering Sea.

In 1828 Master Vassilaief, accompanied by Alexander Kolmakof, a creole, crossed the Alaska Peninsula from Shelikof Straits via the lakes to the Kuskokwim River. During this expedition Kolmakof selected the site of a trading post, which was built in 1831, and in 1841 a redoubt named after him was built near the junction of the Kuskokwim and Kvigin rivers.

In 1830 Midshipman Etholin was placed in command of the brig *Chicagof* and sent to explore Norton Bay, Sledge, King, and St. Lawrence islands. Upon his return he advised the establishment of a station on Stuart Island (St. Michael).

In 1833 Lieutenant Tebenkof was sent in the sloop *Ourupa* to establish a trading post on Norton Sound and make explorations inland. The new post was named Mikhaielovsk. The inland explorations were committed to Andrei Glazanof, a creole. The party, with three native guides, and two sleds, each drawn by five dogs, set out on the 30th of December, 1833, and after great hardships reached as far as Anvik on the Yukon River, and Païnagamute on the Kuskokwim River.

In 1838 Alexander Kashevarof, a Kadiak creole, was sent to explore the Arctic coast. Being landed from the brig *Polyfem*, he continued northward in five three-

holed bidarkas, reaching within 100 miles of Cape Beechey. The same year Vassili Malakhof explored the Yukon as far north as Nulato, where he built a block house. In 1842 Lieutenant Zagoskin, of the Imperial navy, explored the Kuskokwim and Yukon rivers and their tributaries.

The rapid extension of the Russian occupation of the American coast from 1743 to 1800 attracted the attention and excited the jealousy of other European nations, and especially of Spain, who looked upon Russian enroachments in the north as imperiling her interests in California. Consequently, in 1774, Capt. Juan Perez, commanding the *Santiago* was ordered to cruise on the North Pacific coast and take possession of new lands in the name of Spain. He reached as far north as Dixon's Entrance. The next year he was followed by Lieut. Juan Francisco de Bodega y Cuadra in the *Senora*, reaching the Cross Sound. On the shores of Salisbury and Bucarelli sounds wooden crosses were erected as notification of Spanish claims.

In 1779 Lieut. Ignacio Artega, commanding the *Princesa* and *Favorita*, under orders from Spain, sailed from San Blas February 11, and went westward as far as Cooks Inlet, at Nuchek, taking formal possession of the country.

In 1791 Alejandro Malaspina, commanding the corvettes *Descubierta* and the *Atrevida*, sailed May 1 from Acapulco for Prince William Sound in search of the Northwest Passage and new lands for the Crown. In 1788 an expedition in command of Alferez Eslevan Jose Martinez, consisting of the *Fragata Princesa* and the *Paquebot San Carlos*, in command of Pilot Gonzalo Lopez, was sent along the coast to the Aleutian Islands. And in 1790 Lieut Salvador Fidalgo, in the *Paquebot Filipina*, visited Prince William Sound and Cooks Inlet.

England, then as now, wide awake for colonial extension, followed the example of Spain and sent, in 1778, two years after the second Spanish expedition, Capt. James Cook, commanding the *Resolution* and the *Discovery*, and five years later the *Discovery* and the *Chatham*, in the command of Capt. George Vancouver; then in the present century, in search of Sir John Franklin, the expedition of the ship *Blossom* in 1825–1828, Capt. F. W. Beechey commanding, and in 1836–1842 the expedition of Capt. Edward Belcher.

Supplementing the Government explorations were the English trading expeditions of Capt. George Dixon in the *Queen Charlotte*, and Capt. Nathaniel Poetlock in the *King George* in 1786; Captain Hutchins in the *Prince of Wales* in 1787, and Capt. John Mears in the *Nootka* in 1789.

In 1786 France sent out an expedition consisting of the two frigates, *Astrolabe* and *Boussole*, in command of Capt. J. G. F. de la Perouse, and in 1791 Capt. Etienne Marchand, commanding the *Solide*.

