On the 23d, availing myself of the kind invitation of Captain Humphry to make a trip across the delta of the Copper River, I went aboard their little fishing steamer. The distance across the delta is about 50 miles. Passing to the southwest of the canneries and skirting the mountains down the peninsula east of Hawkins Island and around Cape Whitshed, our little craft boldly pushed to the eastward across the delta, the steamer channel being marked by spruce trees which, at low tide, when the flats are bare, had been set at the principal turns. The afternoon was rainy and we only got occasional glimpses of the beautiful snow-clad mountains to the southward. About 9 p. m. we reached our destination at Pete Doll Slough. Upon stilts on the bank was a small frame house where twelve fishermen and a cook abide during the few weeks in which salmon run at this point. As we came up to the mud bank

there were six piles of red salmon and six of king salmon waiting to be loaded upon the steamer. The catch for the day was 4,000 fish, which were soon loaded on board. For the common salmon, averaging 8 pounds each, the fishermen receive 3 cents per fish, and for the king salmon, weighing from 40 to 80 pounds, 10 cents each. Soon after midnight, the tide being up, the steamer started to return to the canneries, but before fairly getting out in the stream, ran aground, and the tide falling, we were left where we could get off the steamer and walk ashore. This detained us until high tide at noon on the 24th, when we again got under way, reaching the canneries about 5 p. m. While en route we passed five bidarkas with natives hunting the sea otter.

Returning to the *Bear* at 6.45 p. m., we were under way for Nuchek. At 10.35 the cutter ran ashore on a sand shoal, but was able to back off without any serious damage. On the morning of the 25th we dropped anchor at Nuchek, where we remained until 2.35 a. m. on the 27th, at which time a start was made for Cooks Inlet. Glaciers and snow-covered mountains were visible the entire day. At 6.30 a. m. on the 28th, rounding Chugatz Island, we entered Cooks Inlet. At 9 o'clock, overhauling the *Ida Etta*, the steamer was stopped to send a boarding party to the sealer. At 9.20 we were again under way northward, and at 1 p. m. passed Coal Point (Kachekmack Bay); at 3 p. m. Staritchkof River was abeam; at 4.50 we anchored off Munia (Nilchik). The village being 4 miles distant, the sailors had a long, hard pull to shore. The whole male and child population of the village came down to the beach to meet us. The only American in the place was Mr. J. M. Cooper, the trader. The village is composed of 17 families of Russian creoles, comprising 53 people, of whom 23 are children between 6 and 21 years of age. The houses are small but comfortable, and well built of logs. The village has also a small log church recently reconstructed. The priest comes from Kenai once a year. In the meantime, the principal men take turns in conducting church services. The community possesses 15 head of cattle (small Siberian breed). They raised 600 bushels of potatoes, besides cabbages, turnips, ruta-bagas, etc. They have about 5 acres under cultivation. Each season they salt down a sufficient quantity of fish for their winter use. Eighteen head of moose were killed the past season; also a number of bears, lynx, etc. The community was anxious for a school. These people are interesting as the descendants of those who were sent in 1812 by the Russian American Company to found the Ross colony and raise provisions for the Alaska colonies. When the attempt was abandoned in 1841 the people were returned to Alaska, and many of them settled at this point.

At 4.20 o'clock on the morning of the 29th we got under way, again steaming north, and at 9.30 a. m. came to anchor 5 miles off Fort Kenai, where we again went ashore. As the people of this place see but two or three ships a year, an arrival is a great event, and large numbers of the people gathered on the bluff to see us land. We were met at the landing by Mr. Wilson, formerly a naval officer of the United States, but who for twenty-five years has been in the employ of the Alaska Commercial Company in the vicinity of Cooks Inlet. Making a call upon the Russo-Greek priest, we found that his wife talked English fluently. The population of Kenai is given by the priest as 152, 89 males and 63 females; to this population there are but 16 children; these are all in a school taught by the assistant priest. The people are rapidly dying off; four years ago, in an outbreak of the grip, 40 people died in one month from this small population. The place is divided into two small settlements; the one on the bluff overlooking the beach is Russian creole, and the other, about a mile away, overlooking the valley of the Kaknu River, is occupied by the Kenai Indians. The slope of the bluff from the creole village down to the beach is covered with the vegetable gardens of the people. The creoles have gotten out the logs for a new church building, and are awaiting the expected arrival of their bishop from San Francisco to secure permission to build. The priest lives in a large, comfortable, log building, and has taken a stand for temperance and morality among his people that will do them much good. This can not be said of many of his predecessors. The range of the thermometer at this place is from 90° above zero in summer to 35° and 40° below zero in winter.

Near the Indian village is a large salmon cannery, on the Kaknu River, which is a large stream flowing from the Skillokh Lake. Across the bay, immediately in front of Kenai, is Redoubt Mountain, an active volcano. At the head of Cooks Inlet, on Turnagain Bay, are some gold placer mines, worked by 30 white men. A few miles to the south of Kenai is the mouth of Kassiloff River, a large stream taking its rise in Tustumena Lake; at its mouth are two salmon canneries. Near the mouth of Cooks Inlet, on the east bank, is the village of Soldavia, on Kachekmak Bay. It has two stores, and is the largest settlement on the inlet. The place has applied to the general Post-office Department to be placed on the mail route as a distributing point for Cooks Inlet.

Having finished our duties in Cooks Inlet, at 2.30 a. m. May 30 we were again under way, bound south to Karluk. Going on deck at half past 7 o'clock, we were abreast of Illiamna Volcano (1,260 feet high), which from base to peak, under the

morning sun, glistened in its white robe of snow and ice. In the crater, apparently to the southwest of the peak, were occasional puffs of smoke. As far as the eye could reach, north and south along the west coast of the inlet, stretched the wonderful panorama of high, sharp peaks and rugged mountains, all covered with snow to the water's edge. In front of us Mount St. Augustin arose from the sea, and with regular sloping sides formed a conical-shaped mountain, covered with ice and snow. It is evidently of volcanic formation, as the ravines formed by the lava flows radiate from the cone to the base in regular lines.

A few years ago a volcanic eruption split off a portion of this mountain and cast it into the sea. The mountain forms an island about 27 miles in circumference. This island was ever present and formed a conspicuous landmark through the entire day's sail. Prominent on the horizon in front of us in the morning, and which we only passed in the evening, was Cape Douglass, which marks the southwest boundary of Cooks Inlet. In the far distance it looms up an island cone apparently separated from the mainland, but a nearer approach reveals a large group of sharp peaks covered with snow and their ravines filled with glaciers. At noon a shout on deck took us out of the cabin to see a wonderful display of bird life. The water was black with them, forming a belt from 50 to 100 yards wide and almost as far as the eye could reach. The birds had evidently found a school of small fish, upon which they were gorging themselves. At different times in the inlet a number of fur seal were seen disporting themselves in the water.

At 3.30 p. m. the ship was hove to to board a small schooner, the *Jayhawker*, of Juneau, E. H. Bogues, master. The only occupants of the vessel were Mr. Bogues and a boy of 11 years of age. Mr. Bogues was sick. The schooner had sprung a leak and was half full of water, and the two sailors were entirely out of provisions. The captain offered to tow them into a neighboring harbor, but they declined his assistance. He then sent them some provisions and left them. It was afterwards learned that the schooner and master were famous for smuggling. A superb sunset closed a day of wonderful scenery. For grandeur of scenery Cooks Inlet greatly surpasses the properly famed scenery of southeast Alaska. Early in the morning of May 31 the *Bear* dropped anchor at Karluk. In the harbor were the American barks *Harvester*, *Merom*, and *Nicholas Thayer*. During the forenoon I went ashore and inspected the Government schoolhouse, which was erected several years ago at this place. During the past two years, owing to the smallness of the appropriation of Congress, the schoolhouse has been closed. Karluk is the most famous place in the world for salmon, having six or seven large canneries.

Returning from the visit to the village, at 2.15 p. m. the ship got under way for Afognak. The wind freshening into a gale and being dead ahead, with a heavy sea, the captain put into Uyak Bay and anchored. This bay runs inland some 27 miles, and in connection with Kaliuda Bay, on the eastern side of the island, almost cuts the great island of Kadiak into two portions. The trail between the bays is about 8 miles. At anchor in the bay was the small fishing steamer *Ella Rolhffs*. Rich quartz-gold mines are reported at the head of the bay. The storm having somewhat abated, at 2.50 a. m., June 2, we were again under way. At 9 o'clock we turned from Shelikof in Karluk Straits. These straits, which separate Afognak and Kadiak islands, are about 20 miles long and 2 miles wide. On a clear day the trip through them furnishes beautiful scenery. Soon after entering the straits we overtook the Alaska Commercial Company's schooner the *Kadiak*, which had been reported lost. Captain Healy very kindly offered to tow the schooner into Kadiak, which offer was gladly accepted. Several times during the day we again saw the wonderful sight of myriads and myriads of birds covering the face of the sea. Among the birds several whales were seen.

At 1.15 p. m. we came to anchor abreast of the village of Afognak, and an opportunity was afforded me to go on shore and inspect the schoolhouse and interview the teacher. Returning on board, the *Bear* got under way. At 3.20 p. m., turning southward from Karluk Straits, we entered the romantic and beautiful Ozinkey Narrows between Kadiak and Spruce islands. With a strong tide in our favor, we swept swiftly through the Narrows past the village of Ozinkey, where I lay at anchor in 1886 in the schooner *Leo*. We again met myriads of birds darkening the water in search of fish. Those met in the forenoon were of a white color; those in the afternoon were brown. About 7.10 p. m. the ship anchored about midway between Kadiak and Wood Island villages. Going ashore at Wood Island, I had the privilege of spending the night with Mr. Roscoe, at the mission of the American Baptist Woman's Home Missionary Society. Mr. Roscoe's work has met with bitter opposition, and even persecution, from some who should have stood by him; at times even his life has been in danger, but through it all he has come out triumphantly, and now has 18 Russian creole and Aleut children in the home. The next day I went over to Kadiak and visited Mr. Washburn, agent of the Alaska Commercial Company, and Mr. Solter, teacher of the Government school. Here I was reminded that, although so little is known by the general public of Alaska that it is considered a comparatively new coun-

try, yet the citizens of Kadiak at the time of my visit were making preparations to celebrate the centennial of the establishment of the Russian church in their village.

In the afternoon of June 4 the ship got under way for Unga. The trip through the southern entrance to the harbor of Kadiak out to sea is one of great interest and beauty. Passing between Wood and Picknick islands, by the southwest end of Long Island, through Chiniak Bay, a large number of needle rocks are seen rising from the sea. Long Island has been leased from the Government and stocked with silver-gray foxes. Passing Cape Greville, 15 miles south, carries us abreast of Ugak Island, which is a landmark for sailors bound for Kadiak by the southern entrance. Here in 1784 a decisive battle was fought between the natives and the Russians. After the repulse of the attack of the natives on the newly formed settlement of the Russians at Three Saints Bay, Shelikof concluded that his only safety was in giving the natives a severe lesson. Hearing that they were intrenched on the island, he took one of his vessels and with an armed force made an attack upon them. Being unable to reach them with his small cannon, a landing was effected and a successful assault was made upon the native stronghold. A number of the natives in their desperation leaped from the cliffs into the sea and were drowned and about one thousand were taken prisoners.

To the west of Ugak Island is St. Orlovsk, an old Russian settlement. Twelve miles farther down the coast is Kiliuda Bay, also containing an old Russian settlement. A few miles farther south and we pass Sitkalidak Island, behind which is the Bay of Three Saints. This bay was first visited by Grigor Ivan Shelikof in 1784 and named the Three Saints Bay after his three vessels, the *Archangel Michael*, *Simeon*, and *Anna*. He formed a fortified settlement, which was soon attacked by the natives, who were smarting under the wrongs which they had suffered from previous parties of Russian fur seekers who had visited their shores in ships. Peace was only secured for the settlement through a bloody war. Making Three Saints his central station, Shelikof soon had settlements located at all desirable points along the east shore of the island, and also at Karluk, on the west coast, where in 1785 he placed 52 Russians and a number of native hunters. As Three Saints was the first permanent Russian settlement in Alaska, it also had the honor of securing the first church building, erected in July, 1796. A school had been taught in 1785 by Shelikof and his wife, and again by Father Juvenal, who opened his school on the 19th of June, 1796. In 1796 the headquarters of Russian operations was removed from Three Saints to Kadiak. From Three Saints to Kadiak there is almost continuous inland navigation for kyaks and small boats, formed by the straits between the main island and smaller outlying islands.

Steaming southward, we pass beyond the southern point of Kadiak and lay our course for Ukamok Island. Alitak Bay, in the southwestern end of Kadiak Island, is the first point on the island visited by the Russians. This was by Stepan Glottov, who landed here in the fall of 1763, and subsequently wintered at Kiyavak (Kahgovak), on the southwest side of the island.

At 2.45, on the morning of June 5, we passed Trinity Island, 11½ miles south of the southern point of Kadiak Island. At noon we were abeam of Chirikof Island. This island, discovered by Captain Cook on April 4, 1794, is about 10 leagues in circumference. Passing along its eastern side, it seemed high and rocky. This island is historic as the "Botany Bay" of Russian America, being the place where murderers and the more desperate criminals were taken and left largely to themselves. The island was treeless and without vegetation except moss and lichens. However, innumerable wild fowl nested on its cliffs, schools of fish frequented its surrounding waters, and the marmot abounded in the crevices of the rocks. As marmot fur is highly prized for parkas, the convicts set themselves to procuring it for a living.

In 1869 Captain Evans, of the United States revenue cutter *Lincoln*, making an inspection of the southern coast of Alaska, called at the island. He was accompanied by Mr. Vincent Collyer, secretary of the Board of Indian Commissioners. Not knowing the character of the settlement, and moved by their stories of privation and destitution, a large supply of provisions and goods were landed for their relief. The sugar was at once brewed into beer (quass) and the whole community reveled in drunkenness as long as the supplies lasted. From the visit of the ship they learned that they were no longer under Russia, and were free to go or come. Stimulated by the memory of the good things left by the ship, they determined to abandon their island prison and make a desperate venture for liberty. Packing the whole population into two skin-covered bidarkas, they safely made the island of Kadiak, 80 miles distant.

June 6, at 6 a. m., we passed 4 miles north of Castle Rock. We were now at the eastern entrance of the Shumagin Archipelago. To the south of us were the Big and Little Koninski, Simeonoff, and many smaller islands; to the north of us, Point Kupreanoff, with the rock-bound coast, snow-covered, glacial-swept mountains and ravines of the peninsula. Directly in front were the islands of Nagai, Andronica,

Korovin, Popoff, and Unga, with innumerable islets and rocks. About 9 o'clock we entered Gorman Straits, passing between Korovsin and Andronica islands, on the former of which is a small Russian settlement of two families, with four or five houses and a small Greek chapel. We were now in the neighborhood of the point where, on August 30, 1741, Bering landed to bury Shoomagin, one of his seamen. As the natives destroyed the cross that marked the grave as soon as the Russians left the beach, all trace of the exact spot has been lost. From the account of the expedition it was probably either on Popoff or Nagai islands.

Leaving Pirate Cove, with its sheltered cod fishery, to the right of us, we pass down the east coast of Popoff Island, round the head, and make direct for Delaroff Harbor, where we make anchor at 11.45 a. m., abreast of the village of Unga. Taking an early lunch, I went ashore and found Mr. O. R. Kinney, the teacher, on the beach waiting for me. Under his guidance we visited the schoolhouse, which has been enlarged and repainted since I left there a year ago. From the schoolhouse we visited the "Martha Ellen Stevens" cottage, where he resides, and while there discussed school matters.

The entrance to the harbor is most picturesque. At the southern side a large opening or cave extends through a rocky headland, giving the appearance of an immense elephant, the cave or open space separating the elephant's trunk from his fore legs. The southern point of the island is a precipitous rock, making a high cape, with a large number of needle rocks clustering around its base, while a few miles beyond, as outlying sentinels, are the Sea Lion Rocks. At the northern entrance of the harbor are large, detached, precipitous rocks at the base of high, perpendicular rock cliffs, cliffs and rocks alike being covered with nesting birds. In a sheltered nook on the north side of the harbor is the village, with a population of 159.

Returning to the ship, at 6.25 p. m. we were under way for Sand Point. Steaming up Popoff Straits and passing a small settlement at Squaw Harbor, we rounded Sand Point, and at 8.25 p. m. anchored in Humboldt Harbor, off the village of Sand Point. This village consists of a half dozen houses belonging to Lind & Hough, of San Francisco, and a United States custom-house. A small hotel is in process of erection. At anchor in the harbor were the British sealers *Venture* and *San Jose* and *Walter L. Rich*, all of Victoria, British Columbia, and the American schooners *Czarina* and *Venture*. The sealers had large crews of British Columbia Indians, and were awaiting the end of the closed season to engage in sealing. This is the central depot of the North Pacific cod fishing, the *Czarina* being at the dock loading codfish for San Francisco. At the wharf, and forming the foundation of a portion of the same, was the hull of the schooner *John Hancock*, wrecked at the Sand Point Wharf. The *John Hancock* was built as a naval steamer at the Charlestown (Massachusetts) Navy-Yard in 1850–1852, and was in Commodore Perry's Japan expedition in 1853–54, after which it was condemned and sold into the merchant service. While in the merchant service and loaded with lumber it was abandoned at sea, off the coast of Oregon. Being recovered and brought into port, it was resold to Lind & Hough, who placed it in their codfish trade in the Shumagin Islands, where it has left its "bones" in the harbor of Sand Point.

June 8, at 2.10 a. m., the *Bear* got under way. Passing out from the north end of Popoff Straits, we skirted the north end of Unga Island, through Unga Straits, and passed the entrance of Portage and Beaver bays down past Seal Cape. About 6 a. m. we passed a small settlement of Aleutes on Wosnesewsky Island. The Alaska Commercial Company, who have had a small trading station at this village, have this season closed it.

Passing to the north of Ukolsnoy Island, almost directly ahead was the celebrated Pavloff Volcano, smoking with its old-time fidelity. Pavloff and Canoe bays, on the Pacific Ocean side, extend inland across the peninsula to within 4 miles of the waters of Herendeen Bay and Port Moller, on the Bering Sea side. In several places the peninsula is nearly cut in two by the fiords that extend nearly across from the Pacific Ocean to Bering Sea.

Turning southward, we soon entered the narrow straits between Dolgoi and Goloi islands and the Belkofsky peninsula and Inner Iliasik Island, then through Iliasik Pass, after which we hauled up for Belkofsky, situated upon the bluffs directly in front of us, coming to anchor abreast of the village at 11.45 a. m. After lunch I went ashore, visiting the traders, the Russo-Greek church, and Father Metropolski, the priest.

The trader reported no school. The priest reported one taught two days in English, two days in Russian language, and the remaining two days of the week given to instruction in the church catechism.

Got under way at 1.30 a. m., June 9, standing south between Bold Cape and Deer Island with Unca Rock directly ahead. At 3.10 raised Ugomok Island in the fog and soon after were flying through Unimak Pass with wind and sea in our favor, and leaving a gale behind us in the Pacific Ocean. Once in the lee of Akun and Akutan Islands we had smooth sailing.

Sunday, June 10, at 5.40 a. m., the *Bear* made fast to wharf at Dutch Harbor.

Monday, June 11, I went over to Unalaska to spend the morning with Mr. Tuck, but found that he was about sailing for Puget Sound on the ship *Wooster* for his vacation. He expects to visit his mother in Maine.

June 12, at 1 p. m., a whaleboat was seen entering the harbor and the steam launch was sent off to meet her. It was found to be one of the wrecked boats of the whaling bark *James Allen*, and contained Capt. A. Huntley and 6 men.

They reported having left in an old barabara on Umnak Island 9 of their comrades.

One boat containing 8 men was found by Alexander Sheisinkoff, Alaska Commercial Company, trader at Atka. Discovering them lost at sea, he built a fire upon the top of a neighboring hill to attract their attention and then went out in a kyak through a dangerous sea to intercept and bring them in. He then furnished them with needed clothing and kept them until the Alaska Commercial Company's steamer *Dora* called in and took them off. The *Dora* meeting the U. S. S. *Petrel* (Captain Emory commanding) at sea, gave them over to him. They were then brought to Unalaska and some of them found employment with the North American Commercial Company.

Upon the arrival of Captain Huntley and crew on the *Bear*, word was at once sent to Captain Healy, who was on shore. With his usual promptness, orders were issued to prepare for sea. The boilers had been "blown down" and the engine taken apart for repairs, but with lives at stake the men worked with such a will that in four hours the engine was repaired, the boilers filled, steam got up, and we were off to sea at 7.05 p. m.

Wednesday, June 13, a head wind and a heavy head sea made our progress very slow. One hour under full head of steam we made but 1.6 knots.

We expected to reach Umnak Island early in the morning, but the storm was so severe that we did not reach it until the following forenoon. To-day the U. S. S. *Albatross* started out to join in the search, but returned to the harbor on account of the storm.

Having arrived Thursday, June 14, at 10.30 a. m., in the neighborhood of the camp, the ship lay "off and on" while Lieutenant White and Captain Huntley were sent in charge of two cutters through a heavy sea to rescue the men.

Upon reaching the shore and entering the hut, they found nine men gathered around the fire with a pot of human flesh on cooking, which they had cut from the body of the man who had died and been buried two weeks. Upon perceiving the rescue party they gave a feeble hurrah, and, laughing and crying by turns, remarked that they were sorry to say that they were cannibals, but that starvation had stared them in the face and they were compelled to resort to that food. They reported that Gideon had died June 7 and they had eaten him. When he was gone, they had dug up Pena, who had been buried on May 30, and were now (June 14) eating him. When they reached the ship they were so weak that some of them had to be carried and all of them helped to the forecastle, where the clothes, swarming with vermin and reeking in filth, were cut off of them and thrown overboard. They were then thoroughly washed and hair cut. When stripped of their clothing their emaciation showed their suffering.

It has since been learned that the wrecked men in the hut were within 6 miles of a small Aleut village. But they knew nothing of the existence of the village, and the villagers saw nothing of the sailors. At 12.40 the ship started for return to Unalaska, reaching there at 4.20 a. m. on June 15.

The mail steamer *Crescent City* had arrived during our absence. At 3 p. m. the U. S. S. *Alert* came in.

On Saturday, June 16, at 7.30 p. m., the Alaska Commercial Company's steamer *Bertha* arrived from San Francisco. Schooner *Carrier Dove* anchored just outside of the spit. At 9.50 p. m. U. S. S. *Concord* came to anchor in the harbor.

On board the steamer *Bertha* were Rev. John W. Chapman and wife, Miss Bertha W. Sabine, and Miss Mary Glenton, M. D., for Anvik, Yukon River; Miss Margaret F. Macdonald for Church of England Mission, Buxton, Yukon River, and Miss Home for the Swedish Mission at Golovin Bay. Among other passengers were Mr. Fredericks and Mr. Wilson, Alaska Commercial Company traders at St. Michael.

At 11 a. m., June 17, fourteen of the rescued sailors were sent with Capt. Arthur Huntley on board the *Crescent City*, Captain Healy having arranged for their transportation to San Francisco.

After they had gone, in cleaning up, one of the sailors found a piece of human flesh in the pocket of an oilcloth coat which the shipwrecked men had left on board the *Bear*. At 12.15 p. m. the *Crescent City* went over to Unalaska for the mail, and in the afternoon went to sea. At 9.10 p. m. the Hawaiian steamer *Alexander*, Captain Green master (whaling), dropped anchor. Captain Green reported the loss of the whaling bark *Abraham Barker*, of New Bedford, Gifford master, in the ice off Capt Navarin about the middle of May. All hands saved.

Monday, June 18, immediately after breakfast, I went over to Unalaska and had a

conference with Mr. Rudolph Neumann concerning the boundaries of the school lot, after which, with Captain Hayes, representing the Alaska Commercial Company, I staked off about 600 feet square to the east of the Alaska Commercial Company's barnyard. Was on shore all day. Took lunch with Captain Hayes on the *Dora*, and dinner with Captain Hague and Rev. Mr. Chapman and party on the *Bertha*. At 6.35 p. m. the U. S. S. *Albatross* returned to the harbor, reporting no traces of the wrecked whalers.

On Wednesday, June 20, at 8.15 a. m., the *Bear* got under way for Seguam Island, where it was rumored there were some shipwrecked whalers.

Passing along the Four Mountain group of islands, we made Seguam Island June 22 at 3.45 a. m. The engine was slowed down and a careful examination of the coast was made. At 9.15 a. m. Lieutenant Dodge and crew of men were sent off in a cutter to examine a portion of the coast which a reef of rocks made it dangerous for the ship to approach. Becoming satisfied that there were no men on the beach, at 11.15 a. m. the course was shaped for Cape Navarin, Siberia, where we will make an effort to secure some reindeer.

June 26, 11.50 a. m., land was sighted to the westward of Cape Navarin, Siberia, distant about 15 miles, and at 3.40 we came to anchor in the bight to the westward of Cape Navarin. We remained at anchor all night, hoping to get in communication with some of the deer men that have herds in that neighborhood.

On Wednesday, June 27, 5.30 a. m., no deer men having shown themselves on the beach, the ship got under way for Cape Aggen, Siberia. At 3 p. m. we were abreast Cape Navarin, a beautiful, bold, and rugged promontory. At 7.12 p. m. we were abreast Cape Thaddeus.

Upon reaching Port Clarence we were informed by the whalers that the inhabitants around Cape Thaddeus were in a starving condition. They also reported the whaler *Archangel Gabriel* was still fast in the ice.

Thursday, June 28, at 10 p. m., being unable to make Cape Aggen on account of the fog, the course of the ship was changed and we made for Plover Bay, Siberia.

June 29, at 9.45 a. m., we stopped abreast of Eutoxia's village. The surf being too bad to land and no one coming off from shore, we turned into Plover Bay, Siberia, where we came to anchor at 11.40 a. m. A number of the natives came on board ship. Not hearing of any reindeer in the neighborhood, at 5.40 p. m. the ship got under way for St. Lawrence Island. A stop was again made abreast of Eutoxia's village, but no one coming off the ship was soon on its way. Before reaching Eutoxia's village we passed seven or eight native boats filled with men. They had evidently sighted a whale.

At 4.25 a. m., June 30, the ship came to anchor off south side of St. Lawrence.

Having given Captain Warren and party their mail and supplies at 8.40 a. m., we got under way for Cape Tchaplin, Siberia.

We soon encountered our first ice and saw a number of walrus and seal. Two of the walrus were shot by the captain.

Working our way through the ice, at 4.40 p. m. we came to anchor off the village at Indian Point (Cape Tchaplin), Siberia. Koharri, one of the principal men, and a large number of the natives came on board.

At 7.20 p. m. ship got under way for South Head, Siberia, where at 5.45 a. m., July 1, we came to anchor off the village of Ahkahahnee, on south side of Cape Krleougoune. A large number of natives came off to the ship, among them being Peter, with whom had been left last season some barter goods to trade for reindeer. Finding that the herd was a few miles to the westward, the ship got under way at 8.40 a. m., and, working to the westward through the broken ice, came to anchor at 10.55 a. m. off the small native village of Toray. A runner was at once sent to have the deer driven to the beach. In the afternoon while waiting for the reindeer I accompanied Mrs. Healy and a number of the officers on shore to visit the village, returning to the ship about 5 p. m., when the herd was seen coming over the slope of a mountain. At 8 p. m. the first load of 17 deer was taken on board, at 9.50 a load of 15, and at 11.45 p. m. the last load of 16, after which the owners were paid off, it being after 1 o'clock a. m. before the work was completed.

July 2, at 5.40, we got under way for King Island and reached there at 7.50 p. m. The natives were soon on board in large numbers, from whom I purchased 7 walrus skins for the use of the reindeer station. At 10.10 p. m. we got under way for the Teller Station, Port Clarence, Alaska.

At 5.25 a. m., July 3, came to anchor off Cape Spencer, in the midst of the whaling fleet. The steamer *Jeanie*, Mason master, with stores and supplies for the whaling fleet, brought us our mail. The letters were written from the 13th to the 23d of May, and are the last that I will be able to receive until I return to Unalaska, the last of September.

At 10.35 a. m. got under way for the Teller Reindeer Station at the upper end of the bay, and at 12.20 noon dropped anchor off the station. Soon after, Mr. W. T. Lopp came on board for his mail. After lunch, returned ashore with Mr. Lopp

to look after the landing of the deer; also, lumber and poles for the station. Finding that the ship would remain at anchor over the 4th, I remained on shore over night. Mr. Lopp and I conferred together until late in the night.

At 4 a. m., July 4, was awakened by the firing of the morning gun from the *Bear*. At noon a national salute of 21 guns was fired, and at 7 p. m. another gun was fired. The ship was gaily dressed with bunting, and looked finely with broadside to the shore.

Immediately after breakfast Mr. Lopp, Mr. Grubin, and myself went into the business of taking an inventory of the Government property at the reindeer station, finishing about 5 p. m.; after which I went over to the *Bear* with a quantity of reindeer trade goods that had been left at the station last fall.

At 7.30 p. m. the *Bear* got under way and steamed over to a watering place on the south side of the bay.

July 6, having secured 4,275 gallons of fresh water, at 1.15 p. m. the *Bear* returned to Cape Spencer, coming to anchor at 3.05 p. m.

July 7, 8, and 9 were spent in coaling ship.

On the evening of July 9 Captain Weeks, Sherman, and Porter, and myself, Lieutenant Dodge being in charge, went with the steam launch to the reindeer station after the herders that were to be returned to Siberia. When two-thirds of the way over we met Mr. Lopp and the herders coming to the ship; taking them in tow we returned to the station, where the herders were paid off.

Returning to the ship about 11 o'clock p. m., Mr. Lopp and I went to the pilot house of the *Bear* and discussed plans until 2 o'clock in the morning.

July 10 letters were sent on board the *J. D. Peters*, to be taken down to Unalaska, and the *Bear* got under way for Ahkahahnee, Siberia, to return Enker and Ranken, together with Kimok, Peter, and Nowatat, deer men. I spent the afternoon in reading papers (two months old) just received.

July 11, 4.34 a. m., we dropped anchor off Ahkahahnee, South Head, where the herders and visitors were landed. The deer men having asked for some barter goods to trade for reindeer during the winter and have them ready to deliver to the *Bear* in the summer of 1895, were supplied.

There being every appearance of a storm outside, at 11.30 a. m. we got under way and went around to Lutke Harbor, St. Lawrence Bay, where we dropped anchor at 2.20 p. m. The captain and nearly all the officers went duck hunting. The officers brought back 44 ducks, the captain 25. This is the harbor where the U. S. S. *Rogers*, while in winter quarters, burned to the water's edge. The crew after suffering many hardships were rescued the following spring by Capt. M. A. Healy, on the U. S. R. M. S. *Corwin*.

At 7.40 a. m., July 12, came to anchorage off East Cape Village. An Umiak load of natives from Lutke Harbor left the ship and went to the village. At 8 o'clock a. m. we got under way and steamed into the bight to the southwest of the cape, and at 9.30 a. m. came to anchor near a native settlement. The steam whaler *Belvidere* was also at anchor at same place.

Captain Healy concluded to send Lieutenant White and Seaman Edwards along the Arctic Siberian coast to visit the deer men and purchase reindeer in advance of the arrival of the ship. An Umiak was secured of Tom Cod and the following natives hired for a trip of from six to eight weeks: Tom Cod, leader, 2 sacks of flour and knife; Claturnan, Claturnan's wife, Kolurigan, Emyia, Tetluk, Amoia, Atukea, each 1 sack of flour and knife.

Provisions and supplies were taken out and packed.

A courier came from Eskimo Frank at Whalen, stating he had 10 deer to sell and would be over as soon as ice and wind would allow.

Sunday, July 15, steam whaler *Belvidere* left and stood through the straits. At 10.05 p. m. got under way for Whalen, Siberia, where we arrrived at 1.10 a. m. July 16.

July 18, about 9 a. m., Lieut. Chester M. White and Seaman Edwards, with Tom Cod and six other natives, left the ship for a boat trip up the coast to Cape Serdze, going in advance of the ship to purchase deer.

July 20, at 12.05 noon, ship got under way and moved up the coast 7½ knots to the mouth of the lagoon, anchoring at 1.20 p. m. At 3 p. m. Lieutenant Reinburg was sent off with some men in the sailing launch after the deer. At 6.10 p. m. the officer returned and reported his inability to reach the deer on account of the surf.

The delay of ten days consumed in securing the 16 deer at Whalen illustrates the difficulty of procuring them on the Siberian coast.

Early in the morning of July 11 the ship dropped anchor on the south side of East Cape, in the vicinity of a herd of reindeer, but the owners lived on the north side of the cape, where the ship could not go on account of the ice. Five days were consumed in trying to open communication overland with the deer men and waiting for the wind to change.

At length the wind having started from the south, which would drive the ice off-

shore from Whalen, near midnight on the fifth day, the ship got under way and went around to the north side of the cape, where communication was secured with the deer men and the deer purchased. After making arrangements for the purchase of the deer on the 16th, nothing further could be done toward catching the deer and bringing them on the ship until the wind should change. It being from the south, the surf would not allow landing where the herd was. After waiting in vain till the 19th for the wind to change, negotiations were commenced with the deer men to drive their herd across the peninsula. They finally agreed to bring them to a lagoon, from whence they could be secured by the boats.

At length, on the 20th, they were reported at the lagoon, but then the surf was so bad on the lagoon that the boats could not be landed, and it was only on the 21st, after eleven days of waiting, that the deer were actually secure on board. There are no harbors in the neighborhood of the deer on the Siberian side. The ship

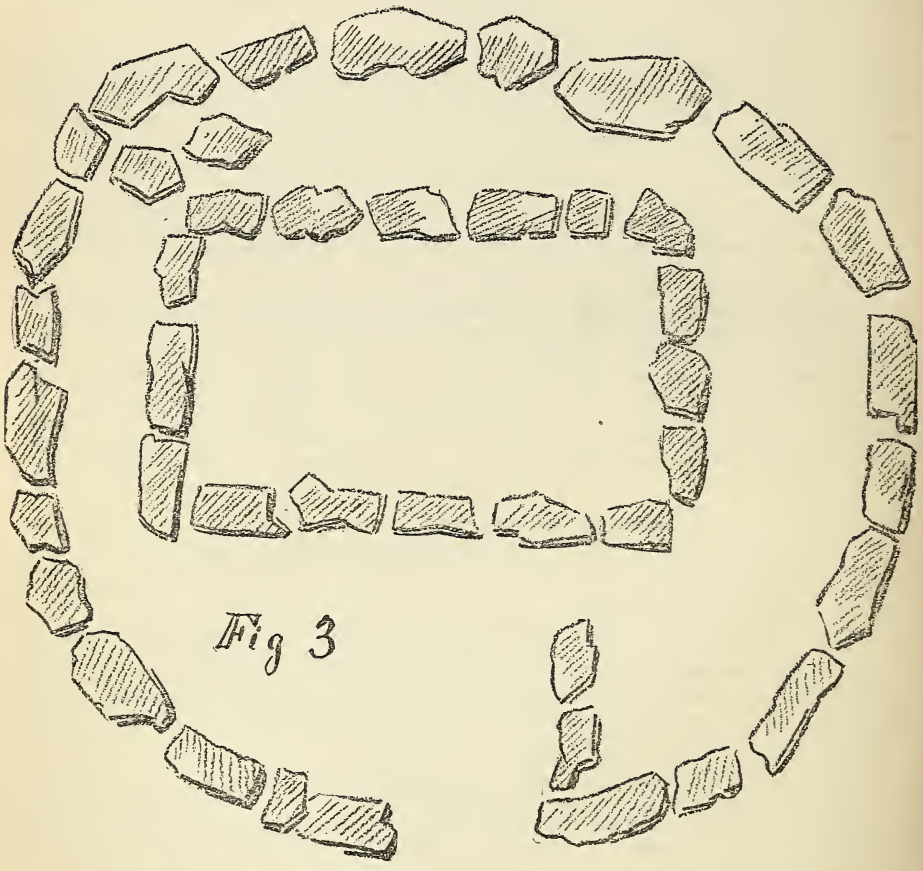

Fig 3

usually anchors offshore in from 7 to 15 fathoms of water, and if the wind comes to blow strong on shore the anchor is raised and the ship goes out to sea, whether she has secured the deer or not. Another difficulty is with the ice. A strong wind offshore blows the great fields of ice seaward, and into the open water near shore the ship steams.

Dropping anchor in the neighborhood of a village, the natives come off. Negotiations are commenced with the deer men and a certain number of deer purchased. The men are at once dispatched to drive the deer near to the beach, catch and bring them off to the ship.

In the meantime the wind may change, and the great fields of ice that a few days or hours before were driven seaward are now driven landward, and it has sometimes happened that the ship has been compelled to heave up the anchor and leave without procuring the deer already bought. And at other times, in holding on to the last moment in order to get the deer on board, the ship has become inclosed in the ice and

has been held a prisoner until the wind again changes and scatters the ice seaward. Again, the ship, by constant butting, has had to break her way through the ice. In doing this upon two seasons the ship has broken her propeller.

July 21, at 8.30 a. m., the sailing launch and second cutter, in charge of Lieutenant Dodge, were sent into the lagoon after reindeer. At 10.50 a. m. the steam launch, in charge of Lieutenant Reinburg, was sent into the lagoon to assist with the deer. At 3.55 p. m. the boat returned to the ship with 16 reindeer.

Got under way for Chachong at 5.40 a. m., July 22; at 8.20 a. m. was abeam of Utan; at 1.20 p. m. stopped and picked up Lieutenant White and party, and at 1.50 p. m. came to anchor off Chachong. Lieutenant White reported having purchased a number of reindeer at this place. Men were dispatched at once to drive the herd to the place.

At 3 p. m. Lieutenant White and party left the ship to visit the deer men in the vicinity of Cape Serdze.

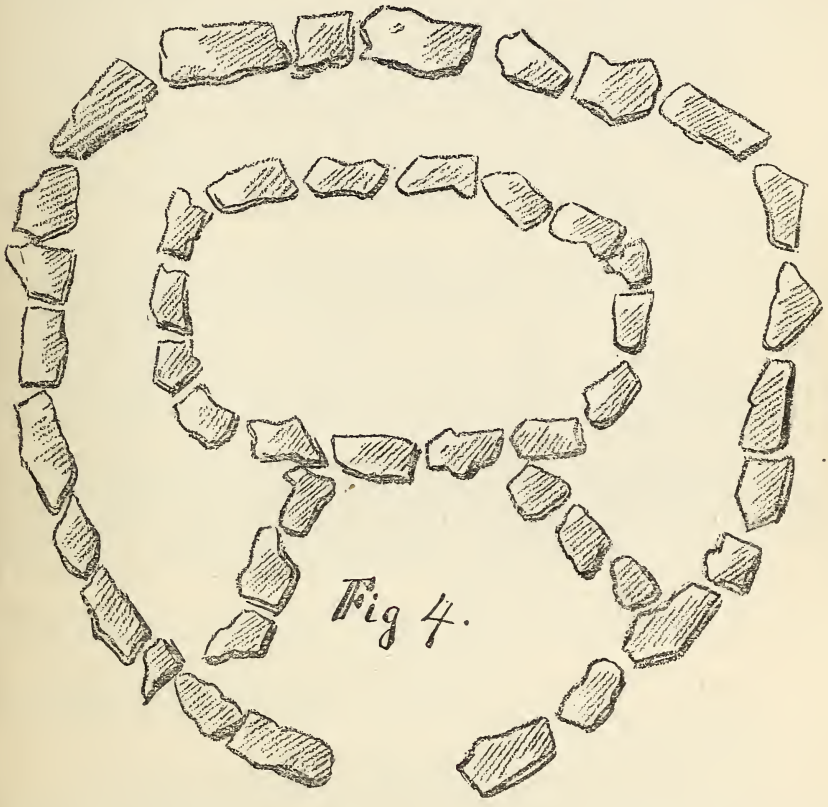

Fig 4.

July 23, the captain being notified that the herd had arrived, the sailing launch and second cutter, in charge of Lieutenant Reinberg, were sent ashore for deer. Dr. White and myself also went ashore.

At 2.30 p. m. the second cutter returned with 8 reindeer, and at 5.30 p. m. the launch and second cutter arrived with 14 more, making 22 in all secured at this place.

Fifteen others had been contracted for, but when the time came the owners refused to sell. This was probably due to the influence of the medicine man, who had a misunderstanding with Lieutenant White.

While ashore Dr. White and myself ascended a high hill about a mile east of the village of Ceshan (Tsha-Tshang). The top of the hill contained an area of perhaps 20 to 25 acres, and along the sea front had a number of stone heaps and circles, probably connected with the religious rites of the people. The stones are large, flat flakes of basalt. In the same locality was a circle 50 feet in diameter with a small heap of stones in the center (figs. 3 and 4).

During the day the wind had shifted and large masses of ice were beginning to gather around the ship. As soon, therefore, as the reindeer were on board, and their

owners paid, the ship got under way (7.30 p. m.), picking her way carefully through the ice. During the afternoon Mr. Liebes went off with a party of Siberians in an umniak and shot a walrus, which was brought back to the ship.

July 24, stiff breeze and very foggy. Passed through Bering Straits without seeing land. At 12.30 noon had a glimpse of Fairway Rock through the fog, and at 9 p. m. came to anchor off Teller Reindeer Station. Was much disappointed at the nonarrival of the ship *Myers* with the superintendent, assistant superintendent, and Lapps with their families and supplies. Mr. Lopp came off to the ship and remained until after midnight. Commenced landing reindeer at 6 a. m. July 25. The surf was so bad that the boat with the first load swamped on the beach and came near drowning the reindeer; as it was, 3 had their hip bones broken and had to be killed.

The subsequent landings were made in the lagoon west of the station.

July 26, being very anxious to visit Grantley Harbor and the lakes beyond, Captain Healy very kindly gave me the use of the steam launch for the purpose. I was accompanied by Mr. Lopp. At 8.30 a. m. we steamed away from the *Bear*, and soon after picked up the second cutter with a party of sailors going off to draw the line for fish in the Grantley Harbor, which we towed to the fishing place. Then we crossed the harbor and passed through Eaton River to the first of the two lakes. There we went ashore for a few minutes and then started on our return to the ship at 1.18 p. m. On our way down the river we ran on a sand bar, which detained us five or ten minutes. On the trip we passed many summer fishing camps of the natives. The long lines of fish hanging on the pole and frames to dry attested to the success they were having in fishing. On the south side of the mouth of Grantley Harbor we passed the small native village of Nook, with three winter houses. On the sand spit to the north side is one winter house, with ten or twelve summer fishing camps.

On the south side of the sand spit at the mouth of the river is the village of Synowgok with three winter houses. There is also a settlement of one or two houses on the north side. The native village near the reindeer station is called Synok.

Picking up the fishing party (who had caught no fish) at Grantley Harbor we returned to the ship at 5.30 p.m. After dinner went ashore with Mr. Lopp and remained until 11 o'clock. While on shore one of the herders brought in 2 quarts of milk taken from 6 reindeer cows. Had an interview with Charlie, a herder, concerning his future course; offered to keep him another year and give him 15 reindeer for his services, or loan him and his friends 100 reindeer this fall. Also attended to much business connected with the station.

July 27, after breakfast, I wrote a letter to the superintendent of the station with reference to the distribution of the herd—giving 100 head to the American Missionary Association at Cape Prince of Wales, and loaning, under certain specified circumstances, 100 head to Antesilook and his friends. Mr. Lopp came off with the accounts of the station, which were audited. Arrangements were made for him to remain until relieved by Mr. W. A. Kjellmann, the new superintendent. At 1.15 p. m. the ship got under way for Kotzebue Sound.

On July 28 we came to anchor at 7.30 p. m., near Cape Espenburg, to allow some of the officers and Mr. Liebes to go ashore hunting. At 11.40 p. m. we got under way again.

At 4.55 a. m., July 29, the vessel grounded off Cape Blossom, and it was 7.55 p. m. before she floated again. Much of the day the engine was at work trying to get afloat. Four or five umniak loads of natives came on board, and considerable trading was done by officers and crew.

July 30, at 8.25 a. m., we got under way for Point Hope.

The next morning, at 5.30 a. m., Cape Thompson was sighted, and at 8 a. m. it was abreast, 3 miles distant. At 11.40 a. m. we reached the whaling station at Point Hope, and at 3.15 the ship was moved up nearer the village, anchoring at 4.20 p. m. Men and natives soon flocked aboard. Among the visitors were Dr. Driggs and Rev. Elijah H. Edson, of the Episcopal Mission. The day was pleasant.

August 1, after breakfast, I went ashore with some of the officers and Mr. Liebes.

Last October a great storm flooded the village, so that nearly all the people left their homes. The sea was waist deep around the Episcopal Mission house.

Dr. Driggs upon one occasion gave one of the sick natives some powders to take. Meeting him four months afterwards, the patient was profuse in his thanks, saying that the medicine had completely cured him, that he was a well man now, and ended by pulling the package of powders out of his pocket to show that he had not lost them.

At another time, meeting a funeral procession, it was stopped by the widow, who wanted to tell the missionary how much his medicine had relieved her late husband; and, as a token of their appreciation, the corpse had the bottle in his hand, taking it to the grave with him.

At 1 p. m. I returned to the ship. The whalers *Emily Schroder*, Bain, master, and *Silver Wave*, Calighan, master, were found hard ashore in the lagoon to the west of Point Hope. They were blown ashore in the hurricane of October 13, 1893.

August 2, at 8.30 p. m., got under way for Point Barrow.

August 4, overcast and foggy; light rain; fresh breeze. At 12.15 a. m. took in all sail. At 1.30 a. m. large field of packed ice ahead and to the north. At 1.50 a. m. sounded in 25 fathoms. At 1.25 p. m. came to anchor off a native village to the north and east of Wainwright Inlet.

August 5, at 1.40 a. m., got under way. At 3.15 a. m. steamed through masses of floating ice resting on Cape Belcher and Sea Horse Islands. At 1.05 a. m. made fast to a large field of grounded ice off the United States Refuge Station, Cape Smythe (Point Barrow).

August 6, after breakfast I went ashore with Captain Healy in the steam launch. Mr. Stevenson, the missionary, was busy framing the foundation timbers of the Presbyterian mission building.

During the spring the Cape Smythe Whaling Company (Brower, Gordon, Liebes & Co.) took three large, one medium-sized, and some small whales, making 7,700 pounds of marketable bone.

Mr. Kelly, of the Pacific Steam Whaling Company, secured 11,000 pounds of bone.

Last June one of these stations had three whaling boats driven out to sea in a gale. Two of the boats succeeded in returning to the shore, but the third was crushed in the ice and the crew of two men, a woman, and a boy had to take refuge on a piece of ice, which was driven out to sea. After a while the ice upon which they had floated was broken up and they escaped to other pieces. Finally, after being out upon the ice sixty-one days, they were driven ashore 100 miles south of where they started from, and escaped to land. A portion of the time they were on the ice they had no water to drink, and for eight days they were without food.

At Point Hope one of the young men out seal hunting was driven to sea on a cake of ice. Fortunately, after some days, the wind changed and floated him back again to land. While floating around the sea he shot and lived on three white polar bears.

The provisions and supplies for the refuge station were landed and the captain took on board about 19,000 pounds of whalebone for the two companies, which he will take to Unalaska, from whence it can be shipped to San Francisco. In the evening the ice floe to which we were fastened showing signs of breaking up, the captain cast off and anchored.

At the close of the whaling season the natives have a great celebration. Mr. Kelly decorates the station with bunting and gives a feast. At this festival one of the games (called Neklakatah) is tossing a woman into the air from a blanket. To be thus tossed is considered a great honor, and is given to the women who have distinguished themselves by efficiency in whaling.

August 7 a strong current set in to the north and brought large quantities of floating ice. This became so bad that at 1 p. m. the captain sent ashore to get Lieutenant Reinburg on board. A dense fog set in and the captain being compelled to constantly shift his position in the ice, Lieutenant Reinburg when he came off was unable to find the ship. Finding late in the night a comparatively open space of water, the ship was anchored.

August 8, at 7.25 a. m., taking Lieutenant Reinburg on board, the ship got under way on account of the heavy running ice. On heaving up anchor found a chain cable about 1⅝ inches hooked to it, but the heavy ice prevented our saving it. Vessel at half speed, working to the south through the ice.

August 10, during the afternoon we passed Blossom Shoals, and at 10.40 p. m. came to anchor south of Blossom Shoals.

August 12, at 2.55 a. m., came to anchor off Corwin Coal Mine, where the men watered the ship. In the afternoon, seeing a brig in the distance, the *Bear* got under way and steamed out to meet her. At 8 p. m. spoke the brig *W. H. Myers*, of San Francisco, with a cargo of freight for the whalers and the new mission at St. Lawrence Island. As the carrying of the St. Lawrence mission supplies into the Arctic might jeopardize and delay the establishment of the mission for a year, Captain Healy very considerately transferred those supplies to the *Bear* to be returned to the island.

August 14 the officer of deck reported two vessels in sight, supposed to be the whalers *Northern Light* and *California*. At 11 a. m. we got under way and went out to meet the incoming vessels, which proved to be the *California* and *Andrew Hicks*. From the *California* we received a batch of papers as late as June 23. After boarding the vessels we made for Point Hope, where we dropped anchor abreast the mission at 10.40 p. m.

On August 16 we got under way at 3.30 a. m. At 9.25, the fog lifting, we made out East Cape. At 11.45 p. m. we rounded south point of East Cape, and at 1.20 on the morning of the 17th came to anchor off the village of Enmatowan, Siberia.

At 1.20 p. m. Lieutenant White returned on board and reported his camp at East Cape village. The ship was at once got under way and steamed around to East Cape, where Lieutenant White's party were taken on board and the native Siberians who had assisted him were paid off, also Siberian Jack who had acted as interpreter to the ship.

At 8 p. m. the ship got under way, steaming to the northwest.

August 18, at 2.45 a. m. passed Enchowan. At 4 a. m. we noticed large quantities of ice packed in along shore. At 6.30 a. m. ice appeared in the distance, and at 7.30 the ship entered it. Finding it too heavy to proceed we turned around and returned to anchorage off Enmatowan village on the south side of East Cape, where we dropped anchor at 3.55 p. m.

On August 19, getting under way, we steamed around to East Cape village; at 8.25 a. m. stood across to the Diomedes, encountering considerable floating ice; at 9.15 a. m. cleared the ice, and at 11.30 stopped off big Diomede village. At 12.20 p. m. we started for Teller Reindeer Station, where we came to anchor at 10.30 p. m. The evening of the 21st Mr. and Mrs. V. Gambell, teachers and missionaries for St. Lawrence Island, were taken on board, and on the morning of the 22d Mr. Lopp's supplies were received for Cape Prince of Wales. At 10.10 a. m. the ship got under way for the Cape.

At 4 p. m. spoke the whaler *Northern Light*, Captain McKenna master, and we secured papers as late as July 3. At 5.50 p. m. we were under way again, and at 7.30 p. m. dropped anchor off Cape Prince of Wales. I went ashore and visited Mr. Thornton's grave as a beautiful moon was appearing above the mountain tops. Returned on board at 10 p. m., and at 10.15 p. m. the ship was under way for St. Lawrence Island.

August 23, passed Kings Island. There being no landing at St. Lawrence Island, the ship was headed for Indian Point, Siberia, where we anchored at 6.30 a. m. August 24. Koharri and a number of the natives visited the ship. Captain Healy commended Mr. and Mrs. Gambell to the good will of Koharri. They afterwards went ashore and visited Koharri.

At noon of August 24 we were again under way, and stood for St. Lawrence Island, where we came to anchor at 7.50 p. m. the same day. Owing to the surf none of the natives were able to come off to the ship, but the following day, the sea having gone down, large numbers visited the vessel. Captain Warren and the Leary Brothers, who had spent the winter at the whaling station on the island, were received on board the ship. The lumber, provisions, and other supplies for the mission were landed in the native boats. Mr. Gambell, the missionary, went ashore to get the house ready for occupancy; to assist him Captain Healy very kindly sent the ship's carpenter and a sailor; I also went ashore, rendering what assistance I could. On the 29th, the captain feeling it necessary to make another trip to Siberia, Mrs. Gambell was kept on board while the carpenter with Mr. Gambell were left on shore to get the house ready. At 8 o'clock the ship got under way for Bering Strait and Arctic Siberia. At 5 o'clock on the morning of the 30th we were again in the midst of floating ice; at 7.40 called at East Cape village, and at 10.15 anchored off Whalen. At 5 in the afternoon we took on board 3 reindeer, which had been secured at this place, and at 8.10 in the evening got under way and stood to the northwest up the Siberian coast, finding considerable drift ice close inshore.

We passed Enchowan and Killourrun villages at 2 o'clock on the morning of August 31, with increasing quantities of drift ice. Working slowly through the ice, we passed Tchupa village, and at 7 o'clock rounded High Cape and hauled in for Cesang village, where we stopped at 7.40 a. m. The ice being very heavy and thick the ship did not anchor, but kept working backward and forward, dodging the heavy ice floes. At 9.50, finding that there were no deer to be had at Cesang, the ship went ahead, working through the ice up to Killourrun village, which we reached at 10 o'clock. Soon after I went ashore with Lieutenant White after reindeer. On shore we found that it was general slaughter day. On the beach were the tents of several canoe loads of East Cape natives, who had come up to buy and kill reindeer for their own use. In one place I counted 70 slaughtered deer, while a mile away another band was being killed. The deer men were so busy supplying the East Cape natives that we could secure no attention, and at 2.15, the ice having become dangerous, we were recalled to the ship, having secured but 2 deer. Soon after, the ice becoming lighter, we again went ashore, and returned to the vessel with 14 animals. The next day we secured 5 additional deer.

On September 2, at 4 o'clock in the morning, we got under way and started north, working through heavy drift ice, and at 6 o'clock came to anchor off Kerneeshgoun village. Upon going ashore we found that the herd had been driven off to the north side of the Cape Serdze. Again getting under way, we steamed around the cape and came to anchor off Enwonnan at 10 o'clock. Lieutenant White and myself at once went ashore for deer. There were 3 large herds in the vicinity. Again we encountered a number of natives, from Cape Prince of Wales, who were buying and killing on their own account. While one of the herds was being driven down to the beach I took occasion to visit one of the camps of the deer men. I found 7 deerskin tents. Around the largest were stacked 34 sleighs; another had 29, and the others, respectively, 15, 12, 9, 7, and 6. The camp aggregated 102 sleighs. In the fall the tents, household effects, and families are carried on these sleighs and taken with the herd from 50 to 150 miles into the interior. The following spring they return again to

the coast, thus making two migrations every year. During the day 15 deer were secured. The next day Lieutenant White went ashore, but soon returned and reported that the deer had stampeded during the night and that the herders had gone after them. All day was consumed in waiting in vain.

On September 4, there being signs of heavy ice coming in and shutting off our escape from the bay, at 4 a. m. the ship got under way in a dense fog and worked slowly southward through the heavy floes, occasionally striking one miles in extent. By noon we were clear of the ice, but the fog became so dense that the captain was afraid to venture to pass through Bering Straits, and kept off until morning—the next morning passing through Bering Straits. At noon we stopped at the village of Cape Prince of Wales. Mr. Lopp being absent and there being no communication with the shore, the ship again got under way, reaching the reindeer station at half past 9 o'clock that evening. The next morning, under the directions of Mr. Kjellmann and the Lapps, the reindeer were thrown overboard and made to swim ashore, instead of being carried ashore by boat, as upon previous occasions. This was a great improvement in the method of landing them. The ship remained at anchor until the evening of September 26, the time being consumed in looking after the interests of the station. At 10 p. m. the ship got under way for St. Michael, which was reached at noon, September 10. At St. Michael Mr. Funston, of the Department of Agriculture, who has been spending two years in botanical studies in the Arctic, was received on board; also Capt. J. J. Healy, of the Yukon River, and Mr. V. Wilson, correspondent of the Century Magazine, and Capt. C. Constantine, of the Canadian mounted police and customs service; also 20 destitute miners from the Yukon region.

At noon on the 13th of September, bidding the good friends at St. Michael good-by, the ship got under way for St. Lawrence Island, where we arrived on the morning of the 15th. Mr. Gambell and several boat loads of natives were sent on board, and in the afternoon a number of us returned with them to the shore. During the absence of the ship Mr. Gambell and the carpenter had built a storm door to the house and a good storehouse for the supplies, and fenced the whole in with a good, tight board fence. Various changes had also been made in the interior arrangement of the house, so that everything was made comfortable. At 3.15 on the 16th, waving our adieus to Mr. and Mrs. Gambell, who were the only white people on the island left alone with 300 barbarous Eskimos until the good cutter should return next year to see how they were getting on, our ship got under way for the seal islands, which were reached on the 19th. No one coming from the shore, on the 20th the captain steamed away for St. George Island, stopping a short time to get the mail; the voyage was continued to Unalaska, which we reached on the morning of the 21st. Here we found a very large mail had accumulated during the summer; also the United States mail steamer was in the harbor, soon to leave for Sitka. Packing my effects and bidding adieu to Captain and Mrs. Healy and the officers and sailors of the *Bear*, I went aboard the *Dora*, which expected to sail at 6 o'clock on the morning of the 22d. The day opened, however, with a southeastern gale so severe that it was not considered wise to leave the wharf. This gave me an opportunity, that I very much desired, of spending the day with the teacher, Mr. Tuck, and the new United States commissioner, Mr. Woodward, United States deputy marshal, Mr. Anthony, and conferring with them in relation to school matters in that place.

Before daylight on the morning of the 23d the whistle of the mail steamer notified us all to get aboard. At 7 o'clock the steamer pushed off from the wharf and started for Sitka. Night finding us in a very dangerous part of the coast, the ship hove to until morning. The ship rolled badly and the deadlight window to my stateroom leaked to such an extent that the bed was saturated with salt water. On the afternoon of the 24th a landing was made at Belkofsky, where the ship remained at anchor all night. Father Alexis (a Greek priest), with wife and child, went ashore. He has been placed in charge of Belkofsky and Unga, the former priest (Metropolsky) having been returned to San Francisco. The monk that was in charge of the Unalaska parish has been ordered back to Russia, and a young priest just out from Russia and a young Russian deacon have been placed at Unalaska. On the morning of the 25th we had a beautiful view of Pavaloff volcano; a little smoke was seen issuing from the crater; the mountain was covered from crater to base with a fresh coat of snow. In the afternoon the steamer called a short time at Sand Point, and then getting under way reached Unga about half past 3 o'clock in the afternoon. That afternoon and the next day were spent in looking after matters connected with the school at this point. The Aleut girl Mary Dushkin, 13 years of age, was placed in my charge to go to the Baptist school at Wood Island.

At 5 p. m. on the 26th the ship got under way for Karluk, making the distance in the short space of twenty-six hours. Leaving there at midnight, Wood Island was reached about noon on the following day. At Wood Island the time was spent at Mr. Roscoe's school. The next morning I visited and inspected the school at Kadiak

and arranged for the school gradings. Leaving Kadiak at 10 a. m. we reached Nuchek at 5 o'clock the following afternoon. At this point we were joined by the Rev. Mr Donskoi, the Greek priest from Sitka, who came aboard the vessel. Leaving Nuchek at 3 a. m., Kyak was reached the middle of the afternoon, where we went ashore and visited the two trading posts that are located at that point. The barometer being very low and still falling, the captain concluded to remain in the harbor; a northeast gale continuing, we remained there the following day. In the morning a report was brought to the ship that the natives had brought in the night before two corpses of people killed from the mainland. After breakfast a number of the officers and passengers from the steamer went ashore and a court of inquiry was instituted. It seems that in a drunken row a native man had shot his wife and afterwards shot himself. Their friends had brought the two bodies to Kyak for burial.

Much evil is being done among the native population through the smuggling of liquor, with the attending drunkenness and demoralization. The traders at the several posts speak of it very freely, but their information always concerns some other post than their own. At A they would tell you of the drunkenness at B, and when you reached B they would tell you of the drunkenness and disregard of the law going on at A. Crime was freely confessed, only it always existed at some other point than the one at which you were at the time visiting. The traders also report that large quantities of opium are smuggled in through the salmon canneries. If one is to believe what the traders say of one another, the condition of things is very disreputable along the whole coast.

About noon of October 3, the gale having somewhat abated, the steamer got under way for Yakutat, which we reached the next day at noon. Going ashore, I made a short visit to the Swedish mission and school. Since their disastrous fire of two years ago they have built, but not completed, a very neat church They have built two large hayracks, upon which they were hanging hay to cure after the old country fashion. After a short stay we were again under way, and at 7 o'clock on the morning of the 6th of October reached the wharf at Sitka, just twenty-four hours too late to connect with the steamer for the States, which runs only once every two weeks. The two weeks, however, passed very quickly and pleasantly with the teachers and schools at that place.

Bidding the friends at Sitka good-by, on the morning of the 18th I took the mail steamer *City of Topeka* for the States, having in charge John Reinkin of Unalaska, and Samuel Kendall Paul of Sitka, native boys, to go to the Indian training school at Carlisle, Pa. That afternoon a three-hours' stop was made at Killisnoo, which enabled me to arrange with Mr. Spuhn with regard to suitable school grounds at that place. At 5 o'clock on the morning of October 19 we reached the wharf at Juneau, where I was met by Mr. S. A. Keller and Mr. D. Davies, teachers at that place. Although it was still dark, I visited the native school building, which had been erected during the summer. At 8 o'clock we were again under way, but stopped some two hours at Douglas Island; from thence into the Sum Dum Harbor, where freight was landed for the new gold mine. The forenoon of the 20th was spent at Wrangel with the teachers and friends at that place. Early on the morning of October 21 a half hour was given us at Jackson, which was improved in visiting the school and mission station. That afternoon we again got under way and anchored at Mr. Miller's saltery at Hunters Bay. After taking aboard some salmon we crossed the bay to Suquam, reaching there about 8 p. m. The waters being unsurveyed, the ship remained at anchor until daylight of October 22. Then getting under way, we reached the saltery at Nutquah, where some salmon was taken on board. From thence we reached the saltery at Cordova Bay that afternoon, but, no one being at home to deliver the salmon, the ship turned around and went to Ketchikan, where we anchored for the night.

The next morning we were at Metlakahtla, where I went ashore and had an interview with Mr. William Duncan on school and colony matters. While there I met a delegation of the Tongas natives, who were looking for a new location where they can unite with the Cape Fox natives in having a missionary and school. While at breakfast the passengers of the steamer were serenaded by the brass band, composed largely of former Sitka students. After breakfast the common council of the village asked an audience with Mr. Duncan and myself, the main questions of discussion being means for increasing mail facilities and schools.

At 11 a. m. the ship got under way and went up a fiord to the Cape Fox saltery; taking on the salmon, the ship returned to the custom-house at Mary Island, where the "inspector afloat" went ashore, and the ship at last got under way for Puget Sound, which we reached on the evening of the 26th. Taking the train for San Francisco, and spending a day in settling up the accounts of the season with San Francisco merchants, I took the overland train for Washington, D. C., where I arrived on November 6, having completed a trip of 23,029 miles.

SHELDON JACKSON.

Hon. W. T. HARRIS,
Commissioner of Education.

CHAPTER XIII.

A PRELIMINARY LIST OF AMERICAN LEARNED AND EDUCATIONAL SOCIETIES.[1]

CONTENTS.

Historical introduction.
I. Science generally (i. e., societies occupying themselves with several branches of science, or with science and literature jointly).
II. Mathematics and physics.
III. Chemistry and pharmacy.
IV. Geography, geology, and mineralogy.
V. Biology, including botany, ornithology, microscopy, entomology and anthropology.
VI. Economic science and statistics.
VII. Mechanical science.
VIII. Literature and language.
IX. History, biography, and genealogy.
X. Ethnology.
XI. Archæology, numismatics, and philately.
XII. Memorial and patriotic.
XIII. Painting, sculpture, and architecture.
XIV. Law.
XV. Medicine and dentistry.
XVI. Education.

HISTORICAL INTRODUCTION.

The term "academy," so commonly applied to learned societies on the Continent, does not obtain to the same extent in England and America. In these countries the terms "society," "association," etc., are used in its place. The Academy, *Ἀκαδήμεια*, of the Greeks was originally the name of a northern suburb of Athens, which formed a part of the Ceramicus, or tile field, on the Cephissus. It was surrounded with a wall by Hipparchus. In the fifth century B. C. it belonged to Cimon, the son of Miltiades, who beautified the grounds, gave free admission to the public, and at his death bequeathed it to the State. It was in this public resort that Socrates was accustomed to meet the inquirers of his day, and Plato taught his philosophy in its groves. It was from this fact, and to distinguish it from the Peripatetics, that his school was called the Academy and his pupils Academists. The Academy lasted from the days of Plato to those of Cicero, and the number of successive schools is put by different authors as ranging from two to

[1] Prepared by Dr. Stephen B. Weeks.

five. Whenever one of the young academists of Plato started a school of his own he called it an academy, in imitation of his master.

In England the term "academy" is applied to a certain class of military and naval schools, such as the Royal Military Academy at Woolwich, the Royal Military College at Sandhurst, and the Royal Naval College at Portsmouth. It is also used in this sense in America, as the Military Academy at West Point, and the Naval Academy at Annapolis, but in its unambitious sense it means an institution for secondary education. In its wider or continental sense the term "academy" means an association of learned men, established for the promotion of science, literature, the arts, etc.

There was a kind of literary society at Athens during the fourth century B. C., although it would hardly be accurate to regard it as a learned society in the graver sense. It was called "The Sixty," met in the temple of Heracles, and its members were noted for their wit.

The first academy, in the higher sense, of which we have information was the μουσεῖον, or Museum, and was founded in Alexandria by Ptolemy Soter (B. C. 323–283), one of the generals and successors of Alexander the Great. After getting possession of Egypt, Ptolemy devoted his energies to maintaining a defensive balance of power and to the cultivation of letters. He gathered about him a large body of learned men, whom he employed in collecting books and treasures of art. This was the origin of the library of Alexandria, which was the most famous of the ancient world. It was organized and established in separate buildings under Ptolemy Philadelphus (B. C. 285–247). The larger library was in the Museum, the smaller in the Serapeum. Philadelphus sent into every part of Greece and of Asia to secure the most valuable books, and no expense was spared to enrich the collections.

There was an academy in Rome under the Emperors. It is mentioned by several of the epigramists, and was called the Schola Poetarum. It was composed of poets, who reciprocally read their works to each other and had an annual banquet. It seems to have been one phase of the public readings of authors in Rome, and was kept up till the fall of the Western Empire.

The idea of Ptolemy Soter was imitated by the Jews in Palestine and Babylonia, and to a degree by the Nestorian Christians. In the same way the Arabian caliphs profited by the lessons taught them by their Jewish and Christian subjects, and founded establishments for the preservation of learning from Granada and Cordova in the West to Samarcand in the East.

The first instance we have of a learned society in western Europe was that founded by Charlemagne, at the instigation of Alcuin, to promote the study of grammar, orthography, rhetoric, poetry, history, and mathematics. In order to equalize all ranks, each member took the pseudonym of some ancient author or celebrated person of antiquity. Charlemagne called himself David, which indicated his preference for biblical

subjects. Alcuin became Flaccus Albinus, Einhard was Callimachus, another was Virgil, another Homer, and a third Lucretia. None of their labors have come down to us, but the society undoubtedly exercised considerable influence in modeling the language and reducing it to rules.

In the next century Alfred founded an academy at Oxford, but this was rather a grammar school than a society, and was the basis of the University of Oxford.

We hear no more of academies for the time. They were swallowed up in the general darkness; but, as was to be expected, the Renaissance was a period fruitful in academies. With the awakening at the end of the thirteenth and the beginning of the fourteenth century, with the developing influence of Dante, Petrarch, and Boccaccio, societies became more and more common. At first they were devoted chiefly to the cultivation of poetry. Italy was the country where they flourished most. With the overthrow of the Eastern Empire, and with the culmination of the revival of the classics in western Europe, societies were established in every city and large town. They became very numerous in the sixteenth century. Tiraboschi, in his History of Italian Literature, enumerates 171, and Jarkius, in his Specimen Historæ Academiarum Conditarum, gives nearly 700.

Being an outgrowth of the spirit of the Renaissance, the earliest of these academies were literary in form and character. They directed their attention to classical literature. "They compared manuscripts; they suggested new readings or new interpretations; they deciphered inscriptions or coins; they sat in judgment on a Latin ode or debated the propriety of a phrase. Their own poetry had, perhaps, never been neglected, but it was not till the writings of Bembo furnished a new code of criticism in the Italian language that they began to study it with the same minuteness as modern Latin." (Encyclopædia Britannica, article "Academy," quoting Hallam.) These academies were oligarchical in their constitution. They encouraged culture, but hampered genius and extinguished originality. They were patronized very largely by the Italian nobility, who, living in the cities as they did and being at the same time excluded from participation in the government, naturally turned to literature as a consolation and career. Many of these societies gave themselves names expressive of ignorance, or which were simply ludicrous. Among them were the Lunatici of Naples, the Extravaganti, the Fulmiales, the Trapassati.

One of the earliest of these academies was the Accademia Pontaniana, which was founded at Palermo in 1433 by Antonio Beccadella; but perhaps the best known is the Platonic Academy, founded at Florence by Cosimo de' Medici. The original idea of this academy was the study of Plato. To this was added later the explanation of Dante and other Italian authors and the improvement of the Italian language and literature. Its principal ornament was Marsilio Ficino, who developed a

system of philosophy borrowed principally from the later Platonists of Alexandria, but as it seemed to coincide with some of the later doctrines of Christianity it was allowed by the church. The Platonic Academy continued to flourish at Florence until 1522, when it was suppressed on occasion of the conspiracy against Giulio de' Medici. Duke Cosimo revived it in 1540 under the name of the Florentine Academy, when its labors were wholly devoted to Petrarch and the Italian language. (Symonds, Revival of Learning, 366.) The Platonic Academy had Machiavelli among its number and became the model of many others.

The most celebrated of these academies was the Accademia della Crusca, or Furfuratorum, founded at Florence in 1472 by the poet Grazzini. Its object was to purify the Italian tongue. Its great work is the Vocabulario della Crusca, of which the first edition was published in 1613. It was composed on Tuscan principles and regarded the fourteenth century as the Augustan age of the language. This exclusive Tuscan spirit has disappeared in the later editions. This academy is now incorporated with two others that are still older, and the whole is known as the Royal Florentine Academy.

Scientific academies were also founded in Italy at an early date. The Academy of Milan was instituted in 1485 for the study of arts and sciences. The first society for the study of physical science was founded in Naples in 1560 by Baptista Porta. It was called the Academia Secretorum Naturæ. It arose from a meeting of scientific friends at Porta's house, and no members were admitted who had not made some useful discovery in medicine or natural philosophy. Porta was accused by the ignorant of magic, and went to Rome to justify himself before the authorities there. He was acquitted by the pope, but his academy was dissolved. While in Rome Porta was admitted to the Accademia dei Lincei, or The Lynx. This academy was founded in 1603 by Frederico Cesi and devoted itself exclusively to physical science. The meetings were private and were held three times a week. There were five lectures at each meeting. Porta became a member in 1610; Galileo in 1611. Throughout his long controversy with the church Galileo was given almost unanimous support by the academy, and some of his greatest works were published at its expense. It also published the great work of Hernandez on the Natural History of New Spain. The Lincei finally became extinct about 1650. It was revived in 1784 and has since come to the front of European scientific societies. But the fame of The Lincei was outstripped by that of the Accademia del Cimento, established in Florence under the patronage of the Grand Duke Ferdinand II in 1657. The object of this society was to make experiments and relate them, abjuring all preconceived notions. It flourished only ten years.

When we come to France, it will be found that conditions there did not differ essentially from those in Italy. Many poetical societies were established in the twelfth, thirteenth, and fourteenth centuries, and

kings did not think it beneath their dignity to preside at their meetings. The most celebrated societies were at Caen, Dieppe, Rouen, Beauvais, Amiens, Arras, and Valenciennes. These generally met once a year. The Society of Puy, at Amiens, was a regularly organized academy and distributed prizes twice a year. The Academy of the Floral Games was established in 1323. Its object was to distribute prizes and rewards to the troubadours. These prizes consisted of flowers of gold and silver. It was first recognized by the State in 1694, when it was confirmed by letters patent from the King and its members limited to 36. It was suspended a few years during the Republic, but was revived and still distributes prizes annually.

These societies sang of poetry and love. We can see that their connection with the troubadours and with the minnesingers was close.

The Institute of France is now the most important organization of this kind in the world. It is itself composed of five societies.

(1) The best known of the French societies is the French Academy. It was established by order of the King in 1635, but in its original form came into existence a few years earlier. About 1570 a company of wits and musicians, under the lead of Jean Antoine Baïf, a poet, organized themselves into an academy "to study grammatically the language of sound." It was incorporated under letters patent by Charles IX and was patronized by Charles IX and Henry III. Some wits renewed the design in the early part of the reign of Louis XIII. In 1612 David Rivault published a pamphlet setting forth "The design of an academy and its introduction into Court." He proposed to embrace all sciences save theology in his academy.

Toward 1630, Valentine Conrart, a counselor, secretary to the King, established at his own house a reunion of learned men more or less esteemed. From these reunions came the French Academy. These meetings were informal, but turned often on literary topics, and members submitted their own work for criticism. A report of their work coming to the ears of Cardinal Richelieu pleased him, and he offered to incorporate the society. The offer was accepted, and the academy was organized on this new basis. Its principal object was the purification of the French language, "to render it pure, eloquent, and capable of treating the arts and sciences." The registration of its letters patent was resisted by the Parliament as the registration of the letters patent of the Academy of Charles IX had been. The academy was at first the butt of satire and the object of ridicule; but when Louis XIV became its patron, it became more popular and its titles were sought.

The number of members was fixed at 40, and they have since come to be known as "the Immortals." There is hardly a name among the French writers of the first rank that is not on its roll of members; but of its influence on the language and literature the most opposite opinions have been advanced. It is asserted, on the one hand, that it has corrected the judgment, purified the taste, formed the language of

French writers, and that to it we owe the most striking characteristics of French literature, its purity, delicacy, and flexibility. On the other hand, it is said that while it has given flexibility, brilliancy, and polish, it has done so at the expense of its masculine qualities, its originality, vigor, and natural grace.

> It has disciplined it, but it has emasculated, impoverished, and rigified it. It sees in taste, not a sense of the beautiful, but a certain type of correctness, an elegant form of mediocrity. It has substituted pomp for grandeur, school routine for individual inspiration, elaborateness for simplicity. (Lanfrey in Encyclopædia Britannica.)

Voltaire said that academies uniformly suppressed the efforts of genius instead of exciting them, and defined the French Academy as "a body where they received titled persons, men in office, prelates, lawyers, physicians, geometricians, and even scholars."

The great work of the academy has been the preparation of its Dictionary of the French Language. The first edition appeared in 1694; the seventh edition was published in 1879. The academy was suppressed in 1793 and reconstituted in 1795 as the second class of the institute. It received its old name again in 1816.

(2) The old Academy of Science, which became the first class of the institute, had its origin very much in the same way as the French Academy. A private society of scientific men had been meeting for some thirty years at private houses to converse on their studies and communicate their discoveries. In 1666 Colbert, just as Richelieu had done, conceived the idea of giving the society an official status. This was done, pensions were given by the King to each of the members, and a fund for instruments and experiments were placed at their disposal. At first the society was rather a laboratory and observatory than an academy proper. Experiments were undertaken in common and results discussed. A number of foreign scholars joined the society. It was reconstituted in 1699; was overthrown by the Revolution, but reconstituted in 1816.

The other academies constituting the Institute of France are: (3) the Academy of Inscriptions and Belles Lettres, an offshoot of the French Academy, founded by Colbert. It is concerned with general history, sociology, religious and philosophical systems, chronology, geography, medals, inscriptions, monuments, and comparative philology. (4) The Academy of Fine Arts, founded by Mazarin in 1648, has to do with painting, sculpture, architecture, engraving on copper, and musical composition. The Academy of Architecture, founded in 1671, was joined to this academy in 1795. (5) The Academy of the Moral and Political Sciences, founded in 1795, concerns itself with philosophy, moral philosophy, legislation, public law and jurisprudence, political economy and statistics, and general history. It was suppressed in 1803, but reestablished in 1832.

Academies also exist in many of the provinces of France. In the

seventeenth century literary reunions became very brilliant in France, and exercised a vast influence over literature. From the French coteries England derived her Blue Stocking assemblies which took their rise after the Peace of Paris in 1763.

There are numerous learned societies in other countries of Europe, and in them, as in France and Italy, the name "academy" is generally used. There were great numbers of literary societies in Germany after the Renaissance. One of the most ancient was established at Heidelberg in 1480, under the title Societas Litteraria Rhenana. It was occupied with Latin, Greek, Hebrew, astronomy, music, poetry, and jurisprudence. Its members found recreation in balls and other festivities. The Collegium Curiosum was founded in 1672 by J. C. Sturm, professor of mathematics and natural philosophy in the University of Altorff, in Franconia. The Royal Academy of Sciences at Berlin was founded by Frederick I in 1700. Its present constitution dates from 1812, and it is divided into four sections, physical, mathematical, philosophical, and historical. The Academy of Sciences at Mannheim dates from 1755; the Electoral Academy at Erfurt from 1754; the Electoral Bavarian Academy of Sciences at Munich from 1759.

The Imperial Academy of Sciences at St. Petersburg was projected by Peter the Great. His inspiration and ideas were drawn from similar institutions which he had seen in other countries. It was chartered in 1724, and several learned foreigners were invited to become members. It received the protection and patronage of Catherine I, of Elizabeth, and also of Catherine II. The last corrected many of its abuses and infused a new vigor and spirit into its researches. The buildings and apparatus of the academy are on a vast scale; it has a fine library of 36,000 curious books and manuscripts, together with an extensive museum which is very rich in native productions.

The Royal Swedish Academy dates from 1793. Linnæus was one of its original members. The Royal Academy of Sciences at Copenhagen dates from 1742; the Royal Spanish Academy at Madrid dates from 1713, and the Academy of Sciences at Madrid from 1774.

Besides academies of this class devoted to literature and sciences in general, there are others that have restricted themselves to narrower fields. Among them may be mentioned the Academy of Herculaneum, which was established in Naples about 1755. Its object was to explain the paintings and other antiquities found at Herculaneum, Pompeii, and other places.

Of academies of medicine and surgery, one of the earliest mentioned was that founded in 1662 by J. L. Bausch, a physician of Leipsic. It was called the Leopoldine Academy. An Italian Academy of Painting and Sculpture was founded at Turin in 1778. The Academy of Architecture of Milan dates from 1380. The Swedish Academy of Fine Arts was founded in Stockholm in 1733. The Russian Academy of Fine Arts at St. Petersburg was established by the Empress Elizabeth (1741–1762)

and annexed to the Academy of Science. It was made a separate institution by Catherine II, who augmented its revenue.

The term "academy" is used on the Continent as a general rule to denote a body organized for the advancement of a common object in the learned world. This is particularly the case in France and Italy, where the academies are all-powerful; but France has "societies" also, among others the Société Géographique, which publishes a well-known bulletin. The Société Asiatique has called into existence Oriental societies in England and Germany. The latter country had in the latter part of the eighteenth century a poets' union (Göttinger Dichterbund or Hainbund) among its societies, with Klopstock at its head. This seems to have been a sort of return to the older idea of the association of literary men, which was seen in the meistersingers, who flourished till the sixteenth century. The guild idea was very prominent in these early poetical associations. Hallam considered them as the prototypes of the Italian academies.

In Germany and the Netherlands societies acquired prominence during the fifteenth century by promoting classical studies. In the seventeenth century bodies were formed in Germany after the manner of the Florentine Accademia della Crusca and the Academie Française for the improvement of the language.

The term "academy," as we have seen, has not been much used in England in the sense in which it is used on the Continent. In England this term is used to designate institutions for the education of young men for the army and navy. Learned societies took their rise in England in the seventeenth century. This association of learned men was due to the influence of Bacon. The Novum Organum and the Advancement of Learning inspired them with the desire of examining the mysteries of nature and of thus freeing themselves from the "logic of the schools." The scientific society as it now exists is prophetically described in the New Atlantis.

The most important of these is the Royal Society. It is also the oldest of the scientific bodies. Its full name is The Royal Society of London for Improving Natural Knowledge, and is devoted to the advancement of mathematical and physical science. The Royal Society is usually considered as dating from 1660, but its nucleus is still older, for as early as 1645, "divers worthy persons, inquisitive into natural philosophy, and other parts of human learning, and particularly of what hath been called the New Philosophy or Experimental Philosophy" were accustomed to meet weekly, and there is little doubt but that this meeting of philosophers is the same as the "Invisible College" of which Boyle speaks in 1646 and 1647. They were also royalists and intrigued for the restoration. They met first at Wadham College, Oxford. Wallis says these meetings were suggested by Theodore Haak, a German then resident in London; that they sometimes held meetings at Dr. Goddard's lodgings in Wood street, London, some-

times at Bull-head Tavern in Cheapside, but were often at Gresham College. The first formal meeting of which we have record was held on November 28, 1660, when the Lord Brouncker, Hon. Robert Boyle, Mr. Bruce, Sir Robert Moray, Sir Paul Neile, Dr. Wilkins, Dr. Goddard, Sir William Petty, Mr. Ball, Mr. Rooke, Sir Christopher Wren, and Mr. Hill, assembled at Gresham College to hear a lecture by Mr. Wren. After the lecture was ended they withdrew according to their usual custom for mutual converse, and at that time "something was offered about a designe of founding a college for the promoting of Physico-Mathematicall Experimentall Learning."

It was agreed that the meetings should be continued weekly. Dr. Wilkins was appointed chairman for the time. The King approved the plan of the meetings. Gresham College was to be the meeting place. Sir Robert Moray was chosen president March 6, 1661, and remained until the incorporation of the society, when he was succeeded by Lord Brouncker. July 15, 1662, the society was incorporated as "The Royal Society," but this first charter was modified by a second one in 1663.

These early scientists were not free from superstition. Everything in the shape of a marvel or a monstrosity was grist for their mill. Nothing ever came amiss to them, but they contributed to science, and by the end of the seventeenth century the Royal Society had struck root throughout the world of cultivated mind, for it labored in every region of knowledge.

During its early years one of the main features of the society was the correspondence which was actively maintained with the continental philosophers, and it was from this correspondence that the Philosophical Transactions took its rise. This journal was at first issued in parts, beginning with March 6, 1664–65, and was issued in this form up to 1750 when 46 volumes had been published. From that time the division of the publication into numbers disappears. About 185 volumes have been issued to date.

The society also turned its attention to the formation of a museum, the basis for the same being the collection of rarities which belonged to Mr. Hubbard and the library of the Earl of Arundel. It now possesses some 45,000 volumes of scientific works.

From the time of the presidency of Sir Joseph Banks (1780) there has been a tendency to make the attainment of membership in the Royal Society more difficult than it had been previously. In 1847 a further step was taken in the same direction when the number of candidates for election by the council was limited to 15 and the election was made annual. The Royal Society is a close corporation and membership is very difficult to obtain. The candidate must produce a certificate signed by 6 fellows; he must have invented a machine, discovered a truth, written a book or memoir of merit, distinguished himself in some art or profession, or he must have shown that he was eminent in some particular department of research.

But, synchronous with the narrowing of membership in the Royal Society, was the rise of other learned bodies, for it began to be recognized that one society could not embrace so many sciences.

During the reign of Queen Anne, Swift had undertaken to establish an English Academy on the lines of the French Academy. It was to have devoted itself to the English language and was to have been a part of the Royal Society. Pope, Prior, and Congreve were also in the project, but the death of the Queen put an end to the whole.

A number of important societies were organized during the eighteenth century. Among them were the Society of Antiquaries (London, 1707), which some enthusiasts trace to Archbishop Parker in 1572; the Royal Society of Dublin (1731); the Medical Society (1752); Royal Society of Edinburgh (1783); Linnæan Society (London, 1788)—this was the first instance of the establishment of a distinct scientific association under royal charter; and the Royal Institution of Great Britain (London, 1800).

From this time the increase of learned societies was more rapid, and there are now societies in the United Kingdom for almost every branch of science, letters, learning, and art. The Geological Society (1807) and the Royal Geographical Society (1830) have done much toward stimulating many of the important discoveries of the century. Those engaged in antiquarian and archæological research have displayed great vigor. The societies devoted to the exploration of Palestine have met with signal results, and others have been of particular value, such as the Royal Astronomical Society (1820); Statistical Society (1834); the Royal Asiatic Society of Great Britain and Ireland (1823), which has branches in Bombay, Madras, and Hongkong; the Royal Asiatic Society of Bengal (Calcutta, 1784); the British Association for the Advancement of Science (1831); and the National Association for the Promotion of Social Science (1857), etc. The last of these societies embraced at first the five departments—jurisprudence, education, punishment and reformation, public health and social economy; a sixth relating to trade and international law was added in 1860.

Such is a brief survey of the rise and progress of learned societies in England and on the Continent. When we turn to America, it will be found, in the first place, that we have followed English rather than continental forms in naming institutions of this class societies rather than academies. In America the term "academy" is used as a rule to indicate an institution for secondary education. It is also applied to naval and military schools, such as the Military Academy at West Point and the Naval Academy at Annapolis. In this respect also it follows English precedent. In the second place, unlike many English and continental institutions, American societies are, for the most part, independent of government. Most of them are private organizations and are supported by fees of members and by endowments from private sources. A few institutions, like the American Historical Association,

the National Academy of Sciences, and the Smithsonian Institution, have a connection, more or less direct, with the Federal Government.

Other institutions again, are under control of the State governments, are a part of the State machinery, and receive aid from the public treasury. This is the case with the State Historical Society of Wisconsin and the Historical Society of Nebraska.

The first American learned society originated from A Proposal for Promoting Useful Knowledge among the British Plantations, which was issued by Dr. Franklin in 1743. There was at that time small opportunity for anyone to acquire information in the American Colonies. Franklin says that when he established himself in Philadelphia in 1723 there was not a good bookseller's shop in any of the Colonies to the southward of Boston. There was but one printer in New York and two in Philadelphia, and both of these were poorly qualified for their work. They were stationers, but they sold only paper, almanacs, ballads, a few common schoolbooks, etc. Those who wished to purchase books, had to send to England for them.

When Franklin found himself fairly well established in Philadelphia as a printer, his interest in philosophy and literature led him to combine with certain associates to form a debating society. This society was called The Junto. It met on Friday evening.

> The rules that I drew up required that every member in his turn should produce one or more queries on any point of morals, politics, or natural philosophy, to be discussed by the company; and once in three months produce and read an essay of his own writing on any subject he pleased. Our debates were to be under the direction of a president, and to be conducted in the sincere spirit of truth, without fondness for dispute or desire of victory. (Autobiography, Sparks's edition, vol. 1, p. 81.)

This club, he says, continued almost 40 years—

> and was the best school of philosophy, morality, and politics that then existed in the province; for our queries, which were read the week preceding their discussion, put us upon reading with attention on the several subjects, that we might speak more to the purpose; and here, too, we acquired better habits of conversation (pp. 82–83).

Franklin, as the leader of The Junto, brought about the establishment of a small library by it. This library, he says, was "the mother of all the North American subscription libraries." Franklin continues:

> We had left the alehouse where we first met and hired a room to hold our club in. I proposed that we should all of us bring our books to that room, where they would not only be ready to consult in our conferences, but become a common benefit, each of us being at liberty to borrow such as he wished to read at home. This was accordingly done, and for some time contented us.
>
> Finding the advantage of this little collection, I proposed to render the benefit from the books more common by commencing a public subscription library. I drew a sketch of the plan and rules that would be necessary, and got a skillful conveyancer, Mr. Charles Brockden, to put the whole in form of articles of agreement to be subscribed, by which each subscriber engaged to pay a certain sum down for the first purchase of the books, and an annual contribution for increasing them. So few were the readers at that time in Philadelphia, and the majority of us so poor, that I was not able with great industry to find more than 50 persons, mostly young trades-

men, willing to pay down for this purpose 40 shillings each and 10 shillings per annum. With this little fund we began. The books were imported. The library was opened one day in the week for lending them to the subscribers on their promissory notes to pay double the value if not duly returned. The institution soon manifested its utility, was imitated by other towns and in other provinces. The libraries were augmented by donations; reading became fashionable, and our people, having no public amusements to divert their attention from study, became better acquainted with books, and in a few years were observed by strangers to be better instructed and more intelligent than people of the same rank generally are in other countries (pp. 98–99).

The instrument inaugurating this new library movement was signed July 1, 1731. It gave place to the charter of incorporation, which was obtained from the proprietaries of Pennsylvania in 1742.

Our club, The Junto, was found so useful, and afforded such satisfaction to the members, that some were desirous of introducing their friends, which could not well be done without exceeding what we had settled as a convenient number, viz, 12. I was one of those who were against any addition to our number, but instead of it made in writing a proposal that every member separately should endeavor to form a subordinate club, with the same rules respecting queries, etc., and without informing them of the connection with The Junto. The advantages proposed were the improvement of so many more young citizens by the use of our institutions; our better acquainance with the general sentiment of the inhabitants on any occasion, as the Junto member might prepare what queries we should desire, and was to report to The Junto what passed at his separate club; the promotion of our particular interests in business by more extensive recommendation, and the increase of our influence in public affairs, and our power of doing good by spreading through the several clubs the sentiments of The Junto. The project was approved, and every member undertook to form his club, but they did not all succeed. Five or six only were completed, which were called by different names, as the Vine, the Union, the Band. They were useful to themselves, and afforded us a good deal of amusement, information, and instruction, besides answering, in some considerable degree, our views of influencing the public on particular occasions (pp. 129–130).

Franklin was now growing in prominence and influence, and in 1743 published A Proposal for Promoting Useful Knowledge among the British Plantations in America. This proposal is dated at Philadelphia, May 14, 1743.

Franklin begins his "proposal" with a review of the size of the English possessions in America, their differences in soil, climate, productions, etc. The drudgery of the first planting was now pretty well over, and there were men of leisure in every province.

To such of these who are men of speculation many hints must from time to time arise, many observations occur, which, if well examined, pursued, and improved, might produce discoveries to the advantage of some or all of the British plantations, or to the benefit of mankind in general.

But as, from the extent of the country, such persons are widely separated and seldom can see and converse or be acquainted with each other, so that many useful particulars remain uncommunicated, die with the discoverers, and are lost to mankind, it is to remedy this inconvenience for the future proposed that one society be formed of virtuosi or ingenious men residing in the several Colonies, to be called The American Philosophical Society, who are to maintain a constant correspondence.

It was suggested that Philadelphia, being near the center of the

colonies and having the advantage of a good growing library, should be the center of the society; that in Philadelphia there should always be at least seven members, a physician—a botanist, a mathematician, a chemist, a mechanician, a geographer, and a general natural philosopher. The president, secretary, and treasurer were to have their offices there also. It was proposed that the members meet once a month or oftener at their own expense to communicate to each other their observations and experiments, to receive, read, and consider such letters, communications, or queries as shall be sent from distant members; to direct the dispersing of copies of such communications as are valuable to other distant members, in order to procure their sentiments thereupon.

That the subject of the correspondence be all new discovered plants, herbs, trees, roots, their virtues, uses, etc.; methods of propagating them, and making such as are useful but particular to some plantations more general; improvement of vegetable juices, or ciders, wines, etc.; new methods of curing or preventing disease; all new discovered fossils in different countries, as mines, minerals, and quarries; new and useful improvements in any branch of mathematics; new discoveries in chemistry, such as improvements in distillation, brewing, and assaying of ores; new mechanical inventions for saving labor, as mills and carriages, and for raising and conveying of water, draining of meadows, etc.; all new arts, trades, and manufactures that may be proposed or thought of; surveys, maps, and charts of particular parts of the seacoasts or inland countries; course and junction of rivers and great roads, situation of lakes and mountains, nature of the soil, and productions; new methods of improving the breed of useful animals; introducing other sorts from foreign countries; new improvements in planting, gardening, and clearing land, and all philosophical experiments that let light into the nature of things, tend to increase the power of man over matter, and multiply the conveniences or pleasures of life.

That a correspondence, already begun by some intended members, shall be kept up by this society with the Royal Society of London, and with the Dublin Society.

It was proposed also that everything of value communicated to the secretary of the society should be sent in abstract quarterly to all of the members; that such communications should be forwarded post free; that the fees should be 1 piece of eight per annum.

That at the end of every year collections be made and printed of such experiments, discoveries, and improvements as may be thought of public advantage, and that every member have a copy sent him.

That the business and duty of the secretary be to receive all letters intended for the society and lay them before the president and members at their meetings; to abstract, correct, and methodize such papers as require it, and as he shall be directed to do by the president, after they have been considered, debated, and digested in the society; to enter copies thereof in the society's books and make out copies for distant members; to answer their letters by direction of the president and keep record of all material transactions of the society.

Benjamin Franklin, the writer of this proposal, offers himself to serve the society as their secretary till they shall be provided with one more capable. (Works, Sparks's edition, Vol. VI, 14–17.)

The suggestions of Franklin were not carried into execution immediately. The next reference we find to the proposed society is in a

letter written by Cadwallader Colden to Franklin in October, 1743: "I long very much to hear what you have done in your scheme of erecting a society in Philadelphia for promoting useful arts and sciences in America." Franklin answered on November 4, 1743, that absence from home had caused a rush of business and he had "had no leisure to forward the scheme of the society." But on April 5, 1744, he writes Colden from New York, "that the society, as far as it relates to Philadelphia, is actually formed, and has had several meetings to mutual satisfaction." The original members were Dr. Thomas Bond, physician; John Bartram, botanist, and father of William Bartram, the botanist; Thomas Godfrey, mathematician, and father of Thomas Godfrey, the poet; Samuel Rhoads, mechanician; William Parsons, geographer; Dr. Phineas Bond, as general natural philosopher. The officers were Thomas Hopkinson, president; William Coleman, treasurer; Benjamin Franklin, secretary. These were all of Philadelphia. To these preliminary members others had been since added—Mr. Alexander, of New York; Mr. Morris, chief justice of the Jerseys; Mr. Home, secretary of the Jerseys; Mr. John Coxe, of Trenton; and Mr. Martyn, of Trenton. (Works, VI, 24–25, 28–29.)

Colden suggested to Franklin in December, 1744, that he print by subscription a selection from the papers that might be sent in by the members. Nearly a year after this date Franklin announces to Colden his determination to publish an American Philosophical Miscellany. But this design was not executed. There is, moreover, no evidence that the society was ever in a flourishing state during this period. Nothing is known of its transactions. Its records are lost, and if papers were contributed by the members they were not published. Franklin was himself drawn off by his studies in electricity. The society seems to have languished, and in a few years regular meetings were discontinued. (Works, I, 577.)

While this society had no connection with the earlier society known as The Junto, which had been organized by Franklin soon after he came to Philadelphia and of which mention has been made already in this sketch, it is but natural to conclude that the experience gained in connection with that organization stood him in good stead in his efforts to bring together on a higher plane the learned men of the whole country, and that The Junto was therefore indirectly responsible for the idea embodied in the American Philosophical Society.

In the meantime another society sprang up in Philadelphia which was called The Junto, or Society for the Promotion of Useful Knowledge. The date of the origin of this society has been lost. Its records begin with September 22, 1758, but it had an earlier origin. The records seem to indicate that it was a society rather for the mutual improvement of the members by a discussion of a variety of subjects "than for enlarged philosophical inquiries, designed for public as well as private benefit." It seems that this society began to decline in

1762. No records have been found between October, 1762, and April 25, 1766, when the society met and took the name, The American Society for Promoting and Propagating Useful Knowledge. Thirty members signed the roll, and the society was evidently intended to embrace a larger compass of objects than formerly, and to have more of a public character.

We may conclude that the reorganization of The Junto as the American Society, etc., had a good influence on the dormant American Philosophical Society, for in November, 1767, this society was revived by a few of the original members then residing in Philadelphia. A union was proposed by the other society. This proposition was accepted on February 2, 1768, by choosing all the members of that association as members of the American Philosophical Society. But the former refused to unite on any terms that did not indicate perfect equality between the two associations. September 23, 1768, the American Society was again reorganized, new rules were adopted, and its title was changed to The American Society Held at Philadelphia for Promoting Useful Knowledge. Franklin had been elected to membership in it on February 19, 1768. On the 4th of November following he was chosen its president, although absent in Europe, and on the same day the Medical Society of Philadelphia was incorporated with it.

After much negotiation, it was agreed that the two societies should unite on equal terms, each electing all the members of the other. This was accomplished January 2, 1769, and the new society became The American Philosophical Society Held at Philadelphia for Promoting Useful Knowledge.

In a letter to Franklin, written in the spring of 1769, Dr. Thomas Bond says:

> I long meditated a revival of our American Philosophical Society, and at length I thought I saw my way clear in doing it, but the old party leaven split us for a time. We are now united, and with your presence may make a figure; but till that happy event I fear much will not be done. The assembly have countenanced and encouraged us very generously and kindly.

At the time of the union Franklin was chosen president of the society, and was reelected annually to this office till his death. (Works, I, 576–579.)

The American Philosophical Society is therefore the oldest learned society in America, and is still active. Its published Transactions begin with 1771. In the address which accompanied a copy of this work presented to each member of the general assembly of Pennsylvania it is said that the volume is "wholly American in composition, printing, and paper, and which, we flatter ourselves, may not be thought altogether unworthy of the attention of men of letters in the most improved parts of the world." It seems proper, therefore, for us to consider that this volume marks the beginning of that breaking away from English direction and control which was given still further impetus by the war of

the Revolution. Before the revival and reorganization of the American Philosophical Society, learned Americans had looked to England for guidance. The Royal Society was then for America what it still is for the British colonies. All Americans eminent for their scientific attainments were on its list of fellows. Among them were Cotton Mather, the three Winthrops, James Bowdoin, and Paul Dudley in New England; Franklin, David Rittenhouse, and Dr. John Morgan in Pennsylvania; John Bannister, John Clayton, John Mitchell, and William Byrd in Virginia; Hugh Williamson and Dr. Alexander Garden in North and South Carolina. In its Philosophical Transactions were published all the records of American research.

Indeed, the proposition had been made early in the seventeenth century that "the great Mr. Boyle, Bishop Wilkins, and several other learned men" should leave England and establish a society for promoting knowledge in the new Colony of Connecticut, of which John Winthrop (1606–1676), F. R. S., had been appointed governor.[1]

While the programme of a learned migration to America in the seventeenth century was frustrated by the incorporation of its members by Charles II as the Royal Society of London, and while they were thus saved to Great Britain, their influence was paramount in America, and the American Philosophical Society, as its name indicates, was organized on lines of British precedent.

It was different with the next learned society organized in the United States. This society was the American Academy of Arts and Sciences, organized in Boston in 1780. Its field of labor was broad and comprehensive: "To cultivate every art and science which may tend to advance the interest, honor, dignity, and happiness of a free, independent, and virtuous people." Its name and the time of its organization both indicate that it was due to French influence rather than English, and, after the manner of the French, it has continued to issue its Memoirs, while the American Philosophical Society still publishes its Transactions. The Boston society was due largely to the influence of John Adams. In 1809 he prepared a memorandum giving an account of the events leading up to the organization. He says:

> In traveling from Boston to Philadelphia in 1774, 1775, 1776, and 1777 I had several times amused myself, at Norwalk in Connecticut, with the very curious collection of birds and insects of American production made by Mr. Arnold; a collection which he afterwards sold to Governor Tryon, who sold it to Sir Ashton Lever, in whose apartments in London I afterwards viewed it again. This collection was so singular a thing that it made a deep impression upon me, and I could not but consider it a reproach to my country that so little was known, even to herself, of her natural history.
>
> When I was in Europe in the years 1778 and 1779, in the commission to the King of France, with Dr. Franklin and Mr. Arthur Lee, I had opportunities to see the King's collection and many others, which increased my wishes that nature might be examined and studied in my own country as it was in others.

[1] See Goode's "Origin of the national scientific and educational institutions of the United States," in Report of American Historical Association, 1889.

In France, among the academicians and other men of science and letters, I was frequently entertained with inquiries concerning the Philosophical Society of Philadelphia, and with eulogiums on the wisdom of that institution and encomiums on some publications in their Transactions. These conversations suggested to me the idea of such an establishment at Boston, where I knew there was as much love of science and as many gentlemen who were capable of pursuing it as in any other city of its size.

After his return to America in 1779 Adams was present at a dinner given by the corporation of Harvard College in honor of the Chevalier de La Luzerne, the French ambassador to the United States, and chanced to sit next to the Rev. Dr. Samuel Cooper, an eminent patriot, who was long pastor of Brattle Street Church, in Boston, and a leading member of the corporation of Harvard.