In 1790 the Swedish Government sent to the Aleutian Islands the cruiser *Mercury* in charge of Captain Coxe.

American trading vessels were visiting Alaska prior to 1785, but no Government exploration was undertaken by the United States until Commander John Roger's expedition around the world in 1854–55, and of the Aleutian Islands in 1856 by the United States schooner *Fenimore Cooper*, in charge of Lieutenant Gibson, United States Navy.

Returning to Dixon's Entrance, the extreme southwestern point of the Alexandrian Archipelago, which we are entering, is Cape Mazon, near to which, on Kaigahnee Straits, is Jackson, a mission station of the Presbyterian Church to the Haidai tribe. Here in 1881 I established a mission school with Mr. J. E. Chapman as lay teacher. In 1882 he was replaced by Rev. J. Loomis Gould and family, who have faithfully held the fort until the present. Mr. Gould has built up a church of 90 members, and Mrs. A. R. McFarland, under the auspices of the Woman's Executive Committee of Home Missions, a mission home. The day school established by the church in 1881 was, in 1885, turned over to the Government.

Steaming northward along the bleak and snow-covered mountains of Prince of Wales Island, we pass the small outlying Forrester Island, named in 1774 by Perez as Santa Christina, and by Cuadra as San Blas. Wolf Rock Island and Cape Bartolome are reached all unseen in the storm, and we are off Bucareli, which, with Kasaan Bay, almost cuts Prince of Wales Island in two. This large sound seems to have been a favorite with the early Spanish exploring parties. On the 24th of August, 1775, the expedition under Cuadra, being greatly impressed with the location and character of the sound, sent a party on shore, who, after erecting a large wooden cross and celebrating a solemn high mass, took possession for Spain with waving banners and discharge of musketry. The waters were called Bucareli Sound.

In 1779 Lieutenant Artega visited the sound and repeated the solemnities of taking possession. In connection with Cuadra, who was second in command, they made a complete survey of the sound, which survey is the best that has thus far been made. This accounts for the Spanish nomenclature on the charts. The next visit of the Spanish was in 1792, when Lieut. Jacinto Caamano in the frigate *Aranzazu*, came searching for the Northwest Passage.

In the northeast corner of the sound is the small fishing station of Klawak. Here

in 1886 I established a school with Rev. L. W. Currie as teacher. The first winter the school was kept at the native village of Tuxikan in a native house, Mr. Currie and family occupying a portion of the room curtained off with drilling, the owner another portion, and the school and church the center. The following summer they removed to Klawak, where a school and teacher's residence were built.

Passing along the seaward side of Iphigenia Bay at 11.20 a. m., we were off Coronation Island. We were also off the mouth of Sumner Straits, at the eastern end of which is the village of Fort Wrangell with its Government school and Presbyterian mission. Passing Christina Sound and the Hazy Islands, we were soon abreast of Cape Ommaney, the southernmost point of Baranof Island. This island is about 85 miles from north to south, and about 20 miles wide. At 7.30 p. m. we made Biorka Island, at the southern mouth of Sitka Sound. At 9.50, it being too foggy to attempt to make the harbor, the steamer stood off and on until morning. At 1.30 a. m., the *Bear* stood in for Sitka Sound, and at 3.20 a. m. hauled up between Cape Edgecumbe and Biorka Island.

Cape Edgecumbe is the southwestern point of Kruzof Island. This island is noted for the extinct volcano of Edgecumbe at its southern end. Cuadra in 1775 named the cape Cabo de Engano, and the mountain San Jacinto. These names were changed in 1778 by Captain Dixon to the present name of Edgecumbe. The Tchinkitanc of the natives, the Baya de Gaudalupa of the Spaniards, and the Norfolk Sound of Captain Dixon is now known as Sitka Sound.

Just over Biorka, to the eastward a few miles, is a group of hot and cold sulphur and iron springs. The waters are impregnated with sulphur, iron, manganese, and chlorine, 97 per cent being sulphur. During the Russian occupation a small hospital was established and maintained at the springs for the treatment of skin diseases.