I entertained him,

Adams continues—

during the whole of the time we were together, with an account of Arnold's collections, the collection I had seen in Europe, the compliments I had heard in France upon the Philosophical Society of Philadelphia, and concluded with proposing that the future legislature of Massachusetts should institute an academy of arts and science.

To this proposition Dr. Cooper objected, partly because it would be difficult to find men to attend such a society, but chiefly because it was setting up a sort of rival to Harvard College, and might draw off to a certain extent the attentions and affections of the public from it. But these objections were explained away.

The doctor at length appeared better satisfied, and I entreated him to propagate the idea and the plan as far and as soon as his discretion would justify. The doctor accordingly did diffuse the project so judiciously and effectually that the first legislature under the new constitution adopted and established it by law. (Works of John Adams, IV, 259–261.)

The next oldest society, and the oldest of its particular class, is the Massachusetts Historical Society, which was organized in 1791 and incorporated three years later.

Then comes the Connecticut Academy of Arts and Sciences, organized and incorporated in 1799. This academy, although restricted as far as the name goes, took for its model the American Academy of Arts and Sciences, defined its sphere of activity in substantially the same words, and, like it, publishes Memoirs instead of Transactions.

Other institutions were organized in the United States in the eighteenth century, but soon perished. A scientific society was organized at Williamsburg during the Revolution, but it soon failed. The most ambitious of these attempts was l'Académie des États-Unis de l'Amérique, proposed by the Chevalier Quesnay de Beaurepaire in 1788. It is said that the plan for this academy was submitted to Louis XVI, to the Royal Academy of Science, and to the Royal Academy of Paintings and Sculpture, and received the approval of each. It was to be modeled after the French Academy of Sciences, and was to be located in Rich-

mond, Va. A large sum was subscribed by the planters of Virginia and by the citizens of Richmond; a building was erected; one professor was appointed, who was commissioned mineralogist in chief and instructed to make natural history collections in Europe and America. The academy was to be national and international, for branches were to be established in Baltimore, Philadelphia, and New York; the academy was to be affiliated with the royal societies of London, Paris, and Brussels, and with other learned bodies in Europe. It was to be composed of a president, a vice-president, 6 counselors, a treasurer-general, a secretary, a recorder, an agent for taking European subscriptions, French professors, masters, artists in chief attached to the academy, 25 resident and 175 nonresident associates. It promised to communicate a knowledge of the natural products of North America to the Old World and to enrich its collections with specimens of the fauna and flora of the New. It also promised to publish an almanac yearly from its own press in Paris.

But the population of Virginia was too scattering for such a project, and the proposed academy died almost before it was born. The French Revolution crushed also any hopes that its promoters might have had of getting aid from France. The building in Richmond was used as a meeting place for the Virginia convention of 1788 and became, at a later period, a theater.

From the beginning of the century to the time of the civil war there was a slow but steady increase in the number of societies that were founded and lived through the period of infancy. It will be noted that the proportion of these that were national in their design is relatively larger than of the State societies. Among the national societies founded during this period are the American Antiquarian Society, founded in 1812; the National Academy of Design, 1826; the American Statistical Association, 1839; the American Ethnological Society, 1842; the American Oriental Society, 1843; the American Medical Association, 1847; the American Association for the Advancement of Science, 1848; the American Geographical Society, and the American Society of Civil Engineers, both founded in 1852. There were, however, a few State societies older than any of the above.

[The Commissioner of Education expresses his thanks to Mr. Appleton Morgan, President of the New York Shakespeare Society, who called his attention to the importance and value of a review of the work of learned and educational societies and collected much of the material found in the following list.]

I. GENERAL SCIENCE.

[Societies occupying themselves with several branches of science, or with science and literature jointly.]

NATIONAL.

AMERICAN ACADEMY OF ARTS AND SCIENCES.

BOSTON, MASS.

First meeting, May 30, 1780; chartered May 3, 1780.

Object.—"To promote and encourage the knowledge of the antiquities of America and of the natural history of the country, and to determine the uses to which the various natural productions of the country may be applied; to promote and encourage medical discoveries, mathematical disquisitions, philosophical inquiries and experiments; astronomical, meteorological, and geographical observations, and improvements in agriculture, arts, manufactures, and commerce, and, in fine, to cultivate every art and science which may tend to advance the interest, honor, dignity, and happiness of a free, independent, and virtuous people."

The founders were 62 persons, including the following officers: James Bowdoin, president; Samuel Cooper, vice-president; Joseph Willard, corresponding secretary; Caleb Gannett, recording secretary; Ebenezer Storer, treasurer; Stephen Sewall, vice-treasurer; James Winthrop, cabinet keeper; councillors: Thomas Cushing, Henry Gardner, John Hancock, Samuel Langdon, John Lowell, Robert Treat Paine, Phillips Payson, James Warren, Edward Wigglesworth, Samuel Williams.

Officers for 1894–95.—Alexander Agassiz, president; Augustus Lowell, vice-president; Charles L. Jackson, corresponding secretary; William Watson, recording secretary; Eliot C. Clarke, treasurer; Henry W. Haynes, librarian. Councillors: William R. Livermore, Benjamin O. Peirce, Benjamin A. Gould, of Class I; Henry P. Walcott, Benjamin L. Robinson, Henry W. Williams, of Class II; Andrew M. Davis, Thomas W. Higginson, James B. Thayer, of Class III. Member of the committee of finance: Augustus Lowell. Rumford committee: John Trowbridge, Erasmus D. Leavitt, Benjamin O. Peirce, Edward C. Pickering, Charles R. Cross, Amos E. Dolbear, Benjamin A. Gould. C. M. Warren committee: Francis H. Storer, Thomas M. Drown, Charles L. Jackson, Samuel Cabot, Henry B. Hill, Leonard P. Kinnicutt, Arthur M. Comey. Committee of publication: Charles L. Jackson, William G. Farlow, Charles G. Loring. Committee on the library: Henry P. Bowditch, Amos E. Dolbear, William R. Livermore. Auditing committee: Henry G. Denny, John C. Ropes.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

SALEM, MASS.

First meeting held in Philadelphia, September 20, 1848; incorporated under the laws of Massachusetts, April 3, 1874.

"The objects of the association are, by periodical and migratory meetings, to promote intercourse between those who are cultivating science in different parts of America, to give a stronger and more general impulse and more systematic direction to scientific research, and to procure for the labors of scientific men increased facilities and a wider usefulness." (Constitution.)

Incorporators, 1874.—Joseph Henry, of Washington; Benjamin Pierce, of Cambridge; James D. Dana, of New Haven; James Hall, of Albany; Alexis Caswell, of Providence; Stephen Alexander, of Princeton; Isaac Lea, of Philadelphia; F. A. P. Barnard, of New York; John S. Newberry, of Cleveland; B. A. Gould, of Cambridge; T. Sterry Hunt, of Boston; Asa Gray, of Cambridge; J. Lawrence Smith, of Louisville; Joseph Lovering, of Cambridge, and John Le Conte, of Philadelphia.

First officers, 1848.—President, W. C. Redfield; Walter R. Johnson, secretary; Jeffries Wyman, treasurer.

Officers for 1895.—President: E. W. Morley, Cleveland, Ohio. Vice-presidents: A. Mathematics and astronomy—E. S. Holden, Mount Hamilton, Cal.; B. Physics—W. Le Conte Stevens, Troy, N. Y.; C. Chemistry—William McMurtrie, Brooklyn, N. Y.; D. Mechanical science and engineering—William Kent, Passaic, N. J.; E. Geology and geography—Jed. Hotchkiss, Staunton, Va.; F. Zoology—D. S. Jordan, Palo Alto, Cal.; G. Botany—J. C. Arthur, Lafayette, Ind.; H. Anthropology—F. H. Cushing, Washington, D. C.; I. Economic science and statistics—B. E. Fernow, Washington, D. C. Permanent secretary: F. W. Putnam, Cambridge, Mass. General secretary: Jas. Lewis Howe, Louisville, Ky. Secretary of the council: Charles R. Barnes, Madison, Wis. Secretaries of the sections: A. Mathematics and astronomy—E. H. Moore, Chicago, Ill.; B. Physics—E. Merritt, Ithaca, N. Y.; C. Chemistry—W. P. Mason, Troy, N. Y.; D. Mechanical science and engineering—H. S. Jacoby, Ithaca, N. Y.; E. Geology and geography—J. Perrin Smith, Palo Alto, Cal.; F. Zoology—S. A. Forbes, Champaign, Ill.; G. Botany—B. T. Galloway, Washington, D. C.; H. Anthropology—Anita Newcomb McGee, Washington, D. C.; I. Economic science and statistics—E. A. Ross, Palo Alto, Cal. Treasurer: R. S. Woodward, New York, N. Y.

PUBLICATIONS.

THE AMERICAN PHILOSOPHICAL SOCIETY HELD AT PHILADELPHIA FOR PROMOTING USEFUL KNOWLEDGE.

PHILADELPHIA, PA.

Organized 1743; incorporated 1780.

Object.—For the advancement of useful knowledge.

First officers.—Thomas Hopkinson, president; William Coleman, treasurer; Benjamin Franklin, secretary.

Officers, 1894.—Frederick Fraley, president; vice-presidents, E. Otis Kendall, W. S. W. Ruschenberger, J. P. Lesley; secretaries, George F. Barker, Daniel G. Brinton, Henry Phillips, George H. Horn; curators, Patterson Du Bois, J. Cheston Morris, Richard Meade Bache; treasurer, J. Sergeant Price.

PUBLICATIONS.

Transactions, Vols. I-VI, 1759-1809.

———, new series, Vols. I-XVII, 1818-1893. Vol. XVIII, ——.

Proceedings, Vols. I-XXXII, 1838-1894, issued in 143 numbers, or parts.

AMERICAN PSYCHOLOGICAL ASSOCIATION.

COLUMBIA COLLEGE, NEW YORK, N. Y.

Organized July 8, 1892.

Object.—To advance the science of psychology.

First officers.—President, Dr. G. Stanley Hall; vice-president, Prof. Geo. T. Ladd; secretary and treasurer, Prof. Joseph Jastrow.

Officers, 1896.—President, Prof. G. S. Fullerton; secretary and treasurer, Dr. Livingston Farrand.

PUBLICATIONS.

Proceedings. 8vo.

NATIONAL ACADEMY OF SCIENCES.

WASHINGTON, D. C.

Incorporated by act of Congress March 3, 1863.

Object.—To promote the cause of science.

Incorporators.—Louis Agassiz, Massachusetts; J. H. Alexander, Maryland; S. Alexander, New Jersey; A. D. Bache, at large; F. B. Barnard, at large; J. G. Barnard, United States Army, Massachusetts; W. H. C. Bartlett, United States Military Academy, Missouri; U. A. Boyden, Massachusetts; Alexis Caswell, Rhode Island; William

Chauvenet, Missouri; J. H. C. Coffin, United States Naval Academy, Maine; J. A. Dahlgren, United States Navy, Pennsylvania; J. D. Dana, Connecticut; Charles H. Davis, United States Navy, Massachusetts; George Engelmann, St. Louis, Mo.; J. F. Frazer, Pennsylvania; Wolcott Gibbs, New York; J. M. Gilless, United States Navy, District of Columbia; A. A. Gould, Massachusetts; B. A. Gould, Massachusetts; Asa Gray, Massachusetts; A. Guyot, New Jersey; James Hall, New York; Joseph Henry, at large; J. E. Hilgard, at large, Illinois; Edward Hitchcock, Massachusetts; J. S. Hubbard, United States Naval Observatory, Connecticut; A. A. Humphreys, United States Army, Pennsylvania; J. L. Le Conte, United States Army, Pennsylvania; J. Leidy, Pennsylvania; J. P. Lesley, Pennsylvania; M. F. Longstreth, Pennsylvania; D. H. Mahan, United States Military Academy, Virginia; J. S. Newberry, Ohio; H. A. Newton, Connecticut; Benjamin Pierce, Massachusetts; John Rodgers, United States Navy, Indiana; Fairman Rogers, Pennsylvania; R. E. Rogers, Pennsylvania; W B. Rogers, Massachusetts; L. M. Rutherford, New York; Joseph Saxton, at large; Benjamin Silliman, Connecticut; Benjamin Silliman, jr., Connecticut; Theodore Strong, New Jersey; John Torrey, New York; J. G. Totten, United States Army, Connecticut; Joseph Winlock, United States Nautical Almanac, Kentucky; Jeffries Wyman, Massachusetts; J. D. Whitney, California.

Officers, 1894–95.—O. C. Marsh, president; F. A. Walker, vice-president; Wolcott Gibbs, foreign secretary; A. Hall, home secretary; John S. Billings, treasurer. Additional members of council: G. J. Brush, B. A. Gould, S. P. Langley, T. C. Mendenhall, S. Newcomb, Ira Remsen.

PUBLICATIONS.

Memoirs, 4to, issued by United States Government. Vol. VI was published in 1893.

THE SMITHSONIAN INSTITUTION.

WASHINGTON, D. C.

The Smithsonian Institution, with its dependencies and affiliations, is unique and unparalleled in its relations to the Government. It corresponds more closely at the present time to Barlow's proposed "National Institution" than any organization existing elsewhere in the world. Its history is a remarkable one. James Lewis Macie, afterwards called Smithson, was a natural son of Hugh Smithson, Duke of Northumberland. He was a graduate of the University of Oxford, a fellow of the Royal Society, a chemist and mineralogist of well-recognized position. He was the friend and associate of many of the leading scientific men in England, but found it advisable to spend most of his life on the Continent. He died in 1829, and left in trust to the United States property amounting on September 1, 1838, to $515,169, to establish in Washington "an institution for the increase and diffusion of knowledge among men."

The institution was organized under a law passed in August, 1846, which vested the management in a Board of Regents, to be composed of the Vice-President of the United States, the Chief Justice, [the governor of Washington], 3 members of the Senate, 3 Members of the House of Representatives, and 6 other persons. This Board elects one of its number as presiding officer, and he is styled chancellor. It also elects the secretary of the Institution. In December, 1846, it chose Prof. Joseph Henry, then of Princeton College, as secretary. He served until his death in 1878, when he was succeeded by Prof. Spencer Fullerton Baird, who had been assistant secretary since 1850. He died in 1887, and Prof. Samuel Pierpont Langley became the third secretary. Prof. George Brown Goode is the assistant secretary.

The programme of organization submitted by Professor Henry still constitutes the basis of management. He insisted that it ought to be a rule of the Institution to do nothing which could be equally well done by any organization or instrumentality already in action; but that men of talent and learning should be afforded means for conducting and publishing their researches.

In the matter of research the countenance and aid of the Institution has been given to matters of widest influence and benefit to the race. It issues three series of publications: (1) The Smithsonian Contributions to Knowledge, 4to, consisting of original scientific investigations, in many cases expensively illustrated; (2) The Smithsonian Miscellaneous Collections, 8vo, comprising meteorological and physical tables, treatises on subjects of practical or scientific interest, manuals for the collection and preservation of objects of natural history, methods of various physical observations, etc.; (3) Annual Reports, 8vo, containing reports of proceedings, summaries of progress, bibliographies, and papers on scientific subjects, usually reprints.

The Institution also conducts a system of international exchange, and in this way has become the exclusive means of communication between the literary and scientific

institutions of the Old World and the New. It also carries on a scientific correspondence extending to all parts of the world. It directs the work of the Bureau of Ethnology of the National Museum, of the National Zoological Park, and of the Astrophysical Observatory. It receives also the annual reports of the secretary of the American Historical Association.

The funds of the Institution are deposited permanently in the Treasury of the United States and draw 6 per cent interest. In 1891 it received a bequest of $200,000 from Thomas G. Hodgkins, of New York, one-half of which was to be devoted to the investigation and spread of knowledge concerning all the phenomena of atmospheric air. Its total funds now amount to about $1,000,000.

STATE.

ALABAMA INDUSTRIAL AND SCIENTIFIC SOCIETY.

UNIVERSITY, ALA.

Organized at the University of Alabama, at Tuscaloosa, December 11, 1890.

Objects.—The promotion of scientific examination and the discussion of various questions of interest to the material progress of the State.

First officers.—President, Cornelius Cadle, Blocton; vice-presidents, Thomas Seddon, Birmingham; W. E. Robertson, Anniston; C. P. Williamson, Birmingham; M. C. Wilson, Florence; J. W. Burke, Jacksonville; Horace Harding, Tuscaloosa; secretary, William B. Phillips, University; treasurer, Henry McCalley, University.

Officers, 1895.—President, William B. Phillips, Birmingham; vice-presidents, T. H. Aldrich, Birmingham; L. C. Harrison, Warrior; F. M. Jackson, Brookwood; George B. McCormack, Pratt City; Ernst Prochaska, Birmingham; secretary, Eugene A. Smith, University; treasurer, Henry McCalley, University.

PUBLICATIONS.

Proceedings, annual, 12mo, averaging about 75 pages, with plates and figures. The second part of Vol. IV is now in press.

SOCIETY OF ALASKAN NATURAL HISTORY AND ETHNOLOGY.

SITKA, ALASKA.

Organized October 24, 1887; incorporated April 11, 1888.

Object.—To collect and preserve, in connection with the Sitka Industrial Training School, specimens illustrative of the natural history and ethnology of Alaska, and the publications relating thereto; also to form a museum of Alaskan natural history and ethnology and a consulting library for the Territory.

Founder.—Rev. Sheldon Jackson, D. D.

First officers.—President, William Millmore; secretary and ex officio treasurer, Ida M. Rodgers.

Officers, 1894.—President, John G. Brady; secretary and ex officio treasurer, Cassia Patton.

PUBLICATIONS.

Bulletin, of which three have been issued.

CALIFORNIA ACADEMY OF SCIENCES.

SAN FRANCISCO, CAL.

Organized April 4, 1853; incorporated ——.

Object.—The advancement of science.

Founders.—Henry Gibbons, M. D.; Albert Kellogg, M. D.; T. J. Nevins, Andrew Randall, M. D.; Lewis W. Sloat, John B. Trask, M. D.

Officers, 1895.—President, H. W. Harkness; first vice-president, H. H. Behr; second vice-president, J. G. Cooper; corresponding secretary, George A. Moore; recording secretary, Gulian P. Rixford; treasurer, L. H. Foote; librarian, Carlos Troyer; director of museum, J. Z. Davis; trustees, W. C. Burnett, Charles F. Crocker, D. E. Hayes, E. J. Molera, George C. Perkins, W. S. Chapman, John Taylor.

PUBLICATIONS.

Proceedings, first series, Vols. I–VII. 8vo.
———, second series, Vols. I–IV +. 8vo.
Bulletin, Vols. I–II. 8vo.
Occasional Papers, Vols. I–IV +. 8 vo.

Memoirs, Vols. I–II +. 4to. All issued at irregular intervals.
The academy has a museum, open to the public every day, including Sundays and holidays; about 100,000 visitors during the past year; and a library of over 10,000 volumes of natural history publications.

COLORADO SCIENTIFIC SOCIETY.

DENVER, COLO.

Organized December 8, 1882; incorporated 1885.
Objects.—To promote scientific intercourse, observation, and record in the State of Colorado.
Founders.—Hermann Beeger, P. H. Van Diest, S. F. Emmons, H. M. Hart, W. F. Hillebrand, Richard Pearce, Whitman Cross, Anton Eilers, J. B. Grant, N. P. Hill, A. H. Low, A. von Schulz.
Officers, 1894–95.—Prof. Charles S. Palmer, president; John B. Farish, first vice-president; A. J. Dwight, second vice-president; Franklin Guiterman, recording secretary; P. H. Van Diest, corresponding secretary and librarian; R. M. Hosea, treasurer; executive committee, Richard Pearce, A. A. Blow, P. H. Van Diest, Philip Argall, Irving Hale.

PUBLICATIONS.

Proceedings, Vols. I–IV, 1885–1890, 8vo, averaging about 250 pages each. Since 1891 all papers read are printed in pamphlet form, subject to revision.

NATURAL SCIENCE CLUB OF THE STATE AGRICULTURAL COLLEGE.

FORT COLLINS, COLO.

Objects.—To promote the advancement of science by the discussion and investigation of scientific questions.
Officers, 1894–95.—President, Prof. C. P. Gillette; vice-president, Prof. W. W. Cooke; secretary, Celia May Southworth; treasurer, Charles J. Ryan.

STATE HISTORICAL AND NATURAL HISTORY SOCIETY OF COLORADO.

DENVER, COLO.

Organized and incorporated July 12, 1879.
Objects.—To preserve historical data and found a State museum.
First directors.—Richard Sopris, John Evans, William N. Byers, Roger W. Woodbury, F. J. Bancroft, H. K. Steele, Aaron Gove, William D. Todd, William E. Pabor.
Officers, 1894–95.—F. J. Bancroft, president; William D. Todd, treasurer; Charles R. Dudley, secretary.

CONNECTICUT ACADEMY OF ARTS AND SCIENCES.

NEW HAVEN, CONN.

Organized March 4, 1799; incorporated October, 1799.
Objects.—"To cultivate every art and science which may tend to advance the interest and happiness of a free and virtuous people."
Officers elected October, 1799.—Rev. Timothy Dwight, D. D., president; His Excellency Jonathan Trumbull, vice-president; His Honor John Treadwell, Rev. James Dana, D. D., Dr. Aeneas Munson, Rev. Bela Hubbard, and Chauncey Goodrich, counsellors; Simeon Baldwin, keeper of records; corresponding secretaries, Noah Webster, jr., John C. Smith, Enoch Perkins; Josiah Meigs, librarian; Isaac Beers, treasurer.
Officers, 1894–95.—Prof. William H. Brewer, president; Prof. Charles S. Hastings, vice-president; Prof. Samuel L. Penfield, secretary; publishing committee, Prof. Hubert A. Newton, Prof. George J. Brush, Prof. Addison E. Verrill, Prof. Charles S. Hastings, Prof. Edward S. Dana, Prof. Russell H. Chittenden, Addison Van Name; Addison Van Name, librarian; William W. Farnam, treasurer.

PUBLICATIONS.

Memoirs, Vol. I, 4 pts., 1810–1816. 8vo, pp. 412.
Statistical account of the towns and parishes of the State of Connecticut, Vol. I, 3 pts., 1811–1819. 8vo, pp. xi+124+154.
Transactions, Vol. I–IX, pt. 1, 1866–1892. 8vo, plates.

THE MERIDEN SCIENTIFIC ASSOCIATION.

MERIDEN, CONN.

Organized 1880; incorporated 1887.

Object.—The promotion of science, including geology and paleontology, anthropology, astronomy, botany, geography, mechanics, electrical science, ornithology, conchology, general science, archæology and ethnology, biology, microscopy, zoology, chemistry, technology, entomology, ichthyology, herpetology, necrology.

Incorporators, 1887.—J. H. Chapin, J. T. Pettee, Mrs. J. T. Pettee, Charles H. S. Davis, Albert B. Mather, E. B. Everitt, Robert Bowman, H. H. Kendrick, Mrs. E. B. Kendrick, G. H. Wilson, A. H. Hall, Henry S. Pratt, and Melville A. Stone.

PUBLICATIONS.

Transactions, 4 vols. 8vo.

MIDDLETOWN SCIENTIFIC ASSOCIATION.

MIDDLETOWN, CONN.

Organized March 17, 1871.

Object.—To diffuse information on scientific matters and to promote interest in scientific study among the people of Middletown.

First officers.—President, Prof. John Johnston, LL. D.; vice-president, Rev. F. Gardner, D. D.; corresponding secretary, Prof. W. N. Rice; recording secretary, G. Brown Goode; treasurer, Prof. J. M. Van Vleck.

Officers, 1895.—President, Prof. J. H. Barbour; vice-president, Prof. E. B. Rosa, Ph. D.; corresponding secretary, Prof. M. B. Crawford, M. A.; recording secretary, Prof. W. P. Bradley, Ph. D.; treasurer, A. R. Crittenden.

NEW BRITAIN SCIENTIFIC ASSOCIATION.

NEW BRITAIN, CONN.

Organized December 8, 1881.

Object.—"The design of the New Britain Scientific Association is to afford assistance to its members in the study of science and to encourage in the community an increased interest in the progress and results of scientific investigation."

First officers.—President, Elihu Thomson; vice-president, John H. Peck; secretary and treasurer, Martin S. Wiard; executive committee, Elihu Thomson, John H. Peck, Martin S. Wiard, Henry E. Sawyer, and Albert L. Wiard.

Officers, 1895.—President, James Shepard; vice-president, Albert L. Wiard; secretary and treasurer, Martin S. Wiard; executive committee, James Shepard, Albert L. Wiard, Martin S. Wiard, E. M. Hulbert, William R. Stone, William A. House, Mrs. Annie S. Churchill, Miss C. A. Shepard, and Miss Sarah P. Rogers.

PUBLICATIONS.

Reports, articles in the local newspapers, and a few monographs by some of the individual members.

NATIONAL SCIENCE CLUB.

WASHINGTON, D. C.

Officers, 1895.—Mrs. Rosa Smith Eigenmann, president; Mrs. Almena B. Williams, A. M., vice-president; Miss Isobel Lenman, treasurer; Mrs. Laura O. Talbott, general secretary, 927 P street; Mrs. Edward Goodfellow, recording secretary.

PHILOSOPHICAL SOCIETY OF WASHINGTON.

WASHINGTON, D. C.

Organized at the Smithsonian Institution March 13, 1871.

Object.—The free exchange of views on scientific subjects and the promotion of scientific inquiry among its members.

Founders.—Prof. Joseph Henry, M. C. Meigs, Benjamin Peirce, Theo. Gill, Peter Parker, F. B. Meek, T. R. Peale, William B. Taylor, Charles A. Schott, E. B. Elliott, F. V. Hayden, J. E. Hilgard, J. H. Lane, S. F. Baird, Walter L. Nicholson, William H. Dall, B. F. Greene, S. V. Benét, Horace Capron, Thomas Antisell, J. J. Woodward, J. S. Billings, J. K. Barnes, C. H. Crane, George A. Otis, A. J. Myer, A. A. Humphreys, Asaph

Hall, Simon Newcomb, William Harkness, B. F. Craig, J. H. C. Coffin, Thornton A. Jenkins, George H. Elliot, W. T. Sherman, G. C. Schaeffer, Thomas L. Casey, John G. Parke, B. F. Sands, A. B. Dyer, J. B. Wheeler, A. B. Eaton, Elisha Foote, S. P. Chase.

First officers.—President, Joseph Henry; vice-presidents, M. C. Meigs, J. E. Hilgard, Horace Capron, William B. Taylor; treasurer, Peter Parker; secretaries, B. F. Craig, Theodore Gill.

Officers, 1895.—Secretary, W. C. Winlock.

PUBLICATIONS.

Bulletin, 8vo., published with the cooperation of the Smithsonian Institution.

SOCIETY FOR PHILOSOPHICAL INQUIRY.

WASHINGTON, D. C.

Organized January 20, 1893.

Object.—The discussion of problems or questions in philosophy.

First officers.—President, Dr. J. McBride Sterrett; secretary, Dr. Edward Farquhar; corresponding secretary and treasurer, E. A. Playter.

Officers, 1896.—Same as above.

CHICAGO ACADEMY OF SCIENCES.

LINCOLN PARK, CHICAGO, ILL.

Organized 1857; incorporated 1865.

Object.—The promotion and diffusion of scientific knowledge by the reading and publication of original papers and by the maintenance of a library and museum.

Founders.—Drs. J. V. Z. Blaney, N. S. Davis, J. W. Freer, C. Helmuth, H. A. Johnson, E. Andrews, H. Parker, F. Scammon, R. K. Swift, J. D. Webster, E. W. Blatchford, H. W. Zimmermann.

Officers.—President, Dr. Selim H. Peabody; vice-president, T. C. Chamberlin; secretary, Frank C. Baker; treasurer, Charles F. Gunther; trustees, C. M. Higginson (president), E. W. Blatchford, W. C. Egan, John J. Geer, C. F. Gunther, Dr. S. J. Jones, Prof. J. H. Long, H. W. Thomas, Joseph R. Putnam, George C. Walker, Andrew Crawford (ex officio), and Dr. S. H. Peabody.

The various sections for the work of the academy and the officers of each are as follows:

Astronomy and mathematics—George W. Hough, LL. D., chairman; T. J. J. See, Ph. D., recorder. Photography—Gayton A. Douglass, chairman; A. W. Watriss, recorder. Chemistry—John H. Long, Sc. D., chairman; C. L. Kennicott, recorder. Geology—Charles H. Gordon, M. Sc., chairman; Charles S. Raddin, M. Sc., recorder. Microscopy—Lester Curtis, M. D., chairman; Frank L. Morse, M. A., recorder. Pathology—Weller Van Hook, M. D., chairman; Louis J. Mitchell, M. D., recorder. Entomology—W. E. Longley, chairman; A. J. Snyder, recorder. Biology—To be organized. Curator of museum, Frank C. Baker; ornithologist and assistant curator, Frank M. Woodruff.

PUBLICATIONS.

Transactions, Vol. I, 1867–1869, 4to, pp. 337, pls. 34; Vol. II, 1870, pp. 24, pl. 1.
Bulletins, Vol. I, 1883–1886, 10 Nos., 8vo., pp. 127, 20 cuts, pls. 6; Vol. II, No. 1, 1891, 8vo., pp. xxiv, 168, 2 cuts, pl. 1.

ELGIN SCIENTIFIC SOCIETY.

ELGIN, ILL.

Organized February 4, 1876; incorporated January 6, 1881.

Objects.—(1) The intellectual culture and entertainment of its members by lectures, essays, discussions, and conversation upon the sciences, history, art, metaphysics, or any other topic in which its members may feel an interest; (2) the collection of books, works of art, relics, and natural specimens of all kinds of an educational and entertaining nature; (3) the collection and preservation of facts pertaining to the history of Elgin and vicinity, with a view to their future publication; (4) the erection and maintenance of a memorial hall for the accommodation of the society and the preservation of its collections and archives.

First officers.—Dr. Joseph Tefft, president; James Dangerfield, vice-president; S. E. Weld, secretary; Dr. W. H. Truesdell, treasurer; Dr. A. L. Clark, Prof. W. H. Brydges, and (ex officio) Dr. Joseph Tefft, executive committee. August 21, 1876, the name was changed to "The Elgin Scientific and Historical Society."

At the regular meeting, held April 8, 1878, a committee, consisting of Dr. Joseph

Tefft, Julia Moran, M. H. Thompson, John B. Newcomb, and May Larkin, was appointed to collect information and compile a history of Elgin.

Officers, 1894.—James Dangerfield, president; William G. Todd, vice-president; T. W. O'Connor, secretary; W. H. Brydges, treasurer.

The society is now reorganizing for work; for several years it was idle, and S. E. Weld, one of the founders, kept it alive by his own personal exertions. Because of a legacy recently left to the society by one of its late members, it has been revived. It owns a building and quite a collection of specimens, geological and fossil, also historical data and a fine collection of shells and corals. Its present home is a suite of rooms in the Spurling Block.

THE PEORIA SCIENTIFIC ASSOCIATION.

Peoria, Ill.

Organized April 17, 1875; incorporated October 24, 1892.

Object.—To increase a knowledge of science among its members and to awaken a spirit of scientific investigation among the people.

Founders.—W. N. Chapman, M. D., president; Mrs. Clara P. Bourland, first vice-president; J. T. Stewart, M. D., second vice-president; Fred. Brendel, M. D., third vice president; Miss Emma A. Smith, recording secretary; Prof. S. H. White, corresponding secretary; Sidney Pulsifer, treasurer.

Officers, 1894.—J. T. Stewart, M. D., president; B. L. T. Bourland, first vice-president; Deloss S. Brown, second vice-president; A. W. Bushnell, third vice-president; O. B. Will, M. D., corresponding secretary; Lysander Cassidy, recording secretary; Alice A. Barnhart, treasurer and curator.

PUBLICATIONS.

Shade Trees, Indigenous Shrubs and Vines, by J. L. Stewart, M. D., 1883; second edition, Bulletin of the Association, 1887.

THE PRINCETON ACADEMY OF SCIENCES.

Princeton, Ill.

Organized December 30, 1881; incorporated January 23, 1882.

Object.—The advancement and promotion of scientific knowledge.

First officers.—President, Rev. J. M. Mayall; vice-president, F. M. Herrick; recording secretary, J. R. Earnest; corresponding secretary, Prof. Jacob Miller; treasurer, Dr. W. H. Lackman.

Officers, 1891.—President, Simon Elliott; vice-president, Mrs. A. L. Davis; recording secretary, Mrs. Rosetta Davis; corresponding secretary, Miss Mary Heaton; treasurer, Prof. Jacob Miller.

INDIANA ACADEMY OF SCIENCE.

Brookville, Ind.

Organized December, 1885; incorporated 1886.

Object.—Advancement of science in Indiana.

First officers.—President, Prof. D. S. Jordan; vice-presidents, Prof. J. M. Coulter, Prof. J. P. D. John, Prof. J. C. Branner; secretary, A. W. Butler; treasurer, Prof. O. P. Jenkins.

Officers, 1894.—President, A. W. Butler; vice-president, Prof. Stanley Coulter; secretary, John S. Wright; treasurer, Prof. W. P. Shannon.

PUBLICATIONS.

Proceedings, 1891, 1892, 1893.

LA PORTE LIBRARY AND NATURAL HISTORY ASSOCIATION.

La Porte, Ind.

Organized 1863; incorporated 1868.

Object.—To give lectures, to have a library, reading room, and cabinet of specimens illustrating the natural sciences, etc.

Founders.—L. Crane, Dr. George M. Dakin, C. G. Powell, William M. Scott, H. B. Weir, John M. Hoad, J. P. Ash, J. H. Lee, W. L. McKahan.

Officers, 1894.—President, Dr. George M. Dakin; vice-president, William Niles; secretary, W. B. Biddle; treasurer, August Davidson; board of directors (with the above), Polaski King, L. D. Webber, Adele K. Howe, Myra T. Bradley, Mrs. Case.

THE IOWA ACADEMY OF SCIENCE.

DES MOINES, IOWA.

Organized September 27, 1887, as the Iowa Association of Science for Scientific Research; name changed in September, 1888.

Object.—To encourage scientific work in Iowa.

Charter members.—Prof. S. Calvin, Dr. B. D. Halsted, Dr. C. M. Hobby, Prof. C. C. Nutting, Prof. H. W. Parker, Dr. H. S. Williams, Dr. Launcelot W. Andrews, Prof. R. E. Call, Prof. T. H. McBride, Prof. Herbert Osborn, Prof. J. E. Todd, Prof. F. M. Witter.

First officers.—President, Prof. Herbert Osborn; first vice-president, Prof. J. E. Todd; second vice-president, Prof. T. H. McBride; secretary and treasurer, Prof. R. E. Call; executive committee, the officers ex officio and Dr. Launcelot W. Andrews, Prof. H. W. Parker, Prof. F. M. Witter.

Officers, 1894–95.—President, Prof. H. U. Norris; first vice-president, C. R. Keyes; second vice-president, T. Proctor Hall; secretary and treasurer, Herbert Osborn; executive committee, Prof. N. E. Hansen, H. W. Norton, T. H. McBride; librarian, H. Foster Bain.

PUBLICATIONS.

Proceedings, Vol. I, 1887–1893; Vol. II, 1894. 8vo.

MUSCATINE ACADEMY OF SCIENCES.

MUSCATINE, IOWA.

Organized 1870; incorporated 1877.

Object.—The promotion of science.

First officers.—President, H. H. Benson; secretary, F. M. Witter.

Officers, 1894.—President, Hon. Samuel McNutt; recording secretary, Silvan Plumly; corresponding secretary, F. M. Witter; curator, F. Reppert; treasurer, J. P. Walton; trustees, Dr. F. H. Little, William Hoffman, R. W. Leverich.

A publication in quarto form is issued.

KANSAS ACADEMY OF SCIENCE.

TOPEKA, KANS.

Organized at Topeka, September 1, 1868, under the name of "Kansas Natural History Society." At Leavenworth, at its fourth annual meeting October 26, 1871, the name was changed to "Kansas Academy of Science." On March 3, 1873, by act of the legislature, it was made a coordinate department of the Kansas State board of agriculture, and has so continued to the present day.

Object.—To increase and diffuse a knowledge of the natural sciences, particularly in relation to the State of Kansas.

Founders.—Rev. J. D. Parker, Chancellor John Fraser, Prof. D. H. Robinson, Prof. B. F. Mudge, Prof. F. W. Bardwell, Prof. J. H. Carruth, Prof. J. R. Swallow, Prof. Frank H. Snow, Rev. Dr. Peter McVicar, Rev. Richard Cordley, Prof. J. S. Whitman, Mr. John A. Banfield, Mr. D. Brockway, Mr. W. J. Stringham, and others.

First officers, 1868.—President, B. F. Mudge; vice-president, J. S. Whitman; secretary, John D. Parker; treasurer, Frank H. Snow; curator, John A. Banfield.

First officers of Kansas Academy of Science, 1871.—President, John Fraser, vice-presidents, B. F. Mudge and Robert J. Brown; secretary, John D. Parker; treasurer, Frank H. Snow; curators, B. F. Mudge and F. H. Snow.

Officers, 1895.—President, Warren Knaus, McPherson; vice-presidents: I. D. Graham, Manhattan; S. W. Williston, Lawrence; secretary, E. B. Knerr, Atchison; treasurer, D. S. Kelly, Emporia; librarian, B. B. Smyth, Topeka; curators, A. H. Thompson, Topeka; B. B. Smyth, Topeka; Robert Hay, Junction City.

PUBLICATIONS.

Transactions, Vols. I–XIII+, 1872-1892, 8vo., averaging about 110 pages each.

TOPEKA PHILOSOPHICAL SOCIETY.

TOPEKA, KANS.

Society first organized in 1871 under the name of "Topeka Scientific Institute." Officers that year: President, Col. William Tweeddale; vice-president, P. I. Mulvane, M. D.; secretary, A. H. Thompson, D. D. S.

Reorganized in 1878 under name of "Topeka Scientific and Literary Club."

Officers: President, William Tweeddale; vice-president, Prof. L. A. Thomas; secretary, George S. Chase; treasurer, J. Lee Knight.

Reorganized in 1881 under name of "Topeka Scientific Club." President, Prof. John T. Lovewell; secretary, George S. Chase.

Reorganized in 1885 under name of "Topeka Scientific Society." President, Henry W. Roby, M. D.; secretary, George S. Chase.

Reorganized in 1888 under name of "Topeka Society of Natural History." President, Dr. A. H. Thompson; secretary and treasurer, B. B. Smyth.

Name changed in 1890 to "Topeka Society of Natural Sciences." President, George D. Hale; vice-president, Prof. F. W. Cragin; secretary and treasurer, B. B. Smyth. Membership, 19. Suspended in July, 1892.

Reorganized in 1894 under name of "Topeka Philosophical Society." President, Dr. A. H. Thompson; vice-presidents, Prof. J. T. Lovewell and J. C. Cooper; secretary and treasurer, B. B. Smyth. Membership, 55.

Object.—To increase and diffuse knowledge in the various departments of science.

THE POLYTECHNIC SOCIETY OF KENTUCKY.

LOUISVILLE, KY.

Organized December 9, 1876; incorporated April 10, 1878.

Originally organized as a social scientific-literary club. Its objects are declared by the revised charter to be "the cultivation and diffusion of knowledge by maintaining a free reference library, a circulating library, and courses of popular lectures; by collecting, preserving, and arranging in its libraries and cabinets whatever may illustrate history, science, literature, the arts, or other branches of useful knowledge, and especially the history, topography, geology, paleontology, zoology, botany, mineralogy, and the sociology and industries of Kentucky, and by organizing and maintaining, as may be deemed expedient, academies or classes in science, art, literature, philosophy, and technology."

Founders.—Prof. Noble Butler, Dr. F. M. Byington, Dr. T. S. Bell, Prof. P. A. Towne, Dr. Emory Alfred Grant, Dr. Thomas Page Grant, Andrew McDonald, Dr. Thomas E. Jenkins, Dr. J. R. Buchanan, John W. Williamson, Maj. W. J. Davis, Prof. Thomas W. Tobin.

First officers.—President, Dr. T. S. Bell; vice-president, Prof. J. W. Chenault; secretary, Dr. Thomas E. Jenkins; treasurer, Andrew McDonald.

Officers, 1895.—President, Col. Bennett H. Young; vice-president, John Stites; secretary, Dr. Emory Alfred Grant; treasurer, William T. Grant.

PUBLICATIONS.

Annual reports. 8vo. Catalogues of the library, which numbers nearly 50,000 volumes.

NEW ORLEANS ACADEMY OF SCIENCES.

NEW ORLEANS, LA.

Organized 1853; incorporated 1856.

Object.—To advance science in all its departments.

Founders.—Howard Smith, M. D.; Josiah Hale, M. D.; Noah B. Benedict, M. D.; H. D. Baldwin, M. D.; William B. Lindsay, M. D.; Albert W. Ely, M. D.; J. S. Copes, M. D.; J. C. Simonds, M. D.; Edward C. Bolton; I. L. Crawcour, M. D., M. R. C. S. E.; D. F. Mitchel; Henry Hughes; Prof. William C. Duncan, A. M.; Prof. R. H. Chilton; W. P. Riddell, A. B.; Rev. William A. Scott, D. D.; Prof. J. L. Riddell, A. M., M. D.; Rev. Alex. Campbell, D. D.; Erastus Everett, A. M.; Rev. Isaac J. Henderson; Duncan Macgibbon, M. D.; Bennet Dowler, M. D.; Prof. E. H. Barton, A. M., M. D.; J. M. W. Picton, M. D.; Albert G. Blanchard, C. E.; Caleb G. Forshey, C. E.; F. M. Corry.

Officers, 1853.—President, Josiah Hale, M. D.; first vice-president, J. S. Copes, M. D.; second vice-president, Albert W. Ely; corresponding secretary, I. L. Crawcour, M. D.; recording secretary, William B. Lindsay, M. D.; treasurer, Henry Hughes; librarian, Edward C. Bolton; curator, D. F. Mitchell.

Officers, 1895.—President, Prof. B. V. B. Dixon, A. M., LL. D.; vice-president, B. M. Harrod, C. E.; corresponding secretary, Prof. A. Fortier, D. Lt.; recording secretary, S. P. Delaup, M. D.; treasurer, William O. Rogers, LL. D.; librarian, Prof. Charles G. Gill, A. M., Ph. D.

PUBLICATIONS.

L. von Reizenstein. Catalogues of the Lepidoptera of New Orleans and its vicinity, 1863. 24mo, pp. 10.

Sarah A. Dorsey. Philosophy of the University of France, 1874. 8vo, pp. 24.

E. W. Hilgard. Supplementary and final report of a Geological Reconnaissance of State of Louisiana in 1869; 1869. 8vo, pp. 44.
Papers read before New Orleans Academy of Sciences, Vol. I, No. 1, 1887, 8vo, pp. 124; Vol. I, No. 2, 1888, pp. 172.

KENNEBEC NATURAL HISTORY AND ANTIQUARIAN SOCIETY.

AUGUSTA, ME.

Organized 1890; incorporated May 7, 1891.

Objects.—The collection of local historical data, the collection of specimens in natural history, and the preservation of articles of antiquarian interest.

First officers.—W. Scott Hill, M. D., president; Samuel L. Boardman, vice-president; Frank T. Noble, secretary; E. C. Dudley, treasurer; Charles C. Willoughby, librarian.

Officers, 1894.—Henry F. Beauchard, president; F. L. Noble, vice-president; Melville Smith, secretary; O. C. Webster, treasurer; Charles E. Nash, librarian; members of the council, W. Scott Hill, George W. Vickery, S. L. Boardman, and David T. Neal.

YORK INSTITUTE.

SACO, ME.

Organized March 22, 1866.

Objects.—To promote the study of natural history, to encourage science and art; also to collect and preserve whatever relates to the natural and civil history of the county of York.

Incorporators.—John Johnson, Charles H. Granger, George A. Emery, George F. Calef, and John Hanscom.

First officers.—John Johnson, president; Stephen L. Goodale, first vice-president; Roscoe G. Dennett, second vice-president, John Hanscom, secretary; George A. Emery, librarian; George F. Calef, treasurer; Charles H. Granger, superintendent of museum.

Officers, 1894.—John S. Locke, president; George A. Carter, James O. Bradbury, vice-presidents; Edward P. Burnham, treasurer; George A. Emery, secretary; W. S. Dennett, librarian; Dr. M. W. Follansbee, superintendent of museum.

MARYLAND ACADEMY OF SCIENCES.

BALTIMORE, MD.

After several previous unsuccessful attempts to organize, in the city of Baltimore, an association for the promotion of science, in the year 1819 a few gentlemen formed a society, which met in an humble room over a stable, in the rear of the houses on the northwest corner of Lexington and St. Paul streets. Among its members were Robert Gilmor and Drs. Ducatel, Frick, George Williamson, and Macaulay. Notwithstanding the zeal of its members, the society was very short lived. Its funds, however, were carefully husbanded; and, subsequently, amounting to over $1,200, they were given to the academy, which was formed in 1822. This was the first successful attempt to establish a scientific institution. Dr. L. H. Gerardin, a distinguished French savant, who was also principal of Baltimore College, was chosen as the first president. He died in the year 1825. During his presidency, the academy met at Baltimore College, and subsequently over the post-office, at the northeast corner of Fayette and North streets.

On February 16, 1826, the members were incorporated under the name of the "Maryland Academy of Science and Literature." After this, the academy removed to the athenæum, at the southwest corner of Lexington and St. Paul streets. Here the collections were greatly increased, a valuable museum was formed, and the members were active and zealous till the year 1834, when the building, and with it the greater part of the library and collections of the academy, were destroyed by fire. In 1836 the academy was again revived, and the meetings were held over the post-office, in its old room. Dr. Patrick Macaulay was chosen president. In 1837 was published the first and only volume of the Transactions of the Maryland Academy of Science and Literature. After a short and languishing existence of about eight years, the academy was dissolved in 1844, and its books and collections were distributed among its members. After 1844, unless we except the Geological and Phrenological Societies, nothing was attempted in Baltimore for the cultivation of science. Both these associations were very short lived. On May 7, 1855, the Maryland Historical Society established a "committee on natural history." This committee met at the rooms of the Historical Society every fortnight until the close of the year 1862. On January 22, 1863, a meeting was held at the house of Philip T. Tyson, and

the present academy was organized by the adoption of a constitution, and the election of Mr. Tyson as its president. The meetings of the academy were held every fortnight at the house of some member of the academy until April, 1867, when they were held at the building of the faculty of Art and Sciences of the University of Maryland, No. 32 Mulberry street. On March 15, 1867, the academy was incorporated under the name of the "Maryland Academy of Sciences."

"The object of the academy shall be to promote scientific research, and to collect, preserve, and diffuse information relating to the sciences, especially those which are connected with the natural history of Maryland." (Constitution.)

Incorporators, 1867.—Philip T. Tyson, John G. Morris, Edwin A. Dalrymple, Charles C. Bombaugh, John Fonerden, Christopher Johnston, W. E. A. Aiken, John R. Uhler, Philip Uhler, G. Lane Taneyhill, G. A. Leakin, W. H. Letterman, John W. Lee, George Popplein.

Officers, 1867.—President, Philip T. Tyson; vice-president, Rev. John G. Morris, D. D.; corresponding secretary, Rev. Edwin A. Dalrymple, D. D.; recording secretary, Charles C. Bombaugh, M. D.; treasurer, John W. Lee; librarian, A. Snowden Piggot, M. D.; curator, P. R. Uhler; assistant curator, M. T. De Rosset, M. D.

THE SCIENTIFIC ASSOCIATION OF THE JOHNS HOPKINS UNIVERSITY.

BALTIMORE, MD.

Organized October 24, 1877.

Objects.—It is an association of the members of the scientific departments of the university, for the purpose of keeping those connected with any one of the departments informed as to the work being done in kindred subjects. Meetings are held monthly, at which papers are read, including (1) presentation of brief papers on the work going on in the different departments; (2) résumés of important articles on scientific subjects.

First officers.—President, Prof. J. J. Sylvester; vice-president, Prof. Ira Remsen; secretary, Dr. William E. Story.

Officers, 1895.—President, Prof. Ira Remsen; vice-president, Prof. William H. Howell; secretary, Dr. Charles L. Poor.

PUBLICATIONS.

Abstracts of many of the papers read before the association may be found in the "University Circulars," a publication issued by the university at irregular intervals during the academic year. Many have also appeared in various scientific journals, where they are published by the author, not by the society.

AGASSIZ ASSOCIATION.

PITTSFIELD, MASS.

Organized 1875; incorporated 1892.

Objects.—Its purpose is to encourage the personal observation of nature, and to stimulate and direct that sort of original scientific study which was pursued by Louis Agassiz from his boyhood to his death. It is the aim of the local branches or "chapters" to make collections of the plants, animals, or minerals of their immediate neighborhood, and to learn what they can regarding the specimens they collect, or to study together some branch of science.

Founder.—Harlan H. Ballard.

Incorporators, 1892.—Harlan H. Ballard, W. R. Plunkett, Edward T. Slocum, George H. Tucker, J. F. A. Adams, Henry W. Bishop, Zenas Crane, James M. Barker, H. E. Deats, Alpheus Hyatt.

Officers, 1895.—President, H. H. Ballard; treasurer, Mrs. George H. Tucker; secretary, G. T. Slocum.

Since 1875 the Agassiz Association has spread from a school in Lenox, Mass., to every part of the world. It has established more than 1,500 branch societies in as many different towns with a total membership of more than 20,000.

PUBLICATIONS.

The Observer.

THE BOSTON SCIENTIFIC SOCIETY.

BOSTON, MASS.

Organized in June, 1876, under the name "Boston Amateur Philosophical Association." This was changed to "Boston Amateur Scientific Society," and in December, 1878, the present title was adopted. Incorporated September, 1879.

At the time of its establishment the society claimed to have no objects other than the study of matters scientific and the diffusion of knowledge. It has developed into an association of active investigators, and the papers presented before it are largely reports of progress in original research.

Founders.—Prof. George H. Barton, Edwin F. Sawyer, George H. Elson, Dr. S. C. Chandler, William Bellamy, Edward E. Norton, Dr. Samuel Garman, and John Ritchie, jr.

Officers, 1894.—President, Frank A. Bates; secretary, W. D. Grier; corresponding secretary, John Ritchie, jr.; treasurer, Edward E. Norton.

PUBLICATIONS.

The Science Observer, 50 numbers, 1877–1886. 8vo.

Science Observer special circulars, devoted to early information concerning comets, their discovery and orbits. These number 105, from 1878–1894, and are 8vo broadsides.

Science Observer international circulars, Nos. 1–38, 1882–1894. 8vo broadsides. These are European comet circulars, distributed from Berlin as a center. The contents are selected from the American circulars and transmitted by cable.

Occasional publications, No. 1. The Science Observer Code, S. C. Chandler, jr., and J. Ritchie, jr., Boston, 1888. 4to, pp. 250.

CAPE ANN SCIENTIFIC AND LITERARY ASSOCIATION.

GLOUCESTER, MASS.

Organized March 22, 1875; incorporated April 26, 1876.

Objects.—The local and general advancement of scientific and literary knowledge.

First officers.—President, Dr. Herman E. Davidson; first vice-president, J. W. Allard; second vice-president, Miss Sarah G. Duley; recording secretary, Rev. Minot G. Gage; corresponding secretary, Rev. Richard Eddy; treasurer, Maj. David W. Low; managers, Col. J. H. French, Dr. E. E. Barden, Gorham P. Low, jr., Mrs. Maria H. Bray, Henry C. Hallowell.

Officers, 1894.—President, Dr. Thomas Conant; vice-presidents, Dr. George Morse, Mrs. Maria H. Bray; treasurer, Maj. David W. Low; recording secretary, Miss Sarah G. Duley; corresponding secretary, Miss Sarah E. Ellery; managers, Mrs. H. M. Tappan, Miss Sarah G. Duley, Mrs. Charles H. Pew, Mrs. William H. Jordan, D. E. Woodbury.

ESSEX INSTITUTE.

SALEM, MASS.

Organized March 1, 1848; incorporated February, 1848.

Objects.—The collection and preservation of whatever relates to the geography, antiquities, and civil and ecclesiastical history of Essex County; the formation of a cabinet of natural productions in general, and more particularly those of the county; the promoting a taste for the cultivation of choice fruits and flowers.

The Essex Institute was formed mainly through the influence of Henry Wheatland by the union of the Essex Historical Society and the Essex County Natural History Society. To effect this end the two societies held several meetings during the autumn of 1847, and it was finally accomplished on January 14, 1848. The 3 departments of the institute were then history, natural history, and horticulture. Its scope has been from time to time enlarged, and there are now departments of history, science, literature, art, and horticulture.

First officers.—President, Daniel A. White; vice-presidents, John G. King, John L. Russell, John C. Lee; secretary and treasurer, Henry Wheatland.

Officers, 1894.—President, E. B. Willson; secretary, H. M. Brooks; treasurer, William O. Chapman; librarian, C. S. Osgood.

The library of the institute, which in 1848 numbered 1,500 volumes, now numbers 51,000 volumes, and embraces all the departments of literature, but is mostly useful for reference. A reading room is the latest addition to the library department, and this is well supplied with historical, scientific, and art periodicals, besides the usual magazine literature of the day. The museum now contains a large and valuable collection of antiquarian and historical relics, portraits, paintings, engravings, medals, coins, paper currency, manuscripts, etc., and is in process of systematic arrangement.

The scientific collections, which, before 1867, had grown to be so large and of such value that it was impossible for the institute at that time to bear the expense of properly caring for and exhibiting them, were, by agreement entered into between the institute and the trustees of the Peabody Academy of Science in May, 1867, deposited with the last-named institution, where, properly labeled, arranged, and preserved, they are made available.

PUBLICATIONS.

In the work of publishing the institute has been joined by the Peabody Academy of Science. For publications of the institute see report of American Historical Association, 1892, and also its "Partial Catalogue" of publications in history, genealogy, archæology, geology, botany, zoology, sociology, etc. Salem, 1894.

PEABODY ACADEMY OF SCIENCE.

SALEM, MASS.

Organized 1868.

Object.—The promotion of science and useful knowledge in the county of Essex.

The trustees of the Peabody Academy of Science received funds by gift in 1867 from George Peabody, of London, by birth a son of Essex County, for the "promotion of science and useful knowledge in the county of Essex." Under the instrument of trust, East India Marine Hall (erected by the East India Marine Society in 1824) was purchased and refitted, and the museum of the East India Marine Society (begun in 1799) and the natural history collections of the Essex Institute (begun in 1834), received by the trustees as permanent deposits, were placed therein. To this foundation have been added many valuable collections since received by the trustees.

Officers, 1894.—Edward S. Morse, director; John Robinson, treasurer, in charge of the museum; John H. Sears, curator, mineralogy and geology; janitor, J. Russell Treadwell; trustees, William C. Endicott, president; Abner C. Goodell, jr., secretary; John Robinson, treasurer; S. Endicott Peabody, Henry L. Higginson, George Cogswell, Elihu Thompson.

PUBLICATIONS.

Memoirs, Nos. 1–6, 1869–1881, averaging about 32 pages each, with plates. 4to.
Reports, I–VI, 1869–1874, 8vo, averaging about 100 pages each.
Special publications, Primitive Industry, by Charles C. Abbott, 1881. 8vo, pp. 429.
For the purposes of publication, etc., this society has united with the Essex Institute.

DETROIT SCIENTIFIC ASSOCIATION.

DETROIT, MICH.

Organized April 16, 1874; incorporated May 5, 1874.

Object.—To promote scientific study and establish a museum and library, courses of lectures, etc.

First officers.—Dr. George P. Andrews, president; Eugene C. Skinner, John M. B. Sill, John C. Holmes, Henry Gillman, Charles C. Cadman, Frederick Stearns, Collins B. Hubbard, D. Farrand Henry, vice presidents; Albert B. Lyons, secretary.

Officers, 1895.—President, J. C. Holmes (deceased); vice-president, E. C. Skinner; secretary and treasurer, Bryant Walker.

THE MINNESOTA ACADEMY OF NATURAL SCIENCES.

MINNEAPOLIS, MINN.

Organized January 6, 1873; incorporated September 14, 1875.

Objects.—To observe and investigate natural phenomena; to make collections of specimens illustrating the various departments of science; to name, classify, and preserve the same; to discuss such questions as shall come within the province of the association.

Incorporators.—Alfred E. Ames, S. C. Gale, A. E. Johnson, William H. Leonard, C. E. Rogers, M. D. Stoneman, Charles Simpson, Adolphus F. Elliot, N. H. Winchell, A. W. Williamson, E. W. B. Harvey.

First officers.—President, A. E. Johnson; vice-president, S. C. Gale; secretary, Charles Simpson; corresponding secretary, A. E. Ames; treasurer, E. W. B. Harvey; trustees, Paris Gibson, C. E. Rogers, W. H. Leonard, A. F. Elliot, O. V. Tonsley, M. D. Stoneman.

Officers, 1895.—President, H. L. Osborne; vice-president, W. X. Sudduth; secretary, C. W. Hall; corresponding secretary, Charles P. Berkey; treasurer, Edw. C. Yale; trustees, C. W. Hall, Thomas S. Roberts, Verdun Truesdell, W. H. Leonard, T. B. Walker, H. V. Winchell.

PUBLICATIONS.

Bulletin, Vol. I, 1874–1879; Vol. II, 1880–1885; Vol. III, 1889–1891. 8vo.
Occasional papers, Vol. I, No. 1, 1894. 4to.

THE ACADEMY OF SCIENCES, OF ST. LOUIS.

St. Louis, Mo.

Organized March 10, 1856; incorporated January 17, 1857.

Object.—The promotion of science.

Founders.—George Engelmann, Hiram A. Prout, Moses M. Pallen, Benjamin F. Shumard, Charles A. Pope, William H. Tingley, James B. Eads, William M. McPheeters, Simon Pollak, and others.

First officers.—George Engelmann, president; Hiram A. Prout, first vice-president; Nathaniel Holmes, second vice-president; Benjamin F. Shumard and William H. Tingley, secretaries; James B. Eads, treasurer.

Officers, 1895.—John Green, president; A. W. Douglass, secretary; Enno Saunder, treasurer; Allerton Cushman, corresponding secretary.

PUBLICATIONS.

Transactions, Vols. I-V+1857-1891, 8vo, about 650 pages each. Vol. VI is in course of publication.
Contributions to the archæology of Missouri. 4to.
Report of the Washington University Eclipse Expedition. 4to.

KANSAS CITY ACADEMY OF SCIENCE.

Kansas City, Mo.

Reorganized November, 1888.

Object.—The study of science in all departments.

First officers.—President, Prof. Edwin Walters; vice-president, Edwin Butts, C. E.; corresponding secretary, D. H. Todd; recording secretary, Sid J. Hase; treasurer, E. T. Kime; librarian, F. McIntosh; curator, E. Boyed Smith.

Officers, 1896.—President, Joseph Sharp, M. D.; vice-president, Edwin Walters, M. E.; corresponding secretary, David H. Todd; recording secretary, Sid J. Hase, C. E.; treasurer, Thomas Roundtree; librarian, M. Auerbuckels; curator, Edwin Butts, C. E.

PUBLICATIONS.

The Kansas City Scientist.

NEBRASKA ACADEMY OF SCIENCES.

Lincoln, Nebr.

Organized January 1, 1891.

Object.—The diffusion of knowledge.

First officers.—I. S. Kingsley, president; G. D. Swezey, vice-president; W. E. Taylor, secretary; L. Bruner, custodian; W. H. Skinner, Mrs. E. G. Nettleton, directors.

Officers, 1895.—A. W. Norton, Peru, president; W. S. Skinner, Nebraska City, vice-president; G. D. Swezey, Lincoln, secretary; H. B. Lowry, Lincoln, A. T. Bell, Crete, directors.

PUBLICATIONS.

Nos. I-IV, 1891-1894. 8vo, pp. 8, 24, 33, 22.

BURLINGTON COUNTY LYCEUM OF HISTORY AND NATURAL SCIENCES.

Mount Holly, N. J.

Organized July 4, 1859; incorporated February 7, 1860.

Objects.—The collection of statistics of history, the encouragement and cultivation of the sciences, the advancement of useful learning, and the establishment, maintenance, and increase of a circulating library.

The founders and first officers.—President, Edward Harris, Moorestown; vice-presidents, Samuel Bullock, Westhampton, and James Lippincott, jr., Mount Holly; recording secretary, Charles E. Aaron; corresponding secretary, Eugene Schumo; treasurer, Charles H. Hollinshead; librarian, John P. Burnett; curators, George C. Brown, W. H. B. Thomas, S. H. Shreve, E. Schumo, C. E. Aaron, Andrew Davis, John P. Scholfield.

Officers, 1894.—President, Charles Ewan Merritt; vice-presidents, Henry I. Budd and Franklin B. Levis; recording secretary, B. F. Haywood Shreve; corresponding secretary, Caleb D. Shreve; treasurer, Joseph C. Cowgill; librarian, William T. Harding; trustees of library, Charles Ewan Merritt, Franklin B. Levis, Henry I. Budd, Clifford Stanley Sims, B. F. Haywood Shreve, John R. Howell, and Isaac R. Pennypacker.

ALBANY INSTITUTE.

ALBANY, N. Y.

Organized 1824; incorporated 1829.

Object.—Promotion of science and literature.

First officers.—President, Stephen Van Rensselaer; vice-presidents, Simeon De Witt and Theodore Romeyn Beck; treasurer, William Mayell.

Officers, 1894.—President, Leonard Kip, LL. D., L. H. D.; vice-presidents, Verplanck Colvin, Joseph A. Lintner, Ph. D., and William L. Learned, LL. D; treasurer, Sidney W. Rowell; recording secretary, George R. Howell; corresponding secretary, Ernest J. Miller.

PUBLICATIONS.

Transactions, Vols. I-XII, 1830-1893. 8vo.
Proceedings, Vols. I-III. 8vo.
Field meetings, 1870-1875, 1876. 8vo, pp. 180.
Manual of the Institute, by D. J. Pratt, 1870. 12mo, pp. 8.
Manual of the Institute, 1889. 8vo, pp. 37.

THE BINGHAMTON ACADEMY OF SCIENCE.

BINGHAMTON, N. Y.

Organized November 24, 1894; incorporated December, 1895.

Objects.—The promotion of scientific study and research.

First officers.—E. R. Whitney, president; Herbert J. Jones, vice-president; Willard N. Clute, recording secretary; Dudley T. Greene, corresponding secretary; Fannie Webster, treasurer; executive council, Addison Ellsworth, Arthur T. Vance, and Norman M. Pierce.

Officers, 1895-96.—E. R. Whitney, president; Herbert J. Jones, vice-president; Willard N. Clute, recording secretary; Burt. E. Nelson, corresponding secretary; Joseph K. Noyes, treasurer; executive council, Albert Leonard, Mrs. Kate M. Ely, and Anna H. Smith.

THE BROOKLYN INSTITUTE OF ARTS AND SCIENCES.

BROOKLYN, N. Y.

Organized August 23, 1823; incorporated, November 24, 1824, as The Apprentices' Free Library of Brooklyn; rechartered as The Brooklyn Institute in 1843; rechartered as The Brooklyn Institute of Arts and Sciences, April 23, 1890.

Objects.—The establishment and maintenance of museums and libraries of art and science; the encouragement of the study of the arts and sciences and their application to the practical wants of man; the advancement of the knowledge in science and art, and in general to provide the means of popular instruction and enjoyment through collections, libraries, and lectures.

The founder of the institute was Augustus Graham, who died in 1851.

Officers, 1895.—Board of directors: Gen. John B. Woodward, president; William H. Maxwell, Ph. D., secretary; Eugene G. Blackford, treasurer. Associate members: Rev. Charles H. Hall, D. D., LL. D., president; James Cruikshank, secretary; James Hamblet, treasurer; Prof. Franklin W. Hooper, general director of the institute. Membership, 3,918.

Courses of lectures on the arts and sciences; monthly meetings of each of the departments; collections in archæology, architecture, chemistry, botany, entomology, geography, geology, microscopy, mineralogy, photography, and zoology; apparatus in physics, chemistry, electricity, and engineering; collections of paintings and casts of antique statuary.

Departments.—Archæology: Prof. William H. Goodyear, president; Prof. Thomas Flint, vice-president; Stansbury T. Hager, secretary; John Bliss, treasurer. Membership, 134.

Architecture: Walter Dickson, president; Isaac E. Ditmars, vice-president; Washington Hull, secretary; Gustav A. Jahn, treasurer. Membership, 266. Courses of instruction for draftsmen in free-hand drawing, drawing from cast, and the antique, shading, perspective, shadows, coloring, and the elements of architecture. Students, 60. Annual architectural exhibition.

Astronomy: Garrett P. Serviss, president; Arthur C. Perry, vice-president; James P. Hall, secretary; B. G. Way, librarian and treasurer. Membership, 162.

Botany: Rev. George D. Hulst, president; J. W. Martens, jr., vice-president; Miss Helena D. Leeming, secretary; Thomas Proctor, treasurer; S. Ely Jelliffe, M. D., curator. Membership, 254.

Chemistry: Robert G. Eccles, M. D., president; E. H. Bartley, vice-president; Edgar J. Wright, secretary; Herbert B. Baldwin, treasurer. Membership, 155.

Department of domestic science: Miss Emma O. Conro, president; Mrs. Andrew Jacobs, Mrs. W. B. Davenport, vice-presidents; Mrs. F. W. Hooper, secretary; Miss Fannie Bigelow, treasurer. Membership, 62.

Electricity: James Hamblet, president; William J. Barstow, first vice-president; J. P. Wintringham, second vice-president; John F. Skirrow, secretary; J. E. Reilly, treasurer. Membership, 244.

Engineering: Charles E. Emery, president; Samuel McElroy, vice-president; Louis Duvinage, secretary; Prof. Isaac E. Hasbrouck, treasurer. Membership, 145.

Entomology: Richard F. Pearsall, president; Archibald C. Weeks, vice-president; Prof. John B. Smith, corresponding secretary; Rev. George D. Hulst, recording secretary; C. H. Roberts, treasurer; Dr. Rodrigues Ottolengui, curator and librarian. Membership, 40.

Fine arts: Membership, 492. To be organized the coming year.

Geography: James S. Kemp, president; Judge Charles P. Daly, first vice-president; Cyrus C. Adams, second vice-president; James Cruikshank, LL. D., secretary; Almon C. Merwin, treasurer. Membership, 167.

Geology: Prof. John S. McKay, Ph. D., president; Rossiter W. Raymond, vice-president; Wallace G. Levison, secretary; William G. Bowdoin, treasurer; Prof. Daniel S. Martin, curator. Membership, 168.

Law: To be organized during the year.

Mathematics: Prof. Rufus Sheldon, president; James Cruikshank, first vice-president; Prof. Isaac E. Hasbrouck, second vice-president; Prof. Ernest R. Von Nardroff, secretary; George W. French, treasurer. Membership, 52.

Microscopy: Horace W. Calef, president; Henry S. Woodman, vice-president; Artis H. Ehrman, secretary; Charles P. Abbey, treasurer; James Walker, curator. Membership, 143.

Mineralogy: Wallace G. Levison, president; William G. Rothe, vice-president; Artis H. Ehrman, secretary; Charles L. Hatch, treasurer; Prof. Daniel S. Martin, curator. Membership, 129.

Music: Walter S. Carter, president; Charles H. Morse, first vice-president; R. Huntington Woodman, second vice-president; John Hyatt Brewer, secretary; H. E. H. Benedict, librarian; Perlee B. Jervis, treasurer. Membership, 495.

Painting: Frank Squier, president; Robert J. Pattisson, first vice-president; Frederick J. Boston, second vice-president; S. F. Kneeland, third vice-president; Miss S. M. Barstow, corresponding secretary; William H. Snyder, recording secretary; Erskine L. Waite, treasurer; William H. Snyder, curator. Membership, 93.

Pedagogy: Dr. Almon G. Merwin, president; Harry F. Towle, Miss Sarah E. Scott, vice-presidents; Miss Estelle C. Brown, secretary; Dr. William T. Vlymen, treasurer. Membership, 567.

Philology: Prof. Brainerd Kellogg, president; William H. Maxwell, first vice-president; Prof. R. J. H. Gottheil, second vice-president; Miss Emily G. Bridgham, secretary; Prof. Julian W. Abernethy, corresponding secretary; Walter B. Gunnison, treasurer. Membership, 964.

Photography: William H. Cooper, president; Mrs. C. H. Burdett, vice-president; Gould W. Hart, secretary; Pierre H. Le Brun, treasurer; Lewis E. Meeker, M. D., curator. Membership, 269.

Physics: Prof. Samuel Sheldon, president; Prof. Wallace Goold Levison, vice-president; Principal James Priddy, secretary; P. H. Van Everen, treasurer. Membership, 166.

Political and economic science: John A. Taylor, president; Dr. Charles H. Levermore, first vice-president; Conrad V. Dykman, second vice-president; Prof. C. H. J. Douglas, secretary; Charles Claghorn, treasurer. Membership, 719.

Psychology: Prof. Frederick W. Osborn, president; William H. Maxwell, first vice-president; A. G. Merwin, second vice-president; Miss Marie L. Burge, secretary; Albert M. Curry, M. D., treasurer. Membership, 187.

Zoology: Prof. John Mickleborough, president; Henry C. Burton, vice-president; Miss Alice A. Douglas, secretary; Charles A. Dayton, treasurer; Oliver D. Clark and Arthur H. Howell, curators. Membership, 114.

School of fine arts: Instruction in drawing from the antique, drawing and painting from life, modeling and sculpture, painting from still life; William M. Chase, Walter Shirlaw, J. Massy Rhind, Joseph H. Boston, and Elizabeth R. Coffin, instructors; Prof. William H. Goodyear, Mr. Percival Chubb, Miss Louise Both-Hendriksen, lecturers; William H. Snyder, curator. Day and evening classess. Students, 174.

The Shinnecock Hills Summer School of Art: Located at Southampton, Long Island, William M. Chase, director. Open from June 1 to October 1. Students, 120.

The Catskill Summer School of Art: Located in the Catskills. Mr. Theodore Robinson, director; Miss Harriet S. Peck, secretary. Students, 50.

The Old Lyme Summer School of Art.

Laboratory of biological research at Coldspring Harbor, Long Island: Board of managers—Eugene G. Blackford, president; Prof. Franklin W. Hooper, secretary; Herbert W. Conn, director. Open from July 1 to September 1. Lectures on biological and scientific subjects; classes for the study of various branches of biology; special apparatus for investigation; excursions for collecting specimens. Students, 27; attendance, 85.

The Brooklyn Institute of Arts and Sciences is authorized by act of legislature to establish museums of art and science.

PUBLICATIONS.

Yearbook of the Institute, published in July of each year. 8vo.
The Prospectus, published in September of each year. 12mo.
The Monthly Bulletin. 32mo.
The Weekly Bulletin. 32mo.

BUFFALO SOCIETY OF NATURAL SCIENCES.

BUFFALO, N. Y.

Organized December 5, 1861; incorporated January 23, 1863.

Objects.—The promotion and study of the natural sciences.

Founders.—Hiram E. Tallmadge, Augustus R. Grote, Coleman T. Robinson, Charles C. F. Gay, David F. Day, Albert H. Chester, Charles Winne, Laurentius G. Sellstedt, George W. Clinton, Albert T. Chester, Henry A. Richmond, Theodore Howland, Charles D. Marshall, Leon F. Harvey, Richard K. Noye, George Hadley, William S. Van Duzee.

Officers, 1894.—President, William H. Glenny; first vice-president, Dr. Lee H. Smith; second vice-president, Dr. Ernest Wende; third vice-president, Henry A. Richmond; recording secretary, Eben P. Dorr; corresponding secretary, Irving P. Bishop; treasurer, Dr. Louis A. Bull; librarian, Adolf Duschak; board of managers, David F. Day, Dr. Lucien Howe, William T. Hornaday, Herbert M. Hill, Henry R. Howland, Dr. F. Park Lewis, William McMillen, Fred K. Mixer, Dr. F. Roswell Park, Ottomar Reinecke, Frederick A. Vougt, Charles R. Wilson.

PUBLICATION.

Bulletin, published at the convenience of the society. 8vo.

THE CANANDAIGUA SCIENTIFIC ASSOCIATION.

CANANDAIGUA, N. Y.

Organized in 1880 as the "Microscopical Society of Canandaigua." It is not incorporated, and was for some years devoted exclusively to investigation and study in matters pertaining to the microscope. In 1885 its scope was extended to any matter of a scientific character. In June, 1893, the name was changed to its present form.

First officers.—President, N. T. Clark, LL. D.; vice-president, Sophie E. Howard, M. D.; secretary and treasurer, Prof. John M. Clark.

Officers, 1895.—President, A. L. Beahan, M. D.; vice-president, Dwight R. Burrell, M. D.; secretary and treasurer, Katharine M. Hart.

THE NATURAL SCIENCE ASSOCIATION OF AMERICA.

NEW YORK, N. Y.

Organized, 1888; incorporated August 29, 1892.

Objects.—To disseminate and promote natural science information.

Founders.—Jacob H. Studer, William S. Tisdale, James A. Westerfield, William H. Dusenberry, and H. A. Spencer.

Officers, 1895.—Jacob H. Studer, president; William S. Tisdale, secretary.

PUBLICATIONS.

The Birds of North America, by Jacob H. Studer. Imperial quarto.

NATURAL SCIENCE ASSOCIATION OF STATEN ISLAND.

NEW BRIGHTON, N. Y.

Organized November 12, 1881; incorporated February 19, 1885.

Objects.—To collect and preserve objects of natural science and antiquity, with special reference to local matters, and to diffuse correct knowledge in regard to the same by means of publications, meetings, and public lectures.

First officers.—Sanderson Smith, president; Charles W. Long, recording and financial secretary; Arthur Hollick, corresponding secretary; William T. Davis, curator.

Officers, 1894.—Walter C. Kerr, president; Thomas Craig, treasurer; Arthur Hollick, secretary; H. W. Congdon, curator.

PUBLICATIONS.

Proceedings, monthly, 8vo.; beginning with 13 pages in 1883, increased to 47 pages in 1894.

NEW YORK ACADEMY OF SCIENCES.

COLUMBIA COLLEGE, NEW YORK CITY.

Organized February 24, 1817, incorporated April 20, 1818, under the name "Lyceum of Natural History in the City of New York." The name was changed to "The New York Academy of Sciences" in 1876.

Object.—"The study of natural history as connected with the wants, the comforts, and the happiness of mankind, and particularly as it relates to the illustration of the physical character of the country we inhabit." (First constitution).

Founders.—Samuel L. Mitchill, Caspar Wistar Eddy, John B. Beck, F. C. Schaeffer, Benjamin P. Kissam, Ezekiel R. Baudoine, Francis Morton, D. L. M. Peixotto, John W. Francis, Henry M. Francis, D'Jurco Knevals, John Torrey, William Cooper, Thomas Eddy, jr., B. R. Greenland, M. D. L. F. Erving, Lewis C. Beck, Charles C. Townsend, J. Roane, R. B. Owen, Cornelius P. Heermans.

First officers.—Samuel L. Mitchill, M. D., president; Caspar W. Eddy, M. D., first vice president; Rev. F. C. Schaeffer, second vice-president; John W. Francis, M. D., corresponding secretary; John B. Beck, A. M., recording secretary; Benjamin P. Kissam, M. D., treasurer; John Torrey, D'Jurco V. Knevals, and Ezekiel R. Baudoine, A. B., curators.

Officers, 1895–96.—President, J. K. Rees; first vice-president, H. F. Osborn; second vice-president, J. J. Stevenson; corresponding secretary, D. S. Martin; recording secretary, J. F. Kemp; treasurer, C. F. Cox; librarian, Arthur Hollick; counselors, J. A. Allen, N. L. Britton, Bashford Dean, William Hallock, William Stratford, R. S. Woodward; curators, H. G. Dyar, G. F. Kunz, L. H. Laudy, Heinrich Ries, W. D. Schoonmaker; finance committee, Henry Dudley, J. H. Hinton, Cornelius Van Brunt.

PUBLICATIONS.

Annals of the Lyceum of Natural History, Vols. I–XI, 1824–1877, 8vo, plates, averaging about 462 pp. each.

Annals of the New York Academy of Science, Vols. I–VIII+, 1879–1895, 8vo, plates, averaging nearly 500 pp. each.

Transactions, Vols. I–XIII+, 1881–1894, 8vo, plates, averaging about 234 pp. each.

Memoirs, 4to, series just begun.

THE ROCHESTER ACADEMY OF SCIENCE.

ROCHESTER, N. Y.

Organized and chartered, 1881, growing out of the Rochester Microscopical Society, which was organized in 1879. In 1889 it was reorganized and the constitution changed to its present form.

Objects.—(1) To create and cultivate interest and work in science; (2) to afford an opportunity for the reading of papers and for discussion; (3) to supply a medium for publication and dissemination of scientific papers; (4) to collect and preserve materials illustrating the local natural history (as the plants, special groups of animals, rocks, minerals, fossils, etc.) of the region.

First officers.—President of the Microscopical Society, Prof. S. A. Lattimore; of the Academy, Rev. Myron Adams.

Officers, 1895.—President, Herman L. Fairchild; first vice-president, J. M. Davison; second vice-president, J. Eugene Whitney; secretary, Arthur Latham Baker; corre-

sponding secretary, Charles Wright Dodge; treasurer, F. W. Warner; librarian, Miss Florence Beckwith; councilors, C. C. Laney, Dr. G. W. Goler.

The library numbers about 3,000 volumes and pamphlets, consisting chiefly of the publications of other scientific societies, American and foreign. It is now in a room at Anderson Hall, University of Rochester. It is not the purpose of the society to accumulate a general museum, but to make special collections representative of the locality. There is already in possession the finest herbarium in western New York, numbering 3,210, a collection of Monroe County mollusks, a collection of insects, and a set of fossils of the vicinity.

PUBLICATIONS.

Proceedings, Vol. I, large 8vo, 1890–91; Vol. II, 1892–1895.

VASSAR BROTHERS' INSTITUTE.

POUGHKEEPSIE, N. Y.

Organized and incorporated May 29, 1881.

Objects.—To promote education and useful knowledge in the departments of science, literature, and art by investigating and discussing scientific, literary, and artistic subjects, and by establishing and maintaining a museum, library, and collection of works of art and objects of historic interest in the furtherance of such objects.

Founders.—Matthew Vassar, jr.; A. P. Van Gieson, Truman J. Backus, Leroy C. Cooley, Henry V. Pelton, William B. Dwight, John Guy Vassar, Edward Elsworth, T. M. Buckingham, William G. Stevenson, John P. Adriance, Charles N. Arnold.

This institute absorbed the "Pokeepsie Society of Natural Science" in 1881.

Trustees and officers, 1894.—Leroy C. Cooley, Charles N. Arnold, William T. Reynolds, Henry V. Pelton, Charles B. Warring, Edward Elsworth, William B. Dwight, Edward Burgess, A. P. Van Gieson, Charles B. Herrick, Evan R. Williams, Irving Elting; president of institute, William Bancroft Hill; secretary, John Williams; treasurer, Edward Elsworth; chairman of scientific section, Edward Burgess; chairman of literary section, John B. Sickley; chairman of art section, A. P. Van Gieson.

PUBLICATIONS.

Transactions, Vols. I–VI, 4to, about 275 pp. each.

WEST SIDE NATURAL HISTORY SOCIETY.

NEW YORK CITY.

Organized April 23, 1885.

Object.—The general study of natural history.

Founder.—Edmund B. Southwick, Ph. D.

Officers, 1895.—President, E. B. Southwick; vice-president and librarian, L. S. Foster; secretary, Miss E. A. Foster; treasurer, ——.

In addition to the general study of natural history, the society offers a two years' course of lectures in botany, geology, entomology, and ornithology.

ELISHA MITCHELL SCIENTIFIC SOCIETY.

CHAPEL HILL, N. C.

Organized September 24, 1883.

Object.—The encouragement of scientific research and recording the work of members, especially with reference to the natural history of the State.

First officers.—President, F. P. Venable; secretary and treasurer, J. W. Gore.

Officers, 1894–95.—President, J. A. Holmes; vice-president, J. W. Gore; secretary, F. P. Venable.

PUBLICATIONS.

Journal, in 10 volumes, all 8vo; Vol. I, pp. 97; II, pp. 100; III, pp. 146; IV, pt. 1, pp. 67, pt. 2, 114; V, parts 1 and 2, pp. 139; VI, parts 1 and 2, pp. 161; VII, pp. 132; VIII, pp. 131; IX, pp. 108; X, pp. 98.

THE DELAWARE COUNTY INSTITUTE OF SCIENCE.

MEDIA, PA.

Organized September 21, 1833; incorporated February 8, 1836.

"The object of this society shall be to promote the diffusion of general and scientific knowledge among its members and in the community at large, and the establishment and maintenance of a library and historical record and a museum."—Constitution.

Founders.—George Miller, Minshall Painter, John Miller, George Smith, M. D., and John Cassin.

First officers.—President, George Smith, M. D.; first vice-president, A. H. Parker; second vice-president, Reece W. Flower; secretary, Minshall Painter; treasurer, John Miller; managers, John Cassin, John Miller, Robert R. Dutton, William B. Hilditch, George Miller, jr.

Officers, 1894.—President, T. Chalkley Palmer; first vice-president, Charles Potts; second vice-president, Henry L. Broomall; recording secretary, Linnaeus Fussell, M. D.; corresponding secretary, Anna W. Speakman; treasurer, Carolus M. Broomall; librarian, Lewis S. Hough; curators, Issac S. Yarnall, George B. Adams, Henry Mendenhall, Theophilus P. Saulnier, Benjamin C. Potts.

PUBLICATIONS.

Several memoirs of deceased members. History of great flood of August 8, 1843. History of Delaware County, Pa., by George Smith, M. D., Philadelphia, 1862, 8vo, pp. 581.

TEXAS ACADEMY OF SCIENCE.

AUSTIN, TEX.

Organized in Austin, Tex., January 9, 1892.

Objects.—The promotion of natural and exact science; to investigate and report on subjects pertaining to the exact sciences when called on by the departments of the State government; to furnish to scientists of the State opportunities for social intercourse, exchange of ideas, and discussion.

Founders.—Prof. Edgar Everhart, first president; Prof. Alex. Macfarlane, E. T. Dumble, W. F. Cummins, W. H. von Streeruwitz, Prof. George W. Curtis.

Officers, 1894–95.—President, Dr. George B. Halsted; vice president, Dr. Allen J. Smith, Galveston; treasurer, E. T. Dumble, Austin; honorary secretary, I. H. Bryant, Austin; council, W. H. von Streeruwitz, Dr. David Cerna, Prof. J. C. Nagle.

PUBLICATIONS.

Transactions, Vol. I, Nos. 1–4, 1892–1895, 8vo, pp. 102, 79, 96.

TACOMA ACADEMY OF SCIENCE.

TACOMA, WASH.

Organized and incorporated July 13, 1891.

Objects.—By regular meetings to give a more general and stronger impulse to scientific research.

First officers.—President, Hon. Frank Allyn; recording secretary, Meriden S. Hill; corresponding secretary, Wm. Curtis Taylor; treasurer, A. N. Fitch.

Officers, 1896.—President, James Wickersham; recording secretary, Fred. G. Plummer; corresponding secretary, Meriden S. Hill; treasurer, Chas. P. Culver.

PUBLICATIONS.

Proceedings, 8vo.

WISCONSIN ACADEMY OF SCIENCES, ARTS, AND LETTERS.

MADISON, WIS.

Organized February 16, 1870; incorporated March 16, 1870.

Object.—"To encourage investigation and disseminate correct views in the various departments of science, literature, and the arts."

First officers.—President, J. W. Hoyt; vice-presidents, P. R. Hoy, W. E. Armitage, Nelson Dewey, A. L. Chapin; general secretary, I. A. Lapham; acting secretary, J. E. Davies; treasurer, George P. Delaplaine; director of museum, William Dudley; librarian, J. G. Knapp.

Officers, 1894.—President, Charles R. Van Hise; vice-presidents, J. J. Blaisdell, C. Dwight Marsh, A. J. Rogers; secretary, Charles R. Barnes; treasurer, Samuel D. Hastings; librarian, F. L. Van Cleef; curator, G. E. Culver.

PUBLICATIONS.

Transactions, Vols. I–IX, 1 ed. every two years. 8vo.

II. MATHEMATICS AND PHYSICS.

NATIONAL.

THE AMERICAN MATHEMATICAL SOCIETY.

New York, N. Y.

Organized as the New York Mathematical Society, November, 1888; reorganized as the American Mathematical Society, July, 1894.

Object.—To encourage and maintain an active interest in and to promote the advancement of mathematical science.

First officers of the New York Mathematical Society.—President, J. H. Van Amringe; secretary, Thomas S. Fiske.

First officers of the American Mathematical Society.—Emory McClintock, president; G. W. Hill, vice-president; Thomas S. Fiske, secretary; R. S. Woodward, treasurer; Gustave Legras, librarian; Henry B. Fine, Harold Jacoby, E. Hastings Moore, Simon Newcomb, Charlotte Angas Scott; committee of publication, Thomas S. Fiske, Alexander Ziwet.

Officers of the American Mathematical Society, 1895.—President, Dr. George W. Hill; vice-president, Prof. Hubert A. Newton; secretary, Prof. Thomas S. Fiske; treasurer, Prof. R. S. Woodward; librarian, Dr. Edward L. Stabler; committee of publication, Prof. Thomas S. Fiske, Prof. Alexander Ziwet, Prof. Frank Morley; other members of the council, Prof. Thomas Craig, Dr. Emory McClintock, Prof. Mansfield Merriman, Prof. Henry B. Fine, Prof. E. Hastings Moore, Prof. Ormond Stone, Prof. Simon Newcomb, Prof. Charlotte Angas Scott, Prof. Henry S. White.

PUBLICATIONS.

Bulletin of the New York Mathematical Society. A historical and critical review of mathematical science; monthly except August and September; October, 1891; July, 1894, 3 vols.; 8vo; vol. 1, 242 pp.; vol. 2, 274 pp.; vol. 3, 270 pp.

Bulletin of the American Mathematical Society. A continuation of the bulletin of the New York Mathematical Society; monthly except August and September; October, 1894, + 8vo; each number 32 pp.

Mathematical papers read before the International Mathematical Congress held in conjunction with the World's Columbian Exposition, Chicago, 1893. (In press.)

AMERICAN METROLOGICAL SOCIETY.

New York, N. Y.

Organized at Columbia College, New York, December 30, 1873, in pursuance of a call sent out by President F. A. P. Barnard.

Objects.—(1) To improve existing systems of weights, measures, and moneys, and to bring them into relations of simple commensurability with each other; (2) to secure universal adoption of common units of measure for quantities in physical observation or investigation, for which ordinary systems of metrology do not provide, such as divisions of barometer, thermometer, and densimeter; amount of work done by machines; amount of mechanical energy, active or potential, of bodies, as dependent on their motion or position; quantities of heat present in bodies of given temperatures, or generated by combustion or otherwise; quantity and intensity of electrodynamic currents; aggregate and efficient power of prime movers; accelerative force of gravity; pressure of steam and atmosphere; and other matters analogous to these; (3) to secure uniform usage as to standard points of reference, or physical conditions to which observations must be reduced for purposes of comparison; especially temperature and pressure to which are referred specific gravities of bodies, and the zero of longitude on the earth; (4) to secure the use of the decimal system for denominations of weight, measure, and money derived from unit bases, not necessarily excluding for practical purposes binary or other convenient divisions, but maintained along with such other methods, on account of facilities for calculation, reductions, and comparison of values, afforded by a system conforming to our numerical notation.

Founders.—Prof. Wolcott Gibbs, Prof. Thomas R. Pynchon, Prof. Elias Loomis, Prof. C. S. Lyman, Prof. H. A. Newton, President F. A. P. Barnard, Prof. Charles Davies, Prof. Henry Drisler, Prof. O. N. Rood, Prof. T. Egleston, Hon. John A. Kasson, Rev. Dr. G. W. Samson, J. E. Hilgard, esq., E. B. Elliott, esq., Prof. J. P. Thompson, Prof. T. Greene, Prof. R. H. Thurston, Prof. G. W. Plympton, Prof. J. B. Crenshaw, Prof. C. G. Rockwood, jr., Prof. W. G. Peck, Prof. B. N. Martin, Prof. S. D. Tillman.

First officers.—President, F. A. P. Barnard; vice-president, John A. Kasson; recording secretary, C. G. Rockwood, jr.; corresponding secretary, Samuel D. Tillman;

treasurer, Howard Potter; council, S. B. Ruggles, Josiah P. Cooke, jr., J. E. Hilgard, T. R. Pynchon, R. H. Thurston, E. B. Elliott, C. S. Lyman, Wolcott Gibbs, H. A. Newton, R. W. Raymond.

Officers, 1894.—President, B. A. Gould, Cambridge, Mass.; vice-presidents, T. R. Pynchon, Hartford, Conn., Wolcott Gibbs, Newport, R. I., T. C. Mendenhall, Worcester, Mass., T. Egleston, J. H. Van Amringe, New York City, Sandford Fleming, Ottawa, Canada, A. A. Michelson, Chicago, Ill.; treasurer and recording secretary, John K. Rees, New York City; corresponding secretary, O. H. Littmann, Washington, D. C.; council, H. A. Newton, New Haven, Conn., Cleveland Abbe, Washington, D. C., R. H. Thurston, Ithaca, N. Y., A. M. Mayer, Hoboken, N. J., Henry Holt, W. F. Allen, New York City, Simon Newcomb, S. P. Langley, Washington, D. C., F. H. Smith, Richmond, Va., George Eastburn, Philadelphia, Pa.

PUBLICATIONS.

Proceedings, 8vo, 900 pp.
The Metric System, New York, 1893, 18 pp.
A metric chart.
Publications are issued from time to time without regularity.

STATE.

ASTRONOMICAL SOCIETY OF THE PACIFIC.

SAN FRANCISCO, CAL.

Organized February 7, 1889; incorporated August 28, 1889.

Objects.—To advance the science of astronomy, and to diffuse information concerning it.

First officers.—Edward S. Holden, president; J. M. Schaeberle, secretary; C. Burckhalter, secretary; E. J. Molera, treasurer.

Officers, 1895.—W. W. Campbell, president; W. J. Hussey, William M. Pierson, and John Dolbeer, vice-presidents; C. D. Perrine, 819 Market street, San Francisco, secretary; F. R. Ziel, secretary and treasurer.

Board of directors.—William Alvord, W. W. Campbell, John Dolbeer, E. S. Holden, W. J. Hussey, E. J. Molera, C. D. Perrine, William M. Pierson, J. M. Schaeberle, Otto Von Geldern, F. R. Ziel.

Finance committee.—William M. Pierson, John Dolbeer, Otto Von Geldern.

Committee on publication.—E. S. Holden, W. W. Campbell, C. G. Yale.

Library committee.—Otto Von Geldern, E. J. Molera, A. H. Babcock.

Committee on the comet medal.—E. S. Holden (ex officio), J. M. Schaeberle, Charles Burckhalter.

PUBLICATIONS.

Publications of the Astronomical Society of the Pacific, Vols. I, II, III, IV, V, VI, VII (current year); issued bimonthly in 8vo. Each volume is made up of the numbers issued during a calendar year, and contains from 200 to 300 pages, or more.

CHICAGO ASTRONOMICAL SOCIETY.

CHICAGO, ILL.

Organized November, 1862; incorporated February 19, 1867.

Object.—The advancement of astronomy.

First officers.—J. Y. Scammon, president; W. H. Wells and J. H. Woodworth, vice-presidents; Thomas Hoyne, secretary; D. J. Ely, treasurer.

Officers, 1895.—Elias Colbert, president; James B. Hobbs, vice-president; Henry C. Ranney, secretary; Murry Nelson, treasurer.

The Chicago Astronomical Society was primarily organized for the purchase of the 18½-inch Clark refractor. Subsequently, in connection with the old Chicago University, it established the Dearborn Observatory. In 1887 the instruments of the observatory were transferred to the Northwestern University, at Evanston. The society has always been a society for revenue for carrying on the Dearborn Observatory.

III. CHEMISTRY AND PHARMACY.

NATIONAL.

THE AMERICAN CHEMICAL SOCIETY.

BROOKLYN, N. Y.

This society was the outgrowth of a meeting of American chemists held in Northumberland, Pa., in August, 1874, to celebrate the centennial of the discovery of oxygen by Priestley. It was organized in 1876; incorporated October 25, 1877.

"The objects of the society shall be the advancement of chemistry and the promotion of chemical research."

Incorporators.—C. F. Chandler, New York City; Henry Morton, Hoboken, N. J.; M. Alsberg, New York City; W. M. Habirshaw, Astoria, N. Y.; P. Casamajor, Brooklyn, N. Y.; E. Sherer, Brooklyn, N. Y.; W. H. Nichols, Brooklyn, N. Y.; H. Endemann, New York City; W. Shapleigh, New York City; E. P. Eastwick, Elizabeth, N. J.; H. C. Havemeyer, New York City; J. Goldmarck, Brooklyn, N. Y.; Henry Draper, New York City.

Officers, 1895.—President, Edgar F. Smith, University of Pennsylvania, Philadelphia, Pa.; vice-presidents, the presiding officers of the local sections (see below); general secretary, Albert C. Hale, 551 Putnam avenue, Brooklyn, N. Y.; treasurer, C. F. McKenna, 221 Pearl street, New York City; librarian, F. E. Dodge, 344 Sixth avenue, Brooklyn, N. Y.; committee on papers and publications, Edward Hart, editor; E. F. Smith, J. H. Long.

Board of directors, members ex officio.—Edgar F. Smith, president; Albert C. Hale, general secretary; C. F. McKenna, treasurer; F. E. Dodge, librarian; Edward Hart, editor. Term expires December, 1895: C. F. Chandler, P. T. Austen, C. A. Doremus, C. E. Munroe. Term expires December, 1896: H. W. Wiley, William McMurtrie, J. H. Appleton, A. A. Breneman.

Council, members ex officio.—Edgar F. Smith, president; Albert C. Hale, general secretary; Edward Hart, editor. Term expires December, 1895: G. C. Caldwell, J. W. Mallet, T. H. Norton, A. B. Prescott. Term expires December, 1896: C. B. Dudley, C. E. Munroe, William McMurtrie, J. H. Appleton. Term expires December, 1897: G. F. Barker, F. W. Clarke, W. L. Dudley, E. R. Squibb.

Local sections.—Rhode Island section: C. A. Catlin, presiding officer; E. E. Calder, secretary, Board of Trade Building, Providence, R. I. Cincinnati section: Karl Langenbeck, presiding officer; E. C. Wallace, secretary, room 71, Blymeyer Building, Cincinnati, Ohio. New York section: P. T. Austen, presiding officer; Morris Loeb, secretary, 37 East Thirty-eighth street, New York City. Washington section: Charles E. Munroe, presiding officer; A. C. Peale, secretary, 605 Twelfth street NW. Lehigh Valley section: Edward Hart, presiding officer; A. H. Welles, secretary, Easton, Pa. New Orleans section: A. L. Metz, presiding officer; Hubert Edson, secretary, Bartels, La.

PUBLICATIONS.

Journal, monthly, now in its seventeenth year. 8vo., pp. 72.

Two general meetings are held each year, the time and place of these meetings being determined by the council.

AMERICAN PHARMACEUTICAL ASSOCIATION.

BALTIMORE, MD.

The initial meeting was held in New York in 1851; the association was organized in Philadelphia in 1852, and incorporated in Washington, D. C., February 21, 1888.

Objects.—"3. To improve the science and art of pharmacy by diffusing scientific knowledge among apothecaries and druggists, fostering pharmaceutical literature, developing talent, stimulating discovery and invention, and encouraging home production and manufacture in the several departments of the drug business."

First officers.—President, Daniel B. Smith, Philadelphia; first vice-president, George W. Anderson, Baltimore; second vice-president, Samuel M. Colcord, Boston; third vice-president, C. Augustus Smith, Cincinnati; treasurer, Alfred B. Taylor, Philadelphia; recording secretary, George D. Coggeshall, New York; corresponding secretary, William Proctor, jr.

Officers, 1894–95.—President, William Simpson, Raleigh, N. C.: first vice-president, Charles M. Ford, Denver, Colo.; second vice-president, John N. Hurty, Indianapolis, Ind.; third vice-president, Joseph E. Morrison, Montreal, Canada; treasurer, Samuel A. D. Sheppard, Boston, Mass.; permanent secretary, Charles Caspari, jr., Baltimore,

Md.; local secretary, Edmund L. Scholtz, Denver, Colo.; reporter on progress of pharmacy, Henry Kraemer, New York, N. Y.

PUBLICATIONS.

Proceedings, 1851-1860, 1862-1894, 8vo; vol. 42, 8vo, pp. 1,394.

STATE.

ALABAMA PHARMACEUTICAL ASSOCIATION.

MOBILE, ALA.

Organized 1881; incorporated May 9, 1882.

Object.—To improve the science and art of pharmacy.

Founders and first officers.—President, Philip C. Candidus, Mobile; first vice-president, J. L. Davis, Birmingham; second vice-president, C. Stollenwerck, Greensboro; treasurer, Y. P. Newman, Birmingham; secretary, G. W. Gillespie, Birmingham; local secretary, Charles A. Mohr, Mobile.

Officers, 1895.—President, E. P. Galt, Selma; first vice-president, J. L. Wikle, Anniston; second vice-president, J. G. Dunn, Mobile; secretary, Philip C. Candidus, Mobile; local secretary, W. F. Dent, Montgomery; treasurer, E. E. Elam, Anniston.

PUBLICATIONS.

Proceedings, Annual. 8vo.

CHEMICAL SOCIETY OF WASHINGTON (LOCAL SECTION OF THE AMERICAN CHEMICAL SOCIETY).

WASHINGTON, D. C.

Organized January 12, 1884; first meeting, January 31, 1884.

Object.—The cultivation of chemical science, pure and applied.

First officers.—President, Thomas Antisell; vice-presidents, William Mew, F. W. Clarke; treasurer, W. H. Seaman; secretary, H. W. Wiley; executive committee, E. T. Fristoe, Thosas M. Chatard, J. H. Kidder, and A. C. Peale, in addition to officers above.

Officers, 1895.—President, Prof. Charles E. Munroe; vice-presidents, Prof. W. D. Bigelow, Dr. E. A. de Schweinetz; treasurer, Mr. W. P. Cutter; secretary, Dr. A. C. Peale; additional members of the executive committee, Prof. F. W. Clarke, F. P. Dewey, Dr. W. H. Seaman, and Dr. H. W. Wiley

PUBLICATIONS.

Bulletin, 1-8, 1886-1893, 8vo, about 40 pages each.

NEW YORK SECTION OF THE AMERICAN CHEMICAL SOCIETY.

NEW YORK CITY.

Organized under the charter of the parent society April 29, 1892.

First officers.—Chairman, P. T. Austen; secretary and treasurer, Morris Loeb. These, together with A. A. Breneman, William McMurtrie, and Albert C. Hale, constitute the executive committee.

The library of the American Chemical Society is deposited with this section.

PUBLICATIONS.

Proceedings, in the Journal of the American Chemical Society, now in its seventeenth volume.

NORTH CAROLINA SECTION OF THE AMERICAN CHEMICAL SOCIETY.

RALEIGH, N. C.

Organized February, 1896.

Objects.—The advancement of chemistry and the promotion of chemical research.

Founders.—Dr. F. P. Venable, Dr. Charles Baskerville, and Mr. Thomas Clark, of the University; Dr. H. B. Battle, and Messrs. W. M. Allen, C. B. Williams, and S. E. Asbury, of the Experiment Station; Prof. J. A. Withers and Messrs. J. A. Bizzell, G. S. Fraps, and R. G. Mewborne, of the A. and M. College.

Officer, 1895-96.—President, Dr. F. P. Venable, University of North Carolina; vice-president, Prof. C. E. Brewer, Wake Forest College; secretary-treasurer, Prof. W. A. Withers, A. and M. College, Raleigh, N. C.

NORTH CAROLINA PHARMACEUTICAL ASSOCIATION.

FAYETTEVILLE, N. C.

Organized August 11, 1880; incorporated March 12, 1891.

Objects.—To unite the pharmacists of the State for mutual aid, encouragement, and improvement; to encourage scientific research, develop pharmaceutical talent, to elevate the standard of professional thought, and ultimately restrict the practice of pharmacy to properly qualified druggists and apothecaries.

Incorporators.—E. M. Nadal, S. J. Hinsdale, William Simpson, E. H. Meadows, T. C. Smith, and John S. Pescud.

First officers.—President, E. M. Nadal; secretary, T. C. Smith; treasurer, John S. Pescud.

Officers, 1895.—President, J. Hal Bobbitt; secretary, H. R. Horne; treasurer, A. J. Cook.

PUBLICATIONS.

Proceedings, Annual; about 125 pages.

IV. GEOGRAPHY, GEOLOGY, AND MINERALOGY.

NATIONAL.

THE GEOLOGICAL SOCIETY OF AMERICA.

ROCHESTER, N. Y.

Organized December, 1888.

Object.—To advance geological science in America.

Past presidents.—James Hall, Alexander Winchell, J. William Dawson, James C. Dana, G. K. Gilbert, T. C. Chamberlin.

Officers, 1895.—President, N. S. Shaler, Harvard University; vice-presidents, Joseph LeConte, University of California, Charles H. Hitchcock, Dartmouth College; secretary, H. L. Fairchild, University of Rochester; treasurer, I. C. White, Morgantown, W. Va.; editor, J. Stanley-Brown, Washington, D. C.; councilors, F. D. Adams, McGill College, Montreal; R. W. Ells, Geological Survey of Canada; I. C. Russell, University of Michigan; E. A. Smith, University of Alabama; C. R. Van Hise, University of Wisconsin; C. D. Walcott, U. S. Geological Survey.

PUBLICATIONS.

The Bulletin, issued in brochures and in complete volumes; one volume each year; six volumes have been published. 8vo. The smallest volume has had 458 pages, the largest 665 pages.

STATE.

GEOGRAPHICAL SOCIETY OF CALIFORNIA.

SAN FRANCISCO, CAL.

Incorporated Decem ber 11, 1891.

Objects.—In such an important and growing city as San Francisco, the capital of the West, occupying such an advantageous position on the Pacific coast, and destined at no remote period to rank among the most renowned cities both in the Old World and the New, it is evident that the acquisition of geographical knowledge should constitute one of the leading branches of education. The dissemination of such knowledge is consequently the chief aim of this society, and for this purpose—

First. Lectures are given monthly and occasionally bimonthly, either by native or foreign travelers, or by qualified scientists.

Second. Aid will be given, when the society has sufficient funds in hand, to exploring expeditions on this coast or elsewhere.

Third. The society receives information from naval officers with regard to points of geographical interest, changes of currents, climatic variations, or other phenomena, and keeps a record of them for consultation.

Fourth. A library of books of travel and other kindred subjects, together with maps, is being rapidly accumulated.

Fifth. One bulletin has already been published for home distribution and interchange with scientific societies throughout the world, and will be followed periodically by others.

Sixth. Conversazioni will take place at stated periods, at which members of the society will have the privilege of introducing their friends.

First officers.—Acting president, David Starr Jordan, M. D., LL. D., Ph. D.; vice-presidents, Fred W. D'Evelyn, M. B., C. M. (Edin.), Col. John O'Byrne; directors, A. L. Bancroft, Dorville Libby, George A. Moore, George W. Davis, M. D., Peter MacEwen, Edgar D. Peixotto, Hon. W. H. Pratt; treasurer, R. H. McDonald, jr.; secretary, J. Studdy Leigh, F. R. G. S.; bankers, The Pacific Bank; honorary council, Col. Charles F. Crocker, Edwin Fretwell, Stephen T. Gage, A. S. Hallidie, H. E. Huntington, Col. J. P. Jackson, Prof. Martin Kellogg, Hon. E. McKinstry, Col. George H. Morrison, John Rosenfeld, G. Howard Thompson, John J. Valentine.

Officers, 1894–95.—President, Fred. William D'Evelyn, M. B., C. M. (Edin.); first vice-president, Rev. Frederic J. Masters, D. D.; second vice-president, Frank Shay; directors, A. L. Bancroft, Dorville Libby, Cyril W. Newall, George W. Davis, M. D., George A. Moore, Hon. W. H. Pratt, S. H. Strite; treasurer, Edwin Fretwell; secretary, P. MacEwen; bankers, American Bank and Trust Company; honorary council, Col. Charles F. Crocker, Daniel A. Goodsell, Stephen T. Gage, A. S. Hallidie, H. E. Huntington, Col. J. P. Jackson, Prof. Martin Kellogg, Hon. E. McKinstry, Col. George H. Morrison, John Rosenfeld, G. Howard Thompson, John J. Valentine.

PUBLICATIONS.

Bulletins I, II.

THE GEOGRAPHICAL SOCIETY OF THE PACIFIC.

San Francisco, Cal.

Organized March 16, 1881; incorporated January 5, 1892.

Objects.—The encouragement of geographical exploration; the collection and dissemination of geographical information by free lectures and by publications; to accumulate a library of maps and geographical works, open to the public under certain regulations, and to advance these objects by carrying on correspondence and exchanging publications with other societies whose objects include or are connected with geography.

First officers.—President, Prof. George Davidson, Ph. D., Sc. D.; vice-presidents, W. S. Justice, Ogden Hoffman, William Lane Booker, F. R. G. S., H. B. M. consul, John R. Jarboe; foreign corresponding secretary, Francis Berton; home corresponding secretary, James P. Cox; treasurer, Gen. C. I. Hutchinson; secretary, Charles Mitchell Grant, F. R. G. S.

Officers, 1894–95.—President, Prof. George Davidson, Ph. D., Sc. D.; first vice-president, Thomas E. Slevin, LL. D.; second vice-president, Hon. Ralph C. Harrison; third vice-president, Irving M. Scott; home corresponding secretary, Hon. Jeremiah Lynch; recording secretary, John Partridge; assistant secretary, Th. F. Trenor, A. M.

PUBLICATIONS.

Annual Bulletin, in January, 4to, from 100 to 300 pages.

GEOLOGICAL SOCIETY OF WASHINGTON, D. C.

Washington, D. C.

Organized February 25, 1893.

Object.—The increase and diffusion of geologic knowledge.

It had 109 members as founders.

Officers, 1894.—C. D. Walcott, president; S. F. Emmons and G. K. Gilbert, vice-presidents; Arnold Hague, treasurer; Whitman Cross and J. S. Diller, secretaries; G. F. Becker, W. H. Dall, C. W. Hayes, R. T. Hill, and G. P. Merrill, members at large of the council.

NATIONAL GEOGRAPHIC SOCIETY.

Washington, D. C.

Organized January 10, 1888; incorporated January 27, 1888.

Object.—The increase and diffusion of geographic knowledge.

Founders.—Gardiner G. Hubbard, C. E. Dutton, O. H. Tittman, J. Howard Gore, C. Hart Merriam, J. R. Bartlett, Rogers Birnie, jr., J. W. Powell, Henry Gannett, A. H. Thompson, A. W. Greely, Henry Mitchell, George Kennan, Marcus Baker, Gilbert Thompson.

Officers, 1894.—President, Gardiner G. Hubbard; vice-presidents, land section, T. C. Mendenhall; sea section, George W. Melville; air section, A. W. Greely; life section, C. Hart Merriam; geographic art section, W. B. Powell; commercial geography sec-

tion, Henry Gannett; treasurer, Charles J. Bell; secretaries, Cyrus C. Babb, Eliza R. Scidmore; managers, Marcus Baker, H. F. Blount, G. K. Gilbert, Everett Hayden, John Hyde, W J McGee, F. H. Newell, Edwin Willits.

PUBLICATIONS.

National Geographic Magazine, Vols. I–V, 1889–1893, 8vo, about 300 pages each; issued at irregular intervals throughout the year.

THE AMERICAN GEOGRAPHICAL SOCIETY OF NEW YORK.

New York, N. Y.

Organized May 22, 1852, under the title "The American Geographical and Statistical Society;" incorporated May 22, 1852, and April 8, 1871, when the name was changed to the present form.

Objects.—The advancement of geographical and statistical science by the collection and diffusion of knowledge in those branches.

First officers.—President, George Bancroft; vice-presidents, Henry Grinnell, F. L. Hawks, D. D., John C. Zimmerman, sr.; treasurer, Charles Congdon; recording secretary, M. Dudley Bean; foreign corresponding secretary, S. Dewitt Bloodgood; domestic corresponding secretary, Archibald Russell; librarian, Joshua Leavitt; trustees, Henry E. Pierrepont, Alexander I. Cotheal, J. Calvin Smith, Hiram Barney, John Jay, Edmund Blunt, Luther B. Wyman, J. Carson Brevoort, Cambridge Livingston, Henry V. Poor.

Officers.—President, Charles P. Daly, LL. D.; vice-presidents, C. C. Tiffany, D. D., W. H. H. Moore, Gen. Egbert L. Viele; foreign corresponding secretary, Prof. William Libbey, jr.; domestic corresponding secretary, James Mühlenberg Bailey; recording secretary, Anton A. Raven; treasurer, Walter R. T. Jones; councilors, William G. Hamilton, Henry Holt, Clarence King, Charles A. Peabody, Rear-Admiral Bancroft Gherardi, U. S. N., Cyrus C. Adams, Francis M. Bacon, Austen G. Fox, Alexis A. Julian, D. O. Mills, Levi Holbrook, Morris K. Jesup, Gustav E. Kissel, Henry Parish, Chandler Robbins.

PUBLICATIONS.

Bulletin, 8vo, quarterly.
Journal, 8vo, yearly volume of the Bulletin; Vol. XXVI, 1894.

NEW YORK MINERALOGICAL CLUB.

New York City.

Organized 1887.

Object.—The study of mineralogy.

The club holds some of its meetings as a mineralogical section of the New York Academy of Sciences. The president is elected for each meeting.

V. BIOLOGY, INCLUDING BOTANY, ORNITHOLOGY, MICROSCOPY, ENTOMOLOGY, AND ANTHROPOLOGY.

NATIONAL.

AMERICAN ENTOMOLOGICAL SOCIETY.

Fairmount Station, Philadelphia, Pa.

Organized 1859; incorporated 1862.

Object.—The study of entomology.

First officers.—President, John L. Leconte; vice-president, James Ridings; secretary, E. T. Cresson; treasurer, Charles Wilt.

Officers, 1894.—President, G. H. Horn; vice-president, Philip Calvert; secretary, James Ridings.

PUBLICATIONS.

Transactions, quarterly, 400 pages a year.

AMERICAN MICROSCOPICAL SOCIETY.

Washington, D. C.

The microscopical section of the Indianapolis Lyceum of Natural History in May, 1878, addressed an inquiry to the various microscopical societies of the country as to the desirableness of a national convention of the microscopists of the country for the

purpose of forming a national organization "for the promotion of the progress of microscopical science." Answers being favorable, a call was issued by the Indianapolis society inviting all microscopists throughout the United States to meet at Indianapolis August 14, 1878. On that day convened, pursuant to call, "The National Microscopical Convention." It was attended by 50 persons, who, on August 17, 1878, organized permanently as the American Society of Microscopists; incorporated August 13, 1891, at Washington, D. C., under laws of the District of Columbia, under the name, "The American Microscopical Society."

Object.—The encouragement of microscopical research.

Incorporators.—W. H. Walmsley, Frank L. James, William J. Lewis, Simon H. Gage, Charles H. Denison, F. W. Kuhne, George E. Fell, Samuel Wagenhals, David S. Kellicott, L. D. McIntosh, Robert Reyburn, M. D., J. Foster Scott, G. N. Acker, M. D., H. L. E. Johnson, H. A. Robbins, V. A. Moore, J. Melvin Lamb, Thomas Taylor, J. M. Stedman, H. H. Doubleday, José M. Yznaga, William H. Seaman.

First officers, 1878.—President, Dr. R. H. Ward, of Troy, N. Y.; vice-presidents, Dr. S. W. Dennis, of San Francisco, Cal., and C. M. Vorce, of Cleveland, Ohio; secretary, Dr. Henry Jamison, of Indianapolis, Ind.; treasurer, H. F. Atwood, of Chicago, Ill.; executive board, Dr. J. Edward Smith, of Cleveland, Ohio; Dr. George E. Blackham, of Dunkirk, N. Y., and Dr. William H. Atkinson, of New York City.

First officers under incorporation.—President, Marshall D. Ewell; vice-presidents, Robert Reyburn and R. J. Nunn; secretary, William H. Seaman; treasurer, C. C. Mellor.

Officers, 1894–95.—Prof. Simon Henry Gage, Ithaca, N. Y.; vice-presidents, Dr. Veranus A. Moore, Washington, D. C., and Henry G. Hanks, San Francisco, Cal.; secretary, Dr. William H. Seaman, Washington, D. C.; treasurer, Magnus Pflaum, Pittsburg, Pa.; executive committee, Dr. Robert O. Moody, New Haven, Conn.; Charles S. Schultz, Hoboken, N. J.; Prof. Henry B. Ward, Lincoln, Nebr.

PUBLICATIONS.

Proceedings, quarterly, 8vo. Vol. XV was finished with the number for June, 1894.

AMERICAN ORNITHOLOGISTS' UNION.

PORTLAND, CONN.

Organized September 26, 1883; incorporated November 14, 1888, in the District of Columbia, under United States law.

Objects.—The advancement of its members in ornithological science; the publication of a Journal of Ornithology and other works relating to that science; the acquisition of a library, and the care and collection of materials relating to these objects.

First officers.—J. A. Allen, president; Dr. Elliot Coues, Robert Ridgway, vice-presidents; Dr. C. Hart Merriam, secretary and treasurer.

Officers, 1895–96.—Dr. Elliot Coues, president; William Brewster, Dr. C. Hart Merriam, vice-presidents; John H. Sage, secretary; William Dutcher, treasurer.

PUBLICATIONS.

The Auk, a quarterly journal of ornithology; first number issued January, 1884. 8vo. Each number contains about one hundred pages and one colored plate; present editor, Dr. J. A. Allen; associate editor, Frank M. Chapman.

The Code of Nomenclature and Check List of North American Birds, adopted by the American Ornithologists' Union, being the report of the Union on classification and nomenclature. New York: American Ornithologists' Union, 1886. 8vo. Pp. I–VIII, 1-392. Cloth.

An abridged edition, giving only the systematic and English names, was published in 1889. 8vo. Pp. 71.

STATE.

CHAMISSO BOTANICAL SECTION OF THE SCIENCE ASSOCIATION OF THE UNIVERSITY OF CALIFORNIA.

BERKELEY, CAL.

Organized February 25, 1891.

"The object of this club shall be to make such studies and collections as its members may judge necessary to the preparation and publication of a list of plants growing within 20 miles of the foot of Market street, San Francisco, and such other botanical work as the club may see fit to engage in."—Constitution.

The promoters of the club had especially in view the collection of material upon which to found local plant lists.

First officers.—Chairman, Willis L. Jepson; secretary, J. W. Blankinship; curator, Victor K. Chesnut.

Officers, 1895.—President, Walter C. Blasdale; secretary, J. Burtt-Davy.

No publications have been issued as yet, but several of the papers read have been published in Erythea, a journal of botany, West American and general, which is edited by Willis L. Jepson and others, of the department of botany, University of California. A number of papers of importance and value have been read before the section.

SAN DIEGO SOCIETY OF NATURAL HISTORY.

San Diego, Cal.

Incorporated 1872 (?).

Object.—The study of natural history.

First officer.—President, George William Barnes.

Officer, 1894-95.—C. R. Orcutt, corresponding secretary.

SAN FRANCISCO MICROSCOPICAL SOCIETY.

San Francisco, Cal.

Organized June 4, 1870; incorporated August 30, 1872.

Object.—"The promotion of microscopical science in all its branches, to be accomplished by the holding of meetings for scientific intercourse and discussion, by the reading and publication of papers relating to microscopical and kindred science, and by other suitable means."—Constitution.

Officers, 1894-95.—President, Prof. William E. Ritter; vice-president, William E. Lay; recording secretary, Francis E. Crofts; corresponding secretary, George Otis Mitchell; treasurer, Charles C. Riedy.

The society has a library of about 500 titles, embracing nearly 1,000 volumes, including complete files of all the principal microscopical journals, and classical literature in the various branches of microscopical research. In the literature of the fungi, diatomaceæ, and bacteriology it is especially rich.

PUBLICATIONS.

Proceedings, 1893, 8vo.

SANTA BARBARA SOCIETY OF NATURAL HISTORY.

Santa Barbara, Cal.

Organized December, 1878.

Object.—For the purpose of collecting a museum and library, and for the reading of papers on scientific subjects.

First officers.—President, Stephen Bowers; vice-presidents, Dr. L. M. Dimmick, H. C. Ford; treasurer, R. F. Bingham; secretary, Miss A. I. Hails.

Officers, 1894-95.—Vice-presidents, J. W. Calkins, Mrs. A. A. Boyce, Dr. Hatch; secretary, Mrs. Fredericks; treasurer, Mrs. M. A. Ashley; curator and librarian, Mrs. F. C. Lord.

PUBLICATIONS.

Proceedings, I, 1888; II, 1890; about 50 pages each.

HARTFORD SOCIETY OF NATURAL SCIENCES.

Hartford, Conn.

Organized December 18, 1885; incorporated April, 1886.

Object.—The encouragement of investigation in the natural sciences.

First officers.—Gurdon W. Russell, president; J. M. Allen, Samuel L. Elmore, vice-presidents; Ralph W. Cutler, treasurer; W. J. Lewis, secretary; Forrest Morgan, assistant secretary.

Officers, 1895.—J. M. Allen, president; F. S. Luther, vice-president; George L. Parmele, secretary; A. D. Risteen, treasurer. The above officers and the chairman of each section constitute the executive committee.

This society, though organized and incorporated in 1885-86, did not start into active life until May, 1895. It now numbers 167 members and has six working sections organized, viz, geology and mineralogy, botany, zoology, electricity, chemistry, and photography.

THE SOCIETY OF NATURAL HISTORY OF DELAWARE.

WILMINGTON, DEL.

Organized October 29, 1891.

Object.—"To encourage scientific pursuits among our people."

First officers.—William M. Canby, president; Walter D. Bush, vice-president; Miss Emma Gawthrop, recording secretary; John T. Pennypacker, treasurer; board of directors, Prof. Isaac T. Johnson, Miss Sarah M. Fell, Frederic J. Hilbiber, Prof. A. H. Berlin, Prof. F. D. Chester, Wilmer Palmer.

Officers, 1894-95.—William M. Canby, president; Walter D. Bush, vice-president; J. T. Pennypacker, treasurer; Gheretein Yeatman Pyle, recording secretary; board of directors, Wilmer Palmer, Prof. F. D. Chester, Anson A. Maher, Miss Sarah M. Fell, Alfred D. Poole, Ellwood Garrett.

The society has a fair collection of the birds of Delaware, a similar one of the minerals, and an herbarium—which consists mostly of specimens of the United States flora—of about 8,500 species and (estimated) 30,000 specimens, all open to the public under proper conditions.

THE ANTHROPOLOGICAL SOCIETY OF WASHINGTON.

WASHINGTON, D. C.

Organized February 17, 1879; incorporated December 13, 1887.

Object.—"To encourage the study of the natural history of man, especially with reference to America, and shall include somatology, sociology, philology, philosophy, psychology, and technology."

Founders.—A. Wellington Adams, S. Yorke AtLee, Spencer F. Baird, Otis Bigelow, George H. Boehmer, E. A. Burdick, F. H. Cushing, Wills De Hass, Robert Fletcher, G. Brown Goode, John C. Lang, Garrick Mallery, Otis T. Mason, James E. Morgan, P. W. Norris, W. W. Reisinger, Elmer R. Reynolds, W. J. Rhees, Miles Rock, Lenox W. Simpson, J. E. Snodgrass, J. M. Toner, Edwin P. Upham, Lester F. Ward, Joseph M. Wilson.

First officers.—J. W. Powell, president; J. M. Toner, George A. Otis, Garrick Mallery, and Wills De Hass, vice-presidents; Otis T. Mason, corresponding secretary; Elmer R. Reynolds, recording secretary; John C. Lang, treasurer; Frank H. Cushing, curator; Albert S. Gatschet, W. W. Reisinger, G. K. Gilbert, Charles A. White, Thomas Antisell, and J. M. Wilson, council at large.

Officers, 1894-95.—Otis T. Mason, president; Frank Baker, J. W. Powell, Lester F. Ward, and William H. Holmes, vice-presidents; Frank H. Cushing, general secretary; Weston Flint, secretary to the board of managers; Perry B. Pierce, treasurer; F. W. Hodge, curator; James H. Blodgett, William H. Doolittle, Daniel S. Lamb, W J McGee, George R. Stetson, and Thomas Wilson, councilors.

PUBLICATIONS.

Abstract of transactions, 1881, 8vo, pp. 150.
Transactions, I–III, 1882–1885, 8vo, about 200 pages each.
The American Anthropologist, I–VIII; 1888–1895+; quarterly, 8vo; each volume has about 400 pages.
Special papers, I, II, 1894, 8vo.

BIOLOGICAL SOCIETY OF WASHINGTON.

WASHINGTON, D. C.

Organized November 26, 1880.

Object.—"To encourage the study of the biological sciences and to hold meetings at which papers shall be read and discussed."

There were 45 original members. The first officers were: President, Theodore N. Gill; vice-presidents, C. V. Riley, J. W. Chickering, Lester F. Ward, Henry Ulke; secretaries, G. Brown Goode, Richard Rathbun; treasurer, Robert Ridgway; members of council, J. H. Comstock, O. T. Mason, J. H. Kidder, A. F. A. King, George Vasey.

Officers, 1894.—President, George M. Sternberg; vice-presidents, L. O. Howard, Richard Rathbun, B. E. Fernow, C. D. Walcott; secretaries, M. B. Waite, F. A. Lucas; treasurer, F. H. Knowlton; members of council, T. H. Bean, C. W. Stiles, W. H. Ashmead, Theobald Smith, F. W. True.

PUBLICATIONS.

Proceedings, Vols. I–VIII+, 1880–1895, 8vo, averaging about 140 pages each.

THE MICROSCOPICAL SOCIETY OF WASHINGTON.

WASHINGTON, D. C.

Organized February 5, 1884; incorporated October 19, 1892.

Object.—"The cultivation and advancement of microscopical science and the mutual benefit of its members as students of the same."—Constitution.

Incorporators.—Veranus A. Moore, Edwin A. Gibbs, José M. Yznaga, Robert Reyburn, M. D., Thomas Taylor, Ferdinand Blanchard, P. C. Claflin, M. F. Gallagher, M. D., H. H. Hauxhurst, M. D., Walter W. Alleger, Lewis M. Mooers, William H. Seaman, G. N. Acker, M. D., Edward A. Balloch, M. D., Frank T. Chapman, Collins Marshall, George H. Penrose, M. D., Henry H. Doubleday.

First officers under incorporation.—Veranus A. Moore, president; Edwin A. Gibbs, vice-president; Walter W. Alleger, corresponding secretary; Lewis M. Mooers, recording secretary; José M. Yznaga, treasurer; William H. Seaman, curator.

WOMAN'S ANTHROPOLOGICAL SOCIETY.

WASHINGTON, D. C.

Organized, June 8, 1885.

Object.—"To promote anthropology by encouraging its study and facilitating the interchange of thought among those interested in anthropologic research, and by arranging and preserving systematically all information relating to it, and also by holding regular meetings for its discussion."—Constitution.

Founder.—Mrs. Matilda E. Stevenson.

First officers.—Mrs. Matilda E. Stevenson, president; Mrs. Mary E. James and Mrs. Lida Nordhoff, vice-presidents; Miss Sarah A. Scull, corresponding secretary; Mrs. Emma Louise Hitchcock, recording secretary; Mrs. Mary Parke Foster, treasurer; directors, Miss Alice C. Fletcher, Mrs. Jean M. Lander, Mrs. Emma Hammond Ward, Mrs. Mary Olmsted Clarke, Dr. Clara Bliss Hinds, and Mrs. Cornelia E. McDonald.

Officers, 1894.—President, Miss Alice C. Fletcher; first vice-president, Miss Sarah A. Scull; second vice-president, Mrs. Jean M. Lander; recording secretary, Mrs. Susan A. Mendenhall; corresponding secretary and librarian, Mrs. Marianna P. Seaman; treasurer, Mrs. Hannah L. Bartlett; board of directors, Mrs. Laura P. Diller, Mrs. Martha R. Hampson, Dr. Clara B. Finley, Miss Emily Judson Mason, Mrs. Helen Kane, Mrs. Mary S. Bigelow.

PUBLICATIONS.

A number of papers have been published by the society, but most of the work of its members has been issued by other societies or in connection with other publications.

BROOKVILLE SOCIETY OF NATURAL HISTORY.

BROOKVILLE, IND.

Organized February, 1881; incorporated, 1882; reorganized, 1894.

Object.—Study of natural history.

First officers.—President, Rev. D. R. Moore; vice-president, C. F. Goodwin; recording secretary, A. W. Butler; corresponding secretary, E. R. Quick; treasurer, J. E. Rehme.

Officers, 1894.—President, C. F. Goodwin; secretary, A. W. Butler.

PUBLICATIONS.

Bulletins, No. 1, 1885; No. 2, 1886; No. 3, 1888.

THE ANTHROPOLOGICAL CLUB.

BROOKVILLE, IND.

Organized September, 1892.

Object.—The study of man.

First officers.—President, Dr. J. E. Morton; secretary, A. W. Butler.

Officers, 1894-95.—President, Dr. J. E. Morton; secretary, H. S. Voorhees.

THE DAVENPORT ACADEMY OF NATURAL SCIENCE.

DAVENPORT, IOWA.

Organized December 14, 1867; incorporated February 14, 1868.

Object.—The increase and diffusion of a knowledge of the natural sciences by the establishment of a museum, the reading and publication of original papers, and by other suitable means.

Incorporators.—D. S. Sheldon, A. A. Bailer, W. H. Pratt.
Officers, 1894.—Dr. W. L. Allen, president; E. S. Hammatt, vice-president; Dr. A. W. Elmer, recording secretary; W. H. Barris, corresponding secretary; Frank Nadler, treasurer; Prof. W. H. Barris, curator; Charles E. Harrison, librarian.

PUBLICATIONS.

Transactions, Vols. I–VII, 1876–1894. 8vo, plates.

IOWA ORNITHOLOGISTS' ASSOCIATION.

SALEM, IOWA.

Organized June 15, 1894.
Object.—"To promote a more thorough study of the birds of our State, thus awakening a truer love for them and enabling the members to 'look through Nature up to Nature's God.'"
Founders and first officers.—President, Ernest Irons, Council Bluffs; vice-president, Carleton R. Ball, Ames; secretary, David L. Savage, Salem; treasurer, W. W. Loomis, Clermont; executive council, Carleton R. Ball, chairman, Ames; William Alanson Bryan, Ames; E. B. Webster, Cresco.

PUBLICATIONS.

Iowa Ornithologist, 8vo, 32 pages; illustrated; David L. Savage, Salem, editor; quarterly. In each issue are printed the notes of members on some family of birds assigned for special study during the quarter. These notes are in most cases the compilation of years of observation and study.

GRAYWOOD BOTANY CLUB OF KANSAS.

TOPEKA, KANS.

Organized June, 1887.
Object.—"The study and determination of the native plants of Kansas."
First officers.—President, B. B. Smyth; vice-president, Mrs. E. H. Newman; secretary and treasurer, Omar Newman, all of Topeka.
Officers, 1895.—President, B. B. Smyth, Topeka; secretary, J. W. Stailey, Lawrence.

PUBLICATIONS.

Check List of the Plants of Kansas.

PORTLAND SOCIETY OF NATURAL HISTORY.

PORTLAND, ME.

Organized November 24, 1843; incorporated June 7, 1850.
Object.—The study and promotion of the knowledge of natural history, the formation of a collection of specimens in connection therewith, the building up of a library of works on natural history, and the publication of the proceedings of the society.
Founders.—Horace V. Bartol, Sylvester B. Beckett, Eliphalet Case, Charles Cobb, Edward Gould, Jesse W. Mighels, M. D., Augustus Mitchell, John Neal, Henry Quincy, William Senter, Ether Shepley, Woodbury Storer, Rev. Jason Whitman, William Wood, M. D., William H. Wood, Josiah Pennell, George H. Grueby, Randolph A. L. Codman.
First officers (1843).—Ether Shepley, president; Woodbury Storer, vice-president; Sylvester B. Beckett, secretary; William H. Wood, treasurer.
Officers, 1894.—William Wood, M. D., president; Joseph P. Thompson, vice-president; John M. Gould, recording secretary; Prentice C. Manning, corresponding secretary; Franklin R. Barrett, treasurer; ——— ———, cabinet keeper.
The repeated misfortunes of this society in losing twice (1854 and 1866) its buildings, cabinets, libraries, funds, and even insurance money by fire have crippled and prevented the regular continuance of its publications. It now occupies a fine building especially erected for its use in 1880. Its president, Dr. William Wood, has occupied that position for forty-three years.

PUBLICATIONS.

Proceedings, Vol. I, 1869, 8vo, 234 pp.; Vol. II, 1892, 8vo, 2 parts, 72 pp.
Journal, Vol. I, No. 1, 8vo, 1864, 63 pp.
Interim reports, various dates.

BOSTON SOCIETY OF NATURAL HISTORY.

BOSTON, MASS.

Organized April 28, 1830; incorporated February 25, 1831.

Object.—"The encouragement and promotion of the science of natural history."

First officers.—Thomas Nuttall, president; George Hayward, first vice-president; John Ware, second vice-president; Gamaliel Bradford, corresponding secretary; Theophilus Parsons, recording secretary; Simon E. Greene, treasurer; Seth Bass, librarian; curators, Francis C. Gray, George B. Emerson, Joseph W. McKean, Edward Brooks, Walter Channing, Francis Alger, Amos Binney, jr., Benjamin D. Greene.

Officers, 1895-96.—President, William H. Niles; vice-presidents, Nathaniel S. Shaler, William G. Farlow, Charles P. Bowditch; curator, Alpheus Hyatt; secretary, Samuel Henshaw; treasurer, Edward T. Bouvé; librarian, Samuel Henshaw.

PUBLICATIONS.

Journal, 7 vols., 8vo, Boston, 1834–1862.
Anniversary Memoirs, 1 vol., 4to, Boston, 1880.
Memoirs, 4 vols.+, Boston, 1866–1894.
Proceedings, 25 vols.+, Boston, 1844–1892.
Occasional papers, 3 vols.+, Boston, 1869–1880.

THE BREWSTER ORNITHOLOGICAL CLUB OF WORCESTER, MASS

WORCESTER, MASS.

Organized 1889.

Object.—The study of ornithology, especially field ornithology, and the preservation of data.

Founders.—E. H. Forbush, H. B. Long, and Helen A. Ball.

Officers, 1895.—President, Miss Helen A. Ball; secretary and treasurer, Miss Edith Rolston.

CAMBRIDGE ENTOMOLOGICAL CLUB.

CAMBRIDGE, MASS.

Organized 1874; incorporated 1877.

Object.—To cultivate the study of entomology.

First officer.—B. P. Mann, secretary.

Officers, 1894.—T. E. Bean, president; R. Hayward, secretary.

PUBLICATIONS.

Psyche, monthly, 12 or more pages each, sm. 4to; the numbers for three years make a volume.

THE LYCEUM OF NATURAL HISTORY OF WILLIAMS COLLEGE.

WILLIAMSTOWN, MASS.

Organized October, 1835; incorporated at same time as part of the college, but as a separate department for students.

Object.—The study of natural history.

Officers, 1895.—John A. Sampson, president; George W. Hunter, jr., vice-president; Clarence W. Dunham, secretary; William Kirk, jr., curator.

Publications by members of the society are scattered through various journals.

Under the auspices of the lyceum, expeditions for biological study and research have been made to South America, Central America, Florida, Labrador, and Alaska. The results of these expeditions, such as specimens, etc., are now in the college museum. The lyceum numbers among its past members Prof. William K. Brooks, of Johns Hopkins University; Samuel H. Scudder, Prof. William Dwight Whitney, Professor Kingsley, of Tufts College. Among its present members are Professor Clarke, Professor Peck, Messrs. Peabody, Harrington, and Sampson, who represent Williams at the New York marine station and at the laboratories at Woods Holl, Mass.

THE NUTTALL ORNITHOLOGICAL CLUB.

CAMBRIDGE, MASS.

Organized 1873.

Object.—The study of ornithology.

Officers, 1895.—President, William Brewster; vice-president, Charles Theodore

Carruth; secretary, Francis Beach White; treasurer, Charles Foster Batchelder; additional members of the council, Henry M. Spelman, William A. Jeffries, Henry A. Purdie, Robert Walcott, Francis H. Allen.

PUBLICATIONS.

Bulletin of the Nuttall Ornithological Club, 8 volumes, 1876–1883, 8vo. (Continued by the Auk, the quarterly journal published for the American Ornithologists' Union.)

Memoirs of the Nuttall Ornithological Club [sm. 4to], of which No. 1, Bird Migration, by William Brewster, has appeared. Others in preparation.

RIDGWAY ORNITHOLOGICAL CLUB.

WORCESTER, MASS.

Organized June 22, 1889.

Object.—The study of the habits, songs, and breeding range of Worcester County birds, and taxidermy.

First officers.—E. H. Forbush, H. B. Long, O. F. Dodge, founders.

Officers, 1895.—Oscar F. Dodge, president; Charles A. E. Clark, vice-president; Horace B. Long, secretary and treasurer; F. S. Wilder, curator.

THE TAUNTON MICROSCOPICAL SOCIETY.

TAUNTON, MASS.

Organized January 22, 1889.

Objects.—Study of the "microscope in theory and practice, and its use as a means to original investigation and discovery." (Constitution.)

First officers.—President, C. F. Boyden; secretary and treasurer, F. A. Hubbard.

Officers, 1895.—Same.

THE WORCESTER NATURAL HISTORY SOCIETY.

WORCESTER, MASS.

Organized December, 1852, as the "Young Men's Library Association;" incorporated April 16, 1853.

Objects.—The improvement of the young men of the city of Worcester, by affording them intellectual and social advantages, by the maintenance of a library, reading room, and such courses of lectures and classes as may conduce to this end. In April, 1854, a natural history department was added, with Rev. Edward E. Hale as chairman, to which was transferred a collection of natural-history objects collected by the "Worcester Lyceum of Natural History," formed in 1825 by Levi Lincoln, Dr. John Green, Fred W. Paine, Isaac Davis, and Stephen Salisbury. In 1856 it united with the "Worcester County Lyceum" (one of the oldest societies in the country, established for the purpose of giving popular lectures), and the name was changed to "The Lyceum and Library Association." In 1859 its library (4,000 volumes) was given to the city as the nucleus of the free public library then about to be founded. In 1866 the name was again changed to "The Worcester Lyceum and Natural History Association." Object: "The diffusion and promotion of useful knowledge among the inhabitants of the city and county of Worcester—first, by courses of popular lectures; second, by encouraging the study of natural history and by the collection and preservation of specimens in the various departments, together with a library, with a view to that end; third, by aiding in the study of other sciences and the fine arts through acquiring such collections, and by such other means as the association may from time to time adopt. ' In 1884 the name was changed to "The Worcester Natural History Society."

The present society was organized in 1852, with the following officers: President, Hon. Francis H. Dewery; vice-president, George W. Bentley; corresponding secretary; Hon. George F. Hoar; recording secretary, Nathaniel Paine; treasurer, Henry Woodward.

Officers, 1894.—President, Merrick Bemis, M. D.; secretary, Herbert D. Braman; treasurer, Samuel B. Woodward, M. D.; superintendent of museum, Henry Billings. These, together with W. H. Raymenton, M. D., Albert P. Marble, Ph. D., and Franklin P. Rice, constitute a board of directors.

PUBLICATIONS.

Catalogue of the phænogamous and vascular cryptogamous plants of Worcester County, Mass., by Joseph Jackson, Worcester, Mass., 1883. 8vo, 48 pp., paper.

ST. LOUIS CLUB OF MICROSCOPISTS.

St. Louis, Mo.

Organized May 3, 1887.

Object.—Work in pharmaceutical microscopy.

First officers.—Dr. H. M. Whelpley, president; Frank Davis, secretary; A. C. Speth, treasurer.

Officers, 1895.—J. C. Falk, president; S. E. Barber, secretary; Dr. H. M. Whelpley, treasurer.

No separate publications.

THE LINCOLN MICROSCOPE CLUB.

Lincoln, Nebr.

Organized January 25, 1892.

Objects.—"The promotion of interest in the microscope and the encouragement of microscopical research."

First officers.—President, E. T. Hartley; vice-president, A. F. Woods; secretary, Roscoe Pound; executive committee, Dr. H. B. Loury and Dr. F. D. Crim.

Officers, 1895.—President, Dr. H. B. Ward; vice-president, Prof. G. D. Swezey; secretary, Roscoe Pound; treasurer, J. S. Dales; executive committee, Dr. I. C. Philbrick and Prof. B. L. Seawell.

KEENE NATURAL HISTORY SOCIETY.

Keene, N. H.

Organized October 23, 1871; incorporated May 28, 1880.

Objects.—To discover, procure, and preserve whatever may relate to the natural, civil, and literary history of the United States in general and New Hampshire in particular.

Founders.—George A. Wheelock, Frederick S. Stratton, George H. Gilbert, S. H. Brockett, Dexter W. Gilbert and Samuel Wadsworth.

Officers, 1895.—President, George A. Wheelock; vice-president, Samuel Wadsworth; executive committee, I. H. Prouty, C. F. Rowell, and H. Blake.

NEW JERSEY STATE MICROSCOPICAL SOCIETY.

New Brunswick, N. J.

Organized as a club of amateurs in 1869, probably in April; incorporated February 16, 1880.

Objects.—"The cultivation and furtherance of the science of microscopy." (Constitution.)

Founders.—J. W. Meeker, M. D., Julius Bloom, Rev. Charles R. Hartranft, Prof. F. C. Van Dyck, Ph. D.

Officers, 1895.—President, J. B. Smith, Sc. D.; vice-president, D. C. English, M. D.; corresponding secretary, H. R. Baldwin, M. D.; recording secretary, F. H. Blodgett; treasurer, A. C. Hutton, M. D.; curator, A. H. Chester, Sc. D.; trustees, J. A. Manley and M. H. Hutton, D. D.

PUBLICATIONS.

Abstract of the minutes from April, 1871, to June, 1894. 8vo.

AMERICAN INSTITUTE OF PHRENOLOGY.

New York, N. Y.

Incorporated April 20, 1866, as "The American Craniological Museum;" title changed August 27, 1876, to "The American Institute of Phrenology."

Object.—For the purpose of promoting instruction in all departments of learning connected therewith and for collecting and preserving crania, casts, busts, and other representations of the different races, tribes, and families of men; courses of lectures, public and private, being given on topics relating to anthropology, phrenology, physiology, psychology, insanity, ethnology, brain function, etc.

Founders.—Amos Dean, LL. D., Horace Greeley, Samuel Osgood, D. D., A. Oakey Hall, R. T. Trall, M. D., Henry Dexter, Samuel R. Wells, Edward P. Fowler, M. D., Nelson Sizir, and Lester A. Roberts. Trustees: Nelson Sizir, C. F. Fowler, Edward P. Fowler, M. D., H. S. Drayton, M. D., and E. C. Beall, M. D.

PUBLICATIONS.

Proceedings, annual. 8vo and 12mo.

AMERICAN MUSEUM OF NATURAL HISTORY.

CENTRAL PARK, NEW YORK CITY.

Organized January 19, 1869; incorporated April 6, 1869.

Objects.—For the purpose of establishing and maintaining in the city of New York a museum and library of natural history; of encouraging and developing the study of natural science; of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction and recreation.

Founders.—John David Wolfe, Robert Colgate, Benjamin H. Field, Robert L. Stuart, Adrian Iselin, Benjamin B. Sherman, William A. Haines, Theodore Roosevelt, Howard Potter, William T. Blodgett, Morris K. Jesup, D. Jackson Steward, J. Pierpont Morgan, A. G. P. Dodge, Charles A. Dana, Joseph H. Choate, and Henry Parish.

Officers, 1895.—President, Morris K. Jesup; vice-presidents, James M. Constable and D. Jackson Steward; treasurer, Charles Lanier; secretary and assistant treasurer, John H. Winser.

PUBLICATIONS.

Annual report, 1870 to 1894.
Bulletin, Vol. I–VI, 1881 to 1894.
Memoirs, Vol. I, Part I, 1893.

THE BUFFALO MICROSCOPICAL CLUB.

BUFFALO, N. Y.

Organized February 17, 1876.

Object.—The study of microscopy.

Founders.—Dr. George E. Fell, James W. Ward, Dr. Lucien Howe, Dr. Henry R. Hopkins.

First officers.—George Hadley, president; James W. Ward, secretary.

Officers, 1895.—James W. Ward, president; Dr. Lee H. Smith, secretary.

PUBLICATIONS.

Transactions, Vol. I–IV., 8vo, 72 pp. each.

THE BUFFALO NATURALISTS' FIELD CLUB OF THE BUFFALO SOCIETY OF NATURAL SCIENCES.

BUFFALO, N. Y.

Organized May, 1880; incorporated 1882.

Object.—The promotion of the knowledge of nature and the mutual improvement of its members by means of field excursions, the preservation of specimens, and preparation, reading, and discussions of papers and reports on scientific subjects.

Founders.—Charles Linden and George Wardwell.

Officers, 1895.—President, Miss Mary A. Fleming; vice-president, James A. Savage; recording secretary, Mrs. F. W. Barrows; corresponding secretary, C. E. Cummings; field secretary, R. H. Johnson; treasurer, E. C. Mason.

THE LINNÆAN SOCIETY OF NEW YORK.

NEW YORK CITY.

Organized March 7, 1878.

Object.—The study of botany.

First president.—C. Hart Merriam.

Officers, 1894-95.—President, J. A. Allen; vice-president, Frank M. Chapman; secretary, W. W. Granger; treasurer, L. S. Foster.

PUBLICATIONS.

Transactions, two volumes issued.
Abstract of Proceedings, six numbers issued.

THE NEW YORK ENTOMOLOGICAL SOCIETY.

NEW YORK CITY.

Organized June 29, 1892; incorporated June 7, 1893.

Object.—The advancement of entomological science.

Founders.—William Beutenmüller, Charles Palm, Charles Tunison, Ottomar Dietz, and Gustav Beyer.

Officers, 1895.—J. L. Zabriskie, president; Charles Palm, vice-president; Louis H. Joutel, recording secretary; R. L. Ditmars, corresponding secretary; C. F. Groth, treasurer; executive committee, O. Dietz, G. W. J. Angell, G. Beyer, R. Ottolengui, and C. Schaeffer.

PUBLICATIONS.

Journal of the New York Entomological Society, quarterly, pp. 200; edited by William Beutenmüller.

NEW YORK MICROSCOPICAL SOCIETY.

NEW YORK CITY.

Organized December 11, 1877; incorporated, 1877.

Object.—The cultivation and advancement of microscopical science.

First officers.—President, J. D. Hyatt; vice-president, G. I. Whitehead; corresponding secretary, A. J. Swan; recording secretary, R. Hitchcock; treasurer, W. C. Hubbard; librarian, D. Bryce Scott.

Officers, 1895.—President, Edward G. Love, Ph. D.; vice-president, Frank D. Skeel, M. D.; corresponding secretary, Rev. J. L. Zabriskie; recording secretary and curator, George E. Ashby; treasurer, James Walker; librarian, Ludwig Riederer.

PUBLICATIONS.

Journal, a quarterly, now in its eleventh year; 8vo; about 150 pp.

TORREY BOTANICAL CLUB.

NEW YORK CITY.

Incorporated, April 21, 1871.

First president.—John Torrey.

Officers, 1895.—President, Addison Brown; vice-presidents, T. F. Allen, L. H. Lighthipe; recording secretary, Henry H. Rusby; corresponding secretary, John K. Small; treasurer, Henry Ogden; curator, Josephine E. Rogers; librarian, Effie A. Southworth; editor, N. L. Britton; associate editors, Emily L. Gregory, Anna Murray Vail, Arthur Hollick, Byron D. Halsted, and A. A. Heller.

PUBLICATIONS.

Bulletin, now in twenty-second volume. Memoirs, now in tenth volume.

THE CINCINNATI SOCIETY OF NATURAL HISTORY.

CINCINNATI, OHIO.

Organized January 19, 1870, succeeding the Western Academy of Sciences; incorporated June 20, 1870.

Objects.—To advance and diffuse scientific knowledge.

First officers.—President, Dr. John A. Warder, 1870–1875; first vice-president, Dr. W. H. Mussey, 1870–1876; secretary, Ludlow Apjones, 1870–71; treasurer, Robert Brown, jr., 1870–71; librarian, Dr. H. H. Hill, 1871–1874; custodian, Dr. F. P. Anderson, 1870–71; curator of mineralogy, Dr. E. S. Wayne, 1870–71; curator of botany, Horatio Wood, 1870–71; curator of paleontology, Samuel A. Miller, 1870–1874; curator of conchology, Dr. H. H. Hill, 1871–72; curator of entomology, Lucius Curtis, 1871–72; curator of ichthyology, Prof. D. D. Yoend, 1873–1878; curator of comparative anatomy, Prof. W. H. Mussey, 1873–1875; curator of archæology, Dr. H. H. Hill, 1874–1878; curator of ornithology, Charles Dury, 1874–1878; curator of mathematics and astronomy, Prof. Ormond Story, 1876–1878; curator of chemistry and physics, Prof. R. B. Warder, 1876–1878; curator of herpetology, Dr. August J. Woodward, 1877–78; curator of meteorology, S. S. Bassler, 1877–78; curator of microscopy, V. T. Chambers, 1877–78; taxidermist, Charles Dury, 1870–1874; trustees, L. E. Wright, 1875–1878, and Dr. J. H. Hunt, 1875–76.

Officers, 1894.—President, Davis L. James; first vice-president, Dr. A. T. Keckeler; second vice-president, Dr. B. M. Ricketts; secretary, Thomas H. Kelley; treasurer, T. B. Collier; members of executive board at large, Dr. O. D. Norton, Dr. F. M. Langdon, Prof. George W. Harper, and Charles Dury; director of museum, Seth Hayes; trustees, Dr. P. M. Bigney and A. A. Ferris; curator of geology, E. O. Ulrich; curator of botany, Davis L. James; curator of zoology, Charles Dury; curator of anthropology, Dr. O. D. Norton; curator of photography, H. J. Buntin; curator of microscopy, Dr. B. M. Ricketts; curator of chemistry, Dr. A. J. Carson.

PUBLICATIONS.

A quarterly journal, 8vo, begun in 1878.

THE CUVIER CLUB OF CINCINNATI.

CINCINNATI, OHIO.

Organized June 17, 1881; incorporated June 21, 1881.

Objects.—"To increase the food supply of Ohio by protecting the game and fish, to enforce the laws concerning the same, and to establish and maintain a museum and library of natural history." (Article of incorporation).

Founders.—L. A. Harris, H. C. Culbertson, Thomas. A. Logan, George W. Smith, J. F. Blackburn.

Officers, 1895.—President, H. C. Culbertson; trustees, P. E. Roach, Henry Hanna, Alex. Starbuck, H. C. Culbertson, Sam. P. Post, C. W. Holloway, J. M. Doherty, E. G. Webster, and John T. Rouse; recording secretary, J. F. Blackburn; corresponding secretary, C. G. Lloyd.

PUBLICATIONS.

Catalogue of the museum, issued in 1886, which enumerates 1,166 specimens then in the museum. The museum embraces at the present time 1,345 specimens of natural history, principally of native birds.

ACADEMY OF NATURAL SCIENCES OF PHILADELPHIA.

PHILADELPHIA, PA.

Organized January 25, 1812; incorporated March 24, 1817.

Object.—The study of nature and the publication of results.

Founders.—Jacob Gilliams, Camillus McMahan Mann, M. D., N. A. Parmentier, Thomas Say, John Shinn, jr., John Speakman, and Gerard Troott.

Officers, 1894.—President, Isaac J. Wistar; vice-presidents, Thomas Meehan and Rev. Henry C. McCook, D. D.; recording secretary, Edward J. Nolan, M. D.; corresponding secretary, Benjamin Sharp, M. D.; treasurer, Charles P. Perot; librarian, Edward J. Nolan, M. D.; curators, W. S. W. Ruschenberger, M. D., Henry C. Chapman, M. D., Samuel G. Dixon, M. D., and Arthur Erwin Brown; councilors to serve three years, Thomas A. Robinson, John H. Redfield, Charles Morris, and Harold Wingate; finance committee, Charles Morris, Charles E. Smith, Uselma C. Smith, William Sellers, and George H. Horn, M. D.

PUBLICATIONS.

Journal, first series, Vols. I–VIII, 1817–1842. 8vo.
———, second series, 1847–1888, Vols. I–IX, parts 1 and 2. 4to.
Proceedings, first series, Vols. I–VIII, 1841–1856. 8vo.
———, second series, Vols. I–XIV, 1857–1870.
———, third series, Vols. I–XXI, 1871–1891.
American Journal of Conchology, Vols. I–VII, 1865–1871. 8vo.

BIOLOGICAL AND MICROSCOPICAL SECTION OF THE ACADEMY OF NATURAL SCIENCE OF PHILADELPHIA.

PHILADELPHIA, PA.

Organized March 3, 1858.

Object.—To facilitate and encourage special investigation in the branches of science known as biology and microscopy.

Founders.—Drs. Joseph Leidy, William A. Hammond, J. Aitken Meigs, J. Cheston Morris, George B. Morehouse, J. J. Woodward, Charles S. Merts, Edward Minturn, Charles S. Boker, J. G. Hunt, T. M. Drysdale, J. M. Corse, T. D. Richardson, F. G. Smith, R. E. Griffiths, W. D. Hoyt, Charles F. Beck, William Camac, S. Weir Mitchell, Henry Hartshorne, A. H. Rand, James Paul, W. P. Foulke, J. H. Slack, James W. Queen, Edward Tilghman, and H. D. Schmidt.

Present officers.—Director, Prof. Benjamin Sharp, M. D.; vice-director, John C. Wilson; treasurer, Charles P. Perot; corresponding secretary, John G. Rothermel; conservator, George A. Rex., M. D.; recorder, M. V. Ball, M. D.

PUBLICATIONS.

The society publishes its proceedings in the Journal of the Academy and in its annual report.

THE IRON CITY MICROSCOPICAL SOCIETY.

PITTSBURG, PA.

Organized October, 1881; incorporated March 7, 1891.

Objects.—To bring together for mutual aid and encouragement all interested in microscopical studies and investigations; to promote original research; to form a library of works on microscopy and allied sciences, and a collection of objects relating to the same; and to disseminate a knowledge of and excite an interest in the microscope as an instrument of scientific research, and of private and social entertainment.

First officers.—President, Thomas J. Gallaher, M. D.; first vice-president, J. G. Templeton, A. M., D. D. S.; second vice-president, Thomas Kennedy; recording secretary, Hiram De Puy, M. D., D. D. S.; corresponding secretary, Prof. J. H. Logan; treasurer, Thomas M. Miller.

Officers, 1894.—President, Prof. Gustave Guttenberg; first vice-president, Prof. J. G. Ogden; second vice-president, Prof. J. H. Logan; recording secretary, Hiram De Puy, M. D., D. D. S.; corresponding secretary, J. F. Henrici; treasurer, William Thaw Denniston; curator, Magnus Pflaum.

PUBLICATIONS.

Many of the papers read before the society have appeared in the microscopical journals.

LINNÆAN SOCIETY.

LANCASTER, PA.

Organized February 8, 1862; incorporated August 30, 1865.

Objects.—For the study of science and history and the collection and preservation of scientific and historical objects, with special reference to Lancaster City and County.

First officers.—President, Prof. T. C. Porter; vice-president, Prof. J. P. Wickersham; treasurer, Prof. S. S. Rathvon; recording secretary, Jacob Stauffer; corresponding secretary, J. R. Sypher; curators, John B. Kevinski and S. S. Auxer.

Founders.—Prof. T. C. Porter, Prof. S. S. Rathvon, Prof. J. P. Wickersham, J. Stauffer, D. G. Swartz, Prof. J. B. Kevinski, John F. Heinitsh, J. R. Sypher, S. S. Auxer, Prof. E. B. Weaver.

Officers, 1894.—President, Dr. C. A. Heinitsh; vice-presidents, Rev. Dr. J. S. Stahrand, Prof. H. F. Bitner; treasurer, Dr. M. W. Raub, recording secretary, S. M. Sener; corresponding secretary, J. F. Meyer; librarian, Mrs. L. D. Zell; curators, Dr. C. A. Heinitsh, S. M. Sener, Prof. H. F. Bitner, and Prof. Harvey Newcomer.

PUBLICATIONS.

Linnæan Bulletin, 1 vol., 1884, crown, 8vo; since discontinued.
Papers now read before the society are published in the Saturday issue of the Daily New Era, of Lancaster.

LYCEUM OF NATURAL HISTORY.

MARIETTA, PA.

Organized 1867; incorporated 1868.

Object.—The furtherance of science.

First officers.—President, Judge J. J. Libhart; vice-president, George W. Mehaffey (since the death of Judge Libhart he has acted as president); secretary, I. S. Geist; treasurer, Brewster Cameron.

Officers, 1895.—Same.

SPENCER F. BAIRD NATURALISTS' ASSOCIATION.

READING, PA.

Organized April 1, 1882.

Objects.—The study of different branches of natural sciences, and the mutual aid from each thereto.

First officers.—Chester D. Schafer, president; Harry G. Moyer, vice-president; Peter Groff, secretary and treasurer; Thomas Lesher, curator.

Officers, 1894.—H. H. Weitzel, president; George Gehret, vice-president; Theo. A. Kendall, secretary and treasurer; Arthur Brooks, curator.

WAGNER FREE INSTITUTE OF SCIENCE.

PHILADELPHIA, PA.

Organized and incorporated March 9, 1855.

Objects.—Gratuitous instruction in the natural sciences and the arts, the support of a free reading room and library, and of a museum for all objects designed in the opinion of the trustees to instruct those inhabitants of the city of Philadelphia whose occupations are such as to deprive them of proper recreation and instruction.

William Wagner, founder; William H. Allen, James Bryan, Robert E. Peterson, and George M. Keim, trustees, at time of incorporation.

Officers, 1894.—Samuel Wagner, president; Joseph Willcox, secretary; R. B. Westbrook, treasurer; J. V. Merrick, Harrison S. Morris, S. G. Skidmore, and Samuel T. Wagner, trustees, at present.

PUBLICATIONS.

Transactions, Vols. I–IV +, 1887–1892, royal 8vo, averaging about 150 pages to the volume; plates.

PROVIDENCE FRANKLIN SOCIETY.

PROVIDENCE, R. I.

Organized 1821; incorporated 1823.

Objects.—Study and advancement of natural sciences.

First officers.—President, William T. Grinnell; secretary, Daniel S. Lawrence; treasurer, Charles Hadwin; general committee, Stanford Newell and Owen Mason.

Officers, 1894–95.—President, Scott A. Smith; vice-president, Charles A. Catlin; secretary, Christopher R. Drowne; treasurer, Albert L. Calder; standing committee, David W. Hoyt, James M. Southwick, and Dr. N. B. Whitaker.

PUBLICATIONS.

Geology of Rhode Island, 1887, 8vo, 130 pp.

BRATTLEBORO SOCIETY OF NATURAL HISTORY.

BRATTLEBORO, VT.

Organized July 28, 1888.

Objects.—The purposes of the society are the promotion of such measures as shall tend to the advancement and diffusion of a knowledge of natural history in the community and especially to the formation of a typical museum in the various departments.

Founder.—Dr. William B. Clark, of Johns Hopkins University.

First officers.—President, Hon. Hoyt H. Wheeler; vice-presidents, Dr. Joseph Draper, Hon. James M. Tyler, and Rev. William H. Collins; recording secretary, Miss Janette Howe; corresponding secretary, Dr. William B. Clark; treasurer, George S. Dowling.

Officers, 1895.—President, Hon. Hoyt H. Wheeler; vice-presidents, Richards Bradley and Hon. J. M. Tyler; treasurer, George S. Dowling; recording secretary, Henry A. Chapin; corresponding secretary, Dr. William B. Clark.

The museum, through the kindness of the trustees of the Brooks Library, is comfortably quartered and contains the shell collections of A. S. Green and the botanical collection of Charles Frost, in addition to many specimens purchased and donated. The amount of their annual dues are used in the purchase of specimens, and the museum bids fair to be one of the best in the Connecticut Valley.

VI. ECONOMIC SCIENCE AND STATISTICS.

NATIONAL.

THE ACTUARIAL SOCIETY OF AMERICA.

NEW YORK, N. Y.

Organized April 25, 1889.

Object.—"The promotion of actuarial science by personal intercourse, presentation of papers, discussion, etc."

First officers.—President, Sheppard Homans; first vice-president, David Parks

Fackler; second vice-president, Howell W. St. John; secretary, Israel C. Pierson; treasurer, Bloomfield J. Miller; other members of council, Oscar B. Ireland, George W. Phillips, William McCabe, Henry W. Smith, Emory McClintock.

Officers, 1895.—President, Howell W. St. John; first vice-president, Emory McClintock; second vice-president, Bloomfield J. Miller; secretary, Israel C. Pierson; treasurer, Oscar B. Ireland; other members of council, Sheppard Homans, David Parks Fackler, George B. Woodward, Thomas B. Macaulay, George W. Phillips, Asa S. Wing, Daniel H. Wells, Charles A. Loveland.

PUBLICATIONS.

Papers and transactions, 8vo, semiannual, 3 vols., about 400 pages each.

THE AMERICAN ACADEMY OF POLITICAL AND SOCIAL SCIENCE.

PHILADELPHIA, PA.

Organized December 14, 1889; incorporated February 14, 1891.

Object.—"The object of the academy is the promotion of the political and social sciences, in the comprehensive sense of those terms. With no intention of excluding other suitable means, the following methods may be enumerated as of special importance in furthering the ends of the society: (1) Accumulation of a library of works pertaining to the subjects cultivated by the academy, and, in general, the provision of facilities for research; (2) encouragement of investigation by the offering of prizes for specified contributions to science, and by extending pecuniary aid in suitable cases to students and investigators; (3) publications of valuable papers and reports presented to the academy either by members or others; (4) regular meetings for the presentation and discussion of papers and other contributions to political and social science; (5) dissemination of political and economic knowledge throughout the community by the establishment of public lecture courses in political and social science, and by such other means as may from time to time seem expedient." (Constitution.)

First officers.—President, Edmund J. James, Ph. D., University of Pennsylvania; vice-presidents, Henry C. Lea, Prof. F. H. Giddings, A. M., Bryn Mawr College; Prof. W. P. Holcomb, Ph. D., Swarthmore College; secretaries—corresponding secretary, Roland P. Falkner, Ph. D.; general secretary, C. R. Woodruff; recording secretary, George Henderson; treasurer, Stuart Wood; librarian, John L. Stewart.

General advisory committee.—Dr. C. K. Adams, president of Cornell University; Dr. E. B. Andrews, president of Brown University; Dr. James B. Angell, president of Michigan University; Prof. W. J. Ashley, Toronto University; Prof. F. W. Blackmar, University of Kansas; J. G. Bourinot, C. M. G., LL. D., D. C. L., Ottawa, Canada; Prof. J. W. Burgess, Columbia College; Hon. Thomas M. Cooley, Interstate Commerce Commission; Prof. R. T. Ely, Johns Hopkins University; Prof. Henry W. Farnam, Yale University; Prof. W. W. Folwell, University of Minnesota; Prof. Frank Goodnow, Columbia College; Hon. J. A. Jameson, Chicago, Ill.; Prof. J. W. Jenks, University of Indiana; Dr. William Preston Johnston, president of Tulane University; Prof. Bernard Moses, University of California; Prof. F. G. Peabody, Harvard College; Simon Sterne, esq., New York City; Hannis Taylor, esq., Mobile, Ala.; Prof. J. B. Thayer, Harvard Law School; Dr. F. N. Thorpe, University of Pennsylvania; Dr. Francis A. Walker, president of Boston Institute of Technology; Prof. Woodrow Wilson, Princeton University; Lester F. Ward, esq., Washington, D. C.

Officers, 1894.—President, Edmund J. James, Ph. D., University of Pennsylvania; vice-presidents, Henry C. Lea, Prof. F. H. Giddings, A. M., Columbia College; secretaries—corresponding secretary, R. P. Falkner, Ph. D.; general secretary, John Quincy Adams, Ph. D.; recording secretary, C. R. Woodruff; treasurer, Stewart Wood; librarian, John L. Stewart.

General advisory committee.—Dr. C. K. Adams, president of Wisconsin University; Prof. C. F. Bastable, Dublin University; Prof. F. W. Blackmar, University of Kansas; J. G. Bourinot, C. M. G., LL. D., D. C. L., Ottawa, Canada; Prof. J. W. Burgess, Columbia College; Hon. Thomas M. Cooley, Ann Arbor, Mich.; Prof. R. T. Ely, Wisconsin University; Prof. Henry W. Farnam, Yale University; Prof. W. W. Folwell, University of Minnesota; Hon. Lyman J. Gage, Chicago, Ill.; Prof. John K. Ingram, LL. D., Trinity College, Dublin; Prof. J. W. Jenks, Cornell University; Dr. William Preston Johnston, president of Tulane University; Right Rev. John J. Keane, D. D., Catholic University of America; Prof. Bernard Moses, University of California; Prof. J. S. Nicholson, M. A., Edinburgh University; Dr. Henry Wade Rogers, president Northwestern University; Prof. Henry Sidgwick, Cambridge University; Prof. William Smart, Queen Margaret College, Glasgow; Simon Sterne, esq., New York City; Hon. Hannis Taylor, LL. D., Madrid, Spain; Prof. J. B. Thayer, Harvard Law School;

Prof. F. N. Thorpe, University of Pennsylvania; Dr. Francis A. Walker, president Massachusetts Institute of Technology; Lester F. Ward, esq., Washington, D. C.; Prof. Woodrow Wilson, Princeton University.

PUBLICATIONS.

The academy issues 2 series of publications, the first being the Annals of the American Academy, which is a bimonthly journal, and which contains the proceedings of the scientific sessions of the academy, personal notes, book reviews and notes, and notes on municipal government. In addition to the 6 numbers of the Annals which are published each year, supplements are sent from time to time. These supplements consist of translations of important scientific works, the constitutions of foreign countries, and other papers too long to be printed in the Annals.

The first number of the Annals was published in July, 1890. The first year it was issued as a quarterly. The first volume consisted of 4 numbers and 4 supplements, making, with the supplements, 1,117 pages, and without them, 754 pages; the second volume, of 6 numbers, with a total of 896 pages; the third volume, of 6 numbers and 2 supplements, with a total of 1,000 pages with the supplements and 852 without them; the fourth volume, of 6 numbers and 2 supplements, with a total of 1,330 pages with the supplements and 1,016 pages without them; the fifth volume is now in course of publication; all 8vo.

The academy issues in a special series the principal papers which have been submitted to it. Thus far 135 numbers have been issued in this series—8vo.

THE AMERICAN ECONOMIC ASSOCIATION.

ITHACA, N. Y.

Organized September 9, 1885.

Objects.—"(1) The encouragement of economic research, especially the historical and statistical study of the actual conditions of industrial life; (2) the publication of economic monographs; (3) the encouragement of perfect freedom of economic discussion (the association, as such, will take no partisan attitude); (4) the establishment of a bureau of information designed to aid members in their economic studies." (Constitution, Art. II.)

First officers.—President, Francis A. Walker, LL. D., Massachusetts Institute of Technology; first vice-president, Henry C. Adams, Ph. D., University of Michigan; second vice-president, Edmund J. James, Ph. D., University of Pennsylvania; third vice-president, John B. Clark, A. M., Smith College; secretary, Richard T. Ely, Ph. D., Johns Hopkins University; treasurer, Edwin R. A. Seligman, Ph. D., Columbia College.

Officers, 1896.—Ex-presidents, Francis A. Walker, LL. D., Massachusetts Institute of Technology, Charles F. Dunbar, LL. D., Harvard University; president, John B. Clark, Ph. D., Amherst College; vice-presidents, James H. Canfield, LL. D., chancellor University of Nebraska, Arthur T. Hadley, M. A., Yale University, George W. Knight, Ph. D., Ohio State University; secretary, Jeremiah W. Jenks, Ph. D., Cornell University, Ithaca, N. Y.; treasurer, Frederick B. Hawley, A. M., 141 Pearl street, New York City; publication committee, H. H. Powers, A. M., chairman, Smith College, Northampton, Mass., H. W. Farnam, A. M., Yale University, W. J. Ashley, A. M., Harvard University, Davis R. Dewey, Ph. D., Massachusetts Institute of Technology, and William A. Scott, University of Wisconsin.

PUBLICATIONS.

Publications of the American Economic Association, Vols. I–X, 1886–1895, 8vo; six numbers are issued yearly, but at irregular intervals.

AMERICAN SOCIAL SCIENCE ASSOCIATION.

CONCORD, MASS.

Organized October, 1865.

Object.—The promotion of social science.

Founders.—W. B. Rogers, Mrs. C. H. Dall, Samuel Eliot, F. B. Sanborn.

Officers, 1894–95.—President, F. J. Kingsbury, Waterbury, Conn.; first vice-president, H. L. Wayland, Philadelphia; vice-presidents, Francis Wayland, New Haven, Conn.; Daniel C. Gilman, Baltimore, Md.; William T. Harris, Washington, D. C.; Carroll D. Wright, Washington, D. C.; Mrs. John E. Lodge, Boston; Lucy Hall-Brown, M. D., Brooklyn, N. Y.; Mrs. Caroline H. Dall, Washington, D. C.; Samuel W. Dike, D. D., Auburndale, Mass.; Charles A. Peabody, New York; Andrew Dickson White, St. Petersburg, Russia; Grace Peckham, M. D., New York; Henry B. Baker, Lansing, Mich.; Dorman B. Eaton, New York; Henry Villard, New York;

H. Holbrook Curtis, M. D., New York; R. A. Holland, St. Louis, Mo.; John Eaton, Washington, D. C.; general secretary, F. B. Sanborn, Concord, Mass.; treasurer, Anson Phelps Stokes, 45 Cedar street, New York.

PUBLICATIONS.

Journal of Social Science contains the transactions of the association. 8vo. Nos. I-XXXII+.

AMERICAN STATISTICAL ASSOCIATION.

BOSTON, MASS.

Organized 1839; incorporated February 5, 1841.

Object.—"To collect, preserve, and diffuse statistical information in the different departments of human knowledge." (Constitution.)

First officers.—Hon. R. Fletcher, president; Henry Lee, vice-president; Rev. J. B. Felt, secretary.

PUBLICATIONS.

Publications. Vols. I-IV+. 8vo. 1888-1895. pp. 492, 470, 614, etc.

POLITICAL SCIENCE ASSOCIATION OF THE CENTRAL STATES.

COLUMBUS, OHIO.

Organized 1894.

Object.—To advance the interests of economic science.

Officers, 1895.—President, Jesse Macy, A. M.; vice-presidents, Albion W. Small, Ph.D., Charles H. Haskins, Ph.D., Henry C. Adams, Ph.D., James A. Woodburn, Ph.D.; secretary, George W. Knight, Ph.D., Columbus, Ohio; treasurer, Frank W. Blackmar, Ph.D., Lawrence, Kans.

VII. MECHANICAL SCIENCE.

NATIONAL.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.

26 CORTLANDT STREET, NEW YORK, N. Y.

Organized May 13, 1884.

Objects.—"To promote the arts and sciences connected with the production and utilization of electricity, and the welfare of those employed in these industries, by means of meetings for social intercourse, the reading and discussion of professional papers, and the circulation by means of publications among its members and associates of the information thus obtained."

Founders.—A preliminary meeting of the founders of the American Institute of Electrical Engineers was held in New York City April 15, 1884, in response to a call which had been very generally circulated and signed by gentlemen of prominence in electrical circles. The following is an extract from the circular of information regarding the scope of the proposed society:

"An international electrical exhibition is to be held in Philadelphia next autumn, to which many of the famous foreign electrical savants, engineers, and manufacturers will be visitors, and it would be a lasting disgrace to American electricians if no American national electrical society were in existence to receive them with the honors due from their colaborers of the United States. It is proposed to organize the American Institute of Electrical Engineers somewhat after the model of the American civil, mechanical, and mining engineers' societies or institutes."

At a subsequent meeting, held May 13, 1884, a permanent organization was effected and the following officers elected: President, Dr. Norvin Green; vice-presidents, Prof. A. Graham Bell, Thomas A. Edison, Charles H. Haskins, Prof. Charles R. Cross, George A. Hamilton, Frank L. Pope; managers, Charles F. Brush, Stephen D. Field, Prof. Edwin J. Houston, Frank W. Jones, W. W. Smith, Theodore N. Vail, William H. Eckert, Prof. Elisha Gray, M. L. Hellings, George B. Prescott, Prof. W. P. Trowbridge, Edward Weston; treasurer, Rowland R. Hazard; secretary, Nathaniel S. Keith.

Officers, 1894-95.—President (term expires 1895), Prof. Edwin J. Houston; vice-presidents, (terms expire 1895) Patrick B. Delany, H. Ward Leonard, William Wallace, (terms expire 1896) Prof. William A. Anthony, Prof. Francis B. Crocker, James Hamblet; managers (terms expire 1895), Charles Wirt, Angus S. Hibbard, Dr. Michael I. Pupin, Charles P. Steinmetz, (terms expire 1896) Prof. Harris J. Ryan, Charles Hewitt, J. J. Carty, William J. Hammer, (terms expire 1897) A. E. Kennelly, Wil-

liam D. Weaver, Charles S. Bradley, W. B. Vansize; treasurer (term expires 1895), George M. Phelps; secretary (term expires 1895), Ralph W. Pope.

The institute has about 900 members.

PUBLICATIONS.

Transactions, issued monthly. 8vo. Making an annual volume of about 700 pages. Vol. XI. 1894.

THE AMERICAN INSTITUTE OF MINING ENGINEERS.

13 Burling Slip, New York, N. Y.

Organized in May, 1871, at Wilkesbarre, at a meeting called by circular, signed by Mr. Eckley B. Coxe and Mr. R. P. Rothwell.

Objects.—To promote the arts and sciences connected with the economical production of the useful minerals and metals, and the welfare of those employed in these industries, by means of meetings for social intercourse and the reading and discussion of professional papers, and to circulate, by means of publications among its members and associates, the information thus obtained.

First officers.—David Thomas, president; Martin Coryell, secretary; Theodore D. Rand, treasurer.

Officers, 1894.—John Fritz, president; R. W. Raymond, secretary; Theodore D. Rand, treasurer.

PUBLICATIONS.

Transactions. Vols. I–XXIII. 8vo. Of late years averaging from 800 to 1,000 pages.

The professional papers contained in these volumes are also issued separately to members in pamphlet form.

AMERICAN SOCIETY OF CIVIL ENGINEERS.

New York, N. Y.

Organized November, 1852; incorporated 1852.

Objects.—Advancement of engineering knowledge and practice and the maintenance of a high professional standard among its members.

First officers.—President, James Laurie; vice-presidents, Edward Gardiner, Charles W. Copeland; secretary and treasurer, Robert B. Gorsuch; directors, W. H. Morell, W. H. Sidell, Julius W. Adams, James P. Kirkwood, Alfred W. Craven.

Officers, 1894.—President, William P. Craighill; vice-presidents, Charles Macdonald, Elmer L. Corthell, Charles C. Martin, Joseph M. Wilson; secretary, Francis Collingwood; treasurer, John Bogart; directors, L. L. Buck, Sir Casimir S. Gzowski, Desmond Fitzgerald, C. L. Strobel, Benjamin M. Harrod, John Thomson, Foster Crowell, H. G. Prout, Willard S. Pope, Frederic P. Stearns, John T. Fanning, Olin H. Landreth; assistant secretary, Charles Warren Hunt; auditor, Thomas B. Lee.

PUBLICATIONS.

Transactions, monthly. 8 vo. pp. 150.

THE AMERICAN SOCIETY OF MECHANICAL ENGINEERS.

New York, N. Y.

Organized April 7, 1880; incorporated December 27, 1881.

Objects.—"To promote the arts and sciences connected with engineering and mechanical construction, by means of meetings for social intercourse and the reading and discussion of professional papers, and to circulate, by means of publication among its members, the information thus obtained." (Constitution.)

First officers.—President, Prof. R. H. Thurston, Ithaca, N. Y.; vice-presidents, H. R. Worthington, New York City; Coleman Sellers, Philadelphia, Pa.; Eckley B. Coxe, Drifton, Pa.; Q. A. Gilmore, United States Army; W. H. Shock, United States Navy; Alex. L. Holley, New York City; managers, William P. Trowbridge, New York City; Theo. N. Ely, Altoona, Pa.; John C. Hoadley, Lawrence, Mass.; Washington Jones, Philadelphia, Pa.; William B. Cogswell, Syracuse, N. Y.; Francis A. Pratt, Hartford, Conn.; Charles B. Richards, Hartford, Conn.; S. B. Whiting, Pottsville, Pa.; treasurer, L. B. Moore, New York City; secretary, Thomas W. Rae, New York City.

Officers, 1895.—President, E. F. C. Davis, Richmond, Va.; vice-presidents, C. E. Billings, Hartford, Conn.; Percival Roberts, jr., Pencoyd, Pa.; H. J. Small, Sacramento, Cal.; F. H. Ball, New York City; Jesse M. Smith, Detroit, Mich.; M. L. Hol-

man, St. Louis, Mo.; managers, Charles H. Manning, Manchester, N. H.; C. W. Pusey, Wilmington, Del.; John Thompson, New York City; John B. Herreshoff, Bristol, R. I.; L. B. Miller, Elizabeth, N. J.; W. S. Russel, Detroit, Mich.; John C. Kafer, New York City; Charles A. Bauer, Springfield, Ohio; Arthur C. Walworth, Boston, Mass.; treasurer, William H. Wiley, No. 53 East Tenth street, New York City; secretary, Prof. F. R. Hutton, No. 12 West Thirty-first street, New York City.

PUBLICATIONS.

The papers read at the semiannual meetings of the society are published both in pamphlet form and as a volume of Transactions. These volumes vary from 281 pages to 1,461 pages. 8vo. Fifteen volumes had been issued up to November 1, 1894. Pamphlet copies of all papers can also be obtained.

THE ENGINEERING ASSOCIATION OF THE SOUTH.

NASHVILLE, TENN.

Organized September 19, 1889; incorporated under laws of Tennessee February 25, 1892.

The objects of this association are: (1) The professional improvement of its members; (2) the encouragement of social intercourse among men of practical science; (3) the advancement of engineering and allied professions; and (4) the establishment of a central point of reference and union for its members. (Constitution.)

Founders.—Hunter McDonald, E. C. Lewis, W. F. Foster, Olin H. Landreth, C. A. Locke, all of Nashville, Tenn.

First officers.—John McLeod, Louisville, Ky., president; W. F. Foster, Nashville, Tenn., first vice-president; Edward Thatcher, Decatur, Ala., second vice-president; O. H. Landreth, Nashville, Tenn., secretary; Prof. W. L. Dudley, Nashville, Tenn., treasurer.

PUBLICATIONS.

Publications, 6 numbers. 8vo.

THE SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS.

PRINCIPAL OFFICE OF SOCIETY, 12 WEST THIRTY-FIRST STREET, NEW YORK CITY; OFFICE OF SECRETARY, 1710 F STREET NW., WASHINGTON, D. C.

Incorporated April 28, 1893, by William H. Webb, Chas. H. Cramp, H. T. Gause, George E. Weed, W. T. Sampson, Horace See, Francis T. Bowles, W. L. Capps, E. D. Morgan, George W. Quintard, Harrington Putnam, J. W. Miller, and F. L. Fernald.

Object.—The promotion of shipbuilding, commercial and naval.

Officers, 1894–95.—President, Clement A. Griscom; first vice-president, Theodore D. Wilson, U. S. N.; vice-presidents, Charles H. Cramp, Philip Hichborn, U. S. N., Chas. H. Loring, U. S. N. (retired), Richard W. Meade, U. S. N., George W. Melville, U. S. N., George W. Quintard, Irving M. Scott, Francis A. Walker, Wm. H. Webb; executive committee, Francis T. Bowles, U. S. N., chairman, Washington L. Capps, U. S. N. (ex officio), H. Taylor Gause, Clement A. Griscom (ex officio), Lewis Nixon, Harrington Putnam, and Edwin A. Stevens; secretary and treasurer, Washington L. Capps, U. S. N.

STATE.

THE TECHNICAL SOCIETY OF THE PACIFIC COAST.

SAN FRANCISCO, CAL.

Organized in San Francisco, April 5, 1884.

Object.—For the purpose of fostering professional improvement among its members, the encouragement of social intercourse among men of practical science, the advancement of the technical professions, and the establishment of a central point of reference and union for its members.

Founders.—Col. George H. Mendell, Corps of Engineers, U. S. A., first president; George J. Specht, civil engineer, vice-president; Charles G. Yale, mining engineer, secretary; Joseph B. Crockett, president of the San Francisco Gas Light Company, treasurer; William Ham Hall, civil engineer, Aug. J. Bowie, jr., mining engineer, George W. Percy, architect, E. J. Molera, electrical engineer, Frederick Gutzkow, chemist, George W. Dickie, mechanical engineer, Maj. W. A. Jones, Corps of Engineers, U. S. A., W. G. Curtis, railway engineer, directors.

Officers, 1895.—President, George W. Dickie, mechanical engineer; vice-president, W. G. Curtis, assistant manager Southern Pacific Company; secretary, Otto von Geldern, civil engineer; treasurer, George F. Schild, naval architect; directors, W. F. C. Hasson, electrical engineer, Randell Hunt, civil engineer, Louis Falkenau, chemist, John D. Isaacs, civil engineer, Joseph C. Sala, instrument maker.

PUBLICATIONS.

The transactions and professional papers of the society are published in the Journal of the Association of Engineering Societies, in Philadelphia, of which association the Technical Society is a member.

THE DENVER SOCIETY OF CIVIL ENGINEERS.

DENVER, COLO.

Organized February 7, 1882.

Object.—The advancement of engineering knowledge and practice, the maintenance of a high professional standard among its members, and the establishment of a central point of reference and intercourse for engineers in the Rocky Mountain region.

First officers.—Gen. John Pierce, president; R. B. Staunton, vice-president; E. H. Kellogg, secretary and treasurer; E. A. Nettleton, P. H. Van Deist, and F. P. Swindler, executive committee.

Officers, 1894–95.—W. B. Lawson, president; Walter Pearl, first vice-president; Prof. L. G. Carpenter, second vice-president; F. E. King, secretary and treasurer; Fillmore Cogswell, librarian; J. S. Titcomb and P. H. Van Deist, executive committee.

PUBLICATIONS.

Information as to Colorado. For information of the annual convention of the American Society of Civil Engineers, Vols. I–IV, 1886–1892, 8vo, averaging about 100 pages each.

TECHNIKER VEREIN.

WASHINGTON, D. C.

Organized December 15, 1887; incorporated May, 1888.

Objects.—(1) The advancement of technical and scientific knowledge; (2) the advancement of professional interests; (3) opportunity for approachment and closer personal association between its members; (4) practical assistance to needy technologists.

First officers.—President, J. L. Smithmyer, architect; first vice-president, Charles Kinkel, architect; second vice-president, Richard Godefroy, C. E.; treasurer, C. A. Didden, architect; corresponding secretary, Paul Bausch, C. E.; recording secretary, C. H. Schneider, M. E. and C. E.; directors, Jacob José, C. E., E. J. Sommer, topographer, W. C. Willenbücher, hydrographer, A. Stierle, C. E., P. Seyfriz, M. D.

Officers, 1895.—President, Hermann Rassbach, M. E.; vice-president, J. G. Gosseling, architect and C. E.; corresponding secretary, Paul Bausch, C. E.; recording secretary, W. C. Willenbücher, hydrographer; treasurer, H. H. Bergmann, underwriter; librarian, Felix Freyhold, C. E., directors, William Burchard, statistician, Jacob José, C. E., Hector von Bayer, C. E., Julius Rettig, M. E., C. A. Didden, architect.

The society is a member of the "National Association of German-American Technologists," which comprises the technical societies of nine cities. The headquarters of this organization are at present vested in the Technical Society of Washington, the national officers being the same as those of the society.

The national organization issues a monthly, Der Techniker, folio, 16 pages; certain lectures are published at irregular intervals, 8vo.

WESTERN SOCIETY OF ENGINEERS.

CHICAGO, ILL.

Organized in 1869 as the "Civil Engineers' Club of the Northwest;" incorporated under its present name in 1880.

Object.—The advancement of the science of engineering and the interests of the profession.

First officers.—Roswell B. Mason, president; L. P. Morehouse, secretary.

Officers, 1894–95.—Hiero B. Herr, president; D. W. Mead, H. C. Draper, vice-presidents; Thomas Appleton, secretary; Charles J. Roney, librarian; David L. Barnes, treasurer; C. L. Strobel, George S. Morison, and Robert W. Hunt, trustees.

PUBLICATIONS.

Proceedings, monthly, of which 319 numbers have been issued, 8vo, varying from 6 to 18 pages in size.

Transactions, the papers read before the society, are published in the Journal of the Association of Engineering Societies of Philadelphia.

MARYLAND INSTITUTE FOR THE PROMOTION OF THE MECHANIC ARTS.

BALTIMORE, MD.

Original Maryland Institute for the Promotion of the Mechanic Arts organized December 9, 1825; incorporated January 10, 1826.

Object.—The encouragement and promotion of manufactures and the mechanic and useful arts by the establishment of popular lectures upon the sciences connected with them; by the formation of a library and cabinet of models and minerals; by offering premiums for excellence in those branches of national industry; by examining new inventions submitted for that purpose, and by such other means as experience may suggest.

First officers (under act of incorporation January 10, 1826).—President, William Steuart; vice-presidents, George Warner, Fielding Lucas, jr.; recording secretary, John Morton; corresponding secretary, Dr. William Howard; treasurer, Samuel Harden; managers, James H. Clerke, John H. B. Latrobe, John D. Craig, Peter Leary, D. G. McCoy, William Meeteer, Jacob Deems, James Mosher, Solomon Etting, Hezekiah Niles, William H. Freeman, Henry Payson, Benjamin C. Howard, William Roney, Moses Hand, Joseph K. Stapleton, William Hubbard, William F. Small, William Krebs, James Sykes, Thomas Kelso, James R. Williams, Robert Cary Long, Samuel D. Walker.

February 7, 1835, "the Athenaeum, which building the institute occupied in part, was consumed by fire and the entire properties of the old Maryland Institute were burned."

Present Maryland Institute for the Promotion of the Mechanic Arts reorganized November 30, 1847; incorporated February 15, 1850.

Objects.—The encouragement and promotion of manufactures and the mechanic and useful arts by the establishment of popular lectures upon the sciences connected with them; by the formation of a school of design adapted to mechanical and manufacturing purposes; for providing a library, reading room, and a cabinet of minerals, models, and mechanical apparatus; for holding annual exhibitions or fairs for articles of American manufacture, and for offering premiums or awards for excellence in those branches of national industry deemed worthy of encouragement; by examining new inventions submitted for that purpose, and by such other means necessary for the accomplishment of their objects as experience may suggest.

Present objects (as per act to extend the charter, passed April 8, 1878, by the general assembly of Maryland).—The encouragement and promotion of manufactures and the mechanic and useful arts by the establishment of schools and popular lectures upon the sciences connected with them; the formation of schools of art and design, providing a library, reading room, and cabinet of minerals, models, and mechanical apparatus; holding exhibitions for articles of American manufacture; offering and awarding premiums for excellence in those branches of industry deemed worthy of encouragement; examining and reporting upon such new inventions as may be submitted for the purpose, and by such other means for the promotion of the mechanic arts as experience may suggest.

Said institute shall be authorized and empowered to graduate students in its various schools and to grant diplomas to such as after proper examination may be found worthy of the distinction.

First officers (under act of incorporation, February 15, 1850).—President, Joshua Vansant; vice-presidents, James Murray, Edward Needles; recording secretary, Samuel Sands; corresponding secretary, William Prescott Smith; treasurer, Thomas J. Clare; managers, Josiah Reynolds, Samuel McPherson, C. W. Bentley, William Ferguson, John Feast, Isaac Brown, Jesse Marden, H. R. Hazlehurst, W. Abrahams, John F. Davis, Thomas Trimble, James Young, William Rodgers, William Peters, E. Whitman, jr., John T. Fardy, D. M. Adams, Samuel E. Rice, William Bayley, William Robinson, C. Conway, Ephraim Larrabee, Robert Eareckson, B. S. Benson.

Officers, 1894–95.—President, Joseph M. Cushing; vice-president, George R. Skillman; secretary, James Young; treasurer, G. Harlan Williams; managers, Samuel Eccles, jr., Frank N. Horn, John L. Lawton, F. W. Wood, Samuel W. Regester, J. S. Detrick, William H. Shryock, John M. Carter, Ernst Schmeisser, T. P. Perine, George C. Wilkins, James Pentland, F. D. Morrison, Samuel R. Waite, William H. Perkins, Ferdinand C. Latrobe, Joshua Lynch, E. J. Codd, William Ferguson, William B. Sands, John S. Bullock.

PUBLICATIONS, 1825–1894.

Charter, constitution, and by-laws, 1825, 1848, 1850, 1851, 1852, 1854, 1873, 1878, 1886,
Annual reports, 1852–1860, 1869, 1876–1879, 1881, 1883–1894.
Books of the exhibition, 1851–1860.
Catalogue of articles for competition, 1848, 1850, 1852–1856, 1868–1870, 1872, 1874. 1878.

Addresses, lectures: C. J. Bonaparte, 1883; George W. Brown, 1868; John M. Carter, 1882, 1887; I. Edwards Clarke, 1887, 1883; C. Cushing, 1853; Joseph M. Cushing, 1883, 1887, 1888, 1892; R. C. Davidson, 1890; H. W. Davis, 1853; Otto Fuchs, 1888; C. J. M. Gwynn, 1850; J. Hodges, 1886, 1887; B. T. Johnson, 1882; W. R. Johnson, 1849; J. P. Kennedy, 1851; A. L. Knott, 1882; F. C. Latrobe, 1887, 1892; J. H. B. Latrobe, 1848, 1868; J. H. Lightbourn, 1873; W. L. Marshall, 1831, M. P. Maury, 1855; W. Mimfie, 1854; C. Morfit, 1850; M. A. Newell, 1887, 1888; J. P. Poe, 1891; J. A. Seiss, 1856; F. Sheppard, 1854; G. R. Skillman, 1886, 1887; W. P. Smith, 1849; J. Spencer, 1857; T. Swann, 1854; John Tyler, 1855; J. Vansant, 1849, 1850; S. T. Wallis, 1851, 1852, 1881; S. Wilmer, 1881.
Library: Catalogues, 1857, 1865; report on, 1857.
Miscellaneous: Proposal of exhibition, 1827; report on Bollman's bridge, 1854; appeal in behalf of institute, 1880.
Museum of Art: Report of special committee, 1879; memorial to general assembly, 1880. Schools, 1879–80, 1881, 1885–86.

BOSTON SOCIETY OF CIVIL ENGINEERS.

BOSTON, MASS.

Organized July 3, 1848; incorporated April 24, 1851.
"The objects of this society are the professional improvement of its members, the encouragement of social intercourse among engineers and men of practical science, and the advancement of engineering; and for the promotion of these objects stated meetings of the society shall be held and a library formed for the use of its members." (Constitution.)
First officers.—President, James F. Baldwin; vice-president, George M. Dexter; secretary, John H. Blake; treasurer, William P. Parrott; librarian, Joseph Bennett.
Officers, 1894–95.—President, William E. McClintock; vice-presidents, George F. Swain (term expires March, 1895), Henry H. Carter (term expires March, 1896); secretary, S. Everett Tinkham; treasurer, Edward W. Howe; directors, Henry Manley (term expires March, 1895), Frank O. Whitney (term expires March, 1896); librarian, Henry F. Bryant.

PUBLICATIONS.

Proceedings, 1879–1881, 8vo, 144 pp.

MIDDLESEX MECHANICS' ASSOCIATION.

LOWELL, MASS.

Organized 1825; incorporated June 18, 1825.
Objects.—Promoting inventions and improvements and establishing a suitable library for the information and instruction of mechanics in their respective arts.
Founders and first officers.—Samuel Fechem, machinist, president; James B. Pross, machinist, vice-president; Edward Brown, carpenter, secretary; Albigense W. Fisher, machinist, treasurer. Trustees: William W. Walker, machinist; Benjamin P. Brown, wheelwright; James Derby, machinist; James M. King, carpenter; George Dane, blacksmith; Elijah Thompson, machinist.
Officers, 1894.—Capt. James G. Hill, president; Edward T. Rowell, vice-president; Charles C. Hutchinson, secretary; Albert S. Guild, treasurer. Trustees: Victor I. Cummock, Edward T. Abbott, Rufus H. Maxfield, Nelson Whittier, John Tyler Stevens, James Scott, Charles H. Allen, Charles H. Coburn.

PUBLICATIONS.

The association has published catalogues of the library, library reports, and catalogues of exhibits.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.

ST. PAUL, MINN.

Organized December 15, 1883.
"The object shall be the advancement of the science of engineering and the interests of the profession, the encouragement of social intercourse among men of practical science, and the professional improvement of its members." (Constitution.)
First officers.—L. W. Rundlett, president; Charles W. Johnson, vice-president; C. J. A. Morris, secretary; Howard N. Elmer, treasurer; Samuel Rockwell, librarian.
Officers, 1894.—George L. Wilson, president; J. D. Estabrook, vice-president; C. L. Annan, secretary; A. O. Powell, treasurer; A. W. Münster, librarian; C. J. A.

Morris, representative on the board of managers of the Association of Engineering Societies.

PUBLICATIONS.

The transactions of the society are published in the Journal of the Association of Engineering Societies, 8vo, monthly.

MONTANA SOCIETY OF CIVIL ENGINEERS.

HELENA, MONT.

Instituted July 5, 1887.

"Its object shall be the advancement of engineering and the interests of the profession. Among the means to be employed shall be periodical meetings for the reading and discussion of scientific papers and matters of scientific and practical interest, and the cultivation of professional and social intercourse among its members; the collection of a library, and the publication of such parts of the transactions as may be deemed expedient." (Constitution.)

Founders.—Thomas T. Baker, Rawlinson T. Bayliss, Elbridge H. Beckler, Adelbert E. Cumming, Henry Bascom Davis, James H. Ellison, George O. Foss, John Gillie, and others.

First officers.—President, Joseph T. Dodge; first vice-president, Elliott H. Wilson; second vice-president, George K. Reeder; secretary and librarian, James S. Keerl; treasurer, John W. Wade; trustees, Walter W. DeLacy, Joseph H. Harper, Elbridge H. Beckler.

Officers, 1894.—President, William A. Haven; first vice-president, James S. Keerl; second vice-president, Augustus M. Ryon; secretary and librarian, George O. Foss; treasurer, Albert S. Hovey,

PUBLICATIONS.

Transactions and papers are published in the Journal of the Association of Engineering Societies.

TECHNISCHER VEREIN VON NEWARK, N. J.

Organized November 20, 1889.

Object.—Dissemination of general technical knowledge.

First officers.—President, Dr. H. T. Weidig; vice-president, Maurice A. Müller; treasurer, T. B. Stobaeus; corresponding secretary, William Thum; recording secretary, H. Seibert; librarian, Dr. O. Siepermann.

Officers, 1895.—President, Alex. H. Strecker; first vice-president, Dr. Otto Siepermann; second vice-president and treasurer, Dr. W. Runge; corresponding secretary, Hans Dieterich; recording secretary, M. Trubek; librarian, Ernst Hirrschoff.

PUBLICATIONS.

The papers read before this society have been generally published in the Techniker, a German technical journal, now published in Philadelphia.

RENSSELAER SOCIETY OF ENGINEERS.

TROY, N. Y.

Organized January, 1866; incorporated May, 1873.

Object.—The encouragement of original scientific research and the cultivation of a social spirit among its members. The ultimate object is the preservation, in a form useful to engineers and scientific men, of the results of such research.

Founders.—P. H. Bearmann, Troy, N. Y., C. E., and A. H. Millet, Guayaquil, Ecuador.

Officers, 1894.—President, E. F. Chillman, C. E., Troy, N. Y.; vice-president, W. W. Rousseau, jr., Troy, N. Y.; secretary, J. W. Bowman, Green Island, New York; treasurer, W. E. Whitney, Steubenville, Ohio; librarian, H. W. Mesnard, Norwalk, Conn.

Publications are issued yearly, 8vo, pp. 100, paper.

TECHNISCHER VEREIN VON NEW YORK.

NEW YORK, N. Y.

Organized November 13, 1880; incorporated October 18, 1883.

Objects.—The encouragement and advancement of technical arts and sciences in all their branches; the elevation and social intercourse of its members; the assistance

of needy and newly immigrated colleagues, and the promotion, by meetings, reports, papers, and publications, of the interests of the society and its members.

Trustees for the first year.—Paul Goepel, George W. Wundram, Max C. Budell, Carl Stagl, Anton Heim, Franz M. J. Nolten, Hermann Endemann, Hugo B. Roelker, Augustus Kurth, Theodore Paschke, Ferdinand Rochow, Theodore De Lemos, and Emmerich J. Schmitz.

Officers, 1894.—President, Paul Goepel, C. E. and patent attorney; vice-president, Albert Beyer, architect; corresponding secretary, Jacob Nussblatt, M. E.; recording secretary, Francis Sticker, M. E.; treasurer, Leopold Kaczander, M. E.; librarian, Fr. N. Roehrich, E. E.

PUBLICATIONS.

Der Techniker, folio, monthly, Vol. XVI, No. 10, for September, 1894.
Mittkeilungen des Deutsch-Amerikanischen Techniker-Verbandes, Annual, 8vo.

POLYTECHNISCHER VEREIN.

CINCINNATI, OHIO.

Organized September 17, 1886; incorporated December 24, 1886.

Objects.—Encouragement and advancement of technical arts and sciences in all their branches, the elevation and social intercourse of its members, and the promotion, by meetings, reports, papers, and publications, of the interests of the society and its members.

Founders.—Ed. Baechle, Fritz von Bank, Charles Brueckner, Hy. Dreses, Arth. Erdmann, Phil Faber, James Fredriks, Ernst Lietze, Ernst Schumacher, Max Steiniger.

Officers, 1894.—President, Ernst Lietze; vice-president, A. Koechlin; corresponding secretary, Fritz von Bank; recording secretary, Hy. Dreses; treasurer, Charles Brueckner; librarian, John Grimm.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.

ALLEGHENY, PA.

Organized January 20, 1880; incorporated March 20, 1880.

The object of this corporation shall be the advancement of engineering in its several branches, the professional improvement of its members, and the encouragement of social intercourse among men of practical science.

First officers.—William Metcalf, president; John I. Williams and A. Gottlieb, vice-presidents; T. Rodd, E. M. Butz, I. L. Lowery, N. M. McDowell, directors; William Kent, treasurer; J. H. Harlow, secretary.

Officers, 1894.—President, Charles Davis; treasurer, A. E. Frost; secretary, Daniel Carhart. Chemical section—chairman, Walter E. Koch; secretary, A. D. Wilkins; Thomas H. Johnson and W. G. Wilkins, vice-presidents; Julian Kennedy, W. E. Koch, Thomas P. Roberts, and Emil Swensson, directors.

PUBLICATIONS.

A monthly periodical, omitting July and August, is issued. It contains the proceedings of the society, minutes, papers read and discussed, etc. 8vo. The ten monthly issues make a volume of about 400 pages.

FRANKLIN INSTITUTE OF THE STATE OF PENNSYLVANIA.

PHILADELPHIA, PA.

Organized and incorporated 1824.

Object.—The promotion of the mechanic arts.

Founders.—Samuel V. Merrick and William H. Keating.

First officers.—President, James Ronaldson; vice-presidents, Mathew Carey, Isaiah Lukens; recording secretary, William Strickland; corresponding secretary, Peter A. Browne; treasurer, Thomas Fletcher.

Officers, 1894.—President, Joseph M. Wilson; vice-presidents, Edward Longstreth, Charles Bullock, and William P. Tatham; secretary, William H. Wahl; treasurer, Samuel Sartain; actuary, H. L. Heyl; librarian, Alfred Rigling.

PUBLICATIONS.

Journal of the Franklin Institute, issued monthly since 1824. 8vo.

ASSOCIATION OF ENGINEERS OF VIRGINIA.

ROANOKE, VA.

Organized April 4, 1891.

Object.—To promote the arts connected with engineering by means of periodical meetings for the reading and discussion of professional papers and for social intercourse, and the circulation, by publication among its members, of the information thus obtained. No recommendation, indorsement, or approval shall be given to or made to any individual, or of any scientific or literary, mechanical or engineering production; but the opinion of the association may be expressed on such subjects as affect the public welfare, provided this opinion does not carry with it the interest of any individual. This shall not be construed to prevent the discussion of any subject of engineering interest. (Constitution.)

First officers.—J. H. Wingate, president; W. E. Anderson, vice-president; W. H. Newby, secretary and treasurer.

Officers, 1894.—Charles S. Churchill, president; J. C. Rawn, first vice-president; W. H. Adams, second vice-president; James R. Schick, treasurer; John A. Pilcher, secretary.

PUBLICATIONS.

Proceedings, 1891, 1893, 1894. 8vo.

VIRGINIA MECHANICS' INSTITUTE.

RICHMOND, VA.

Organized December 5, 1884; incorporated August 19, 1887.

Objects.—The promotion and encouragement of manufactures, the mechanic and useful arts, and the mental and social improvement of the industrial classes.

First officers.—President, George A. Ainslie; vice-president, Ashton Starke; treasurer, W. E. Simons; secretary, Thomas Ellett.

Present officers.—President, W. J. Whitehurst; vice-president, J. J. Montague; treasurer, W. E. Simons; secretary, Thomas Ellett.

No publications. Annual reports of its Night School of Technology, which has been increasing each year in interest, size, and value until this session it numbers 255 students, have been made to the directory.

NORTHWESTERN ELECTRICAL ASSOCIATION.

OCONTO, WIS.

Organized 1892; incorporated 1893.

Object.—The exchange of ideas and the advancement of central lighting stations.

Founder.—T. A. Pamperin.

First officers.—President, Caroll Collins; secretary and treasurer, T. A. Pamperin.

Officers, 1895.—President, H. C. Thorn.

The association has issued five publications.

THE WISCONSIN POLYTECHNIC SOCIETY.

MILWAUKEE, WIS.

Organized November 25, 1890; incorporated March 11, 1891.

Object.—"The advancement of engineering and technical science, to promote fraternal and social intercourse among its members, to collect and maintain a library, and to provide for the publication of its transactions as may be deemed expedient."

Founders and first officers.—George H. Benzenberg, president, city engineer, Milwaukee; J. N. Barr, first vice-president, superintendent machinery, Chicago, Milwaukee and St. Paul Railway; Edwin Reynolds, superintendent E. P. Allis Engine Works, Milwaukee; E. F. Neukom, secretary, mechanical engineer, Milwaukee; John E. Hathaway, C. E., treasurer, Milwaukee; trustees, L. B. Davis, C. E., major of engineers, U. S. A.; W. F. Goodhue, sanitary engineer; H. C. Koch, architect.

Officers, 1894.—W. F. Goodhue, president; Howland Russell, first vice-president, architect; H. C. Koch, second vice-president, architect; G. G. Mason, secretary and treasurer, mechanical engineer; trustees, E. G. Cowdery, gas engineer; Richard Birkholz, mechanical engineer; John E. Hathaway, C. E.

The proceedings were hitherto published in the Journal of Engineering Societies, now edited by John C. Trautwine, jr., Philadelphia, Pa. The society withdrew February, 1894, and will publish its own proceedings in January of each year.

VIII. LITERATURE AND LANGUAGE.

NATIONAL.

THE AMERICAN DANTE SOCIETY.

NEW YORK, N. Y.

Organized in New York City November 28, 1890.

Organizers.—Hon. Seth Low, LL. D., president of Columbia College; Hon. William T. Harris, LL. D., Commissioner of Education, Washington, D. C.; Rev. Philip Schaff, D. D., and Rev. M. R. Vincent, D. D., Union Theological Seminary, New York; Rev. B. B. Tyler, D. D., Church of the Disciples, and Rev. R. Heber Newton, D. D., All Souls' Church, New York; Prof. J. C. Murray, LL. D., McGill University, Montreal, Canada; Prof. N. M. Butler, Ph. D., Columbia College, New York; and Prof. H. Norman Gardiner, Smith College, Northampton, Mass.