At 5 a. m. we were off Vitskari Island, and at 6.25 a. m. dropped anchor in Sitka Harbor in front of the Presbyterian mission. The harbor of Sitka, with its large number of islands and islets, is one of surpassing beauty, and forms one of the most picturesque and attractive locations for a town in the United States.

In the closing years of the eighteenth century, it being found that the fur-bearing animals of western Alaska were rapidly decreasing in number, the attention of Baranof was directed to the new sources of supply in southeastern Alaska. About the same time the Hudson Bay Company was extending its operations eastward across the continent to the coast, and American ships had discovered the profitable fur trade of the same region. Baranof, to extend his trade, hedge off the English, and place himself in easy communication with the American vessels, from whom he could procure breadstuffs and other supplies, determined to establish a settlement in the Alexander Archipelago. After a long period of preparation he set sail on the 10th of April, 1799, from Kadiak in the brig *Elizaveta* and sloop *Konstantin* with 22 Russians and from 500 to 600 Aleutes, with 200 canoes. At Nutchek he was joined by Kuskof with from 300 to 400 Aleutes and 150 canoes. Rounding Cape Suckling 60 men were lost by the capsizing of the boats, and soon after a number of others were killed in a night attack of the natives. However, on the 25th of May, in a driving storm of sleet and snow, the mountains covered with snow to the water's edge, the expedition reached Sitka Sound and effected a landing at Bay of Starri Gavan, 6 miles north of the present site of Sitka.

Negotiations were entered into with Katlian, who seemed to be the leading Sitka chief, and the land for a settlement was purchased of him for some beads. Keeping one-half of the force at hunting sea otters, the other half was set to work on the buildings, and soon the sound of axes and the crash of falling trees proclaimed the commencement of civilization in that region. The place consisted of 6 buildings, a stockade, and 3 fortified blockhouses, and was named Fort Archangel Michael. In the spring of 1800 the force numbered 25 Russians and 56 Aleut men, besides women and children. At the time of Baranof's landing the American ship *Caroline*, of Boston, Captain Cleveland commanding, was at anchor a few miles off, trading for sea-otter skins with the natives. Having established the Sitka settlement, Baranof returned to Kadiak in the fall of 1800, leaving Vassili Medvednikof in command.

With the chief factor absent, and no doubt more or less oppression on the part of the Russians, the natives bided their time. In the spring of 1802 they gathered the warriors from all the surrounding tribes, and on a Sunday in June, when a majority of the Russians and Aleutes were off hunting and fishing, they made an attack on the new settlement, which was quickly taken and burned to the ground; then attacking the outside hunting parties, killed them off in detail, but 3 Russians and 2 Aleutes escaping to the woods. A few days later these were found and taken on board the *Unicorn*, an English ship, under Captain Barber, which was in the vicinity trading. Soon after another English ship and an American trading ship arrived. By detaining the native chief and others on board ship and threatening to hang them, 18 women were ransomed, making 23 in all that were saved. These were taken to Kadiak by Captain Barber.

The destruction of Fort Archangel Michael was a heavy blow to Baranof, but he was so occupied with other sections that it was not until the spring of 1804 that he

was able to set out to reestablish his settlement in Sitka Sound. In March, 1804, Baranof received word that the Emperor had raised him to the nobility, creating him a "Collegiate councilor." This new mark of the Emperor's appreciation of his work affected him to tears, but with the memory of Sitka ever upon his mind he exclaimed: "I am a nobleman, but Sitka is lost. I do not care to live. I will go and either die or restore the possessions of my august benefactor."