Object.—"The object of the society shall be to promote and encourage the study of the works of Dante and of the civilization which they seek to embody in all its branches—religion, politics, sociology, philosophy, science, and art—to provide public lectures on the literature of Dante and his epoch, and to publish a yearbook of the proceedings of the society and of the original work contributed in the course of the same, and to establish a library of Dante literature." (Constitution.)

Officers, 1890–91.—President, Theodore W. Dwight, LL. D., New York; vice-presidents, Rev. M. R. Vincent, D. D., New York; Prof. Vincenzo Botta, New York; Rev. Philip Schaff, D. D., New York; Hon. W. T. Harris, LL. D., Washington, D. C.; James MacAlister, LL. D., Philadelphia; secretary, Thomas Davidson, 239 West One hundred and fifth street, New York; treasurer, Charlotte F. Daley, 176 West One hundred and fifth street, New York; board of directors, the president, the secretary, and the treasurer ex officio, Rev. M. R. Vincent, D. D., Rev. B. B. Tyler, D. D, Lucius C. Ashley, Irving P. Boyd.

THE AMERICAN DIALECT SOCIETY.

NEW YORK, N. Y.

Organized during the winter of 1889–90.

Object.—The investigation of the spoken English of the United States and Canada, and incidentally of other nonaboriginal dialects spoken in the same countries.

Founders.—Of its first organization and the parties interested in the movement, E. H. Babbitt, the secretary, writes: "The preliminary meeting, where the plan was 'hatched,' was held in my room at Cambridge. There were present besides myself, Professor Sheldon, Professor Kittredge, Mr. Grandgent, and Mr. Bendelari. The public meeting which followed was held December 30, 1889, and then and there measures were taken which resulted in the adoption of the inclosed constitution."

First officers.—President, Francis J. Child, Cambridge, Mass.; vice-president, James M. Hart, Cincinnati, Ohio; secretary, Edward S. Sheldon, Cambridge, Mass.; treasurer, Charles H. Grandgent, Cambridge, Mass.; editing committee, the secretary ex officio, George L. Kittredge, Cambridge, Mass.; Sylvester Primer, Charleston, S. C.; executive committee, the officers named above and Benjamin I. Wheeler, Ithaca, N. Y.; Charles F. Smith, Nashville, Tenn.; Frederic D. Allen, Cambridge, Mass.

Officers, 1894.—President, Edward S. Sheldon, Cambridge, Mass.; vice-president, Charles H. Grandgent, Cambridge, Mass.; secretary, Eugene H. Babbitt, Columbia College, New York City; treasurer, Lewis F. Mott, New York City; editing committee, the secretary ex officio, George Hempl, Ann Arbor, Mich.; Oliver F. Emerson, Ithaca, N. Y.; executive committee, the officers named above and M. D. Learned, Baltimore, Md.; J. M. Manly, Providence, R. I.; H. R. Lang, New Haven, Conn.

PUBLICATIONS.

Dialect Notes is issued at irregular intervals; 7 numbers have appeared up to the present. 8vo.

AMERICAN FOLKLORE SOCIETY.

CAMBRIDGE, MASS.

Organized January 4, 1888.

Object.—The study of folklore in general, and in particular the collection and publication of the folklore of North America.

Officers, 1891.—President, Otis T. Mason, Washington, D. C.; council, Franz Boas, Worcester, Mass.; H. Carrington Bolton, New York, N. Y.; Daniel G. Brinton, Philadelphia, Pa.; Thomas Frederick Crane, Ithaca, N. Y.; James Deans, Victoria, B. C.; J. Owen Dorsey, Washington, D. C.; Alice C. Fletcher, Nez Perces Agency, Idaho; Alcée Fortier, New Orleans, La.; Victor Guilloû, Philadelphia, Pa.; Horatio Hale, Clinton, Ontario; Mary Hemenway, Boston, Mass.; Charles G. Leland, London, England; J. S. Newberry, New York, N. Y.; F. W. Putnam, Cambridge, Mass.; treasurer, John H. Hinton, New York, N. Y.; secretary, William Wells Newell, Cambridge, Mass.

PUBLICATIONS.

Journal of American Folklore, 1888. 8vo. Quarterly.

In addition to the Journal, the society, according to a resolution passed at its annual meeting, expects to print a series of monographs on the folklore of the different races included in the scope of its researches.

AMERICAN LIBRARY ASSOCIATION.

NEWARK, N. J.

Organized October 6, 1876; incorporated December 10, 1879.

Objects.—"Its objects shall be to promote the welfare of libraries by stimulating public interest in founding and improving them, by securing needed State and national legislation, by furthering such cooperative work as shall improve results or reduce expenses, by exchanging views and making recommendations, and by advancing the common interests of librarians, trustees, and others engaged in library or allied educational work." (Constitution.)

First officers.—President, Justin Winsor; vice-presidents, A. R. Spofford, W. F. Poole, H. A. Holmes; secretary and treasurer, Melvil Dewey.

Officers, 1894–95.—President, H. M. Utley, librarian public library, Detroit, Mich.; vice-presidents, J. C. Dana, public library, Denver, Colo.; Mary S. Cutler, State library, Albany, N. Y.; Ellen M. Coe, free circulating library, New York City; secretary, Frank P. Hill, public library, Newark, N. J.; assistant secretaries, C. R. Dudley, city library, Denver, Colo.; F. Richmond Fletcher, library bureau, Boston; Louisa S. Cutler, public library, Utica, N. Y.; G. E. Wire, Newberry Library, Chicago; recorder, Henry J. Carr, public library, Scranton, Pa.; assistant recorder, Nina E. Browne, library bureau, Boston; treasurer, George Watson Cole, Jersey City, N. J.

PUBLICATIONS.

Proceedings.

AMERICAN ORIENTAL SOCIETY.

NEW HAVEN, CONN.

Organized September 7, 1842; incorporated March 22, 1843.

Object.—(1) The cultivation of learning in the Asiatic, African, and Polynesian languages; (2) the publication of memoirs, translations, vocabularies, and other works relating to the Asiatic, African, and Polynesian languages; (3) the collection of a library.

Officers, 1842–43.—Hon. John Pickering, president; William Jenks, D. D., Prof. Moses Stuart, and Prof. Edward Robinson, vice-presidents; William W. Greenough, corresponding secretary; Francis Gardner, recording secretary; John James Dixwell, treasurer; Francis Gardner, librarian; directors, Rufus Anderson, D. D., Prof. Barnas Sears, Prof. C. C. Felton, Hon. Sidney Willard, Prof. Bela B. Edwards.

Officers, 1894–95.—D. C. Gilman, LL. D., president; William Hayes Ward, LL. D., Prof. C. H. Toy, and Prof. Isaac H. Hall, vice-presidents; Prof. E. D. Perry, corresponding secretary; Prof. D. G. Lyon, recording secretary; Henry C. Warren, treasurer; Addison Van Name, librarian; directors, the officers above named and also Prof. Maurice Bloomfield, Prof. Paul Haupt, Talcott Williams, Prof. Edward W. Hopkins, Prof. A. L. Frothingham, Prof. Richard J. H. Gottheil, Prof. George F. Moore.

PUBLICATIONS.

Journal, Vols. I–XVI, 8vo; Vol. I, Boston, all succeeding volumes, New Haven, 1849–1894, about 570 pages each.

The Journal includes also the proceedings, which, except in Vol. VI, are paged with roman numerals. Vols. II–V, like all the succeeding volumes, were printed at New Haven, but have the imprint of Geo. P. Putnam & Co., as publishers for the society.

AMERICAN PHILOLOGICAL ASSOCIATION.

BRYN MAWR, PA.

Organized 1869.

Officers, 1894-95.—President, John Henry Wright, Harvard; vice-presidents, Bernadotte Perrin, Yale, and Minton Warren, Johns Hopkins; secretary and treasurer, Herbert Weir Smyth, Bryn Mawr College.

THE MODERN LANGUAGE ASSOCIATION OF AMERICA.

BALTIMORE, MD.

Preliminary organization effected at Columbia College, New York, December 27, 28, 1883; permanent organization at same place, December 29, 30, 1884.

The object of the association is to promote the interests of scholarship and of academic work in the modern languages and literatures, centering chiefly in English, German, and French.

Founder.—Prof. A. Marshall Elliott, of Johns Hopkins University

First officers.—Presidents, Franklin Carter, president of Williams College, 1884-1886; James Russell Lowell, 1887-1891; Prof. Francis A. March, of Lafayette College, 1892-93; secretary, A. Marshall Elliott, 1884-1893.

Officers, 1894.—President, A. Marshall Elliott; secretary, Prof. James W. Bright, Johns Hopkins University.

PUBLICATIONS.

Publications of the Modern Language Association of America; edited by the secretary of the association.

The proceedings of the annual meetings of the association are added to the fourth installment or number of the publications for the corresponding year; quarterly, 8vo., about 600 pages to the annual volume; Vol. IX, 1894.

SOCIETY OF BIBLICAL LITERATURE AND EXEGESIS.

CAMBRIDGE, MASS.

Organized 1883.

Officers 1894-95.—President, J. Henry Thayer, Harvard; vice-president, Francis Brown, Union Theological Seminary; recording secretary, William H. Cobb, Congregational Library, Boston; corresponding secretary, David G. Lyon, Harvard; treasurer, Willis J. Beecher, Auburn Theological Seminary.

THE THEOSOPHICAL SOCIETY (AMERICAN SECTION).

NEW YORK, N. Y.

Organized November 17, 1875. The whole society is not incorporated, but some local branches are so for the purpose of holding real estate. The Aryan Theosophical Society of New York is one.

Objects.—(1) To form the nucleus of a Universal Brotherhood of Humanity without distinction of race, creed, sex, caste, or color; (2) to promote the study of Aryan and other eastern literatures, religions, and sciences, and demonstrate their importance; (3) to investigate unexplained laws of nature and the psychical powers latent in man.

Founders.—Madame H. P. Blavatsky, Col. Henry S. Olcott, William Q. Judge.

Officers, 1895.—Col. Henry S. Olcott, president; William Q. Judge, vice-president.

PUBLICATIONS.

The society, as such, publishes nothing except the official reports of its conventions, but a large amount of theosophical literature is printed under the auspices of the different sections, or by individuals or branches. Three monthly magazines—the Theosophist, Adyar, Madras, India; Lucifer, London; and the Path, New York—and a number of works by Madame Blavatsky, A. P. Sinnett, William Q. Judge, Mrs. Annie Besant, and others, expound the theosophical philosophy and religion.

STATE.

THE SHAKESPEARE CLUB.

LITTLE ROCK, ARK.

Organized December 2, 1875.

Objects.—For the reading and study of Shakespeare's plays and miscellaneous readings.

Founders and first officers.—Early records lost.

Officers, 1894–95.—Thomas Lafferty, president; J. W. Beidelman, secretary.

WESTERN ASSOCIATION OF WRITERS.

BROOKVILLE, IND.

Organized June 30, 1866.

Object.—The development of literature.

First officers.—President, Maurice Thompson; vice-presidents, Clarence A. Buskirk, C. F. McNutt, J. W. Gordon, Mrs. J. C. Aldrich, Will Cumback, Miss Jennie S. Judson, J. N. Matthews, Clarence Ladd Davis; secretary, Mrs. M. L. Andrews; treasurer, J. C. Ochiltree.

Officers, 1894.—President, A. W. Butler; secretary, Mrs. Ida May Davis; treasurer, W. W. Pefrimmer.

DANVILLE LITERARY AND SOCIAL CLUB (ANACONDA).

DANVILLE, KY.

Organized December 27, 1839.

Object.—For mutual improvement and enjoyment.

Rev. John C. Young, president Center College; Rev. Lewis W. Green, vice-president Center College; John A. Jacobs, principal institution for deaf-mutes; Rev. William Dod, professor mathematics, Center College; Thomas C. Nichols, professor languages, Center College; Ormond Beatty, professor sciences, Center College; Joshua T. Bell, attorney at law; William Pawling, physician.

Officers, 1894.—President, John A. Quisenberry; first vice-president, James H. Otter; second vice-president, John A. Cheek; secretary and treasurer, John W. Yerkes.

ATHÉNÉE LOUISIANAIS.

NEW ORLEANS, LA.

Organized, January 1, 1876; incorporated, July 26, 1892.

Objects.—(1) To perpetuate the French language in Louisiana; (2) for literary, scientific, artistic purposes; (3) for mutual aid.

First officers.—President, Dr. Armand Mercier; vice-president, Gen. G. T. Beauregard; secretary and treasurer, Dr. Alfred Mercier.

Officers, 1894.—Alcée Fortier, president; Dr. Gustave Devron, first vice-president; Gaston Doussan, second vice-president; Bussière Rouen, life secretary-treasurer.

PUBLICATIONS.

A bimonthly magazine, quarto from July 1, 1876, to January 1, 1882, 12 pages; quarto volume, 518 pages.

A bimonthly magazine, octavo from January 1, 1882, to date, 32 pages. Octavo volumes, Vol. I, 1882–1884, pp. 718; Vol. II, 1885–86, pp. 321; Vol. III, 1887–1889, pp. 630; Vol. IV, 1890–91, pp. 430; Vol. V, 1892–93, pp. 498; Vol. VI, 1894, not yet completed, 192 pages.

The society gives annually a gold medal for the best essay written in the French language by a resident of Louisiana, and gold medals are also awarded to the best French scholar in each of the Girls' high schools of New Orleans, and of the French Union School.

THE SHAKESPEARE ANNIVERSARY ASSOCIATION.

NEW ORLEANS, LA.

Organized January, 1894; to be incorporated, when the name will be changed to "Society" instead of "Association."

The purposes and objects of this corporation are to stimulate and to promote the study of Shakespeare and to commemorate suitably his memory, to give and to

superintend readings and dramatic performances and all such intellectual and social entertainments tending to elevate and cultivate the mind, and to establish a library and to maintain suitable rooms for literary and dramatic purposes, and to collect works of art, charts, maps, paintings, etc., for scientific, literary and dramatic improvement.

Founders and first officers.—Jos. H. De Grange, president; Charles F. Buck, S. H. Gilmore, B. C. Shields, vice-presidents; Tim O'Neil, stage manager; Capt. W. H. Beanham, assistant stage manager; A. J. Fitzpatrick, treasurer; R. B. Montgomery, recording secretary; J. L. Onorato, financial secretary; they are the same officers to-day.

PUBLICATIONS.

Proceedings of the Shakespearean Entertainments [New Orleans, 1894], 4to., pp. 24.

BALTIMORE SHAKESPEARE CLUB.

BALTIMORE, MD.

Organized 1884.

Objects.—The reading and study of Shakespeare's plays.

Founder.—Henry P. Goddard.

Officers, 1894.—Henry P. Goddard, president, and an executive committee of 3, viz, Henry P. Goddard, Archibald H. Taylor, Dr. Edward Renouf.

PUBLICATIONS.

Some contributions to Poet Lore.

The Lesson of Cymbeline, by Henry P. Goddard, Poet Lore, November, 1891, 5 pp.

THE JOHNS HOPKINS PHILOLOGICAL ASSOCIATION.

BALTIMORE, MD.

Organized May 31, 1877.

Objects.—The society was organized in view of the fact "that those members of this institution, [the Johns Hopkins University], whose departments of learning are most nearly akin, should by communication of the results of their work and studies produce a healthy stimulus to activity in research and aid each other in keeping up with the advances of science; by mutual and informal interchange of opinion furnish that sympathy to each other which is so confessedly essential to the normal development of the scholar; and by friendly and social intercourse become better acquainted and mutually helpful."—From statements made at the meeting for organization by Professor Gildersleeve, to whom the work of organizing the society was intrusted by President Gilman.

First officers.—B. L. Gildersleeve, president; Charles R. Lanman, secretary.

Officers, 1895.—B. L. Gildersleeve, president; Edward H. Spieker, secretary.

Meetings are held on the third Friday of every month from October to May, inclusive. At every meeting one principal paper and one or more minor communications are read.

The society has no publications of its own. Abstracts of the more important papers read before it are printed in the Johns Hopkins University Circular. Not a few of those papers are published in full in one form or another.

THE BOSTON BROWNING SOCIETY.

BOSTON, MASS.

Organized 1885.

Object.—"To study the poetry of Robert Browning, and to promote a more general interest in it."

Officers, 1895.—President, Rev. Philip S. Moxom; vice-presidents, Rev. George D. Latimer, Miss Heloise E. Hersey; honorary vice-presidents, Col. Henry Stone, Col. T. W. Higginson, Dr. William J. Rolfe, Rev. Francis B. Hornbrooke; secretary, Mrs. Emma E. Mareau; treasurer, Richard Arnold; librarian, William H. Ladd.

OLD CAMBRIDGE SHAKESPEARE ASSOCIATION.

CAMBRIDGE, MASS.

Organized 1881.

Object.—"The object of the association is both literary and social; in general to bring together those interested in literary pursuits, and in particular to promote an interest in the writings of Shakespeare."

First officers.—President, George Z. Gray, D. D.; vice-president, T. Wentworth Higginson, A. M.; secretary and treasurer, Mrs. J. G. Cilley. Other original members: Francis Wharton, D. D., LL. D., Henry N. Hudson, D. D., Elisha Mulford, D. D., Charles Theodore Russell, A. M., Henry Ware, A. M., James Mills Pierce A. M., Mrs. Ole Bull, Mrs. John T. Sargent, and others.

Officers, 1894.—President, S. L. Thorndike; vice-presidents, W. J. Rolfe, A. McF. Davis; treasurer, Miss Jones; secretary, Walter Deane.

THE SHAKESPEARE CLUB.

WORCESTER, MASS.

Organized November, 1887.

Object.—The study of the works of Shakespeare and other kindred subjects.

Founder.—Mrs. John C. Cutter (formerly of Brooklyn).

First officers.—Mrs. John C. Cutter, Harry L. Nelson, chairman; Miss Grace Goddard Cleveland.

Officers, 1894.—Thomas G. Kent, president; Louisa Trumbull Cogswell, secretary; Mrs. Alonzo S. Kimball, treasurer.

SHAKESPEARE SOCIETY OF WELLESLEY COLLEGE.

WELLESLEY, MASS.

Organized April, 1876.

Object.—"The Systematic study of Shakespeare, as a means of mental improvement."

Founder.—Henry F. Durant.

Officers, 1894.—President, Miss M. Gertrude Wilson; vice-president, Miss Emma Christy Brooks; recording secretary, Miss Ada Belfield; corresponding secretary, Miss S. Katharine Conner; treasurer, Miss Christine Caryl; first factotum, Miss May Allen; second factotum, Miss Louise Loomis.

THE SHAKESPEARE CLUB OF NEW YORK CITY.

Organized February 9, 1889; incorporated February 20, 1890.

Object.—Study of the works of Shakespeare.

First officers.—M. F. Hoagland, president; Emma Z. Smedley, secretary.

Officers, 1894.—Frederic G. Smedley, president; John M. Kyle, secretary; William B. Davenport, treasurer.

THE SHAKESPEARE SOCIETY OF NEW YORK.

NEW YORK, N. Y.

Organized December, 1885; incorporated April 18, 1885.

Object.—"Its object shall be to promote the knowledge and study of the works of William Shakespeare, and of the Shakespearian and Elizabethan drama, and to maintain a library of books, papers, pictures, paintings, statuary, and works of art relating thereto." (Constitution.)

Incorporators.—R. S. Guernsey, Appleton Morgan, Albert R. Frey, A. Chalmers Hinton, James E. Reynolds.

First board of trustees.—Appleton Morgan, Roscellus S. Guernsey, Albert R. Frey, A. Chalmers Hinton, Brander Matthews, and James E. Reynolds.

Officers, 1894–95.—Appleton Morgan, president; Martin W. Cooke, first vice-president; Harrison Grey Fiske, second vice-president; Albert R. Frey, recording secretary; W. O. Bates, assistant recording secretary; B. Rush Field, librarian; ———, treasurer; Nelson Wheatcroft, acting librarian; Thomas M. Wyatt, attorney and counsel; L. L. Lawrence, clerk of publication committee.

PUBLICATIONS.

1. Ecclesiastical Law in Hamlet, by R. S. Guernsey, 16mo, pp. 25. 2. Venus and Adonis; a study in Warwickshire dialect (with glossary), by Appleton Morgan, 16mo, pp. 104. 3. Shakespeare and Alleged Spanish Prototypes, by Albert R. Frey, 16mo, pp. 36. 4. Digesta Skakespeareana, Part I, A–F, by Appleton Morgan, 16mo, pp. 48. 5. Time in the Play of Hamlet, by E. P. Vining, 16mo, pp. 40. 6. Once Used Words in Shakespeare, by Davie Butler, 16mo, pp. 30. 7. Digesta Shakespeareana, Part II (conclusion), 16mo, pp. 90. 8. Construction and Types of Shakespeare's Versification, as seen in Othello, by T. R. Price, 16mo, pp. 32. 9. A Plea for a Reference Canon of the Plays, by Alvey A. Adee, 16mo, pp. 40. 10. The Society and the "Fad," by Appleton Morgan, 12mo, pp. 30. 11. The Earliest Shakespeare Society (in No. 5), by J. O. Hallewell-Phillipps. 12. The

Bankside Shakespeare, 38 volumes, 8vo, pp. about 350. These volumes consist of the text of the earliest version of each play printed in the lifetime of Shakespeare, paralleled with the 1623 or first folio text, both texts being numbered line by line and scrupulously collated with both the folio and quarto texts. The edition reproduces all the antique and pedantic ornaments of the quartos and folios; numbers consecutively every line, whether speech, stage direction, exit or entrance; copies every typographical slip, misplaced punctuation, error in orthography, or inverted letter in both texts, and even gives the precise "justification" of the lines of each version to the width of the original pages. It is an exact typographical reproduction, from photographs of the two extremely rare earliest printed forms, quarto and folio, as presented in and about the years 1591 to 1623, unexpurgated and unedited. The introductions are purely historical, and deal only with questions touching the materials, genesis, and record of each play, intruding no criticism whatever, either literary, "signpost," or by way of commentary. The work is under the general editorial direction of the president of the society, Dr. Appleton Morgan.

VOLAPUK ASSOCIATION.

NEW YORK, N. Y.

Organized July 10, 1885.

Object.—Advancement in America of the international language, "Volapuk."

First officers.—Ph. Heinsberger, jr., Fr. Heinsberger, Fr. Philips.

Officers, 1891.—Frederic Heinsberger, president; Fr. Philips, secretary and treasurer.

THE SHAKESPEARE CLUB OF THE UNIVERSITY OF NORTH CAROLINA.

CHAPEL HILL, N. C.

Organized October, 1886.

Objects.—To give impulse and guidance to scholarly investigation of the great dramatist, and besides to offer opportunity for comparative studies in the dramatic literature of ancient and foreign languages and to excite interest in the art of literary composition and criticism. Seminary methods are pursued by advanced students, and the results embodied in elaborate papers.

The society was organized as a result of the inspiring teaching of Rev. Thomas Hume, D. D., LL. D., the professor of English in the university, the leaders among the student body being Robert G. Grissom, Stephen B. Weeks, and L. P. McGehee.

First officers, 1886–87.—Prof. Thomas Hume, president; Prof. George T. Winston, vice-president; Robert G. Grissom, secretary; Joseph A. Morris, treasurer; executive committee (in addition to the above-named officers), Prof. W. D. Toy, L. P. McGehee, Stephen B. Weeks.

Officers, 1894–95.—Prof. Thomas Hume, president; Prof. W. D. Toy, vice-president; George T. Wills, secretary; H. Bingham, treasurer.

PUBLICATIONS.

Journal, Raleigh, 1887, 8vo., for the year 1886–87, with two extensive papers and elaborate reports of the proceedings and discussions.

The club has a small but valuable collection of special reference books. The character and range of subjects discussed are best suggested by selections from past programmes: 1. King Lear; sources of the plot; Robert of Gloucester's chronicle; the pre-Shakespearean plays on the subject. 2. The subplot of Gloster and his sons. 3. The comic element in modern tragedy. 4. Difference between the ancient and the modern treatment of ethical questions. 5. Method of characterization. Lectures have been delivered, or valuable papers read, on special occasions, on such subjects as the following: Shakespeare as a moral teacher. Mephistopheles and Iago. Shakespeare's use of legal knowledge and forms. Shakespearean side lights on old English life. Black's Judith Shakespeare: A picture of the dramatist's home life in his latest period. The history of dramatic blank verse and its artistic transformation by Shakespeare. Schiller's Macbeth compared with Shakespeare's. Greek tragedy. Molière's Les Précieuses Ridicules and Shakespeare's euphuism. A comparison of ethical teaching in the classical and the modern drama. Progressive art of Shakespeare in the delineation of women.

BROWNING SOCIETY OF PHILADELPHIA.

PHILADELPHIA, PA.

Organized 1888.

Object.—The study of poetry.

Officers for 1894–95.—President, Miss Helen Bell; vice-presidents, Dr. Daniel G. Brinton, Dr. Edward Brooks, Dr. G. Hudson Makuen, Mrs. S. B. Stitt, Jacob Sulz-

berger, Miss Anne H. Wharton; secretary, Miss Mary Harned; treasurer, Miss Matilda H. Morris; historiographer, Miss Harriet B. Henderson; executive board, Miss Harriet Boyer, Miss Anna R. Brown, Miss Mary M. Cohen, Miss Alice Groff, Miss Harriet B. Henderson, Miss Susan W. Janney, Harrison S. Morris, Prof. A. H. Smyth, Miss Louise Stockton, Francis Howard Williams, Hon. Robert N. Willson, Dr. Matthew Woods, and the officers ex officio.

The society has at present 730 members.

THE WARREN SHAKESPEARE CLUB

WARREN, PA.

Organized February 25, 1884.

Object.—The study of the writings of Shakespeare.

First officers.—C. H. Noyes, president; Mrs. C. W. Stone, vice-president; Mrs. J. P. Jefferson, secretary; P. S. Allen, treasurer.

Officers, 1894.—Hon. C. H. Noyes, president; Mrs. W. H. Allen, vice-president; L. A. Beardsley, secretary; Mrs. R. S. Hall, treasurer.

IX. HISTORY, BIOGRAPHY, AND GENEALOGY.

NATIONAL.

THE AMERICAN HISTORICAL ASSOCIATION.

WASHINGTON, D. C.

Organized September 10, 1884, at Saratoga, N. Y.; incorporated by act of Congress approved by the President January 4, 1889, as follows:

ACT OF INCORPORATION.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Andrew D. White, of Ithaca, in the State of New York; George Bancroft, of Washington, in the District of Columbia; Justin Winsor, of Cambridge, in the State of Massachusetts; William F. Poole, of Chicago, in the State of Illinois; Herbert B. Adams, of Baltimore, in the State of Maryland; Clarence W. Bowen, of Brooklyn, in the State of New York; their associates and successors, are hereby created in the District of Columbia a body corporate and politic by the name of the American Historical Association, for the promotion of historical studies, the collection and preservation of historical manuscripts, and for kindred purposes in the interest of American history and of history in America. Said association is authorized to hold real and personal estate in the District of Columbia so far only as may be necessary to its lawful ends to an amount not exceeding five hundred thousand dollars, to adopt a constitution, and to make by-laws not inconsistent with law. Said association shall have its principal office at Washington, in the District of Columbia, and may hold its annual meetings in such places as the said incorporators shall determine. Said association shall report annually to the secretary of the Smithsonian Institution concerning its proceedings and the condition of historical study in America. Said secretary shall communicate to Congress the whole of such reports, or such portions thereof as he shall see fit. The Regents of the Smithsonian Institution are authorized to permit said association to deposit its collections, manuscripts, books, pamphlets, and other material for history in the Smithsonian Institution or in the National Museum at their discretion, upon such conditions and under such rules as they shall prescribe.

[Approved, January 4, 1889.]

Object.—The promotion of historical studies.

Founders.—President Andrew D. White, of Cornell University; President Francis A. Walker, of the Massachusetts Institute of Technology; Profs. Justin Winsor and E. Emerton, and Instructors Channing, Scott, and Francke, of Harvard College; Profs. M. C. Tyler and T. F. Crane, of Cornell; Prof. Charles Kendall Adams, of the University of Michigan; Dr. H. B. Adams, of Johns Hopkins University; Prof. Allen C. Thomas, of Haverford College; Hon. John Eaton, United States Commissioner of Education; Charles Deane, LL. D., vice-president of the Massachusetts Historical Society; Dr. Charles W. Parsons and William B. Weeden, of the Rhode Island Historical Society; Mendes Cohen, of the Maryland Historical Society; Dr. Clarence W. Bowen, of The Independent; President S. L. Caldwell, of Vassar Col-

lege; Judge Mellen Chamberlain, librarian of the Boston Public Library; Judge Charles A. Peabody, of New York; Judge Batcheller, of Saratoga; Prof. Austin Scott, of Rutgers College; Prof. Herbert Tuttle, of Cornell; Dr. J. F. Jameson and Davis R. Dewey, of Johns Hopkins; Henry E. Scott, of Harvard; Calvin H. Carter, of Waterbury, Conn.; and William Henry Davis, of Cincinnati, Ohio.

First officers.—President, Andrew D. White; vice-presidents, Justin Winsor and Charles Kendall Adams; secretary, Herbert B. Adams; treasurer, Clarence W. Brown; executive council (in addition to the above-named officers), William B. Weeden, Moses Coit Tyler, and Ephraim Emerton.

Officers, 1895.—President, George F. Hoar; vice-presidents, Richard S. Storrs and James Schouler; secretaries, Herbert B. Adams and A. Howard Clark; treasurer, Clarence W. Bowen; executive council (in addition to the above-named officers), Andrew D. White, Justin Windsor, Charles Kendall Adams, William Wirt Henry, James B. Angell, Henry Adams, G. Brown Goode, George B. Adams, Theodore Roosevelt, J. L. M. Curry.

PUBLICATIONS.

Papers, 5 vols., 8vo, New York, 1886–1891. Reports, 6 vols. + 8vo. Washington, 1890. For contents see the report of the association, 1892, pp. 4–9.

AMERICAN JEWISH HISTORICAL SOCIETY.

WASHINGTON, D. C.

Organized June 7, 1892.

Object.—"The collection, preservation, and publication of material having reference to the settlement and history of the Jews on the American Continent."

First officers.—President, Hon. Oscar S. Straus, New York; vice-presidents, Dr. Charles Gross, Harvard University; Prof. John B. McMaster, University of Pennsylvania; Hon. Simon W. Rosendale, Albany; corresponding secretary and treasurer, Dr. Cyrus Adler, Smithsonian Institution; recording secretary, Dr. Herbert Friedenwald, Philadelphia; additional members of council, Max Cohen, New York; Mendes Cohen, Baltimore; L. M. Dembitz, Louisville; Dr. B. Felsenthal, Chicago; Rev. Dr. M. H. Harris, New York; Prof. Morris Jastrow, jr., University of Pennsylvania; Julius Rosenthal, Chicago; Miss Henrietta Szold, Baltimore.

Officers, 1895.—President, Hon. Oscar S. Straus, New York; vice-presidents, Dr. Charles Gross, Harvard; Hon. Simon W. Rosendale, Albany; Paul L. Ford, Brooklyn; corresponding secretary, Dr. Cyrus Adler, Smithsonian Institution; recording secretary, Dr. Herbert Friedenwald, Philadelphia; treasurer, R. J. H. Gottheil, Columbia College; council, Mendes Cohen, Baltimore; Hon. Meyer Sulzberger, Philadelphia; Rev. Dr. B. Felsenthal, Chicago; Prof. M. Jastrow, University of Pennsylvania; N. Taylor Phillips, New York; Hon. Simon Wolf, Washington; Dr. J. H. Hollander, Johns Hopkins University; Max J. Kohler, New York.

PUBLICATIONS.

Publications Nos. I and II +, 1893–94, 8vo, pp. v + 143, vi + 208.

THE AMERICAN SOCIETY OF CHURCH HISTORY.

NEW YORK, N. Y.

Organized in New York City, March 23, 1888.

Object.—To promote studies in the department of church history.

Its founder was Rev. Philip Schaff, D.D., LL.D., at the time professor of church history in Union Theological Seminary, New York City, and he was its president till his death, October 20, 1893. The other officers of the first board were: Vice-presidents, Rev. Prof. Drs. George P. Fisher (Yale, New Haven), James C. Moffat (Princeton), A. H. Newman (Toronto), and Rt. Rev. Dr. A. C. Coxe, (Buffalo, N. Y.); councilors, Rev. Dr. D. Dorchester (Boston), Rev. Prof. Dr. H. M. Scott (Chicago), Prof. E. Emerton, Ph. D. (Harvard, Cambridge), and E. C. Richardson (librarian, Hartford, Conn.); secretary and treasurer, Rev. Samuel Macauley Jackson.

Officers, 1894.—Rev. Bishop Dr. J. F. Hurst, president; vice-president, Rev. Prof. Drs. H. M. Baird, G. P. Fisher, H. E. Jacobs, and Rev. Dr. C. C. Tiffany; councilors, Rev. Drs. T. W. Chambers, J. M. Buckley, H. M. MacCracken, and Mr. H. C. Vedder; secretary, Rev. Samuel Macauley Jackson; treasurer, Barr Ferree.

PUBLICATIONS.

Papers, Vols. I–VI, 1889–94, 8vo, averaging about 250 pages each.

SOUTHERN HISTORICAL SOCIETY.

RICHMOND, VA.

Organized at New Orleans, La., May 1, 1869; reorganized August, 1873, and its headquarters transferred to Richmond, Va.

Object.—"The collection and preservation of papers and records as might be valuable in preserving a true history of the claims, events, and results of the late war between the Confederate States and the United States."

First officers.—Rev. B. M. Palmer, D. D., president; Gen. Braxton Bragg, vice-president; Dr. Joseph Jones, secretary and treasurer; an advisory committee of four, and vice-presidents: from Virginia, Gen. Robert E. Lee; Maryland, Hon. S. Tinckle Wallis; North Carolina, Lieut. Gen. D. H. Hill; South Carolina, Lieut. Gen. Wade Hampton; Georgia, Hon. A. H. Stephens; Alabama, Admiral Raphael Semmes; Tennessee, Gov. Isham G. Harris; Mississippi, Gov. B. G. Humphreys; Texas, Col. Ashbel Smith; Kentucky, Maj. Gen. John C. Breckinridge; Missouri, Gen. Trusten Polk; Arkansas, Hon. A. H. Garland; Florida, Hon. S. R. Mallory; District of Columbia, William Wilson Corcoran.

Officers, 1894.—President, vacant; chairman of executive committee, Maj. Gen. Dabney H. Maury (who was an original founder of the society at New Orleans); treasurer, Hon. George L. Christian; secretary and editor of the papers, R. A. Brock; members of the executive committee, the above, and Col. William H. Palmer, Maj. Robert Stiles, Robert S. Bosher, Col. Archie Anderson, Rev. M. D. Hoge, D. D., Col. T. M. R. Talcott, Col. W. E. Cutshaw, Hon. Theodore S. Garnett, Maj. E. D. T. Myers, S. Horace Hawes, John S. Ellett.

PUBLICATIONS.

Southern Historical Papers, monthly, commenced January 1, 1876; six semiannual volumes, of about 400 pages each, were published; also as an appendix, commencing with No. 5, Vol. I, "A Roster of General Officers, Heads of Departments, Senators, Representatives, Military Organizations, etc., in Confederate Service during the war between the States. By Charles C. Jones, jr., late lieutenant-colonel of artillery, C. S. A." This was completed in No. 2, Vol. III, in 130 pages. With Vol. VII the Papers were published monthly, in annual volumes of nearly 600 pages each. With Vol. XIII the Papers were published annually and have been continued, Vol. XXII being now issued. 8vo.

For a more detailed history of this society see an account in its Papers, Vol. XVIII, pp. 349–365, Vol. XIX, pp. 335–336; and for a full bibliography, see Report American Historical Association, 1892.

SOUTHERN HISTORY ASSOCIATION.

WASHINGTON, D. C.

Organized in Washington, D. C., April 24, 1896.

Objects.—"The study of the history of the Southern States, the encouragement of original research, discussion, and conference among members, the widening of personal acquaintance, the publication of work, and the collection of historical material." (Constitution.)

Founders.—This association grew out of the joint efforts of Dr. Colyer Meriwether, Thomas M. Owen, and Dr. Stephen B. Weeks.

Officers for 1896.—President, Postmaster-General William L. Wilson, Washington, D. C.; vice-presidents, Dr. J. L. M. Curry, general agent Peabody fund, Washington, D. C., Gen. M. C. Butler, Edgefield C. H., S. C., Gen. M. J. Wright, War Department, Washington, D. C., Hon. John R. Procter, president Civil-Service Commission, Washington, D. C., Mr. Thomas Nelson Page, Washington, D. C., Prof. Woodrow Wilson, Princeton, N. J.; secretary, Colyer Meriwether, Ph. D., 325 East Capitol street, Washington, D. C.; treasurer, Mr. Thomas M. Owen, Post Office Department, Washington, D. C.; administrative councils (in addition to the above-named officers), Col. Isaac W. Avery, Atlanta, Ga., Prof. Kemp P. Battle, University of North Carolina, Chapel Hill, N. C., Col. R. A. Brock, secretary Southern Historical Society, Richmond, Va., Mr. T. L. Cole, room 13, Corcoran Building, Washington, D. C., Dr. Chas. W. Dabney, jr., Assistant Secretary of Agriculture, Washington, D. C., Prof. R. Heath Dabney, University of Virginia, Charlottesville, Va., Prof. John R. Ficklen, Tulane University, New Orleans, La., Prof. Lee Davis Lodge, Columbian University, Washington, D. C., Judge C. W. Raines, Austin, Tex., Prof. Chas. Lee Smith, William Jewell College, Liberty, Mo., Prof. W. C. Stubbs, New Orleans, La., Mr. Reuben G. Thwaites, secretary State Historical Society, Madison, Wis., President Lyon G. Tyler, William and Mary College, Williamsburg, Va., Stephen B. Weeks, Ph. D., Bureau of Education, Washington, D. C., and Prof. W. S. Wyman, LL. D., University of Alabama.

STATE.

THE ALABAMA HISTORICAL SOCIETY.

TUSCALOOSA, ALA.

Organized July 9, 1850, at the University of Alabama, Tuscaloosa; incorporated February 5, 1852.

Objects.—The collection of the materials of Alabama history; arousing an interest in the subject and stimulating effort in the production of local and other historical works.

First officers.—President, Hon. Alexander Bowie, Talladega, Ala.; first vice-president, A. J. Pickett, Montgomery, Ala.; second vice-president, Gen. E. D. King, Perry County, Ala.; treasurer, Hon. Washington Moody, Tuscaloosa; secretary, Joshua H. Foster, Tuscaloosa.

Present officers, 1894–95.—President, Dr. Allen S. Andrews, Greensboro, Ala.; secretary, R. A. Hardaway, Tuscaloosa, Ala.; treasurer, J. H. Fitts, Tuscaloosa, Ala.

The meetings are held annually during the commencement exercises of the University of Alabama.

PUBLICATIONS.

See Bibliography in Report of American Historical Association, 1890.

CALIFORNIA HISTORICAL SOCIETY.

SAN FRANCISCO, CAL.

Incorporated April 30, 1852, as the Historical Society of the State of California, by Stephen J. Field, J. B. Moore, Henry W. Halleck, Robert Greenow, J G. Marvin, Alex. S. Taylor, P. B. Reading, Pablo De La Guerra, and William J. Shaw. Reorganized and incorporated as the California Historical Society, March 5, 1886, by William Ashburner, Horace Davis, Joseph A. Donohoe, John T. Doyle, Edw. S. Holden, Ralph C. Harrison, Bernard Moses, John R. Jarboe, William Norris, J. De Barth Shorb, and Rev. Aloysius Varsi.

Objects.—It is now supported by a few public-spirited citizens of the Commonwealth, whose object is to collect, preserve, and diffuse information relating to history.

Organizers as above.

Officers and directors, 1894–95.—President, Hon. James V. Coffey; secretary, A. S. Hubbard; treasurer, Joseph A. Donohoe; directors, Prof. Martin Kellogg, Hon. Horace Davis, John R. Jarboe, Hon. John Reynolds, Hon. Nathan W. Blanchard, Hon. John M. Corcoran, William Norris, Hon. A. P. Catlin.

PUBLICATIONS.

Papers, 2 vols, 2 pts. each. For details see seventh report of American Historical Association, 1890.

HISTORICAL SOCIETY OF SOUTHERN CALIFORNIA.

LOS ANGELES, CAL.

Organized November 1, 1883; incorporated February 13, 1891.

Objects.—The collection and preservation of all material which can have any bearing upon the history of the Pacific Coast in general and of Southern California in particular; the publication of historical papers read before the society; discussion of historical subjects.

First officers.—President, J. J. Warner; vice-presidents, H. D. Barrows, A. F. Coronel, J. G. Downey, and John Mansfield; treasurer, J. M. Guinn; secretary, C. N. Wilson.

Officers, 1894.—President, C. P. Dorland; first vice-president, H. D. Barrows; second vice-president, Mrs. M. Burton Williamson; treasurer, Edwin Baxter; secretary and curator, J. M. Guinn; board of directors, C. P. Dorland, H. D. Barrows, J. M. Guinn, Edwin Baxter, Rev. J. Adam, J. D. Moody, Mrs. M. Burton Williamson.

PUBLICATIONS.

Collections or Annual Publication, 1886–1894, 16mo, averaging about 80 pages. See Report of American Historical Association, 1890.

Annual Publication of Collections Historical Society of Southern California, 16mo, 56 pages, 1887, paper.

THE SOCIETY OF CALIFORNIA PIONEERS.

San Francisco, Cal.

Organized August, 1850; incorporated January 28, 1863, and again under the civil code of California, March 18, 1885.

Objects.—To cultivate social intercourse, form a more perfect union among its members, and create a fund for charitable purposes in their behalf; to collect and preserve information connected with the early settlement and subsequent history of the country; to form a library and cabinet, and preserve such literary and scientific objects as the board of directors may from time to time determine, and in all appropriate matters to advance the interests and perpetuate the memory of those whose sagacity, energy, and enterprise induced them to settle in the wilderness and become the founders of a new State.

First officers under incorporation of 1863.—Owen P. Sutton, president; Richard Chenery, Ephriam W. Leonard, James Lick, Lewis Cunninghan, and Joseph W. Winans, vice-presidents; William L. Duncan, secretary; John H. Turney, treasurer; directors, Horace Hawes, J. H. Widber, J. E. De la Montagnie, John O. Earle, W. K. Van Alen, J. H. Stearns, and William Henry Tiffany.

Incorporators, 1885.—Nathaniel Holland, Louis Sloss, George T. Marye, jr., David P. Marshall, William Dutch, Thomas J. Knipe, Henry B. Russ, Justin Gates, Robert White, Charles H. Stoutenborough, Ferdinand Vassault.

First president, 1850–1853, William Henry Davis Howard.

Officers, 1893–94.—President, C. V. S. Gibbs; vice-presidents, John B. Russ, Dr. Washington Ayer, Henry Matthews, Niles Searles, Caius T. Ryland; secretary, John I. Sepear; marshal, John F. Pinkham; directors, Christian Reis, John P. Bering, H. N. Tilden, E. E. Chever, A. S. Hall, Henry Palmer, James H. Widber, George T. Marye, jr., Martin R. Roberts, jr.

PUBLICATIONS.

See Report of American Historical Association, 1890.

THE BRISTOL HISTORICAL AND SCIENTIFIC SOCIETY.

Bristol, Conn.

Organized June 18, 1890.

Object.—"Its object shall be the promotion of interest in history, especially local history, and science, and the establishment and care of a museum for the collection of objects of interest." (Constitution.)

Founders.—C. S. Treadway, F. H. Williams, E. E. Newell, G. H. Tracy, Epaphroditus Peck, J. H. Sessions.

Officers, 1895.—President, E. E. Newell; vice-president, W. C. Richards; secretary and treasurer, E. L. Dunbar; directors, W. C. Richards, B. S. Lewis, E. E. Newell, Roswell Atkins, E. L. Dunbar.

CONNECTICUT HISTORICAL SOCIETY.

Hartford, Conn.

Organized May 30 and 31, 1825; incorporated May, 1825. After the first year the society failed to keep up its organization and was revived by an act of the Connecticut legislature, passed in 1839, the former members becoming members under the new act.

Objects.—"For the purpose of discovering, procuring, and preserving materials for the civil, ecclesiastical, and natural history of the United States and especially of the State of Connecticut."

Founders.—John Trumbull, president, poet, author of McFingal, lawyer, judge of superior and supreme courts of Connecticut, treasurer of Yale College; Right Rev. Thomas C. Brownell, vice-president, bishop of Connecticut, and first president of Washington, now Trinity, College; Thomas Day, recording secretary; Rev. Thomas Robbins, corresponding secretary; Walter Mitchell, treasurer.

Officers, 1894–95.—Charles J. Hoadly, president; Rev. Samuel Hart, first vice-president; Frank B. Gay, recording secretary; Rev. W. De Loss Love, corresponding secretary; Jonathan F. Morris, treasurer; Albert C. Bates, librarian.

PUBLICATIONS.

Collections, Vol. I–V, 1860, 8vo. See also report American Historical Association, 1890.

THE FAIRFIELD COUNTY HISTORICAL SOCIETY.

BRIDGEPORT, CONN.

This society was at first a voluntary association, formed February 4, 1881; incorporated March 24, 1885.

Objects.—"The promotion and encouragement of historical, antiquarian, and genealogical investigation relating to said county and the towns composing it, and for the preservation and publication of the same." (Act of incorporation.)

Founders.—Rowland B. Lacey, George C. Waldo, William A. Beers, Samuel Orcutt, Richard C. Ambler, Nathaniel E. Wordin, L. N. Middlebrook, William B. Hincks, and Curtis Thompson, all of Fairfield County.

Officers, 1894.—President, Rowland B. Lacey; vice-presidents, George C. Waldo, Curtis Thompson, and Charles Burr Todd; treasurer and curator, Edward Deacon; recording secretary, Howard N. Wakeman; corresponding secretary, James R. Burroughs.

PUBLICATIONS.

Anniversary proceedings, 1882, 1885, 1887, 8vo. Annual report, 1889, 1891–92, 1893–94, 8 vo. See also report American Historical Association, 1892.

LITCHFIELD HISTORICAL SOCIETY.

LITCHFIELD, CONN.

Organized August 10, 1893.

Objects.—To collect and preserve objects of local historical interest; books written by Litchfield people or of interest to them.

First officers.—President, Rev. S. O. Seymour; vice-presidents, A. A. Stone, D. C. Kilbourn, and Mrs. John H. Hubbard; secretary, Elbert P. Roberts; treasurer, Rev. Charles A. Symington.

Officers, 1894–95.—Same as above, except that Miss Mary Phelps is now the treasurer.

THE MORSE SOCIETY.

HARTFORD, CONN.

Organized May, 1892; incorporated 1892.

Objects.—"The particular business and object of such society is the establishment of social relations between and among its members; the conservation of historical records, information, and data, particularly those relating to the history and genealogy of members and their families; the encouragement of patriotic sentiment among the members of the society and others; the production and publication of literature relating to the objects of the society or to its members or their families; the establishment of a library to contain books, records, paintings, periodicals and other publications, and objects which may suitably be collected in such library; and the transaction of such business as may be incidental or pertinent to the accomplishment of the objects above specifically set forth." (Certificate of incorporation.)

Charter members.—David R. Morse, Jerome E. Morse, Howard H. Morse, George R. Morse, Frederick R. Morse, George H. Morse, George D. Morse, Eldredge W. Morse, Henry G. Morse, Arthur G. Morse, Waldo G. Morse, William H. Morse, Frank Rogers Morse, Albert G. Morse, Elijah A. Morse, George F. Morse, Frank E. Morse.

First officers.—President, Jerome E. Morse; vice-president, Waldo G. Morse; treasurer, David R. Morse; registrar, George R. Morse; secretary, Arthur G. Morse.

Officers and trustees, 1895.—President, Jerome E. Morse, 239 Broadway, New York City; vice-president, Waldo G. Morse, 10 Wall street, New York City; treasurer, David R. Morse, 45 Fulton street, New York City; secretary and registrar, John Howard Morse, 17 Capitol avenue, Hartford, Conn.; Arthur G. Morse, 234 Broadway, New York City; George R. Morse, 11 Wall street, New York City; Elijah A. Morse, Canton, Mass.; Daniel P. Morse, 160 Monroe street, Brooklyn, N. Y.; Harry T. Morse, 80 Broad street, New York City.

PUBLICATIONS.

The Morse Record. 4to.

NEW HAVEN COLONY HISTORICAL SOCIETY.

NEW HAVEN, CONN.

Organized November 14, 1862; incorporated June 17, 1863.

Object.—"To collect and preserve such books, pamphlets, * * * manuscripts, * * * curiosities, and antiquities of every kind as may be connected with or

may illustrate the local history of the towns included within the ancient New Haven Colony; * * * to encourage historical and antiquarian investigation and to disseminate historical information."

First officers.—President, Henry White, M. A.; vice-president, Rev. E. Edwards Beardsley, D. D., LL. D.; secretary, Horace Day, M. A.; treasurer, Nathan Peck.

Officers, 1895.—President, Hon. Simeon E. Baldwin, LL. D.; vice-president, Eli Whitney, M. A.; secretary, Henry T. Blake, B. A.; treasurer, Dwight E. Bower, B. A., LL. B.

PUBLICATIONS.

"Papers," 8vo, Vol. I–IV, as follows: I, 1865, pp. 170+IV+192; II, 1877, pp. XXIV+388; III, 1882, pp. VII+620; IV, 1888, pp. VIII+456; V, 1894, pp. XCII+309.

THE NEW LONDON COUNTY HISTORICAL SOCIETY.

New London, Conn.

Incorporated July 6, 1870.

Object.—To collect, preserve, and publish historical and genealogical matter relating to the early settlement and subsequent history especially of New London County, and incidentally of other portions of the United States.

Founders.—Henry P. Haven, Charles J. McCurdy, John W. Stedman, Richard A. Wheeler, Learned Hibbard, John T. Wait, John P. C. Mather, Ashbel Woodward, Nathan Belcher, William H. Potter, S. G. Willard, Thomas A. Clark, Isaac Johnson.

First officers.—President, La Fayette S. Foster; vice-presidents, Charles J. McCurdy, Ashbel Woodward, Francis B. Loomis; secretary, John P. C. Mather; treasurer, William H. Rowe.

Officers, 1894–95.—President, Charles Augustus Williams; vice-presidents, Benjamin Stark, William A. Slater, Frederick Bill; secretary, May Kelsey Champion; treasurer, Charles B. Ware.

PUBLICATIONS.

See Report of American Historical Association, 1890.

SAUGATUCK HISTORICAL SOCIETY OF WESTPORT.

Westport, Conn.

Organized January 19, 1889.

Object.—Historical research.

Founders.—Rev. Alonzo Norton Lewis, Rev. James E. Coley, Horace Staples, William C. Staples, Lorin T. Day, M. D., Samuel Wood, Louis McDonough, Thomas C. Stearns.

Present officers, 1894–95.—President, Horace Staples; vice-presidents, William J. Jennings, William H. Saxton, Rev. K. Mackenzie, jr.; secretary, Rev. James E. Coley; librarian, William Gray Staples; treasurer, Dr. L. T. Day.

THE HISTORICAL SOCIETY OF DELAWARE.

Wilmington, Del.

Organized May 31, 1864; incorporated October 26, 1864.

Object.—The elucidation of history, particularly such portions as may refer to this State.

First officers.—President, Hon. Willard Hall; first vice-president, Hon. William T. Read; second vice-president, Sam. M. Harrington; third vice-president, William Cannon; corresponding secretary, Rev. Leighton Coleman; recording secretary, William D. Dowe; librarian, Dr. I. Frank Vaughn; treasurer, William S. Hilles.

Officers, 1894–95.—President, Chief Justice Charles B. Love; first vice-president, Hon. Thomas F. Bayard; second vice-president, Nathaniel B. Smithers; third vice-president, Ebe. W. Tunnell; corresponding secretary, Henry B. Nones; recording secretary, Willard Hall Porter; treasurer, Henry R. Bringhurst; librarian, John J. Gallagher; historiographer, Dr. Horace Burr.

PUBLICATIONS.

See Report American Historical Association, 1890, and in addition: The Records of Holy Trinity (Old Swedes) church, Wilmington, Del. From 1697 to 1773. Translated from the original Swedish, by Dr. Horace Burr, 1890. Cæsar Rodney, 1728–1784.

THE COLUMBIA HISTORICAL SOCIETY.

WASHINGTON, D. C.

Organized April 12, 1894; incorporated May 3, 1894.

Objects.—The particular business and objects of the society are the collection, preservation, and diffusion of knowledge respecting the history and topography of the District of Columbia, and national history and biography, and, in general, the transaction of any business pertinent to a historical society at the national capital.

Incorporators.—Marcus Baker, Swan M. Burnett, Worthington C. Ford, Kate Field, Lawrence Gardner, W. W. Godding, G. Brown Goode, A. B. Hagner, W. T. Harris, James F. Hood, John F. Hurst, Gardiner G. Hubbard, John J. Keane, Elizabeth B. Johnston, John A. Kasson, W. J. McGee, S. P. Langley, Martin F. Morris, John G. Nicolay, Theodore W. Noyes, John W. Powell, J. Havens Richards, E. Francis Riggs, John W. Ross, A. R. Spofford, Hugh T. Taggart, J. M. Toner, James C. Welling, and Michael I. Weller.

First officers.—President, Dr. J. M. Toner; vice-presidents, Gardiner G. Hubbard, Ainsworth R. Spofford; recording secretary, Marcus Baker; corresponding secretary, Michael I. Weller; treasurer, E. Francis Riggs; curator, James F. Hood. Councilors: four years, Kate Field; four years, W. J. McGee; three years, Lawrence Gardner; three years, J. C. Welling; two years, A. B. Hagner; two years, John G. Nicolay; one year, Elizabeth B. Johnston; one year, T. W. Noyes.

Officers, 1895.—President, J. M. Toner, M. D.; vice-presidents, Hon. A. R. Spofford and Hon. John A. Kasson; recording secretary, Marcus Baker; corresponding secretary, M. I. Weller; treasurer, E. Francis Riggs; curator, James F. Hood. Councilors: For four years, F. W. Noyes and Elizabeth Bryant Johnson; three years, Kate Field and W. J. McGee; two years, Lawrence Gardner and J. O. Wilson, and one year, John G. Nicolay and A. B. Hagner.

THE GEORGIA HISTORICAL SOCIETY.

SAVANNAH, GA.

Organized May 24, 1839; incorporated December 19, 1839; amended October 25, 1870, so as to allow the society to hold property of more than the annual value of $5,000.

Objects.—To collect, preserve, and diffuse information relating to the history of the State of Georgia, in all its departments, and of American history generally, and to create a library for the use of its members. (Constitution.)

Incorporators—J. M. Berrien, James M. Wayne, M. H. McAllister, I. K. Tefft, William B. Stevens, George W. Hunter, H. K. Preston, William T. Williams, and others.

First officers.—President, Hon. John M. Berrien; first vice president, Hon. James M. Wayne; second vice-president, William Bellinger Bulloch; corresponding secretary, Israel K. Tefft; recording secretary, William Bacon Stevens; treasurer, George Wallace Hunter; librarian, Henry K. Preston; curators, William Thorne Williams, Charles S. Henry, John C. Nicoll, William Law, Richard D. Arnold, M. D., Robert M. Charlton, and Matthew Hall McAllister.

Present officers.—President, Hon. Henry R. Jackson; first vice-president, Col. John Screven; second vice-president, Hon. W. D. Harden; corresponding secretary, Otis Ashmore; recording secretary, George T. Cann; treasurer, Clarence S. Connerat; librarian, William Harden; curators, Hon. W. D. Harden, Col. George A. Mercer, Dr. R. J. Nunn, Col. J. H. M. Clinch, Walter G. Charlton, Dr. A. Oemler, Charles N. West, and Horace P. Smart.

PUBLICATIONS.

See Report of American Historical Association, 1890, pp. 193–197, and add: The Life and Times of William Harris Crawford, by Charles N. West, A. M., 1892, 8vo. pp. 45.

PUBLIC LIBRARY AND HISTORICAL SOCIETY.

MACON, GA.

Organized June, 1874; incorporated April, 1876.

Objects.—For social and mental improvement.

First officers.—R. E. Park, president; C. E. Campbell, vice-president; W. B. Valger, secretary; T. O. Chestney, treasurer, with 14 directors.

Officers, 1894.—O. P. Willingham, president; A. A. Allen, vice president; E. A. Waxelbaum, treasurer; M. G. Ogden, secretary, and a board of nine directors.

CHICAGO HISTORICAL SOCIETY.

CHICAGO, ILL.

Organized June 9, 1856; incorporated February 7, 1857.

Object.—To institute and encourage historical inquiry, to collect and preserve the materials of history, and to spread historical information, especially concerning the Northwestern States. (Constitution.)

First officers.—W. H. Brown, president; William B. Ogden and J. Y. Scammon, vice-presidents; S. L. Ward, treasurer; William Barry, secretary and treasurer.

On the 9th of October, 1871, all its collection of books, pamphlets, manuscripts, files of newspapers, maps, etc., amounting to more than $100,000 was destroyed by fire. The society was reorganized in 1872, and its collections were destroyed a second time on July 14, 1874.

It was again reorganized in 1877. The corner stone of a new building was laid November 12, 1892.

Officers, 1890–91.—President, Edward G. Mason; vice presidents, Alex. C. McClurg and George W. Smith; secretary and librarian, John Moses; treasurer, Gilbert B. Shaw.

PUBLICATIONS.

Collections, Vols. I–IV+, 1882–1890+, 8vo. For detailed list see Report of American Historical Asscoiation 1890.

THE RAVENSWOOD HISTORICAL SOCIETY.

172 WASHINGTON STREET, CHICAGO, ILL.

Organized July 5, 1882; incorporated October, 1882.

Object.—To assist the young men of the village in the "study of history and kindred subjects."

The project met with flattering success, and the plan of the society was soon enlarged so as to include the building of a public library. The society now owns a fine three-story brick building, recently remodeled, and is a distributing station of the Chicago Public Library. The originator and founder of the society was A. M. Compton, who was for a number of years the president of the same. The first board of trustees consisted of R. J. Bennett, Squire Dingee, Rev. J. P. Brushingham, Rev. W. A. Lloyd, Rev. F. S. De Mattos, A. M. Compton, and D. R. Cameron.

Officers, 1895.—President, A. P. Brink; vice-president, D. N. Holcomb; treasurer, James W. Andrews; secretary, Theodore B. Potter; board of trustees, A. P. Brink, D. N. Holcomb, C. W. Chandler, Charles E. Sinclair, James W. Andrews, George A. Du Puy.

STATE HISTORICAL SOCIETY OF IOWA.

IOWA CITY, IOWA.

Organized February 7, 1857; incorporated December 2, 1867.

Object.—"For the purpose of collecting, arranging, and preserving books, pamphlets, maps, charts, manuscripts, papers, paintings, statuary, and other materials illustrative of the history of this State, and also to preserve the memory of the early pioneers of Iowa, their deeds, exploits, perils, and adventures; to secure facts relative to the history of our Indian tribes; to exhibit faithfully the antiquities, and to mark the progress of our rapidly developing Commonwealth; to publish such of the collections of the society as it shall from time to time deem of value and interest; to bind such publications and other books, pamphlets, manuscripts, and papers, as they may publish or collect, and to aid in all respects as may be within its province to develop the history of this State in all its departments."

First officers, 1857.—President, Hon. James W. Grimes; vice-presidents, Hon. S. J. Kirkwood, Hon. F. H. Lee, Hon. H. W. Gray, Hon. C. F. Clarkson, Hon. E. Price; corresponding secretary, C. Billings Smith; recording secretary, Thomas Hughes; librarian, John Pattee; treasurer, J. P. Wood.

Curators.—Hon. John Shane, Hon. D. P. Palmer, Hon. D. W. Price, Hon. Charles Negus, Hon. W. F. Coolbaugh, Hon. S. H. Langworthy, F. W. Ballard, M. B. Cochran, H. D. Downey, E. K. Rugg, William Vogt, T. S. Parvin, Hon. W. Penn Clarke, J. C. Culbertson, G. D. Woodin, Hon. G. W. McCleary, Le Grand Byington, Hon. S. G. Winchester.

Officers, 1894.—J. L. Pickard, LL. D., president; M. B. Cochran, M. D., vice-president; Lyman Parsons, treasurer; M. W. Davis, secretary; H. W. Lathrop, librarian.

Curators (by appointment of the governor).—Hon. D. N. Richardson, Hon. George D. Perkins, Miss Marion Murdock, Hon. S. M. Clark, Hon. W. J. Knight, Hon. J. O.

Crosby, Hon. R. H. Moore, Hon. John F. Duncombe, Hon. S. R. Davis; (by election of society), Dr. J. L. Pickard, Prof. S. Calvin, Hon. Peter A. Dey, Hon. George W. Ball, Dr. C. M. Hobby, Prof. T. H. McBride, Hon. S. E. Paine, Dr. E. F. Clapp, Hon. L. B. Patterson.

PUBLICATIONS.

See Second Report of American Historical Association, 1890.
Iowa Historical Record, quarterly, 8vo, Vol. X, 1894.
Iowa Historical Lectures, delivered in 1892, Iowa City, 1893, 8vo, pp. 92.

KANSAS STATE HISTORICAL SOCIETY.

TOPEKA, KANS.

Organized December 14, 1875; incorporated December 15, 1875.

Object.—To collect and preserve a library of books, pamphlets, maps, manuscripts, pictures, relics, and other materials illustrative of the history of Kansas, and to make up a library of reference upon all subjects of human knowledge.

First officers.—Samuel A. Kingman, president; George A. Crawford, vice-president; John A. Martin, treasurer; F. P. Baker, secretary.

Officers, 1894.—Vincent J. Lane, president; W. L. Brown and James B. Abbott, vice-presidents; John Guthrie, treasurer; Franklin G. Adams, secretary.

PUBLICATIONS.

See Report of American Historical Association, 1890; add to this list Columbian History of Education in Kansas, 1893, 8vo, pp. 231, cloth.

THE LABETTE COUNTY (KANS.) HISTORICAL SOCIETY.

ALTAMONT, KANS.

Organized July 16, 1878; incorporated November 21, 1881.

Object.—To preserve the early history of the county and the objects of interest connected with its settlement and development.

Founders.—Nelson Case, B. W. Perkins, J. S. Waters, W. A. Starr, R. M. Donally, and some others.

First officers.—Nelson Case, president; J. S. Waters, secretary.

Officers, 1895.—Nelson Case, president; A. T. Dickerman, secretary.

PUBLICATIONS.

History of Labette County, by Nelson Case, 1883, 4to, pp. 372.

THE FILSON CLUB.

LOUISVILLE, KY.

Organized May 15, 1884; incorporated October 5, 1891.

Object.—Collecting, preserving, and publishing history, and especially the history of Kentucky. It is a literary and scientific association as well as historical, but its essential character is that of an historical organization.

Founders.—Reuben T. Durrett, Richard H. Collins, William Chenault, John Mason Brown, Basil W. Duke, George M. Davie, James S. Pirtle, Thomas W. Bullitt, Alexander P. Humphrey, and Thomas Speed.

Officers, 1894.—President, Reuben T. Durrett; vice-president, J. Stoddard Johnston; secretary, Thomas Speed; treasurer, Attilla Cox.

PUBLICATIONS.

See Report of American Historical Association, 1890, and add to that list: Centenary of Kentucky, by R. T. Durrett and others, 1892, 4to, pp. 200; the Centenary of Louisville, by R. T. Durrett, 1892, 4to, pp. 200; the Political Club, by Thomas Speed, 1894, 4to, pp. 180; the Life and Writings of Constantine Samuel Rafinesque, by Richard Ellsworth Call, 1895, 4to, pp. 239; History of Transylvania University, by Dr. Robert Peter, 4to, pp. 202.

LOUISIANA HISTORICAL ASSOCIATION.

NEW ORLEANS, LA.

Incorporated April 11, 1889.

"The objects and purposes for which this corporation is formed are to collect such books, pamphlets, papers, documents, flags, maps, plans, charts, paintings, engravings, lithographs, and other pictorial representations, manuscripts, and other things appertaining to the history of the territory of Louisiana, both before and after its

cession to the United States, and especially the collection and preservation of all papers, documents, relics, etc., relating to the war between the States from 1861 to 1865. And this corporation shall have the right to compile and publish, and to have compiled and published, books, plans, charts, and other papers and documents relating to the purposes for which it is organized, and to apply for and hold copyrights and patents necessary to its protection."—Constitution.

Incorporators.—Frank T. Howard, W. R. Lyman, D. A. Given, Peter Blake, J. Henry Behan, E. D. Willett, George H. Frost, J. H. Duggan, A. S. Lewis, Robert Maxwell, J. B. Wilkinson, jr., J. A. Chalaron, Charles E. Fenner, Jeff. C. Wenck, G. T. Beauregard, W. M. Owen, Richard S. Venables, Thomas Higgins, John T. Purves, Thomas S. Campbell, Joseph H. De Grange, T. E. Davis, S. S. Prentiss, John K. Renaud, Charles L. C. Dupuy, William Preston Johnston, Edwin I. Kursheedt, William Renaudin.

First officers.—Frank T. Howard, president; W. R. Lyman, first vice-president; W. M. Owen, second vice-president; D. A. Given, secretary and treasurer; C. A. Nelson, custodian.

Officers, 1894.—E. A. Palfrey, president; Hon. J. A. Breaux, first vice-president; J. A. Chalaron, second vice-president; D. S. Sullivan, secretary, treasurer, and custodian.

LOUISIANA HISTORICAL SOCIETY.

New Orleans, La.

This society was organized January 15, 1836. Its first president was Judge Henry A. Bullard; its secretaries, Mr. Harrison and Louis Janin. It then fell into decay and was reorganized in June, 1846, by John Perkins, J. D. B. De Baw, Edmund J. Forstall, Charles Gayarré, Gen. Joseph Walker, and Alfred Hennen. Judge Francois Xavier Martin was president. It flourished for several years and by act of assembly of January 10, 1860, became practically a State institution and Mr. Gayarré became its president. It was reorganized again in 1877 and in 1893.

Officers, 1894-95.—President, Alice Fortier; first vice-president, Grace King; second vice-president, Gustave Devron, M. D.; secretary and treasurer, John R. Ficklin; assistant secretary, J. H. Rapp.

BANGOR HISTORICAL SOCIETY.

Bangor, Me.

Organized May 3, 1864; incorporated March 4, 1864.

Object.—The original object was to gather and preserve records and memorials of the history of Bangor and vicinity. This was extended later to the collecting and preserving whatever would be of interest to students of civil, ecclesiastical, or natural history.

Founders.—John E. Godfrey, Rev. Benjamin F. Tefft, Dr. John Mason, Joseph S. Wheelwright. Rev. George W. Field, Dr. James C. Weston, George W. Pickering, Rev. Daniel S. Talcott, Elnathan F. Duren, George C. Pickering, Dr. Edwin M. Field, Noah S. Harlow, Samuel H. Dale, Charles S. Fellows, James Allen, Charles Stetson, Joseph Bartlett, Isaiah Stetson, Rev. Amory Battles, Rev. Charles C. Everett, Rev. Samuel Harris, Albert W. Paine.

First officers (elected May 3, 1864).—Hon. Elijah L. Hamlin, president; Rev. Charles C. Everett, vice-president; Rev. Samuel Harris, corresponding secretary; Elnathan F. Duren, recording secretary.

Present officers.—E. B. Nealley, president; Henry Lord, vice-president; Rev. John S. Sewall, corresponding secretary; Elnathan F. Duren, recording secretary; Dr. Thomas U. Coe, treasurer; Noah S. Harlow, librarian.

GORGES SOCIETY.

Portland, Me.

Organized 1884.

A publication club similar to the Prince Society, named in memory of Sir Ferdinando Gorges, the father of English colonization in New England.

Officers, 1894.—James Phinney Baxter, president; Hubbard Winslow Bryant, treasurer.

PUBLICATIONS.

Five volumes of publications, all in 4to, have been issued to date: New England's Vindication, edited by Charles E. Banks, M. D.; George Cleeve of Casco Bay, with Collateral Documents, by James Phinney Baxter, A. M.; Rosier's Relation of Waymouth's Voyage, edited by Henry S. Burrage, D. D.; the Sagadahoc Colony, by Henry O. Thayer, A. M.; Christopher Levett of York, by James Phinney Baxter, A. M., 1893, pp. 178.

MAINE GENEALOGICAL SOCIETY.

PORTLAND, ME.

Organized April 29, 1884; incorporated 1884.
Object.—The collection, preservation, and publication of historical and genealogical information in regard to Maine.
Founders.—John T. Hull, Charles F. Libby, Leonard B. Chapman, Augustus F. Moulton, and William Henry Smith.
First officers.—President, John Farwell Anderson; vice-president, Fabius Maximus Ray; secretary, Stephen Marion Watson; treasurer, Frederick Odell Conant; librarian, Charles Burleigh.
Officers, 1895.—President, Marquis Fayette King; vice-president, Albion Keith Parris Meserve; secretary, Frederick Odell Conant; treasurer, Millard Fillmore Hicks; librarian, Joseph Porter Thompson.

PUBLICATIONS.

Probate Records of Lincoln County, Me., in monthly parts, 8vo.

MAINE HISTORICAL SOCIETY.

PORTLAND, ME.

Organized April 11, 1822; incorporated February 15, 1822.
Object.—To collect historical materials and promote historical research.
First officers.—Albion K. Parris, president; Benjamin Hasey, recording secretary; Edward Russell, corresponding secretary; Prentiss Mellen, treasurer; Edward Payson, librarian.
Officers, 1894-95.—James P. Baxter, president; Joseph Williamson, corresponding secretary; Hubbard W. Bryant, recording secretary and librarian; Stephen J. Young, treasurer.

PUBLICATIONS.

Collections, Vols. I-X, 8vo, Series I.
Documentary Series, Vols. I-IV, 8vo.
Collections and Proceedings, Series II, Vols. I-V, 8vo, quarterly.
See also Report of American Historical Association, 1890.

PEJEPSCOT HISTORICAL SOCIETY.

BRUNSWICK, ME.

Organized January 10, 1888; incorporated December 10, 1891.
Object.—To investigate and record matters of interest in the history of Brunswick and of the adjoining towns of Topsham and Harpswell; to preserve records of the characters and services of eminent citizens of the three towns; to publish from time to time the proceedings of the society, including the historical and biographical papers read before the society, and to establish and maintain an historical museum and library.
First officers.—Henry W. Wheeler, president; Henry Johnson, vice-president; Ira P. Booker, secretary and treasurer; Henry L. Chapman, James W. Curtis, Albert G. Tenney, executive committee.
Officers, 1894.—Henry L. Chapman, president; James W. Curtis, vice-president; Ira P. Booker, recording secretary; John Furbish, corresponding secretary; Lyman E. Smith, treasurer; William M. Pennell, auditor; Albert G. Tenney (now deceased), A. V. Metcalf, George T. Little, executive committee.

PUBLICATIONS.

Collections, Part I, 1889, 8vo, pp. 66.
Account of the celebration of the one hundred and fiftieth anniversary of the incorporation of the town of Brunswick, June 13, 1889. 1889, 8vo, pp. 92.

SAGADAHOC HISTORICAL SOCIETY.

BATH, ME.

Organized October 4, 1877.
Object.—To promote the study of local history.
First officers.—Hon. Edwin Reed, president; J. L. Douglas, secretary.
Officers, 1895.—Dr. R. D. Bibbs, president; J. L. Douglas, secretary.

MARYLAND HISTORICAL SOCIETY.

BALTIMORE, MD.

Organized January 27, 1844; incorporated March 8, 1844.

Object.—For the purpose of collecting the scattered materials of the early history of the State and for other collateral objects.

Founders.—John Spear Smith, Robert Gilmoe, sr., Charles F. Mayer, Brantz Mayer, Bernard U. Campbell, John D. Carey, William A. Talbott, Fielding Lucas, jr., John J. Donaldson, Robert Carey Long, Sebastian F. Streeter, John H. B. Latrobe, Dr. James Hall, J. Morrison Harris, John P. Kennedy, George William Brown, Dr. Joshua I. Cohen, Dr. Stephen Collins, Frederick William Brune, jr., Capt. Robert Leslie.

Officers, 1895.—President, Rev. Dr. John G. Morris; vice-presidents, Albert Ritchie and Hon. Charles E. Phelps; corresponding secretary, Mendes Cohen; recording secretary, W. Hall Harris; reporting secretary, Henry C. Wagner; treasurer, Lennox Birckhead; librarian and curator of the cabinet, Henry F. Thompson.

PUBLICATIONS.

See Report of American Historical Association, 1890, pp. 229–240, and add Fund Publications, Nos. 30, 31, 32, and 33, and Archives of Maryland, Vols. X, XI, XII.

THE SOCIETY FOR THE HISTORY OF THE GERMANS IN MARYLAND OF BALTIMORE CITY.

BALTIMORE, MD.

Organized January 19, 1886; incorporated April 10, 1889.

Object.—"The object of this society shall be to gather, utilize, publish, and preserve material for the history of the Germans in Maryland."

Founders.—L. P. Hennighausen, Dr. W. S. Landsberg, Prof. C. Ch. F. Raddatz, Ed. F. Leyh, Chr. Ax, G. W. Gail, Rev. J. G. Morris, D. D., LL. D., Charles Weber, jr., Dr. Emil Bessels, Dr. L. H. Steiner, Rev. F. Ph. Hennighausen, D. D., etc.

Officers, 1894.—President, Rev. J. G. Morris, D. D., LL. D.; vice-presidents, L. P. Hennighausen and Rev. H. Scheib; secretary, F. Ph. Hennighausen, D. D.; treasurer, Mr. Robert M. Rother; executive committee, Prof. Ch. F. Raddatz, George W. Gail, Prof. Otto Fuchs, Prof. M. D. Learned, Ph. D., Rev. Ed. Huber, and the officers of the society.

PUBLICATIONS.

See Report of American Historical Association, 1890, and add to that list the following: The sixth, seventh, and eighth annual reports, 1892–1894, 8vo.

AMERICAN CONGREGATIONAL ASSOCIATION.

BOSTON, MASS.

Organized 1853; incorporated 1854.

Objects.—For the purpose of establishing and perpetuating a library of the religious history and literature of New England, and for the erection of a suitable building for the accommodation of the same and for the use of charitable societies.

Founders.—Rufus Anderson, Joseph S. Clark, Julius A. Palmer.

First officers.—President, William T. Dwight; corresponding secretary, Joseph S. Clark; librarian, Joseph B. Felt; treasurer, Alpheus Hardy.

Officers, 1894.—President, Samuel Johnson; secretary, Morton Dexter; librarian, William H. Cobb; treasurer, A. S. Lovett.

PUBLICATIONS.

Proceedings at the Dedication of the Congregational House. 8vo. pp. 100. Boston, 1873.

Annual reports I–XLI, Boston, 1854–1894. 8vo. About 20 pages each.

THE BOSTONIAN SOCIETY.

BOSTON, MASS.

Organized and incorporated 1881.

Objects.—"To promote the study of the history of Boston and the preservation of its antiquities." By its by-laws it is made "the duty of members, so far as it may be in their power, to carry out the objects of the society, by collecting, by gift, loan, or purchase, books, manuscripts, and pictures, and by such other suitable means as may from time to time seem expedient."

Founder and first president.—Curtis Guild.

Officers, 1894.—President, Curtis Guild; clerk and treasurer, Samuel Arthur Bent; directors, Curtis Guild, Samuel H. Russell, Hamilton A. Hill, Joshua P. Bodfish, John Lathrop, George O. Carpenter, Benjamin C. Clark, James F. Hunnewell, Levi L. Willcutt.

PUBLICATIONS.

See Report of American Historical Association, 1892.

THE DANVERS HISTORICAL SOCIETY.

DANVERS, MASS.

Organized September 16, 1889; incorporated 1893.

"The objects of the society shall be to discover, collect, and preserve such publications, manuscripts, pictures, memorials, and specimens as may illustrate local and general history, but particularly the annals and natural history of the town of Danvers; to establish within the town a library and museum in which such treasures as it may thus receive or procure shall be deposited and kept; and, generally, to foster among its members and others, by meetings, and lectures, and in various ways, a love of historical, literary, and scientific pursuits."—By-laws.

First officers, September 16, 1889.—Rev. A. P. Putnam, D. D., president; Hon. A. P. White, vice-president; Ezra D. Hines, secretary; Dudley A. Massey, treasurer; George Tapley, librarian; Sarah E. Hunt, curator; directors, Augustus Mudge, Gilbert A. Tapley, Mrs. E. F. Masury, Andrew Nichols, Rev. C. B. Rice, Dr. Warren Porter, John S. Learoyd, Anne L. Page, and Charles H. Preston.

Officers, 1894–95.—Rev. A. P. Putnam, D. D., president; Hon. Alden P. White, vice-president; Miss Harriet S. Tapley, secretary; Mrs. E. M. P. Gould, assistant secretary; Dudley A. Massey, treasurer; George Tapley, librarian; Rev. Watson M. Ayres, assistant librarian; Mrs. Isadora E. Kenney, curator; Mrs. Annie G. Newhall, assistant curator; Ezra D. Hines, historian; directors, John W. Porter, Charles H. Masury, Miss Sarah W. Mudge, David R. Galloupe, Mrs. Ellen M. Dodge, Wallace P. Perry, Andrew Nichols, Rev. W. H. Trickey, Miss A. A. Kimball.

DEDHAM HISTORICAL SOCIETY.

DEDHAM, MASS.

Organized 1859; incorporated April 23, 1862, and February 25, 1886. The last allowed the society to hold property.

Objects.—The "preserving and transmitting to posterity all possible memorials of past and present times."

Founders.—On February 1, 1859, Henry Orin Hildreth, Calvin Guild, Danforth Phipps Wight, Jonathan Holmes Cobb, Francis Marsh, and William Bullard met to form a society for local historical work. As early as 1853 Mr. Hildreth had called the attention of several persons to the need and importance of such an organization, and the credit for the beginning of this enterprise is largely due to him. His untiring energy, with the earnest support of Mr. Guild, brought about the formation of the society. The first regular meeting was held on March 10, 1859. The officers chosen were: Rev. Alvan Lamson, D. D., president; Dr. Wight, vice-president; Mr. Hildreth, corresponding secretary; Mr. Guild, recording secretary, treasurer, and librarian; Mr. Cobb, Mr. Bullard, and Waldo Colburn, curators; Enos Foord and Henry White Richards, auditors.

Officers, 1894.—Don Gleason Hill, president; Erastus Worthington, vice-president; Don Gleason Hill, Erastus Worthington, Henry W. Richards, John H. Burdakin, A. Ward Lamson, and Carlos Slafter, curators; John H. Burdakin, librarian; Julius H. Tuttle, corresponding secretary; Harriet T. Boyd, recording secretary; George W. Humphrey, treasurer.

PUBLICATIONS.

See Report of American Historical Association, 1892, and add annual reports 1892–1894, 8vo.

Dedham Historical Register, 8vo, vol. 2, 1891, pp. 166; vol. 3, 1892, pp. 205; vol. 4, 1893, pp. 187; vol. 5, 1894, pp. 187.

DORCHESTER HISTORICAL SOCIETY

DORCHESTER, MASS.

Organized April 10, 1893; incorporated April 6, 1891.

Objects.—The collection, preservation, and publication of historical information.

Founders.—Herbert S. Carruth, William H. Whitmore, James M. Stark.

First officers.—W. H. Whitmore, president; Thomas Mair, treasurer; W. B. Mendum, secretary.

Officers, 1895.—President, William H. Whitmore; treasurer, Thomas Mair; secretary, Willis B. Mendum; directors, William Stamford Stevens, M. D., Herbert M. Mauks, D. Chauncey Brewer, John J. May, James H. Stark, Elbridge Smith, S. D.

THE HISTORICAL SOCIETY OF OLD NEWBURY, MASS.

NEWBURY, MASS.

Organized September 5, 1877.

Objects.—"For the commemoration of the first settlement on the banks of the Parker, for the preservation of whatever may yet be found of historic interest, whether of tradition or relics of the past, and also to record in the future any events of local interest as they may occur."

First officers.—President, William Little, of Newbury; vice-presidents, Nathaniel Little, Charles W. Woods, W. Burke Little, Horace F. Longfellow, Nathaniel Little, jr., Paul M. Ilsley, Moses K. Noyes, Joseph N. Rolfe, all of Newbury, and Eben F. Stone, William H. Swasey, Rev. S. J. Spalding, George J. L. Colby, Nathan N. Withington, William Thurston, Albert W. Greenleaf, John J. Currier, Henry M. Cross, Amos Noyes, Nathaniel Greeley, all of Newburyport, and Ben. Perley Poore, Somerby C. Noyes, Stephen E. Noyes, John C. Carr, Thomas G. Ordway, Charles W. Ordway, all of West Newbury; recording secretary, Stephen Ilsley; corresponding secretary, D. L. Withington; treasurer, Nathaniel Dole; historian, Luther Dame; finance committee, Nathaniel Dole, I. W. Little, Warren Currier, Henry B. Little, Somerby N. Noyes.

Chaffin, of North Easton; recording secretary and librarian, Capt. John W. D. Hall, of Taunton; corresponding secretary, Hon. Charles A. Reed, of Taunton; treasurer, John F. Montgomery, esq., of Taunton; auditor, Capt. George A. Washburn, of Taunton; historiographer, Edmund W. Porter, esq., of Taunton; directors, Hon. William E. Fuller, of Taunton, Gen. Ebenezer W. Peirce, of Freetown, Henry M. Lovering, esq., of Taunton, Hon. John S. Brayton, of Fall River, Hon. William W. Crapo, of New Bedford, James M. Cushman, of Taunton.

PUBLICATIONS.

Historical Collections, Vols. I.–IV; Vol. V in press.
A Quarterly Bulletin of Proceedings is also issued.

THE OLD RESIDENTS' HISTORICAL ASSOCIATION OF LOWELL.

LOWELL, MASS.

Organized December 19, 1868; now incorporated.

Objects.—To collect, arrange, preserve, and publish from time to time facts relating to the history of the city of Lowell.

First officers.—President, Dr. John O. Green; vice-president, Artemas L. Brooks; secretary and treasurer, Z. E. Stone; executive committee, James B. Francis, Edward Tufts, Joshua Merrill, J. P. Jewett, E. B. Patch, Hapgood Wright, E. T. Watson, Benjamin Walker, J. G. Peabody, Charles Morrill, E. B. Howe, J. K. Chase.

Officers, 1895.—President, Benjamin Walker; vice-president, Ephraim Brown; secretary and treasurer, James T. Smith; executive committee, J. G. Peabody, Ephraim Brown, Hapgood Wright, Samuel Horn, Artemas S. Tyler, D. M. Collins, Samuel P. Hadley, Z. E. Stone, Charles Cowley, John F. Kimball, Benjamin Walker, E. B. Howe.

PUBLICATIONS.

Contributions, first issued in pamphlet form, Vols. I–V. For detailed bibliography see Report of American Historical Association, 1892.

POCUMTUCK VALLEY MEMORIAL ASSOCIATION.

DEERFIELD, MASS.

Organized May 26, 1870; incorporated May 9, 1870.

Objects.—"The objects of this association shall be the collecting and preserving such memorials, books, papers, and curiosities as may tend to illustrate and perpetuate the history of the early settlers of this region and of the race which vanished before them, and the erection of a memorial hall in which such collections can be securely deposited."—Constitution.

The origin of the association lies in an appeal made to the descendants of those slaughtered at the sacking of Deerfield on the morning of February 29, 1704, to repair a shameful neglect by the erection of a monument which should bear their names down to posterity. This appeal was responded to generously and promptly. So general was the response that it was evident a popular chord had been struck, and that the sentiment of the people was in full accordance with the idea underlying this movement. With this view of public feeling, a plan, entertained for many years and considered almost hopeless of execution, now seemed not only feasible, but to be the very thing which the enthusiasm aroused by the discussion of the subject absolutely demanded, and the project for a monument over their place of rest was merged in a plan for an antiquarian society, under whose auspices a hall should be erected, with memorial slabs containing the names, as far as can be ascertained, of all the victims of that fatal day.

First officers.—Hon. George Sheldon, president; Josiah D. Canning, first vice-president; James M. Crafts, second vice-president; Dea. Nathaniel Hitchcock, recording secretary; Rev. Robert Crawford, D. D., corresponding secretary; Dea. Nathaniel Hitchcock, treasurer.

Officers, 1894—President, George Sheldon; vice-president, F. M. Thompson; second vice-president, E. A. Hale; secretary and treasurer, Nathaniel Hitchcock; corresponding secretary, Catherine B. Yale.

PUBLICATIONS.

See Report of American Historical Association, 1892.

PRINCE SOCIETY.

BOSTON, MASS.

Organized May 25, 1858; incorporated March 18, 1874.

Object.—"For the purpose of preserving and extending the knowledge of American history, by editing and printing such manuscripts, rare tracts, and volumes as are mostly confined in their use to historical students and public libraries."—Act of incorporation.

First officers.—Samuel Gardner Drake, president; Thomas Waterman, Frederic Kidder, Jeremiah Colburn, vice-presidents; John Ward Dean, corresponding secretary; William H. Whitmore, recording secretary; John Wells Parker, treasurer.

Officers, 1894–95.—President, Rev. Edmund F. Slafter, D. D., Boston; vice-presidents, John Ward Dean, A. M., Boston, William B. Trask, A. M., Boston, James P. Baxter, A. M., Portland, Me.; corresponding secretary, Robert N. Toppan, A. M., Cambridge; recording secretary, David Greene Haskins, jr., A. M., Cambridge; treasurer, Elbridge H. Goss, esq., Boston.

John Checkley and his Publications; with historical illustrations and a memoir by Edmund F. Slafter, D. D.

RUMFORD HISTORICAL ASSOCIATION.

WOBURN, MASS.

Organized March 26, 1877, the one hundred and twenty-fourth anniversary of the birth of Benjamin Thompson, Count Rumford; incorporated 1877.

Object.—"The object of this corporation shall be to hold and preserve a certain lot of land, with the buildings situated thereon, in Woburn, known as the birthplace of Benjamin Thompson, or Count Rumford; also, to collect and preserve for exhibition or use books, manuscripts, objects of antiquarian interest, and whatever may illustrate the life and times and perpetuate the memory of the distinguished man whose title is prominently associated with our organization, or whatever may relate to other matters of general historical interest." (Constitution.)

In January, 1873, a lecture was given in the lyceum course at Woburn, by Rev. William S. Barnes, upon the life of Count Rumford, the one native of the town who had achieved a celebrity as wide as the civilized world. Referring, in one of his concluding sentences, to the old mansion in the north village of the town, in which the boy, Benjamin Thompson, who became the distinguished count, was born in 1753, he said: "I could wish that Woburn would take measures to preserve that interesting property to a future that will think more of such relics than we." Previous to the date of this lecture individuals had often privately expressed a similar wish, but this is believed to be the first public intimation ever uttered in Woburn that the old Rumford house, now rapidly going to decay, might be, or should be, rescued and preserved as an appropriate memorial of the illustrious scientist who there found his first home. A few persons immediately began to investigate and to plan. After considerable delay and not a few apparent discouragements, it was ascertained that the house was not only in a very ruinous condition, but likely shortly to exchange owners, and be early doomed to destruction. Accordingly, a paper was drawn up stating the facts, the sum of money needed for the purchase of the place as it was, and the object in view, and also soliciting such aid in the enterprise as any friends in Woburn or elsewhere might be disposed to contribute. The effort met with a degree of success far beyond the expectations of anyone. Contributions from a large number of persons in Woburn were promptly made, and, by means of correspondence, the sum thus secured was soon considerably increased by remittances from various friends elsewhere in Massachusetts, in Maine, New Hampshire, Vermont, New York, Pennsylvania, Illinois, and in London, England. The sums given varied from a single dollar upward to nearly $300. To the gratification of all, the purchase was made.

First officers.—President, Hon. Charles Choate; vice-presidents, Rev. Charles Anderson, of Woburn; Nathan Wyman, of Woburn; Josiah Pierce, of London, England; George Rumford Baldwin, of Woburn; Cyrus Woodman, of Cambridge; Edward Everett Thompson, of Woburn; trustees and directors, Rev. Leander Thompson, Marshall Tidd, Andrew R. Linscott, Hon. John Cummings, Leonard Thompson, E. D. Hayden, George Rumford Baldwin; clerk and treasurer, Andrew R. Linscott; corresponding secretary, Everett A. Thompson; library committee, Nathan Wyman, Charles Nichols, Warren B. Perkins; librarian and custodian, Warren B. Perkins.

Officers, March 26, 1892.—President, Hon. John Cummings; vice-presidents, Rev. Charles Anderson, of Constantinople, Turkey; Abijah Thompson, of Winchester; Hon. Josiah Pierce, of London, England; Hon. Edward Everett Thompson, of Woburn; William R. Cutter, of Woburn; Hon. Edward F. Johnson, of Woburn; corresponding secretary, William R. Cutter; clerk and treasurer, Andrew R. Linscott; librarian and custodian, Warren B. Perkins.

THE UNIVERSALISTS' HISTORICAL SOCIETY.

TUFTS COLLEGE, MASS.

Organized 1834; incorporated 1850.

Object.—The collection of literature pertaining to the subject of endless punishment.

First officers and founders.—Hosea Ballou, D. D., Thomas Whittemore, D. D., and Thomas J. Sawyer, D. D.

Officers, 1894.—President, Richard Eddy, D. D.; treasurer, G. L. Demarest, D. D.; secretary, T. J. Sawyer, D. D.

WEYMOUTH HISTORICAL SOCIETY.

WEYMOUTH, MASS.

Organized April 12, 1879; incorporated July 19, 1886.

Object.—To make antiquarian collections; to collect, preserve, and disseminate the local history of Weymouth and the genealogy of Weymouth families.

Founders.—Gilbert Nash, Frank W. Lewis, Samuel W. Reed, John J. Loud, Anson Titus, jr., Charles G. Easterbrook, Everett C. Bumpus, Elias Richards, Augustus J. Richards, William H. Clapp, Lucien H. Frary, J. W. Armington, and F. P. Chapin.

First officers.—President, Elias Richards; vice-president, John J. Loud; recording secretary, Gilbert Nash; corresponding secretary, Anson Titus, jr.; treasurer, William H. Clapp; librarian, Samuel W. Reed. An executive committee, consisting of the above-named officers and Lucien H. Frary, and a committee on nominations: Charles G. Easterbrook, Everett C. Bumpus, and Augustus J. Richards.

Officers, 1894.—President, John J. Loud; vice-president, Herbert A. Newton; recording and corresponding secretary, Samuel W. Reed; treasurer, Charles T. Crane; librarian, Miss Carrie A. Blanchard; executive committee, the above-named officers and Quincy L. Reed; committee on nominations, John J. Loud, Samuel W. Reed, and Quincy L. Reed; library committee, William H. Clapp, Rev. William Hyde, and Francis H. Cowing.

PUBLICATIONS.

See Report of American Historical Association, 1892.

THE MUSKEGON COUNTY PIONEER AND HISTORICAL SOCIETY OF MICHIGAN.

MUSKEGON, MICH.

Organized September 11, 1886.

Object.—To assist the State Pioneer and Historical Society in the preservation of the early reminiscences and history of Michigan, and particularly of Muskegon County.

First officers.—Henry H. Holt, president; C. L. Whitney, vice-president; Daniel Upton, sr., secretary; Peter Everett, treasurer.

Officers, 1894.—Henry H. Holt, president; C. L. Whitney, secretary; S. H. Stevens, treasurer; Hiram Parker, W. W. Owen, P. J. Connell, A. V. Mann, and Thomas T. Rogers, executive committee.

No publications save in connection with the Michigan Pioneer and Historical Society.

PIONEER AND HISTORICAL SOCIETY.

LANSING, MICH.

Organized April 22, 1874; incorporated September 30, 1874.

Object.—"To collect, procure, and preserve anything and everything relating to the natural, civil, literary, and ecclesiastical history of our State, and it solicits the cordial and active support of every pioneer and of every historical student of Michigan to aid in promoting the objects and interests of the society. It relies wholly upon

voluntary contributions to its collections, and invites everyone to donate any books, pamphlets, or papers pertaining to the history of Michigan; also biographies and incidents of pioneer life, maps, charts, manuscript narratives, diaries, correspondence, paintings, portraits, photographs, statuary, newspaper files, and Indian and other relics and curiosities of any kind." (Manual of the Society.)

Charter members.—Judge Albert Miller, Bay City; Hon. Witter J. Baxter, Jonesville; Dr. Oliver C. Comstock, Marshall; D. Johnson, Jackson; H. H. Bingham, Jackson; Hon. Randolph Strickland, St. Johns; John N. Ingersoll, Corunna; Ephriam Longyear, Lansing; W. W. Mitchell, Ionia; Erastus S. Ingersoll, Delta; Ebenezer Lakin Brown, Schoolcraft; David Scott, Dewitt; Henry P. Cherry, Johnstown; Smith Tooker, Lansing; Levi Bishop, Detroit; Charles Dickey, Marshall; Horace Angell, Lansing; Warren Hopkins, Lansing; Martin B. Wood, Albion; Harriet A. Tenney, Lansing; Prof. John C. Holmes, Detroit; Hon. Alvin N. Hart, Lansing.

First officers.—Judge Albert Miller, president; Mrs. Harriet A Tenney, recording secretary; Ephriam Longyear, corresponding secretary; Hon. Alvin N. Hart, treasurer; Judge Albert Miller (ex officio chairman), Hon. Wetter J. Baxter, Levi Bishop, executive committee.

A committee of historians was provided for at the annual meeting February 2, 1876, consisting of five members. The following were elected: Prof. John C. Holmes, Merchant H. Goodrich, Dr. Oliver C. Comstock, Judge Hezekiah G. Wells, Mrs. Harriet A. Tenney.

Officers, 1894.—Ex-Governor Alpheus Felch, Ann Arbor, president; George H. Greene, Lansing, recording and corresponding secretary; Benjamin F. Davis, treasurer; Hon. Orlando M. Barnes, Lansing, Hon. Daniel Strikes, Hastings, and Theron F. Giddings, Kalamazoo, executive committee; Col. Michael Shoemaker, Jackson, ex-Lieut. Governor Henry H. Holt, Muskegon, L. D. Watkins, Manchester, J. Wilkie Moore, Detroit, Hon. Gerrit J. Diekeme, Holland, committee of historians; Jennie B. Greene, Lansing, clerk of the committee of historians. A vice-president from each county having membership was also elected.

PUBLICATIONS.

Pioneer and Historical Collections, Vol. I–XXIII. For a fuller collation, see Report of American Historical Association, 1892.

WAYNE COUNTY HISTORICAL AND PIONEER SOCIETY.

DETROIT, MICH.

Organized in 1824 as Wayne County Historical Society; name changed in 1871 to its present form.

Object.—The collection and preservation of matter relating to Wayne County and the personal history of its members.

First officers.—Lewis Cass, president; Isaac Rowland, secretary.

Officers, 1894.—J. Wilkie Moore, president; Fred. Carlisle, secretary.

PUBLICATIONS.

Its papers are published in the Michigan Pioneer Collections.

MINNESOTA HISTORICAL SOCIETY.

ST. PAUL, MINN.

Organized 1849; incorporated October 20, 1849, with amendments March 1, 1856, and February 19, 1875.

"Among its objects are the following: To collect, arrange, and preserve a library of books, pamphlets, maps, manuscripts, prints, papers, or paintings; a cabinet of minerals and archæological curiosities, and other materials illustrative of the civil, religious, literary, and natural history of the State; to rescue from oblivion the memory of its early pioneers, and to obtain and preserve narratives of their exploits, perils, and hardy adventures; to exhibit faithfully the antiquities, the past and present condition, and resources of Minnesota, and it may take steps to promote the study of history by lectures and other means, and to publish and diffuse information relative to the description and history of the State." (By-laws.)

Incorporators.—C. K. Smith, David Olmsted, H. H. Sibley, Aaron Goodrich, David Cooper, B. B. Meeker, A. M. Mitchell, T. R. Potts, J. C. Ramsey, H. M. Rice, F. Steele, Charles W. Borup, D. B. Loomis, M. S. Wilkinson, L. A. Babcock, Henry Jackson, W. D. Phillips, William H. Forbes, and Martin McLeod.

Officers, 1894.—President, Hon. Alexander Ramsey; first vice-president, Capt. Russell Blakeley; second vice-president, Charles E. Mayo; secretary, Hon. William R. Marshall; treasurer, Henry P. Upham.

PUBLICATIONS.

See Report of American Historical Association, 1892.

MISSISSIPPI HISTORICAL SOCIETY.

UNIVERSITY, MISS.

Organized and incorporated 1890.

Object.—The study of State and local history.

Officers, 1895.—Robert Lowry, president; R. W. Jones, vice-president; R. B. Fulton, archivist.

MISSOURI HISTORICAL SOCIETY.

ST. LOUIS, MO.

Organized August 11, 1866; incorporated February 7, 1872.

Object.—"The general object of this society shall be to encourage historical research and inquiry, and to disseminate historical information, especially within the State of Missouri, and also within the entire Mississippi Valley. The particular objects of this society shall be: First, the establishment of a library of books and publications appropriate to such an institution, with convenient works of reference, and also a cabinet of antiquities, relics, etc.; second, the collection into a safe and permanent depository of manuscripts, documents, papers, and tracts possessing an historical value and worthy of preservation; third, to encourage investigation of prehistoric remains, and more particularly to provide for the complete and scientific exploration and survey of such prehistoric monuments as exist within the limits of this State and the Mississippi Valley; fourth, to collect and preserve in particular such historical materials as shall serve to illustrate the settlement and growth of the city of St. Louis, State of Missouri, and the Mississippi Valley."

Incorporators.—James H. Lucas, Elihu H. Shepard, William G. Eliot, Silas Bent, Albert Todd, Charles P. Chouteau, Wilson Primm, Henry Shaw, Nathan Ranney, John Knapp, James B. Eads, William A. Lynch, John F. Darby, Isaiah Forbes, Green Erskine, James G. Barry, Joseph M. P. Nolan, William H. H. Russell, George Knapp, Richard Dowling, John B. Johnson, Edward Brooks.

First officers.—President, Hon. James H. Lucas; vice-presidents, Hon. Edward Bates, J. C. Barlow, George H. Kennerly, Dr. Robert Simpson, Hon. John F. Darby, Henry von Phul, Daniel D. Page, Hon. Archibald Gamble, Daniel Hough, James Clemens, jr., Hon. James S. Thomas, Edward Dobyns, Hon. John D. Daggett, John B. Hortiz, David B. Hill, Elkanah English, Fred. L. Billon, Capt. Lewis Bissell, Louis A. Benoist, Hon. James G. Barry, William K. Rule, Gen. Bernard Pratte, Henry Shaw, James G. Soulard, Gen. Nathan Ranney, D. Valle, A. Christy; secretaries, Elihu H. Shepard, George Knapp, William H. Cozzens.

Officers, 1894.—President, Marshall S. Snow; first vice-president, Emil Preetorius; second vice-president, Dr. Charles D. Stevens; secretary, William J. Seever; treasurer, Dr. Charles D. Stevens; advisory committee, George E. Leighton, Henry Hitchcock, John H. Terry, Joseph Boyce, Melvin L. Gray, Marshall S. Snow, ex officio.

PUBLICATIONS.

Wygant, fourth vice-president; Charles Estabrook, recording secretary; William Cook Belknap, corresponding secretary; Jonathan N. Weed, treasurer; Rev. William K. Hall, Thomas B. Brooks, James N. Dickey, Charles E. Williams, Charles F. Allan, George W. Peters, E. K. Shaw, and Russell Headley, trustees.

PUBLICATIONS.

See Report of American Historical Association, 1892.

THE HOLLAND SOCIETY OF NEW YORK.

NEW YORK, N. Y.

Incorporated March 14, 1885.

Objects.—To collect and preserve information respecting the early history and settlement of the city and State of New York by the Dutch, and to discover, collect, and preserve all still existing documents, monuments, etc., relating to their genealogy and history; to perpetuate the memory and foster and promote the principles and virtues of the Dutch ancestors of its members, and to promote social intercourse among the latter; to gather by degrees a library for the use of the society, composed of all obtainable books, monographs, pamphlets, manuscripts, etc., relating to the Dutch in America; to cause statedly to be prepared and read before the society papers, essays, etc., on questions in the history or genealogy of the Dutch in America, and to cause to be prepared and published, when the requisite materials have been discovered and procured, collections for a memorial history of the Dutch in America, wherein shall be particularly set forth the part belonging to that element in the growth and development of American character, institutions, and progress.

Incorporators.—Hooper C. Van Vorst, George M. Van Hoesen, George W. Van Slyck, David Van Nostrand, Edgar B. Van Winkle, Herman W. Vander Poel, William H. Hoes, Aaron J. Vanderpoel, George W. Van Siclen, Lucas L. Van Allen, Abraham Van Santvoord, W. A. Ogden Hegeman, George G. De Witt, jr., Wilhelmus, Mynderse, Jacob Wendell, Benjamin F. Vosburgh, M. D., Robert B. Roosevelt, Philip Van Volkenburgh, jr., Alfred Van Santvoord.

Officers, 1895.—President, Warner Van Norden; vice-presidents, Charles H. Truax, Delavan Bloodgood, Albert Van der Veer, Elijah Du Bois, Edward Elsworth, John N. Jansen, Garret D. Van Reipen, Henry A. Bogert, Harris E. Adriance, William H. Vredenburgh, John Livingston Swits, John Paul Paulison, Seymour De Witt, Abraham V. Schenck, Samuel S. Stryker, John Hopper, Charles K. Van Vleck, Charles R. De Freest, John H. Starin, Stewart Van Vlict, William K. Van Reypen; secretary, Theodore Melvin Banta; treasurer, Eugene Van Schaick.

PUBLICATIONS.

Year Books. These are reports of the transactions of the society.

Collections. Of these 2 volumes of about 400 pages each have been published in 8vo. They contain much valuable historical material not otherwise accessible. The first volume contains the official records of the (collegiate) Dutch reformed churches of Hackensack and Schraalenburg, Bergen County, N. J., from the year 1686 to the beginning of the present century, comprising the minutes of the consistories and lists of members, marriages, and baptisms, together with a brief history of the churches. This work, the first of an intended series of historical publications by the Holland Society, is of great value to all interested in their Dutch ancestry. A large portion of the names represented in the Holland Society appear upon the records of these ancient churches. A few of these names which occur with more or less frequency are: Ackerman, Adrianse, Allen, Alyee, Anderson, Banta, Benson, Berdan, Bertholf, Berry, Blauvelt, Bogert, Bordet, Brevoort, Brinkerhoff, Brower, Bruyn, Cadmus, Christie, Cole, Conklin, Conover, Cooper, Cornell, Cowenhoven, Day, De Baun, De Grauw, De Groot, Delamater, Demarest, Devoe, Dey, Doremus, Dubois, Duryea, Earle, Ecker, Edsall, Ferdon, Goetschins, Hardenburgh, Haring, Helm, Hopper, Hoogland, Housman, Huyler, Huysman, Jeroloman, Kingsland, Kipp. Kuyper, Labaugh, Lawrence, Leydecker, Lozier, Lutkens, Mabie, Mandeville, Meyer, Montanye, Moore, Nagel, Outwater, Paulison, Peek, Persel, Pieterson, Post, Quackenbush, Remsen, Retan, Romer, Romeyn, Ryerson, Schoonmaker, Slote, Smidt, Smith, Spier, Stagg, Stevens, Storm, Ten Eyck, Terhune, Tiebout, Valentine, Van Blercom, Van Buren, Van Buskirk,

Vanderbeck, Vanderhoef, Vanderlinde, Van Dien, Van Giesen, Van Horn, Van Houten, Van Norden, Van Reipen, Van Orden, Van Schaick, Van Sicklen, Van Saun, Van Voorhees, Van Wagener, Van Winkle, Van Zile, Varick, Verveelen, Volk, Vorhis, Vreeland, Waldron, Wannemaker, Westervelt, Wortendyke, Wynkoop, Zabriskie.

THE HUGUENOT SOCIETY OF AMERICA.

New York.

Organized April 12, 1883; incorporated June 12, 1885.

Objects.—"First. To perpetuate the memory and to foster and promote the principles and virtues of the Huguenots. Second. To publicly commemorate at stated times the principal events in the history of the Huguenots. Third. To discover, collect, and preserve all still existing documents, monuments, etc., relating to the genealogy or history of the Huguenots of America. Fourth. To gather by degrees a library, for the use of the society, composed of all obtainable books, monographs, pamphlets, manuscripts, church and other registers, relating to the Huguenots. Fifth. To cause statedly to be prepared and read before the society papers, essays, etc., especially on obscure or disputed questions in Huguenot history or genealogy, their settlements, biographies, public acts, influence on society, arts, commerce, and politics of America especially and of other countries where they settled. Sixth. To cause to be prepared and published, when the requisite materials have been discovered and procured, from time to time, a series of octavo volumes entitled 'Collections of the Huguenot Society of America.' An annual bulletin shall also be published, to correspond in general uniformity with the 'Collections.' It shall contain the proceedings of the society, notices of papers read before the society, or abstracts of them, or the papers in full, at the discretion of the publication committee. It shall also contain the annual financial statement of the treasurer and such a brief review of the doings of other Huguenot societies as the committee may deem it advisable to print. Seventh. To establish branches of this society in other American cities, and to encourage the foundation of similar societies in other countries where Huguenots have taken refuge, in order to arrive, with their aid, at a correct estimate of the combined influence of the Huguenots upon the history of the world at large."

Founders.—John Jay, Edward F. De Lancey, Ashbel G. Vermilye, Louis Mesier, Peter W. Gallaudet, Benjamin F. De Costa, Abram Du Bois, Josiah H. Gautier, Alfred V. Wittmeyer, Morey Hale Bartow, Charles W. Maury, Charles A. Briggs, and Chauncey M. Depew.

Officers, 1894.—President, Henry G. Marquand; vice-president for New York, John K. Rees; secretary, Lea McI. Luquer; treasurer, Henry M. Lester.

PUBLICATIONS.

See Report of American Historical Association, 1892.

THE JEFFERSON COUNTY HISTORICAL ASSOCIATION.

Watertown, N. Y.

Organized April 6, 1886; incorporated June 10, 1886.

Objects.—"The discovery, collection, preservation, and publication of the history, historical records, and data of and pertaining to Jefferson County; the collection and preservation of books, newspapers, pamphlets, maps, genealogies, portraits, paintings, relics, manuscripts, letters, journals, surveys, field books, and any and all other materials which may establish or illustrate such history or the growth and progress of population, wealth, education, agriculture, arts, manufactures, and commerce in Jefferson County, N. Y.. But a principal object of the society is the preservation of records and historical material relative to the war of 1812, of which the battle of Sackets Harbor and the triumphs of the American fleet in its vicinity, are so conspicuous a part."

Founders.—W. B. Camp, of Sackets Harbor; Dr. A. T. Jacobs, of Ellisburg; Justus Eddy, of Adams; Philo M. Brown, of Lorraine; J. A. Parker, of the town of Watertown, and Rev. J. Winslow, R. A. Oakes, Moses Eames, A. D. Shaw, Rev. R. Fisk, Sidney Cooper, E. M. Gates, E. J. Clark, B. Brockway, and F. D. Rogers. Mr. Brockway was made chairman and R. Fisk secretary.

Officers, 1894.—President, Beman Brockway; vice-presidents, Walter B. Camp, Moses Eames, John C. Sterling; recording secretary, Richmond Fisk; corresponding secretary, Lotus Ingalls; librarian and custodian, Daniel S. Marvin; treasurer, N. P. Wardwell; executive committee, Albert D. Shaw, D. A. Dwight, Sidney Cooper, P. M. Brown; counselors, L. J. Dorwin, Rev. J. Winslow, R. A. Oakes, A. D. Rem-

ington, P. M. Brown, D. A. Dwight, Sidney Cooper, A. D. Shaw, George B. Massey, R. Fisk, E. M. Gates, A. H. Sawyer, Lotus Ingalls, C. R. Skinner, Elon R. Brown, John Sheldon, J. C. Knowlton, Joseph Mullin, Frank A. Hinds.

PUBLICATIONS.

Transactions, Vols. I–II, 1886–1891, Watertown, 1887, 1891, 8vo, pp. 183 (1), 61.

THE JOHNSTOWN HISTORICAL SOCIETY.

JOHNSTOWN, N. Y.

Organized May 30, 1892; incorporated May 30, 1892.

Objects.—"The discovery, collection, preservation, and publication of the history, historical records, and data of and relating to the territory or districts of country formerly occupied or claimed by the various Indian tribes or nations which were under the supervision of Sir William Johnson, as representative of the British Government prior to the war of the American Revolution; the collection and preservation of books, newspapers, pamphlets, maps, genealogies, portraits, paintings, relics, manuscripts, letters, journals, surveys, field books, and any and all other articles which may establish or illustrate such history or the growth and progress of population, wealth, education, agriculture, arts, science, manufactures, trade, and commerce in said territory or districts."

Founders and first officers.—Hon. Horace E. Smith, LL. D., Johnstown, N. Y., president; James I. Younglove, first vice-president; Capt. Edgar S. Dudley, U. S. A., second vice-president; S. Elmore Burton, Gloversville, N. Y., third vice-president; Fred. Linus Carroll, A. M., Johnstown, N. Y., corresponding secretary; Hon. Philip Keck, recording secretary; Donald Fraser, treasurer; Rev. John N. Marvin, librarian; trustees, Rev. Peter Felts, D. D., Andrew J. Nellis, John G. Ferres, A. S. Van Voast, John T. Selmser, William A. Livingston, and Fenton I. Gidley, M. D., all of Johnstown, N. Y.

Officers, 1895.—Hon. Horace E. Smith, LL. D., Johnstown, N. Y., president; James I. Younglove, first vice-president; Capt. Edgar S. Dudley, U. S. A., second vice-president; Hon. Philip Keck, third vice-president; Fred. Linus Carroll, A. M., corresponding secretary; M. S. Northrup, recording secretary; C. H. Butler, assistant recording secretary; Donald Fraser, treasurer; Rev. John N. Marvin, librarian; trustees, Rev. Peter Felts, D. D., Andrew J. Nellis, John G. Ferres, A. S. Van Voast, John T. Selmser, William A. Livingston, and Fenton I. Gidley, M. D., all of Johnstown, N. Y.

LIVINGSTON COUNTY HISTORICAL SOCIETY.

GENESEO, N. Y.

Organized 1876; incorporated February 13, 1877.

Object.—"The general object of the society shall be to discover, procure, and preserve whatever may relate to the history of western New York in general and Livingston County and its towns in particular, and to gather such statistics of education and population, growth and prosperity, and business of this region as may seem advisable or of public utility."

Founders.—Norman Seymour, L. B. Proctor, Charles Shepard, D. H. Bissell, D. H. Fitzhugh. First president, D. H. Fitzhugh.

Officers, 1894.—Frank Fielder, president; C. K. Sanders, vice-president; L. R. Doty, secretary and treasurer.

PUBLICATIONS.

See Report of American Historical Association, 1892.

A great many minor publications, consisting of anniversary addresses, papers read before the society, by-laws, lists of members, exhibition catalogues, etc. See also Report of American Historical Association, 1892.

THE ONEIDA HISTORICAL SOCIETY AT UTICA.

UTICA, N. Y.

Organized December 1, 1876; incorporated September 18, 1878.

Objects.—The discovery, collection, and preservation of the history, historical records, and data of and relating to that portion of the State of New York formerly known as Tryon County.

First officers.—Horatio Seymour, president; C. W. Hutchinson, Alexander Seward, Edward Huntington, vice-presidents; S. N. D. North, recording secretary; M. M. Jones, corresponding secretary; R. S. Williams, treasurer.

Officers, 1894.—C. W. Hutchinson, president; William M. White, George D. Dimon, David E. Wager, vice-presidents; W. Pierrepont White, recording secretary; C. W.

Darling, corresponding secretary; M. M. Bagg, librarian; Warren C. Rowley, treasurer.

The ground has been purchased and $50,000 provided toward a new building, which will be a handsome structure occupying a triangular plat of ground and separate from other buildings.

PUBLICATIONS.

See Report of American Historical Association, 1892.

THE ONONDAGA HISTORICAL ASSOCIATION.

SYRACUSE, N. Y.

Organized January 22, 1862; incorporated April 29, 1863.

Its object is to preserve documents or articles relating to the history of Onondaga County, and to undertake such special work in the way of arousing interest in the history of the county as may seem advisable.

Founders.—James Noxon, Lyman W. Conkey, Homer De L. Sweet, William Baumgras, Samuel N. Holmes, and Charles R. Wright.

First officers.—President, Joshua V. H. Clark; vice-president, Nathaniel B. Smith; treasurer, James S. Leach; recording secretary, Charles R. Wright; corresponding secretary, James Noxon.

Officers, 1894.—President, William Kirkpatrick; first vice-president, Dr. Henry D. Didama; second vice-president, Mrs. Mary E. Bagg; treasurer, Edward A. Powell, recording secretary, Louis Dow Scisco; corresponding secretary, Mrs. Frances W. Marlette.

PUBLICATIONS.

Transactions, Vol. I, 1865, 8vo, pp. 24; Vol. II, 1894, 8vo, pp. 24, paper.

THE ROCHESTER HISTORICAL SOCIETY.

ROCHESTER, N. Y.

Organized March 3, 1888; incorporated November, 1888.

Objects.—To discover, procure, and preserve whatever may relate to the history of the city of Rochester and of those adjacent localities which, in their historical growth or commercial relations, are intimately connected with the interests of the city.

The society had its origin in a social gathering at the residence of Mrs. Gilman H. Perkins.

First board of managers.—Henry E. Rochester, M. F. Reynolds, Hiram Sibley, George E. Mumford, James L. Angle, F. A. Whittlesey, W. C. Morey.

First officers.—Dr. E. M. Moore, sr., president; Rev. Dr. A. H. Strong, vice-president; Mrs. Jane Marsh Parker, corresponding secretary; William F. Peck, recording secretary; Gilman H. Perkins, treasurer; Herman K. Phinney, librarian.

Officers, 1894.—John H. Rochester, president; Frank W. Elwood, vice-president; Mrs. Jane Marsh Parker, corresponding secretary; William F. Peck, recording secretary; Charles H. Wilt, treasurer; Jane E. Rochester, librarian.

PUBLICATIONS.

See Report of American Historical Association, 1892.

THE ST. NICHOLAS SOCIETY OF THE CITY OF NEW YORK.

NEW YORK, N. Y.

Organized February 28, 1835; incorporated April 17, 1841.

Objects.—"To afford pecuniary relief to indigent or reduced members and their widows and children; to collect and preserve information respecting the history, settlement, manners, and such other matters as may relate thereto of the city of New York, and to promote social intercourse among its native citizens."

Verplanck; fourth vice-president, Peter Schermerhorn; treasurer, John Oothout; secretary, Hamilton Fish; assistant secretary, William A. Lawrence; chaplains, Rt. Rev. Benjamin T. Onderdonk, Rev. Robert McCartee; physicians, William H. Hobart, Edward G. Ludlow; consulting physicians, Hugh McLean, John W. Francis.

Officers, 1895.—President, Chauncey M. Depew; first vice-president, Edward King; second vice-president, S. Franklin Stanton; third vice-president, Frederic De Peyster Foster; fourth vice-president, Stuyvesant Fish; treasurer, Charles A. Schermerhorn; secretary, George G. De Witt; assistant secretary, E. Benedict Oakley; chaplains,

Rt. Rev. Henry C. Potter, D. D., Rev. Henry Van Dyke, D. D.; physicians, Stuyvesant Fish Morris, M. D., Edward Quintard, M. D.; consulting physicians, Stephen V. R. Bogert, M. D., Gouverneur M. Smith, M. D.

SCHOHARIE COUNTY HISTORICAL SOCIETY.

SCHOHARIE, N. Y.

Organized November 29, 1888; incorporated March 4, 1889.

Objects.—"To create an interest in historical matters; to discover, gather, collect, and disseminate historical information; collect, receive, preserve, and safely keep historical records, documents, books, papers, maps, manuscripts, letters, journals, relics, and other historical data, articles, and things which may establish or illustrate the history, growth, and progress of the county of Schoharie and its surroundings."

First officers.—President, Mark W. Stevens; vice-presidents, George L. Danforth, William E. Roscoe, Hobart Krum; recording secretary, Dr. Henry F. Kingsley; corresponding secretary, Prof. Solomon Sias; treasurer, John B. Grant; librarian, Henry Cady; executive committee, Charles Brewster, Peter C. Vroman, Frank G. Mix, Martin V. B. Hagar, William D. Gebhard.

Officers, 1895.—President, George L. Danforth; vice-president, Charles M. Thorp; treasurer, John B. Grant; secretary, Henry F. Kingsley; curator, Henry Cady.

THE UNITED STATES CATHOLIC HISTORICAL SOCIETY.

BROOKLYN, N. Y.

Organized December, 1884; incorporated, January 1885.

Objects.—"The discovery, collection, and preservation of historical materials relating to the introduction, establishment, and progress of the Catholic Church and faith in the United States, to the progress of Christian art and civilization therein, to Catholic American bibliography, and to the evidences of Catholic Christianity furnished by American ethnology, linguistics, and political development; the discussion of subjects and the publication of essays, documents, and rare books relating to the above, and the maintenance of an historical library and museum of historical relics."

Founders and first officers.—Honorary president, His Eminence Cardinal McCloskey; president, Richard H. Clarke, LL. D.; vice-president for archdiocese of New York, Gen. Charles P. Stone; corresponding secretary, Marc F. Vallette, LL. D.; recording secretary, Cornelius M. O'Leary, M. D.; treasurer, Patrick Farrelly; trustees, John Gilmary Shea, LL. D., Rev. Richard L. Burtsell, D. D., Rev. James H. McGean, Thomas Addis Emmet, M. D., John R. S. Hassard, Charles Carroll Lee, M. D., Franklin H. Churchill.

Officers, 1894.—Most Rev. M. A. Corrigan, D. D., honorary president; Frederick R. Coudert, honorary vice-president; Hon. Morgan J. O'Brien, honorary vice-president; Thomas Addis Emmet, M. D., LL. D., president; Charles W. Sloane, vice-president; Marc F. Vallette, LL. D., corresponding secretary; Joseph T. Keiley, recording secretary; Joseph A. Kernan, treasurer; Rev. James J. Dougherty, librarian; trustees, Rev. James H. McGean, Hon. Morgan J. O'Brien, Charles Carroll Lee, M. D., Patrick Farrelly, Francis D. Hoyt, John D. Keiley; councillors, Rev. P. F. McSweeney, D. D., James S. Coleman, Edward J. McGean, Charles G. Herbermann, LL. D., Joseph H. Mosher, Joseph Thoron.

PUBLICATIONS.

See Report of American Historical Association, 1892, and: Proceedings, 1885, pp. 47.
The United States Catholic Historical Magazine, Vols. I–IV, 1887, quarterly, 412 pp. each.
Voyages of Columbus, 8vo, pp. 290.

THE WATERLOO LIBRARY AND HISTORICAL SOCIETY.

WATERLOO, N. Y.

Organized April 17, 1875; incorporated March 22, 1876.

Object.—"The establishing, creating, and maintaining a library, and for purchasing literary, historical, geological, and other papers, books, and mementos."

Incorporators and first officers.—Daniel S. Kendig, president; Horace F. Gustin, vice-president; Samuel R. Welles, secretary; Charles I. Morgan, treasurer; Samuel H. Gridley, historian; James McLean, Thomas A. McIntyre, George Haigh, Frederick Furniss, Walter Quinby, James C. Halstead, Thomas Fatzinger.

Present trustees and officers, 1894.—Samuel R. Welles, president; Frederick L. Manning, vice-president; Andrew G. Mercer, treasurer; William S. Carter, secretary; Edward Fatzinger, jr., historian; Albert M. Patterson, William O. Clark, Leonard Story, Edwin C. Peirson, Francis Bacon, Alonzo Terwilliger, Paul G. Walsh.

PUBLICATIONS.

See report of American Historical Association, 1892, and add: Unveiling the monument to Red Jacket at Canoga, N. Y., October 14, 1891, 8vo., 60 pp.

WESTCHESTER COUNTY HISTORICAL SOCIETY.

WHITE PLAINS, N. Y.

Organized September 16, 1874; incorporated October 10, 1874.

Object.—To obtain and preserve information pertaining to the history of the United States, the State of New York, and especially of the county of Westchester, N. Y.

First officers.—President, James Wood; vice-presidents, Edward F. Delancey, Rev. Charles W. Baird, Josiah S. Mitchell, John Jay, David Hawley; recording secretary, Monmouth G. Hart; corresponding secretary, Rev. C. Winter Bolton; treasurer and librarian, Oliver R. Willis.

Officers, 1894.—President, James Wood; recording secretary, James B. Lockwood; corresponding secretary, S. L. H. Ward; treasurer, M. G. Hart; librarian and curator, W. A. Woodworth.

PUBLICATIONS.

See report of American Historical Association, 1892; constitution and by-laws.

THE GUILFORD BATTLE GROUND COMPANY.

GREENSBORO, N. C.

Organized May 6, 1887; incorporated March 7, 1887.

Objects.—"For the benevolent purpose of preserving and adorning the grounds on and over which the battle of Guilford Court House was fought on the 15th day of March, 1781, and the erection thereon of monuments, tombstones, and other memorials to commemorate the heroic deeds of the American patriots who participated in this battle for liberty and independence."

First officers and founders.—Hon. David Schenck, Col. Thomas B. Keogh, Col. Julius A. Gray, Dr. D. W. C. Benbow, and J. W. Scott. These were elected as a board of directors, and from these directors the following officers were chosen: Hon. David Schenck, president; Col. Thomas B. Keogh, secretary; J. W. Scott, treasurer.

Officers, 1895.—Hon. David Schenck, president; J. W. Fry, vice-president; D. Schenck, jr., secretary; J. W. Scott, treasurer. Directors, Hon. D. Schenck, J. W. Fry, J. W. Scott, W. E. Bevill, Dr. D. R. Schenck, Neil Ellington, Joseph M. Morehead, Thomas Woodroffe, Samuel Wittkowsky, E. P. Wharton, Col. R. M. Douglas, Col. L. M. Scott, R. M. Sloan, D. W. C. Benbow, Hon. Thomas M. Holt.

The Guilford Battle Ground Company owns 75 acres of land, which lies 5 miles northwest of Greensboro, N. C. This tract is intersected by the Cape Fear and Yadkin Valley Railroad. It is now a beautiful park. This is the only Revolutionary battlefield purchased, owned, controlled, and embellished by a private corporation. It has 8 monuments, 5 beautifully adorned springs, a lovely lake covering 2 or 3 acres, a pavilion with a seating capacity of 2,000, and a handsome bronze statue of Maj Joseph Winston. It has also a museum, which contains a collection of Revolutionary relics and autographs and a number of fine oil paintings and portraits. The lines of battle are all marked by granite posts. The company has an annual celebration on the 4th of July, which is largely attended. An historical address is delivered each year by some distinguished guest of the company.

PUBLICATIONS.

Historical address on the battle of Guilford Court House, by Hon. D. Schenck, delivered May 5, 1888. 8vo.

Address by Hon. Z. B. Vance, May 4, 1889. 8vo.

Address on the life and services of Brig. Gen. Jethro Sumner, by Kemp P. Battle, LL. D., July 4, 1891, 8vo.

Address on the life and services of Gen. William R. Davie, by Hon. Walter Clark, July 4, 1892, 8vo.

Maryland and North Carolina in the Campaign of 1780–81, by Prof. Ed. Graham Daves, October 15, 1892, 8vo.

Address on the occasion of the dedication of the monument to the memory of the Maryland soldiers who fell in the battle of Guilford Court-House, by Prof. E. A. Alderman, October 15, 1892, 8vo.

Address on the occasion of the dedication of the Holt monument, by Hon. D. Schenck, July 4, 1893.

The design of this address was to show that while the North Carolina militia received the first fire in this battle, the North Carolina riflemen under Maj. Joseph Winston and Martin Armstrong were the last to leave the battlefield.

Address upon the life and services of William Hooper, by Prof. E. A. Alderman, July 4, 1894.

Memorial volume of the Guilford Battle Ground Company, 8vo, 1894.

This volume has 40 illustrations of the monuments and scenes on the battle-field and of distinguished men connected with the battle ground company. It contains a complete history of the company.

North Carolina, 1780–81, by Hon. D. Schenck, 8vo., pp. 499, 1889.

This volume is an outgrowth of the company, and is a vindication of the North Carolina troops who fought in the campaign of 1780 and 1781, against the aspersions of Col Harry Lee. It also sets forth the patriotic and important services rendered by the State of North Carolina in repelling the invasion of Cornwallis.

THE HISTORICAL SOCIETY OF THE NORTH CAROLINA CONFERENCE.

DURHAM, N. C.

Organized December, 1893, at Wilmington, N. C.

Object.—To preserve the history of North Carolina Methodism.

First officers.—President, Rev. W. S. Rone; secretary, Rev. T. N. Ivey.

Officers, 1895.—President, Rev. W. S. Rone; secretary, Rev. T. N. Ivey. Prof. J. S. Bassett, Durham, N. C., is chairman of its board of curators, and preserves its collections, which are deposited at Trinity College.

HISTORICAL SOCIETY OF THE UNIVERSITY OF NORTH CAROLINA.

CHAPEL HILL, N. C.

Organized January, 1844.

Object.—"This society has been established, first, for the purpose of endeavoring to excite such interest in the public mind in regard to the history of the State as may induce the legislature to adopt early and efficient measures to obtain from England the most interesting documents in relation to the regal government, together with such papers as may be found to reflect light upon the obscure history of the proprietary government of Carolina; and, secondly, to collect, arrange, and preserve at the university, as nearly as may be possible, one or more copies of every book, pamphlet, and newspaper published in this State since the introduction of the press among us in 1749; all books published without the State, in our own or foreign countries, on the history of Carolina, and especially all the records, documents, and papers to be found within the State that may tend to elucidate the history of the American Revolution." (Quoted from the first publication of the society.)

The founder was David L. Swain, ex-governor and then president of the university. He was its president, chief promoter, and personal embodiment until his death, in August, 1868, when the society ceased to exist for the time being.

It was again reorganized on October 26, 1887, with the following officers: President, Kemp P. Battle, LL. D.; vice-president, A. W. Mangum, D. D.; honorary secretary, Prof. John F. Heitman; secretary and treasurer, Stephen B. Weeks; executive committee, Kemp P. Battle, A. W. Mangum, G. T. Winston, Stephen B. Weeks, Claudius Dockery. It has since continued active.

TRINITY COLLEGE HISTORICAL SOCIETY.

DURHAM, N. C.

Organized April 4, 1892.

Object.—To awaken interest in historical work at Trinity College; to investigate the history of North Carolina and of the South, and to collect documents and relics relating to the history of North Carolina.

Founder.—Dr. Stephen B. Weeks.

First officers.—President, S. J. Durham; vice-president, E. T. Bynum; corresponding secretary, Dr. Stephen B. Weeks; recording secretary and treasurer, I. E. Avery; librarian, F. C. McDowell.

Present officers.—President, Dr. John S. Bassett; secretary, S. S. Dent.

ASHTABULA COUNTY PIONEER ASSOCIATION.

JEFFERSON, OHIO.

Organized September 8, 1880.

Objects.—To keep up old associations, collect history, and perpetuate the memory of the pioneers.

First officers.—L. H. Jones, of Wayne Township, president; Abel Krum, Ashtabula Township, treasurer: J. A. Howells, Jefferson Township, secretary.

Officers, 1894-95.—H. L. Morrison, president, Ashtabula; N. E. French, treasurer, Jefferson; J. A. Howells, secretary, Jefferson.

DEUTSCHER PIONEER-VEREIN.

CINCINNATI, OHIO.

Organized June 2, 1868.

The aim and object of the association is to renew and fortify the ties of old friendship, and also to preserve the history and deeds of the German pioneers of North America for coming generations by collecting documents, notes, etc., pertaining to same.

Founders and first officers.—Dr. Joseph H. Pulte, president; Joseph Siefert, vice-president; Christ. von Seggern, secretary; Nic. Hoeffer, treasurer.

Officers, 1894.—Julius Hoffmann, president; Ed. Gruber, vice-president; J. C. Krieger, secretary; J. C. Wiechelmann, treasurer.

PUBLICATION.

A quarterly.

THE FIRELANDS HISTORICAL SOCIETY.

NORWALK, OHIO.

Organized June 17, 1857; incorporated June 9, 1880.

Objects.—"To collect, preserve, and publish in proper forms historical information, and especially the facts constituting the full history of the Firelands and adjacent parts of Ohio; to obtain and preserve an authentic account of their resources and productions, of their natural and archæological relics, curiosities, and antiquities; and other scientific and historical collections." (Charter.)

Founders and first officers.—President, Platt Benedict; vice-presidents, William Parish, Elutheros Cooke, Zalmuna Phillips, Seth C. Parker, and John H. Niles; treasurer, Charles A. Preston; recording secretary, Philip N. Schuyler; corresponding secretaries, Frank D. Parish and Gideon T. Stewart.

Officers, 1895.—President, Gideon T. Stewart; vice-presidents, James D. Easton and Hiram P. Starr; recording secretary, Frank H. Jones; corresponding secretary, James G. Gibbs; treasurer, Charles W. Manahan; librarian and custodian of relics, Caleb H. Gallup; biographer, Frederick R. Loomis; directors and trustees, Gideon T. Stewart, J. M. Whiton, J. L. Brooks, Frank H. Jones, I. M. Gillett, Caleb H. Gallup, and Frederick R. Loomis.

PUBLICATIONS.

The Firelands Pioneer, Vols. I–XIII, 1858–1878; new series, Vol. I, 1882–1884. See also Report of American Historical Association, 1892.

HISTORICAL AND PHILOSOPHICAL SOCIETY OF OHIO.

CINCINNATI, OHIO.

Organized December 31, 1831; incorporated February 11, 1831.

Objects.—The collection and preservation of everything relating to the history and antiquities of America, more especially of the State of Ohio, and the diffusion of knowledge concerning them.

First officers.—Benjamin Tappan, president; Ebenezer Lane and Rev. William Preston, vice-presidents; Alfred Kelly, corresponding secretary; P. B. Wilcox, recording secretary; John W. Campbell, treasurer; G. Swan, B. G. Leonard, Edward King, J. P. Kirtland, and S. P. Hildreth, curators.

Officers, 1895.—Eugene F. Bliss, president; Frank J. Jones and Nathaniel Henchman Davis, vice-presidents; Robert Clarke, corresponding secretary; Reuben H. Warder, recording secretary; Julius Dexter, treasurer; Mrs. Catharine W. Lord, librarian; Mrs. Louise N. Anderson, Albert H. Chatfield, Mrs. T. L. A. Greve, John M. Newton, and John A. Gano, curators.

PUBLICATIONS.

See Report of American Historical Association, 1892.

THE LICKING COUNTY PIONEER, HISTORICAL, AND ANTIQUARIAN SOCIETY.

NEWARK, OHIO.

Organized May 1, 1867.

Objects.—To collect a reference library, to gather the records of old settlers, and to serve as a repository for relics.

First officers.—President, Hon. William Stanbery; vice-presidents, John N. Wilson, Thomas J. Anderson, and Daniel Forry; treasurer, Enoch Wilson; corresponding secretary, William Spencer; recording secretary, Isaac Smucker.

Officers, 1894.—President, Hon. M. M. Munson; vice-presidents, Prof. E. F. Appy, Jacob V. Burner, and S. Stacker Williams; chaplain, Rev. Henry C. Johnson; recording secretary, Hon. Charles B. Giffin; corresponding secretary, Judge E. M. P. Brister; historian, Samuel J. Ewing; treasurer and librarian, Capt. James H. Smith; executive committee, A. B. Clark, William L. Evans, Lucius B. Wing, J. C. Hartzler, Samuel J. Davis, Griff Rosebrough.

PUBLICATIONS.

See Report of American Historical Association, 1892.

THE LORAIN COUNTY HISTORICAL SOCIETY.

ELYRIA, OHIO.

Organized 1889.

Object.—The collection and safe-keeping of papers, documents, and biographical sketches pertaining to the county history and the several townships therein, together with articles of an archæological character and such aboriginal and other relics as are worthy of preservation.

Founders.—The founders were the ladies of that county who worked for the Ohio Centennial. A small amount of money left from a loan held in the city was used as a basis, and the society is now self-supporting, and has a creditable archæological and historical collection.

Officers, 1895.—President, Mrs. Edwin Hall; first vice-president, Mrs. G. A. Budd; second vice-president, Mrs. S. A. Cary; recording secretary, Mrs. P. H. Boynton; corresponding secretary, Mrs. George G. Washburn; treasurer, Mrs. W. E. Cahoon.

NEW CENTURY HISTORICAL SOCIETY.

MARIETTA, OHIO.

Organized December 31, 1888.

Objects.—To collect and preserve historical matter relating to the Northwest Territory and its growth and development during the past century, to promote patriotism, and to engage in any memorial or other work which may from time to time be deemed desirable.

Founders.—George M. Woodbridge, A. Tupper Nye, W. B. Loomis, J. B. West, M. M. Rose, Dr. J. D. Cotton, William H. Buell, T. F. Davis, S. J. Hathaway, James W. Nye.

Officers, 1895.—M. M. Rose, president; C. S. Dana, vice-president; Mrs. S. J. Hathaway, secretary; Joseph Brennan, treasurer.

SANDUSKY COUNTY PIONEER AND HISTORICAL SOCIETY.

FREMONT, OHIO.

Organized June 6, 1874.

Objects.—To promote mutual acquaintance and social intercourse among the early settlers of the county, and to gather and put on record the reminiscences, historical events, and names of pioneers.

First officers.—Homer Everett, president; L. Q. Rawson, vice-president; R. B. Hayes, secretary; James W. Wilson, treasurer; H. Everett, R. B. Hayes, H. Lang, Platt Brush, R. P. Buckland, and J. L. Green, executive committee.

Officers, 1895.—Dr. James W. Wilson, president; Maj. I. H. Burgoon, vice-president and secretary; A. J. Wolf, treasurer; Jacob Burgner, stenographer and assistant secretary.

PUBLICATIONS.

A verbatim report of the proceedings at the annual reunions and picnics is printed each year in the county papers, but the society has not yet published its "annals."

WESTERN RESERVE HISTORICAL SOCIETY.

CLEVELAND, OHIO.

Organized May, 1867, as a branch of the Cleveland Library Association (now the Case Library); chartered and reorganized March 8, 1892.

Objects.—"To discover, collect, and preserve whatever relates to the history, biography, genealogy, and antiquities of Ohio and the West, and of the people dwelling therein, including the physical history and condition of that State; to maintain a museum and library, and to extend knowledge upon the subjects mentioned by literary meetings, by publication, and by other proper means." (Charter.)

Founders.—M. B. Scott, A. T. Goodman, Peter Thatcher, W. N. Hudson, J. D. Cleveland, George Willey, E. R. Perkins, John H. Sargeant, W. P. Fogg, George R. Tuttle, Samuel Starkweather, J. C. Buell, Henry A. Smith, C. W. Sackrider, J. H. A. Bone, Joseph Perkins, A. K. Spencer, H. B. Tuttle, C. C. Baldwin, T. R. Case, and Charles Whittlesey.

First officers.—President, Charles Whittlesey; vice-president, M. B. Scott; secretary, J. C. Buell; treasurer, A. K. Spencer.

Reincorporators, 1892.—Henry C. Ranney, D. W. Manchester, Amos Townsend, William Bingham, Charles C. Baldwin, David C. Baldwin, Percy W. Rice, Jas. D. Cleveland, and A. T. Brewer.

Officers, 1894–95.—President, Charles C. Baldwin; vice-presidents, William Bingham, William Perry Fogg, and John D. Rockefeller; corresponding secretary, Albert L. Withington; treasurer, Moses G. Watterson; recording secretary, Wallace H. Catchcart; librarian, Peter Neff; executive committee, Charles C. Baldwin, Charles W. Bingham, A. T. Brewer, Stiles H. Curtiss, and Henry C. Ranney.

PUBLICATIONS.

Tracts, of which 85 have been issued to date. For full list see Report of American Historical Association, 1892.

OREGON PIONEER ASSOCIATION.

PORTLAND, OREG.

Organized about 1872.

Object.—To collect and place on record materials relating to the history of Oregon and the Northwest.

Officers, 1893.—Secretary, George H. Hines.

PUBLICATION.

Transactions, 8vo.

THE AMERICAN BAPTIST HISTORICAL SOCIETY.

PHILADELPHIA, PA.

Organized May, 1853, as the "Historical Department of the American Baptist Publication Society;" incorporated October, 1863, under present name.

Object.—For the sole purpose of founding and maintaining a library of books, manuscripts, etc., relating to the history of the Christian Church and the Baptist denomination in particular, and, in special cases, to cause to be written or published works on these subjects.

First officers under organization of 1853.—President, Rev. William R. Williams, D. D.; vice-presidents, John M. Peck, D. D., William Hoyne, D. D., Baron Stow, D. D., R. B. C. Howell, D. D.; secretary, Horatio Gates Jones; treasurer, Rev. Benjamin R. Loxley; curators, Rev. Joseph Belcher, John Dowling, D. D., J. C. Burrows, D. D., Rev. Heman Lincoln, William Terrell, D. D., and John Hanna.

Founders of present society.—Howard Malcom, D. D., J. Newton Brown, D. D., David Jayne, LL. D., Rev. S. J. Cresswell, Rev. B. R. Loxley, Rev. Joseph A. Warne, Levi Knowles, J. Lewis Croser, George Nugent, and William Mann.

First officers under incorporation.—Howard Malcom, D. D., president; vice-presidents, Revs. David Benedict, William H. Shirler, Baron Stone, Robert Turnbull, William R. Williams, Samuel Baker, Franklin Wilson, Silas Bailey, W. W. Evarts, Lyman Draper, W. Q. Force, A. H. Dunlevy; corresponding secretary, J. Newton Brown, D. D.; recording secretary, Levi Knowles; treasurer, Benjamin R. Loxley; curators, David Jayne, J. Lewis Croser, George Nugent, S. J. Cresswell, William Mann, Horatio Gates Jones, E. D. Fendall, Henry E. Lincoln, Benjamin B. Willis, Jacob G. Neaffie, Thomas A. Taylor, and Samuel C. Ford.

Officers, 1894.—Hon. James Buchanan, president; Richard B. Cook, D. D., vice-president; Rev. B. MacMackin, secretary; Henry E. Lincoln, treasurer and librarian; managers, William Cathcart, D. D.; Lemuel Moss, D. D.; Rev. John Love, jr.; Samuel Colgate; J. C. Long, D. D.; W. T. Chase, D. D.; Rev. John Brooks; Charles H. Harrison; C. C. Bitting, D. D.; H. S. Burrage, D. D.; Rev. George H. Charles, jr.; Arthur Malcom.

The library contains 7,500 volumes, bound; also many pamphlets, embracing minutes and reports of denominational societies, associations, and State conventions, sermons, addresses, newspapers, periodicals, not sufficiently complete for binding; also many photographs and prints of ministers, missionaries, and prominent persons, churches, and literary institutions connected with the Baptist denomination. It also has historical and biographical manuscripts.

BUCKS COUNTY HISTORICAL SOCIETY.

DOYLESTOWN, PA.

Organized January 20, 1880; incorporated February 23, 1885.

Object.—The preservation of local history.

First officers.—President, W. W. H. Davis; secretary, Richard M. Lyman; treasurer, Alfred Paschall.

Officers, 1894.—President, W. W. H. Davis; secretary and treasurer, Alfred Paschall.

PUBLICATIONS.

The papers read at the meetings are published in the county papers and then preserved by the society in large scrap books prepared for the purpose.

FRIENDS' HISTORICAL ASSOCIATION IN THE COUNTY OF PHILADELPHIA, PA.

PHILADELPHIA, PA.

Organized December 4, 1873, and January 8, 1874; incorporated October, 1875.

Objects.—To create a repository for such books, manuscripts, or other material as may be secured wherewith to elucidate the history of Friends and to encourage social intercourse, to enlarge our sympathies, and create an incentive to activity in kindred pursuits.

Founders.—Samuel Parrish, Joseph M. Truman, jr., S. Mason McCollin, John Comly, Josiah W. Leeds, Samuel Worthington, Lewis Woolman, Samuel L. Smedley, Nathaniel E. Janney, Howard B. French, James E. Kaighn, Samuel Baker, Franklin M. Potts, Dr. Edward Livezey, Samuel W. Moore, Edward C. Jones, William J. Jenks, Samuel Biddle, B. Hallowell Farquhar, James Gaskill, James H. Atkinson.

First officers.—William J. Jenks, president; Samuel Parrish, vice-president; Nathaniel E. Janney, secretary and treasurer; James E. Kaighn, Samuel L. Smedley, Josiah W. Leeds, S. Mason McCollin, Edward C. Jones, committee on property; Samuel Baker, Howard B. French, Lewis Woolman, Dr. Edward Livezey, John Comly, Samuel Worthington, committee on election.

Officers, 1895.—William J. Jenks, president; Nathaniel E. Janney, treasurer; Joseph M. Truman, jr., clerk, 1500 Race street.; other directors, Charles Caleb Cresson, Edmund Webster, Charles Roberts, Henry M. Laing, Howard M. Cooper, Lewis Woolman, James H. Atkinson, Samuel Worthington, T. Morris Perot.

PUBLICATIONS.

History of Fenwick Colony, by Judge John Clement, 1875.

History of Friendly Association for regaining and preserving peace with the Indians by pacific measures, 1876.

THE GENEALOGICAL SOCIETY OF PENNSYLVANIA.

1300 LOCUST STREET, PHILADELPHIA.

Organized March 14, 1892.

Objects.—"The promotion of genealogical research, the procuring of transcripts of all official records affording genealogical information, the collection and preservation of registers of births, marriages, and deaths kept by religious societies or individuals, and everything pertaining to the history of persons connected with America. Rex; trustees, Hon. Jones Detwiler, Prof. Joseph K. Gotwals, William McDermott, Ellwood Roberts, and Henry W. Kratz.

PUBLICATIONS.

Papers read before the society, now in press.

THE HISTORICAL SOCIETY OF PENNSYLVANIA.

1300 LOCUST STREET, PHILADELPHIA, PA.

Organized December 2, 1824; incorporated June 2, 1826.

Object.—The elucidation of history, with special reference to that of Pennsylvania.

First officers.—President, William Rawle; vice-presidents, Roberts Vaux, Thomas Duncan; corresponding secretary, Daniel B. Smith; recording secretary, George Washington Smith.

Officers, 1895.—President, Charles J. Stillé; vice-presidents, Samuel W. Pennypacker, Isaac Craig, Henry C. Lea, William S. Baker, Charlemagne Tower, jr., James T. Mitchell; corresponding secretary, Gregory B. Keen; recording secretary, Hampton L. Carson; treasurer, J. Edward Carpenter; auditor, Francis H. Williams; librarian, Frederick D. Stone; assistant librarian, John W. Jordan.

PUBLICATIONS.

The society has published 13 volumes of memoirs; the first in 1826, the last in 1891; 18 volumes of the Pennsylvania Magazine of History and Biography, 1877 to date. In 1845–1847 it published a volume entitled "Bulletin of the Historical Society of Pennsylvania," which contained the proceedings of the society and other papers. In 1852–53 it published a single volume entitled "Collections." In 1888 a subscription volume, illustrated with portraits, was issued under the title of "Pennsylvania and the Federal Constitution," 1787–88. It has also published a number of addresses delivered from time to time before the society. In 1875 the society published a historical map of Pennsylvania, showing the Indian names of streams and villages, and paths of travel, sites of old forts and battlefields, and successive purchases from the Indians. For detailed list see Report of American Historical Association for 1892.

MORAVIAN HISTORICAL SOCIETY.

NAZARETH, PA.

Organized early in 1857; incorporated January 16, 1860.

Objects.—To gather and preserve relics of the past in the shape of visible emblems of Moravianism, but more particularly to collect all that is valuable, curious, and edifying in its past history in this country.

First officers.—President, James Henry; secretary, Herman A. Brickenstein; treasurer, William Beitel; librarian, Owen Rice.

Officers, 1894.—President, James Henry; secretary and treasurer, Frank Kunkel; librarian, C. E. Michael.

PUBLICATIONS.

See Report of American Historical Association, 1892.

THE PRESBYTERIAN HISTORICAL SOCIETY.

PHILADELPHIA, PA.

"The objects of the society shall be the collection, preservation, and dissemination of everything relating to the history, antiquities, and literature of the State of Virginia particularly and the United States in general." (Constitution.)

Officers, 1894.—President, Joseph Bryan, Richmond, Va.; vice-presidents, J. L. M. Curry, Washington, D. C.; Archer Anderson, Richmond, Va.; William P. Palmer, M. D., Richmond, Va.; corresponding secretary and librarian, Philip A. Bruce, Richmond, Va.; recording secretary, D. C. Richardson, Richmond, Va.; treasurer, Robert T. Brooke, Richmond, Va.; executive committee, Lyon G. Tyler, Williamsburg, Va.; E. V. Valentine, C. V. Meredith, Barton H. Wise, Col. W. H. Palmer, B. B. Munford, R. H. Gaines, W. B. Stanard, Virginius Newton, and Robert Lee Traylor, Richmond, Va.; E. C. Venable and Prof. Charles W. Kent, University of Virginia; and, ex officio, the president, vice-presidents, secretaries, and treasurer.

PUBLICATIONS.

See Report of the American Historical Association, 1892.

THE VIRGINIA BAPTIST HISTORICAL SOCIETY.

RICHMOND, VA.

Organized June 3, 1876; incorporated March 29, 1876.

Objects.—"For the purpose of discovering, procuring, and preserving whatever may relate to the history of Christianity, and of the Baptist denomination in Virginia in particular."

Founder.—Charles H. Ryland, D. D., Richmond, Va.

First officers.—J. B. Jeter, D. D., president; Charles H. Ryland, D. D., secretary; H. H. Harris, D. D., treasurer.

Officers, 1895.—James B. Taylor, D. D., president; Charles H. Ryland, D. D., secretary; H. H. Harris, D. D., treasurer.

PUBLICATIONS.

The reports and annual addresses are preserved in manuscripts.

WASHINGTON STATE HISTORICAL SOCIETY.

TACOMA, WASH.

Organized October 8, 1891, at Tacoma.

Object.—"To gather, formulate, and preserve in substantial form the traditional, record, and object history of Washington, including accounts of early explorers and explorations; of Indian tribes, their ancestry, locations, habits, customs, traditions, means of subsistence, the wars they have been engaged in, their methods of warfare, their reservations and progress toward civilization; of the military occupation, its forts, forces, and operations; of the early missionaries among the Indians, and the privations, hardships, and dangers they encountered; of hunters, trappers, and fur traders, their locations and operations; of the pioneers, their hardships, privations, hardy adventures, perils, and the work they did in opening the way for the settlement, development, and civilization that followed; together with material objects, relics, curios, pictures, views, and paintings illustrative of history, places, and persons; the topography, geology, minerals, flora, and fauna of the State; also the history of the organization of the Territory, its executives, legislative assemblies, courts, and the noted criminal and other records thereof; of the heroism and perils of those who served in any of the Indian conflicts or other wars of the country; of the constitutional conventions, admission, and organization of the State; its executives, legislatures, and courts, including biographies of pioneers, famous persons, distinguished citizens, and memorials of members who pass away; history of the organization, location, resources, and development of the counties of the State, together with the location, character, and growth of the towns therein; of noted events; everything attainable illustrative of the resources, development, and progress of the State of Washington in every direction, from its discovery down to future ages; to the end that all these things may be accomplished, as far as possible, during the lives of those who know the traditions of their time, have historic material, and the gathered results preserved in the archives of the Historical Society, in illustration of the grandeur of the State, information for the people and the student, material for future historians, and the satisfaction and glory of future generations." (Constitution.)

Founders.—Hon. Elwood Evans, Hon. Edward Eldridge, Hon. Henry Roeder, S. Caldwell, Hon. C. B. Bagley, J. S. Houghton, Gen. T. I. McKenny, Maj. C. M. Barton, Hon. Allen Weir, R. H. Lansdale, Capt. W. P. Gray, Hon. Thomas J. Smith, Hon. Edward Huggins, Hon. James Wickersham, Gen. L. P. Bradley, Hon. Henry Bucey, John Hett, Hon. J. B. Houghton, Edward N. Fuller, Miss Nannie Wickersham, Philo G. Hubbell, and Charles W. Hobart.

First officers.—Hon. Elwood Evans, Pierce County, president; Hon. Edward Eldridge, Whatcom County, vice-president; Charles W. Hobart, Pierce County, secretary and librarian; Gen. T. I. McKenny, Thurston County, treasurer.

Officers, 1895.—President, Hon. Elwood Evans, of Tacoma; vice-president, Hon. Henry Roeder, Whatcom; secretary, Charles W. Hobart, Tacoma; treasurer, Hon. Edward Huggins, Tacoma; board of curators, Gen. L. P. Bradley, Tacoma; Hon. B. F. Barge, Ellensburg; Hon. A. A. Denny, Seattle; Hon. F. G. Deckebach, Ocasta; Hon. J. H. Long, Chehalis; Hon. Miles C. Moore, Walla Walla; Hon. W. F. Prosser, Yakima; Hon. Ezra Meeker, Puyallup; Hon. Allen Weir, Olympia; Charles W. Hobart, ex officio.

PUBLICATIONS.

Washington Historical Magazine, beginning with October, 1893, monthly, 8vo.
Washington State Historical Collections. The first volume of this series will soon be issued, 8vo, about 600 pages.

WHITMAN HISTORICAL SOCIETY.

WALLA WALLA, WASH.

Organized June 6, 1889.

Objects.—The general investigation of all matters pertaining to the early history of the Pacific Northwest, and, in a more specific way, the search for and gathering of matter relating to the work and place in history of Dr. Marcus Whitman, the martyr missionary, who, in November, 1836, established a mission some 6 miles from the site of Walla Walla City, and who by his famous horseback ride across the continent in 1842-43 saved the Pacific Northwest States to the American Union, and who, November 29, 1847, with his associates at the mission, was cruelly murdered by the Cayuse Indians.

Founders.—A. J. Anderson, A. M., Ph. D., president; Rev. Myron Eells, first vice-president; Ed. C. Ross, second vice-president; Henry Kelling, secretary; Louis F. Anderson, librarian; A. Jay Anderson, jr., treasurer; Prof. W. D. Lyman.

Officers, 1895.—President, Rev. S. B. L. Penrose, Walla Walla; first vice-president, Rev. Myron Eells, Union City; second vice-president, Ed. C. Ross, Walla Walla; secretary, Henry Kelling, Walla Walla; treasurer, Prof. W. D. Lyman, Walla Walla; librarian, Louis F. Anderson, Walla Walla.

WEST VIRGINIA HISTORICAL AND ANTIQUARIAN SOCIETY.

MORGANTOWN, W. VA.

Organized January, 1891; incorporated February 1, 1890.

Objects.—To encourage historical research and inquiry, spread historical information, particularly in West Virginia, and to embrace alike aboriginal, and civil, military, and ecclesiastical history and biographical literature; the establishment of a library for books, and all publications appropriate to such an institution, with convenient works of reference, and also a cabinet of antiquities, relics, etc.; the collection into safe and permanent depository of manuscripts, documents, papers, tracts, and pamphlets possessing historical and scientific value worthy of preservation; to encourage investigation of aboriginal remains, and more particularly to provide for the complete and scientific exploration, survey, and preservation of such aboriginal movements as exist within the limits of this State.

First officers.—President, Dr. John P. Hale; secretary, Hon. Virgil A. Lewis, treasurer, Maj. Thomas L. Brown.

Officers, 1894.—Same.

PUBLICATIONS.

The West Virginia Historical and Antiquarian Society, 1891, 8vo, pp. 20.
An appeal to the legislature of West Virginia, 1871, 8vo, pp. 9.
The annual report of the secretary, 1892, 8vo, pp. 15.

OLD SETTLERS' CLUB OF MILWAUKEE COUNTY.

MILWAUKEE, WIS.

Organized July 5, 1869. There had been meetings of old settlers prior to this date, but no organization. Incorporated September 19, 1887.

Object.—"Reviving old associations and renewing the ties of former years," and noting the gradual improvement of the city.

First officers.—Hon. Andrew G. Miller, judge United States court, was the chairman, and Fenimore Cooper Pomeroy was secretary of the first meeting. The first officers were: President, Horace Chase; vice-presidents, Samuel Brown, George Bowman, and Enoch Chase; secretary, Fenimore C. Pomeroy; treasurer, Clark Shepardson; executive committee, Increase A. Lapham, Levi Blossom, William P. Merrill, Andrew Douglas, and Charles James.

Officers, 1894.—President, Ninian Masson; first vice-president, David Adler; second vice-president, Frederick Y. Horning; secretary and treasurer, Frederick W. Sivyer; marshal, Morillo A. Boardman; executive committee, James Bonnell, James Leedom, and John A. Dadd.

This society has an offshoot in The Pioneer Club, which consists of some of the older members of the Old Settlers' Club of Milwaukee County. It meets but once a year, unless for some special purpose. A very large number of its members are also active members of the Old Settlers' Club. It is not a corporation, and issues no account of its proceedings. The members simply meet once a year to elect officers and participate in their annual banquet. They became a separate institution January 1, 1880.

PUBLICATIONS.

See Report of American Historical Association, 1892.

OLD SETTLERS' SOCIETY OF RACINE COUNTY, WIS.

RACINE, WIS.

Organized March, 1870; incorporated 1870.
Object.—For fraternal and historical purposes.
First officers.—L. S. Blake, president; Benjamin Pratt, W. S. Hoyt, Thomas Plan, vice-presidents; S. B. Peck, secretary and treasurer.
Officers, 1894.—A. P. Dutton, president; J. S. Blakey, vice-president; George Skewas, secretary and treasurer.

PUBLICATIONS.

See Report of American Historical Association, 1892.

THE PARKMAN CLUB.

MILWAUKEE, WIS.

Organized December 10, 1895.
Objects.—"The study of Northwestern history and the publication of the papers read at its meetings." (Constitution.)
Founders.—M. M. Bostwick, H. C. Campbell, E. Bruncken, J. G. Gregory, H. E. Legler, M. E. McIntosh, G. P. Stickney, F. T. Terry, and W. W. Wight.
Officer.—The only officer is the secretary, Gardner P. Stickney. The other active members preside at the meetings in turn, each appointing his successor for the next meeting.

PUBLICATIONS.

Nicholas Perrot, a study in Wisconsin history, by Gardner P. Stickney; Milwaukee, 1895. Radisson and Grosseilliers, the Exploration of Lake Superior, by Henry C. Campbell; Milwaukee, 1896. Chevalier Henry de Tonty, His Exploits in the Mississippi Valley, by Henry E. Legler; Milwaukee 1896. The Aborigines of Wisconsin, a Glance at the Remote Past, by Frank T. Terry. (In press.) Jonathan Carver and His Travels, by John G. Gregory. (In press.) All 8vo. Publications are issued monthly ten months in the year, and are paged for an annual volume.

STATE HISTORICAL SOCIETY OF WISCONSIN.

MADISON, WIS.

Organized January 30, 1849; reorganized January 18, 1854; incorporated March 4, 1853.
Objects.—"To collect, embody, arrange, and preserve a library of books, pamphlets, maps, charts, manuscripts, papers, paintings, statuary, and other materials illustrative of the history of the State; to rescue from oblivion the memory of its early pioneers, and to obtain and preserve narratives of their exploits, perils, and hardy adventures; to exhibit faithfully the antiquities and the past and present condition and resources of Wisconsin, and may take proper steps to promote the study of history by lectures, and to publish and diffuse information relative to the description and history of the State." (Act of incorporation.)
Incorporators.—Leonard J. Farwell, Mason C. Darling, William R. Smith, Charles Lord, I. A. Lapham, William H. Watson, Cyrus Woodman, James D. Doty, Morgan L. Martin, Lyman C. Draper, Samuel Marshall, John W. Hunt, Albert C. Ingham, and O. M. Conover.
First officers after reorganization (elected January 18, 1854).—President, William R. Smith; vice-presidents, Cyrus Woodman, Mason C. Darling, Increase A. Lapham, John W. Cary, Morgan L. Martin, Nelson Dewey; corresponding secretary, Lyman C. Draper; recording secretary, Charles Lord; treasurer, O. M. Conover; librarian, John W. Hunt; curators, S. H. Carpenter, H. A. Wright, Beriah Brown, David Atwood, Simeon Mills, and Leonard J. Farwell.
Officers, 1894–95.—President, John Johnston; secretary, Reuben G. Thwaites; librarian, Isaac S. Bradley.

PUBLICATIONS.

See Report of American Historical Association, 1892.

X. ETHNOLOGY.

NATIONAL.

AMERICAN ETHNOLOGICAL SOCIETY.

New York, N. Y.

First officers.—Hon. Albert Gallatin, LL. D., president; Rev. Edward Robinson, D. D., LL. D., and Henry R. Schoolcraft, vice-presidents; Alexander I. Cotheal, treasurer; John R. Bartlett, corresponding secretary; Charles Welford, recording secretary.

During the first half century the presidents of the society have been Albert Gallatin, until his death in 1849; Rev. Dr. Robinson, Hon. George Folsom, Dr. John Torrey, and Alexander I. Cotheal.

Officers, 1894.—Charles E. West, M. D., LL. D., president; Charles P. Daly, LL. D., Henry Drisler, LL. D., vice-presidents; Henry T. Drowne, treasurer; Albert S. Bickmore, Ph. D., corresponding secretary; T. Stafford Drowne, D. D., recording secretary; Anthony Woodward, Ph. D., librarian; executive committee for 1894–95, Asa Bird Gardiner, LL. D., Andrew E. Douglass, A. M., Henry T. Drowne.

Bulletin, 1860–1863.

The society has had among its members some of the most distinguished scholars, discoverers, historians, linguists, and scientists all over the world. Among them may be mentioned Baron von Humboldt, Dr. Lieber, Ranke, Chevalier Bunsen, Prescott, Bancroft, Lepsius, Olshausen, Sir Gardiner Wilkinson, Carl Ritter, General Fremont, Dr. Pritchard; and later, Thomas Ewbank, E. George Squier, Dr. Edwin H. Davis, Evert A. Duyckinck, George H. Moore, Charles Rau, Charles C. Jones, jr., Louis Agassiz, Robert C. Winthrop, and Professor Henry of the Smithsonian Institution.

The early papers read before the society and the more or less elaborate works published by its members showed a marked interest and ability in ethnological research, especially in the origin and history of the aboriginal American nations and the phenomena connected therewith; the diversity of languages, the remains of ancient art, and traces of ancient civilization in Mexico, Central America, and Peru; the arts, sciences, and mythology of the American nations, and the earthworks and other monuments of the United States. Among them may be cited Stephen's volumes on Central America, illustrated by Catherwood; Gallatin's Notes on the Semicivilized Nations of Mexico, Yucatan, and Central America; Schoolcraft's extensive Researches among the Indian Tribes of North America; Squier and Davis's Aboriginal Monuments of New York, and the Ohio and the Mississippi Valleys; Squier's Serpent Symbol in America, and later publications on the Antiquities of Nicaragua and Peru; Dr. Hawks' Ancient Monuments of Egypt, his translation of Rivero and Von Tschudi's Peruvian Antiquities, and his elaborate volumes recording the splendid results of Commodore Perry's expedition to Japan; Cotheal's Grammatical Sketches of the Language of the Mosquito Indians of Central America; Ewbank's Contribution to the Topography and Antiquities of Brazil; Gliddon and Morton's book on Egyptian Archæology; Bartlett's Essay on the Progress of Ethnology, and later his Personal Narrative of Explorations and Incidents of Texas, New Mexico, California, Sonora, and Chihuahua.

XI. ARCHÆOLOGY, NUMISMATICS, AND PHILATELY.

NATIONAL.

THE AMERICAN ANTIQUARIAN SOCIETY.

Worcester, Mass.

Organized and incorporated 1812.

Objects.—To contribute to the advancement of the arts and sciences, to aid in collecting and preserving such materials as may be useful in marking their progress, not

only in the United States, but in other parts of the globe, and to assist the researches of future historians.

Founders.—The first steps taken for the formal establishment of this society were by Isaiah Thomas, LL. D., Hon. Nathaniel Paine, Dr. William Paine, Hon. Levi Lincoln, Rev. Aaron Bancroft, D. D., and Hon. Edward Bangs, all of Worcester, Mass. These gentlemen, on the supposition that the United States Congress had not power to grant charters for such purposes, presented a petition to the State legislature for an act of incorporation under the name of the "American Antiquarian Society," with the privilege of holding real estate in perpetuity of the annual value of $1,500, etc.

The persons named in the act were Isaiah Thomas, Levi Lincoln, Harrison G. Otis, Timothy Bigelow, Nathaniel Paine, Edward Bangs, John T. Kirkland, Aaron Bancroft, Jonathan H. Lyman, Elijah H. Mills, Elisha Hammond, Timothy Williams, William D. Peck, John Lowell, Edmund Dwight, Eleazer James, Josiah Quincy, William S. Shaw, Francis Blake, Levi Lincoln, jr., Samuel M. Burnside, Benjamin Russell, Thaddeus M. Harris, Redford Webster, Thomas Wallcut, Ebenezer T. Andrews, Isaiah Thomas, jr., William Wells. The first meeting of the corporators, called by an advertisement in the Massachusetts Spy (the editor and publisher of which was Isaiah Thomas), addressed to the "American Society of Antiquaries," was held at the Exchange Coffee House in Boston, November 19, 1812, ten gentlemen being present. At this meeting an organization was made by the choice of Isaiah Thomas as president; William D. Peck, vice-president; Thaddeus M. Harris, corresponding secretary, and Samuel M. Burnside, recording secretary. Another meeting was held in February, 1813, at which by-laws were adopted, and Dr. William Paine was chosen second vice-president; Levi Lincoln, jr., treasurer, and Timothy Bigelow, of Medford, Rev. Aaron Bancroft and Edward Bangs, of Worcester, Col. George Gibbs, of Boston, Rev. William Bentley, of Salem, Dr. Redford Webster and Benjamin Russell, of Boston, were chosen councilors. At this meeting Isaiah Thomas presented to the society his private library, valued at about $5,000. The library and cabinet received many additions during the next four years, both from his continued generosity and the increased interest manifested by other members. Mr. Thomas built, at his own expense, a suitable edifice for the reception of its valuable collections on Summer street, in Worcester, of brick, thoroughly built, and at the time considered well adapted to the purposes for which it was intended.

In February, 1819, a committee appointed to prepare an address to the members, setting forth the society's objects and condition, declare the institution to be, in all its concerns, national, although it derives its charter and its national appellation from the legislature of Massachusetts.

"This local authority was resorted to from doubts having been expressed whether Congress had the power to grant a charter without the District of Columbia. Its members are selected from all parts of the Union. Its respectability is inferred from its numbers, and from its comprising men of the first standing and intelligence in the nation, and some of the first distinction in other countries. The objects of this institution are commensurate with the lapse of time, and its benefits will be more and more accumulating in the progression of ages. As the antiquities of our country, by various means, are rapidly decreasing, an institution whose business it will be to collect and preserve such as remain and can be obtained must be viewed as highly important.

"The chief objects of the inquiries and researches of this society, which can not too soon arrest its attention, will be American antiquities, natural, artificial, and literary."

Officers, October, 1894.—President, Hon. Stephen Salisbury, A. M., of Worcester; vice-presidents, Hon. George Frisbie Hoar, LL. D., of Worcester, Rev. Edward Everett Hale, D. D., of Roxbury; council, Hon. Samuel Abbott Green, M. D., of Boston, Hon. Peleg Emory Aldrich, LL. D., of Worcester, Rev. Egbert Coffin Smyth, D. D., of Andover, Samuel Swett Green, A. M., of Worcester, Hon. Edward Livingston Davis, A. M., of Worcester, Franklin Bowditch Dexter, M. A., of New Haven, Conn., Jeremiah Evarts Greene, A. B., of Worcester, Granville Stanley Hall, LL. D., of Worcester, William Babcock Weeden, A. M., of Providence, R. I., Hon. John Davis Washburn, LL. B., of Worcester; secretary for foreign correspondence, Hon. James Hammond Trumbull, LL. D., of Hartford, Conn.; secretary for domestic correspondence, Rev. George Edward Ellis, LL. D., of Boston; recording secretary, Charles Augustus Chase, A. M., of Worcester; treasurer, Mr. Nathaniel Paine, of Worcester; librarian, Edmund Mills Barton.

REHOBOTH ANTIQUARIAN SOCIETY.

REHOBOTH, MASS.

Organized March 5, 1884; incorporated 1885.
Objects.—To collect and preserve objects of antiquarian interest, including books, pamphlets, manuscripts, and whatever illustrates the history of this ancient town. Also, to erect a suitable building for this and other educational purposes, including a school and library.
First officers.—Rev. George H. Tilton, president; William H. Marvel, secretary; George N. Goff, P. E. Wilmarth, E. H. Pierce, Charles Perry, and George H. Horton.
Officers, 1894.—John C. Marvel, William H. Marvel, Henry T. Horton, P. E. Wilmarth, E. H. Pierce, J. F. Earl, and George H. Goff.

THE WORCESTER SOCIETY OF ANTIQUITY.

WORCESTER, MASS.

Organized January 24, 1875; incorporated March 6, 1877.
Objects.—The preservation of all historical matter relating to Worcester and Worcester County, including Indian history, the collection of books, pamphlets, papers, manuscripts, portraits, prints, engravings, and whatever pertains to the making of history. Also, as an auxiliary to the library, a museum of relics, including Indian, colonial, and Revolutionary, showing the progress from the early settlement of the country.
Founders.—Samuel E. Staples, John G. Smith, Richard O'Flynn, Franklin P. Rice.
Officers, 1894.—Burton W. Potter, president; Thomas G. Kent and William H. Sawyer, vice-presidents; Walter Davidson, secretary; Henry F. Stedman, treasurer.

PUBLICATIONS.

Collections, Vols. I–XI, 1877–1894, 8vo., averaging about 500 pages. They include the proceedings, proprietors, town and court records, and inscriptions. See also Report of American Historical Association, 1892.

THE NATIONAL PHILATELICAL SOCIETY.

NEW YORK, N. Y.

Organized October 17, 1874; incorporated January 11, 1892.
Objects.—The encouragement of the collection of postage stamps, stamped envelopes, post cards, and other objects relating to philately; the procuring, disseminating, and preservation of knowledge in relation thereto; the purchasing and exchanging of post stamps, envelopes, cards, etc., for the entertainment of its members; the establishment of a library.
Founders.—Joseph J. Casey, Charles H. Coster, J. N. T. Levick, N. Barnett, Philip H. Jacobs, Benjamin Betts, Jesse K. Furlong, George B. Mason, J. Allan Mason, R. R. Bogert.
First officers.—Jesse K. Furlong, president; Charles H. Coster, vice-president; R. R. Bogert, secretary and treasurer.
Officers, 1895.—President, J. N. T. Levick; vice-president, C. Muecke; treasurer, M. Meyenberg; secretary, W. F. Gregory; exchange manager, G. W. D. Crittenton; librarian, Jos. S. Rich.

THE LITERARY AND SCIENTIFIC SOCIETY OF MADISONVILLE, OHIO.

MADISONVILLE, OHIO.

Organized November 12, 1878.
Object.—Archæological research, etc.
Founders.—H. B. Whetsel, president; F. W. Langdon, secretary.
Officers, 1895.—Hon. Joseph Cox, president; C. L. Metz, secretary.

PUBLICATIONS.

Reports on Archæological Explorations, 4 numbers.

THE OHIO STATE ARCHÆOLOGICAL AND HISTORICAL SOCIETY.

COLUMBUS, OHIO.

Organized and incorporated March 12, 1885.
Object.—For the purpose of promoting a knowledge of archæology and history, especially in Ohio, by establishing and maintaining a library of books, manuscripts,

maps, charts, etc., a museum of prehistoric relics, a library, and by courses of lectures and publications.

First officers.—Hon. Allen G. Thurman, president; Henry B. Curtis, first vice-president; Gen. R. Brinkerhoff, second vice-president; Albert A. Graham, secretary.

Officers, 1894.—Gen R. Brinkerhoff, president; Rev. Dr. William E. Moore, first vice-president; Hon. Elroy M. Avery, second vice-president; E. O. Randall, secretary; S. S. Rickly, treasurer.

XII. MEMORIAL AND PATRIOTIC.

NATIONAL.

GENERAL SOCIETY OF THE WAR OF 1812.

PHILADELPHIA, PA.

Organized January 9, 1854 (under title Society of the War of 1812; reorganized June 19, 1894, as General Society of the War of 1812).

Objects.—The preamble to the constitution says: "Whereas, in the providence of God, victory having crowned the forces of the United States of America in upholding the principles of the nation against Great Britain in the conflict known as the war of 1812, we, the survivors and descendants of those who participated in that contest, have joined together to perpetuate its memories and victories, to collect and secure for preservation rolls, records, books, and other documents relating to that period; to encourage research and publication of historical data, including memorials of patriots of that era in our national history; to care for and, when necessary, assist in burying actual veterans of that struggle; to cherish, maintain, and extend the institutions of American freedom, and foster true patriotism and love of country."

A short history is here given of the four State societies from which the general society has been organized: The largest, if not the oldest, of these societies is the Pennsylvania society. It was originally organized in 1857, in Philadelphia, Pa., on the recommendation of a National Convention of Veterans of the War of 1812, "composed of numerous delegates from 12 States, together with the District of Columbia, which convened in Independence Hall, at Philadelphia, on the 9th day of January, 1854, and in the city of Washington, D. C., on the 8th day of January, 1855." This convention recommended the formation by soldiers of the war of 1812 "of a society or association in each State, and within its own limits." "In compliance with this request of the national convention" (and of which the present General Society of the War of 1812 is the legitimate successor), "the surviving veterans of the war residing in Pennsylvania (more especially in Philadelphia, and in Montgomery, Delaware, Bucks, Chester, and other adjoining counties of the State) met on July 4, 1857, for the purpose of forming an association. Hon. Joel B. Sutherland was elected the first president of the association. Meetings were held each year. The society was reorganized in January, 1891, and incorporated November 19, 1892. The present officers of this society are as follows: President, John Cadwalader; vice-presidents, Col. John Biddle Porter; Appleton Morgan, LL. D.; Brig. Gen. Adolphus W. Greely, U. S. A.; Commander William Bainbridge-Hoff, U. S. N., and Brig. Gen. Charles Sutherland, U. S. A.; secretary, Capt. Henry Hobart Bellas, U. S. A.; registrar, Andrew Jackson Reilly; treasurer, Henry Martyn Hoyt; assistant secretary, James Varnum Peter Turner; historian, Cyrus Kingsbury Remington; chaplain, Rev. Horace Edwin Hayden.

The Maryland society, like that in Pennsylvania, was originally organized under a different title and with different purposes from its successor. The old "Association of the Defenders of Baltimore in 1814," formed from members of the old militia organizations of Maryland and who had been actual participants in the war of 1812–1814, was organized on April 1, 1842. The association had at one time upward of 1,000 members on its rolls, then as the membership was decreased by death there were but 5 veterans left in 1886. Descendants of veteran members had, however, in the meantime joined (though originally there was a provision in the constitution that none but actual defenders should be admitted), and when, in 1887, the last of the original members died, their descendants were at liberty to carry out the designs the old defenders had in view in the formation of their society. The organization was now entitled the "Association of the Descendants of the Defenders of Baltimore of the War of 1812-1814," and so continued until reorganized and incorporated on the basis of union, proposed by the Pennsylvania society, as "The Society of the War of 1812, in Maryland," on October 25, 1893. President, Edwin Warfield; vice-presidents, James Edward Carr, jr., and John Mason Dulany; secretary, William H. Gill; treasurer, Robert T. Smith; registrar, Albert Kimberly Hadel, M.D.; board of governors, Samuel A. Downs, John Randolph Wright, Col. Charles A. Reynolds, U. S. A., Charles H. Dickey, George Norbury Mackenzie, J. Appleton Wilson, Arthur M. Easter, James H. Parrish, and Ezekiel Mills.

The Connecticut society was organized April 5, and incorporated April 6, 1894. Col. George Bliss Sanford, U. S. A., is the president; Satterlee Swartwout, Col. Henry Walton Wessells, Gen. William W. Skiddy, Augustus Floyd Delafield, and Jesup Wakeman are the vice-presidents. The registrar is William Freeman French, M. D.; treasurer, Egerton Swartwout; secretary, John Edward Heaton, and chaplain, Rev. Alexander Hamilton.

The Massachusetts society was organized April 3, 1894. Capt. William Lithgow Willey is president, and Charles Frederick Bacon Philbrook secretary of the society.

The New York society, though claiming to have been originally organized in 1826, was, it would appear, not the continued successor to that association, but by the evidences now existing, as well as by the written statements of the officers of the society, was first organized in the latter part of 1891 or the beginning of 1892. It has also recently limited its future membership to descendants of officers only, adopted an insignia different from the other societies, and pursued generally an independent course of its own.

A convention of delegates from the societies of the war of 1812 in the States of Pennsylvania, Maryland, Massachusetts, and Connecticut, for the purpose of organizing a general society of the war of 1812, was held in the old Capitol building of the United States, in Philadelphia, Saturday, April 14, 1894. They elected the following officers: President-general, John Cadwalader, Pennsylvania; vice-president-general, Col. John Biddle Porter, for Pennsylvania; Commander Felix McCurley, for Maryland; Col. George Bliss Sanford, U. S. A., for Connecticut; William Lithgow Willey, for Massachusetts; secretary-general, Capt. Henry Hobart Bellas, U. S. A., Pennsylvania; assistant secretary-general, Charles Frederick Bacon Philbrook, Massachusetts; treasurer-general, Reynold Webb Wilcox, M. D., New York; assistant treasurer-general, Satterlee Swartwout, Connecticut; registrar-general, Albert Kimberly Hadel, M. D., Maryland; surgeon-general, Brig. Gen. Charles Sutherland, U. S. A., Pennsylvania; judge-advocate-general, Charles Henry Murray, New York; chaplain-general, Rev. Alexander Hamilton, Connecticut; executive committee, Commander William Bainbridge-Hoff, U. S. N. (chairman), Pennsylvania; James Edward Carr, jr., Maryland; William Freeman French, M. D., Connecticut; Franklin Thomason Beatty, M. D., Massachusetts.

SOCIETY OF COLONIAL WARS.

NEW YORK, N. Y.

Organized in New York City May 9 and 10, 1893.

Objects.—"Whereas it is desirable that there should be adequate celebrations commemorative of the events of colonial history happening from the settlement of Jamestown, Va., May 13, 1607 to the battle of Lexington, April 19, 1775; therefore

the Society of Colonial Wars has been instituted to perpetuate the memory of those events and of the men who, in military, naval, and civil positions of high trust and responsibility, by their acts or counsel assisted in the establishment, defense, and preservation of the American colonies, and were in truth the founders of this nation. With this end in view, it seeks to collect and preserve manuscripts, rolls, relics, and records; to provide suitable commemorations or memorials relating to the American colonial period, and to inspire in its members the fraternal and patriotic spirit of their forefathers, and in the community respect and reverence for those whose public services made our freedom and unity possible." (Preamble to the constitution adopted December 19, 1893.)

Delegates and alternates to the first general assembly of the Society of Colonial Wars:

From New York—T. J. Oakley Rhinelander, Thomas Ludlow Ogden, Frederic H. Betts, William G. Davies, Howard R. Bayne, Frederic Gallatin, Philip L. Livingston, Edward Trenchard, Maturin Livingston Delafield, jr., Frederick E. Haight; alternates, T. Waln-Morgan Draper, John Schuyler, Lieut. Walter J. Sears, U. S. N., Madison Grant, Walter Chandler.

From Pennsylvania—Edward Shippen, M. D., U. S. N., T. Chester Walbridge, William Macpherson Horner, George Cuthbert Gillespie, William Fisher Lewis; alternates, Thomas H. Montgomery, Edward Shippen.

From Maryland—George Norbury Mackenzie, Edwin Harvie Smith, John Appleton White, John Philemon Paca, Thomas Marsh Smith.

From Massachusetts—Francis E. Abbot, James Atkins Noyes.

From Connecticut—Dr. Charles Samuel Ward, Charles H. Trowbridge.

From District of Columbia—Gen. Richard N. Batchelder, U. S. A., Pay Director James H. Watmough, U. S. N., Charles Edward Coon, Gen. Walter Wyman, Archibald Hopkins; alternates, Lieut. T. B. M. Mason, U. S. N., Capt. Oscar F. Long, U. S. A., Lieut. Richard Graham Davenport, U. S. N., Prof. G. Brown Goode.

First officers.—Governor-general, Frederic J. De Peyster; deputy governor-general, Charles H. Murray for New York, James Mifflin for Pennsylvania, Gen. Joseph Lancaster Brent for Maryland, Gen. William F. Draper for Massachusetts, Nathan G. Pond for Connecticut, Rear-Admiral Francis Asbury Roe for District of Columbia; secretary-general, Howland Pell; deputy secretary-general, Edward Trenchard; treasurer-general, Satterlee Swartwout; deputy treasurer-general, S. Victor Constant; registrar-general, George Norbury Mackenzie; historian-general, Dr. Francis E. Abbot; chaplain-general, Rev. C. Ellis Stevens, LL.D., D. C. L.; surgeon-general, Samuel Claggett Chew, M. D.; chancellor-general, Hon. Thomas F. Bayard.

Officers, 1894.—Same as above.

PUBLICATIONS.

STATE.

ALABAMA SCOTCH-IRISH SOCIETY.

BIRMINGHAM, ALA.

Organized March, 1891.

Objects.—Same as those of the National Scotch-Irish Society.

First officers.—President, Gen. R. D. Johnston, Birmingham, Ala.; secretary, William G. Montgomery, Birmingham, Ala.

Officers, 1895.—President, Rev. J. H. Bryson, D. D., Huntsville, Ala.: secretary, William G. Montgomery, 2022 First avenue, Birmingham, Ala.: treasurer, John H. Miller, Birmingham, Ala.

THE SOCIETY OF THE SONS OF THE REVOLUTION, IN ALABAMA.

BIRMINGHAM, ALA.

Instituted April 16, 1894.

Objects.—The objects are common to all of the State societies and are set forth in the constitution of the general society. The organization is for social, literary, and patriotic purposes. It aims to acquaint the descendants of the heroes of the Revolution with the wonderful work of their ancestors; and to inculcate a love of duty and country similar to that which has become the admiration of all mankind. It is formed to aid in historical research; in the erection of monuments to our national heroes; in the preservations of records and genealogies; in the commemorative celebration of great historical events of a national importance, and in the promotion of social intercourse and a feeling of fellowship among its members.

Founders and first officers.—James Edward Webb, president, Birmingham, Ala.; James Franklin Johnston, vice-president, Birmingham, Ala.; Dr. Frank Prince, vice-

president, Bessemer, Ala.; Thomas McAdory Owen, secretary, Birmingham, Ala.; James Lewis Sandefur, treasurer, Birmingham, Ala.; Jesse Kilgore Brockman, assistant secretary, registrar, and historian, Birmingham, Ala.; Dr. Edward Pulaski Lacey, surgeon, Bessemer, Ala.; Dr. William Marmaduke Owen, chaplain, Bessemer, Ala.

Board of managers.—James E. Webb, chairman; Thomas M. Owen, secretary; Robert Daniel Johnston, Thomas Jefferson Hickman, Edward Ennis Graham Roberts, Dr. William M. Owen, Jesse K. Brockman, John McQueen, James F. Johnston, Dr. Frank Prince, James L. Sandefur, Dr. E. P. Lacey.

Officers, 1895-96.—Same as above, reelected, except W. P. G. Harding, Birmingham, Ala., present treasurer.

PUBLICATIONS.

Register, showing officials, constitution, by-laws, and roll of members, with ancestors, 1894-95. Total membership, 26.

SOCIETY OF COLONIAL WARS, IN CONNECTICUT.

NEW HAVEN, CONN.

Chartered April 26, 1893; incorporated May 21, 1893.

Objects.—See article 4 of General Society of Colonial Wars.

Founders.—Charles Samuel Ward, George Miles Gunn, George Hare Ford, Charles Hotchkiss Trowbridge, Charles Abraham Tomlinson, Nathan Gillette Pond, and others.

First officers (elected December 14, 1893).—Governor, Daniel Cady Eaton; deputy governor, George Bliss Sanford; lieutenant-governor, James Junius Goodwin; secretary, Nathan Gillette Pond; treasurer, Charles Hotchkiss Trowbridge; registrar, Henry Walter Wessels; gentlemen of the council, George Hare Ford, John Edward Heaton, Evelyn Lyman Bissell, Charles Samuel Ward, Charles Edwin Brown, Charles Abraham Tomlinson, William Freeman French, Ralph William Cutler, Abram Heaton Robertson.

THE ASSOCIATION OF THE OLDEST INHABITANTS OF THE DISTRICT OF COLUMBIA.

WASHINGTON, D. C.

Organized December 7, 1865.

Objects.—"The objects of this association are to cement and strengthen the interest and associations arising out of a common residence for a long period in the same locality, to keep alive the reminiscences of the past and the social and paternal communion of the present and the future. Assuming that, as the oldest residents of the District, we cherish the greatest solicitude for its prosperity, it will be for the association to lend its aid in every way to its prosperity and improvement in good order, right government, and social intercourse, hospitality, and in courtesy and respect to all public functionaries and authorities, without regard to sectional or political distinctions." (Constitution.)

First officers.—Benjamin Ogle Tayloe, president, with thirteen vice-presidents, one for each original State of the Union, of whom two, Peter Force and W. A. Bradley, are the only names recorded; Alex. McD. Davis, M. D., recording secretary; John Carrol Brent, corresponding secretary; Nicholas Callan, treasurer; S. Masi, marshal.

Officers, 1895.—John Marbury, jr., president; J. W. Clarke, W. Beron, J. Pilling, N. D. Larner, J. A. Tait, Joseph Prather, F. S. Kern, J. W. Brandenburg, C. W. Bennett, J. D. Hendley, J. H. Thompson, B. C. Wright, and R. Eichorn, vice-presidents; James Madison Cutts, recording secretary; Dr. Joseph T. Howard, corresponding secretary; Robert Ball, treasurer; J. A. Wineberger, marshal.

PUBLICATIONS.

See Report of American Historical Association, 1890. Manuscript copies of the addresses and papers read before the association, with other valuable manuscripts, and rare and valuable maps of the city and District, are preserved in its archives.

THE DISTRICT OF COLUMBIA SOCIETY OF THE SONS OF THE AMERICAN REVOLUTION.

WASHINGTON, D. C.

Organized April 19, 1890.

Objects.—First, to perpetuate the memory and spirit of the men who achieved American independence, by the encouragement of historical research in relation to the Revolution and the publication of its results; the preservation of documents

and relics and of the records of the individual services of Revolutionary soldiers and patriots, and the promotion of celebrations of all patriotic anniversaries; second, to carry out the injunction of Washington in his farewell address—"To promote, as an object of primary importance, institutions for the general diffusion of knowledge"—thus developing an enlightened public opinion and affording to young and old such advantages as shall develop in them the largest capacity for performing the duties of American citizens; third, to cherish, maintain, and extend the institutions of American freedom, thus fostering true patriotism and love of country, and to aid in securing for mankind all the blessings of liberty.

Founders and first officers.—President, Admiral D. D. Porter, U. S. N.; vice-presidents, Gen. A. W. Greely, U. S. A., Gen. Marcus J. Wright (late C. S. A.); secretary, Dr. F. O. St. Clair; treasurer, Col. Marshall McDonald; registrar, Dr. G. Brown Goode; historian, Dr. J. M. Toner.

Officers, 1895.—President, Dr. G. Brown Goode; vice-presidents, Hon. John W. Douglass, Hon. John Goode, Mr. Bernard R. Green; recording secretary, Mr. Francis E. Storm; corresponding secretary, Mr. Frederick E. Tasker; treasurer, Mr. William Van Zandt Cox; registrar, Mr. William J. Rhees; assistant registrar, Mr. Francis H. Parsons; historian, Maj. William Holcomb Webster; chaplain, Rev. Thomas S. Childs, D. D.

NATIONAL ACADEMY OF DESIGN.

NEW YORK, N. Y.

Organized January 16, 1826; incorporated April 5, 1828; charter made perpetual April 24, 1873.

Object.—The cultivation and extension of the arts of design, and its funds shall be employed in promoting that object.

Founders.—On the 8th of November, 1825, a number of young artists and students, secessionists from the older "American Academy of Fine Arts," now no longer existing, established the New York Drawing Association, and on the 16th of January, 1826, resolved themselves into a new organization to be known as the National Academy of the Arts of Design. They thereupon chose from their number 15 artists, who were directed to choose 15 others, the 30 thus selected to constitute the new society. Of this body of founders of the National Academy of Design, the last survivor, Mr. Thomas S. Cummings, N. A., for many years the treasurer and at one time the vice-president of the academy, died September 25, 1894.

The first fifteen, Thomas S. Cummings, M. L. Danforth, William Dunlap, Asher B. Durand, John Frazee, Charles C. Ingham, Henry Inman, G. Marsiglia, Peter Maverick, S. F. B. Morse, Edward T. Potter, Hugh Reinagle, Ithiel Town, W. G. Wall, Charles C. Wright; the second fifteen, Fred. S. Agate, Alexander J. Anderson, Thomas Cole, James Coyle, John Evers, William Jewett, William Main, John W. Paradise, J. Paradise, Rembrandt Peale, Nathaniel Rogers, Martin E. Thompson, John Vanderlyn, Samuel Waldo, D. W. Wilson.

Officers or council, 1894–95.—Thomas W. Wood, president; H. W. Robbins, vice-president; J. C. Nicoll, corresponding secretary; George H. Smillie, recording secretary; James D. Smillie, treasurer; Edwin H. Blashfield, H. Bolton Jones, Thomas Moran, James M. Hart, Olin L. Warner, Walter Shirlaw.

PUBLICATIONS.

Catalogues of the Annual (Spring) Exhibition and Autumn Exhibition.

NATIONAL SCULPTURE SOCIETY.

37 West Twenty-second Street, New York.

Organized May 30, 1893.

Objects.—To spread the knowledge of good sculpture; to raise sculptors to an equal place with painters, so that amateurs shall give them equal consideration and shall accord to sculpture as an art the same favor as to painting; to provide an annual exhibition of sculpture; to encourage the production of imaginative and ideal sculpture; to concentrate a body of sculptors, to whom questions of town embellishment may be referred; to provide a channel for the publication of ideal statuary and small works of sculpture for the household through limited editions, or otherwise, as may be deemed best; to encourage a wider demand for sculpture inside and outside dwellings and public edifices, so that architects and committees shall be forced to demand work by American sculptors; to attract to American artists and workmen the sums now spent on foreign statuettes, medallions, etc.; to establish a fund for the purchase of imaginative and ideal sculpture for the decoration of parks and buildings, and for presentation to museums, in aid of, not in rivalry with, the Municipal Art Society.

First officers.—J. Q. A. Ward, president; Richard M. Hunt, first vice-president; Richard W. Gilder, second vice-president; Charles de Kay, treasurer; F. Wellington Ruckstuhl, secretary.

Executive council, 1895.—J. Q. A. Ward, president; Russell Sturgis, first vice-president; Richard W. Gilder, second vice-president; J. Wyman Drummond, treasurer; F. W. Ruckstuhl, secretary; Herbert Adams, William C. Brownell, Thomas Shields Clarke, William T. Evans, Paulding Farnham, Daniel C. French, William C. Hall, Thomas Hastings, R. M. Hunt, Augustus St. Gaudens, Olin L. Warner, John Williams.

SOCIETY OF AMERICAN ARTISTS.

New York City.

Organized 1877; incorporated 1882.

Object.—The advancement of the fine arts.

Founders and first officers.—President, Walter Shirlaw; vice-president, Augustus St. Gaudens; secretary, Wyatt Eaton; Helena De Kay Gilder.

Officers, 1895.—President, William M. Chase; vice-president, John La Farge; secretary, Kenyon Cox; treasurer, Samuel Isham; Herbert Adams.

PENNSYLVANIA ACADEMY OF THE FINE ARTS.

Philadelphia, Pa.

Founded 1805.

Officers, 1894.—President, Edward H. Coates; vice-president, Clarence H. Clark; directors, Clarence H. Clark, William B. Bement, E. Burgess Warren, Charles Henry

Hart, John H. Packard, M. D., Henry Whelen, jr., John H. Converse, Charles Hare Hutchinson, Alexander Biddle, Francis W. Lewis, M. D., Theophilus P. Chandler, jr., Charles C. Harrison; treasurer, Henry Whelen, jr.; secretary and managing director, Harrison S. Morris; solicitor, John G. Johnson.

STATE.

THE ALABAMA STATE BAR ASSOCIATION.

MONTGOMERY, ALA.

Organized January 15, 1879; incorporated February 12, 1879.

Objects.—To advance the science of jurisprudence and promote the administration of justice throughout this State, uphold the honor of the profession of the law, and establish cordial intercourse among the members of the bar of Alabama.

Founder and first officers.—Col. D. S. Troy, of the city of Montgomery, on December 13, 1878, being at that time a senator from Montgomery County in the general assembly of Alabama, sent a page around to the senators and members of the house to obtain the signatures of the lawyers in each body, agreeing to organize a bar association. At a meeting of the signers of said call held in the hall of the house of representatives, on January 15, 1879, W. L. Bragg was elected president; Peter Hamilton, E. W. Pettus, L. P. Walker, H. M. Somerville, and James L. Pugh were elected vice-presidents; Alexander Troy was elected secretary and treasurer.

Officers, 1895.—James E. Webb, of Birmingham, president; Alexander Troy, of Montgomery, secretary.

PUBLICATIONS.

Proceedings of the annual meetings, varying in size from 130 to 255 pages.

THE BAR ASSOCIATION OF THE DISTRICT OF COLUMBIA.

WASHINGTON, D. C.

Organized in Washington, D. C., May 30, 1871; incorporated June 5, 1874.

Objects.—"To maintain the honor and dignity of the profession of the law and increase its usefulness in promoting the due administration of justice; the mutual improvement and social intercourse of its members, and to acquire and maintain a law library for the use and reference of the members of the association, under the restrictions and regulations established in its by-laws."

First officers.—President, Walter D. Davidge; first vice-president, Richard T. Merrick; second vice-president, Walter S. Cox; secretary, B. G. Lovejoy; treasurer, William F. Mattingly; executive committee, Enoch Totten, Nathaniel Wilson, William B. Webb, James G. Payne, and Joseph J. Coombs.

Officers, 1895.—President, Nathaniel Wilson; first vice-president, Henry E. Davis; second vice-president, Samuel Maddox; secretary, Blair Lee; treasurer, Charles H. Cragin; board of directors, Nathaniel Wilson, Blair Lee, Charles H. Cragin, Samuel R. Bond, Job Barnard, Andrew B. Duvall, Randall Hagner, and William A. McKenney; librarian, B. Kennon Peters; assistant librarian, F. S. Key Smith.

Newsom, Memphis, Tenn.; Carrington Mason, Memphis, Tenn.; G. W. MacRae, Memphis, Tenn.; W. R. Payne, Nashville, Tenn.; Overton Lea, Nashville, Tenn.; W. L. Danley, Nashville, Tenn.; M. B. Pilcher, Nashville, Tenn.; W. H. Payne, Nashville, Tenn.; A. D. Wharton, Nashville, Tenn.; James Bowron, Nashville, Tenn.; Rev. G. A. Lofton, Nashville, Tenn.; A. P. Bourland, Nashville, Tenn.; Jesse French, Nashville, Tenn.; Thomas Pepper, Springfield, Tenn.; J. I. D. Hinds, Lebanon, Tenn.; Mrs. A. G. Love, Marion, Ala.; Miss Georgia Finley, Greenville, Miss.; Dr. E. S. Chisholm, St. Louis, Mo.; Murray Shipley, Cincinnati, Ohio.

PUBLICATIONS.

Annual announcements of programmes; courses of study; outlines for reading course.

THE NATIONAL ASSOCIATION FOR STUDY OF CHILDREN.

WEST ROXBURY, MASS.

After several unsuccessful attempts at organizing locally, the N. E. A. assigned the Child Study Association an independent place on their programme with conditional promise of being made into a section in time to prepare a programme for the Chicago meeting during the exposition. A report of this meeting was printed in the proceedings of the N. E. A. for the summer of 1893.

First officers.—G. Stanley Hall, president; William L. Bryan, secretary.

Officers, 1895.—William L. Bryan, president; Thomas P. Bailey, jr., vice-president; Sara E. Wiltse, secretary.

Other associations have been organized, viz: The Illinois Society for Child Study, Colonel Parker being its president; and the South Carolina Association for the Study of Children, Thomas P. Bailey, jr., being the chairman.

NATIONAL EDUCATIONAL ASSOCIATION.

WINONA, MINN.

The present name of this association was assumed in 1870 at the annual meeting held in Cleveland, Ohio. Previous to 1870 it bore the name of "The National Teach-

ers' Association." This name had been assumed at its first organization in Philadelphia, August 26, 1857. At the time of its organization there were not less than 23 State educational associations. The oldest of these was the New York Association, organized in 1845. The American Institute of Instruction had been organized in 1830, and the Western College of Teachers was organized in Ohio in 1831. So far as is known the first educational association in the country was organized in Middletown, Conn., under the name of "The Middlesex County Association for the Improvement of Common Schools." "The American Association for the Advancement of Education" was organized in 1849 and 1850. The influence of all these organizations was felt more or less by the first movers in the organization of the National Teachers' Association, but the most direct influence came from the American Institute of Instruction, the New York Teachers' Association, and the American Association for the Advancement of Education.

The call for the preliminary meeting was signed by T. W. Valentine, president of the New York Teachers' Association; D. B. Hagar, Massachusetts; W. T. Lucky, Missouri; J. Tenny, New Hampshire; J. G. May, Indiana; W. Roberts, Pennsylvania; C. Pease, Vermont; D. Franklin Wells, Iowa; A. C. Spicer, Wisconsin; S. Wright, Illinois.

The meeting was called together and the organization took place in Philadelphia, August 26, 1857.

Object.—"To elevate the character and advance the interests of the profession of teaching and to promote the cause of popular education in the United States." Preamble to constitution.

First officers.—President, Z. Richards, Washington, D. C.; vice-presidents, T. W. Valentine, New York; D. B. Hagar, Massachusetts; William Roberts, Pennsylvania; J. F. Cann, Georgia; J. L. Enos, Iowa; T. C. Taylor, Delaware; J. R. Challen, Indiana: E. W. Whelan, Missouri; P. F. Smith, South Carolina; D. Wilkins, Illinois; T. Granger, Indiana; L. Andrews, Ohio; secretary, J. W. Bulkley, New York; treasurer, T. M. Cann, Delaware.

At the Cleveland meeting in 1870 the constitution was so amended as to admit cooperation and combination with two other societies, "The American Normal Association," organized in 1864, and "The National Superintendents' Association," organized in 1865, and the name was changed to that which it now bears. The organization of other departments was also provided for and two were then organized, the department of higher instruction and the department of primary or elementary instruction. In 1875 the industrial department was organized; the national council of education, in 1880; the Froebel or kindergarten, and the art and the music departments, in 1884, making the whole number 10.

The National Educational Association was incorporated February 24, 1886, at Washington, D. C. Its general object remains the same as when first organized.

Officers, 1894-95.—President, Nicholas Murray Butler, Columbia College, New York; secretary, Irwin Shepherd, Winona, Minn.; treasurer, J. M. Greenwood, Kansas City, Mo.; vice-presidents, A. G. Lane, of Illinois; G. M. Phillips, of Pennsylvania; L. E. Wolfe, of Missouri; W. H. Bartholomew, of Kentucky; W. F. Slaton, of Georgia; D. B. Johnston, of South Carolina; H. A. Wise, of Maryland; W. E. Sheldon, of Massachusetts; S. S. Packard, of New York; W. R. Malone, of Utah; D. L. Kiehle, of Minnesota; F. A. Fitzpatrick, of Nebraska.

The association has held 34 meetings, as follows: Two at Philadelphia, 1857, 1879; 1 at Cincinnati, 1858; Washington, 1859; Buffalo, 1860; Chicago, 1863, 1887, 1893; Ogdensburg, 1864; Harrisburg, 1865; Indianapolis, 1866; Nashville, 1868, 1889; Trenton, 1869; Cleveland, 1870; St. Louis, 1871; Boston, 1872; Elmira, 1873; Detroit, 1874; Minneapolis, 1875; Baltimore, 1876; Louisville, 1877; Chautauqua, 1880; Atlanta, 1881; 4 at Saratoga, 1882, 1883, 1885, 1892; Madison, 1884; Topeka, 1886; San Francisco, 1888; St. Paul, 1890; Toronto, 1891; Asbury Park, N. J., 1894. The meeting of 1895 will be held in Denver. There were no meetings in 1861, 1862, 1867, 1878.

Its presidents have been Zalmon Richards, A. J. Rickoff, J. W. Bulkley, John D. Philbrick, W. H. Wells, S. S. Greene, J. P. Wickersham, J. M. Gregory, L. Van Bokkelen, Daniel B. Hagar, J. L. Pickard, E. E. White, B. G. Northrop, S. H. White, William T. Harris, William F. Phelps, M. A. Newell, John Hancock, J. Ormond Wilson, James H. Smart, G. J. Orr, E. T. Tappan, Thomas W. Bicknell, N. A. Calkins, W. E. Sheldon, Aaron Gove, A. P. Marble, James H. Canfield, W. R. Garrett, E. H. Cook, and Albert G. Lane. It has a permanent fund of nearly $50,000.

PUBLICATIONS.

Proceedings, annual volumes 1870–1894 except 1878, 8vo, averaging about 536 pages each. A full index to the proceedings by authors and subjects, including the volume for 1893, was published in the report of the Commissioner of Education for 1892–93.

NEW ENGLAND ASSOCIATION OF COLLEGES AND PR EPARATORY SCHOOLS.

CAMBRIDGE, MASS.

Organized October 16 and 17, 1885.

Objects.—"Its object shall be the advancement of the cause of liberal education by the promotion of interests common to colleges and preparatory schools." (Constitution.) The immediate end in view is essentially the same, to secure closer cooperation between teachers in preparatory schools and professors and presidents of colleges.

First officers.—President, Dr. Moses Merrill, head master of the Boston Latin School; vice-presidents, Dr. E. G. Robinson, president of Brown University, and Dr. C. F. P. Bancroft, principal of Phillips Academy, Andover; secretary and treasurer, Miss Helen Magill, of Howard Institute, Bridgewater, Mass.

Executive committee (with the preceding).—Dr. Robert P. Keep, of the Free Academy, Norwich, Conn.; President Helen A. Shafer, of Wellesley College, and Edward H. Cutler, principal of the Newton High School.

At the meeting for organization 53 persons became members; there are now 245 members.

Officers, 1895.—President, Dr. L. Clark Seelye; vice-presidents, Dr. Cecil F. P. Bancroft, Dr. Charles W. Eliot; secretary and treasurer, Dr. Ray Greene Huling.

Executive committee (with the preceding).—Dr. Horace M. Willard, Dr. Elmer H. Capen, Dr. William De Witt Hyde, Edward G. Coy, and Prof. Frances E. Loyd.

Committee of conference.—Dr. William T. Peck, Charles E. Fish, Dr. William Gallagher.

PUBLICATIONS.

The proceedings of the association were published in The Academy, 1887–1891; in School and College, 1892; in the School Review, 1893–94. They have then been reprinted in pamphlet form, 8vo.

SOUTHERN EDUCATIONAL ASSOCIATION.

RALEIGH, N. C.

First proposed in the North Carolina Teacher for October, 1889; organized in Morehead City, N. C., July 1, 1890.

Object.—"The object of this association shall be to promote the cause of education, especially in the South." (Constitution.)

First officers.—Josiah H. Shinn, president, Little Rock, Ark.; Eugene G. Harrell, secretary and treasurer, Raleigh, N. C.; E. E. Britton, assistant secretary, Mount Olive, N. C.; vice-presidents, S. M. Finger, Raleigh, N. C.; M. A. Newell, Baltimore, Md.; James S. Hook, Atlanta, Ga.; F. M. Smith, Nashville, Tenn.; J. D. Pickett, Frankfort, Ky.; R. H. Parham, Little Rock, Ark.; J. R. Preston, Jackson, Miss.; John E. Massey, Richmond, Va.; J. H. Rice, Columbia, S. C.; A. J. Russell, Tallahassee, Fla.; W. H. Jack, Baton Rouge, La.; B. S. Morgan, Charleston, W. Va.; O. H. Cooper, Austin, Tex.; Solomon Palmer, Montgomery, Ala.; W. E. Coleman, Jefferson City, Mo.