Having completed his arrangements on the 2d of April, Baranof sent forward two ships, in command of Demianenkof, and two days later sailed himself with the sloops *Ekaterina* and *Alexander* and 300 bidarkas, making a combined force of 120 Russians and 800 Aleutes with which to meet and overcome the 5,000 or 6,000 native warriors that could be massed against them. Arriving at Yakutat, he was reenforced by Kuskof with the small sloops *Yermak* and *Rostislaf*, which had been built for the occasion. On the 25th of August Baranof left Yakutat on board of the *Yermak*, reaching Sitka Sound September 19, whither the *Alexander* and *Ekaterina* had preceded him; and with them was the ship *Neva*, Captain Lissianski, having unexpectedly arrived from Russia via Cape Horn and Kadiak. The natives were found intrenched upon an island rock 60 feet above tide water.

On the 1st of October four of the ships were anchored off the native stronghold, and fire was opened from the ships, followed by a desperate charge, led by Baranof himself. The assault was repulsed, with the loss of 11 men and the wounding of Baranof and Lieutenants Arbuzof and Pofalishin. The following day the ships opened a furious bombardment, which caused the natives to sue for peace. Three days were consumed in negotiations without the stronghold being surrendered, when, on October 6, Captain Lissianski, who at the request of Baranof had taken charge of the hostilities, constructed a raft, upon which he moved two guns nearer the fort. An interpreter was again sent to demand an immediate surrender of the post, and brought back word that the natives would leave at high tide. But the tide rose and fell without any apparent movement within the fort. Late in the night a weird, wailing chant was heard in the fort and all was still. It was the death dirge, as they killed their infants and small children lest their cries should betray their flight. Then silently stealing out of the fort into the woods they escaped unobserved. In the morning a flock of ravens circled over the fort and fed on the slain. When the Russians entered the stockade they found the bodies of 30 warriors and all the small children.

This place had been originally selected by Baranof as a site for a settlement, and it was now taken for that purpose. The log fortress was burned to the ground and its site was taken for the location of the residence and offices of the Russian commander, and the foundations laid for Novo Arkhangelsk, the capital of Russian America—the Sitka of to-day. During the winter of 1804–05 8 buildings were erected and surrounded with a substantial stockade, with blockhouses and mounted cannon at the angles. In the spring the ground was cleared and several vegetable gardens started. But that the accommodations were still far from comfortable we may see when Count Rezanof writes a few months later in an official report:

"We all live poorly, but worse than all lives Baranof, in a miserable hut, so damp that the floor is always wet, and during the constant heavy rains the place leaks like a sieve."

In 1809 Baranof's hut was destroyed by fire, giving place to a more comfortable residence, so that Captain Golovin, of the Russian navy, in 1810 writes the fort "consisted of strong wooden bastions and palisades; the houses, barracks, magazine, and manager's residence of exceedingly thick logs. In Baranof's house the furniture and finishing were of fine workmanship and very costly, having been brought from St. Petersburg and England. But what astonished me most was the large library, in nearly all European languages, and the collection of fine paintings."

In 1827 the second castle, being thrown down by an earthquake, was removed and the summit of the rock crowned with a still larger building, which has since been known as the governor's palace. The building was constructed of large cedar logs squared on the sides and dovetailed together at the corners. To prevent its being destroyed by an earthquake, copper rods were run through the logs and bolted to the rocks upon which the house stood. It was 140 by 70 feet in size, two stories high, and crowned with a cupola, in which at night lamps were placed to guide incoming mariners. The building was surrounded by a stockade and defended by a battery of guns that extended halfway around it on the seaward side. At the northwest or land side it was approached by a long flight of steps. Upon a landing halfway up was another battery and a sentry. The second floor of the palace was given up to state apartments, and used for receptions, balls, public dinners, etc. In the center was the grand saloon, 70 feet square. Opening out from the saloon on the one end was a drawing-room, extending the whole breadth of the building, 35 by 70 feet in size, and from the other end a drawing-room and billiard room each 35 feet square. On the first floor were the parlor, library, bedrooms, dining room, and kitchen. In the grand saloon, upon the anniversary of the Emperor's birthday and other festive occasions, the governor was accustomed to give a dinner to all the officials and lead-

ing chiefs in the place. Sir George Simpson, governor-general of Rupert Land, in his journey around the world, visiting Sitka in 1842, writes of the farewell dinner given him by Governor Etholin:

"The farewell dinner, to which about 30 of us sat down, exceeded in sumptuousness anything I had yet seen even at the same hospitable board. The glass, the plate, and the appointments in general were very costly; the viands were excellent, and Governor Etholin played the part of host to perfection."