Officers, 1892.—President, Solomon Palmer, East Lake, Ala.; secretary and treasurer, Eugene G. Harrell, Raleigh, N.C.; assistant secretary, W. T. Watson, Memphis, Tenn.; vice-presidents, E. B. Prettyman, Maryland; John E. Massey, Virginia; B. S. Morgan, West Virginia; S. M. Finger, North Carolina; W. D. Mayfield, South Carolina; S. D. Bradwell, Georgia; A. J. Russell, Florida; J. R. Preston, Mississippi; W. H. Jack, Louisiana; J. M. Carlisle, Texas; J. H. Shinn, Arkansas; W. R. Garrett, Tennessee; Ed. Porter Thompson, Kentucky; L. E. Wolfe, Missouri; J. G. Harris, Alabama.

SPELLING REFORM ASSOCIATION.

NEW YORK CITY.

Organized 1876.

Officers, 1894–95.—President, Francis A. March, Lafayette College, Pennsylvania; secretary, Melvil Dewey, State Library, Albany, N. Y.; corresponding secretary, Fred A. Fernald, Popular Science Monthly, New York City.

WESTERN DRAWING TEACHERS' ASSOCIATION.

LAFAYETTE, IND.

Organized August 10, 1893.

Object.—The promotion of art education in the public schools.

Officers, 1895–96.—Harriet Cecil Magee, president, Oshkosh, Wis.; Bonnie B. Snow, vice-president, Minneapolis, Minn.; E. Newton Reser, general secretary and treasurer, Lafayette, Ind.

Executive committee.—Roda E. Selleck, Indianapolis, Ind.; Mrs. C. M. Riley, St. Louis, Mo.; C. Emma Foster, Burlington, Iowa; Ruth Warner, Muskegon, Mich.; Mary Jameson, Chicago, Ill.; Helen L. Dickey, Rockford, Ill.; Frances E. Ransom, East Saginaw, Mich.

STATE.

THE ALABAMA EDUCATIONAL ASSOCIATION.

FLORENCE, ALA.

Organized July, 1882, as "The Alabama Teachers' Association;" name changed in 1886 to avoid confusion, as the colored teachers of the State had in the meantime organized "The State Teachers' Association," composed entirely of colored teachers.

Object.—The promotion of the educational interests of Alabama.

First officers (in part).—H. Clay Armstrong, president; E. R. Dickson, chairman executive committee; W. W. Wilson, secretary.

Officers (in full), 1895.—President, John Massey; first vice-president, Joseph B. Graham; second vice-president, Chappell Cory; third vice-president, Miss A. W. Brockman; secretary, Edwin H. Foster; treasurer, D. P. Christenberry; chairman executive committee, James K. Powers.

PUBLICATIONS.

Proceedings, annual, 12mo.

ARKANSAS STATE TEACHERS' ASSOCIATION.

LITTLE ROCK, ARK.

Twenty-fifth annual session was held in Mount Nebo, Ark., June 28–July 1, 1892.

Officers, 1892.—President, W. L. Edmiston; corresponding secretary, G. A. Warren; recording secretary, J. A. Kimbrough; treasurer, Miss Rose Galligan; vice-presidents, J. C. Littlepage, Junius Jordan, Mrs. Ella McRae, A. E. Lee, J. R. Roberts, J. C. Eaton; counselors, each county examiner in Arkansas; executive committee, W. L. Edmiston, president; G. A. Warren, corresponding secretary; J. A. Kimbrough, recording secretary; J. H. Shinn, state superintendent public instruction; Miss Rose Galligan, treasurer.

CALIFORNIA TEACHERS' ASSOCIATION.

SANTA ANA, CAL.

Twenty-seventh annual meeting was held in Stockton, Cal., December 26, 1893.

Object.—For furthering the educational interests of the State.

Officers, 1894.—President, George R. Kleeberger, San Jose; vice-presidents, Prof. F. Slate, University of California; Harr Wagner, San Diego; secretary, J. P. Greeley, Santa Ana; assistant secretary, Miss Anna C. Murphey, Sacramento; railroad secretary, Samuel T. Black, Ventura; treasurer, George A. Merrill, San Francisco.

THE SOCIETY FOR EDUCATION EXTENSION.

HARTFORD, CONN.

Incorporated by special act of Connecticut legislature May 18, 1893; certificate of organization filed September 21, 1893.

Object.—The promotion, by lectures and other methods of instruction, of all branches of education.

Incorporators.—James P. Andrews, William E. Collins, George H. Day, Rodney Dennis, John M. Fairfield, Wilbur F. Gordy, Chester D. Hartranft, Henry E. Hastings, John M. Holcombe, Clarence B. Ingraham, Edwin K. Mitchell, George Pope, George R. Shepherd, Charles C. Stearns, P. Henry Woodward, Charles F. Johnson, Richard Burton, Flavel S. Luther, James G. Batterson, Fred. H. Chapin, Henry Ferguson, Forrest Morgan, Willis I. Twitchell, Jacob L. Greene, Samuel M. Hotchkiss, John J. McCook.

First board of trustees (which is the governing body).—James P. Andrews, William E. Collins, George H. Day, Rodney Dennis, John M. Fairfield, Wilbur F. Gordy, Chester D. Hartranft, Henry E. Hastings, John M. Holcombe, Clarence B. Ingraham, Edwin K. Mitchell, George Pope, George R. Shepherd, Charles C. Stearns, and P. Henry Woodward.

Trustees.—Chester D. Hartranft, president; James P. Andrews, secretary; Ralph W. Cutler, treasurer; Richard Burton, George H. Day, Rodney Dennis, John M.

Fairfield, Wilbur F. Gordy, John M. Holcombe, Clarence B. Ingraham, Flavel S. Luther, Edwin K. Mitchell, George Pope, Lewis F. Reid, Charles D. Rice, George R. Shepherd, P. Henry Woodward.

The principal work of the society is done at present in connection with its school of sociology.

AMERICAN ASSOCIATION TO PROMOTE THE TEACHING OF SPEECH TO THE DEAF.

WASHINGTON, D. C.

Incorporated September 16, 1890.

Officers, 1891.—President, A. Graham Bell; vice-presidents, Gardiner G. Hubbard, Caroline A. Yale; secretary, Z. F. Westervelt; treasurer, Charles James Bell; directors, E. L. Barton, A. Graham Bell, A. L. E. Crouter, Philip G. Gillett, David Greenberger, Gardiner G. Hubbard, Mary H. True, Z. F. Westervelt, Caroline A. Yale; executive committee, A. Graham Bell, A. L. Crouter, Gardiner G. Hubbard, Z. F. Westervelt, David Greenberger.

GEORGIA TEACHERS' ASSOCIATION.

Quinn, treasurer; executive committee, William M. Bryant; chairman, T. E. Cook, E. D. Luckey, Miss A. C. Fruchte, and Miss Mary C. McCulloch.

NEW JERSEY STATE TEACHERS' ASSOCIATION.

DOVER, N. J.

Fortieth annual meeting was held at Asbury Park, N. J., July 9, 1894.

Officers, 1894.—President, John Enright, Freehold; vice-president, V. L. Davey, East Orange; secretary, J. H. Hulsart, Dover; treasurer, H. E. Harris, Bayonne; executive committee, F. H. Hanson, Newark, Horatio Draper, Camden, J. M. Raiston, Asbury Park, and the president, secretary and treasurer.

THE NEW YORK CITY TEACHERS' ASSOCIATION.

NEW YORK CITY.

Organized about 1869; incorporated November 8, 1894.

Objects.—(1) The mutual support and improvement of its members; (2) the cultivation of social intercourse among its members; (3) the erection of a suitable building for the purposes of the association; (4) the establishment of a library.

Officers, 1895.—President, Dr. Matthew J. Elgas; vice-president, Gustave Straubenmüller; secretary, Henrietta Woodman; treasurer, Sarah F. Buckelew; librarian, Ellen F. Holly; directors, the above-named officers and B. D. L. Southerland, Elijah A. Howland, Wilbur F. Hudson, Henry P. O'Neil, Hugh P. O'Neil, Carrie Fay Cobb, Joseph A. Wade, Eugene R. Darling, Henry C. Litchfield, Marietta A. Clark, Anastasia T. Horgan, Emily A. White, Abraham K. Van Vleck, Julia A. Birdseye, Caroline Emanuel.

THE NEW YORK SOCIETY OF PEDAGOGY.

NEW YORK, N. Y.

Organized March 9, 1889; incorporated June 8, 1893.

Objects.—1. The interchange of views as to the methods found to be most successful in the teaching of the several subjects forming the course of instruction established by the board of education. 2. The promotion of pedagogical knowledge by means of experimental studies in psychology with reference to educational questions. 3. The formation of a pedagogical library. 4. (*a*) The investigation of questions in the theory and art of teaching. (*b*) The collection of facts and statistics regarding the character and order of development of the mental powers of children in public schools; and (*c*) the gathering of other useful information concerning public education. 5. The systematic study, generally, of the mental, moral, and physical condition, environment, and development of children in our system; with a view toward making such an advance in educational organization and methods as will tend, in the light of the best available theory and experience, to fit the child to become a good citizen of the Republic.

Founders.—Henry W. Jameson, John W. Davis, Edward A. Page, Elijah A. Howland, Jacob T. Boyle, Wilbur F. Hudson, and Michael J. Dwyer.

First officers.—Edward A. Page, president; Henry W. Jameson, vice-president; Wilbur F. Hudson, treasurer; John W. Davis, recording secretary; Michael J. Dwyer, corresponding secretary.

Officers, 1895.—President, Edward A. Page; vice-president, Henry W. Jameson; second vice-president, Miss Mary E. Tate; third vice-president, Miss Josephine E. Rogers; treasurer, Samuel McC. Crosby; recording secretary, John W. Davis; corresponding secretary, Miss Hester A. Roberts; financial secretary, Miss M. M. Hughes; executive committee (term expiring 1895), Mrs. Julia A. Birdseye, Hugh P. O'Neil, Edward P. Pitcher, Miss Sara J. J. McCaffery, Dubois B. Frisbe; (term expiring 1896)

Miss Kate A. Walsh, George S. Davis, Edward D. Farrell, Elijah D. Clark, Abner B. Holley; (term expiring 1897) Henry P. O'Neil, James Lee, Elijah A. Howland, Miss A. T. Horgan, Russell R. Requa.

PUBLICATIONS.

The society publishes a list of magazine and book references, which it sends to the members, who by filing them have at command the latest bibliography of education. It has also published Teaching School Children to Think. G. B. Newcomb, Ph. D.; 12mo., pp. 22.

The Educational Value of Geography in the Common Schools. Thomas F. Harrison; 12mo., pp. 16.

NEW YORK STATE ART TEACHERS' ASSOCIATION.

New York City.

Organized about 1893.

Officers, 1895.—Walter S. Goodnough, president, Brooklyn; Gratia L. Rice, vice-president, Albany; Elizabeth A. Herrick, secretary, New York City; Jane Landon Graves, treasurer, Syracuse. Executive committee: Walter S. Goodnough, Brooklyn; Gratia L. Rice, Albany; Elizabeth A. Herrick, New York City; Jane Landon Graves, Syracuse; Eben Rose, Rochester; Mary J. Dyer, Rochester; and Mark M. Maycock, Buffalo.

NEW YORK STATE TEACHERS' ASSOCIATION.

Potsdam, N. Y.

Organized July 30, 1845; incorporated 1859.

"Its objects shall be the promotion of the interests of public education and the elevation of the profession of teaching." (Constitution.)

Officers, 1848.—President, Thomas Foulke; vice-president, Calvin Tracy; recording secretary, John H. Fanning; corresponding secretary, James H. Partridge; treasurer, Nathan P. Beers; librarian, Nathan Stark.

president, C. D. McIver, Lit. D., president State Normal and Industrial School; third vice-president. Col. Alex. Q. Holladay, president A. and M. College; secretary and treasurer, W. A. Withers, A. M., A. and M. College.

PUBLICATIONS.

Proceedings, published in North Carolina Teacher, May, 1892, pp. 443–467; May, 1893, pp. 356–390.

THE NORTH CAROLINA TEACHERS' ASSEMBLY.

RALEIGH, N. C.

Organized at Waynesville, White Sulphur Springs, June 16, 1884, at a call for such a meeting by the editor of the North Carolina Teacher; incorporated March 16, 1888, at Raleigh.

Objects.—For purposes of health, recreation, educational discussion, and mutual improvement of teachers and schools of North Carolina.

Originated and founded by Eugene G. Harrell, editor of the North Carolina Teacher. Its first officers were Prof. Jno. J. Fray, Raleigh, president; Rev. R. S. Arrowood, Concord, treasurer; E. G. Harrell, of Raleigh, secretary.

Officers, 1895.—Capt. C. B. Denson, Raleigh, president; Prof. J. Y. Joyner, Greensboro, first vice-president; E. G. Harrell, Raleigh, secretary and treasurer.

PUBLICATIONS.

The North Carolina Teacher has been an official organ of the Assembly since its organization, and this generally publishes all proceedings and other information.

THE ASSOCIATION OF OHIO COLLEGES.

WOOSTER, OHIO.

Organized at Springfield, Ohio, July 2, 1867.

Objects.—"An interchange of opinions among those engaged in the higher departments of instruction, and the adoption of such common rules as may seem best fitted to promote efficient and harmonious working."

Officers, 1895.—C. F. Thwing, president; W. J. Seelye, secretary; W. F. Pierce, treasurer.

PUBLICATIONS.

Transactions; annual; 8vo.

EASTERN OHIO TEACHERS' ASSOCIATION.

MARIETTA, OHIO.

Officers, 1894.—President, Supt. E. E. Smock, Cumberland; secretary, Principal H. E. Smith, Marietta. Executive committee, Supt. W. W. Boyd, chairman, Marietta; Supt. E. M. Van Cleve, Barnesville; Principal C. L. Cronebach, Dennison.

OHIO STATE TEACHERS' ASSOCIATION.

WELLSVILLE, OHIO.

The forty-seventh annual meeting was held in Delaware, Ohio, June 26–29, 1894.

Officers, 1894.—General Association, president, Supt. E. A. Jones, Massillon; vice-presidents, Supt. L. W. Sheppard, Columbus, Miss Emma Deterly, Columbus, Supt. J. T. Bartmess, Tippecanoe, Supt. S. D. Sanor, East Liverpool, Supt. Edward Merrick, Wilmington; secretary, Supt. James L. McDonald, Wellsville; treasurer, Supt. J. A. Shawan, Columbus. Department of superintendence, president, Hon. O. T. Corson, Columbus; secretary, Supt. J. H. Snyder, Tiffin. Executive committee, Supt. J. P. Sharkey, chairman, Eaton, Supt. C. C. Miller, Hamilton, Supt. L. D. Bonebrake, Mount Vernon, Supt. M. E. Hard, secretary, Salem, Supt. C. W. Butler, Defiance, Supt. R. H. Kinnison, Wellington.

THE HEBREW EDUCATION SOCIETY OF PHILADELPHIA.

PHILADELPHIA, PA.

Organized 1847; incorporated April 7, 1849, and amended April 11, 1860.

Object.—"The establishment of a school or schools within the limits of the city and county of Philadelphia, in which are to be taught the elementary branches of education, together with the sciences, and modern and ancient languages, always in

combination with instruction in Hebrew language, literature, and religion, in the manner that may be determined, from time to time, by the proper officers of the society."

Incorporators, 1849.—Solomon Solis, Simon Elfelt, Abraham Hart, Moses A. Dropsie, Solomon N. Carvalho, Isidore Binswanger, Marcus Cauffman, Lewis J. Cohen, Simon M. Klosser, Jacob Langsdorf, Isaac Leeser, Moses Nathan, Joseph Newhouse, Hyman Polock, Julius Stern, Herman Van Beil, Abraham S. Wolf, Lewis M. Allen, Mayer Arnold, and others.

Officers, 1894-95.—President, Moyer Fleisher; vice-president, Isaac Rosskam; treasurer, Gabriel Blum; secretary, D. Sulzberger.

The "Young Woman's Union," a branch of the Hebrew Education Society, is now in its tenth year (1894-95).

THE STATE PEDAGOGICAL ASSOCIATION OF PENNSYLVANIA.

UNIONTOWN, PA.

Officers, 1895-96.—President, A. T. Douthett; vice-presidents, A. A. Lambing, W. C. Stillwagen, and Rose A. McCleary; secretary, Mrs. Charles H. Rush; treasurer, W. J. Holland.

PUBLIC SCHOOL OFFICERS' ASSOCIATION.

NASHVILLE, TENN.

Organized 1887.

Objects.—"The mutual improvement of its members and the development of a satisfactory and efficient system of public schools for the State." (Constitution.)

Officers, 1895.—President, Thomas H. Paine, Jackson; vice-president, N. D. Overall, Murfreesboro; secretary and treasurer, Frank Goodman, Nashville.

PUBLICATIONS.

Proceedings, 8vo.

TENNESSEE STATE TEACHERS' ASSOCIATION.

NASHVILLE, TENN.

Organized in Knoxville July 21, 1865.

Officers, 1892.—President, H. D. Huffaker, Chattanooga; J. B. Haynes, Lewisburg, Miss Mollie Pierce, Dyersburg, W. W. Carson, Knoxville, vice-presidents; Frank Goodman, Nashville, secretary and treasurer.

PUBLICATIONS.

Proceedings, 8vo.

TEXAS STATE TEACHERS' ASSOCIATION.

GALVESTON, TEX.

The movement toward a State teachers' association in Texas began with a convention that met in Austin in December, 1871. Dr. William C. Crane was its president and Prof. S. G. Sneed its secretary, but its direct results were small. In 1877 the North Texas Educational Association was organized, with Maj. J. M. Richardson as president. In 1879 the Austin Teachers' Association was organized, with Dr. Crane as president. These two were united into the present organization at Mexia on June 29, 1880.

Object.—"To advance the educational interests of Texas." (Constitution.)

First officers.—S. T. Anderson, D. D., president; F. P. Hammond, secretary; Milton Parks, treasurer; executive committee, S. T. Anderson, W. C. Crane, Smith Ragsdale.

Officers, 1891.—W. S. Sutton, Houston, president; Mrs. Ed. F. Warren, Forth Worth, A. E. Hill, Taylor, W. J. Clay, Dublin, Mrs. Willie D. House, Waco, E. G. Littlejohn, Galveston, vice-presidents; J. C. Lattimore, Waco, treasurer; J. L. Long, Galveston, secretary.

EDUCATIONAL ASSOCIATION OF VIRGINIA.

RICHMOND, VA.

Organized in Petersburg in December, 1863; no meetings were held in 1864, nor in 1865.

Object.—"To promote the educational welfare of Virginia, and of the whole country." (Constitution.)

Officers, 1866.—President, Charles L. Cocke, Hollins Institute; first vice-president, S. Maupin, M. D., University of Virginia; second vice-president, J. L. Campbell, Washington College; third vice-president, D. Lee Powell, Southern Female Institute, Richmond, Va.; fourth vice-president, John Hart, Albemarle Female Institute, Charlottesville; corresponding secretary, Rev. A. J. Leavenworth, Leavenworth Female College, Petersburg; recording secretary and treasurer, W. R. Abbot, Charlottesville; auditor, William Carroll, Charlottesville.

Officers.—President, John E. Massey, superintendent of public instruction; executive committee, N. D. Hawkins, Bedford City, W. W. Robertson, Staunton, W. E. Coons, Culpeper County, Leroy S. Edwards, Richmond City, F. T. West, jr., Louisa County, J. P. Britt, Norfolk City; E. C. Glass, vice-president, J. A. McGilvray, secretary superintendents' conference; Willis A. Jenkins, recording secretary.

UBLICATIONS.

Minutes and reports, 8vo.

ADDENDA.

CLASS I. NATIONAL.

AMERICAN BRANCH OF THE SOCIETY FOR PSYCHICAL RESEARCH.

5 Boylston Place, Boston, Mass.

Officer for 1895.—Richard Hodgson, secretary.

STATE.

ST. AUGUSTINE LITERARY AND SCIENTIFIC ASSOCIATION.

St. Augustine, Fla.

First organized as the St. Augustine Institute of Natural Science.
Object.—"To advance work in science and history."
Officers, 1895.—Dr. De Wit Webb, president; Rev. J. N. MacGonigle, vice-president; Prof. S. H. Rutherford, secretary; Mrs. Anna M. Marcotte, treasurer; Prof. W. E. Knibloe, curator and librarian.

THE TERRE HAUTE SCIENCE CLUB.

Terre Haute, Ind.

Organized December 4, 1885.
Object.—"To promote scientific study."
First officers.—Prof. O. P. Jenkins, president; Prof. Stanley Coullen, secretary.
Officers, 1895.—Dr. J. P. Worrell, president; J. T. Scovell, secretary.

ST. PAUL ACADEMY OF SCIENCE.

St. Paul, Minn.

Organized December 11, 1889; incorporated March 1, 1890.
Object.—"To promote the study of the sciences in the broadest sense."
First officers.—President, S. N. Carman; vice-president, J. Fletcher Williams; secretary, L. B. Wilson; treasurer, W. F. Fifield; curator, C. B. Scott; executive committee, Edward C. Mitchell, Herbert W. Smith, P. H. Millard, John D. Ludden, M. D. Munn, and Sarah E. Peabody.
Officers, 1895.—President, Edward C. Mitchell; secretary, L. B. Wilson; curator, C. B. Scott.

CLASS III. STATE.

THE BERZELIUS SOCIETY.

Raleigh, N. C.

Organized February 21, 1895.
Objects.—"The advancement of chemistry and the promotion of chemical research in the North Carolina College of Agriculture and Mechanic Arts, and in the North Carolina Experiment Station."

Founders.—W. A. Withers, S. E. Asbury, R. G. Mewborne, C. B. Williams, G. S. Frofs, and J. A. Bizzell.

First officers.—President, C. B. Williams; vice-president, R. G. Mewborne; recording secretary and treasurer, J. A. Bizzell; corresponding secretary and librarian, S. E. Asbury.

CLASS V. STATE.

ENTOMOLOGICAL SOCIETY OF WASHINGTON.

WASHINGTON, D. C.

Officer, 1895.—Corresponding secretary, Frank Benton, Department of Agriculture, Washington, D. C.

NEWARK ENTOMOLOGICAL SOCIETY.

NEWARK, N. J.

Organized October 12, 1884.

Object.—"The study of entomology."

First officers.—President, S. Seib; vice-president, G. Haccius; secretary, J. Bunsow; treasurer, J. Hess; curator, Ch. Betz.

Officers, 1895.—President, H. Herpers; vice-president, C. P. Machesney; secretary, E. A. Bischoff; treasurer, G. Stortz; librarian, J. Angelman.

THE NATURAL HISTORY SOCIETY OF CORNELL UNIVERSITY.

ITHACA, N. Y.

Organized May 6, 1869.

Objects.—"To encourage and promote the study of the several branches of natural history in the university—zoology, botany, geology, and their subdivisions; to bring together the instructing staff and the students in meetings, at which papers are presented and informal discussion given."

Founders.—David Starr Jordan, now president of Leland Stanford Junior University, and Orville A. Derby, geologist to the Brazilian Government, were among the organizers.

Officers, 1895.—President, D. Bodine; vice-president and secretary, S. P. Carll; treasurer, J. W. Gilmore.

ZOOLOGICAL SOCIETY OF CINCINNATI.

CINCINNATI, OHIO.

Incorporated July 11, 1873.

Object.—"To encourage the study of natural history."

The founder was Mr. Andrew Erkenbrecher.

First officers.—Julius Dexter, president; Andrew Erkenbrecher, treasurer; L. J. Cist, secretary.

Officers, 1895.—A. E. Burkhardt, president; George Fisher, vice-president; Albert Erkenbrecher, treasurer; Thomas D. Webb, secretary; D. W. Brown, chairman executive committee; Will S. Heck, general manager; S. A. Stephan, superintendent.

CLASS VI. NATIONAL.

NATIONAL STATISTICAL ASSOCIATION.

WASHINGTON, D. C.

Organized in 1888 as the Census Analytical Association.

Object.—To create a system of verification of all statistical data of the United States.

Officers, 1896.—Prsiedent, Joseph Nimmo, jr.; secretary, Weston Flint.

CLASS VII. STATE.

THE COLUMBIAN ENGINEERING SOCIETY.

WASHINGTON, D. C.

Officers, 1895.—President, Prof. Francis R. Fava, jr.; secretary, E. C. Ruebsam

CLASS VIII. STATE.

THE PHILOMATHEAN LITERARY SOCIETY OF FREDERICK CITY, MD.

FREDERICK, MD.

Organized September, 1882; incorporated March 16, 1895.
Objects.—To foster and encourage educational, scientific, and literary pursuits.
Officers, 1896.—Thaddeus M. Biser, president; Dr. Edward Bowlus, vice-president; Noah E. Cramer, secretary; Calvin E. Schildtknecht, treasurer; Jacob J. Houdd, assistant secretary.

CLASS IX. STATE.

ARIZONA HISTORICAL SOCIETY.

PHŒNIX, ARIZ.

Organized and incorporated March 13, 1891.
First officers.—Charles D. Poston, president; vice-presidents, Lewis C. Hughes, Tucson; John Howard, Prescott; A. H. Hackney, Globe; Wm. Herring, Tombstone; W. H. Hardy, Kingman; Charles H. Brinley, Yuma; Peter R. Brady, Florence; Edward D. Tuttle, Safford; M. Stewart, Flagstaff; Samuel D. Moore, St. Johns.
Officers, 1895.—President, Charles D. Poston; secretary, L. M. Lemon, Phœnix, Ariz.

HISTORICAL SOCIETY OF HARFORD COUNTY, MD.

GLENVILLE, MD.

Organized September 26, 1885; incorporated April 17, 1886.
Objects.—"The collection, preservation, and diffusion of knowledge—civil, military, literary, and biographical—and for the collection of all historical facts upon every subject and of every character usually recorded in local history that may be in connection or identified with the past and present history of Harford County and incidentally with the State of Maryland, * * * and especially for the collection and preservation of family records—the genealogical history of the earlist settlers of the county and their descendants," etc.
Founders.—Rev. Dr. Wm. F. Brand, Dr. W. Stump Forwood, Benj. Silver, sr., Charles W. Michael, A. Finney Galbreath, John Moores, Albert P. Silver, Noble L. Mitchell, Septimus Davis, John S. Hughes, Fred. W. Baker, Dr. George W. Archer, Rev. Edward A. Colburn, N. N. Nock, Edward M. Allen, W. Beatty Harlan, James McCurdy, Henry C. Hall, and George Y. Maynadier.
First officers.—President, Dr. W. Stump Forwood; vice-president, Rev. Ed. A. Colburn; secretary, Fred. W. Baker; treasurer, N. N. Nock; librarian, Septimus G. Davis.
Officers, 1895.—President, Rev. Edward A. Colburn; vice-president, A. Finney Galbreath; secretary, Albert P. Silver; treasurer, N. N. Nock; librarian, Henry Wilson Archer.

CONNECTICUT VALLEY HISTORICAL SOCIETY.

SPRINGFIELD, MASS.

Organized and incorporated April, 1876.
Object.—"To procure and preserve whatever may relate to the natural, civil, military, literary, ecclesiastical, and genealogical history of the country, and especially of the territory included in the Connecticut Valley."
First officers.—President, Henry Morris; vice-presidents, A. L. Soule, Wm. L. Smith, and Samuel Bowers; curator and treasurer, Wm. Rice; executive committee, S. G. Buckingham, Homer Merriam, E. A. Reed, Jos. C. Pyncton, H. S. Lee, Chas. Marsh.
Officers, 1895.—President, W. S. Shurtleff; vice-presidents, Rev. S. G. Buckingham, Clark W. Bryan and A. M. Copeland; clerk, W. F. Adams; corresponding secretary, A. H. Kirkham; treasurer, J. Stuart Kirkham.

PUBLICATIONS.

Papers and Proceedings, 1876–1881, 8vo.

NEW HAMPSHIRE HISTORICAL SOCIETY.

CONCORD, N. H.

Organized May 20, 1823; incorporated June 13, 1823.
Object.—To advance historical study.
Officers, 1896.—Amos Hadley, president; John C. Ordway, recording secretary; William P. Fiske, treasurer; Sylvester Dana, corresponding secretary; Charles L. Tappan, librarian.

PASSAIC COUNTY HISTORICAL SOCIETY.

PATERSON, N. J.

Organized 1867; incorporated May 17, 1872.
Object.—To advance history and science.
First officer.—Rev. Joseph Banvard, D. D., president.
Officer, 1895.—William Nelson, librarian.

CHAPTER XIV.

CRIMINOLOGICAL STUDIES.[1]

Three divisions may be observed in criminological studies: First, a summary and classification of results already known—this may be called general criminology; second, an investigation of individual criminals, or special criminology; and third, a consideration of methods and institutions for the prevention and repression of crime, or practical criminology, including prisons, reformatories, police systems, etc. The first is historical, the second scientific, the third, as its name indicates, is more directly related to society. But it is in special criminology that most interest of late has been shown. It is pervaded with the scientific spirit which considers the investigation of causes as necessary before any rational treatment of crime can be expected.

CRIMINALS NOT SO ABNORMAL.

Should a philosopher desire to study normal human nature experimentally, he could do this best in prison, for probably nine-tenths of prisoners are criminals by occasion; that is, their crime is due mainly to bad social conditions; their personality differs little or none at all from that of the average man, so that any results gained here relate to normal man. But there is an additional advantage, questions can be asked and investigations permitted that would be difficult with normal man outside of prison. The prisoner has much less to lose and will often make confessions that few outside of prison would care to make, giving the deepest insight into human nature. Another advantage is that the exact conditions, such as regularity in habits of life, diet, etc., are known, and thus a more favorable condition of scientific inquiry is afforded. This is especially true in reformatories, industrial schools, houses of refuge, etc.; most of the inmates are entirely normal; it is abnormal surroundings, such as poverty or drunkenness at home, that brought them here, and not abnormal natures in the children themselves. But it may be added, that if children remain long enough in such conditions they will be liable to develop whatever criminal tendencies are in them. It is generally admitted that about 10 per cent of inmates are incorrigible; that is, they are criminals by nature. As their incorrigibility is shown by repeated acts, it is not so difficult to select these cases. This is not saying that such and such a case can not be cured, but intelligent prison officials of long experience doubt the probability of reformation.

CRIME NOT A DISEASE.

This fact of incorrigibility may be a reason why crime has been considered a disease. Reports from the principal penitentiaries of this country recently gathered by the Bureau of Education show 82 per cent in good health, 11 per cent in fair health. If crime is a disease, it would seem that it has little to do with what is ordinarily designated under this term. Some have sought by the study of criminals' brains to show anatomical anomalies indicating disease; but there is little agreement in these investigations. But if there were agreement, it would only indicate probabilities, not certainties, for comparatively few brains of criminals have been studied. Even in the case of the insane it is not demonstrated that mental disease necessarily involves brain disease; yet most investigators believe that it does, and with good reason. But there have been cases of insanity in which cerebral anomalies have been sought for in vain. To say that the cause was functional and so did not leave any traces is a hypothesis, but not knowledge in the scientific sense. Now, in the case of the criminal, the too common statement that crime is disease, is speculation, not fact.

[1] By Arthur MacDonald.

FREEDOM OF CRIMINALS' WILL.

A general sociological and ethical maxim is that the idea of wrong depends upon the moral, intellectual, and physical danger or injury which a thought, feeling, volition, or action brings to humanity.

This principle should be applied to degrees of exaggerated wrong or crime. But it may be asked if the degree of freedom or of personal guilt should not be the basis of punishment. The force of this objection is evident; the idea of freedom has been the basis of criminal law; it has also been sanctioned by the experience of the race; and although no claim is made of carrying it into practice without serious difficulties in the way of strict justice (difficulties inevitable to any system), yet it has been not only of invaluable service, but a necessity to humanity. This is not only true on criminal lines, but this idea has been the conscious basis of our highest moral ideals.

But at the same time the exaggeration of the idea of freedom has been one of the main causes of vengeance, which has left its traces in blood, fire, and martyrdom; and though at present vengeance seldom seeks such extreme forms, yet it is far from extinct. On moral and on biblical grounds, as far as man is concerned, vengeance can find little support. With few exceptions, a revengeful tone or manner toward a prisoner (the same is true outside of prison) always does harm, for it stirs up similar feelings in the prisoner, which are often the cause of his bad behavior and crime. Kindness, with firmness, is the desirable combination.

If we were obliged to withhold action in the case of any criminal for the reason that we did not know whether or in what degree he was innocent or guilty, from the standpoint of freedom of will, the community would be wholly unprotected. If a tiger were loose in the streets, the first question would not be whether he was guilty or not. We should imprison the criminal, first of all, because he is *dangerous* to the community.

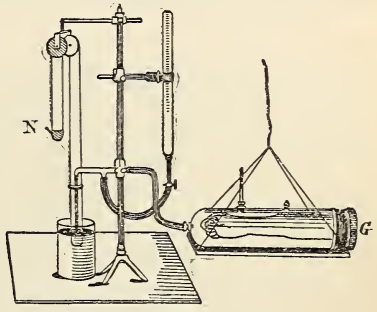
THE STUDY OF CRIMINALS.

At present our jurists study law books, not criminals, and yet nearly one-half the time of our courts is given to criminals. The individual study of the criminal and crime is a necessity, if we are to be protected from exconvicts—the most costly and most injurious citizens we have.

A complete study of a criminal includes his history, genealogy, and all particulars concerning himself and his surroundings previous to and during his criminal act; also a study of him in the psychophysical sense—that is, experiments upon his mind and body with instruments of precision—measuring, for example, his thought-time, sense of sight, hearing, touch, taste, smell, pressure, heat, and cold; also an examination of his organs after death, especially of his brain. It is evident that no one person could make an adequate study of a criminal. The microscopical anatomy of the brain alone, with its physiology, is more than the life work of many men could accomplish. Criminology, therefore, depends for its advancement upon the results of numerous departments of investigation.

CRIMINOLOGY NOT YET A SCIENCE.

In a rigid sense criminology is no more a science than sociology. Like many other branches of study, they are called sciences by courtesy. But the empirical study of human beings, with whatever class it begins, is an important step toward a scientific sociology. Criminology is an initiatory step in the direct study of individuals themselves and their exact relations to their surroundings. The practical and scientific value of such study consists in showing more clearly what normal society is or ought to be, just as the study of insanity gives by contrast an insight into mental health.



PHYSIOLOGY OF THE CRIMINAL'S BRAIN.

As already indicated, knowledge of the criminal's brain, as well as of the brain in general, is very inadequate, so that any definite conclusions are unwarranted. It may be said that the fact of a criminal having mental anomalies and at the same time cerebral or cranial ones, does not show that either one is the cause of the other, although it may justify a presumption that they are in some way related; for such conclusions are based upon the anatomy rather than the physiology of the brain; as to the latter, little is known. It is easy to conceive that brain circulation, qualitative and quantitative, has as much to do in its effect on the mind as anatomical conditions. It is, however, reasonable to assume that in the last analysis every physiological irregularity is based upon an anatomical one; yet the reverse may be assumed also. The probability would seem to be that the physiological and anatomical mutually act and react, one upon the other; and to decide which is primary is wholly beyond our present knowledge.

INSTRUMENTS OF PRECISION.

Measurements of sensibility by instruments of precision have not been carried very far. As an illustration of the probable importance of this method of study, we give a diagram of the plethysmograph of Mosso. The purpose of this instrument is to show the effect of the emotions upon the circulation of the arterial blood.

This instrument is one among others belonging to the Bureau of Education constituting the nucleus of a physio-educational laboratory. It consists of a cylindrical vessel, G, suited for the limb (the arm); the opening through which the limb is introduced is closed with caoutchouc and the vessel is filled with water. The arrangement is such that any increase or decrease in the volume of water in the vessel G causes the weight N to rise or fall. On this weight is attached a small bar which can be made to register its upward or downward movement on a revolving cylinder. As the arm enlarges from an increased supply of blood the curve registered on the cylinder is upward. Since the flow of venous blood is regarded as uniform in the passive limb, an increase of the volume of the arm shows a greater velocity in the flow of arterial blood in the limb. By having the criminal insert his arm into the cylinder, some of the effects of ideas on his emotional nature through the circulation of the blood will be registered, giving involuntary testimony as to his nervous and physical nature. Thus, in the case of one when the sentence of a judge was read, a decrease in flow of blood was observed by the lowering of the curve, but the sight of a cigar or a glass of wine raised the curve, which is equivalent to an increase in flow of arterial blood in the arm. In the case of a brutal murderer, the flow was little affected by the sight of a pistol, whereas in normal man there is a decided effect. The value of such an instrument for investigations on normal people will also be evident when we consider that both mental depression and sleep may cause the curve to lower; during straining and coughing the curve rises, but falls in sighing.

THE PLETHYSMOGRAPH.

Although little has been done with the plethysmograph as yet, it is easy to see the important bearing it may have on educational and psycho-physical questions. Thus a pupil with his arm in the vessel can be set to performing mathematical calculations or composing sentences, or varied ideas may be presented to his mind, and the effects of these mental states or studies on the circulatory system can be seen. As it is very probable that an increase of circulation in the arm, psychically caused, means an increase of circulation in the brain, we are able to study directly the influence of different mental conditions on circulation in the brain.

MORAL OBTUSENESS.

The extreme moral insensibility of habitual criminals can not be better shown than by their words and acts, often naively expressed. A criminal whose brother was being executed stole a purse and watch and said, "What a misfortune my brother is not here to have his share." Some speak so coldly and unconcernedly of their crimes in court that they would be taken for witnesses rather than authors of their deeds. Pity for the suffering of others is very feeble. One reminds the priest (preaching to him repentance) of the wine he had promised him fifteen days previously; and when mounting the scaffold the last and only thing which he said was to ask his wife, who was his accomplice, to give him credit for 37 francs. Another, from the three executioners desired to choose his "professor." Another complained of the condition of the streets through which he was brought to the scaffold.

THE DECEITFULNESS OF CRIMINALS.

Perhaps the greatest power of deceit of which man is capable has been shown on the scaffold. There are too many people who believe that no one would tell a falsehood when facing death. The fact that many hold this idea encourages criminals to insist on their innocence to the very last. Especially is this true of the more intelligent criminals; for they see they have little to lose but some things to gain as far as their reputation is concerned; for if they do not confess, many perhaps may believe them to be innocent or even consider them martyrs. Then, too, they may deny their guilt for the sake of their family.

Criminals probably fear death more than other men, but their intense vanity helps them to conceal it, just as their lack of foresight and impetuosity makes them appear

courageous. Not a few have been known to confess their faults to Him who grants divine pardon and then proclaim with a loud voice their innocence and die in contradiction with themselves.

PREVENTION OF CRIME.

When the cause of a particular crime is found, this indicates the most active cause, but not the only one. There may be specific remedies for specific cases, but they can only be determined by special study of the individuals. While some cases can not be reached, the great majority can be made susceptible to reformation, or at least improvement. Often the truest and best advice a physician can give to his patient is to keep up the general health, and nature will be his best servant in resisting all attacks of disease. The same principle applies in aiding one to overcome temptations to evil or crime. Such a remedy consists in moral and intellectual habits being implanted in children, which will give a constant resistance to all temptation, and be even an unconscious force when self-control is lost. Little can be expected from palliative remedies as long as this educational remedy is not thoroughly carried out.

CASE OF H.

As a study in education and criminology the following case of H. is of interest, for he is an educated man, as the world goes, a doctor of medicine, graduate of a university, and a man above the average criminal in culture, appearance, and general intellectuality. The importance of studying such a man is to note the gradual steps that led him to his fate, which he probably never intended. No man, as a rule, seeks to have his own life taken from him. He gradually gets accustomed to doing things, and forgets the feeling of the community. He then becomes careless and finally is caught. The intellectual education of a man at least fills his mind with subjects calculated to do him good. They do not tend to crime. But, of course, it is the moral side of education that has to do with the study of the criminal. It shows the importance of good habits, which the criminal seldom has. His life is irregular. He is a wanderer, from sociological necessity, and this wandering spirit leads to a feeling of irresponsibility. A man among strangers is liable to regard them as, in a manner, enemies.

As most criminals, like H., are seeking their own pleasure, if money leads to it, it is a question of degree how far they will go. If the question is asked whether the acts of any criminal, his life, or any special deed are due to himself or to his surroundings, we say that the surroundings caused the crime, and when they are due mostly to him we say he is a criminal by nature. Where a man is admittedly a criminal by nature, he is three-fourths like other men; and what is true in general of the physiology and psychology of criminals is almost as true of all men. So that when we are studying criminals we are really to a large extent studying human beings, only criminals are more convenient to study when they are in prison.

A common characteristic of the criminal is his vanity—the effect his crimes are liable to have on the community—and H. was not an exception to this rule. Some criminals when performing a bloody act get into a sort of spasm, and after they have killed their victim hack him to pieces, and then lay down through exhaustion and sleep right by the side of the body until they are rested.

Criminals are dangerous to the community, and should be shut up and not let out until there is reasonable certainty that they are no longer dangerous, just the same as we treat the insane. It is very difficult to tell the degree of guilt of any man, simply because we do not know his hereditary tendencies nor the special conditions and surroundings under which he was at the time of committing his deeds, but it is easy enough to tell whether he is dangerous simply by his acts, and this avoids speculation as to the degree of guilt or degree of freedom of the will.

The antecedents and early training of H. will not account for his subsequent career in crime. The careful reader of the letters of his professors and classmates will have revealed to him the character of H. in both his strong and weak points. It will be seen that his entrée into crime was of a gradual nature. He began in his university life to manifest in embryo from time to time those characteristics which when small are not criminal, but when increased in their quantity become so detrimental to society that we rightly call them criminal.

The following study of H. was made after several interviews with the murderer in his cell. A scientific study of him with instruments of precision of the latest design and also a psychological and sociological investigation of his character are presented. H. gradually developed into a professional criminal. Although convicted of murder, he was not a murderer by nature, for he was too much of a coward, and so resorted to poison in extreme circumstances. It is easy to see how his medical knowledge and experience were utilized in carrying out his criminal designs. His chief abnormality is a psychological one. He is a reprobate liar. He had a selfish

conscience. That is, when he was wronged he felt it (many criminals are very sensitive on this point). But in wronging others he was willfully made obtuse by his overt acts. Criminals are frequently accused of things they don't do, which shows the great disadvantage of having a bad reputation, which most of them earn. He was a deceiver by nature; and this, coupled with his greed for money, gradually led him into serious acts. But how shall we account for this criminal? In one sense such a question involves the whole inquiry into the origin of evil itself. It will not do to say that he is a man born out of his time. It is not plausible in the case of a murderer by nature, for the taking of human life was very common in the early races of men. But H. was effeminate in nature, and when taking human life he used an effeminate method, poisoning. Throughout the history of crime this has been woman's method. We do not know enough about the origin of society to account for the beginning of deception. It is evident from the letters that his greed for money, with little or no aversion to deceive, and his poverty gradually led him on. Poverty is often an occasion but not a cause of a great deal of wrongdoing.

His strong impulse to deception and greed was the hereditary side of his character; the degree to which he developed them into criminality depended upon his environment.

The prisoner did not desire, and therefore the authorities did not permit, that an instrument be put upon him while on the scaffold and after he dropped for the purposes of measuring the effects of the emotions upon the movements of his chest while standing upon the scaffold and the reflex motions of asphyxia. These effects would be transferred to the muscles of the thorax by means of the kymographion; the chest movements after the fall of the drop, the rate of their temporary increase or decrease, and their periodicity could probably have been determined. It was not expected that from one single case any very important results could be obtained, but by observing the different effects of hanging when the neck breaks and when it does not, and also the effects in cases of electrocution, the comparative degree of pain and the length of duration of consciousness might be determined. This would aid in a scientific study of the physiology of death, of which very little is yet known. Physicians are allowed to study persons of the highest respectability both in private practice and in hospitals, and the knowledge thus gained has been utilized for the good of humanity. It is therefore difficult to see serious reasons why the greatest enemies of society should not be used for the benefit of society, provided, of course, no injury is done them.

In reply to the remark that it was temporarily assumed that he (H.) might be guilty of some of the crimes he was accused of, the prisoner made the following statements:

STUDY OF H. IN HIS CELL.

He said: "I did not deny my guilt for several reasons; people would not believe me even if I told the truth. My counsel will tell you the reasons. I am preparing my affairs with a view that I am to be executed. I prefer it to imprisonment for life. If I were not executed the insurance companies would make an example of me. If I am accused of seventeen murders, and the three insisted upon are shown to be false, how can any one believe me guilty of the others? I lived in Chicago ten years and had a good reputation."

When told that there was a moral certainty that he was guilty of one or two murders, and there were reasons to suspect that he had committed a number, he laughed. When told that the most intelligent and aristocratic criminals seldom confess on the scaffold, he said he did not desire to confess on account of his relatives.

H. said he was going to cut the interview short, remarking when I was preparing the kymographion that I would use all my half hour with this; that another man was coming to see him whom he desired to see more than me. After I had remained much longer than half an hour he said he guessed he would cut the other man short. He did not care himself, but the prison was granting him many privileges, and so he wanted to cut me short.

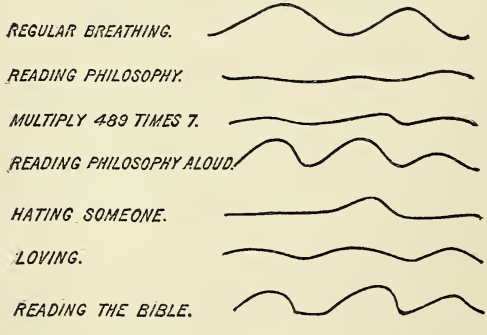
When in prison at St. Louis he said he saw a negro hung, while looking through his cell window, and that pieces of the rope were taken as mementoes and fastened on the watch chains of the bystanders. Then he asked if I could believe that after such a terrible experience he would go and do things that would bring him to the gallows. I answered that of about one hundred and fifty men guillotined in Paris all had witnessed a similar execution.

He said in his book he had admitted many crimes, but had never taken life; said "he drew the line at murder." (An innocent man would hardly use such an expression).

When told that criminals feared death more than other people and preferred imprisonment for life, he said he must be an exception; he was almost tempted to make a false confession in order to hang.

When I inserted an instrument in his mouth to measure the height of his palate he said, as if afraid, "Don't choke me."

He complained of being troubled with strabismus from childhood; said his mother was an epileptic; that he was not nervous, but at present felt a little nervous.



He had lived with a professor, who was his best friend, and who was at that time demonstrator of anatomy. He did not go to college, but graduated from the medical school. He added he was also a graduate in pharmacy. He would send all he had to say to his former professor (he did not do it), to whom I could write. He did not like to tell all on account of his domestic troubles, which had not been entered into. He admitted that he was married more than once.

RESULTS OF EXAMINATION BY KYMOGRAPHION.

This instrument is for the purpose of measuring the effects of mental and emotional states upon the movements of the chest. Actors locate the seat of the emotion they simulate in the chest. A silk band is drawn closely about the chest, a little air-

THE KYMOGRAPHION RECORD.

The kymographion records the movements of the chest, as affected by mental and emotional states. The higher the waves in the lines the more the subject breathes.

tight cylinder with a delicate film over both ends, a hook being inserted in each film, was attached to the loops in the end of the silk band; from the air-tight cylinder a couple of yards of slender rubber tubing with the other end inserted in a tambour. The tube went into another air-tight space, the bottom and size of which were wood and the top a delicate film. On this film rested a delicate hinge, to which was fastened a fine bamboo splinter which rose and fell with every breath. When this was placed against the cylinder of the kymographion lines were scratched on the surface of the smoked paper which indicated the motion of the little bamboo point.

With every inhalation the bamboo splinter was raised and with every expiration it decended, making a wave-like curve on the paper.

It will be noticed that all the mental and emotional states lessened the breathing, since the waves in all the lines are smaller than those in the regular breathing (line 1). In the few experiments made this is what generally occurs: Reading of philosophy (line 2), multiplication (line 3), and hating (line 5) affected the prisoner's breathing most. This is what generally happens, with the exception of the feeling of hatred, which is in most people a wavy line, but in the prisoner it is his most intense line—that is to say, it absorbs his attention most. Concentration of attention seemed to be much easier for him in hating than in the other emotions. In most people hatred is a wave-like line, with little breaks in the waves; but love is a more intense line. In the prisoner the opposite seems to be true. The feeling of love had but little more effect than reading the Bible, which had the least effect of any of his psychical states when we compare this line with the regular breathing line. As an example of the effects of emotion on H. by another method, the following will illustrate. He was accused by a prominent lawyer of having killed the P. children. They were in a room together. His eyes bulged out; he turned red, and could say nothing.

PHYSICAL MEASUREMENTS.

January 4, 1896.

Height, 72 centimeters; sitting height, 33 centimeters; strength of right-hand grasp, 34 kilograms; of left-hand grasp, 32 kilograms; maximum length of head, 191 millimeters; maximum width of head, 149 millimeters; cephalic index, 78; distance between external edges of orbits, 110 millimeters; length of nose, 55 millimeters; width of nose, 35 millimeters; nasal index, 63; length of ears, right, 60 millimeters; left, 62 millimeters (he remarked that he had injured his ear); width of mouth, 55 millimeters; thickness of lips, 10 millimeters; height of palate, 20 millimeters.

MEASUREMENTS OF NERVOUS SYSTEM.

Least sensibility to locality: Right wrist, 17 millimeters; left wrist, 17 millimeters. Least sensibility to heart: Right wrist, 4 degrees; left wrist, 5 degrees. Least sensibility to pain by pressure: Right temporal muscle, 700 grams; left temporal muscle, 600 grams; with hand algometer (Catell's), right hand, 5,750 grams, and left hand, 4,750 grams.

H. said he was ambidextrous (common among criminals). He said the example of a friend taught him to be this. Another peculiarity is the fact of one ear being longer than the other. His palate is higher than the normal, which is about 14 millimeters. His sense of locality is more obtuse than the average, which is 15 millimeters. Another peculiarity is the fact that his left hand is less sensitive to heat than his right hand. This seldom is the case with normal people. His sensibility to pain is more acute than the average; that is, on the temporal muscle.

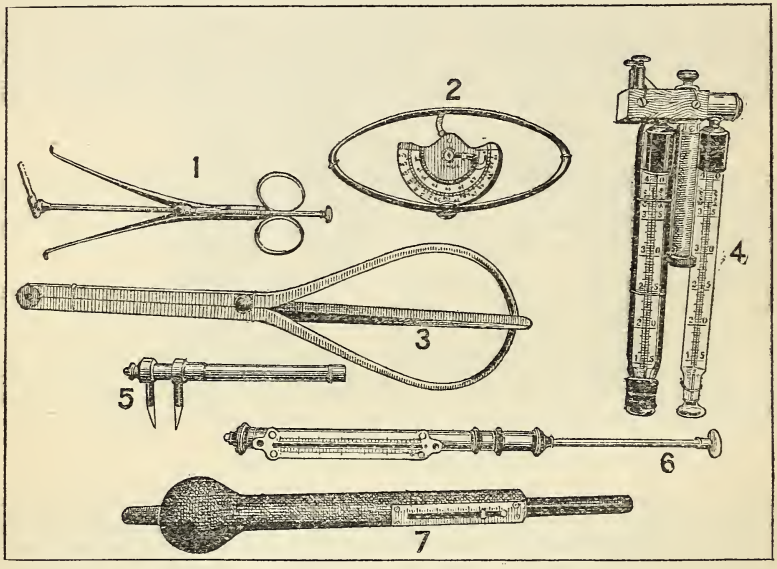
EXAMINATION BY DR. TALBOT.

Nativity, American; age, 35; weight, 150 pounds; occiput, full, right lower than left; bregma, sunken; forehead, left side more full than right, sloping; hair, brown; face, excessive; body, excessive; face, arrested; zygomæ, arrested, hollowed on right side; ears, right lower than left; nose, long, very thin; stenosis of nasal bone; septum deflected to left; nose turned to right; thyroid gland, arrested; eyes, strabismus in left, inherited; left higher than right; jaws, slightly protruding upper, arrest of lower; alveolar process normal; left side of mouth drops lower than the right; third molars not developed; remaining teeth regular; chin turned to right; breast, marked pigeon breast, left side more than right; chest contracted, tendency to tuberculosis; arms, right normal, left 1½ inches short; legs long and thin; feet medium in size, but markedly deformed; depression on left side of skull at bregma, due to fall of brick at the age of 31; sexual organs unusually small.

There are a number of abnormalities noted in Dr. Talbot's examination, but they do not seem to me sufficient in number and degree to class the prisoner as physically abnormal. His height of palate, in my own examination, and his general demeanor would class him among neurotics.

SOCIOLOGICAL.

Antecedents and childhood: One who knew his family well says in a letter: "I was born in P., N. H., in an adjoining town to the birthplace of H., which was G., B. Co., N. H., and inasmuch as H. and his parents were frequently attendants upon my father's preaching, and as he attended the district school taught by my wife's sister, and as his wife, and part of the time himself, were in the employ of an uncle of mine, I have a definite knowledge of his youth.



"His people were very upright, God-fearing citizens, living in a quiet, secluded section of the country. There is no trace or taint of open immorality or vice in the family history for at least three generations of which I have any knowledge. I am intimately acquainted with several of his cousins, and they are all upright men.

"As a boy, H. was a quiet, studious, faithful lad, with refined tastes, not caring to join to any extent in the rude and rough games of his companions at school, and easily standing as the first scholar in his class. He was a general favorite with the mothers in that community, because he was such a well-behaved lad. In his youth he was predisposed to a religious life; was a faithful, painstaking student of the Scriptures, and rather excelled in his Sunday-school class, and later in his Bible class, and my recollection is that he took an active part in the weekly prayer meetings and was known as a religious youth."

Letter from his first wife.—In regard to his childhood days I can not say much, as I did not know much of him until he was 17 years old. I always felt that he was pleasant in disposition, tender-hearted, much more so than people in general. He was of a very determined mind, at the same time quite considerate of others' comfort

INSTRUMENTS APPLIED TO H.

1. Palatemeter.
2. Hand-grasp measure.
3. Cranlometer.
4. Thermaesthesiometer.
5. Aesthesiometer
6. Temple algometer.
7. Palm algometer.

and welfare. In 1881 he was at B., Vt., for the year, and in the spring of 1882 he started for the university, and, as far as I knew, was doing very well. I returned to N. H. the spring before he was to graduate, and have known very little of him since, but he has always been called very smart, well educated, and a man of refined ways. Before attending the medical school he taught school several terms and was very successful—as much so as teachers in general—and when the story came out people who had always known him said, "We can not believe this. H. would not have the heart or courage to do anything so terrible." But of course he has worked himself up to it little by little, and I think, having done some little wrong, he had been driven to a greater one for a cover, and each one growing worse, of course it is easy or more easy to go in the wrong after the first few steps.

UNIVERSITY LIFE.

Letters of inquiry were sent to his teachers and classmates, many of whom are now prominent physicians.

One of the professors in the university says: "It is true that while a student here he was for a year or two under my roof, but not in any such intimate relations with me as to justify him as looking upon me as his best friend; if so, his friends must be few. However, I am very sorry for him, even although he himself may be the direct cause of his present miseries and threatening punishments. He told

me a few months ago, when I visited him in prison, that he and another classmate had worked up a scheme to defraud an insurance company a few months after they graduated in 1884 from the medical department here, but that the scheme fell through because of his friend's death, which occurred within a year after he graduated. I do not know whether he graduated in pharmacy or not. He certainly did not take that course here, as I find he was never entered as a pharmacy student. He may have taken the degree elsewhere, but if he did it was after he graduated in medicine, as he made no claim to having had a pharmacy course when he was here.

"There were several things that occurred while he was here as a student that in the light of subsequent events show him to have been even at that time well practiced in criminal habits. Although he was married and had his wife here for a time doing work as a dressmaker and assisting in supporting himself and her, yet he got into trouble by showing some attention to a grass widow, who was engaged in the business of hair dressing. This woman made some complaints to the faculty during the latter part of his senior year, and the stories that she told, had they been confirmed, would have prevented him from graduating. But I had no reason to doubt his word at that time, and his friends lied for him so vigorously that I was wholly deceived and defended him before the faculty, and he was permitted to graduate. On the afternoon of commencement day he came to me of his own accord, with his diploma in his hand, and said: "Doctor those things are true that that woman said about me." This was the first positive evidence that I had received up until that time that the fellow was a scoundrel, and I took occasion to tell him so at that time. I subsequently learned, however, that he had made two attempts to enter my house in the character of a burglar, and also that he had while occupying a room in a portion of my house attempted to force a drawer in my library in which I had been in the habit of keeping some valuables. Three months after he had graduated in medicine, and knowing full well what opinion I entertained of him, he wrote me asking for a recommendation to assist him in getting an appointment as a missionary to Africa. This I am satisfied he did simply from the spirit of devilishness, and not that he had any serious intention of carrying out such a purpose. These and many little incidents that I might relate to you, some of them personal experiences of my own with him, and others that have been told me by members of my family, serve to further illustrate these traits in his character, but they are all of the same nature as those that I have mentioned."

Another professor says: "Personally, I can not recall H.'s features. I only remember that he failed to pass in my work and that I voted against his graduation."

TESTIMONY OF HIS CLASSMATES.

1. "Myself and family lived in the house with H. and his family almost one school year. His family consisted of a wife and one child (a boy about 4 years old). His wife was a very pleasant woman and willing to make any sacrifice that she might help him along in his course. She finally went out to work and gave him her earnings. She was subject to convulsions of some kind, and while at work he gave her such quantities of bromide that her face broke out very badly. Every one thought it too bad for her. He must have been in very straitened circumstances, for he managed different ways of getting along. I remember he built a barn for a widow woman who was studying medicine in the homeopathy department at that time. She told me how H. beat her on the barn. He was very dishonest and tricky any place you found him. He would borrow everything of the students that he could to save himself buying. I have no picture of H. Would never have recognized him by his picture in the papers. At that time he had a rather slender face, wore chin whiskers, not considered good looking, but I remember he had treacherous-looking eyes. Another piece of his wife's economy was to borrow our sewing machine and completely turn a coat for him. He was not a graduate in pharmacy to my knowledge."

2. "It happened that H. acted as steward of a boarding house (only table boarding). It was his duty to keep the places at table filled with students and collect the money weekly. My recollection of him is quite distinct. None of the boys ever knew much of him (further than that he admitted himself to be married), or had much to do with him. His associations with his fellow students amounted to but little, because of his way of living. He had no money, at least that is what he always said. For his meals he conducted the club, while he slept at Dr. H.'s house. (Dr. H. was then demonstrator of anatomy in the university.) This brought him to the boarding house only at mealtime. The money was collected by H. regularly every Saturday evening. He was, as I remember, always punctual in performing his duties, and also regular at his meals. Even now I can see him sitting at the lower, dark end of the long table, saying but little and laughing very seldom. He was of a remarkably taciturn disposition, apparently indifferent to his surroundings, coldly methodical, unresponsive to humor, and very brief in his statements. His topics of conversation were mainly concerning Dr. H.'s operations upon his private patients. H., as I have said, slept at Dr. H.'s house. He always accompanied Dr. H. upon his night

trips. We students, remarking the thing, always thought that H.'s quietness was due to his rest being broken and irregular, having always to hitch up the horse for the Dr.'s use, perhaps accompany him, and then stable the horse upon the Dr.'s return. I remember once of asking a medical student how H. answered up in his "quiz." The answer I got was that he was not very reliable or exact in his knowledge."

3. Health officer in a well-known city says: "From October, 1883, until June, 1884, I boarded at a boarding club. This club was run by H., who was at that time a member of the senior medical class. He collected the board money and drummed up boarders among the students, receiving his own board free for the services rendered. I sat at the same table with him during most of the year. He assisted Dr. H. in his private dissecting room and in the injection of bodies received for dissection. He kept the cloakroom, receiving small fees from students engaged in dissection for looking after their clothing, renting them drawers for their dissecting instruments, etc., and in many other ways contrived to earn small sums of money. He was at all times, while I knew him, miserably poor and a subject for pity. As a student he was distinctly what might be termed "dumb." He was slow to grasp ideas and not at all ready in reasoning. I distinctly remember that we expected him to fail to graduate and that there was a general impression that his ultimate graduation was due to the pity of the professors overcoming their sense of propriety. Personally he was not a man to attract friendship, although he was never offensive or repellant. He was rather quiet in manner, very slouchy in gait, and usually held his head low. I think (but am not positive) that he had a slight droop of one eyelid. I heard during the year succeeding H's. graduation that he had gone to Cape Colony, South Africa, and was much surprised to note the first publication of his name in connection with the murders."

4. A woman medical student says: "I was in the same section for recitation with H. 1st note, a marked, almost rapt attention to detail in class work, both theoretical and practical; 2d note, very intelligent recitations; 3d note, in spite of the rather attractive physiognomy a personal feeling of repugnance, which I did not understand until his beard was shaved at one time. As I always judge a man by his mouth (as a correcting characteristic feature) I no longer wondered at the instinctive distrust."

5. A classmate who is an alienist, says: "My recollection of him is that he was a quiet, unpretentious individual, not a brilliant student by any means, but rather plodding and perhaps below mediocre, but attentive to lectures and operations. My connection with this institution has been continuous since the day of my graduation, and in the light of the experience I have had in seeing a large number of insane and defective people, I can not now recall anything about H. that would warrant me in saying that he was peculiar, degenerate, defective, or insane, or that he lacked the average mental or moral qualities."

6. "I was quite well acquainted with him. He always stated to me that he was born in England. He seemed always of a sullen disposition, not caring to talk much, a fair student, although not bright, and still he might be stated to be of average intelligence. We attended many lectures together, and occupied seats close to each other. He was not at all popular and seemingly had very few intimate friends, and the talk was that he would not be able to pass his final examinations, as, if I mistake not, he entered on advanced standing. If I mistake not he stated that he was a married man, and complained frequently of lack of funds to complete his studies. He was often the center of comment on account of his quiet, rather sullen disposition, although he was quite talkative to those with whom he took a fancy. I do not presume that he took any particular fancy to the writer, but he frequently asked me for assistance or passed remarks about our work, and acted as if he had either some great trouble or was of a very retiring disposition."

7. "I was well acquainted with him. He and I dissected together on the same cadaver. In college life he seemed rather a recluse, seldom taking any part in the mirth or amusements of the class, and yet it was not because he was overstudious, for he was but mediocre in attainments. He wore his hair cut square across behind, which gave the appearance of a bulging cerebellum. He did not appear defiant. I do not know that he had a single confidante among his classmates. As I recall him now he gave no promise of being an adept at good works or crime. Once in the dissecting room I remember that he appropriated the foot of a child cadaver, taking it away for his own use. He did not seem in good health at any time. His eyes were sunken, complexion pasty, and figure lean."

CONDUCT IN DISSECTING ROOM.

8. "I know of nothing in his character during my acquaintance with him which would mark him as exceptional in any way. I remember he was identified with the Young Men's Christian Association of the university, and took sides with that society in a dispute between the society and one of the professors, and he told me at one

time that after graduation he intended to go to New Zealand as a medical missionary. On the whole, his conduct was such as to breed a sensation of dislike for him among his fellows. He appeared to be a good deal of a sneak, and I know as a matter of fact that he was a liar. He seemed to be fond of the uncanny things of the dissecting room, and told me at the beginning of one spring vacation that he intended to take home the body of an infant for dissection, that Dr. H. had given him one for that purpose. He seemed to derive a good deal of pleasure from the fact. Nevertheless, he was not an industrious worker in the dissecting room."

9. Classmate, president of a State medical society, says: "I saw him daily. His appearance was very ordinary. He was of a meditative, unassuming disposition, willing to talk if approached, but his manner was retiring. He was apparently most inoffensive; we then thought him stupid. In his difficulty with the dressmaker we, boylike, believed poor H. was being sinned against, and selected a law student, now a member of Congress for Idaho, to intercede for him, with the result that the faculty was lenient and H. was 'vindicated.' His bearing so little resembled that of one who sought the company of women that we regarded the incident as a great joke. Even at that time he was given to devising schemes for money making; speculating on projects that might be taken up after graduation. We did not regard them as of doubtful integrity, yet none of them were in line with the profession he was about to be graduated into. We looked upon them as visionary. He had no chums or associates, so far as I knew; always alone, of modest demeanor, and never aggressive. It was a serious struggle with him then for bare existence, and we pitied him without thought of his merit, for he was, as we saw him, a negative character."

10. "He was a fellow to slide along without attracting any attention, and would be soon forgotten. There was an episode in which he acquired some notoriety, and if guilty showed much foresight and caution on his part. The facts are as follows: A young widow was running a boarding house, he being one of the boarders. She obtained a letter to him from his wife; she brought her case before the faculty, claiming that he had promised to marry her, and in evidence produced some letters signed in his name. He denied the charge and produced specimens of his handwriting, including notebooks, etc., which were not in the same hand as the letters produced by her. The evidence was not such that the faculty could convict on, so they let him off. The opinion among the students was that he was the one who wrote the letters."

11. "His life was somewhat in the background. He said in conversing with me that he had been in the life insurance business in New York, New Hampshire, and Chicago. He said he had traveled a great amount. He and his wife did not get along very well. Have seen her with blackened eyes as a result of their quarrels. They roomed only a few doors from where I roomed. His life was somewhat suspicious, and he was supposed to be getting bodies for the anatomical rooms in some mysterious way. He gave me a hint of this in a conversation I had with him. He told me he did not intend to practice medicine, but wanted a medical education to help him in his business. He was only a fair student; was absent from his work often, and many of us thought he would not be able to get through. He paid more attention to anatomy, surgery, and materia medica. To me he was a suspicious person, and I so treated him while we were associated together. I would often question him along the lines of business he had been engaged in and he would invariably turn the conversation into other channels. He told me how he evaded paying the extra fees nonresidents of Michigan had to pay. I was not surprised when I saw in one of the papers a short sketch of his past life which tallied with some of the things he told me."

12. "He passed by the nickname of 'Smegma' among the 'boys' of our class, due doubtless to a peculiar odor. As I remember him he appeared as a simple, harmless individual, and it has been a source of astonishment to me in noting his remarkable career of crime. He was in some 'shady' transactions while at the university. As I now look back at the picture he left on memory's wall, he was an uncouth rustic, simple in speech, rude in manner, with not one prodromic symptom that would enable one to even dream that he would one day stand as a monster of crime."

13. "He had a noticeable aversion to familiarity. During the time spent with Dr. H. he took active interest in Sunday-school work of the Presbyterian Church, of which Dr. H. was a prominent and active member. I remember him as an odd character in the class on account of his seemingly friendless fate, and the manner in which he worked himself into the good graces of Dr. H. About the last thing he told me was he had decided to go as a medical missionary to some foreign country after graduating, and that Dr. H. had acted in his behalf to secure for him all the necessary credentials for the undertaking."

14. "To me he was especially noticeable for his rather delicate and fair facial complexion and rather blue and open eyes. He had a thin mustache curled up at the ends. His habits were decidedly of a secretive nature, and consequently he was never much discussed."

15. "I was quite intimately acquainted with him and can honestly say that he was the last man that I would suspect of doing the deeds of which he was convicted."

16. "He was sickly looking and troubled quite a little with boils. He was peculiar in that he did not seem to care for anyone but himself and paid but little attention to anyone. I thought he was rather repulsive in looks, but never thought him a criminal."

17. "He was a quiet, hard-working student, although in some respects a little peculiar. He was quite often found occupying older students' seats down nearer the lecturer and in consequence was sometimes 'passed up,' as the boys used to say. He was of quite a religious turn of mind and was quite a worker in the Presbyterian Sunday school."

18. "He never made very many friends; never was hail-fellow with anybody. Was always influenced by circumstances, and when once decided upon a point would never yield or acknowledge himself mistaken. During 1884 he wore a mustache, dressed plainly, almost shabbily, and was very little with his class outside of absolute necessity."

19. "I boarded in the same club with him, and though sitting next to him at the table, made very little progress toward an acquaintance, his disposition was such—sullen, I should call it—that one would be repelled rather than attracted."

20. "He was a man who tried hard to keep his identity to himself. He registered from the State of Michigan, when in private conversation he unthoughtedly admitted that he had never been in the State until he entered the university. His college career was not a bright one, as on many occasions he would try to use secret helps during his examinations. He never could carry on a conversation and at the same time look you in the face. When on the street he usually walked with his eyes on the ground."

21. "I remember having heard him referred to on one or two occasions as a 'smart Alec.' It was not generally, if at all, believed by the students at Ann Arbor that he had the necessary nerve to commit murder. As I remember, he was looked upon as a bigot and a fellow of so little consequence that it was not worth one's while to pay any attention to him so long as he kept to himself."

22. "I considered him a quiet, bright, unsophisticated sort of a young man. I saw nothing abnormal or anything to especially attract attention. He seemed rather gloomy at times and not inclined to be intimate with anyone."

23. "He was easily disconcerted on being questioned and never ranked very high in his class, but this might have been caused by him entering upon advanced standing and not taking the first year in the university."

24. "I boarded at the same boarding house as he. After a few months the landlady found that he was cheating her by various methods; each boarder that left, he would report to the landlady that the boarder had not paid him for his board for several weeks, and pocket that amount of money. Also in ordering groceries he would "beat" the lady.

The other students thereby found out that he was dishonest. He appeared to be a sneaking, quiet, unpopular man, other students not associating with him to any extent. I never knew of him drinking. He did not seem to be a "fast" boy, but a mean fellow. As to his scholarship I remember only that Professor V. did not pass him on some branch, and H. was very spiteful against Professor V.—wrote him letters calling him vile names and spoke bitterly against him."

25. He never entered into sports of any kind, seldom laughed, sometimes smiled in a dry half-hearted way—he seemed secretive and afraid of suspicion."

26. "He was looked upon as one who would attempt to attain favor with the faculty by spying among the students."

27. "I was well acquainted with him. I have read everything about him since he was arrested, and I know he tells the truth in some of his confessions."

Letter from one who lived in the "Castle:" "February 2, 1889, I moved into a room in the "Castle" and remained there till December 3, 1889. He was always quick and active. If you had seen him in drug store in Englewood you would have thought him the busiest man you ever saw. Was considered the best druggist and chemist that ever came here, and his store was always filled with customers. Nearly everyone who knew him here does not believe he killed anyone; think him too big a coward. He was one of the biggest swindlers they ever knew, but when he hired a man to do any work he always paid him what he asked without a word, but if he made a bargain with anyone that could afford to lose without breaking him up he would beat him almost every time. The iron columns in front of his building are an example. He never paid a cent for them, and beat them in three courts. His gas business and using the city water for two years and making them believe it was artesian water were other instances. Bringing the city gas through a tank of water, he put stuff in the water to color the flame until the gas inspectors declared that it was not theirs."

Letter from a prison chum: "It is very little information that I can give you regarding H. I met him for the first time in the jail and was only with him for

some three or four weeks while he remained in jail in St. Louis. I suppose that it was owing to the reputation that had been forced upon me that caused him to approach me and seek my acquaintance. I was then expecting to soon recover my liberty, and he stated that he intended soon to make a trip to Germany and wanted me to accompany him. I am now convinced that he would sooner or later have murdered me had I been able to have accompanied him on his intended trip abroad. I know nothing about him but what he told me of some of his former exploits before I met him. Of course you know that he told me all about the scheme to rob the insurance company, and that it was for introducing him to a lawyer who could be trusted to be allowed to know that the scheme to rob the insurance company was a fraud, etc., that I was to have $500 to enable me to fight my case or secure my liberty."

Letter from Mrs. P.'s father: "I beg to be allowed to reply that Mrs. P. is not at all in a condition to give such information even if she had it to give. It would be cruel to ask it of her. She is badly used up by the fearful ordeal she has gone through. The treatment received at the hands of officers and officials under the mistaken idea that she was a bad woman and desperate criminal, added to the horrid work of H. with herself and family, is surely enough to drive almost any woman to death or distraction. Her personal acquaintance with H. was not sufficient to give her a very concise opinion of his peculiar traits or points of character. She saw him but a few times before he murdered her husband, and only a few times after, while at St. Louis, during the time he and his associates were robbing her of the insurance money. During the time she was being dragged about the country under the promise and delusion that she would see her husband and children, she only saw the wretch occasionally, and only for a short time. He never, to her knowledge, rode on the same rain or put up at the same house or hotel where she was stopping. During this time Mrs. P. was under great mental strain. The children were confiding in him because P. had made them to understand and believe that he (H.) would be good to them. He allured P. to his death, and at the same time made him betray his family into his bloody hands. P. loved his family, and would have fought for them had he thought anyone was going to impose upon or injure them. H. could show much kindness and be very sympathetic, but always, as it would seem, for the purpose of helping to carry out his murderous schemes. If his instructions to his victims in any matter were not carried out, he was quick to resent it and free to reprimand. He was 'boss' as well as executor."

CONDUCT BEFORE EXECUTION.

H. made a long confession of many brutal murders, which he subsequently admitted to be false. The purpose of this was said to be to pay his debts.

Just before his execution H. desired his counsel to walk to the gallows and remain there with him. No one desired it, but it was done because he threatened to make a scene. His statement upon the scaffold was as follows:

"Gentlemen, I have very few words to say; in fact, I would make no statement at this time except that by not speaking I would appear to acquiesce in my execution. I only want to say that the extent of my wrongdoing in taking human life consisted in the death of two women, they having died at my hand as the result of criminal operations. I wish to also state, however, so that there will be no misunderstanding hereafter, I am not guilty of taking the lives of any of the P. family, the three children or father, B. F. P., of whose death I am now convicted, and for which I am to-day to be hanged. That is all."

H. was self-possessed to the last, even suggesting to the superintendent not to hurry or to make any mistake.

PURPOSE OF CRIMINOLOGICAL STUDY.

The purpose of such study is to seek out the causes and conditions that lead to crime, on the general principle that the amelioration or prevention of evil doing can not be accomplished by rational methods until we know more definitely the causes, whether they lie more in the individual or more in the surroundings. As far as investigation of criminals has gone the indications are that the cause of most crime lies in the surroundings rather than in the criminal, and this is a most hopeful result of such study, because it is possible to change the surroundings but very difficult to change the nature of an individual. The study of a single criminal in the most thorough manner possible is important from the fact that he represents generally a large number in his type, and in this way a clear insight is gained into the definite nature of those characteristics and special surroundings which lead through their combination into evil doing.

The thorough study of a criminal illustrates the method by which every human being should be studied. There can be no scientific sociology in the rigid sense of that term until a thorough study is made of individuals in society.

CHAPTER XV.

PSYCHOLOGICAL, CRIMINOLOGICAL, AND DEMOGRAPHICAL CONGRESSES IN EUROPE.[1]

It is of great advantage to the cause of knowledge that specialists in similar fields of work, but of different nationalities, should meet from time to time and describe, compare, and discuss the results of their most recent investigations. It may be mentioned incidentally that a practical advantage in such congresses comes from the fact that the members have more time for conversation and exchange of ideas than at their own homes; thus in a private conversation with a specialist one often gains a better insight into a subject than by reading a treatise on it.

Psychology, in the experimental sense, is a comparatively new study. Criminology and demography are of more recent date, and indicate that growing interest in the study of man himself which is one of the newest directions that science is taking.

THE STUDY OF HUMAN BEINGS.

The scientific study of human beings as they exist in present civilized life is, curious to say, a new one. There is less definite knowledge of modern man than of uncivilized man, because the latter has been studied more carefully. For a similar reason we have more knowledge of rocks and animals than of man, and although we have made sciences of the two former, a science of human beings hardly exists.

Investigations of civilized man are being undertaken in all countries of the world, but it is on the abnormal side, as recent works in demography and criminology show. But since a large majority of the abnormal are so the more by occasion or conditions than through heredity or character, whatever is found true of them is in a great measure probably true of men in general.

As the three recent congresses represent three typical forms of investigating modern civilized man, it may not be inopportune to describe some new instruments and methods used in this Bureau to carry on still further these lines of inquiry with special reference to education. It is here that social pathology and education stand in the most intimate relation.[2] As education concerns the moral, mental, and physical development of individual and society, it is a method of amelioration or prevention of those pathological elements that tend to social degeneration. The instruments used in the study of patho-social man will apply as well to normal man; thus the writer has employed some of them in the study of school children.

The instrumental investigation of man is simply a more precise method of study.

Some of the instruments were specially constructed for the Bureau. They may be divided under four heads:

1. Anthropometrical, measuring the osseous and muscular system.
2. Psycho-neural, measuring the nerves in connection with the mental state.
3. Emotional, indicating the degrees of emotion through movements of the thoracic muscles and increase of flow of arterial blood in the arm.
4. Hypnotic, measuring the degree of suggestibility, or aiding the operator to produce the hypnotic state.

The scientific study of man with such instruments is not only of use in medicine, but can be pursued in society at large in discriminating quantitatively the difference between individuals in their muscular, nervous, or emotional systems.

---

[1] Prepared by Arthur MacDonald, specialist in the Bureau of Education.

[2] See article, "Social Pathology and Education," in Annual Report of Bureau for 1889–90, pp. 573–590.

We do not know what should be considered a normal man especially in regard to the nervous system; what degree of acuteness or obtuseness to taste, smell, heat, pain, electrical sensibility, hypnotic suggestibility can be considered normal, and what degree (within certain limits) abnormal.

These questions are perhaps more important in the study of school children, for any defects or abnormalities may be corrected before they have taken deep root, hindering and dwarfing the development of the child. The special mental, moral, or physical habits that should be emphasized in the care of this or that child would be indicated. If a school boy be cruel toward his playmate, is it because he thinks the same blow would not hurt himself, owing to the obtuseness or coarseness of his nervous system? Is a pupil who is continually reprimanded inherently defective or weak nervously? Such children are often discouraged unnecessarily. The teacher may be ignorant of their true condition. Some dull in early life develop subsequently. Precociousness in children can not be said to be a good sign. Or, again, has the child a very delicate and refined nervous system that is inhibited or paralyzed in its action by severe words or physical punishment? What is the difference between slum children and children of the well-to-do? If there is no essential difference it would be desirable to know it. Should such children have special training? Vital questions of this nature can be determined with instruments of precision. In general it may be said that if mental and moral training of children is not more thoroughly considered we can not expect some of the evils that are menacing society to lessen. All evils of society may be included under social pathology, which treats of these individuals who, from mental, moral, or physical defects, are injurious to society.[1] In the criminological and demographical congresses man is considered rather in his abnormal conditions; in the psychological congress he is studied more generally. Instruments of precision are applicable for investigation of both the normal and abnormal, and furnish the most definite means yet known of distinguishing between the two.

In giving an account of the congresses, the writer is making a special report, as he was sent as a delegate to represent the Bureau.

The International Congress of Experimental Psychology, Held in London.

One of the distinguishing features of the late International Congress for Psychology is the prominent part that physiological investigations assumed. This may be taken as an indication of the prevalent tendency to study the objective rather than the subjective side of consciousness. Yet not a few of the members read papers which gave the results of an empirical study of subjective reality. The subject of hypnotism and allied states was also one of great interest to all.

Some of the most important questions considered were in the domain of the physiology of the brain, about which comparatively little is known. The statement has often been made that the frontal convolutions are the seat of the intellect as distinguished from the will and desire. This was based upon comparison in the development of this region in man and the lower animals, upon results of accident or disease in man and experiments upon monkeys by Ferrier, Horsley, and Schäfer, and upon dogs by Hitzig and Goltz. For the reason that antiseptic precautions were not taken in either Ferrier's earlier experiments or Goltz's or Hitzig's, it is not certain but that the results obtained may have been due to an extension of the effects of the injury. Professor Schäfer thought it worth while to repeat these experiments upon the prefrontal region by a mode of operation that entirely avoided the shock following from a bilateral removal of a more or less extensive part of the brain. He said that he had often noticed in operating upon the brain that extensive bilateral lesions are liable to be followed by apathy and apparent idiocy, whether the operations were in the frontal or in other regions, more in fact in the temporal than in the frontal region. He thinks it is very probable, therefore, that (1) the question of shock and (2) that of considerable loss of brain substance and removal of support from the rest of the brain (thus impairing the cerebral functions generally) may modify the result. For these reasons Professor Schäfer has recently operated, not by actually removing the portions of the brain, but by severing their connections with the rest of the mantle and with the brain stem. This can be effected with scarcely any hemorrhage and with no perceptible shock. In several instances in which Professor Schäfer has thus severed the prefontal lobes in monkeys there was an entire want of appreciable symptoms. In no case did the animals show the dullness and apathy previously noticed, but they appeared as bright and intelligent after recovering from the effects of the anæsthetic as before the operation. These experiments, therefore, do not support the view that the prefontal lobes are especially the seat of intelligent attention.

In this connection it will be interesting to note Professor Horsley's demonstration of localization of functions in the monkey's brain, which was given before a number

[1] See Abnormal Man, pp. 7-9; published by the Bureau, 1893.

of specialists and psycho-physicists. The monkey was put under the influence of an anæsthetic and quite a portion of the cranium removed. By electric stimulation Professor Horsley demonstrated clearly the fact of localization; he was able to predict before applying the electrodes what movements would take place, as in the arm, fingers, and face. The experiment was very satisfactory to the witnesses, although Professor Horsley did not think it had succeeded as well as in many former cases when he had performed it before his classes. These now well-known localized areas in the brain of monkeys have been found also by Horsley and Schäfer in the anthropoid ape, which is still nearer man. But the proof has been made complete in a demonstration upon human beings by Professor Horsley. It was in the case of two epileptics in whom an operation was necessary. As far as the operation permitted, it was found that the same localization of functions existed in man. It is well to note that the success of experiments upon animals is often due to developed operative skill, as is obtained in surgery. The writer has witnessed many operations of this nature by well-known specialists, but has never seen it so neatly done as by Professor Horsley. Professor Horsley was also very careful to see that the animal felt no pain throughout the whole operation. One is reminded of Professor Munk's experiments on the dog at Berlin, which attracted great attention at the time. Both Munk and Horsley are surgeons.

Professor Munk recently showed the writer a monkey from which he had removed the frontal lobes on one side. He had not been able to discover any effect on the monkey's intelligence. The monkey was as bright as ever.

It is true that if one single function is localized brain localization is established, but this a priori method is being made less and less necessary by experimentation. It would seem from these and other investigations that the intellectual function is diffused over the whole brain. This is strengthened by purely psychological considerations from the directing power of the reasoning faculty over the psychical functions in general. It would seem probable that by more exact methods and skillful operations general localized areas will be established throughout the brain, but that these areas can be absolutely defined is quite improbable; first, because they seem gradually to overreach one area into the other; and, second, the brain is a vicarious organ and the extent of this characteristic will be difficult to determine. But when one thinks of the complexity of the finer anatomy of the brain, not to mention its histophysiology and chemism, the vastness of the field of investigation is evident, yet these positive results in the coarser anatomy and physiology are an initial starting point of the highest importance and may lead, in the future, to things as yet unthought of.

A recent experiment illustrating kinæsthesis was described by Dr. Ransom. It was a case of epilepsy where the convulsions began by tingling and spasm in the left hand. The following permanent abnormal conditions resulted in this hand: (1) Slight tactile anæsthesia, (2) diminution of muscular sense, (3) diminution of motor power. The operation showed a cyst compressing the cortical center for the left hand. After recovery from the operation, this area was faradized by electrodes inserted through the scalp without an anæsthetic. From this resulted, (1) contraction of groups of muscles in arm and hand by moderate current, (2) production of sensation with a weaker current, contraction added when current was strengthened, (3) improvement of muscular sense during and after stimulation, (4) weakening of voluntary motor power after a strongly induced contraction.

Dr. H. Donaldson, in his observations on the anatomy of the brain of Laura Bridgman, found the following peculiarities: Depression of the motor speech center, a slenderness of the first temporal gyrus on both sides and a blunting of both occipital poles with a special disturbance of the fissures in the right cuneus, poor development of temporal lobes, the cranial nerves connected with the defective sense organs were slender, the left optic nerve being the one most affected. The extent of cortex was normal, but unduly thin all over. This thinness, however, was most marked in the areas for the defective senses, due in part at least to the smallness of the cortical cells there present. In general, the case represents a maximum peripheral disturbance in the sensory cranial nerves, associated with only such central lesions as followed from lack of exercise and growth.

In his investigations of the muscular sense in the blind, Dr. Goldscheider found a developed sense of touch in the hand and finger joints, and the cause of this was psychical, consisting in a sharpening of the attention and in practice. The sense of location in the skin is small in the blind. In order to recognize forms by touch the sensation of motion is of greater importance than the sensibility of the skin. Children, whether blind or not, possess a finer sensibility for passive motion than adults.

An interesting paper was that on "A law of perception," by Professor Lange, of Odessa. The process of every perception consists in a rapid change of a whole series of psychical moments or steps, in which every preceding step presents a less concrete and more general condition, and every following step a more concrete and differentiated psychical condition. There are four principal steps or stages in this process of

perception, (1) the simple shock without quality, (2) the consciousness of general modality in the sensibility, (3) consciousness of its specific quality, and (4) consciousness of its spacial form.

The steps or stages of our perception correspond to the development of perception in general biological evolution. The so-called muscular reaction consists in a reaction in consciousness upon a simple and undifferentiated shock. The muscular or the innervation effort is not essential to the muscular reaction. The so-called sensorial reaction is not a determinate act, but the reaction upon one of the following steps of perception. The relation between subject and predicate in an act of judgment is a particular case of the law of perception. The consciousness of difference has no ground in the sense of time. The so-called time of choosing shows no element of will.

Mrs. C. L. Franklin, after explaining the difficulties of the Hering or the Young-Helmholtz theories of light sensations, proposed the following new theory: In its earliest stage of development, vision consisted of nothing but a sensation of gray (using the word gray to cover the whole series—black, gray, white). This sensation of gray was brought about by the action upon the nerve ends of a certain chemical substance, set free in the retina under the influence of light. In the development of the visual sense the molecule to be decomposed became so differentiated as to lose only a part of its exciting substance at once; these chemical constituents of the exciter of the gray sensation can therefore be present separately and cause the sensation of red, green, and blue. A recombination of these substances produces the gray sensation; the mixing of these three colors gives a sensation of no color at all, but only gray. The theory is that of a differentiated color molecule.

Prof. Pierre Janet gave a somewhat extensive description of a disease which he designates as a new form of psychological disaggregation—a mental disease consisting in the weakening of the power of synthesis, which permits during each moment to attach new psychological phenomena to the personality, which are reproduced in the mind. This disease has different forms, according as the incapacity for synthesis affects the sensations, movements, or souvenirs.

Professor Liégeois, of Nancy, showed it to be quite probable that a woman, who had been condemned to twenty years of hard labor for attempting to poison her husband, was suggestible and hypnotizable to a high degree; that she had received suggestions from a doctor, her lover, to poison her husband in order to be able to marry the doctor; that her moral liberty was greatly diminished if not abolished. Professor Liégeois commended such cases to magistrates, judges, physicians, and juries, so that incompetence and contradictions and excessive severity may be prevented.

Dr. Liébeault and Professor Liégeois described a case of monomaniacal suicide, which was cured by suggestion during hypnotic sleep. It was a woman who had had tendencies to suicide for eleven months.

Dr. Bérillon, editor of the Revue de l'Hypnotisme, spoke on the applications of hypnotic suggestion to education. From an experience of attempting hypnotism with some 250 children of both sexes, he deduced these conclusions: In 10 children from 6 to 15, of different classes of society, 8 could be put into profound sleep after the first or second seance. Contrary to the general opinion, the difficulties of causing profound sleep were greater in proportion as the child presented neuropathic hereditary defects. Healthy children with good antecedents were generally very suggestible, and consequently hypnotizable; they are very sensitive to imitation. While their sleep has the appearance of normal sleep, yet it is easy to obtain amnesia on awakening, negative hallucinations, suggested dreams, and automatic accomplishment of suggested acts. This sensibility to suggestion and hypnotism has been utilized in treating cases which concern pedagogics as much as medicine; such are those with nervous insomnia, nocturnal terrors, somnambulism, kleptomania, onanism, incontinence of urine, inveterate laziness, filthiness, and moral perversity. These facts have been verified by a large number of authors; they belong to practical psychology. Suggestion constitutes a process of investigation which permits us to submit to a rigorous analysis the different intellectual faculties of children, and thus to aid pedagogics by the experimental method.

Mr. F. W. H. Myers, in a paper on "The experimental induction of hallucinations," considers it a drawback to experimental as compared with introspective psychology that we are liable to lose in profundity what we gain in precision; new experiments are required if the operations of the subconscious strata of our intelligence are to be reached; such operations tend to be manifested spontâneously in forms of active and passive automatism, such as automatic writing and visual or auditory hallucinations. As to the extent to which these phenomena can be reproduced experimentally, hypnotism is at present the principal means. A form of hallucination which is harmless and easily controlled is "crystal vision," that is, the induction of hallucinatory images by looking steadily into a crystal or other clear depth or at a polished surface. In this way the crystal helps the externalization of those images, sometimes by scattered reflections which suggest points de repère or by partially

hypnotizing the gazer. But a crystal vision may sometimes pass insensibly into the summoning up of externalized images, or quasi-percepts, with no definite nidus or background. Such images, or percepts, may depend upon a perceptivity antecedent to sensory specialization and of wider scope.

In speaking of experiments in thought transference, Mrs. Sidgwick considered the hypnotic state as favorable in such inquiries. By thought transference is meant the communication of ideas from one person whom we call the agent to another called the percipient, independent of the recognized channels of sense. Mrs. Sidgwick conducted her experiments in conjunction with Professor Sidgwick and others. The successful percipients were seven in number, and were generally hypnotized. It was possible to transfer numbers, mental pictures—that is, mental pictures in the agent's mind—and induced hallucinations given by verbal suggestion to one hypnotic subject and transferred by him to another. There were failures, but the proportion of successes was sufficient to show that the result was not due to chance. One percipient succeeded in experiments with numbers, when separated from the agent by a closed door and at a distance of about seventeen feet. Sometimes the ideas reached the percipient as visual impressions received with closed eyes, sometimes as hallucinations on a card or paper, or by automatic writing, or by table tilting.

It is not known how to produce results at will; only certain persons seem capable of acting as agents or percipients, and these persons succeed at one time and fail another, varying at different times in the same day; the reason for this is as yet unknown.

In the nerve centers of flying in certain insects, Alfred Binet showed that the dorsal root is motor and the ventral root is sensitive.

Professor Preyer, of Berlin, read a paper on the origin of number. All concepts can arise through the senses only. No concept (even the concept of number) through heredity alone, without individual sense impressions, can take place. But the child, like many animals, can value things and numbers without knowledge of numbers; it feels the numbers, not by means of touch or sight, but through hearing. The series of positive whole numbers did not arise originally through addition of 1 to 1; such a hypothesis presupposes a knowledge of a number, namely of 2, and a method of adding. Numbers are acquired in a normal way through hearing and comparison of tones, but later through touch and sight.

As to the effect of natural selection on the development of music, Dr. Wallaschek said that primitive music is not an abstract art, but, taken in connection with dance and pantomime, is bound up with the necessities of primitive tribal life—that is, in war and hunting, for which these dances seem to prepare—and, further, that it helps the tribe to maintain its strength and skill during times of peace. These dances are of a social nature, being performed by the whole tribe with great exactness, due to the influence of rhythm, of which primitive music chiefly consists. This tie of music enables the community to act as one body, holding the community together. Tribes accustomed to play at war and hunting associate more easily, act better in case of need, and so are better prepared for life. The musical faculty is thus developed and trained for this purpose.

Dr. Witmer presented a contribution to experimental æsthetic, taking up "the æsthetical value of the mathematical proportions of simple figures." No measurements of the proportions of the human form, as found in nature or in art, nor in beautiful specimens of architecture, will demonstrate the æsthetic value of the mathematical relations of their parts; for we never can be sure that their æsthetic value does not rest upon an associative or other factor rather than upon the direct mathematical proportions; and the freedom in the choice of parts to be measured must throw considerable doubt upon the results of all measurements. Such attempts have proved no more than a limited æsthetic value of the proportion 1:1, while for the various other simple mathematical relations nothing decisive has been shown. A better method than Zeising's or Fechner's affords a choice not limited to a set of arbitrary proportions, but opens to a series of figures whose mathematical proportions vary in a constant ratio between the proportion of 1:1 and $1:x$ (x being any desired large number). This method permits of an easy observation of the relative increase or decrease in the æsthetic feeling attaching to the regularly increasing proportions. For all groups of figures and for all positions of the figure there are but two pleasing proportions: The ratio 1:1, or perfect symmetry, and a ratio which lies between 2:3 and 1:2, the most pleasing proportion. The proportion 1:1 is æsthetically so far from all other proportions that a comparison between it and any other proportion on the same terms as between the other proportions among themselves is impossible. The most pleasing æsthetic proportion subsumes itself under æsthetic contrast; the æsthetic value does not lie in a pleasing and complex equality of the relations of the parts of a figure, but in pleasing difference of parts. The proportion is therefore not clearly discoverable in complex designs and objects, as the demand for the best contrast of parts may easily give way to other considerations.

Dr. Alexander Bain's paper was entitled "The respective spheres and mutual

helps of introspection and psycho-physical experiment in psychology;" the recognized sources of our knowledge of mind are first and foremost introspection with the aids of outward signs, to which succeed the study of infancy, of abnormal and exceptional minds, and of the lower animals; also the workings of society collectively; next physiology, and last psycho-physical experiments. The metaphysical problem of knowing and being, and that of the tracing of the origins of our mental furniture have hitherto been the leading ones where introspection has been mainly employed. Neither of these are utile in the ordinary sense. Introspection takes the lead in qualitative analysis of mental facts; the next consideration is quantitative analysis, or the mensuration of psychological quantities. Here psycho-physics can render important service. The following is a list of researches where both methods concur: (1) The economy of muscular mechanism, (2) the fundamental laws of the intellect, more especially as regards memory acquisitions, (3) the fluctuation of our ideas in consciousness, (4) the conditions of permanent association as against "cram;" (5) plurality of simultaneous impressions in all the senses, (6) the fixed idea, (7) similarity in diversity. In all these, experiment can come in aid of introspection, but can not supersede it without loss and failure.

Prof. Theodore Ribot's paper concerning concepts had for its object an inquiry as to the immediate state of mind at the instant a concept is thought, to determine whether this state differs in individuals. One hundred persons of every class and degree of culture were interrogated by announcing to them abstract terms (not letting them know the purpose beforehand) and noting the immediate state of consciouness which these terms evoked. The results were: 1. With the majority a general term awakened a concrete idea or representation, ordinarily a visual image, rarely a muscular image. 2. Many saw the word as printed, purely and simply, without any concrete representation. 3. Others (fewer in number) had only the word in the mind as heard, perhaps with motor images of articulation but without concrete image; without vision of the printed word. 4. The highest concepts, such as cause, relation, infinite, etc., did not give rise to any representation whatever in the case of the majority. Even those persons belonging to the pure concrete type declared they had nothing in their mind. There are, therefore, certain concepts to to which an unconscious state corresponds. Hoping to penetrate into the nature of this unconscious state, Dr. Wizel continued the investigations on certain hysterical cases at Salpêtrière; they were interrogated first in the hynotic state, then when awake, thus permitting a comparison of responses. The results were more numerous and explicit in the hypnotic state than in the normal.

In speaking of the future of psychology, Richet said that psychology is one of the elements of physiology, and the most obscure. The first question is to know the connection which unites mind and body. At present we know nothing about it. An idea, a reasoning, a passion, are phenomena which do not seem to have the power of being reduced to a material phenomenon. It is certain, however, that there is a connection; without brain, or rather without nerve cell, there is no intelligence. The first problem of psychology is therefore a most complete physiology of the brain; relations of ideation with cerebral circulation, with chemical changes in nerve cells, with electric phenomena; localization of psychical acts in this or that part of the brain; in other words, a physiological résume of the brain. We must recognize that brain physiology is little developed compared with the physiology of the heart or muscles. Physiology, properly speaking, is a study of sensations, relations of sensation with peripheral excitation, differential perceptive sensibility—the threshold of excitation; these are investigations more difficult to pursue than the general physiology of the nerve cell.

Comparative psychology treats of the relations of man with other beings, and with the insane and criminal, from the intellectual point of view. One can not admit that the human soul is stationary; it evolves, and therefore can be perfected through a sort of natural selection. The data for this problem are wanting, yet the future of humanity depends upon it. In transcendental psychology we have numerous data (often or almost always imperfect), which permit us to suppose that human intelligence has extraordinary resources and forces of which we have no conception. Richet says that the future psychology will give us the key to clairvoyance and presentiments. If it should be proved that these are all illusions, a service would be rendered; sooner or later we will be able to say whether transcendental psychology is a reality or an illusion.

Since in modern psychology physiological investigations have assumed so prominent a part, and as this is so well illustrated in this congress, it may not be out of place to make a few remarks on the need of physiology and anatomy in psychological training.

Training in Physiological Psychology.

Physiological psychology is no misnomer for modern psychology, because it is as much if not more physiological than psychological. That, consequently, a somewhat extensive knowledge of physiology is a sine qua non for the thoroughly trained modern

psychologist goes without saying; and this is as true whether there be sympathy or not with the modern view, for in the latter case the psychologist can hardly avoid discussing some of the results of physiology; and such discussions, to be trustworthy and valuable, must be based upon knowledge. And here is not meant mere book knowledge, but experimental knowledge gained in the physiological laboratory; otherwise when one speaks of sensations, reflex action, afferent and efferent nerves, etc., it is difficult to understand how he can have any adequate insight into the objective reality of these phenomena. It is not intended that any large amount of time be required for purely physiological laboratory work. A term's course, say of six hours a week, might be the minimum. In this case it is assumed that the student has a general knowledge of human and comparative physiology.

If the above requirements are necessary for one who proposes to study physio-psychological questions, it may be inquired further as to anatomical knowledge. That a proper conception of physiology is not possible without anatomy is so obvious as to be commonplace, and yet there are some who are serious students of physiological psychology who have no practical knowledge of anatomy. A general dissection of the body and special dissection of the sense organs and brain, while it would require more time than the physiological course, would be well worth the extra trouble, since it is preliminary foundation work, and is also necessary for the investigation of pathological clinical cases, some of which are of the highest importance for the physiological psychologist. For this and other reasons an elementary course in practical histology is necessary. Thus it is not clear how any student without practical knowledge of coarser and finer anatomy can study and discuss intelligently questions concerning cerebral localization, cranial and spinal nerves, spinal column, medulla oblongata, etc.

It may be objected that many of the facts learned in such a course of study would not be of direct utility, but this could be urged against almost any course of study. The value of such negative knowledge consists in serving as a sort of ballast in aiding the student in avoiding mistakes.

It may be said that if practical courses in anatomy and histology are requisites, why not also similar courses in pathology and psychiatry. It is true that these would be valuable; but there must be a limit. Perhaps the student could take up individual pathological cases as they came in the course of his work, provided he has the physiological and anatomical knowledge of normal man before mentioned. It is assumed that the specialist in physiological psychology will read the writings of specialists in physiology, anatomy, and pathology when they treat of topics that bear directly on his own studies. To read such literature, appreciate the points of discussion, and make decisions as to weight of evidence, requires at least a practical elementary knowledge of the subjects.

But it may be objected that, with accurate book learning and good diagrams, one can gain sufficient insight without going to the trouble of taking the practical courses. This objection is more real practically than rationally, for many do not care for vivisection, and much less dissection. It is a well-known difficulty, common to medical schools, to obtain faithfulness in dissection. There seems to be a natural disinclination, not of the nature of dread or disgust that may appear on first entering the dissecting room, but quite another feeling, that is easier experienced than described. The physiological psychologist who has no medical training is very liable to have a strong disinclination to practical work in anatomy, even if he believes in its utility and necessity. Then there is sometimes the feeling that it is so much easier and saves time to sit quietly in one's own room and study the books and diagrams.

It may be said that some good workers in physiological psychology have never had this preliminary training, but this is rather in spite of such training. As is well known, many students of philosophy, having become dissatisfied with its methods and results, have turned their attention to experimental psychology, and have neither time nor opportunity to return to preliminary work, which they could have done had they known beforehand the subsequent direction of their studies.

The fact that the majority of leaders in the department of physiological psychology were previously physicians or students of medicine indicates the direction which the training in physiological psychology should take.

Third Session of the International Congress for Criminal Anthropology, held at Brussels.