The last of these regal festivities was on the 18th of October, 1867, in honor of the transfer on that day of the Territory to the United States. That night a grand ball and dinner were given to the distinguished officials and naval officers of the United States and Russia who were present at the ceremonies, followed by an illumination and fireworks.

After the transfer this historic building was occasionally occupied by American officials until, gradually falling into decay, it was abandoned. Its portable furniture, lamps, brass chandeliers, and even the great, quaint hinges on its doors, were stolen. Tourists cut out and carried away its carved railings, and town boys amused themselves by throwing stones through its windows. The doors and sash were boldly carried off to do service in other habitations, and when I first saw the building in 1879 many of its windows and doors were gone and the floor of the grand saloon covered with rubbish. It remained, however, until the last a favorite resort for tourists from the steamers, and an opportunity to dance in the grand saloon was greatly prized. In late years added interest has been given to the building by speaking of it as haunted by the ghost of a beautiful Russian lady, the daughter of a former governor, who disappeared from the ballroom on her wedding night, and was found dead in one of the smaller drawing-rooms. On the anniversary of her wedding night, and again on Easter night, clad in her wedding garments and wringing her jeweled hands, her spirit is said to glide from room to room, leaving the perfume of wild flowers behind her.

In 1893 the Government expended $14,000 in repairing the castle for the uses of the United States district court. At 2 o'clock on the morning of March 17, 1894, flames were seen issuing from the building, and in four hours the most noted landmark and historic building of Sitka was a heap of ashes.

With the erection of the first governor's residence and fort in 1804–05 the tongue of land at the base of the fortified rock was gradually cleared of trees and stumps and a commencement made in the building of the village. From time to time several large apartment houses or flats were erected for the use of the employees of the company. There was special activity in the erection of large public buildings during the time that Count Rezanof was governor. Some of these log buildings were 150 by 80 feet in size and from two to three stories high, with large attics under the roof. A heavy stockade was erected around the whole village, with fortified blockhouses at the angles. Upon the removal of the United States troops in 1877, the natives, believing that the country had been abandoned by the Government, arose in 1877, tore down the stockade, and would have murdered the white inhabitants but for the timely arrival of a British gunboat.

A small portion of the stockade remains in the rear of the governor's garden, and also two of the blockhouses.

Under the indomitable energy of Baranof, Sitka (Nova Arkhangelsk) became not only the political capital of Alaska (Russian America) and the headquarters of the Russian-American Company, but also the commercial metropolis of the Pacific Coast, possessing docks, shipyards, brass, iron, and bell foundries, machine shops, saw and flour mills, brickyards, woolen cloth mills, besides manufactories for agricultural implements, a copper-engraving establishment, large warehouses, an observatory, hospitals, a library, Russo-Greek and Lutheran churches, the bishop's residence, schools, a theological seminary, and an officers' clubhouse. During this period San Francisco was known simply as a Roman Catholic mission to the Indians.

Two and one-half years from the commencement of the settlement of Sitka a fine brig was launched from its shipyard and christened *Sitka*. The following summer a three-masted schooner of 300 tons was launched and named *Otkrytie* (*Discovery*); and Mr. A. J. Findlay, writing to the Nautical Magazine in June, 1849, says:

"The arsenal is the next object which arrests the attention of a stranger, from the number of men employed either building new or repairing old vessels. At this moment they are building a new steamer, destined, I think, for Mr. Leidesdorf, of California. The workmanship appears good and solid; everything for her is made on the spot, for which purposes they have casting houses, boiler makers, coopers, turners, and all the other 'ers' requisite for such an undertaking. The boiler is almost completed and is made of copper. They also have their tool makers, workers in tin and brass, chart engravers, sawyers, and sawmills, for all which occupations suitable establishments have been made."

At the time of the transfer a fleet of 15 sailing vessels and 2 ocean steamers went and came from its harbor. Before the American occupation of California the Sitka

foundry furnished the Romish missions of California with their chimes of church bells, and Sitka manufactories supplied the California ranchmen with their agricultural implements.

The annual reports of the observatory were published by the Academy of Sciences at St. Petersburg. The Sitka Library, established by Count Rezanof in 1805, contained, in 1835, 1,700 volumes, 400 periodicals and pamphlets, and a valuable collection of charts. Of the books, 600 were in the Russian language, 300 in French, 130 in German, 35 in English, 30 in Latin, and the rest in Swedish, Dutch, Spanish, and Italian. The 39 copper plates of Tebenkof's celebrated Atlas of Alaska were engraved at Sitka by Terentief, a creole.[1]

To provide more comfortable accommodations for unmarried officers and officials of the higher rank, many of them sons of the nobility of Russia, Governor Etholin built a large clubhouse.

Within a year from the commencement of the settlement (1805) a school was established. In 1820 its efficiency was greatly increased. In 1839 a home school for orphan girls, daughters of the employees of the company, was established. In 1840 a similar school was opened for orphan boys. In 1841 a theological school was also opened.

The first Russo-Greek priest arrived at the new settlement in 1816. Before the transfer to the United States the Russo-Greek Church had a resident bishop, with 15 priests, deacons, and followers; also a cathedral, church, and episcopal residence. The Lutheran Church had its minister and church building, both the Greek and Lutheran churches being sustained by the Imperial treasury.

With the American occupation, a great change came over the scene. Shipbuilding ceased, and the shipyard was filled up to make a parade ground for American soldiers. Manufactories, foundries, and all other industries were closed, only two sawmills and a beer brewery remaining. The skilled mechanics and Russians largely returned to Siberia. The bishopric and theological seminary were removed to San Francisco. The books of the public library were "lost, strayed, or stolen." No trace of them now remains. Three of the large Russian buildings, including the castle and hospital, have been destroyed by fire. The Lutheran Church, condemned as unsafe, has been torn down. The clubhouse, too, has been adjudged unsafe, and, with some of the warehouses and other buildings, will have to be torn down. The civilized, industrious population of several thousand has dwindled down to several hundred, and where thousands earned a living by their trades, the few hundred that remain are largely dependent, directly or indirectly, upon the salaries of the Government officials and the summer patronage of curio-buying tourists.

For a short time after the transfer Sitka had a boom, as wide-awake speculators rushed in, anticipating the creation of a large city. A region several miles square, reaching from the sea to the tops of the mountains, was mapped on paper into streets, parks, and city lots. A municipal government was organized, with a mayor and common council. A newspaper, the Sitka Times, was started and published weekly for eighteen months. But the enterprising speculators, failing to realize their hopes, one after another returned south, and the withdrawal of the troops in 1877 seemed to complete the decline of Sitka. The census of 1880 revealed the presence of but 157 Americans and 219 creoles in the deserted city. The same census, however, showed a native Thlinget population of 540.

The Thlinget village of Sitka is about as large to-day as in Russian times, and in much better condition. Largely under the influence and teaching of the mission and school maintained among them since 1880 by the Home Missionary Society and the Woman's Executive Committee of Home Missions—both of the Presbyterian Church—the Thlingets have made considerable advance in civilization. The old damp, dark, and smoky native buildings, with their bark roofs, are giving place to modern buildings with windows, doors, wooden floors, chimneys, and shingle roofs. Stoves are taking the place of a fire on the floor in the center of the room; chairs, tables, dishes, and bedsteads are becoming common; and on Sundays the crowds that wend their way to church are dressed in good "store clothes" of American manufacture. And to-day the only ones learning trades are not the sons of Russian creoles, but of the Thlingets, at the Presbyterian Industrial Training School, at Sitka. This institution has 14 buildings, and is distinctively coeducational. The boys and girls recite in the same classes, dine together in the same dining room, and, under wholesome restraint, have opportunities for social intercourse.