The distinctive feature of the third session of the International Congress for criminal anthropology is the prominent part that jurists and lawyers took in its debates and deliberations. This alliance of the legal with the scientific is an opportune one, for it brings into prominence the practical application of the results of criminological studies. The congress for criminal anthropology should be sharply distinguished from the international congress for prison and penitentiary systems. The former consists almost entirely of university professors, jurists, and scientific

specialists; the latter of prison wardens and others who have had to do with the practical side of the prevention or repression of crime. This division of labor in the common contest against crime, for the benefit of the state and humanity, is logical as well as practical, for it enables both to accomplish the work better. To say which congress is of the greater importance to society would not only be hazardous, but impossible. Certain it is that both are of the highest significance. The programme of the congress for criminal anthropology, or, in a word, criminology, was divided under a few heads: first, criminology in general, then more especially the psychology and psychopathology of criminals entering into morbid or diseased conditions. The division under criminal sociology points to the political and economical side of crime. Under the head of legal and administrative applications of criminology came considerations that form the link between the two congresses.

To obtain a general idea of the congress, we shall enter at once into the deliberations and conclusions of its members.

Dimitri Drill, publicist at Moscow, in his report as to the fundamental principles of criminal anthropology or criminology, traced the origin of the school to Gall, its grandfather, and to Lombroso, the father and founder. In speaking of the Italian school, he acknowledged the great merits of Lombroso, but could not follow him in all his opinions. His résumé of the principles and tendencies of the school of criminal anthropology is as follows:

(1) Criminology renounces entirely the law of retaliation as end, principle, or basis of all judicial punishment. The basis and purpose of punishment is the necessity of protecting society against the sad consequences of crime, either by moral reclamation of the criminal or by his separation from society. Punishment is not to satisfy vengeance.

(2) In criminology it is not sufficient to study the fact of crime. The criminal himself must be considered. It becomes necessary to define the causes which produce crime, to study the sphere of action of the criminal, as well as measures for the safety of society against his acts. Criminology does not study the criminal in the abstract and speculate over his guilt or responsibility, but it analyzes him according to results purely scientific, and with the aid of exact methods which apply equally to the investigation of other phenomena.

(3) In crime, the results of two factors are seen reciprocally reacting: first, the individual peculiarities from the nature of the criminal or his psycho-physical organization; then the peculiarities of external influences, as climate, nature of country, and social surroundings.

(4) Relying upon exact results, criminology reveals the criminal as an organization more or less unfortunate, vicious, impoverished, ill-balanced, defective, and so not adapted to struggle with surrounding conditions, and consequently incapable of maintaining this struggle in legally established ways. This defect of adaptation, for the majority, is not absolute, but varies with the conditions.

(5) The causes of crime fall into three categories: (*a*) immediate, which arise from the character of the criminal; (*b*) more remote, which are hidden in his unfavorable surroundings, under the influence of which organic peculiarities are developed into more or less constant criminal agents; (*c*) predisposing causes which push these ill-proportioned and viciously developed organizations toward crime.

(6) Thus basing crime upon scientific grounds, criminology has as its purpose a fundamental study of the actual criminal and his crimes as ordinary phenomena, which it must investigate throughout their whole extent, from their genesis to their full growth and final development. Thus the phenomenon of crime is united with great social questions.

(7) Based upon these principles, criminology logically recognizes an absence of good sense in repressive measures determined in advance as to their duration and specific character. Criminology, on the contrary, affirms the necessity of studying individual peculiarities before rendering decisions in advance. The term of punishment should endure so long as the causes exist which necessitate it. It should cease as soon as the causes do.

Manouvrier, who is professor in the anthropological school at Paris, and the well-known opponent of Lombroso's criminal type, in his paper on the comparative study of criminals and normal men, did not find any real distinctive differences except in surrounding conditions, which modify the associations or combinations of habitudes and correlatively the anatomical conformation.

Dr. Lacassagne, professor at Lyons, in dicussing the primordial sentiments of criminals, distinguished three classes: The frontals (intellectual), the parietals or impulsive class, and the occipitals or the emotional class; the brain is an agglomeration of instincts which at a given moment can have a special function, and it is the preponderance of one of these instincts which can control the whole situation; this explains the want of reflection and of prudence in criminals; cerebral equilibrium, on the contrary, indicates virtue. The occipital instincts are in close relation with

the viscera, and so with nutrition; hence the importance of these as social factors. This indicates that in the future it may be necessary to found the theory of criminality upon cerebral function.

One of the most important papers in the congress was that on "morbid criminal possession" by Dr. Magnan, physician and superintendent of the Ste. Anne Insane Asylum, at Paris. Such a morbid possession consists generally of an idea isolated and independent of the ordinary course of thought. It is a mode of activity in the brain, in which a word or image imposes itself upon the mind, apart from the volition. In the normal state, this idea of possession gives no special uneasiness, but in abnormal persons it can produce a painful agony and become irresistible. In the normal state the possession is transitory and generally easy to repress, and does not involve the other intellectual operations. But in an abnormal or diseased subject the individual can be irresistibly pushed to acts which he consciously disapproves of. Owing to a want of knowledge of such states, judicial and medical errors have not been infrequent. Thus, a person pushed by the irresistible idea to murder (generally a cherished friend), although horrified by the thought, commits the act. One of Magnan's patients, when having a premonition of the impulsion coming on, would shut herself up in a room until relieved.

A not uncommon possession is that exemplified in the case of a merchant 40 years of age, who during a short stay in Paris entered a restaurant and on taking up a journal read the following incident: "A young lady walking by the side of her father slipped and fell down, but without serious accident." The merchant knew neither the young lady nor her father. On returning home these different facts came to his mind, but one detail was missing—the name of the young lady; he tried to sleep, but in vain; he was possessed with the idea to search for this name; his anxiety increased; he awakens his wife, who sees him pale, anxious, and with perspiration upon his forehead. He recounts the story; he recognizes the absurdity of his worry; yet he weeps and runs round the room moaning and constantly repeating, "What is her name?" He passes the night in this desolation, and early in the morning runs to the restaurant, finds the same newspaper, and reads the diverse facts again with the young lady's name; he rereads the name, repeating it aloud; this calms him and his appetite is satisfied. Thus it is with the kleptomaniac, the pyromaniac, and those with morbid sexual possessions.

According to Dr. Ladame, professor at Geneva, an individual possessed with the idea of murder belongs to the group of hereditary mental degenerates; such individuals are rare. If it be admitted that this morbid possession is frequent, on the other hand, it rarely pushes to homicide, but is turned toward the individual himself, resulting in suicide. Dr. Ladame maintains that heredity is the main predisposing cause, but an occasional cause is also necessary, and this is principally in the publication of details in great crimes. An acquired predisposition is due to alcoholism. It is necessary to distinguish between insane murderers and those pushed to murder by morbid possessions. The latter belongs to the large category of those affected by hereditary insanity, as dipsomania, kleptomania, etc. The possession of the idea of murder is sporadic, but is more frequently found under the form of a moral epidemic, resulting from the widespread knowledge of great crimes and from capital executions.

No question stirred up more discussion than criminal suggestion. While distinguished men were frankly agnostic as to each one's conclusions, yet it may be said that those who have made the most experiments on both normal and abnormal subjects are convinced that criminal suggestion and hypnotism can be produced experimentally, and actually do occur in society.

Dr. Voisin, physician at La Salpêtrière, who is especially qualified to speak in regard to hypnotism, especially as to its therapeutical value, maintained that criminal suggestibility in the waking or hypnotic state is intimately connected with debility or mental degeneracy of the individual to whom the suggestion is given. There is a small number capable of committing criminal acts upon the example of degenerated impulsive individuals. The penal responsibility of an individual having committed a crime under the influence of hypnotic suggestion should be declared null, conforming to the French penal code (article 64), which says: "There is neither crime nor misdemeanor, if the accused was in a state of dementia at the time of the act, or if he has been constrained by a force which he could not resist." As to its therapeutical value, hypnotism in the hands of a physician can give admirable results. It can also save from crime and from the condemnation of the innocent, as well as from disease.

Dr. Bérillon, editor of the Revue de l'Hypnotisme, as a result of his own investigations and experiments in criminal suggestion, believes he is justified in concluding that certain individuals present in the waking state such a suggestibility that it would be possible to make them execute automatically and unconsciously, when under the influence of verbal suggestion, misdemeanors or crimes. If it is shown that the accused acted under such suggestion he should not be held responsible. On the

other hand, authors of criminal suggestions should be held guilty in the same way as those who by abuse of authority or power or by machinations provoke the accomplishment of a crime or misdemeanor, or simply give instructions to commit it. (French Penal Code, article 60.)

Neither Professor Benedikt, of Vienna, nor Professor Mendel, of Berlin, believe in the existence of crime by suggestion. Dr. Masoin, professor at Louvain, answered that negations can not prevail in the presence of facts. Voisin insisted again on his opinion, since by hypnotism he had saved from condemnation a woman to whom a crime had been suggested. Dr. Houzé, professor of anthropology at Brussels, believed that hysteria could be cured by hypnotism and that certainly it could be ameliorated; he believed also in the reality of criminal suggestion.

Judge Tarde, of Sartat in France, well known as the author of The Laws of Imitation, and of Social and Penal Philosophy, gave with his usual analytical finesse a curious and paradoxical discourse on the "crimes of crowds." Morally and intellectually men in throngs are less valuable than in detail—that is, social collectivity, especially when it takes the form of a crowd, is morally inferior to the average individual in the crowd; thus a nation is not as moral as its normal citizen type; the public are not as moral as the individuals which compose it. The collective spirit, which we call parliament or congress, is not equal in rapid or sure power of functioning, or in profoundness or amplitude of deliberation, to the spirit of the most mediocre of its members, whence the proverb: "Senatores bonivici, senatus autem mala bestia." Even a liberal sect will become intolerant and despotic; a crowd, still more so; in both cases, despotism in any event is much more intolerant and despotic than among a majority of the members. Why? Because contiguity and concentration of opinions are molded into conviction and faith, which become fanatical; that which was a simple desire in the individual becomes a passion in the crowd. The crowd is a retrograde social organism; no matter how perfect, it is passionate, not rational. The more collective a crime, the less it is punished. The best police force can not suppress the brutality of the crowd, unless the press cease to publish that which produces excitation to crime or misdemeanor. The jury will not punish such crimes, especially when they have a political color. Thus the necessity of an exclusive criminal magistrature is shown. The punishment should be, above all, as an example. The individual should be punished in the measure that his impunity is dangerous.

Dr. Coutagne, medical expert at Lyons, in his paper on the influence of the profession on criminality, advocated the increase of penalty where the nature of the profession aggravates the crime, as in the case of abortion by physicians. Following the principle of social necessity, the penalty for the use of injurious substances in food, defamation of character by journalists, etc., should be increased.

The respective importance of anthropological and social elements in the determination of penalty was considered by Dr. Gauckler. He showed that the essential function of criminal law is to prevent crime by intimidation, and that this function is conditioned exclusively by social elements. A secondary function is to be assured as to the "innocuity" of a first offender, and also in some degree to repair the prejudice from which a victim suffers.

Professor Von Liszt, of the University of Halle, in considering the applications of criminal anthropology, said that the most important one is subordination to criminal sociology. The profound difference between criminals by nature and by occasion is a result that can be immediately applied to legislation. Among the delinquents by nature are found a large number of degenerated individuals especially marked by heredity. Punishment must seek to combat and ameliorate the criminal by degeneracy; if the criminal is young, the most preferable measures are those of education. Whether the criminal is incurable or not, society must be protected against him and he must be protected against himself. Whether the criminal is responsible or not, he must in any event be placed where it is impossible for him to do injury, if he is dangerous to life or property.

Professor Benedikt submitted the following resolution: "That anthropological and biological studies are indispensable for the placing of penal legislation upon solid foundations."

Professor Van Hamel, of Amsterdam, in his report on measures applicable to the incorrigible, concluded that the principal indication of incorrigibility is recidivation. Against recidivists penalty should assume the character of social defense, on account of the danger; there should be indeterminate detention for the incorrigible; there should be periodic deliberations as to such cases, and a large latitude left to competent authority, which should be judiciary.

In treating of the same question, Professor Alimena held to the idea of long and increased imprisonment proportionate to the number of crimes; and for those guilty of small misdemeanors, especially with recidivists, an abolition of short terms of punishment and a substitution of obligatory labor in special institutions, in companies for work and in interior colonization. There should be perpetual relegation or deportation for criminals who have passed the maximum of recidivation.

Professor Thiry, of Liège, held to the word incorrigible in the relative sense. For him the basis of incorrigibility is the permanent moral influence to which the individual succumbs. He did not believe in perpetual detention, but in indeterminate. There was also no necessity for judiciary intervention to prolong or interfere with the detention, as administrative responsibility and the supervision already in use were sufficient to prevent arbitrary action.

Dr. Maus formulated his conclusions as follows: The measures to be taken in regard to hardened recidivists should be, first, those that are best known; to send into the prison asylums those whose recidivation has a pathological cause; to increase considerably and in a gradual manner the duration of the punishment, until it becomes perpetual for the serious crimes; finally, to render repression more subjective by applying it with a view to reformation, according to the state of the criminal and the nature of the crime. Such a difficult task requires not only specialists with experience and knowledge of insanity, but perhaps it can not be accomplished without the aid of sincere devotion and sacrifice. Prevention also plays a rôle in combating the social causes of recidivation, as degeneracy, alcoholism, prostitution, misery, etc.; these factors render in great part vain the efforts of the penitentiary, producing more recidivists than the penitentiary can correct.

Professor Prins, of Brussels, who is the general inspector of prisons, placed the indeterminate sentence under two heads—delinquency for misery and for degeneracy—but in regard to repression proper he saw great practical difficulties for those who are incorrigible and criminal by passion. As to the liberation of the incorrigible, relatively speaking, the appreciation of a judge or administrator is not a sufficient guaranty. The solution of the question of the incorrigible lies in a progressive aggravation of punishment, and it is especially necessary to renounce prison luxury.

Dr. Paul Garnier, chief physician of the "préfecture de police" of Paris, in considering the necessity of a psycho-moral examination of certain accused persons as a duty of the court, said, if it is deemed excessive to ask judicial authorities to organize a medical inspection for the accused—which does not take the place of the medico-legal expert, but designates to him the cases to be inquired into—it is nevertheless a necessity in presence of frequent judicial errors. A magistrate intrusted with so delicate a mission as to decide whether a medico-legal expert is needed should at least possess certain indispensable notions of a scientific order to make such decision. If the judge orders experts, he should be able to judge of their utility and to control the results through special knowledge; but such special knowledge necessary for the interpretation of scientific facts is outside the domain of a magistrate, however brilliant and judicious he may be.

It would be unjust to close this account without referring to the cordial and magnanimous treatment that the delegates and members received on the part of the Belgian Government. The King honored the congress with his presence at one of the sessions, and subsequently gave a reception to the members. Almost every evening was marked by some reception or concert given for the congress. It was decided to hold the fourth session at Geneva in 1896.

The Demographical Congress, held in Budapest, 1894.

In reading the various points considered in the congress at Budapest, one sees the close relation of many subjects that at first thought might not be apparent. As investigations in a new line of inquiry advance, its relations to other branches of knowledge become more definite and clearer. It will be seen that demography, as defined by several of the speakers, includes in its domain a most comprehensive inquiry into present social conditions, and confirms the truth of the idea of the interdependence and organic unity of society.

PHYSICAL EDUCATION.

Dr. Albert Berzeviczy, delegate of the Imperial Diet, said:

Permit me to discuss the question that forms the principal subject in the order of the day, to wit, physical education and its problems.

This subject concerns all of us. It is a question of the future development of our children, consequently that of the coming generation, and through it the development of the nation. The problem of physical training of young people at present occupies the minds of the foremost authorities on hygiene and pedagogy. It still remains unsolved.

The question of the physical training of the young has not been brought forward for the purpose of some scientific pastime, but by the actual necessity of experience. This circumstance guarantees that this question will not remain within the domain of academical discussions and of less successful experimentation, but will be solved, and that its solution will bring on a real reform in our educational system.

It is not long since that the thinkers of all nations began to recognize that our present teaching and educational systems, under the influence of the demands of life, have

become one-sided, and that the strain on the mental strength of the young, as required by the school, in many cases prevents the development of their physical strength. Great minds, as Locke, Rousseau, Basedow, Pestalozzi, and Fröbel, have recognized the importance of physical training; but their observations and warnings did not penetrate public consciousness. The disadvantages from the shortcomings of physical development did not show themselves quickly; its connection with the educational system was not easily discerned. The work of Lorinser was, so to say, the first sound of alarm, and it met with hostile rejection; attention was directed toward the prohibition of inconsiderate treatment of school children and the unsanitary external influences of the schools.

It is undeniable that the duty of serving in the army gave the first impulse to the widespread movement which at present shows itself in this department. The results have justified Field Marshal Moltke's assertion that the general duty of military service is no burden (or at least not exclusively a burden), but on the contrary a powerful aid to national education. However much we may lament the militarism that has developed since 1870–71, which keeps so many forces unproductive through the material sacrifices that it necessitates, preventing so seriously the realization of the aims of culture, nevertheless it remains an indisputable fact that this very militarism has in certain respects exercised a good influence upon general education. It has brought a vigorous and manly trait into our education. The effect, it is true, showed itself in the beginning as somewhat one-sided. As the aim was to increase the national ability of defense in war, it seemed natural that the elements of military drill should be introduced into the schools as a preliminary training for the future soldier. This has been done in part, and the physical exercises in the schools have in this manner been enriched with valuable and, to my mind, lasting elements. Since that period school gymnastics have become more severe.

The institution of the "bataillons scolaires" was introduced into France the beginning of the seventieth year. A project for a law relating to military exercise and drill of school children was drawn up. This law, however, was not enacted.

According to my knowledge, the only effort for the practical realization of the institution was made in Budapest. The French "bataillons scolaires," according to the testimony of all authorities in France, had no lasting vitality.

It has come to be generally understood that the lightening of military training and the increase of military power can not alone be the problem of physical training, wherefore the methods of physical education can not be derived solely from a system of military training.

The physical education of the young should be much better cared for, especially since in a number of countries the percentage of those fit for military service is low. The necessity of a more careful physical training is justified by the fact that a large proportion of our young men are weak and inert when they leave school; they are unfit to solve the problems which life enjoins upon them even in civil careers. They frequently show themselves in the school incompetent to do the mental work required. The problems that await us in the domain of mental activity are becoming more complicated, and require more adequate strengthening of the body in order not to destroy the equilibrium between physical and mental powers and thereby to paralyze the latter.

A serious warning comes to us in the spreading of nervous diseases, in premature old age, and in the sad truth that our children cease much too early to be children, losing their vigor of body and soul, and their pleasure in childish entertainments; there is a precociousness which make the strikingly short-lived children appear natural.

In a word, all symptoms intimate that we have deviated far from the ideal of Juvenal—"mens sana in corpore sano," and also from what the "ligue nationale" expressed with the words, "Strong health upon which is dependent moral and intellectual equilibrium."

The problem is not only to educate our intelligence, but the whole human being. Our conceptions and habits of life must be reformed if we want to restore the disturbed equilibrium between mental and physical development.

This general idea of physical education has brought such gymnastics to the foreground that are not opposed to the conventional forms of the old-fashioned school gymnastics and the severe military exercises; and, like games or certain kinds of manly sports in connection with competition prizes, they either improve the minds of the young or awaken their zeal and ambition for bodily hardihood. By proper application they lead to a many sided development of the physical powers.

This innovative movement goes hand in hand with a thorough investigation of the hygienic conditions of the school, and with the endeavor, through educational means, to avoid everything that hinders the development of the body. This naturally has provoked a criticism of school programmes, making it difficult to bring medical and didactical points of view into accord.

But at present there seems to be more unanimity of opinion in regard to many questions. What can be expected under the circumstances is as follows: Adequate hygienic architecture, ventilation, and lighting of the schools, supervision and control over the health of the pupils—i. e., the development of an institution of school physicians, in larger schools in connection with the school itself, for public schools in connection with supervision; instruction in hygiene, proper medical advice as to omission of certain studies; in boarding schools a hygienic appropriate regimen; the establishment of permanent medical pedagogical institutions for nervous and delicate children who have remained backward in their development. On the other hand, there should be an increase of leisure hours, and, if possible, by an entire suspension of afternoon lessons, the use of as many means as possible for strengthening the body; there should be systematic gymnastics, retaining the useful elements of military drill in the school, arrangements for athletic competition in the different institutions, and in the school districts for the whole country diffusion of juvenile games, and for this purpose suitable playgrounds; in summer, swimming; in winter, skating, dancing, singing, and, wherever it is possible, riding on horseback; fencing, shooting at a target, school excursions, that may be combined with educational purposes; the establishment of a higher special school for physical training; finally, manual training, which on the one hand creates a useful accomplishment, and on the other, through the exercise of the senses, distributes the work of the nerves more proportionately. These, with some variations, are the means and methods of physical education which have been advocated in professional circles of different nations. There is a feeling that these reforms should apply especially to the common schools which constitute the intelligent mass of the nation, and should be emphasized with special regard to the education of girls; partly on account of the specific nature of the education of woman, partly because the neglect of the physical education of girls shows itself in the physical development of the future generation.

GAMES.

The main thing, however, which to-day seems to rule the reform movement is juvenile games. In some places it is asked that all gymnastics that have been hitherto in use shall be done away with and replaced by new and more liberal exercises. A certain sceptical trend regarding these games is gaining the upper hand, especially in the pedagogical circles and in the literature of France. The effect, within certain limits, of the athletic physical exercises on the general culture of the young has been frequently doubted and disputed.

It is true, as the enthusiastic advocates of juvenile games advance, that the national educational system is not really in want of militarism, but of freedom; that such physical exercises can be a question of recreation only, which does not indicate a lesson, but an active divergence from routine, and depends on free movements and personal initiative. Further, that the games under all methods of physical exercises combine in themselves most of the essential elements of bodily and spiritual strengthening; that they mold the character through the varied exercises of the muscles, developing perseverance, patience, attention, self-control, and even self-subordination. Through this the individual accustoms himself to unselfishness and self-sacrifice; at the same time he is trained in dexterity, presence of mind, resoluteness, and courage; he becomes more composed, energetic, and possesses more will power. On the other hand, these juvenile games mold the disposition by creating more friendly relations between the pupils and the teacher who conducts the games. They knit the ties of love without loosening the authority and discipline. As Raydt specially emphasizes, the games connected with vigorous physical movements that are practiced in the open air outside the school are, from an hygienical standpoint, the best and, morally, the noblest manner of contact between the two sexes, and in every respect are to be preferred to fatiguing dancing in badly ventilated halls. Finally, it admits of no doubt that the educated class in England surpass almost every nation of the Continent not only in duration of life, but also in the conservation of physical strength. This is due in a large extent to the Englishman's fondness for sport—to invigorating games that have taken root both in their education and in their social life. In the ancient nations the development of the various kinds of physical exercises came with the period when those nations were in the height of their power, while the neglect or degeneration of the public games and athletic contests was a sign of the decay of the nation.

These favorable considerations are sometimes objected to on account of the unfortunate experiences made in many places where the school games became a feature of the day; but this is due to grounds unsuitable for so large a number of children—to a deficient or careless supervision. Some are of the opinion that such games are only proper for the day schools, while in the boarding schools order and discipline cease, and obedience toward those intrusted with the supervision and education disappear

if they mix with the pupils in their plays like playmates. Others ascribe to the games a pedagogic disadvantage, since the temperament is brought directly into play, and therefore that exercise of the muscles is much more irregular than in systematic gymnastics. Opinions are at variance, even among the most enthusiastic advocates of the games, as to whether it be advisable to make the games obligatory or voluntary. In the latter case it would be almost out of the question to make the game a general means of education.

But we should not be led astray by objections usually made in the preliminary stages of a subject, nor be forced to sacrifice, for the sake of something novel, what in our school life has proved to be good and useful. In short, the question is to adjust the apparently opposing trends in a practical manner; for we certainly do not want to educate our youth to be mere athletes, or soldiers, or to learn pedantic gymnastics.

We must familiarize ourselves with the idea that no kind of revision of our plans can lead to such a quantitative decrease of studies as to put an end to complaints arising from overpressure; nor can we expect in this way alone to remove the present disadvantages of physical training.

What we are wont to say regarding the example given by antiquity and especially of that of Hellas should be taken in full earnest.

Why should not the conception of the ancients be able to produce the same effects upon our age that it did upon theirs? The present generation has become one-sided by excessive materialism, and conditions of harmony have been destroyed by the struggle for existence, which compels a cultivation and constant exercise of those powers only that we require immediately in the pursuit of our calling and to gain material ends. But already the conviction is growing that with a one-sided educational system we are not able to do any good service to our children. When this conviction predominates then physical training will occupy the proper place in our public education. This is the goal of our endeavors; it will not only be a pedagogical reform, but the recovery of a lost ideal. This ideal is harmony in the life and energies of the body, soul, and spirit.

THE LENGTH OF A GENERATION.

Monsieur von Inama Sterneck said: The means of investigation of all the conditions which determine the standing and movement of the population of more ancient times are very limited. The length of life of a generation is to be found in the period between the birth of the father and that of the son who perpetuates the family. This period of time, from the founding of a family to the establishment of the following generation, is calculated, for Austria-Hungary, at thirty-five years, and has not shown any permanent or radical tendency to change since the close of the middle ages. For more remote times a shorter period must be adopted. As a second standard for the signification of generation we must take the average age of the progenitor of a family. This is fixed for Austria-Hungary at about 61 years, but in the course of the last three centuries it has been somewhat extended. For the comparison of generation changes the duration of life of a father and son taken together should also be considered; this period usually extends to one hundred years, but was formerly less. Furthermore, the contemporaneousness of several generations as regards the grandfathers and grandsons in the most favorable periods embraces 13 to 35 per cent of all cases; so that about one-third of the progenitors of a family live to see the establishment of a second generation, while under very favorable conditions even five generations can appear in the same century.

In this contemporaneousness of different generations the amount of their social power dates from the establishment of a new family to the extinction of the former family. In this sense this full activity lasts in Austria-Hungary twenty-six years (length of period from the birth of the son, who perpetuates the family, to the death of the father); in earlier centuries it was shorter. Thus it will be seen that short generations and slow changes of the same show the most favorable conditions in respect to civilization (young fathers, old sons, numerous grandfathers); economical and civilized life is elevated when the sons do not first become independent at the death of the father, and the fathers do not die when the sons are not as yet grown up. A long contemporaneousness of generations is the best guaranty that traditions, experiences, and knowledge can be transmitted unimpairedly from one generation to the other; and that the separated family households of the successive lineages are not only connected to each other by economic but also by moral ties of love and family faith.

At the conclusion of this paper some discussion arose as to the maxim of Inama; that a short generation length affords a favorable indication for an estimate of the population. While Ferraris entertained doubts principally from the standpoint of customary conditions of ownership, Mandello thought that such an ethical esti-

mate might be justifiable from the point of view of an individualistic world conception; but from the standpoint of the welfare of large masses, critical doubts might prevail if a short generation length affects the economical and social conditions favorably.

THE IMMIGRATION OF PEOPLE INTO CITIES AND THE SOCIOLOGICAL DEVELOPMENT OF THE POPULATION.

Dr. Mandello said:

Migrations of nations are the strongest factors that have exercised an influence upon the historical development of social life. The geological formation of the surface of the earth has been influenced to no small degree by the migrations of mankind. In fact the whole history of humanity, during certain periods, is nothing else than the representation of migrations of peoples.

The formation of the economic organization, of the social division, and of the voluntary and enforced division of work, is involved in the question, how to nourish in a constantly increasing population the largest possible number of people living in a limited territory. In using the word "nourish" I do not refer to the idea of a charitable institution, but that of incorporating single individuals and classes into a system of economic production and industry.

It is a question how to distribute and organize large masses of people in such a manner that they can perform such economic work as will exercise a favorable influence upon maintenance of the whole people. To explain this principle I will suppose that the bread requirements of a certain group of men can be satisfied by one or more bakers, with the assistance of a few or many workmen, and that the one or the other way of fulfilling this requirement will both influence the possible increase of population in the group and also its economic and social well being.

With this fundamental idea I have now tried to read various city histories, and in doing so it becomes clear to me that the history of the Italian cities in the fifteenth and sixteenth centuries, and the history of various Spanish cities in the seventeenth century present nothing else but what we, under another form, have observed since the beginning of the English revolution in industry, viz, the possibility to furnish the products that serve for the maintenance of many people by the work of few people. Formerly there were people primitively organized who performed necessary work which is now superfluous. These people form the laboring classes, and in their lower strata weigh upon the rest of the population.

It is in this, and not in the depopulation of rural districts or in the hygienic difficulties of overcrowded cities, that is hidden the great danger of modern agglomerations of people. The question is, Will these agglomerations permit a solution of the social organization problem? Can the largest possible number of people be incorporated in the economic system of industry when the city life absorbs more and more people, and hereby the means of existence becomes more and more concentrated in a few hands?

INFLUENCE OF PHYSICAL AND MENTAL DEFECTS UPON QUALIFICATION FOR THE MILITARY SERVICE.

Dr. Peck, imperial surgeon of the army (Budapest), said:

The estimate of the influence of defects can be made from two points of view:

(*a*) Defects limit the ability of defense in a direct sense, i. e., the qualification for the military service.

(*b*) They exclude other employments for army purposes.

Statistical accounts regarding these defects should be based upon official publications.

PHYSICAL DEGENERATION OF THE POPULATION.

Dr. Julius Donath, of the University of Budapest, spoke of physical degeneration of the population in modern civilized States, with special reference to Austria-Hungary. His conclusions were as follows:

The physical degeneration of the population of modern civilized States, in particular where industrial and agricultural pursuits prevail on a large scale, is a fact that must be recognized.

The most weighty proof for this is furnished by the results of the recruitments in all countries where obligatory military service is general. In an estimate of the percentage of those fit for service two factors must be considered: (*a*) The lowering in requirements for military efficiency on account of the physical degeneration; (*b*) the necessary increase of recruits on account of the constant growth of the army contingency.

The causes of the physical degeneration are of recent date, namely, the modern money-making systems of production, with their consequences; a gradual substitution of machine for hand labor; lowering of wages, and consequently an inadequate

satisfaction of the most necessary wants of the laboring classes—that is to say, the largest part of the population.

These disastrous consequences can and must be counteracted by the State, and, as far as practicable, by means of international agreements—that is, by all possible means that tend to increase the material and mental welfare of the working population. Under these laws for the protection of workingmen stands in foremost rank the shortening of working hours, which should be adjusted according to the kind of work and the degree of injury to health in the branch in question. These last two points should be considered, as well as the number of the reserve army of workingmen.

THE STRUGGLE AGAINST DEATH.

Professor Erismann, a Russian scientist, said:

Statistics show that mortality possesses an absolutely abnormal character, and that age is not the main factor among the causes of death, but rather there are a number of causes that might be removed under favorable conditions. A proof for this is the variation of mortality in different countries, principally the great mortality of the new born; further, the difference in the mortality of the various social and professional classes. In Sweden and Norway, from 17 to 18 out of 1,000 inhabitants die annually; in Switzerland and France, 24; in Germany, 27; in Austria, 32; in Russia, 36. A similar difference of mortality is found in large cities. In some places it is only 22 to 23 for each 1,000 inhabitants, while in other places it rises from 35 to 40. Thus there is a great inequality in the mortality of territorial divisions. One finds also that more than 20 per cent of deaths are children under 1 year, and 37 per cent children under 5 years. Only 17 per cent of the population reach an age of 70 years. In Russia this relation is still more unfavorable. These data prove that an immense number of people die early, and among these large numbers of children. The great inequality of mortality among the new born shows that the death rate of children is no inevitable necessity, but a matter that can and should be overcome. In Prussia 200 new born out of 1,000 die annually; in Russia, 270; in Norway, only 106. Consequently, there are conditions under which the figure of the death rate of children can be reduced. Material conditions and professional occupation have great influence on the mortality of children. It is a sad fact that the grade of wealth of the parents determines the mortality of the children. In Budapest, according to Körösi's statistics, the average age of the rich classes is 35 years; of the well-to-do classes, 20.6 years; and of the poor, only 13.2 years. And this phenomenon is everywhere repeated.

Coming to his real subject, the struggle against death, Professor Erismann pointed out that the men standing in the lowest depth of civilization are indifferent to death. As man climbs higher up the ladder of civilization he tries more to struggle against death. With ancient nations sanitary measures possessed essentially a social character. The Jews show this through their developed sanitary legislation, a legislation which they partly have preserved up to date. The Romans possessed high canalization and sewerages. In the Middle Ages everything sank into deep ignorance and superstition. In the eighteenth century, and at the beginning of the nineteenth, the struggle against death assumed an exclusively individual character; first, the cholera in Europe, during the thirtieth and fortieth years, changed the ideas of the physicians and the public as to preservation of the health and necessity of collective organization against disease and death.

The English people were the first to recognize the necessity of protection of the entire population as that of a social organism, and that the evil must be conquered by collective forces. Large and small cities improved their canals, constructed sewerages; their public buildings were standard models for all Europe. The Englishmen, therefore, succeeded in lowering the death rate in general, and principally in cases of infectious diseases. After all, the key to the battle against death can not be found in therapeutic medicine. We must put our hopes on the enlightenment of the people, that will enable them to reach a higher standard of prosperity, and not only to better understand what is good for themselves but also what is beneficial to the whole community. The individual can accomplish little in this uneven struggle; society alone can carry it on successfully. The example of numerous cities in England and Germany shows us that at places where typhoid fever and cholera formerly raged with persistence important results have been obtained by the sanitary improvement. In Danzig, for example, the mortality decreased from the annual rate of 36 to each 1,000 souls to 28.5 per 1,000.

Returning to the mortality among children, the speaker stated what should be done in their favor. Children should be nursed by their mothers. In certain localities of Scandinavia they commenced to use the sucking bottle. Immediately the mortality of children rose. The use of the sucking bottle was afterwards punished with heavy fines. The speaker expressed his conviction that a decrease of 30 to 40 per cent of mortality could be obtained by a systematic organization of the sanitary service.

THE ECONOMICAL AND SOCIAL IMPORT OF MIGRATION INTO CITIES.

Dr. Ranckberg, of Vienna, said that the consequences of the exchange of population between city and country has a tendency to cause wage differentiation which is dangerous on account of the depression of city wages through the newcomers. On the other hand, however, the increase of the rural wages is sometimes due to a scarcity of workmen in the country.

For social, political, and general considerations the lower social strata, to which the newcomers principally belong, should be assisted. Industrial and commercial interests should be strengthened. Finally, there should be a constant transformation of urban conditions by the admission and gradual assimilation of the civilizing elements of the newcomers. The influx toward the city is one of the most important branches of the entire migratory movement, and, accordingly, a powerful expedient for social and economical differentiation.

Cacheux discussed the practical construction of workingmen's dwellings; Bertillon desired an agreement as to certain terms and definitions, in order that comparative international statistics might be possible. Newsholme, of London, thought that the solving of the problem for large cities could only be realized by erecting buildings in barrack style (blocks). Such enterprises, as for example, the Peabody houses in London, present most favorable statistics on mortality. In these houses there are 20,000 people in 5,000 rooms; the mortality is one-tenth smaller than the general rate in London.

Pollak (Warsaw) reported the result of an investigation of dwellings, which showed an increase of contagious diseases according to the close proximity of buildings to each other.

PROGRESSIVE PARALYSIS AND CIVILIZATION.

Prof. Von Krafft-Ebing, jr., of the University of Vienna, presented the following considerations:

Paralysis is a modern disease. It is progressing rapidly, and in the last ten years it has been the cause of the increased number of admissions into insane asylums reaching to almost twice the usual figure. Paralysis now attacks man at an earlier age than formerly; thus, juvenile cases appear often. It is also surprising to find a large increase of this disease among women. The influence of large cities is unmistakable. Paralysis is four times as frequent in urban as in rural population. This is also true in regard to the paralysis of women. The gradual change in the social position of women in city life, from their entering into competition with men in the struggle of existence, is not unimportant in increasing the susceptibility (morbidity) to paralysis. Since lues is a disease which predisposes to paralysis, so all social factors promoting lues are significant as giving rise to paralysis. Such factors are less frequent marriages; the advanced age of marriage in the higher social circles; the indissolubility of unhappy marriages in many countries, through which concubinage and prostitution are advanced; possibly, also, the general enforcement of military service, in as far as it retards the time of marriage, so that many young men in cities become acquainted with the vices of modern civilization and are led on to debauches.

ALCOHOLISM.

Dr. Nagy, of Budapest, spoke on the "Alcoholism of the rural population." According to his investigations, out of 1,098 alcoholists only 2.7 per cent belonged to the rural population.

Dr. Csillag pleaded for temperance associations.

Dr. Zoricic said that first society and then the state should take measures against drunkenness.

THE HISTORY OF DEMOGRAPHY.

Levasseur spoke substantially as follows:

The word "demography" was used in France about forty years by Guillard. Some scientists, like Engel, preferred the term "demology," which better expresses the idea of this science. This matters little, for the words "chemistry" and "physics," which the whole world understands, express very incompletely the sciences to which they refer. The word "demography" has been accepted, and must be retained and defined. Demography is "the science of population;" it considers, with the assistance of statistics, population as it is and in its movement, and from the comparison of the figures deducts average values and numerical proportions, which constitute the laws of demography.

There are those who restrict demography to three subjects, birth and death as the extreme limits of life, and marriage as an intermediate factor. Others think that all that interests the life of men in society belongs to the science of demography, and

they strive to extend this idea so that it may embrace all social sciences. Without doubt demography is related to almost all social sciences, and derives from them useful data. All social sciences are interwoven, but one should not, for this reason, confound them; nor is it advisable that they should be absorbed into a single one. Marriages, births, deaths, migrations, etc., are the constitutive elements of the population, and form the center of demography, around which are grouped questions relating to the material, spiritual, and moral condition of the population.

At first demography was designated by the names "population statistics" or "statistics." "Population statistics" is, I admit, exact, yet it appears to limit demography to an exclusively numerical study. "Statistics" is not an exact term, as demography collects its elements by statistical measures; but the statistics handle a great many different kinds of subjects, many of which are very remotely connected with demography.

Demography is, by virtue of its manner of investigation, and the great number of observations which it controls, the most precise of all social sciences.

When sociology becomes a science it will be the greatest of all, comprising the laws of the existence and development of mankind.

Scientific studies in demography commenced first in the eighteenth century, although in the seventeenth some names like Halley can be cited. In the eighteenth century the great thirst for knowledge resulted in developing the natural sciences, and social sciences. This century loved science and humanity. The Marquis de Mirabeau published a work entitled The Soul of Men, or a treatise on the Population, but it did not rest on a knowledge of the facts.

Messance, Expally, Dupré de St. Marce, and Buffon began to search for the relations that orginate from the life of mankind, and endeavored to explain them. Before this, however, Despercieux had written his essay on Probability of the Length of Human Life (1746), a remarkable work. Following him Moheau wrote his Researches and Observations on the Population of France (1778); this was a still more complete exposition of the demographic condition in France under the reign of Louis XVI. In Germany, the Protestant pastor, Süssmilch, showed in his work, The Divine Order, the regularity with which annually the phenomena relating to human life repeat themselves. He may rightly be considered one of the originators of demography. In our century a large number of facts have been gathered, and most of the sciences that are dependent on observations have been greatly advanced. Demography is one of those sciences whose creation this century claims for itself. A number of countries, following the example of Scandinavia and the United States, commenced taking censuses regularly; France and England were the first, in 1801, other countries followed.

Most of the countries established statistical bureaus. Levasseur shows the influence exercised by some scientists, principally Malthus (1803, 1st edition), and Quetelet (1834, 1st edition of the Psysique Sociale), and by one institution which existed twenty-three years and the last session of which was held in Budapest, namely, the International Statistical Congress. This congress called the most important statistical offices in Europe "laboratories," in which work exclusively on the foundation of the demographic sciences is done.

At present death and life are counted and analyzed; each nation knows its standard, and from these standards an average mean is taken. Thus, for each 1,000 souls in Europe for the years 1865 to 1883 we have the following:

Average births	38.5
Maximum: Russia	48
Minimum: France	25
Marriages	8.4
Maximum: Servia	12
Minimum: Ireland	4.8
Mortality	28
Maximum: Croatia	38.7
Minimum: Norway	17.2

The result of this would be, if there were no emigrations, that Europe would annually have an increase of one inhabitant to each hundred. The European population has more than doubled during this century (from 175,000,000 in 1800 to 366,000,000 in 1893). The conditions which differ in the several countries vary, also, within certain limits in the same State. In France, births have decreased considerably (33 in 1,000 during the years 1800 to 1805, against 22.6 from 1888 to 1892). A more recent research by the Royal Italian Bureau of Statistics shows that the birth rate has also decreased greatly in other States during the last fifteen years, especially in Great Britain.

Specialists in demography endeavor more and more to penetrate into the details and secrets of human life. The interesting work which Körösi has submitted to this congress serves as an example; it treats of the probabilities of conjugal births. Dem-

ographical specialists complain that the official statistics do not furnish all the necessary elements for their researches.

On the other hand, demography also presents skeptics who do not believe in the reliability of the sources. There exist, in fact, doubtful data; but Levasseur says that demography, by means of comparison and control, corrects errors. Whatever the deficiencies may be, demography is the most empirical of the social sciences. Demographical conclusions are generally not based upon the observation of certain facts, but upon a totality of self-reproducing facts confirmed by statistics. This alone gives demography great importance in relation to other social sciences. Demography diffuses light on a great many questions, and may be considered the best social barometer, if we understand rightly how to read its scale.

DEAFNESS.

In a discussion as to the deaf and dumb, the following are some of the remarks made:

Deafness is a grave and permanent social evil which, like blindness, idiocy, and insanity strikes with certainty a certain percentage of the population, making the individual more or less unfit for the work of daily life, so that he becomes more or less a public or private charge. Therefore it is the duty of the State to show, by means of statistics, the diffusion and distribution of deafness within the various districts, strata of population, classes of all ages and confessions, and designate the culture and occupation of the separate individuals. Such information, to be of use, should be collected at regular intervals, and could be most successfully obtained by the common census. Deafness, moreover, is an evil which can be prevented or limited to a certain extent; therefore it is the duty of the State, by special statistics, to investigate the causes of the evil. Endeavors should be made to obtain a strict separation of inherited, accidental, or uncertain deafness, and this separation should be carried through in the census. The census should at the same time furnish data on the distribution of the population according to place of birth and on the relation of the consanguineal to the nonconsanguineal marriages. Special data must be gathered according to similar methods (international, if possible) and be sent out by the Government in question, and should be elaborated by professional men (physicians, ear specialists, etc). Whenever practicable, one should examine the individuals, and especially the organs of hearing. The cretinous deafness must be eventually separated from the ordinary deafness. Cases of deaf and dumb idiocy (no conversation by gestures), of aphasia as well as those of ordinary hard hearing, must be distinguished. Prof. Dr. Julius Böke, of Budapest, in his analysis of the subject, said: Let the general censuses include the physically and mentally weak. I here lay special stress upon deafness. Statistics as a science should not only have reliable data on all conditions as far as can be obtained by human efforts, but its principal aim should be to employ such a method that the results of a census may furnish knowledge regarding the census of the phenomena so that these defects may be avoided or modified.

Dr. Sigmund Szenes (Budapest) cited results of investigations which he had made on 124 pupils of Waitzner Institute for Deaf-Mutes. He said that deafness is very rare where there is only one child in the family, but more frequent where there are many, and most frequent by the firstborn. As to the degree of hearing, he observed that vowels were less frequently heard than syllables and sentences.

Dr. Egmont Baumgarten (Budapest) said, in speaking of the cause of deafness, that, according to statistics of all European countries, Hungary, next Switzerland, produces the largest number of deaf-mutes. A number of deaf-mute children between 5 and 13 years of age were thoroughly examined. It was ascertained that most of them must have been born deaf, although it was generally asserted that the children apparently could hear up to the age of 1 to 2 years. In only a small number could it be ascertained that deaf-and-dumbness was acquired. Remnants of hearing could be found in isolated instances only; most cases showed total deafness. Several instances disclosed that the father was or had been a drunkard. This circumstance, which hitherto has been left out of consideration, should be given serious attention.

RESOLUTIONS OF THE DEMOGRAPHICAL CONGRESS.

Professor Ferraris moved that the following question be put on the order of the day for the next congress, viz, The influence of hygienic measures on the increase of population and on its quality, and the inferences to be drawn from it for population theories.

Dr. Zoltán Ráth moved that the permanent committee place the following question as the order of the day for the next congress, viz:

"What rules are to be enacted in order that the age of all persons registered during the taking of the census might be ascertained with the greatest possible accuracy?"

Max Wirth suggested that the congress express the desire that statistical offices of the various countries should agree upon a uniform plan of recording and a common method for the arranging of all statistical data for occupations to be used in the next census, in order that the number of independent and dependent persons should be more exactly kept separated, according to the spirit of rational demography. The members of a household which are employed in household work or are at school, etc., should be separated from the independent workers and from those members of the household which assist the head of the household in wages or income earning occupation, but who, by their position, are destined, in the course of time, to succeed the head of the household or become themselves independent. It is also desired that the thrifty workmen with some means of their own should be distinguished from the poor workmen without means. Under the former such workmen are to be understood who, although working for contractors or others, use their own workshops or machines. For instance, tailors or shoemakers who work for export establishments might use their own sewing machines. Women and grown-up children may assist at such work, but only the latter would have to be recorded as among the poor workmen. Savings should not be considered in this classification. In recording the rural population, landowners, farmers, and laborers who possess land should be recorded separately from the dependent laborer and from those servants who have been engaged for a longer term.

Dr. A. Neményi: It is desirable that the Government should erect cheap and healthy dwelling houses for the poorer classes of the population.

E. Cacheux: It is desirable that the influence of the conditions of dwellings upon the development of infectious diseases should be subjected to a searching inquiry.

Sent in by Section V (hygiene of children): Considering the desirability to have the statistics on infant mortality treated in a uniform manner, the section nominates the six members mentioned below to the committee specially charged with the consideration of this question, viz, Messrs. Bertillon, Böckh, Bodio, Silbergleit, Sedlaczek, and Körösi.

Dr. Paul Aubry: Considering the incorrectness of personal descriptions as contained in passports, military schedules, and similar documents; considering that the identification of persons is thereby rendered more difficult, and that criminals have no difficulty in procuring such documents; and, further, that the anthropometric method of description (introduced by Mr. Bertillon) has produced excellent results since its application, be it

Resolved, That this congress give expression to the desire to have the old method of personal description in all official documents replaced by the anthropometric method, and that such method be used exclusively.

This description of persons might also be sent to the parish authorities for the purpose of having the same registered on the certificates of birth, after which all documents relating to the person in question would have to be issued with that description inserted.

By the application of this method many judicial errors and mistakes by the police would be avoided, and likewise every citizen would be able easily to establish his identity beyond all doubt.

Prof. Dr. J. Böke presented the following resolutions for acceptance:

(1) In the taking of the census in any civilized State the data referring to the deaf ought to be recorded.

(2) The following questions should be answered in the schedules:

(*a*) The usual census questions.

(*b*) Is the dumbness accompanied by good hearing?

(*c*) Is there deafness and dumbness conjointly?

(*d*) Was the person born with this affliction?

(*e*) Has the same been caused later on by (*a*) cerebral injuries, (*b*) scarletina or any other disease, (*c*) in consequence of effluvium from the ear?

(*f*) Are the parents blood relations?

Miss Florence Nightingale: The tropical section of the congress having had under consideration a paper by Miss Nightingale on "Village sanitation in India," are of opinion that the subject is a very important one, affecting as it does the health and prosperity of so many millions of industrious and law-abiding people. They appreciate the efforts that have been made in the different provinces by the Government of India to promote this work; and looking to the special conditions of the village communities of India, they think that the best results will be obtained through the cooperation of the people themselves if they are instructed in the primary rules of health.

The most pressing needs appear to be a wholesome water supply and the removal of refuse and other insanitary matter from the neighborhood of dwelling houses.

Professor Than: (1) To express the composition of bodies, according to atomic and molecular quantities as units, is from the practical point of view much more rational than the composition by percentages, which latter possesses a purely empiric value.

By the former method the figures which represent the composition of homogeneous bodies can much easier be retained in the memory and are at the same time also available for the practical man.

(2) If this conception be applied to the analytical methods occurring in practice the following will be the result: It will be possible to carry out in the shortest possible way volumetric methods so as to obtain direct results of them without calculations and without errors.

(3) According to this conception the application to hygienic and physiologic questions of the laws by Gay-Lussac and Avogadro becomes very simple. For instance, it will be easy to find by simple mental arithmetic the quantity of sulphur to be burned in order to thoroughly disinfect a certain room. In the same simple manner it will be possible to determine the quantity of products resulting from the combustion of petroleum or gases, or from the respiratory process, as well as the energy, respectively, the caloric changes resulting therefrom, and also the manner in which the air in closed spaces is thereby altered.

(4) If the method of quantitative reasoning based upon these units has once been introduced and has become a settled rule in practice, there can be no doubt that in the near future the modern discoveries of theoretic chemistry, such as the important rules of thermochemistry, chemical mechanics, and electrochemistry, will, like the laws of stoechiometry, come to be applied in practice in the same simple manner.

Dr. Ant. Loew: (1) That all societies and bodies created for the salvage service, the sanitary service, and the assistance of the poor should be formed into one organization, for the purposes as stated below, without however sacrificing their autonomy in regard to their local work—

(*a*) To give more effect to the principles governing them and to extend their beneficial activity as samaritans to the widest circles of the population.

(*b*) To be able to carry out more efficient work by concentrating the means at their disposal.

(*c*) To be able to support morally and materially those members of the organization which require it in special cases.

(2) That this organization should be established in every country, so as to extend over the whole territory of it.

(3) It is not permissible to have gratuitous assistance rendered by charitable institutions, supported by public contributions, to persons who can pay for it.

(4) The impecunious is entitled to gratuitous help in every respect by organized voluntary charity, but for the sanitary services rendered to impecunious persons the State or the parish of his legal domicile is liable and should indemnify the organized voluntary assistance.

(5) The organized voluntary charity is always to be considered as supplementing the obligations of the State.

(6) The organized voluntary charity may covenant to take charge of some obligations of the State, and thus may become the organ of the State for those purposes.

Dr. E. Jurkiny: The section of the general samaritan affairs resolve to extend the operations of the samaritan societies to the care and nursing of such poor patients who, by the nature of their infirmities, or in consequence of family circumstances, do not absolutely require hospital treatment, but still require some treatment at home or otherwise.

Reginald Czermak: The Eighth International Congress of Hygiene and Demography recognizes the services rendered to humanity by the fire brigades, and gives expression to the desire that these organizations may continue the action of rendering assistance in cases of accidents and in doing sanitary service in general, and that they may further develop this activity.

Professor Singer: The Eighth International Congress of Hygiene and Demography, considering the beneficial results observed of the shortening of working hours, and considering the pernicious consequences of night work, in principle accept the eight-hour work day and the abolition of night work, and request that all civilized countries should, by legislation, gradually enact the eight-hour work day for all trades, and should prohibit night work, except where general public considerations require it.

Woman question.
Writing.

General bibliographies, giving the literature of a number of special topics separately classified, are entered only once (under the most appropriate heading), their contents are given in detail, and reference made to them under the special topics in question, the reference giving in quotation marks the heading or class under which the bibliography is entered and the catchword of the title, generally the author's name. On some subjects, "Supervision" and "Compulsory education," for example, the only literature lists that came to the notice of the compiler, were such as were contained in comprehensive bibliographies.

AIDS TO READING AND THE SELECTION OF BOOKS.

ABBOTT (Lyman), ed. Hints for home reading: a series of chapters on books and their use, with which is included a new and revised edition of suggestions for libraries, by Geo. Palmer Putnam, together with priced lists of suggested selections of 500, 1,000, and 2,000 volumes of the most desirable books. N. Y., Putnam, 1892. 147 pp.

BURT (Mary E.). Literary landmarks: a guide to good reading for young people, and teachers' assistant. Boston, Houghton, Mifflin & Co., 1892. 152 pp.

List of books referred to, pp. 109–152.

CATALOGUE of the library of the Classical and High School, Salem, Mass.; containing also lists of books for collateral reading under each subject. Salem, 1892. 94 pp.

CHICAGO high schools. List of books for home reading, selected by A. F. Nightingale, superintendent of high schools. The "School review," 3: 491-495 (Oct., 1895).

Classified by grade, 40 books for each of the 4 years. Pupils are expected to read 10 of these books each year; reproductions and reviews are written upon perhaps five of these. Pupils also give oral descriptions of the books and state the lessons learned from them.

COGGSWELL (F.). Books for general reading. Revised Jan., 1886.

Prepared for the school committee of Cambridge, Mass.

COLORADO. State course of study for the public schools of Colorado. Approved and published by Mrs. Angenette J. Peaney, superintendent of public instruction, Denver, Colo., 1895. 52 pp. O. pap.

Contains (pp. 31-37) a list of books suitable for school libraries.

GREEN (S. S.), ed. Libraries and schools. N. Y., 1883.

Contains a plan of systematic training in reading at schools, by Wm. E. Foster.

GRISWOLD (W. M.). A descriptive list of books for the young. Cambridge, Mass., W. M. Griswold, 1895. 7+175 pp. O. pap. $1; cl. $1.25.

Classification: Amusements and occupations, anatomy and physiology, behavior and language, biography, exploration, geography and history, literature, natural science, natural history, poetry, animal stories, fairy stories, fanciful tales, impossible stories, American stories.

HALL (G. Stanley). School reading: how and what? Boston, 1887. 8°. 25 cts.

HARDY (G. E.), principal of grammar school No. 82, N. Y. City. Five hundred books for the young; a graded and annotated list. N. Y., Scribner, 1892. 5 + 94 pp. D. cl. net 50 cts.

Only books now in the market are included in the list. The titles are divided into grades, showing at a glance the books adapted to the different stages of intellectual development of young readers.

HARTFORD (Conn.). Boys' and girls' books in the Hartford public library, 1895. 2d ed., revised and enlarged. 104 pp. O.

"Miss Hewins's admirable reading list for young people, which has long been a library standard."—*Lit. Jour.*

JOURNAL of Education (London) for Sept., 1885, contains a selected list of "100 best children's books."

LADIES' Home Journal. Five thousand books; an easy guide to the best books in every department of reading; selected, classified, and briefly described by a corps of experienced editors under the direction of the Literary Bureau of the Ladies' Home Journal. Rev'd ed. One hundredth thousand. Phila., Curtis Publishing Co., 1895. 272 pp. D. pap. 10 cts.

LEYPOLDT (Augusta H.) and Geo. Iles, eds. List of books for girls and women and their clubs, with descriptive and critical notes and a list of periodicals, and hints for girls' and women's clubs. Boston, published for the American library association publishing section by the Library bureau, 1895. 161 pp. O. cl. $1; pap. 50 cts. Or in 5 parts, Tt. pap. each 10 cts.

"It is in most of its parts an annotated bibliography within modest compass, covering the general fields of fiction, literature, the arts, etc., specialized for women only in the later and smaller divisions of the work. In the first divisions it is, if anything, too general, and the limits of books for use in girls' clubs have not been always clearly kept in mind."—*Lib. Jour.*

Part I, Fiction, occupies a third of the work. The general divisions of History, Literature, and Art, constituting Parts II and III, make a second third. The division on History was prepared by Reuben G. Thwaites, of the Wis. Hist. Soc. "Within 32 pages Mr. Thwaites has given a wonderfully comprehensive, informing, and accurate bird's-eye view of the whole field of history, carefully classified and systematized," and embracing methods of historical study and general and special notes which refer to series, to historical societies, to reference books, etc. The remaining portion of the work, including Parts IV and V, cover Education and Science and miscellaneous subjects. In this portion are included books on the kindergarten by Miss Angeline Brooks. "Education as a science and an art, including books on drawing, penmanship, shorthand, linguistics, mathematics, bookkeeping, astronomy, and physics (chiefly electricity)," is covered by Prof. Edward R. Shaw, who gives "a limited but useful selection of books under each of these minor heads." Chemistry is covered more fully by Dr. H. Carrington Bolton. Geography has 3 titles only. Geology with mineralogy 11 titles. Botany and natural history follow; also psychology, economic science, philosophy, physical culture, hygiene, nursing, self-culture, etiquette; also a bibliography of livelihoods for women and domestic economy.

LIGUE française de l'enseignement. Catalogue. Paris, 1884.

MAYOR (Jos. B.). Guide to the choice of classic books. 2d ed. London, Bell, 1885. 8°.

MEAD (W. E.). Ten years' course in literature. The Academy (Syracuse), 2:49-68 (March, 1887).

NORTH DAKOTA school report, 1892, pp. 188-190. List of 70 supplementary reading books recommended to be used in the third and fourth grades.

PRATT INSTITUTE library, Brooklyn, N. Y., issued 1891 a catalogue of books suitable for children under 14 years.

QUINCY (Mass.). Thos. Crane public library. Classified list of books for young people. Boston, 1891. 80 pp. O.

Thirteen classes, with subclasses: (*c*) indicates books for readers under 10, (*b*) between 10 and 14, (*a*) over 14.

SAN FRANCISCO free public library. Classified English prose fiction, including translations and juvenile works, with notes and index to subject-references. San Francisco, 1891. 8 + 306 pp. O.

"Mr. Cheney has taken a most decided 'step toward bringing the library into closer relationship with the schools,' as well as toward making the innate childish love of 'a story' lead to more solid and enduring reading. The classification is very varied. Under each topic, as Animals, Astronomy, Aerial voyages, there are references to serious works in the same library, carefully selected. Countries, like Austria, England, or (most minutely) the United States, and famous towns, like Boston, have the appropriate novels arranged under them by periods, institutions (slavery), events (the civil war), etc. A single title, like Harriet Martineau's tales in illustration of political economy, often serves to introduce an important section, and it is surprising, in the sum, to see to how large a range of knowledge a clue is here afforded."—*The Nation*, Sept. 3, 1891.

SARGENT (John F.). Reading for the young; a classified and annotated catalogue, with an alphabetical author-index. Prepared for publication by Mary E. and Abbey L. Sargent, and issued by the American Library Association, publishing section. Boston, Library Bureau, 1890. O. pap. 75 cts, cl. $1.00.

SAWIN (James M.). Twelfth annual list of valuable and reliable books for young people, with brief annotations. Providence, R. I., J. M. Sawin, 1891. 21 pp. D.

SCHÖNBACH (A. E.). Über Lesen und Bildung. Umschau und Rathschläge. 3te Aufl. Graz, 1889. D.

Contains (pp. 185–210) list of books recommended.

SONNENSCHEIN. See General bibliographies.

THEDEN (Dietrich). Führer durch die Jugendliteratur; Grundzätze zur Beurtheilung der deutschen Jugendliteratur, Winke für Gründung, Einrichtung, und Fortführung einschlägiger Bibliotheken, und Verzeichniss empfehlenswerther Schriften, für Eltern, Erzieher, und Bibliothekare; mit einem Vorwort von Dr. J. Chr. Gottlob Schuman. Hamburg, B. S. Berendsohn, 1883. 8 + 78 pp. O.

TITCOMB (Mary L.), librarian, and Alfred Turner, superintendent of schools. Selected list of books in the Rutland (Vt.) free library for the use of teachers and pupils in the graded schools. Rutland, 1894. 24 pp. Tt.

UNIVERSITY of the State of New York. Regents' Bulletin, No. 6, Aug., 1891, pp. 181–257. Books and apparatus. Albany, 1891. O. 25 cts.

In three parts. Part 2 "is intended as a practical guide in the selection of books suitable for the libraries of academies," etc. No attempt is made to recommend text-books.

WOLFE (L. E.). "List of books recommended for Missouri [school] libraries." Mo. school report, 1892–93, pp. 51–58.

WISCONSIN State superintendent. Lists of books for the public school libraries. Madison, Wis., 1888. 42 pp. O.

Four lists are presented: (1) For pupils in the second reader; (2) for pupils in the third reader; (3) for pupils in the fourth reader; (4) for pupils in high schools and for readers in the community. Accompanying the name of each book is given a short description of the contents.

WORCESTER Co. (Mass.) teachers' ass'n. List of supplementary reading books recommended, classified by grades. Mass. school report for 1892–93, pp. 184–188.

Includes 60 "good professional books" for teachers.

See also reference under head of Libraries (Report of Library Congress) to lists of guides to the choice of books. Also under the same head the Catalogue of the A. L. A. library. See also under various branches of study (e. g., History). Also, for a general treatment, consult Carlyle, Frederick Harrison, and Prof. C. F. Richardson on the choice of books; Dr. Noah Porter's Books and Reading; James Baldwin's The Book Lover: A Guide to the Best Reading.

Mention may be made of the classed reading lists of books on various subjects—literary, historical, scientific, etc.—in addition to those specially mentioned above, issued at intervals by the Boston, Salem, and Springfield, Mass., and the Helena, Mont.; Peoria, Ill.; Cleveland, Ohio; Milwaukee, Wis., and Newark, N. J., public libraries, and others chiefly for the benefit of students, the public school pupils, or to supplement university extension lectures.

ALGEBRA.

See Mathematics.

ANTHROPOLOGY.

CHAMBERLAIN (A. F.). Brief bibliography of the recent history of anthropology. Pedagogical Seminary, 3: 59–60 (Oct., 1894).

ANTHROPOMETRY.

HARTWELL (Edward Mussey). A preliminary report on anthropometry in the United States. In the quarterly publications of the American Statistical Association, vol. iii, new series,

HARTWELL (Edward Mussey)—Cont'd. No. 24 (Dec., 1893), pp. 554–568. Boston, Am. Stat. Assn., 1893.

Contains a provisional list of works (articles, books, and tables) relating to anthropometry in the United States, arranged in 6 classes. Class 1, art (3 titles); class 2, anthropometry of children (30 titles); class 3, methods in anthropometry (18 titles); class 4, military and naval anthropometry (7 titles); class 5, miscellaneous topics in anthropometry (27 titles); class 6, anthropometry of students (32 titles).

GENERAL BIBLIOGRAPHIES OF EDUCATION.

BOONE (Richard G.). Education in the United States: its history from the earliest settlements. N. Y., Appleton, 1890. (International educational series.) 16+402 pp. D.

Each chapter concludes with a brief bibliography, to wit: Early colonial schools, colonial colleges, colonial school systems, college curricula, compulsory education, education for women, education in the South, education of dependent classes, elective courses, elementary and secondary instruction, learned societies and libraries, national education, normal schools and institutes, professional education (law, etc.), Revolutionary period, school funds, supervision, supplementary agencies, technological training, university pedagogy, and educational literature.

CATALOGUE (American annual), 1894; being the full titles, with descriptive notes of all books recorded in the Publishers' Weekly, 1894, with author, title, subject, index, etc. [5th supplement to the American Catalogue, 1884–90.] N. Y., Office of the Publishers' Weekly, 1895. 17+211+142 pp. O. ½ leath. $3.50.

Includes the educational publications of each year.

DICTIONNAIRE de pédagogie et d' instruction primaire, publié sous la direction de F. Buisson. Paris, 1878: Hachette. 2 vols. O.

Contains (pp. 194–231) bibliography.

ENSLIN (T. C.). Bibliotheca pædagogica, oder Verzeichniss aller brauchbaren, in älterer und neuerer Zeit bis zur Mitte des Jahres 1823 in Deutschland erschienen Bücher über die Erziehungskunst und den Unterricht in Bürger- und Volksschulen. Berlin, 1823. O.

FLETCHER (W. I.). Poole's index to periodical literature: the second supplement (from Jan. 1, 1887, to Jan. 1, 1892), by W. I. F., with the cooperation of the American library association. Boston, Houghton, Mifflin, & Co., 1893. 13+476 pp. O. cl. net $8.00.

Contains reference to periodical educational literature, classified by subjects.

———. and R. R. Bowker. The annual literary index, including periodicals (American and English), essays, book chapters, etc.; with author-index, bibliographies, and necrology; ed. with the cooperation of members of the American library association and of the library journal staff. N. Y., Office of the Publishers' Weekly. O. cl. $3.50.

Succeeds to and includes the annual Poole index to periodicals; includes also the annual Fletcher (A. L. A.) index to essays, monograph chapters, and similar writings in composite books. Indexes periodical and other educational literature.

FÜHRER durch die pädagogische Literatur. Eine Auswahl der gediegensten Werke aus dem Gebiete der Erziehungs- und Unterrichts-Literatur. Vienna, 1879: Pichler. O. 60 pf.

HALL (G. Stanley) and J. M. Mansfield. Hints toward a select and descriptive bibliography of education. Arranged by topics and indexed by authors. Boston, Heath, 1886. 15+309 pp. D. $1.00.

The editors "have admitted no title merely to give it the benefit of a doubt, but have gone on the principle of requiring some positive reason for admitting every book with which the editors were not already acquainted at first hand." Works in the English, French, German, and other languages are included. The classification is as follows, the figures in parentheses giving the number of titles under each heading:

I. Pedagogical encyclopedias (13).
II. General or universal histories of pedagogy (18).

HALL (G. Stanley) and J. M. Mansfield—Continued.

III. History of education among the ancient Hebrews (12).
IV. History of education in China (4).
V. History of education in Greece and Rome (15).
VI. History of education among the Arabs (5).
VII. History of education in Christian countries (52).
VIII. Standard writers in the history of education (78).
IX. Histories of special educational institutions (78).
X. General surveys and special reports on the present state of educational institutions (152).
XI. Works on systematic pedagogy (23).
XII. Works in the field of general pedagogy (43).
XIII. Works on the psychology of pedagogy, or on special parts of it (24).
XIV. Psychological and ethical works without immediate reference to education, but recommended to teachers (30).
XV. The study and observation of children (59).
XVI. Kindergarten (39).
XVII. Plans and courses of study in lower and intermediate schools (18).
XVIII. Primary classes, especially reading and language lessons (45).
XIX. Object lessons (19).
XX. Writing (6).
XXI. Number and elementary mathematics (36).
XXII. Reading (how and what) in higher classes, i cluding vernacular language study and composition writing (26).
XXIII. Rhetoric and elocution (13).
XXIV. Music and singing (32).
XXV. Religious education (63).
XXVI. Drawing (38).
XXVII. Geography (34).
XXVIII. History and political science (68).
XXIX. Modern languages and literature (32).
XXX. Natural and physical science: General (23); chemistry (8); physics (7); mineralogy (3); astronomy (1); biological sciences (18).
XXXI. Real school (14).
XXXII. Technical and industrial education (60).
XXXIII. German gymnasia (7).
XXXIV. Ancient languages and literature (25).
XXXV. Student life and character (34).
XXXVI. The school and the family (15).
XXXVII. Moral education (46).
XXXVIII. School discipline (18).
XXXIX. Female education (55).
XL. The education of teachers (54).
XLI. University education (75).
XLII. Theological education (11).
XLIII. Medical education (16).
XLIV. Legal education (12).
XLV. Examinations and degrees (14).
XLVI. Hygiene in educational bearings (41).
XLVII. School and college gymnastics (31 and a supplementary list).
XLVIII. Endowments (5).
XLIX. Academies and learned societies (18).
L. Educational legislation (79).
LI. School control (20).
LII. Miscellaneous papers on educational topics by eminent contemporaries (61).
LIII. Miscellaneous topics: School architecture and furniture (10); garden work in schools (8); civil-service education (4); general æsthetics (9); miscellaneous educational establishments (18); general miscellany and addenda (11).
LIV. The education of the blind (59).
LV. The education of deaf-mutes (27).

HALL (G. Stanley) and J. M. Mansfield—Continued.

LVI. Criminals and reformatory institutions (23).
LVII. The training of the feeble-minded and of idiots (24).
LVIII. Neurasthenia and the insane (7).
LIX. Educational work and influences among the poor (64).
LX. Educational periodicals: In English (4); in German (18); in French (8).

HUNTER (Sir Wm. Wilson), E. M. Hance, and others. State education for the people in America, Europe, India, and Australia, with papers on the education of women, technical instruction, and payment by results. Syracuse, N. Y., C. W. Bardeen, 1895. 2+176 pp. O. cl. $1.25.

"Contains a full bibliography of education (8 pages)."—*Lib. Jour.*

INVERARDI (Rico). Bibliografia dell' educazione e dell' istruzione. Parte 1. Milan, U. Hoepli, 1893. 20+132 pp. 8°. 3 lire.

LINDNER (G. A.). Encyclopädisches Handbuch der Erziehungskunde. Vienna, 1884. 8°. 13m. 20.

"With special reference to the Volksschule; contains good bibliographies."—*Sonnenschein.*

MACALISTER (James). Catalogue of the pedagogical library and the books of reference in the office of the superintendent of public schools, board of education, Philadelphia, with bibliographical notes. Phila., 1887. 12+184 pp. D.

Thirty-two classes, with 50 subdivisions. Supplement (47 pp.) issued in 1890.

MONROE (Will S.), superintendent of schools, Pasadena, Cal. A pedagogical library. Reprinted from the Pacific Educational Journal. Oakland, Philip M. Fisher, 1892. 12 pp. Pap. O.

A catalogue of the author's own pedagogical books.

MUSÉE pédagogique et bibliothèque centrale de l'enseignement primaire. Catalogue des ouvrages et documents. Paris, 1886. Gov't print. O.

POOLE (Wm. F.). The 3d edition of Poole's index to periodical literature (Boston, 1882) was brought down to Jan. 1, 1882. The 1st supplement (Boston, 1888) extends from Jan. 1, 1882, to Jan. 1, 1887. See Fletcher, W. I.

REVIEW OF REVIEWS (The). Each issue contains, classified under "Education," the titles of the most important educational articles in the English language that have appeared in the leading periodicals during the month.

SCHOOL BULLETIN (The). Syracuse (N. Y.), C. W. Bardeen.

A bibliography of books on teaching is given in installments, beginning with the issue of May, 1892.

SCHULZE (C.). Systematische Uebersicht der in Zeitschriften, Programmen, und Einzelschriften, veröffentlichten wertvollen Aufsätze über Pädagogik 1880–1886. Hannover, C. Meyer, 1887. 8+276 pp. gr. 8°. 3.60m.

SONNENSCHEIN & Co., Pubs. Cyclopedia of education, ed. A. E. Fletcher, London, 1889. 8°. 7s. 6d.

Contains (pp. 529–562) a bibliography of pedagogy, by W. S. Sonnenschein, which has been greatly extended, and reprinted in Sonnenschein's "The best books."

SONNENSCHEIN (Wm. Swan). The best books; a reader's guide to the choice of the best available books (about 50,000) in every department of science, art, and literature, with the dates of the first and last editions, and the price, size, and publisher's name of each book. 2d ed. With complete indexes. N. Y., Putnam, 1891. 109+1,009 pp. Q.

The section on Education (XIV of class D, pp. 270–303) includes the titles of foreign works, and is "practically an extended reprint of the Bibliography of pedagogy by the writer, which is appended to Sonnenschein's Cyclopedia of Education." Classification:

I. Comprehensive works on pedagogy: Bibliography, cyclopedias, periodicals. (pp. 270–271.)

II. History and biography of pedagogy: (1) Historical, biographical, and comprehensive methodical works (universal, middle ages, contemporary, miscellaneous, philosophy of pedagogics); (2) History and biography of pedagogics according to countries, including the bibliographies of many American and foreign colleges and universities (Arabs, Belgium, China, Denmark, Egypt, France, Germany and Austria, Great Britain, Greece and Rome, Hungary, India, Italy, Japan, Jews, Netherlands, Russia, Spain, Sweden, Switzerland, United States); (3) Student life, school and university. (pp. 271–281.)

III. Educational law; codes, qualifications of teachers, etc., (generally, Great Britain, France, Germany and Austria, Italy, United States). (pp. 281–282.)

IV. Systematic pedagogy: (1) Ancient Greek and Roman; (2) Modern, with recent criticism theron. (pp. 282–286.)

V. Pedagogical psychology and ethics: (1) General works (generally, children generally); (2) Special works (æsthetics, apperception, attention, character, class teaching and private study, emotions, habit, imagination, intellectual powers, intercourse, interest, memory, order of studies, the scholar, sex, stimulus, temperament, untruthfulness, will). (pp. 286–288.)

VI. Methods of instruction: (1) Home education; (2) The kindergarten; (3) Primary education; (4) Special subjects of instruction (agriculture, art, composition, drawing, elocution, English language and literature, essay writing, French, geography, geometry, German, gymnastics, history, ancient languages, modern languages, mathematics, moral education, music, number and arithmetic, object lessons, political economy, reading, religious education, natural sciences, self-culture, sermons for schoolboys, shorthand, spelling reform, Sunday school, technical education); (5) Courses and systems of education (civil service, legal, medical, military, and university education, education of women and girls, writing); (6) Corrective and remedial education (the blind, deaf-mutes, idiots, and feeble-minded, reformatory education, educational work among the poor, stuttering). (pp. 288–301.)

VII. School management, discipline, hygiene, architecture: (1) The teacher (teachers' guides-general), corporal punishment, curriculum, discipline, examinations, inspection, marking, teaching as a career, training of teachers); (2) School hygiene (generally, eyesight, overpressure); (3) School architecture, furniture, appliances, gardening in schools, school libraries, and museums. (pp. 301–303.)

———. A reader's guide to contemporary literature; being the first supplement to "The best books." N. Y., Putnam, 1895. 15+124+775 pp. Q.

Brings the record of educational and other books down through 1893 and into 1894. It is not so much a critical selection as "a mere record of practically all new publications in book form which seem to have any lasting value at all."

SOUTH KENSINGTON museum. Catalogue of the education library in the. London, H. M. printers, 1893. 234 pp. Q. cl. 2s. 6d.

UNIVERSITY of California. Catalogue of books in the pedagogical section of the university library. Berkeley [Cal.], 1894. 66 pp. O. pap.

UNIVERSITY of the State of New York. The regents' bulletin, No. 22 (Sept., 1893), contains (pp. 280–293) a list of "references to books and articles on the world's recent progress in education," arranged by countries and recording 227 titles.

The references under head of "United States" are classified as follows: Language study (English and foreign), technical education, ethical and religious instruction, higher education of women, university extension, and professional training of teachers.

VOGEL (Dr. August). Systematische Encyclopädie der Pädagogik. Eisenach, 1881. 8°. 4m.

"With copious but not wholly trustworthy literary references, limited to German books."—*Sonnenschein.*

The standard encyclopedias give generally references to authorities and literature under the more important headings.

GEOGRAPHY.

ADAMS (Emma L.), librarian of Plainfield (N. J.) public library. Select list of travel: geographical reading. Plainfield, 1895. 12 pp. D.

"A list of books that may be used in connection with geography, to give additional information and interest." Books starred "are especially good; those marked 'T' are particularly for teachers' use."

FRYE (Alex. E.). The child and nature, or geography with sand modeling. Boston, Ginn, 1892. (American pedagogical series.) 7+210 pp. D.

Gives (pp. 206–209) a teacher's library of geography (titles nearly all in English); pp. 209–210, supplementary readers for children.

HART (Albert Bushnell). Bibliography of the methods of teaching geography. In "Studies in American education," pp. 118–120.

KLEMM (L. R.). Recent developments in the teaching of geography in central Europe. Report of Comr. of Education, 1892–93, pp. 279–321.

Concludes with a 2-page bibliography: (*a*) Methods of teaching geography; (*b*) knowledge of home surroundings; (*c*) mathematical geography; (*d*) map projection and surveying; (*e*) physical geography; (*f*) ethnology; (*g*) text-books, political geography; (*h*) geographical pictures and poetry; (*i*) geography of particular German States; (*k*) periodicals. All the titles are German.

PARKER (Francis W.). How to study geography. N. Y., Appleton, 1890. (International educational series.) 16+400 pp. D.

Contains (pp. 359–375) a classified list of books for teachers and pupils.

TARR (Ralph S.). Elementary physical geography. N. Y., Macmillan, 1896. 488 pp. $1.50.

"One of the best features is the bibliography. Each chapter is followed by a guide to the best and latest literature of what in large part we may call the new geography. Titles, price, publisher, and notes of description are given, with suggestions for securing Government publications."—*A. P. Brigham.*

See also General bibliographies: Hall (XXVII), Sonnenschein (Best books, VI, 4). Also Pedagogy: Rein.

GEOMETRY.

See Mathematics.

GYMNASIA (GERMAN).

RAPPOLD (J.). Gymnasial pädagogischer Wegweiser. Vienna, 1883. 30 pp.

Designed for beginners (or candidates) in gymnasial instruction. Contains a list of books and articles of value, arranged topically.

See also General bibliographies: Hall (XXXIII). Sonnenschein's "Best books" also gives (p. 274) 12 titles. See also Pedagogy: Rein.

HIGHER EDUCATION.

COMPAYRÉ (Gabriel). Abelard and the origin and early history of universities. N. Y., Scribner, 1893. 11+315 pp. D. (The great educators series.) cl. net $1.

Contains a 3-page bibliography of works relating to the general history of universities.

DIE DEUTSCHEN UNIVERSITÄTEN, für die Universitäts-Ausstellung in Chicago 1893, unter Mitwirkung zahlreicher Universitätslehrer, herausgegeben von W. Lexis. Berlin, A. Asher & Co., 1893. 2 vols. Q.

Vol. 1, part 1, by F. Paulsen, is a statement of the character and historical development of German universities, containing (pp. 112–114) "Litteratur über die deutschen Universitäten;" reprinted in the Rep. Comr. Education, 1891–92, pp. 326–328. A translation of vol. 1, part 1, is also published by Macmillan (N. Y., 1895).

DREYFUS-BRISAC (E.). L'Université de Bonn, et l'enseignement supérieur en Allemagne. Paris, 1879. 291 pp.

With bibliography appended.

See also General bibliographies: Hall, Sonnenschein (Best books), for reference to comprehensive bibliographies of higher education.

HISTORY.

ADAMS (C. K.). Manual of historical literature. 3d ed. N. Y., 1889.

"This is a useful and convenient guide to historical authorities. It contains not only classified lists of titles, arranged by periods and countries, but also brief descriptions of the character and contents of the most important historical works in English, French, and German, with practical suggestions as to methods and courses of historical study."—*G. Stanley Hall.*

Universal histories, pp. 31–74; histories of antiquity, pp. 75–93; Greece, pp. 94–121; Rome, pp. 121–161; middle ages, pp. 162–202; modern times, pp. 203–237; Italy, pp. 238–265; Germany, pp. 266–322; France, pp. 323–406; Russia and Poland, pp. 407–429; the smaller nationalities of Europe, pp. 430–464; England, pp. 465–565; United States, 566–672.

ALLEN (Prof. W. F.), Wisconsin University. Gradation and the topical method of historical study. Part I: Historical literature and authorities; Part II: Books for collateral reading; Part III: School text-books, supplement history topics. In Methods of teaching history, G. Stanley Hall, ed. Boston, 1885. pp. 385.

ALLEN (W. F.). Reader's guide to English history.

"This is a convenient pamphlet, containing classified lists of the best authorities and also of historical fiction and other literature illustrating English history."—*Hall.*

BOSTON public library. Catalogue of history, biography, and travel.

This "is one of the best practical guides to historical authorities upon special subjects, whether countries, periods, persons, or events. Not only are books and magazine articles classified by subjects, but there are also frequent notes, indicating the point of view from which the authors have written."—*Hall.*

BROOKLYN library catalogue. Authors, titles, subjects, and classes.

"Under the heads of 'Countries' and 'Biography' in this useful catalogue, the student will find valuable bibliographies of historical works, with oftentimes analyses of the contents of serial volumes. For example, an analysis of the extensive collections of the Massachusetts historical society, pp. 743–746."—*Hall.*

DURUY (Victor). History of modern times from the fall of Constantinople to the French revolution, tr. and rev., with notes, by Edwin A. Grosvenor. N. Y., Holt, 1894. 16+540 pp. D. $1.60.

Contains a 2-page list of references.

EMERTON (Ephraim). Mediæval Europe (814–1300). Boston, Ginn, 1894. 25+607 pp. D. $1.65.

Contains a 4-page list of books on the period.

FISHER (Rev. John Alonzo). Johns Hopkins University. Bibliography of church history, with special index. In Methods of teaching history, G. Stanley Hall, ed. Boston, 1885. pp. 385.

FISKE (John). History of the United States for schools, with topical analysis, suggestive questions, and directions for teachers, by Frank Alpine Hill. Boston, Houghton, Mifflin & Co., 1894. D. cl. net $1.

A list of topics for collateral reading is appended to each chapter. Also contains, among other appendixes, one giving the origin of the names of the States and Territories, with mention of books on the history of the States; another naming books treating of successive epochs; another indicating novels relating to American history; also a "minimum library of reference" to be used in connection with the school study of the subject.

GODARD (Harlow). An outline study of United States history. Syracuse, N. Y., C. W. Bardeen, 1895. 3+146 pp. S. leatherette 50 cts.

The plan of this book has four distinct points: (1) An outline of leading events; (2) directions for studying each topic; (3) a list of books for reference; (4) a review at the close of each study.

GORDY (W. F.) and W. I. Twitchell. A pathfinder in American history. Boston, Lee & Shepard, 1893. xii+102+xxxvi+262 pp. D. cl. $1.20.

Part 1 contains a list of reference books (pp. 91–97), a glimpse of the literature bearing upon American history (pp. 97-100), and a list of books to buy first. Part 2 contains an additional list of fiction bearing upon American history (pp. 219–221) and list of books referred to in the text (pp. 235–250).

HINSDALE (B. A.). How to teach and study history, with particular reference to the history of the United States. N. Y., Appleton, 1894. (International educational series.) 15+346 pp. D.

Each of the 23 chapters is preceded by an excellent list of references.

HISTORICAL (library method) textbook series. American history, by Albert E. Bacheler, 55 cts.; English history, by Mary E. Wilder, 45 cts.; Roman history, by Caroline B. Trask, 45 cts.; Topics for the study of Greek mythology. Boston, Lee & Shepard.

"These books contain admirably arranged outlines, with copious references to standard authors."—*Education*, Sept., 1895.

MACE (Wm. H.). A working manual of American history for teachers and students. Syracuse, N. Y., C. W. Bardeen, 1895. 297 pp.

Gives a reference list under each topic.

MALLET (C. E.). The French revolution. N. Y., Scribner, 1893. 9+307 pp. D. (University extension manuals.) cl. net $1.

Contains a 3-page list of important works on the subject.

MEAD (Edwin D.), ed. Old South leaflets. Pub. by the Directors of the Old South studies in history, Old South meetinghouse, Boston.

The directors of the Old South studies in history, in calling the attention of schools and students to these leaflets, state that they are reprints of important original papers, accompanied by useful historical and bibliographical notes. They are edited by Mr. Edwin D. Mead. They consist, on an average, of sixteen pages, and are sold at 5 cents a copy or $4 per hundred, simply enough to cover the cost of publication. "The Old South Work, founded by Mrs. Mary Hemenway and still sustained by provision of her will, is a work for the education of the people, and especially the education of our young people, in American history and politics; and its promoters believe that few things can contribute better to this end than the wide circulation of such leaflets as these. The aim is to bring valuable historical documents, often not easily accessible, within easy reach of everybody. It is hoped that professors in our colleges and teachers everywhere will welcome them for use in their classes, and that they may meet the needs of the societies of young men and women now being organized in so many places for historical and political studies." There are at present sixty-four leaflets in the series, and others will rapidly follow. The following are the titles of those now ready:

No. 1. The Constitution of the United States. 2. The Articles of Confederation. 3. The Declaration of Independence. 4. Washington's Farewell Address. 5. Magna Charta. 6. Vane's "Healing Question." 7. Charter of Massachusetts Bay, 1629. 8. Fundamental Orders of Connecticut, 1638. 9. Franklin's Plan of Union, 1754. 10. Washington's Inaugurals. 11. Lincoln's Inaugurals and Emancipation Proclamation. 12. The Federalist, Nos. 1 and 2. 13. The Ordinance of 1787. 14. The Constitution of Ohio. 15. Washington's Circular Letter to the Governors of the States, 1873. 16. Washington's Letter to Benjamin Harrison, 1784. 17. Verrazzano's Voyage. 18. The Swiss Constitution. 19. The Bill of Rights, 1689. 20. Coronado's Letter to Mendoza, 1540. 21. Eliot's Narrative, 1670. 22. Wheelock's Narrative, 1762. 23. The Petition of Rights, 1628. 24. The Grand Remonstrance, 1641. 25. The Scottish National Covenant, 1638. 26. The Agreement of the People, 1648–49. 27. The Instrument of Government, 1653. 28. Cromwell's First Speech, 1653. 29. The Discovery of America, from the Life of Columbus by his Son, Ferdinand Columbus. 30. Strabo's Introduction to Geography. 31. The Voy-

MEAD (Edwin D.)--Continued.
ages to Vinland, from the Saga of Eric the Red. 32. Marco Polo's Account of Japan and Java. 33. Columbus's Letter to Gabriel Sanchez, describing the First Voyage and Discovery. 34. Amerigo Vespucci's Account of his Voyage. 35. Cortes's Account of the City of Mexico. 36. The Death of De Soto, from the "Narrative of a Gentleman of Elvas." 37. Early Notices of the Voyages of the Cabots. 38. Henry Lee's Funeral Oration on Washington. 39. De Vaca's Account of his Journey to New Mexico, 1535. 40. Manasseh Cutler's Description of Ohio, 1787. 41. Washington's Journal of his Tour to the Ohio, 1770. 42. Garfield's Address on the Northwest Territory and the Western Reserve. 43. George Rogers Clark's Account of the Capture of Vincennes, 1779. 44. Jefferson's Life of Captain Meriwether Lewis. 45. Fremont's Account of his Ascent of Fremont's Peak. 46. Father Marquette at Chicago, 1673. 47. Washington's Account of the Army at Cambridge, 1775. 48. Bradford's Memoir of Elder Brewster. 49. Bradford's First Dialogue. 50. Winthrop's "Conclusions for the Plantation in New England." 51. "New England's First Fruits," 1643. 52. John Eliot's "Indian Grammar Begun." 53. John Cotton's "God's Promise to his Plantation." 54. Letters of Rodger Williams to Winthrop. 55. Thomas Hooker's "Way of the Churches of New England." 56. The Monroe Doctrine. 57. The English Bible, Selections from the Various Versions. 58. Hooper's Letters to Bullinger. 59. Sir John Eliot's "Apology for Socrates." 60. Shipmoney Papers. 61. Pym's Speech Against Strafford. 62. Cromwell's Second Speech. 63. Milton's "Free Commonwealth." 64. Sir Henry Vane's Defence.

The leaflets are also furnished in bound volumes, each volume containing twenty-five leaflets: Vol. I., Nos. 1–25; Vol. II., 26–50. Price per volume, $1.50.

MONTGOMERY (D. H.). The leading facts of American history. Boston, Ginn, 1893. 12+360+68 pp. D.

Contains a "short list of books on American history," pp. xxxii–xxxv of the appendix.

MYERS (Philip Van Ness). A history of Greece, for high schools and colleges. Boston, Ginn, 1895. 577 pp. 12mo. cl. $1.40.

"Besides a full bibliography at the end of the book, each chapter is followed by references to parallel readings, while numerous footnotes direct the student to the original authorities."

TRAILL (H. D.), ed. Social England: a record of the progress of the people in religion, laws, learning, arts, industry, commerce, science, literature, and manners, from the earliest times to the present day, by various writers. In 6 vols. N. Y., Putnam, 1895.

Each chapter is followed by a list of authorities covering from 1½ to 2 pages.

UNIVERSITY of the State of New York. List of 46 of the best volumes on U. S. history. N. Y. state traveling library, subject No. 973. 1894. 8 pp.

———. List of 45 of the best volumes on French history. N. Y. State traveling library, subject No. 944. 1894. 12 pp.

UNIVERSITY of the State of New York—Continued.

———. Regents' bulletin No. 31 (July, 1895) contains (pp. 679–693) a list of books especially designed to interest pupils in the study of history.

UNIVERSITY RECORD (The), 3:43–49 (June, 1893). Classified bibliography illustrating a course of lectures on methods of studying and teaching history, with particular reference to the history of the U. S. Ann Arbor, Univ. of Michigan.

VON HOLST (H.). The constitutional and political history of the United States. Chicago, Callaghan & Co., 1892. 8 vols. O.

Vol. 8 (index volume) contains (pp. iii–xxiii) a list of authorities, by Ira H. Brainerd.

WALKER (Francis A.). The making of the nation, 1783–1817; with maps and appendixes. N. Y., Scribner, 1895. 15+314 pp. D. (Am. history series.) $1.25.

Contains a 6-page bibliography.

WHITE (Francis H.). Pupils' outline studies in the history of the United States. N. Y., American Book Co., 1895. 111 pp. sq. D. pap. 30c.

Contains lists of supplementary reading—histories, poems, and novels (3 pages).

See also General bibliographies: Hall (XXVII), Sonnenschein (Best books, VI, 4), for reference to works more particularly on the study of and methods of instruction in history. See also Pedagogy: Rein.

HISTORY OF EDUCATION.

ADAMS (Herbert B.). Thomas Jefferson and the University of Virginia, etc. Circular of information No. 1, 1888, of the U. S. Bureau of Education. Washington, 1888.

Contains (pp. 203–216) "A bibliography of the history of the University of Virginia;" (pp. 301–305) "Bibliography of Washington and Lee University."

———. The College of William and Mary. Circular of information No. 1, 1887, of the U. S. Bureau of Education. Washington, 1887.

Contains (pp. 84–88) "A bibliography of the history of William and Mary College."

BISBEE (Marvin D.) and J. T. Gerould. Bibliography of Dartmouth College and Hanover, N. H. Concord, E. N. Pearson, public printer, 1894. 70 pp. O.

Reprinted from State librarian's report.

BOWES (Robert). A catalogue of books printed at, or relating to, the university, town, and county of Cambridge [Eng.], from 1521 to 1893. N. Y., Macmillan, 1894. 32+516 pp. O. cl. $3.00.

Records over 3,500 titles.

BUSH (George Gary). History of higher education in Massachusetts. Circular of information No. 6, 1891, of the U. S. Bureau of Education. Washington, 1891.

Contains (pp. 221–223) "Bibliography of Harvard University."

COMPAYRÉ (Gabriel). Abelard and the origin and early history of universities. (The great educators series.) N. Y., Scribner, 1893. D. cl.

Contains a 3-page bibliography of works relating to the general history of universities.

DAVIDSON (Thos.). Aristotle, and ancient educational ideals. N.Y., Scribner, 1892. (Great educators series.) 14+256 pp. D.

Brief bibliography (pp. 249–251), giving chief sources of information, ancient and modern.

DEXTER (F. B.). Sketch of the history of Yale University. N. Y., 1887.

Bibliography of more important sources of information, pp. 102–104.

HARVARD UNIVERSITY. List of the publications of Harvard University and its officers, with the chief publications on the university, 1870–88. Harvard Bibliographical contributions.

1870–80, by J. Winsor; 1880–85, by W. C. Lane and W. H. Tillinghast; 1885–88, by W. H. Tillinghast.

KLEMM (L. R.). Bibliography of German books on the history of education. Report of the Commissioner of Education for 1893–94, pp. 306–308.

McLAUGHLIN (Andrew C.). History of higher education in Michigan. Circular of information No. 4, 1891, of U. S. Bureau of Education. Washington, 1891.

Contains (pp. 96–97) "Bibliography."

MERIWETHER (Colyer). History of higher education in South Carolina. Circular of information No. 3, 1888, U. S. Bureau of Education. Washington, 1889.

Contains (pp. 193–198) a bibliography.

MORGAN (B. S.) and J. F. Cork. History of education in West Virginia. Charleston, State printer, 1893. 204 pp. O.

Contains (pp. 195–204) "Bibliography of the history of education in West Virginia, including a list of Virginia statutes relating thereto."

PAULSEN (F.). Geschichte des geleheten Unterrichts auf den deutschen Schulen und Universitäten. Leipzig, 1885.

List of books, pp. 797–803.

PERNWERTH VON BÄRNSTEIN (A.). Beiträge zur Geschichte und Literatur des deutschen Studententhumes von Gründung der ältesten deutschen Universitäten bis auf die unmittelbare Gegenwart. Würzburg, 1882: A. Stuber. O.

PERNWORTH VON BÄRNSTEIN (A.)—Continued.

RASHDALL (Hastings). The universities of Europe in the Middle Ages. 2 vols. Oxford, Clarendon Press, 1895.

Contains bibliographies of the different medieval universities.

SMITH (Charles Lee). The history of education in North Carolina. Circular of information No. 2, 1888, of the U. S. Bureau of Education. Washington, 1888.

Contains (p. 180) "List of the principal works consulted."

TOLMAN (Wm. Howe). History of higher education in Rhode Island. Circular of information No. 1, 1894, of the U. S. Bureau of Education. Wash., 1894.

Contains a 2-page list of works consulted.

See also General bibliographies: Hall, Sonnenschein (Best books, II), for references to extended bibliographies of the history of pedagogy, education, and particular educational institutions (i. e., universities, etc.), as well as the history of education in various countries; also Boone, under same heading, for bibliographies of the history of education in the United States.

HOME EDUCATION.

See General bibliographies: Sonnenschein (Best books, VI, 1), Hall (XXXVI).

HYGIENE (SCHOOL).

BAGINSKY (A.). Handbuch der Schulhygiene. Stuttgart, 1883. 8°. 14m.

Contains elaborate bibliographies.

BURNHAM (Wm. H.). Bibliography to article on "School hygiene," containing a "small part of the most important literature" on the subject. Pedagogical Seminary, 2: 68–71 (June, 1892).

CHRISMAN (Oscar). Literature relating to the hearing of children. Pedagogical Seminary, 2: 439–441 (December, 1893).

See also General bibliographies: Hall (XLVI), Sonnenschein (Best books, VII, 2). For a full bibliography see index-catalogue of the library of the Surgeon-General's Office.

INDEXES TO SETS OF REPORTS, ETC.

BUREAU OF EDUCATION. Publications of the U. S. Bureau of Education, from 1867 to 1890, with subject-index. Reprint of Chap. XXXV of the report of the Commissioner of Education for 1888–89, pp. 1453–1551. Washington, 1891.

BARNARD'S journal. Analytical index to Barnard's American journal of education (thirty-one volumes, 1855 to 1881). Washington, U. S. Bureau of Education, 1892. 128 pp. O.

LUNT (E. C.). Key to the publications of the U. S. Census, 1790–1887, with occasional references to other statistical works. In the Publications of the American Statistical Association, new series, Nos. 2, 3 (June, Sept., 1888), pp. 98–125. Boston, 1888.

Forms an index to the statistical and other matter in the publications of the U. S. Census, preceded by a bibliography of the U. S. Census publications.

NATIONAL Educational Association. Catalogue of papers and addresses since its first organization, subject and author classification. Report of the Commissioner of Education, 1892–93, pp. 1195–1850. Wash., Govt. Printing Office, 1895.

Subject classification under 41 heads.

MASSACHUSETTS school reports. The 50th annual report (1885–86) contains a general index (of 67 pages) to vols. 1–50.

MICHIGAN school reports. The 56th annual report (1892) contains (pp. 317–367) a personal and a subject index to the reports from 1836 to 1891.

ST. LOUIS (Mo.) school reports, 1867–79. W. T. Harris, supt. G. Stanley Hall's Bibliography of education contains (pp. 242–243) a conspectus of the contents of these reports.

INDUSTRIAL AND TECHNICAL EDUCATION.

COMMISSIONER of Labor, Eighth annual report of. Industrial education. Washington, Govt. Printing Office, 1893. 708 pp. O.

A bibliography (pp. 665–686), classified by countries, "includes the more important works, American and foreign, relating to the subject of technical education."

HICKS (Mary Dana.) Contribution to the bibliography of manual training and industrial training. Appendix O of the report of the (Mass.) commission appointed to investigate the existing systems (pp. 314–320). Boston, State printers, 1893. O.

KRAUSE (F. W. D.). Die Geschichte des Unterrichtes in den weiblichen Handarbeiten. In C. Kehr's Geschichte der Methodik (pp. 89–136). 3. Bd. Gotha, 1881.

"With valuable literary references."—*Hall.*

REPORT of the commission on industrial education, made to the legislature of the State of Pennsylvania. Harrisburg, State printer, 1889. 592 pp. O.

Gives (pp. 586–588) a list of "the most formal and important of the publications consulted." English and French titles.

SCHÖNBERG (D. G.). Handbuch der politische Ökonomie. pp. 890–904. Tübingen, 1882.

"Rich in information and literature in industrial education."—*Hall.*

See also General bibliographies: Hall (XXXII), Sonnenschein (Best books, VI, 4), University of N. Y. Also Labor: Black, West. Also Pedagogy: Rein. Also Sociology and economics: Tolman.

JEWS (EDUCATION AMONG THE).

STRASSBURGER (B.). Geschichte der Erziehung und des Unterrichts bei den Israeliten. Mit einem Anhang: Bibliographie der jüdischen Pädagogie. Stuttgart, 1885. Levy & Müller. O.

KINDERGARTEN.

BROOKS (Angeline). A selection from kindergarten literature. Open shelf, Sept., 1894. Cleveland (O.) public library.

LIBRARY Newsletter. List of books on the kindergarten and the education of the young. Osterhout (Wilkesbarre) free library. Sept., 1894.

WALTER (L.). Die Fröbelliteratur. Zusammenstellung, Inhaltsangabe, und Kritik derselben. Dresden, Adler, 1881. 197 pp. O.

"Attempts to give titles and a very brief digest of the contents of every important work pertaining to the kindergarten since 1838. Variously classified, not only by date, but by the standpoint of the writer, including those offered in the official reports on kindergartens by French, Belgian, and German commissions."—*G. Stanley Hall.*

See also General bibliographies: Hall (XVI), Sonnenschein (Best books, V, 1, and VI, 2).

LABOR QUESTION.

BLACK (J. Wm.). References on the history of labor and some contemporary labor problems. Oberlin College library bulletin, Vol. I, No. 2. Oberlin (O.), May, 1893.

Contains, among others, references to the literature in the English language on compulsory education, industrial training, cultivation of thrift, women and children in industry, recent progress of the working classes.

WEST (Theresa). Bibliographical list. Labor and the laboring classes, and industrial education. Milwaukee public library. Quarterly index, vol. 1, No. 8 (Oct.–Dec., 1887).

LAW.

See Professional education.

LIBRARIES.

CATALOG of "A. L. A." library. 5,000 volumes for a popular library, selected by the American library association and shown at the World's Columbian Exposition. Washington, U. S. Bureau of Education, 1893. xx + 592 pp. O.

Contains directions for purchase and arrangement of A. L. A. library; abbreviations; separate lists of "biography" and "fiction;" subject catalog according to the decimal classification (Dewey system); subject catalog according to the expansive classification (Cutter system); author index (sample page); subject index (sample page); dictionary catalog.

The Catalog is designed to be of practical service to librarians (1) in the selection of books, and (2) in classification and cataloging. The original library is now permanently deposited with the Bureau of Education in Washington.

CUTTER (Charles A.). Rules for a dictionary catalogue. Third edition. Washington, U. S. Bureau of Education, 1891.

Contains (pp. 128–133) "Bibliographical aids in cataloguing."

REPORT of the Commissioner of Education, 1892–93, pp. 691–1014. Papers prepared for the World's library congress, held in connection with the Columbian Exposition at Chicago. Washington, Govt. Printing Office, 1894.

The following bibliographies or reference lists are contained among these papers:

Fires, protection, insurance (8 references), p. 733.

Executive department—supervision, management, etc. (½ page), p. 809.

Accession department, pp. 822–826, under the following heads: Selection of books; buying duplicates; specialization of libraries; buying; disposal of duplicates; gifts; collation; accession book; marks of ownership, etc.

Pamphlets (1 page), pp. 834–835.

Museums, art galleries, and lectures in connection with public libraries (½ page), pp. 860–861.

Classification, pp. 893–897, subdivided as follows: (I) Classification of knowledge. (II) Classification of books: History, outlines of older systems, criticism; systems of classification; uniformity of practice; classification by subjects; logical or scientific classification; classification of particular subjects; loose or close classification; fixed or movable location; subordinate arrangement; notation.

Loan systems (8 references), p. 906.

Fiction, pp. 937–939, classed as follows: Aids to reading and the selection of books for libraries; annotated and selected lists of novels; books, articles, papers, etc., relating to fiction.

On reading for the young (1 page), pp. 948–949.

Reference books, pp. 980–981.

Indexes and indexing, p. 1014.

MANAGEMENT AND DISCIPLINE.

See General bibliographies: Hall (XXXVIII), Sonnenschein (Best books, VII, 1).

MANUAL TRAINING.

See Industrial education: Hicks. Also Pedagogy: Rein.

MATHEMATICS.

BEMAN (W. W.). List for the use of secondary teachers. Academy (Syracuse), 3:174 (Apr., 1888).

CAJORI (Florian). The teachings and history of mathematics in the United States. Circular of information No. 3, 1890, of the U. S. Bureau of Education. Washington, 1890.

Contains (pp. 395–400) "Bibliography of fluxions and the calculus. Text-books printed in the United States."