A few years of sedulous training have developed in some of the older pupils a spirit of emulation, a sense of personal responsibility, self-respect, self-reliance, and self-helpfulness which command respect. Most of the large boys, advanced far enough to read intelligently in the second reader, are learning a trade (all being in school half of each day and at work half a day), and the diligence with which they pursue their studies and the zest with which they enter upon industrial work day after day are most praiseworthy of them and encouraging to their instructors. All

[1] Creole is used here to designate persons of mixed blood, of Russian descent.

of the shoes for the pupils of the school are handmade in the shop, under the direction of a competent foreman. Considerable custom work is also done.

The supply of barrels and half-barrels far exceeds the demand, yet coopering is considered an excellent trade for the young men. Owing to high freight, barrels are usually made at the fishing stations where needed, and coopers are in demand at those places.

The variety and scope of carpenter work have proved a most valuable source of instruction to the boys, most of whom are aptly adapted to mechanical industry. The boys have made commendable progress during the past year. Young men who can do carpenter work fairly well can find opportunity to ply their trade in any of the villages of Alaska.

There are eight model cottages, six of which are occupied by young married couples from the school. These young folks have been thrown entirely upon their own responsibility and resources, and they are doing right well in earning a livelihood, while their houses are kept clean, neat, and homelike. The environments of family life among the young folk, in contradistinction to that in vogue among the natives, tend to create new conditions and inspire new impulses among their own people.

The general work of the school—patching, mending, refitting, making new garments (aprons, towels, underwear, dresses)—is no light task. Each girl 8 years old and upward knits her own stockings, and the large girls find time to learn useful tidy work in order that they may be able to beautify their own homes with the work of their own hands.

The girls are trained in every department of household industry—kitchen, dining room, teachers' room, etc. The girls numbering but 50, the matron and her assistants find time to give each girl individual care in the details of housekeeping, thus gradually inculcating and developing a sense of personal responsibility.

The boys do the bread baking for the school, while the girls in turn are taught how to bake and cook for a family. This special instruction in the art of cooking is given in the teachers' kitchen, the cooking for the teachers and employees being done by the native girls. They are also trained to wait upon the table, and they serve the teachers and guests in a graceful manner. The young boys are also trained in the school kitchen and dining room.

The pupils, from the children to the adults, sing with a spirit and understanding that outrival many of the public schools.

The brass band of 20 members dispenses music for the school and for the town on public occasions.

There is a military company of 35 members. The guns were kindly loaned them by the governor of the Territory.

Lessons in patriotism are constantly inculcated. The Alaskans are a loyal, patriotic people.

The time has fully come when a normal department should be added to this important school, and a beginning be made in training native teachers.

After a very busy week spent at Sitka, the *Bear* got under way at 4.45 a. m. on May 19 for Prince William Sound. The trip up the coast was grand. The Fair Weather range of mountains stood out bold and white, covered with snow to the water's edge. On the afternoon and evening of the 20th we had fine views of Mount St. Elias, it being visible from base to top. One of the most remarkable stretches of coast for a combination of snow, glaciers, and mountains is the region between Cross Sound and Cape St. Elias—no language can do it justice. At 1 o'clock a. m. on May 22 we entered Prince William Sound. There being no good chart of the region, the captain felt his way slowly with constant soundings of the lead. At 8.30 a. m. anchor was dropped off the east end of Hawkins Island, Cordova Bay, in the vicinity of two large salmon canneries. In the neighborhood of these canneries reside 25 white men living with native women. It is reported that last winter they manufactured 2,500 gallons of liquor for the use of the Indians. The two salmon canneries at Cordova Bay, and one near by at the mouth of Copper River, represent a capital of $375,000. The output of these canneries for last season was 80,000 cases of canned salmon, with four dozen 1-pound cans to the case, with a valuation of $280,000.