———. A history of mathematics. N. Y., Macmillan, 1894. 422 pp. 8°. cl. net $3.50.

A list of 100 works on the history of mathematics is given.

CONANT (Levi L.). Text-books in arithmetic. Pedagogical seminary, 2:152–163 (June, 1892).

A list of some contemporary German, French, and American arithmetics, with critical remarks thereon.

HARDY (A. S.). Courses of reading in mathematics. The Critic, 3:321, 334 (July 28, Aug. 11, 1883).

STERNER (Matthaeus). Bibliography of the history and methods of arithmetic. Reprinted from the author's Geschichte der Rechenkunst, in the report of the commissioner of education, 1893–94, pp. 314–000.

231 titles, all German.

TURIN. Catalogo della biblioteca speciale di matematica della R. Università di Torino. Torino, 1891. 39 pp. O.

CHAPTER XVII.

INTERNATIONAL EXPOSITION OF 1894 IN MILAN.

By C. Wellman Parks.

Of all the expositions of 1894 this is most deserving of the name "Educational Exposition," as will be seen by what follows. Located in and about the castle, it was less than a mile from the cathedral and within easy walking distance of the homes of the people. It was contained in an inclosed area of about 50 acres, of which 11½ acres were covered with buildings. By an inspection of the following list of titles of groups it will be seen that the exposition was partly national and partly international:

I. A national exposition of fine arts.
II. An international exposition of industries.
III. A national exposition of wine and oil.
IV. An international exposition of wine and oil machinery.
V. An international exposition of photography.
VI. A national exposition of graphic and allied arts.
VII. An international exposition of publications.
VIII. A national exposition of horticulture.
IX. A national exposition of theatrical arts.
X. A national exposition of geography.
XI. An international exposition of postage stamps.
XII. An international exposition of sports.

Group I.—Fine Arts.

This was the triennial exhibition of the Academy of Fine Arts of Milan. It comprised pictures in oil, water color, and pastel; sculpture in marble, gypsum, terra cotta, bronze, wood, and ivory, and medals. About 1,800 works were shown in a space of about 80,000 square feet. The large space devoted to the exhibit, together with the excellent quality of the works shown, made this by far the most attractive part of the exposition.

Group II—Industrial Arts.

This contained 2,600 exhibits arranged in a space of about 100,000 square feet. Of these exhibits about 1,500 were Italian and the others were from America, Belgium, England, Germany, and Switzerland. This group was divided into the three departments of labor, social economy, instruction.

The department of labor was again subdivided into: (1) Products of individual labor; (2) products of collective labor; (3) products of skilled labor in factories and fields.

The department of social economy comprised the following sections: (1) Societies for corrections; (2) workshops; (3) workmen's cooperative societies; (4) institutions and methods intended to prevent accidents and to succor unfortunate workmen; (5) descriptions, models, designs, and materials showing the housing, feeding, and clothing of laborers in cities and in the country; (6) bibliography.

The department of instruction comprised the following sections: (1) Workmen's schools; (2) trade schools; (3) educational institutions—(*a*) asylums, (*b*) workmen's educational clubs, (*c*) libraries, (*d*) supplementary school instruction; (4) bibliography.

The department of labor contained two very attractive exhibits, one being an exhibit of the small industries in operation—in all 91 industries—the other was a large exhibit made by the Cooperative Society of Italian Furniture Manufacturers. Among the many attractive examples of furniture was a bedroom set made of American Southern pine, and it was a very fine piece of work which showed the beautiful grain and figures of the wood.

In the department of social economy the Society of Peace (Lombard Union) exhibited two large paintings called Horrors of War and Benefits of Peace. In the same department were shown exhibits made by three of the reformatories of the province of Milan. The exhibits consisted of specimens of printing, bookbinding, furniture making, wood carving, carpentry, floor designing and making, tailoring, shoemaking, forging, and musical instrument making.

Statistical exhibits were made by the insurance associations of Milan and by the National Accident Assurance Association. Up to the end of 1893 the latter institution had assisted 35,513 unfortunates. The following table shows the popularity of the institution:

Date.	Number of insured.	Date.	Number of insured.
1884	443	1889	86,645
1885	13,019	1890	101,372
1886	31,830	1891	107,432
1887	46,522	1892	112,485
1888	65,418	1893	119,447

The association exhibited some safety devices which may be applied to tools and machines which are rather dangerous. It also distributed a pamphlet in which many such contrivances are described.

The "Night hospital," "Piece of bread," and "Bread for all," of Paris, made exhibits to illustrate the work done by each.

The "Kitchen for the sick poor," of Milan, made an extensive exhibit which showed the good work done by the institution. The receipts for the past winter were about $2,215. Between November 15 and March 31 this money was expended for the following articles, which were distributed among the sick poor in the crowded parts of Milan:

Liters of broth	30,869
Rations of meat	7,934
Rations of wine	5,737
Rations of milk	5,882
Rations of eggs	4,200
Kilograms of bread	5,788

Another section of this department contained an international exhibit of asylums, dormitories, refectories, lavatories, etc. One collection showed the habits and customs of British India. Another, prepared at the school for girls conducted by the Israelitic Alliance in Salonica, was of characteristic objects, methods, and costumes of Macedonian workmen.

In the department of instruction the first exhibit was that made by the Milanese Society for the establishing of schools for adults and to teach the small trades of the country. The exhibit consisted of drawings, lace, machine, and furniture designs, and some examples of manual work in wood and iron.

BERGAMO.

The Royal Technical Institute, Victor Emanuel II, exhibited many exercises in composition prepared by the students, also machine drawings, models, and patterns.

The Industrial and Commercial School which is annexed to the above-named institution made a very interesting exhibit of work by pupils, courses of study, statistics, etc. The institution is divided into seven sections as follows: (1) Preparatory to professional section of the Technical Institute; (2) preparatory to mechanic arts—wood, metal, foundry; (3) preparatory to textile arts—spinning and weaving; (4) preparatory to graphic arts—typography, lithography, and chromolithography; (5) preparatory to plastic arts—modeling, sculpture, intaglio; (6) preparatory to masonry construction; (7) preparatory to smaller trades and the lower grades of superintendence.

In the first section the instruction is for general culture. In all other sections it is purely technical. For the first and second sections the length of course is three years and for all other sections it is five years, of which three are spent in the school. During the last two of the five years' course the pupils work during the

day in factories and attend school in the evening to follow courses in drawing and in foreign languages. The scholastic day is divided into two sessions—one from 8 in the morning until noon, the other from 2 to 6 o'clock in the afternoon. The morning session is used for theory and the afternoon session is used for drawing and practice.

There are workshops for forging, carpentry, model making, turning, joining, foundry, machine work, electricity, spinning and weaving, typography, lithography, and modeling. The following subjects are taught to all students: Mathematics, physics, chemistry, Italian, French, history, geography, caligraphy, free-hand drawing, clay modeling, and machine-shop practice. Accounts, trade, and natural history are taught to the commercial pupils. Mechanics, machine design, fabric design, weaving, topography, building design, graphics, and modeling are taught to the appropriate special classes.

BRESCIA.

The School of Design, of Brescia, made an exhibit similar to that last mentioned; that is, of drawings, woodwork, carving, modeling, and ironwork.

LECCO.

The Lecco School of Applied Arts exhibited a collection of free-hand and mechanical drawings.

MONZA.

The trade school of Monza exhibited machines, fabrics, designs for machines, patterns for fabrics, and color schemes for fabrics.

NAPLES.

The Alexander Volta Industrial School, of Naples, showed a very extensive exhibit of machinery, tools, models of mechanics and electrical apparatus, a steam engine in operation, and drawings.

PONTEDERA.

The Royal School of Arts and Measures, of Pontedera, exhibited furniture, wood carving, plaster models, and designs.

VARESE.

The Professional School of Measures, of Varese, exhibited work similar to that last mentioned.

BARI.

Prof. G. Pezzarossa, of Bari, exhibited some well-constructed school furniture.

MILAN.

The Galileo Galilei School of Horology, the School of Mechanic Arts, and the Textile School exhibited models, drawings, designs, plans, and examples of manual work. The School of Horology was further represented by the watchmaking class, which was at work in the exposition. The institution for the blind had pupils at work in the exposition making baskets, mats, chair bottoms, and scroll-saw work.

The Educational League of Milan exhibited furniture used in the schools, kindergarten work, written exercises, and other work done by the pupils.

The School and Family, a protective institution for the poor scholars in Milan, made an extensive exhibit, by means of charts and objects, of the purpose and work of the institution. Its scope is: (1) To render the elementary communal schools more educative, to guard poor pupils from fear on account of unblamable transgressions of school discipline, and to keep them more attentive to the instruction given in the schools. (2) To help poor families to conform to the obligatory law to educate their children in the public schools. (3) To keep neglected children from idleness and vagabondage after school hours, and to initiate them into easy and agreeable manual work in order to make them acquire the habits and love of work. The work is confined to children from 6 to 10 years of age. November 4, 1886, the first place, which was for boys, was opened, with 50 pupils. November 7, 1887, a place for girls was opened, with 50 pupils. Since that time 2 more places have been opened for boys, one on November 5, 1889, the other on April 14, 1894. The capacity of each place is for 100 children, but 2 of the places are overcrowded, one having 120 and the

other 105 children. The following tables show the financial side of the work. The values are in lires, which may be estimated at 19.7 cents.

	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891 (6 months).	1892.	1893.

S. ZENONE AL PO.

Suigi Ponti exhibited some school furniture in which the chair seats are made of canvas hung as in a well-known class of steamer chairs.

TURIN.

Pastore Ferdinando exhibited a very good collection of mechanical models.

Zambellie & Co. exhibited a chemical laboratory fitted with apparatus made by the company. This exhibit was shown at Chicago, where it received an award.

VERONA.

The Teachers' Club, of Verona, exhibited an interesting collection of scientific, didactic, and professional materials.

ASYLUMS.

The Notturno Lorenzo and Teresa Sonzogno, at Milan, and the Raffaele Sonzogno, at Rome, were exhibited by means of large wooden models of the buildings, by sections, showing the interior arrangement, and by statistical charts showing the operations. Specimens of the furniture used and of work done by the inmates were shown.

WORKMEN'S CLUB.

The Workmen's Club, of Milan, which was organized to instruct by classes, lectures and debates on economical questions, to furnish library privileges, and to develop the members physically by means of gymnastics, fencing, target shooting, and swimming, made an extensive exhibit to illustrate the methods used. This work is being conducted at very small expense, the fees received from members being the principal source of income. These are about 40 cents entrance fee and about 10 cents a month.

SUPPLEMENTARY INSTRUCTION.

The Union of Furniture Manufacturers encourages evening classes of drawing in all of the principal cities for the purpose of securing new furniture designs. In the gallery where the furniture was exhibited the walls were covered with drawings made by pupils of these evening classes. The superintendent of the exhibit stated that the manufacturers believe that the cost of these classes is trifling when the results are considered, for many designs are secured from those who would likely not become professional furniture designers. The drawings were not at all confined to furniture designs, but covered all classes of work usually done in the best art schools.

GROUP III.—WINE AND OIL.

This was, for the Italians, one of the most important exhibits from a commercial standpoint. The exhibit was confined to Italian wines and oils and covered a great deal of space, with a monotonous array of bottles, which made it rather uninteresting to the ordinary visitor.

GROUP IV.—OIL AND WINE MACHINERY.

This was an international exhibit, and was interesting as showing the eagerness of the Italians to improve their national products by the adoption of any machinery or methods, whether Italian or foreign, which will do this.

GROUP V.—PHOTOGRAPHY.

This was one of the most interesting and instructive groups of the whole Exposition. Promoted by the Lombard Photographic Society of Milan for the purpose of showing the great strides which have been made within the six years since the Florence Exhibition of 1888, it must be called a great success, for, in a space covering 20,000 square feet, there are shown the great advances which have been made in astronomical, topographical, mechanical, physiological, pathological, and criminal anthropological studies that are due to obscure and important facts that have been shown by the camera.

The group is subdivided as follows:

I. Professional photography.

II. Amateur photography.

III. Technical and industrial photography: (*a*) Productions; (*b*) applications; (*c*) reproductions; (*d*) science.

Among the works shown were sheets of the map of the heavens—a work in the production of which all nations are cooperating; topographical relief maps of the sierra in Argentina and of about 450 square kilometers of the Alps. Lippman's color productions, studies of motion of animals, birds, and projectiles, and Dr. Paul Jeserick's criminal photographs. Among the institutions represented were the observatories of Catania and Prague, the Museum of Venice, the Military Geographical Institute of Florence, and the Photographic Studio of Salpêtrière of Paris. One of the most important parts of the exhibit was a laboratory equipped to show all of the latest apparatus and methods.

GROUPS VI AND VII.—GRAPHIC AND ALLIED ARTS AND PUBLICATIONS.

These exhibits occupied about the same amount of space as the photographic group. The exhibits, which were classed in 40 elementary sections, were prepared and installed with the assistance of the Italian Society of Authors, the Association of Italian Publishers, the Milanese Typographical Union, and the Lombard Association of Journalists. The exhibits were as interesting and instructive as they were varied and extensive, showing, as they did, all of the current methods of type and plate making, composition, presswork, binding, and finishing. The collections of finished books and of journals was very large. In this exhibit especial attention was given to all of the methods of illustrating books.

Group VIII.—Horticulture.

This occupied about 30,000 square feet of ground inside of the Exposition inclosure. Just outside the inclosure there were about 50 acres of permanent public garden.

Group IX.—Theatrical Art.

This was installed in a building of classic lines and lively coloring, called the Pompeian Theater. Believing that much of national industry and much of international artistic fame is due to the theater, a space of 50,000 square feet was provided for this group. The group was subdivided as follows:

I. Industrial: (*a*) Construction of theaters; (*b*) preparation of scenery; (*c*) stage accessories; (*d*) marionettes and puppets; (*e*) instruments; (*f*) musical and dramatic publications.

II. Illustrative part: (*a*) Musical and dramatic literature; (*b*) records of teachers, authors, singers, and of ancient and modern actors.

III. Executive part, which was shown in concerts, congresses, musical and dancing exhibitions, dramatic representations, reunions of bands, choral clubs, mandolin clubs, guitar clubs, etc.

Group X.—Geography.

This was prepared with the assistance of the Italian Geographical Society of Rome, the Milan Society for Commercial Exploration in Africa, and the African Society of Florence and Naples. It was divided into two sections, of which one was intended to show the work done by Italians in Africa and the other to show the Italian technical products which are of importance in international commerce and regions in which such articles are or could be used. This exhibit, which occupied a space of 15,000 square feet, consisted of objects, charts, and geological, mineralogical, botanical, and commercial maps.

Group XI.—Postage Stamps.

This was divided into sections as follows:

I. Postal history and legislation.

II. Postage-stamp literature and bibliography.

III. Manufacture and sale of postage stamps.

IV. Postage-stamp collections.

About 15,000 square feet of space was devoted to this very interesting exhibit.

Group XII.—Sports.

There were two general divisions: One of sporting industry, apparatus, and games; the other, of sports in operation.

The former division was again divided into: (*a*) Horse sports; (*b*) hunting; (*c*) target shooting; (*d*) bicycling; (*e*) skating; (*f*) canoeing; (*g*) gymnastics; (*h*) fencing; (*i*) mountain climbing; (*j*) pigeons; (*k*) aëronautics; (*l*) fishing.

The latter division consisted of horse and bicycle racing; football and tennis matches; pigeon flying; fencing, swimming, gymnastic, rowing, and skating contests.

CHAPTER XVIII.

THE LYONS UNIVERSAL EXPOSITION OF 1894.

By C. Wellman Parks.

The Exposition in General.

The Lyons Exposition of 1894, like the Chicago Exposition of 1893, was located in a large and beautiful park. This park, however, is unlike the Chicago park, for the latter was beautifully made from a great swamp, while the Golden Head Park, of Lyons, is on ground which is a park by nature. This park is on the left bank of the Rhone, about a mile north of the center of the city, so its lake, hills, and woods can be easily reached by all the inhabitants of the city. The lake, which lies within 500 feet of the river, has an area of about 40 acres. Its shores are covered with a succession of woods and lawns, so arranged that the combination of islands and shore makes every view beautiful.

No finer setting could be desired and no people is better fitted than the French to use this setting; so one is prepared to learn that the buildings of the exposition were artistically designed and located.

To those who are familiar with the great circus tents it may seem impossible that the main building of the Lyons Exposition could be artistic, for it was a great conical building nearly 800 feet in diameter and 200 feet high; but it is a fact that it was so successfully treated as to make one believe that nothing more appropriate could have been designed for the location. Its circular floor plan and conical roof furnished certain desirable qualities in an exposition building. The circular floor plan made it convenient to have a series of circular paths and a series of radial paths. Along the radial paths could be arranged the different steps in the manufacture of any article, so that a visitor beginning at the wall of the building could follow the process from the beginning to the end and find the finished product at the center of the building. The circular paths make it convenient to compare the steps in similar manufacturing processes, for the exhibits can be so arranged that when in the same stage of progress they will be on the same circular path. The conical roof acted as a great reflector for lights placed high above the ground in the middle of the building, so that the illumination was very good. It also made the building easy to ventilate, for the structure was like a great chimney. The air entered through the doors and openings in the floor and passed out through the cupola.

Probably no visitor was impressed by the magnitude of the building, for the interior was so divided that one never seemed to be in a large room, but always in small rooms, which did not dwarf the exhibits. This seems to be the first principle of museum installation; that is, to so adjust the size of hall to the character of the exhibit that a visitor may never think of the hall, but always of the articles exhibited.

The largest of the other buildings were those for fine arts, religious arts, education, agriculture, Tunis, Algeria, and Anam and Tonquin. The Algerian building was an exact reproduction of the palace of Mustaph of Algiers. The Tunis building was a reproduction of the mosque of Souk-el-Bey at Tunis, and the building for Anam and Tonquin, which was built and decorated by native workmen, resembled a large pagoda near Hanoi.

This exposition was practically one of France and the French Colonies, although there were some exhibits from other nations, notably the silk exhibit from Japan. As far as France and the colonies were concerned, it can be said that the exposition was good—that there were many fine buildings filled with instructive exhibits.

Educational Exhibits.

These may be classed as national, departmental, and municipal. The national exhibits were French, the departmental exhibits were of the Rhone, and the municipal exhibits were from Lyons, Paris, Grenoble, St. Etienne, St. Fons, and Odessa.

National Exhibits.

The minister of public instruction made the following statistical exhibit of the work done for elementary instruction:

Buildings:	
Built from 1878 to 1892	27,000
Repaired, enlarged, and furnished, 1878–1892	10,000
Cost—State, departmental, and communal	$120,000,000
Teachers (public and private):	
1872	110,238
1892	142,660
Pupils:	
1872	4,722,751
1892	5,623,401
Annual budget:	
1872	$13,000,000
1892	33,000,000

PEDAGOGIC MUSEUM.

The National Pedagogic Museum at Paris made an interesting exhibit of articles of clothing, arranged to show the steps in the process of cutting and making clothing. There were also text-books used in the public schools, and samples of approved furniture, maps, charts, globes, models, and apparatus. The collection of reports and works on elementary and secondary education was very large.

NATIONAL SCHOOL OF FINE ARTS.

This institution exhibited well-arranged collections to show the work done in the classes of principles, perspective, archæology, architecture, flower work, decoration, industrial application, painting, and modeling.

NATIONAL VETERINARY SCHOOL.

This institution, which is located in Lyons, made a very good exhibit by means of models, books, and photographs. There were many models of domestic animals and of insects that injure such animals. The methods of culture of microbes were extensively shown.

Departmental Exhibits.

NORMAL SCHOOLS.

The normal schools for men and for women made usual exhibits of drawings and apparatus, but did not show anything unusual.

SCHOOL OF AGRICULTURE.

The Practical School of Agriculture of the Rhone, which is located in the city of Lyons, exhibited charts to show the courses of theoretical instruction and of professional instruction, and also the time schedule. There were maps of the grounds of the institution, models to show the methods of training and pruning vines and fruit trees, specimens of grafting, an extensive collection of plants and insects, and an agricultural map of each commune of the department of the Rhone.

Municipal Exhibits.

ODESSA.

The exhibit from Odessa consisted of a single volume, of which the title is Administration Municipale de la ville d'Odessa, Etablissements Municipaux d'Instruction Publique. It is a large volume, well illustrated with plans and views of all of the school buildings of Odessa.

GRENOBLE.

The Vaucanson School made an exhibit of iron and bronze work which had been done in the manual training classes.

ST. ETIENNE.

The school for deaf mutes, which is conducted by the Christian Brothers, exhibited by means of photographs and diagrams the vocal method used in the institution. Its exhibit contained specimens of printing, clothing, boots, and ironwork, which were the results of students' work.

The local school of industrial art made a very large exhibit of drawings, models, engraved steel and copper plates, gilded and enameled work, and of gold and silver inlaid work.

ST. FONS.

A private school at St. Fons made an exhibit of architectural and mechanical drawings.

PARIS.

The school exhibits made by the city of Paris were almost exactly like those made at the same time in Antwerp, and as the exhibits in Antwerp have already been described, it is unnecessary to repeat the description in this place.

A. Féret made an exhibit of his adjustable school tables, which, being wholly of wood, might be found excellent in countries where iron is hard to get or too expensive to be used as freely as it is used in American school furniture.

Gustave Guérin & Co. exhibited text-books, of which a few were French grammars, but most were histories, geographies, and maps.

LYONS.

Chamber of commerce.—In Lyons the chamber of commerce has been much interested in all institutions designed to increase the commercial importance of the city. Among the institutions in which it has been most interested are the Historical Museum of Cloths, the School of Commerce, the Weaving School, the Industrial Chemical School, the Central School, and the Society of Professional Instruction of the Rhone.

The following table shows the amounts of money which the chamber of commerce has contributed for the organization and support of these institutions:

1872.

Assistance in founding the School of Commerce	$20,000.00

1877.

Assistance in founding a cloth department	10,000.00
For a weaving course	1,400.00
	31,400.00
For support of students	14,460.00
Total	45,860.00

1884.

For the founding of an Industrial Chemical School in the faculty of sciences:	
Materials	8,400.00
Salaries	4,000.00
Purses	6,130.00
	18,530.00
School of Commerce for Women—one-half of the salaries (the city of Lyons paid the other half)	24,565.00
Municipal Weaving School subscriptions	8,665.00

Historical Museum of Cloths:	
Arranging the second story of the building of the chamber of commerce	$20,000.00
Arranging new galleries	45,495.00
Increasing collections	126,921.75
Administration and salaries	77,053.65
Total	269,470.40
This museum has received by bequest	4,000.00
From the city	6,000.00
Society of Professional Instruction of the Rhone:	
Subscriptions	24,400.00
Prizes for teaching of industrial arts	23,639.00
Miscellaneous subscriptions	17,225.00

The exhibit of the chamber of commerce contained large maps made to show the places where silk is produced, where it is manufactured, and where it is used. The maps showed the relative importance of the different manufacturing centers and markets and the part taken by each nation in supplying silk to other nations. They were especially well designed and executed.

Another part of the exhibit was made up of specimens of dyeing which had been done in the Industrial Chemical School.

The principal part of the exhibit made by the chamber of commerce was that of the Historical Museum of Cloths. This museum has been and is of the greatest value to Lyons in keeping its cloth designs in the front rank. On January 24, 1856, the chamber of commerce decided to open an industrial museum in the building of the chamber of commerce. On March 6, 1864, a general museum was opened to the public. Later the chamber decided to confine the museum to the cloth industries, especially to those relating to silk. At present the eight exhibition halls are used as follows:

I. Cloths from the first to the end of eighteenth century.
II. Embroidery and cloths to the end of eighteenth century.
III. Laces to the end of eighteenth century.
IV. Embroidery and laces of nineteenth century.
V. Chefs d'œuvres of the textile industries, Persian tapestries, and embroideries of the fourteenth, fifteenth, and sixteenth centuries.
VI. Machinery and appliances.
VII. Lyons cloths of the nineteenth century.
VIII. Western stuffs of which the designs were inspired by those of the East and the Far East.

One of the most important parts of this museum is the library of decorative arts, which is open to the public daily from 11 to 4, and in winter from 7 to 9.30 in the evening.

By decades the visitors to the exhibition halls and the different readers have been as follows:

Years.	Visitors.	Different readers.
1864–1873	15,000	400
1874–1883	20,000	550
1884–1893	30,000	800

The value of these small special collections seems to be fully understood in the industrial centres of Europe; but in America, where the supply of manufactured goods has been less than the demand for such goods, the communities have not learned their value. Now that competition has become more serious, communities should work together to improve the quality of all products of their manufacturing establishments, and the industrial museum and library are well-tried measures for this work.

School of Commerce.—This institution, which is under the patronage of the chamber of commerce, made an exhibit of work which had been done in the departments of weaving, dyeing, and accounts.

Central School.—This institution, which is also under the patronage of the chamber of commerce, made an exhibit of work which had been done in the departments of architecture, stonecutting, and mechanics.

Superior Commercial School for Women.—This institution, in which one-half of the salaries are paid by the chamber of commerce, made an exhibit of maps, books, and plans of courses of instruction.

Society of Professional Instruction of the Rhone.—This society is one which has done a great deal for the spread of education among the laboring classes of Lyons. It was founded in 1864 to organize courses of instruction for adults, and especially trade courses for workmen and apprentices. The intention was to enable this class of people to profitably use their leisure hours and to supplement the elementary school work with the special knowledge required for the intelligent performance of their trade duties. The society carries on its work by means of classes, lectures, and libraries. Beginning with the winter of 1864–65 these lectures were given every Sunday morning in winter before audiences of from 1,000 to 1,200 people. The year of the Franco-German war caused the lectures to be suspended for the winter of 1870–71, but they were resumed the next winter and continued through the winter of 1872–73, after which they were given up. The lecturers were professors, savants, and men of letters of Paris, Lyons, Montpelier, Geneva, etc. For several years there has been a new lecture course which takes the place of the older course. It is a Sunday morning course given to the scholars who attend the classes of the society and to the members of the society by members of the faculties of law and of letters of the Academy of Lyons. The library work is carried on in a central library and in seven branch libraries. The classes meet in the evenings from 8 to 10 o'clock, and on Sunday mornings.

The courses last from October to April and there are from 50 to 75 lessons in each course. If the students desire it a course may be continued for three months of the spring and summer. The courses are organized when at least 20 agree to follow the course. If at any time the number falls below 20 the society may discontinue the course. There are some courses of especial importance, which are given when the number of participants is much less than 20. As will be seen by an inspection of of the above list of classes there are a large number of similar classes so located that they are conveniently near the homes of the participants. Some special courses are given in only a few central localities, to which all who wish to follow these courses must go. Nearly all classes have been organized at the request of the participants themselves.

The following will show the development of the system:

First year, 1864–65, 25 classes; 1,359 pupils. Fourth year, 1867–68, 28 classes; 1,187 pupils. This year courses were first opened for women. Fifth year, 1868–69, 35 classes; 1,214 pupils. Seventh year, 1870–71, Franco-German war. During war, 13 classes for women; after war, 8 classes for men; 749 pupils. Tenth year, 1873–74, 71 classes; 3,384 pupils. Fifteenth year, 1878–79, 110 classes; 5,738 pupils. Twentieth year, 1883–84, 148 classes; 8,012 pupils. Twenty-fifth year, 1888–89, 150 classes; 5,429 pupils. Thirtieth year, 1893–94, 161 classes.

The numbers given are of different individuals who have attended at least 10 exercises each. The number of pupils for the later years is much less than ten years ago, because there are less illiterate people in the city, so less elementary classes have been needed. The number of elementary classes has decreased steadily since 1881, while the professional courses have increased both in number and in attendance. Another reason for the decreased attendance is that the city now gives similar courses of instruction. Since 1874 honorable mention has been made of those pupils who attended every exercise in their courses. In 1874 there were 84 honorable mentions, in 1879 there were 743, and in 1884 there were 1,354.

The financial resources of the society consist of (1) Subsidies from the minister of commerce and industry and the minister of public instruction. (2) Subsidies from the municipal council of Lyons, the general council of the Rhone, and the chamber of commerce of Lyons. (3) Fees paid by members of the society. (4) Subscriptions by people who agree to give a certain sum annually for five years. (5) Fees from students. (6) Interest from invested funds.

The society has an invested surplus of about $7,000, which is required when a year's expenditures are greater than the receipts for that year, and also when the expenditures have to be made before the subscriptions are due.

The financial exhibit is as follows:

Year.	Receipts.	Expenditures.	Year.	Receipts.	Expenditures.
1864–65	$8,300	$5,450	1878–79	$14,400	$14,175
1868–69	6,000	5,300	1883–84	17,100	17,150
1873–74	9,800	9,600	1888–89		16,200

The exhibit contained charts giving the above information and specimens of work done in the various manual-training classes.

Municipal schools.—Photographs and plaster models of buildings and examples of desks, seats, charts, maps, and apparatus, used in the schools of the city of Lyons were shown.

The elementary schools, the secondary schools, and the supplementary courses were represented by charts, diagrams, plans, models, apparatus, and pupils' work in wood and iron working, sewing, embroidery, designing, map drawing, and composition.

Municipal schools of weaving and of embroidery.—These institutions were represented by charts and plans and by exhibits of work done in the schools.

Municipal schools of design.—These institutions were represented by collections of drawings arranged to show the work done in the classes of descriptive geometry, linear perspective, geometrical design, machine design, cloth design, carpet design, and jewelry design.

Municipal course in botany.—The Golden Head Park is to a great extent managed as a botanical garden, especially of trees and shrubs. Those in charge of the work in the park give a course of practical instruction in botany to all who wish to follow the course, which consists of weekly exercises, beginning April 27. This work was represented by models, apparatus, seeds, plants, and photographs.

Society for the Care of the Blind and Deaf Mutes of Lyons.—This society made an exhibit of books, maps, written exercises, knitting, basket work, rope and brush making, and clothing which had been made by the pupils.

"La Martinière."—This school, which is the result of a legacy of about $140,000 left by General Martin, who died in Lucknow in 1800, is located in the old Augustinian monastery. The legacy when it was received in 1826 amounted to about $340,000. This fund has been added to by other legacies, so that the income for 1894 amounted to about $38,400. The school is managed by a board of 8 commissioners, of whom the mayor of Lyons is ex officio president. The other members are appointed by the municipal council of Lyons, with the consent of the minister of commerce. The purpose of the institution is to teach the sciences and arts as applied to industry and commerce, but not to train for any special trade.

A considerable value is given to the class-room method used, which is the invention of Mr. Tabareau, dean of the faculty of sciences of Lyons. The results are the obtaining of simultaneous work from all the class and the immediate correction, under the eyes of the pupils, of their work and the assurance of constant attention. Each pupil has a slate and chalk at his desk. At a given signal all the pupils rest their slates on the desks and write the answer to the question which has been given. At a second signal all stop writing. At a third signal all slates are held on the desks in such a position as to be easily read from the teacher's desk. Corrections are then made. The subjects which are taught in the school are as follows:

First year: Mathematics, drawing, grammar and composition, physics, chemistry, natural history, history, geography, writing, and shop work.

Second year: The same subjects as the first year, excepting writing, which is dropped. English, accounts, and weaving are added.

Third year: Mathematics, machine and ornamental design, grammar, composition, French literature, physics, chemistry, commercial geography, history, political economy, English, accounts, shop visits, and shop work.

All subjects are obligatory.

Academy of Lyons.—The architecture was represented by large plaster casts of the observatory, the medical school, the school of law and letters, and the school of sciences.

The school of sciences was represented by a collection of photographs, instruments, and specimens from the natural history collections.

The schools of law and of letters were represented by a collection of books which are either used in the schools or have been written by those who have been connected with the schools.

The school of medicine was represented by a very extensive exhibit of organic chemistry, criminal and physiological charts, surgical and physiological apparatus, specimens of minerals prepared for lantern and microscope, and books.

CHAPTER XIX.

GENERAL PROGRAMME OF THE WORLD'S CONGRESSES AT THE COLUMBIAN EXPOSITION.

[Part II of the report of the Commissioner of Education for 1892–93 contained the programme and reports of the general "International[1] Congress of Education," which was held in Chicago, July 25–28, 1893, under the auspices of the National Educational Association. Preceding that congress, which, as the name implies, was international in character, were the special congresses of the Department of Education of the World's Congress Auxiliary occupying the eight days beginning with July 17. These, also international in character, were under the direct conduct of the World's Congress Auxiliary, a committee composed chiefly of ladies and gentlemen resident in Chicago and who devoted nearly their whole time for upwards of a year to the work of the congress.

In the report for 1892–93 in question the general programme of the World's Congresses of the Columbian Exposition and the programme of the preliminary special educational congresses referred to were omitted by mistake and they are accordingly presented here as important supplementay matter to what had already been printed. The success of these international congresses was due to the efforts of the local committees of education in Chicago, which bodies arranged the details of the various congresses most satisfactorily.

A summary of the World's Congress work and a bibliography of the published proceedings of the different congresses are also given.

President Charles C. Bonney, of the World's Congress Auxiliary, states in regard to these congresses that "they have more than realized the expectations entertained in regard to them." "We have enjoyed a series of gratifying surprises in the attendance, interest manifested, and the high character of the proceedings." "Most noteworthy has been the spirit of peace and progress which has reigned supreme."]

I. The World's Columbian Exposition is a corporation organized under the laws of the State of Illinois for the actual management of the Exposition of 1893. This corporation has also been recognized by act of the Congress of the United States.

II. The World's Congress Auxiliary of the World's Columbian Exposition is an organization authorized and supported by the Exposition corporation for the purpose of bringing about a series of world's conventions of the leaders in the various departments of human progress during the Exposition season of 1893. The Auxiliary has also been recognized and approved by the Government of the United States. Its general announcement has been sent to foreign governments by the Department of State, and an appropriation on account of its expenses has been made by act of Congress.

III. The Woman's Branch of the World's Congress Auxiliary consists of the general and special committees of women appointed by the Auxiliary.

The leading idea of the World's Congresses of 1893 is to bring the leaders of human progress from the various countries of the world together at Chicago during the season of the World's Columbian Exposition for the purposes of mutual acquaintance and the establishment of fraternal relations.

The chief work of the World's Congresses of 1893 will be to review the achievements which have already been made in the various departments of enlightened life,

[1] The "Addresses and Proceedings of the International Congress of Education, Chicago, 1893," published by the National Educational Association, may be obtained (at $2.50) of Z. Richards, 1301 Corcoran street, Washington, D. C. The proceedings of the congresses held under the auspices of the local committee have not yet been published.

and sum up in each congress the progress of the world in the department involved, to the date of the Congress; to make a clear statement of the living questions of the day which still demand attention, and to receive from eminent representatives of all interests, classes, and people suggestions of the practical means by which further progress may be made and the prosperity and peace of the world advanced.

The programme for each congress will be arranged in subordination to this leading idea and plan of work.

WHERE THE CONGRESSES WILL BE HELD.

The following list of the several congresses and the dates on which they will be held can not be well understood without a clear idea of the places of meeting provided. To each week of the World's Congress season a group of congresses has been assigned, to be held in concurrent or alternate sessions. This course is practicable because the places of meeting provided are adequate; and it is necessary because the number of congresses to be held is so great.

These congresses will not be held in the Exposition grounds at Jackson Park. They will all be held in the permanent Memorial Art Palace of the Art Institute of Chicago, which is located on the site of the former Interstate Exposition Building on the Lake Front Park of Chicago, at the intersection of Adams street and Michigan avenue. This building, sometimes called the World's Congress Art Palace, has been erected on the park named, with the consent of the State of Illinois and the city of Chicago, by the Art Institute of Chicago, with the aid of the World's Columbian Exposition.

The Art Institute authorities provided for this purpose the sum of $400,000, and the directory of the Exposition added thereto the sum of $200,000, upon the condition that the building be completed and furnished to the World's Congress Auxiliary ready for use before the 1st of May, 1893, and be exclusively used for World's Congress purposes until the close of the Exposition season. The building is now practically complete and will be delivered according to the contract.

This World's Congress Art Palace contains within the building proper 33 halls, besides 6 committee rooms, all of which will be used for the offices of the World's Congress Auxiliary and for what are termed the special or sectional sessions and the informal conferences of the congresses to be held.

Between the wings of the Art Institute building proper have been erected two large audience rooms, each of which will seat about 3,000 persons. These large halls will be used for what are termed the general public sessions of the various congresses. It will thus be possible to hold 36 large meetings and more than 300 special or sectional meetings or conferences during a single week. Each of a group of 6 congresses in a given department, such as engineering or government or literature, assigned to a single week, will thus be enabled to hold any convenient number of large meetings, not exceeding 6, and any desired number of sectional sessions, not exceeding 50, without interference with each other or with the rooms reserved for the permanent offices, reception rooms, and other uses of the World's Congress Auxiliary.

WHEN THE CONGRESSES WILL BE HELD.

I. Commencing Monday, May 15, 1893.—The congresses of the department of woman's progress, including more than 25 division congresses, to set forth the progress of woman in: (1) Education, (2) industry, (3) literature and art, (4) moral and social reform, (5) philanthropy and charity, (6) civil law and government, (7) religion.

II. Commencing Monday, May 22, 1893.—The congresses of the department of the public press. In this department the following special congresses have been organized: (1) The general congress of the public press, (2) the congress of the religious press, (3) the congress of trade journals.

III. Commencing Monday, May 29, 1893.—The congresses of the department of medicine. The congresses to be held during this week include the following, besides those transferred to the general department, as therein mentioned: (1) The congress of homeopathic medicine and surgery, (2) the congress of eclectic medicine and surgery, (3) the congress of medico-climatology.

IV. Commencing Monday, June 5, 1893.—The congresses of the department of temperance. These include, among other participants, the following: (1) The National Temperance Society of America, (2) the Independent Order of Good Templars, (3) the Sons of Temperance, (4) the Royal Templars of Temperance, (5) the Catholic temperance societies, (6) the Woman's Christian Temperance Union, (7) the Nonpartisan Woman's Christian Temperance Union, (8) the American Medical Temperance Association, (9) vegetarian societies, (10) social purity organizations.

NOTE.—This congress has been transferred to June 2.

V. Commencing Monday, June 12, 1893.—The congresses of the department of moral and social reform, including (1) the international conference and national confer-

ences of charities, correction, and philanthropy, (2) instructors of the feeble-minded, (3) humane societies, (4) the King's Daughters, (5) Society of St. Vincent de Paul, and kindred organizations, (6) the Salvation Army.

NOTES.—A conference on charities, correction, and philanthropy will begin in one of the smaller halls of the Art Institute on June 8. This will be preliminary to the general congress.
In this connection a similar meeting of the National Prison Association will be held.
The Sons of the American Revolution will meet in one of the smaller halls on Friday, June 16.

VI. Commencing Monday, June 19, 1893.—The congresses of the department of commerce and finance. In this department the following congresses have been organized: (1) A congress of bankers and financiers, (2) a congress of boards of trade, (3) a congress on railway commerce, (4) a congress on water commerce, (5) a congress of merchants, June 23, (6) a congress of building associations, June 27, (7) insurance congresses, including (*a*) a fire insurance congress, (*b*) a marine insurance congress, (*c*) a life and accident insurance congress, (*d*) a mutual benefit and assessment congress, (*e*) a fidelity and casualty congress, (*f*) a conference on insurance specialties.

NOTE.—The congress on water commerce has been transferred to July 31, to be held in connection with the congresses of the department of engineering.
For special reasons provision has been made for a conference of army chaplains in one of the small halls, on June 29-30, and this conference accordingly transferred from the department of religion to this place.

VII. Commencing Monday, July 3, 1893.—The congresses of the department of music, including (1) the congress on musical art and (2) the congress on musical education.

NOTE.—This congress has been transferred to this department from the department of education.

VIII. Commencing Monday, July 10, 1893.—The congresses of the department of literature. For this department the following congresses have been organized: (1) A congress of authors, (2) a congress of historians and historical students, (3) a congress of librarians, (4) a congress of philologists, (5) a congress on folklore.

IX. Commencing Monday, July 17, 1893.—The congresses of the department of education, as follows: (1) A congress of college and university faculties, including university extension, (2) a congress of college and university students, (3) a congress of college fraternities, (4) a congress of public-school authorities, (5) a congress of representative youth of public-schools, (6) a congress on kindergarten education, (7) a congress on manual and art training, (8) a congress on physical culture,* (9) a congress of business and commercial colleges, (10) a congress of stenographers, (11) a congress of educators of the deaf, (12) a congress of educators of the blind, (13) a congress on Chautauqua education, (14) a congress on social settlements, (15) a general educational congress on higher education, secondary education, elementary education, kindergarten instruction, school supervision, professional training of teachers, art instruction, instruction in vocal music, technological instruction, industrial and manual instruction, business education, physical education, educational publications, rational psychology in education, and experimental psychology in education.

NOTES.—The special educational congresses, so called in contradistinction to the general educational congress, will close on Tuesday, July 25. The general educational congress will open on the evening of this day and occupy the remainder of the week.
One of the smaller halls of the art palace will be assigned for alumni headquarters during the week of July 17.

X. Commencing Monday, July 31, 1893.—The congresses of the department of engineering. The congresses of this department will be as follows: (1) A congress on civil engineering, (2) a congress on mechanical engineering, (3) a congress on mining and metallurgical engineering, (4) a congress on engineering education, (5) a congress on military engineering, (6) a congress on marine engineering and naval architecture, (7) a conference on aerial navigation.

NOTE.—The congress on water commerce, transferred from the department of commerce and finance, will commence on the same date. Electrical engineering has been transferred to the general division of electricity in the department of science and philosophy.

XI. Commencing also on Monday, July 31, 1893.—The congresses of the department of art. The congresses of this department will include the following: (1) A congress on architecture, (2) a congress on painting and sculpture, (3) a congress on decorative art, (4) a congress on photographic art, (5) a conference on art museums and schools.

XII. Commencing Monday, August 7, 1893.—The congresses of the department of government, including the following: (1) A congress on jurisprudence and law reform, (2) a congress on civil service reform, (3) a congress on suffrage in republic, kingdom, and empire, (4) a congress on the government of cities, (5) a congress on patents

* This subject has been transferred to the general educational congress.

and trade-marks, (6) a congress on social and economic science (see note), (7) a congress on weights, measures, coinage, and postage (see note).

NOTES.—The congress on social and economic science, embracing the subjects of economics, statistics, taxation, and profit-sharing, and the congress on weights, measures, coinage, and postage have been transferred to the week of Monday, August 28, to be held in connection with the labor congress.

Executive administration and legislative reform are under consideration, but not ready for announcement.

XIII. Commencing Monday, August 14, 1893.—The congresses of the general department. These congresses embrace those which, for special reasons, could not well be held in their appropriate places, including the following: (1) A congress on arbitration and peace, (2) a congress on Africa, the continent and the people, (3) a congress on medical jurisprudence, (4) a dental congress, (5) a congress on horticulture, August 16, (6) a chess congress.

XIV. Commencing Monday, August 21, 1893.—The congresses of the department of science and philosophy, including the following: (1) A congress on astronomy, (2) a congress on anthropology (see note), (3) a congress on chemistry, (4) a congress on electricity, (5) a congress on geology, (6) a congress on Indian ethnology, (7) a congress on meteorology, (8) a congress on pharmacy, (9) a congress on philosophy, (10) a congress on psychical research, (11) a congress on zoology.

NOTES.—The congress on anthropology has been transferred to the following week, to be held in connection with those of social and economic science.

Arrangements for other congresses and conferences of a scientific nature are in progress, but not ready for announcement.

The subject of geography has been transferred to the department of education.

XV. Commencing Monday, August 28, 1893.—The congresses of the department of labor; the congresses of the general division of social and economic science, transferred from the department of government, and the congress on anthropology, transferred from the department of science and philosophy. The labor congress will be organized with appropriate sections for the consideration of the various branches of what is called the labor question, including the following: (1) The condition of labor, (2) work and wages of women and children, (3) statistics of labor, (4) literature and philosophy of the labor movement, (5) labor legislation, (6) living questions and means of progress, (7) arbitration and other remedies.

The congresses of social and economic science, including the following: (1) A congress on economic science, (2) a congress on the science of statistics, (3) a congress on taxation and revenues, (4) a separate congress on what is called "the single tax," (5) a congress on profit-sharing, (6) a congress on weights, measures, coinage, and postage.

Also the congress on anthropology,

XVI. Commencing Monday, September 4, 1893.—The congresses of the department of religion. This department has been organized in the following order: (1) A series of union meetings in which representatives of various religious organizations will meet for consideration of subjects of common interest and sympathy, (2) denominational presentations to the religious world, as represented in the parliament of religions, of the faith and distinguishing characteristics of each denomination, and the special service it has rendered to mankind, (3) informal conferences in which the leaders of a particular denomination will be present to answer inquiries for further information, (4) denominational congresses in which the work of the denominations will be more fully set forth and the proper business of the body be transacted, (the art building will be so occupied that these denominational congresses can not be held in it; they will for that reason be held in Chicago churches, which will be placed at the disposal of the denominations for that purpose), (5) congresses of missionary societies, September 28, (6) congresses of religious societies, including (*a*) the Young Men's and Women's Christian Associations, October 6, (*b*) the Evangelical Alliance, October 8, (*c*) the Society of Christian Endeavor, October 9, (*d*) ethical organizations, (*e*) other associations of appropriate character (see notes).

The denominational congresses for which arrangements are in progress include the following: (1) Adventist, (2) Baptist, (3) Catholic, (4) Congregational, (5) Christian Disciples, (6) Evangelical Association of North America, (7) Evangelical Synod, (8) Friends, (9) Greek Church, (10) Jews, (11) Lutheran Council, (12) Lutheran Synod, (13) Lutheran Conference, (14) Methodist, (15) New Jerusalem, (16) Oriental religions (see note), (17) Presbyterian, (18) Protestant Episcopal, (19) Reformed Episcopal, (20) Reformed Church of North America, (21) reformed Church of United States, (22) Swedish Covenant, (23) United Brethren, (24) Unitarian, (25) Universalist.

NOTES.—The denominations above named are represented by committees of organization residing in or near Chicago. Arrangements have also been made for the presentation in the religious congresses of the Oriental religions by their representatives who are expected to be present and participate in the proceedings. Eminent Buddhists, Theosophists, and others have accepted invitations. Applications for other religious congresses are pending.

The Army chaplains will meet June 29-30.

XVII. Commencing Thursday, September 28, 1893.—The congress of the department of Sunday rest. This congress will be organized in appropriate sections for the consideration of the weekly rest day, (1) on physiological grounds, (2) on economical grounds, (3) on governmental grounds, (4) on social and moral grounds, (5) on religious grounds.

XVIII. Commencing Tuesday, October 10, 1893.—The congress on public health. This congress will be organized with sections for the consideration of (1) sanitary legislation, (2) the jurisdiction and work of public health authorities, (3) the prevention, control, and mitigation of epidemics and contagious diseases, (4) food inspection and other subjects.

XIX. Commencing Monday, October 16, 1893.—The congresses of the department of agriculture. In this department arrangements have been made for the following congresses: (1) A congress on general farm culture, (2) a congress on animal industry, (3) a congress on fisheries, (4) a congress on forestry, (5) a congress on veterinary surgery, (6) a congress on good roads, (7) a congress on household economics, (8) a congress on food problems, (9) a congress on agricultural legislation, etc., (10) a congress on agricultural education and experiment, including agricultural chemistry, practical geology, economic climatology, economic entomology and practical botany, and other scientific subjects.

NOTES OF INFORMATION AND EXPLANATION.

1. The final arrangements for the various congresses and the exact dates for the different sessions will be announced in the special programmes which are now in course of formation.

2. The general aim will be to secure matter in the highest degree worthy of a world-wide publication. It is therefore desired that copies of all papers for a given congress be in the hands of the committees of organization as long as possible before the date of its opening, in order that abstracts may be prepared, and, so far as may be practicable, advance copies printed.

3. The name "World's Congress" necessarily implies that the time at disposal will, so far as possible, be allotted to the world's leaders of the different participating countries. The number of eminent persons in every department is, however, so great that all can not be heard, even in a series of World's Congresses extending through a season of six months. It has therefore been thought best to invite papers or discourses limited to ten, twenty, or thirty minutes, in order that the largest obtainable variety of views may be procured. The attending audiences will prefer that an hour at disposal shall be divided between two or three speakers rather than given to one.

4. Discussions will, so far as possible, be by selected participants, and on previous notice to secure the most valuable remarks in a form best suited for the proposed publication.

5. Three somewhat different kinds of meetings are to be held: (*a*) General public meetings for the presentation of subjects of a popular interest. (*b*) Special or sectional sessions for the consideration of subjects of a more limited interest, and in which the leaders in a given department will be more especially concerned. (*c*) Informal conferences in which questions may be asked and answered and views freely exchanged. The first and second kinds of meetings will be strictly regulated by programmes. The informal conference will be governed by the presiding officer without a formal programme.

In all the meetings a card taken to the presiding officer by a page will take the place of a call on the presiding officer for recognition.

6. The mode in which existing organizations will participate in the various congresses may be briefly stated. Organizations of a given kind will merge their usual annual proceedings in the appropriate World's Congress, in which representatives of all are expected to participate. A series of separate and independent conventions, treating the same subjects in substantially the same way, would be wholly impracticable for want of time and place to accommodate them, and would also manifestly not be in harmony with the World's Congress plan, which aims to bring the representative men of different countries together, not to keep them apart.

But to enable participating organizations to transact the strictly necessary business of an annual meeting, such as receiving reports and changing officers, brief meetings may be arranged for that purpose.

7. The membership of the various congresses is manifold, and consists of the following classes: (*a*) The members of the committees of organization, the members of the advisory councils, the committees of cooperation, and the honorary members of the World's Congress Auxiliary. (*b*) Delegates appointed by participating Governments, societies, or institutions. (*c*) Persons interested and invited to be present as attending members. (*d*) The general public so far as the places of meeting will permit.

Participation in the proceedings of a given congress will be regulated by the programme for that congress. The proceedings will not be submitted to vote of the persons who may happen to be present at a given session, but will be published for submission to the deliberate judgment of the enlightened world. Hence, no confusion or other difficulty can arise from bringing together in the same congress, even in large numbers, the various classes above designated.

8. The object of the congresses is not to attempt the impossibility of settling anything by debate during the Exposition season, but to elicit from the leaders of progress in all countries, convened in fraternal assembly, the wisest and best thought of the age on the living questions of our time, and the means by which further progress may be made. Controversy is excluded from the World's Congresses of 1893. Advocates will present their own views, not attack the views of others.

9. *Participants from foreign countries.*—In forming the programmes, places will be reserved as long as practicable for eminent persons of other countries who may honor America with their attendance and participation. The difficulty of attendance from foreign countries has always been fully appreciated, and the authorities would have been glad to do much more than they have found possible to lighten the expense of such attendance. If but a few congresses had been planned, it would have been easy to make provision for the entertainment of delegates; but with considerably more than 100 congresses already arranged, and applications for others pending, it is manifestly impossible to make such provision.

As it has come to the knowledge of the auxiliary that fears have been entertained that the expense of transportation to, and of living in Chicago during the exposition season would be greatly increased, it is deemed proper to state, that from all the information obtained in relation to that subject, it is confidently believed that such expenses will not be excessive, but that persons of moderate means will readily be able to find suitable accommodations. It is also expected that the railroad fares will be reduced, and is regarded as practically certain that they will not be increased.

10. The meetings of the congresses are designated not by days, but by sessions. Within a single day there may be three meetings of different congresses in each of the art palace halls. For example, a congress of astronomers may meet in a given room in the morning, a congress of chemists in the same room in the afternoon, and a congress of geologists in the same room in the evening. The general hours of meeting will be 10 o'clock in the forenoon, 2 o'clock in the afternoon, and 8 o'clock in the evening.

11. The official language of the congress will be English, according to the international rule that the proper language for a congress is that of the country in which the congress is held. It is desired that as far as shall be practicable papers in any other language be translated into English under the supervision of the author. Where this course is not practicable the auxiliary will endeavor to have translation made. It is expected that remarks in other languages will be interpreted when delivered.

12. It is also expected that the proceedings of the various congresses will be published by the Government of the United States as the worthiest and most enduring memorial of the Exposition of 1893.

13. Each congress will have its own special officers and organization in addition to the general officers and organization of the World's Congress Auxiliary. This special organization will generally include a president—administrator who will have charge of the details of the business of the congress, and who will be assisted by one or more honorary presidents and vice-presidents. Honorary officers may be appointed either for an entire congress or for any general or special session. The honorary officers will thus be relieved of the burden of administering the business of the congress. The arrangements for the congresses of the department of moral and social reform, for example, are in charge of a committee of organization. This committee, in organizing the congress of charities, correction, and philanthrophy, which is one of the congresses of this department, has provided for the congress a president, several vice-presidents, several secretaries, and a chairman for each of the seven sections into which the congress is divided. To avoid the confusion and loss of time which elections would involve, such officers are appointed on the recommendation of the proper committee.

14. Requests for further information, or for the publications of the World's Congress Auxiliary, may be addressed to the secretary.

Communications for any committee of the auxiliary may be sent to the headquarters named below.

CHARLES C. BONNEY,
General President World's Congresses of 1893.

CLARENCE E. YOUNG, *Secretary.*

WORLD'S CONGRESS HEADQUARTERS,
Chicago, April, 1893.

OFFICIAL PROGRAMME OF THE DEPARTMENT OF EDUCATION, COMMENCING JULY 17, 1893, IN THE MEMORIAL ART PALACE.

COMMITTEES OF ORGANIZATION.

General committee on educational congresses, the Right Rev. Bishop Samuel Fallows, chairman.

General committee of the woman's branch, Mrs. H. M. Wilmarth, chairman, in charge of the congress on general education.

Committee on congress of higher education, Dr. Henry Wade Rogers, chairman. Woman's committee, Mrs. Harriet C. Brainard, chairman.

Committee on a congress of university extension, Prof. George Henderson, chairman; Prof. Nathaniel Butler, jr., vice-chairman, acting chairman.

Committee on a congress of college and university students, Mr. James B. Reynolds, chairman.

Committee on a congress of college fraternities, Mr. Richard Lee Fearn, chairman. Woman's committee, Miss Ethel Baker, chairman.

Committee on a congress of representative youth, Rev. F. Frederick Bliss, chairman.

Committee of a congress of kindergarten education, Mrs. E. W. Blatchford, chairman.

Committee of a congress of manual and art education, Dr. H. H. Belfield, chairman. Woman's committee, Miss Josephine C. Locke, chairman.

Committee on a congress of social settlements, Charles Zeublin, chairman. Woman's committee, Miss Jane Addams, chairman.

Committee on Chautauquan education, George E. Vincent, chairman.

Congress of stenographers, Mr. J. L. Bennett, chairman. Woman's committee, Miss Elizabeth C. Merrill, chairman.

Committee on a congress of instructors of the deaf, Dr. Phillip G. Gillette, chairman.

Committee on a congress of educators of the blind, Dr. F. H. Hall, chairman.

BULLETIN FOR THE WEEK.

Monday, July 17.—Hall of Columbus, formal opening, 10 a. m. Hall 26, congress of college and university students, 11 a. m. Hall 3, congress of manual and art education, 11 a. m. Hall 8, congress of instructors of the deaf, 8 a. m. Hall 7, congress on kindergarten education, 11 a. m. Hall of Columbus, congress on general education, 2.30 p. m. Hall of Washington, congress of representative youth, 2 p. m. Hall 26, congress of college and university students, 8 p. m. Hall 3, congress on manual and art education, 8 p. m. Hall 7, congress of kindergarten education, 8 p. m. Hall of Washington, choir practice, 8 p. m.

Tuesday, July 18.—Hall 4, congress on university extension, 10 a. m. Hall 33, Business Educators' Association, 9 a. m. Hall 26, congress of college and university students, 9.30 a. m. Hall 3, congress of manual and art education, 10 a. m. Hall 7, congress on kindergarten education, 10 a. m. Hall 27, congress of educators of the blind, 9.30 a. m. Hall 8, congress of deaf mutes, 8 a. m. Hall 6, congress on Chautauquan education, 10 a. m. Hall of Columbus, congress on general education, 2 p. m. Hall of Washington, congress of representative youth, 2 p. m. Hall 4, congress on university extension, 2.30 p. m. Hall 6, congress on Chautauquan education, 2.30 p. m. Hall 26, congress of college and university students, 8 p. m. Hall 3, congress on manual and art education, 8 p. m. Hall 7, congress on kindergarten education, 8 p. m. Hall 22, reception by the Stenographers' Club of Chicago, 8 p. m. Hall of Washington, congress on Chautauquan education, 8 p. m.

Wednesday, July 19.—Hall 4, congress on university extension, 10.30 a. m. Hall 33, Business Educators' Association, 9 a. m. Hall of Columbus, congress of college fraternities, 9 a. m. Hall of Washington, joint session of kindergarten congress and congress on manual and art education, 10.30 a. m. Hall 29, congress of instructors of the deaf, 8 a. m. Hall 27, congress of educators of the blind, 9.30 a. m. Hall 20, congress on social settlements, 10 a. m. Hall of Columbus, Emma Willard Memorial Association, 2.30 p. m. Hall 4, congress on university extension, 2.30 p. m. Hall 24, congress on college fraternities, 2 p. m. Hall 27, congress of educators of the blind, 3 p. m. Hall 20, congress on social settlements, 3 p. m. Hall of Washington, joint session of kindergarten congress and congress on manual and art education, 8 p. m. Hall 22, reception to visiting stenographers, 8 p. m. Hall 20, congress on social settlements, 8 p. m.

Thursday, July 20.—Hall of Washington, congress on university extension, 10 a. m. Hall 3, congress of manual and art education, 10 a. m. Hall 33, Business Educators' Association, 9 a. m. Hall 24, congress of college fraternities (woman's session), 10 a. m. Hall 22, congress of stenographers, 9 a. m. Hall 8, congress of deaf mutes, 8 a. m. Hall 27, congress of educators of the blind, 9 a. m. Hall 20, congress on

social settlements, 10 a. m. Hall 22, congress of stenographers, 2 p. m. Hall 27, congress of educators of the blind, 3 p. m. Hall 20, congress on social settlements, 3 p. m. Hall of Columbus, congress on general education, 2.30 p. m. Hall 22, congress of women stenographers, 8 p. m. Hall 3, congress on manual and art education, 8 p. m. Hall of Columbus, congress on social settlements, 8 p. m. Hall 7, congress on kindergarten education, 8 p. m. Hall of Washington, congress on higher education, 8 p. m. Hall 8, national associations of the deaf, 8 p. m. Hall 4, association of collegiate alumnæ, 8 p. m.

Friday, July 21.—Hall 4, congress on manual and art education, 10 a. m. Hall 22, congress of stenographers, 9 a. m. Hall 33, Business Educators' Association, 9 a. m. Hall 27, congress of educators of the blind, 9 a. m. Hall 20, congress on social settlements, 10 a. m. Hall 29, congress of educators of the deaf, 8 a. m. Hall 7, congress on kindergarten education, 10 a. m. Hall 3, congress on higher education, 10 a. m. Hall of Columbus, congress on general education, 2 p. m. Hall 7, congress on kindergarten education, 2.30 p. m. Hall of Washington, joint session of kindergarten congress and congress of manual and art education, 8 p. m.

Saturday, July 22.—Hall 4, congress on manual and art education, 10 a. m. Hall 7, congress on kindergarten education, 10 a. m. Hall 3, congress on higher education, 10 a. m. Hall 33, Business Educators' Association, 9 a. m. Hall of Columbus, congress on general education, 2.30 p. m. Hall 3, special meeting, 2.30 p. m. Hall of Columbus, congress on higher education, 8 p. m.

Sunday, July 23.—Hall of Columbus, Sunday service for college and university students, 3 p. m. Hall of Washington, Sunday service for the congress on kindergarten education, 3 p. m.

Monday, July 24.—Hall of Columbus, congress on general education, 10 a. m. Hall of Washington, congress on manual and art education, 10 a. m. Hall 29, congress of educators of the deaf, 8 a. m. Hall 3, congress on higher education, 10 a. m. Hall of Columbus, congress on general education, 8 p. m. Hall of Washington, congress on higher education, 8 p. m.

Tuesday, July 25.—Hall of Columbus, congress on general education, 10 a. m.

Monday, July 17.—Hall of Columbus, 10 a. m.: Formal opening of the congresses in this department.

Hall 26, 11 a. m., Congress of College and University Students: Addresses by the president and foreign delegates to the congress. Address, Student Life in the Southern Colleges of America, Prof. F. C. Woodward, South Carolina College, Columbia. Address, Influence of the Resident System, Frank P. Divelbiss, Richmond, Mo.

Hall 3, 11 a. m., Congress on Manual and Art Education: Opening addresses, Mr. William M. R. French, Rev. Dr. Frank W. Gunsaulus, Dr. H. H. Belfield. Origin, Development, Achievements, and Outlook of Manual Training in General, both public and Private, Dr. C. M. Woodward, Washington University, St. Louis, Mo. The Function of Drawing and Manual Training in Education, Prof. C. R. Richards, Pratt Institute, Brooklyn, N. Y. Discussion, Prof. John M. Ordway, Tulane University, New Orleans, La.; Prof. Gabriel Bamberger, Hebrew Manual Training School, Chicago, Ill., and others.

Hall 7, 11 a. m., Congress on Kindergarten Education: Froebel and his work, Prof. William N. Hailmann, superintendent of schools, Laporte, Ind.

Hall 8, 8 a. m., Congress of Instructors of the Deaf: Opening address, Phillip G. Gillette, LL. D., ex-superintendent of the Illinois Institution for the Deaf and Dumb, Jacksonville. A General View of the Education of the Deaf in the United States, Job Williams, L. H. D., principal of the American Asylum for the Deaf and Dumb, Hartford, Conn. Discussion, by N. F. Walker, superintendent of the South Carolina Institution for the Deaf and Dumb, Cedar Springs. Statistics of the Deaf, Edward Allen Fay, Ph. D., editor of The Annals and professor in the National Deaf-Mute College, Washington, D. C. Discussion, Alexander Graham Bell. American and European Schools, Warring Wilkinson, L. H. D., principal of the California Institution for the Education of the Deaf and Dumb and the Blind, Berkeley. The Influence of Party Politics on Institutions of Learning, Hon. Judge R. A. Mott, member and secretary of the board of directors of the Minnesota School for the Deaf, Faribault. Discussion, by Hon. L. A. Proctor, editor and former director of the Wisconsin School for the Deaf, Milwaukee, and Dr. J. L. Cleary, director of the Wisconsin School, Kenosha. Conventions, Conferences, and Summer Schools for Instructors of the Deaf, J. L. Noyes, L. H. D., superintendent of the Minnesota School for the Deaf, Faribault. Discussion, by J. A. Gillespie, M. A., principal of the Nebraska Institute for the Deaf and Dumb, Omaha. Deafness and Retarded Hearing: What is It? Its Cause and Probability of Cure, Samuel Sexton, M. D., New York City. Discussion, by C. J. Blake, M. D., Boston, Mass., and A. L. Adams, M. D., Jacksonville, Ill.

Hall of Columbus, 2.30 p. m., General Education: Address, Reforms Now Practicable in Secondary Education, Miss Mary A. Jordan, Smith College, Northampton, Mass.

Hall of Washington, 2 p. m., Congress of Representative Youth: Prayer, Right

Rev. Bishop Samuel Fallows, D. D., LL. D. Song, Prof. Tomlin's children's chorus. Addresses of welcome on behalf of the World's Congress Auxiliary, Hon. C. C. Bonney, president World's Congress Auxiliary; Mrs. Potter Palmer, president Woman's Branch Auxiliary; Mrs. Charles Henrotin, vice president Woman's Branch; Hon. A. G. Lane, superintendent Chicago city schools; Prof. A. F. Nightingale, superintendent Chicago high schools and chairman committee on Youth's Congress; Bishop Samuel Fallows, D. D., LL. D., chairman general committee on educational congresses, and others. Poem, Hezekiah Butterworth, editor Youth's Companion. Song, Prof. Tomlin's children's chorus. Address, Mrs. Mary Lowe Dickinson. Address, Mrs. Emily Huntington Miller. Messages to the world's youth, by governors of States, and magazines. Announcement, Watchword and Motto for World's Youth. Song, Prof. Tomlin's children's chorus.

Hall 26, 8 p. m., Congress of College and University Students: Address, Coeducation as a Factor in the Social Life of Students, Prof. Martha Foote Crow, University of Chicago. Discussion.

Hall 3, 8 p. m., Congress of Manual and Art Education: Manual Training in the American School System, President Walter Hervey, College for the Training of Teachers, New York. Paper on Sloyd, written by Prof. Otto Salomon, Nääs, Sweden; read by Mr. Arthur Lefler. The Ethical Value of Manual Training, Dr. Emil Hirsch, Chicago, Ill. The Practice and History of the Tool, Prof. Gustaf Sellergren, Technological High School, Stockholm, Sweden. Addresses, Col. Augustus Jacobson; Miss Meri Topelius, Illinois; Mr. John T. Morris, Baltimore, Md.

Hall 7, 8 p. m., Congress on Kindergarten Education: Address, Every Mother a Kindergartner, Mrs. S. B. Cooper, California. Address, Relation of Play and Work, Miss Angeline Brooks, New York.

Tuesday, July 18.—Hall 4, 10 a. m., University Extension Congress: Reception and registration, 10 a. m.; formal opening of the congress, 11 a. m. Honorary president, Dr. R. D. Roberts, London, England. Acting chairman of the congress, Nathaniel Butler, jr. Prayer, the Right Rev. Bishop Samuel Fallows. Addresses of welcome, Charles C. Bonney, president of the World's Congresses; Henry Wade Rogers, LL. D., president Northwestern University. Sketch of the Movement in England, Prof. James Stuart, M. P., London, England; read by Mr. Charles Zeublin.

Hall 26, 9.30 a. m., Congress of College and University Students: Inter-university Student Fellowship, reports from Naples, Upsala, Christiania, Cornell, Harvard, Johns Hopkins. Discussion. International University Magazine. Discussion.

Hall 3, 10 a. m., Congress of Manual and Art Education: How Shall we Acquire a Better Appreciation for True Art? Prof. Walter Perry, Pratt Institute, Brooklyn, N. Y. A Study of Children's Spontaneous Drawings, Prof. Earl Barnes, Leland Stanford (jr.) University, Palo Alto, Cal. The Art Idea in Public Education, Mr. John S. Clarke, Boston, Mass. Discussion: Judge Andrew Draper, Cleveland, Ohio; Supt. Thomas Balliet, Springfield, Mass.; Mr. William Ordway Partridge, Massachusetts. Volunteer discussions.

Hall 7, 10 a. m., Congress on Kindergarten Education: Addresses on Professional Training of the Kindergartner, Mrs. Eudora L. Hailmann, Laporte, Ind.; Mrs. J. N. Hughes, Toronto, Canada; Miss Caroline Hart, Milwaukee, Wis. Discussion. Music a Factor in Early Education, Prof. William L. Tomlins, Chicago; Prof. Daniel Batchellor, Philadelphia.

Hall 8, 8 a. m., Congress of the Deaf: 8 a. m. to 1 p. m., Congress of the Deaf. Photographs of the congress and of the National Association of the Deaf will be taken after adjournment. 8 p. m., reception and banquet.

Hall 27, 9.30 a. m., Congress of Educators of the Blind: Addresses of welcome, Hon. C. C. Bonney, president World's Congress Auxiliary, Chicago; Hon. Right Rev. Samuel Fallows, D. D., LL. D., chairman committee on educational congresses, Chicago; Frank H. Hall, chairman committee of organization, Jacksonville, Ill.; Rev. W. H. Milburn, president World's Congress of Instructors and Friends of the Blind. Responses to addresses of welcome, William B. Wait, superintendent New York Institution for the Blind, New York City; Dr. Frank Rainey, superintendent Texas Institution for the Blind, Austin; Dr. K. Wulff, superintendent Royal Institution for the Blind, Steglitz, Germany; H. L. Hall (blind), superintendent Pennsylvania Working Home for Blind Men, and general agent of the Society for Providing Evangelical Religious Literature for the Blind, Philadelphia; Warring Wilkinson, superintendent California Institution for the Deaf and Dumb and the Blind, Berkeley; M. Anagnos, superintendent Perkins Institution and Massachusetts School for the Blind, South Boston; F. J. Campbell, LL. At 3.30 o'clock, in hall 3, Mr. Charles H. Ham will deliver his address on "Woman." He will be followed by Miss Hulda Lundin, superintendent of needlework in the public schools of Stockholm, who will speak upon the educational condition of Swedish women.

Hall of Columbus, 8 p. m., Congress on Higher Education: Address, Latin and Greek as Elements of Secondary and Higher Education Compared with Science and History, Hon. William T. Harris, LL. D., United States Commissioner of Education. Address, University Education in Russia, Dr. L. de Dimcha, professor in the University of St.

Petersburg. Address, University Education for Women in Russia, Prince Sergius Wolskonsky, gentilhomme de la Chambre de S. M. l'Empereur Russia. Address, The Distinction between College and University Training, Mary A. Jordan, professor of English in Smith College. Address, Progress in American Higher Education within the Past Thirty Years, Henry M. McCracken, LL. D., chancellor of the University of the city of New York.

Sunday, July 23.—Hall of Washington, 3 p. m., Congress on Kindergarten Education: The Kindergarten in its Relation to Sunday-school Work, Miss Lucy Wheelock, Boston. The Spiritual Life of the Child as Developed Through the Kindergarten, Miss Anna Bryan, Louisville. The Mission of the Kindergarten to the Very Poor, Prof. Felix Adler, New York. The Kindergarten a Factor in Foreign Missions, Miss Annie Howe, Kobe, Japan.

Hall of Columbus, 3.30 p. m., Sunday Service for the Congress of College and University Students: Address, Recent Religious Movements in the Universities of Europe, Asia, and America, James L. Houghteling, Chicago. Addresses, James B. Reynolds, J. R. Mott, and L. D. Wishard.

Monday, July 24.—Hall 3, 10 a. m., Congress on Higher Education: Address, The Latest Revival of the Study of Politics, Bernard Moses, Ph. D., professor in the University of California. Address (title to be announced later), Mr. Hamilton Mabie, New York City. Address, University Education in Sweden, Lector Söderblom, Göteborg, Sweden. Address, University Education for Women in Scotland, Miss J. A. Galloway, principal of Queen Margaret's College, Glasgow. Address, Physics a Culture Study, Henry Crew, Ph. D.

Hall of Columbus, 10 a. m., General Education: Discussion, What Shall the Public Schools Teach? George P. Brown, Illinois; Kate Tupper Galpin, California; Francis W. Parker, Illinois; William Ordway Partridge, Massachusetts; Hamlin Garland, Illinois; James MacAlister, Pennsylvania; Andrew S. Draper, Ohio; Marion Foster Washburne, Illinois; Ella F. Young, Illinois; G. H. Carmer, Minnesota; Thomas J. Morgan, Illinois, and others.

Hall of Columbus, 8 p. m., Congress of Higher Education: Address (subject to be announced), Right Rev. John J. Keane, LL. D., chancellor of the Catholic University of America. Address, Graduate Work in America, William Gardner Hale, A. B., professor in the University of Chicago. Address (title to be announced later), Alice Freeman Palmer. Address, University Education in France, Dr. G. Compayré, recteur de l'Académie de Poitiers. Address, The Study of Literature in French Universities, M. André Chevrillon, University of Lille. Address, The New Movement in Italian Universities, Mme. Fanny Zampini-Salazar, Naples, Italy.

Hall 8, 8 a. m., Congress of Instructors of the Deaf: The Family Life of Pupils Outside the Schoolroom, Z. F. Westervelt, superintendent of the Western New York Institution for Deaf-mutes, Rochester. Discussion by Rev. Benjamin Talbot, M. A., teacher in the Ohio Institution for the Deaf and Dumb, Columbus; and Warren Robinson, M. A., teacher in the Wisconsin School for the Deaf, Delavan. The Orally Taught Deaf after Graduation, D. L. Elmdorf, M. A., teacher in the New York Institution for the Improved Instruction of Deaf-mutes, New York City. Discussion by Mrs. S. G. Davidson, Mount Airy, Philadelphia; and Alvah W. Orcutt, Everett, Mass. Physical Care and Training of the Deaf, A. F. Adams, B. A., instructor of gymnastics, National Deaf-mute College, Washington, D. C. Discussion by J. S. Long, B. A., teacher in the Wisconsin School for the Deaf, Delavan; and Miss Grace Farr, teacher of physical training of girls in the Illinois Institution for the Deaf and Dumb, Jacksonville. Trades for the Deaf and Industrial Training Schools: How Improve Them? F. D. Clarke, M. A., superintendent of the Michigan School for the Deaf, Flint. Discussion by R. Mathison, superintendent of the Ontario Institution for the Deaf and Dumb, Belleville; and Henry C. Rider, superintendent of the Northern New York School for the Deaf, Malone. A Plan for the Permanent Employment of the Deaf in the Higher Trades and Professions, Ernest J. D. Abraham, missionary to the deaf, and coeditor of The British Deaf-mute and Journalist, Bolton, England. Text-Books: How Shall They be Used and to What Extent? W. A. Caldwell, M. A., principal of the Florida Blind and Deaf-mute Institute, St. Augustine. Discussion by J. W. Blattner, M. A., principal of the Texas School for the Deaf, Austin; and Thomas Brown, teacher in the Michigan School for the Deaf, Flint. The Mental Condition of the Uneducated Deaf-mute, Samuel Porter, M. A., emeritus professor in the National Deaf-mute College, Washington, D. C. Discussion by J. W. Swiler, M. A., superintendent of the Wisconsin School for the Deaf, Delavan; and A. N. Downing, teacher in the Western Pennsylvania Institute for the Deaf and Dumb, Edgewood Park. The Moral and Religious Condition of the Deaf after Leaving School, P. J. Hasenstab, B. A., teacher in the Illinois Institution for the Deaf and Dumb, Jacksonville. Discussion by Rev. Thomas Gallaudet, D. D., rector of St. Ann's Church, New York City; and S. T. Walker, M. A., superintendent of the Kansas Institution for the Deaf and Dumb, Olathe. The Proper Relation of the Deaf to Their Alma Mater, Robert Patterson, M. A., principal of the Ohio Institution for

the Deaf and Dumb, Columbus. Discussion by B. R. Allabough, B. A., teacher in the Western Pennsylvania Institution for the Deaf and Dumb, Edgewood Park; and Rev. Frank Read, teacher in the Illinois Institution for the Deaf and Dumb, Jacksonville. The Ideal Institution Newspaper, Prof. Paul Denys, teacher of the Ontario Institution for the Deaf and Dumb, Belleville. Discussion by W. O. Connor, principal of the Georgia Institution for the Deaf and Dumb, Cave Spring; and J. L. Smith, teacher in the Minnesota School for the Deaf, Faribault. The Education of the Deaf in New Zealand, by H. E. Crofts.

Hall of Columbus, 8 p. m., General Education: Address, The Unity of Education, Mr. Thomas Davidson, New York. Address, The Sociology of Education, Mr. Hamlin Garland, Illinois. Addresses, Gen. Francis Walker, president Institute of Technology, Boston, and others.

Tuesday, July 25.—Hall of Columbus, 10 a. m., General Education: The Pedagogical Principles of Herbart. Introduction, Dr. Levi Seeley, Lake Forest University. Address, The Herbartian Doctrine of Interest, Prof. Elmer E. Brown, University of California. Address, Herbart's View of Apperception Contrasted with Kant's as a Basis for Teaching, President Charles D. De Garmo, Swarthmore College. Address, Concentration Compared with other Schemes of Coordination, Supt. C. B. Gilbert, St. Paul. Address, The Formal Steps and the Common English Maxim of Instruction, Mr. Herman T. Lukins, Chicago.

Discussion will follow these addresses and will be led by Dr. G. Stanley Hall, Clarke University; Charles McMurray, Normal University, Illinois; Earl Barnes, Leland Stanford (jr.) University.

SUMMARY OF THE WORK OF THE WORLD'S CONGRESSES OF THE WORLD'S COLUMBIAN EXPOSITION.[1]

[Prepared by Charles C. Bonney, President of the World's Congresses.]

The world's congresses of 1893 were first publicly proposed September 20, 1889. The first session was opened May 15, 1893, and the last was held October 28, of that year.

The beginning of the organization was the formation of an executive committee of ten, which held its first meeting October 15, 1889. As the plans developed, the need of a larger organization was seen, and October 30, 1890, "the World's Congress Auxiliary of the World's Columbian Exposition of 1893" was organized to arrange and conduct the proposed series of international congresses.

October 21, 1892, the inaugural ceremonies of the world's congresses were held in connection with the dedication of the buildings erected for the material exposition, which was held at Jackson Park, at the south end of the city of Chicago.

The world's congresses were held in what was called the Permanent Memorial Art Palace, erected through the cooperation of the city of Chicago, the directory of the Exposition, and the management of the Art Institute of Chicago. The city contributed the site, consisting of a part of the Lake Front Park, on the shore of Lake Michigan, near the heart of the city, and about 6 miles north of Jackson Park. The Exposition directory furnished $200,000 and the Art Institute $400,000 for the building erected.

This Art Palace, now called the Art Institute, is a massive building of three stories in height, in antique style, 319 feet in front on Michigan avenue, with two wings extending eastwardly 176 feet. It contains 33 halls, besides committee rooms and storage rooms, and there were also built, between the wings, two temporary auditoriums calculated to seat 3,000 persons each. There were occasions when it was estimated that 4,000 persons were crowded into each of these auditoriums, the northerly of which was called the Hall of Columbus, the other the Hall of Washington. Of the smaller halls in the permanent building, twenty were used for meetings and the remainder for the other purposes of the congresses. These halls were seated to accommodate from 100 to 600 persons each.

There were times when the whole building was crowded, and it was claimed that 12,000 persons were in simultaneous attendance on the sessions of the various congresses; and there were other times when the interest was less intense and the daily participants in the congresses were numbered by hundreds rather than by thousands. It is impossible, in this matter, to give exact numbers, but there were only a few cases in which the attendance was smaller than was expected. The general meetings were held, for the most part, in the great audience rooms, and the meetings of the divisions and sections of the congress departments in the smaller halls. The applications for times and places of meeting were so numerous that long before the congresses were opened it became an extremely difficult matter to find suitable accommodations for a new congress.

---

[1] Peprinted from "Progress."

As finally organized, the World's Congress Auxiliary consisted of 2,170 members, divided into 214 local committees of organization. Mixed committees of men and women were not appointed, but in all cases suitable for the participation of women a committee of women was appointed to act in cooperation with the committee of men. These committees of women constituted what was called the Woman's Branch of the World's Congress Auxiliary. The general officers of the auxiliary were president, vice-president, secretary, and treasurer; and the woman's branch had also its own president and vice-president.

To these local committees of organization were adjoined what were called advisory councils, which consisted of eminent persons selected from the various participating countries, to advise and assist the committees of organization in selecting writers and speakers for the different congresses and in perfecting the plans for them. The aggregate membership of these advisory councils was 14,528. The chairman of each committee of organization was the director of the congress committed to its charge, and the president of the auxiliary was the general director of the whole series of the congresses.

As finally settled, the world's congress work was divided into 20 departments and 224 general divisions, in which congresses were held. These, in their chronological order, were as follows:

I, Woman's Progress, 25 divisions; II, Public Press, 6 divisions; III, Medicine and Surgery, 6; IV, Temperance, 12; V, Moral and Social Reform, 15; VI, Commerce and Finance, 10; VII, Music, 9; VIII, Literature, 9; IX, Education, first series, 17; second series 16; X, Engineering, 9; XI, Art, 5; XII, Government, 7; XIII, General Department, 1, besides 4 held out of their regular order and here transferred to their proper places; XIV, Science and Philosophy, 13; XV, Social and Economic Science, 4; XIV, Labor, 1; XVII, Religion, 46 (of which the marvelous parliament of religions was the chief); XVIII, Sunday Rest, 1; XIX, Public Health, 1; XX, agriculture, 11.

The programmes also show 125 sections, of which 29 were of the nature of the general divisions.

These congresses held 1,283 sessions, aggregating 753 days. The printed programmes show 5,978 addresses delivered or papers read, including 5,454 formal contributions, 131 addresses of welcome, 176 addresses of response, and 217 agricultural reports. But these are much less than the actual number, for many papers and addresses were admitted after the programmes were printed, and were inserted in the corrected programmes used by the presiding officers.

A carefully prepared alphabetical index shows 5,822 speakers and writers whose names appear on the printed programmes, including 368 cases in which the name of the paper to be read or subject discussed is not given. These participants in the congresses represented all the continents of the world, and 97 nations, States, provinces, territories, and colonies, besides 50 States and Territories of the American Union, making a total of 147 actually represented.

In the cases of 2,005 of the 5,822 names given in the printed programmes, the residence of the contributor is not given, but the tables compiled show the different occasions on which the 3,817 speakers and writers whose places of residence appear took part in the congress proceedings.

This extremely interesting exhibit is as follows: Europe, 803; Asia, 101; Africa, 41; North America, 2,770; South America, 48; Australasia, 39; Pacific Islands, 12. The places represented and the number of entries are: Algeria, 5; Angola, 1; Arabia, 1; Argentina, 7; Armenia, 1; Asia Minor, 1; Australia, 8; Austria, 35; Bavaria, 5; Belgium, 19; Bohemia, 7; Brazil, 6; British Guiana, 4; Bulgaria, 5; Burmah, 1; Canada, 39; Cape Colony, 3; Ceylon, 6; Chile, 1; China, 14; Colombia, 3; Costa Rica, 4; Cuba, 3; Curaçoa, 2; Denmark, 17; Ecuador, 3; Egypt, 15; England, 200; Finland, 7; France, 99; French Kongo, 1; Germany, 112; Great Britain, 113; Greece, 11; Guatemala, 1; Hanover. 1; Haiti, 3; Holland, 16; Honduras, 1; Hungary, 2; Iceland, 5; India, 31; Ireland 10; Italy, 52; Jamaica, 2; Japan, 28; Johore, 3; Kongo, 3; Korea, 1; Liberia, 4; Madagascar, 1; Manitoba, 3; Mexico, 23; Monaco, 1; New Brunswick, 2; New Hebrides, 2; New South Wales, 19; New Zealand, 1; Nicaragua, 2; Northwest Territories (Canada), 1; Norway, 9; Nova Scotia, 1; Ontario, 30; Orange Free State, 3; Paraguay, 4; Persia, 3; Peru, 3; Poland, 3; Portugal, 7; Quebec, 15; Roumania, 3; Russia, 39; Sandwich Islands, 7; Saxony, 1; Scotland, 41; Siam, 4; Siberia, 1; South Africa, 3; South Australia, 3; Spain, 13; Straits Settlements, 2; Sweden, 33; Switzerland, 20; Syria, 7; Transylvania, 1; Trinidad, 2; Tunis, 1; Turkey, 11; United States of America, 2,641; Uruguay, 3; Venezuela, 9; Victoria, 6; Wales, 4; Wurtemberg, 1. The representation of the United States was: Alabama, 20; Alaska, 2; Arizona, 7; Arkansas, 19; California, 113; Colorado, 34; Connecticut, 50; Delaware, 3; District of Columbia, 127; Florida, 11; Georgia, 35; Idaho, 7; Illinois, 350; Indiana, 85; Indian Territory, 1; Iowa, 59; Kansas, 39; Kentucky, 26; Louisiana, 24; Maine, 31; Maryland, 55; Massachusetts, 236; Michigan, 125; Minnesota, 78; Mississippi, 11; Missouri, 97; Montana, 8; Nebraska, 28; Nevada, 2; New Hampshire, 16; New Jersey, 48; New Mexico, 4; New York, 307; North Carolina, 19;

North Dakota, 5; Ohio, 140; Oregon, 11; Pennsylvania, 156; Rhode Island, 21; South Carolina, 19; South Dakota, 14; Tennessee, 49; Texas, 29; Utah, 5; Vermont, 6; Virginia, 21; Washington, 14; West Virginia, 6; Wisconsin, 66; Wyoming, 2.

This list embraces, in round numbers, only about two-thirds of the papers and addresses. It should, therefore, be borne in mind that the actual representation of the several countries was really much larger than here appears. The present exhibit, however, sufficiently shows that the congresses of 1893 were truly world's congresses, in fact as well as in name.

It is important to observe that not one of all the great array of speakers and writers had the right to be heard, of his own motion, in the congress in which he appeared. No provision was made for any free debating society in the whole range of the congresses. On the contrary, strict regulations were made and enforced for the exclusion of volunteer addresses and of every form of random talk. The entire time at disposal was allotted to those who were supposed to be most competent to instruct and advise. The speakers and writers for each congress were carefully selected by the committee of organization, with the advice of members of the advisory council of the congress involved. Participation in the several congresses was strictly regulated by the programmes formed by the committees of organization and approved by the president. Those whose names appeared on the programme, and those only, had the right to be heard.

Members of the advisory council of each congress, located as they were in the chief centers of all the participating countries, were earnestly requested by the local committee of organization to recommend for the congress speakers and writers of the highest qualifications and abilities; and, as far as practicable, the preference was given to representatives from foreign countries.

As was said in the announcements circulated throughout the world, controversy was prohibited, and the passing of resolutions of approval or of censure was forbidden in the world's congresses of 1893. The writers and speakers were asked not to attack the views of others, but to set forth, with as much cogency as possible, the merits of their own.

The theory of the congresses was that those who spoke in them were addressing the intellectual and moral world through the medium of the congresses, and that the views expressed would be afterwards widely discussed in pulpit, forum, public press, and private conversation, and would ultimately be approved or disapproved by the enlightened public opinion of mankind.

To review the progress of the past, to make a clear statement of the problems that still await solution, and to suggest the means by which further progress may be made, were declared to be the supreme purposes of the world's congresses of 1893.

Notwithstanding all these precautions, it naturally happened, from the immensity of the work and the multiplicity of its details, that in a few cases papers not in conformity with the rules obtained admission; but so wonderfully well did the speakers in the various congresses conform to the regulations made for their government that few violations occurred, and these served to prove the wisdom of the regulations adopted.

The quality and value of the papers read and addresses delivered before the world's congresses of 1893 has been witnessed by many competent judges. President Low, of Columbia College, says: "The world's congresses at Chicago during the Columbian Exposition were a unique feature of that splendid undertaking. They were notable as a whole for the broad range of subjects treated and for the wide territory from which the speakers came. The international element was naturally much more conspicuous than on ordinary occasions. In many cases the eminence of the speakers and writers would command general recognition."

President Angell, of the University of Michigan, said: "I can truthfully say of the two congresses I was able to attend—the historical and the educational—that in the importance of the subjects presented and the eminence of the speakers and writers, and the excellence of the papers and addresses, they compare favorably with any similar meeting which I ever attended. I think that at no educational congress in this country was there ever such an attendance of eminent scholars from abroad."

Cardinal Gibbons says: "These congresses will be considered by posterity as of the first excellence. The greatest benefits resulting will be a greater and higher appreciation of the views held by others, a closer fellowship between all nations, and holier and stronger impulses for the betterment of humanity."

Dr. Edward Everett Hale says: "I have no doubt that the administration of government in the next century will depend very largely upon the careful opinions digested in such congresses of experts."

Rev. Dr. Josiah Strong, secretary of the Evangelical Alliance, says: "The world's congresses of 1893, generally, can hardly be compared with anything else, because they were sui generis. These congresses constitute, as has well been stated, a great world's summer university. They can not fail to exert a great educational influence."

Hon. William T. Harris, Commissioner of Education, says: "I think that wider

benefits will result from the world's congresses of 1893 than from any similar ones held before, because of their connection with the great Exposition, and because of the wider and fuller representation of the countries of the world at these congresses, and because the preparation of the programmes for them was undertaken with more radical views, and with the characteristic energy of spirit which prevails in Chicago to get at once to the heart of the matter."

Rev. Dr. George Dana Boardman says: "The world's congresses of 1893 were so distinctively and conspicuously intellectual and moral as to make any comparison needless and almost impossible. Among the resulting benefits will be a quickening and broadening of intellect, and the upbuilding of character—personal, national, human."

Rev. George T. Candlin, missionary at Tsin Tsin, China, says: "The parliament of religions was of the mountainous order of greatness. It suggested infinitude and eternity. Like great events, like great deeds, like great men, it asks the perspective of time to show that change, which wastes and scars all earthly things, will grave deep and imperishable, as in granite, the record of its durability and abiding influence. Its purpose was not to chronicle past victories and record past progress, though this, of course, it did, but to open the door to future and immeasurably greater ones. It was a prelude, not a finale; a promise, not a boast; a prospect, not a recollection."

Emilio Castelar, the Spanish orator and statesman, says: "From the beginning of the world until to-day history has never recorded an event so momentous as the union, under one roof and one leadership and for one purpose, of the clergy of the world, representing the chief religions whose dogmas and rites hold our planet in touch with the Creator, as the forces of affinity and attraction hold it in touch with the universe."

Prof. F. Max Müller, of Oxford, says: "Who would have thought that what was announced as simply an auxiliary branch of the World's Columbian Exposition could have developed into what it was—could have become the most important part of that immense undertaking—could have become the greatest success of the year; and, I do not hesitate to say, could now take its place as one of the most memorable events in the history of the world? It seemed at the first glance that it would be a mere show, a part of the great show of industry and art. But instead of a show it developed into a reality, which, if I am not mistaken, will be remembered, aye, will bear fruit, when everything else of the mighty Columbian Exposition has long been swept from the memory of man."

The British royal commission in its official report declared that "the whole series of the congresses was certainly the most elaborate and complete that has ever been held."

The French delegate-general to the congresses, the Marquis de Chasseloup-Laubat, concludes his elaborate report with the statement that "the lasting results of the congresses at Chicago have been great, just, and generous, and that these congresses constituted one of the most remarkable manifestations of the human mind that has ever occurred on American soil—that gigantic America which will gain each day a greater importance in the world, in the evolution of civilization, and in the destiny of the human race." Such expressions of opinion might be indefinitely extended, but enough has been said to show how the proceedings of the world's congresses of the World's Columbian Exposition of 1893 are regarded by leaders of the first rank in the intellectual and moral world.

The cost of the world's-congress work was, in round numbers, $300,000. Of this amount $200,000 was contributed, as above stated, to provide places of meeting for the congresses, leaving $100,000 for the other expenses of the work. Of this sum, about $17,000 was provided by various committees of organization, and the residue was furnished by the directory of the Exposition, except a small appropriation made by the National Government in an act of recognition.

BIBLIOGRAPHY OF WORLD'S CONGRESS PUBLICATIONS.[1]

[By Charles C. Bonney.]

Ever since the close of the world's congress season inquiries have been received from different parts of the world for definite information concerning the publications which have been or will be made of the proceedings of the world's congresses held at Chicago under the auspices of the world's congress Auxiliary of the World's Columbian Exposition of 1893; and such inquiries still continue. While no general and complete publication of the proceedings of the congresses has yet been obtained, many special publications relating to particular congresses have been issued in

[1] Reprinted from The Dial, January 1, 1896.

various quarters, but no full list of such publications has hitherto appeared. I have therefore thought it well to prepare and send to The Dial a brief bibliography of the world's congress publications which have thus far come to my knowledge, believing that such an account would be of much interest, not only to the nearly 6,000 active participants in the congresses, but also to the much larger number of those who attended the sessions or were otherwise concerned in the proceedings. These publications have been issued so quietly and separately that very few persons can have obtained any adequate idea of their number and extent. In addition, thousands of articles have appeared in the public press, from which volumes might be compiled, showing that by common consent the world's congresses of 1893 were the crowning achievement of what Prof. Max Müller calls "the mighty Columbian Exposition."

For convenience of reference and inquiry, the several publications are classified in the departments of the congresses to which they respectively belong, and the entries are arranged, not in chronological order, but in the alphabetical order of the various departments, and are consecutively numbered.

AGRICULTURE.

[Embracing animal industry and real estate, as well as vegetable products.]

1. The World's Fisheries Congress, Chicago, 1893. Government Printing Office, Washington, D. C., 1894; 4to, pp. 417.

2. The World's Forestry Congress of 1893. Printed in the proceedings of the American Forestry Association, Washington, D. C., 1894–95, Vol. 10; 8vo, pp. 183.

3. Proceedings of the Veterinary Congress, Chicago, October 16–20, 1893. Edited by W. Horace Hoskins, D. V. S. Printed for the association, Philadelphia, 1894; 8vo, pp. 381.

4. The Horticultural Congress of 1893. Partial publication, comprising papers and discussions on Selection in Seed Growing. W. Atlee Burpee & Co., Philadelphia, 1894; 12mo, pp. 59.

5. Real Estate Congress, 1893. Partial publication, consisting of extracts from papers read in relation to the Torrens System of Registration and Transfer of Title to Real Estate. M. M. Yeakle, editor. The Torrens Press, Rufus Blanchard, 169 Randolph street, Chicago, 1894; 8vo, pp. 256.

ART.

6. The World's Congress of Architects, 1893. Printed with the proceedings of the twenty-seventh annual convention of the American Institute of Architects. Edited by Alfred Stone. Inland Architect Press, Chicago, 1893; large 8vo, pp. 273.

7. The World's Photographic Congress, 1893. Partial publication; selected papers printed by the Chicago Legal News Co., Chicago, 1893; 8vo, pp. 79.

COMMERCE AND FINANCE.

8. The World's Congress of Bankers and Financiers, 1893. Edited by Lyman J. Gage, chairman of the Congress. Rand, McNally & Co., Chicago, 1893; 8vo, pp. 611.

9. The World's Railway Commerce Congress, 1893. Edited by Horace R. Hobart. Printed by the Railway Age and Northwestern Reporter, Chicago, 1893; 8vo, pp. 265.

10. The World's Columbian Water Commerce Congress, Chicago, 1893. Edited by William Watson, secretary. Damrell & Upham, 34 Washington street, Boston, 1894; 8vo., pp. 473.

11. The Building and Loan Association Congress, 1893. Printed by the Financial Review and American Building Association News, Chicago, 1894; 12mo., pp. 205.

EDUCATION.

12. Proceedings of the World's Congress of Instructors of the Deaf, etc., July 17–24, 1893. Published as a supplement to the American Annals of the Deaf, Washington, D. C., 1893; 8vo., pp. 300.

13. The World's Congress of the Deaf, July 18–22, 1893. Printed by the National Association of the Deaf; Thomas Francis Fox, chairman of the committee on publication; Chicago, 1894; 8vo., pp. 282.

14. The World's Congress on University Extension. Partial publication; two leading papers printed in University Extension, Philadelphia, July, 1893; 8vo., pp. 26.

15. The International Geographic Conference, Chicago, July 27, 28, 1893. Printed in Vol. V, National Geographic Magazine, pp. 97-257. National Geographic Society, Washington, D. C.; 8vo., pp. 160.

16. The Emma Willard Association Reunion, Chicago, 1893. Printed by the association, Sarah A. Spellman, secretary, 121 Willow street, Brooklyn, N. Y.; 8vo., pp. 93.

17. The World's Stenographic Congress, 1893. Proceedings printed in the National

Stenographer for July, August, and September, 1893; Isaac S. Dement, 323 Dearborn street, Chicago; large 8vo., pp. 157. Papers omitted from this publication (total 116) printed in the Illustrated Phonographic World for December, 1893, and January and February, 1894; 45 Liberty street, New York; 8vo., pp. 9.

18. Proceedings of the educational congresses of the second week (embracing 16 general divisions, in charge of the National Educational Association of the United States, and Hon. William T. Harris, United States Commissioner of Education). Published by the association; New York, 1894; large 8vo., pp. 1005.

19. The Congress of Education at Chicago; by Gabriel Compayré, Revue Pedagogique, Paris. Translated for the National Bureau of Education, by Dr. William T. Harris and printed in Education for May, 1894. Casson & Palmer, 50 Bromfield street, Boston; 8vo, pp. 7.

20. The Educational Congresses at Chicago in 1893; by N. G. W. Lagerstedt, Stockholm, 1893; 8vo, pp. 20.

ENGINEERING.

21. The International Civil Engineering Congress, 1893. Printed in the Transactions of the American Society of Civil Engineers; F. Collingwood, secretary, 127 East Twenty-third street, New York, 1893; two vols., 8vo, with plates, pp. 1652.

22. The International Mechanical Engineering Congress, 1893. Printed by the American Society of Mechanical Engineers; Prof. F. R. Hutton, secretary, 12 West Thirty-first street, New York, 1893; 8vo, with plates, pp. 870.

91. The World's Vegetarian Congress of 1893. Edited by Charles W. Forward. Printed in the Hygienic Review for October, 1893. Memorial Hall, Farrington street, London, E. C.; large 8vo, pp. 222.

WOMAN'S PROGRESS.

92. The World's Congress of Representative Women. Edited by May Wright Sewall, chairman committee of organization. Rand, McNally & Co., Chicago, 1894; 2 vols., pp. 958.

GENERAL PUBLICATIONS.

[Publications relating to the congresses in general.]

93. Report of Marquis Louis de Chasseloup-Laubat, civil engineer, special commissioner to the world's congresses of 1893, etc., under the direction of M. Camille Krantz, Commissioner-General of the French Republic to the World's Columbian Exposition; to the minister of commerce and industry, etc. Paris, National Chambers, 1894; 4to, pp. 400.

94. Report of the British Royal Commission on the Chicago Exhibition of 1893, by Sir Richard E. Webster, G. C. M. G., Q. C., M. P., chairman, and Sir Henry Trueman Wood, M. A., secretary. Including a brief account of the world's congresses in general, and of the Electrical Congress in particular, with a list of the British representatives in the congresses. Printed in the Journal of the Society of Arts for May, 1894, London; large 8vo, double column, pp. 65.

95. Review of the Congresses held under the World's Congress Auxiliary of the World's Columbian Exposition, at Chicago, in 1893; by Michael Zmigrodzki; Krakow, Austria, 1895; Polish, 8vo, pp. 105.

96. The World's Congress Auxiliary and the congresses held under its auspices. The Book of the Fair; Bancroft Company, Chicago; Chap. V., Part II, pp. 69–77; Chap. VI, Part III, pp. 97–98; Chap. XXVI, Part XXIV, pp. 921–955; total folio, pp. 43–8vo, pp. 172.

97. The World's Congress Auxiliary and the World's Congresses of 1893; The Dial, Chicago, December, 1892, July, August, September, and November, 1893.

IN COURSE OF PUBLICATION.

98. Musical Congresses. Proceedings of the National Music Teachers' Association. Prof. H. S. Perkins, 26 Van Buren street, Chicago.

99. Religion. Congress of the Reformed Church in the United States. Rev. Ambrose Schmidt, 216 Shady avenue, Pittsburg, Pa.

100. Science. Mathematical Congress. In press for the American Mathematical Society. Macmillan & Co., New York.

101. Literature. The Librarians' Congress of 1893. F. A. Hild, chairman committee of organization, Chicago Public Library.

102. Medicine. The Pharmaceutical Congress of 1893. Prof. Oscar Oldberg, editor, 2425 Dearborn street, Chicago.

Among the congresses whose proceedings are still unpublished are those on the Public Press, Medico-Climatology, Medical Jurisprudence, Social Purity, Humane Societies, Insurance, Authors, Ceramic Art, Decorative Art, Painting and Sculpture, Civil Service Reform, City Government, Jurisprudence and Law Reform, Patents and Trade Marks, Suffrage, Proportional Representation, Africa, Geology, Zoology, Evolution, Social and Economic Science, Profit Sharing, Weights and Measures, Single Tax, Labor, Farm Culture, Bird Culture, Good Roads, Farm Life and Mental Culture, General Education, College and University Students, Manual and Art Education, Kindergarten Education, Representative Youth, University Extension, Education of the Blind, Chautauqua Education, College Fraternities, Social Settlements, Higher Education, and Colored Educators. These educational congresses were all of the first series. The proceedings of the second series are fully published in the volume hereinbefore noted. The proceedings of many of the religious congresses are also still unpublished.

The preliminary publications of the World's Congress Auxiliary, consisting of announcements by the president and preliminary addresses by the committees of organization, make a volume of 1,388 octavo pages; and the World's Congress Programmes, prepared and printed for the several congresses, make a volume of 1,002 octavo pages. Most of these preliminary publications and programmes are now out of print.

These special publications relating to the various congresses have tended rather to increase than to satisfy the demand for a general and complete publication of the proceedings. Those who took part in a congress in one of the departments naturally have a desire to know what was accomplished in the other congresses, not only of their own department, but also of the whole great series which opened on May 15 and closed on October 28 of the Columbian year.

For the most part, the publications which have thus far appeared, repesent the self-sacrificing zeal of interested societies. In many cases the editions are limited to the needs of the members, leaving none to supply the general public. In some cases, as the list shows, the publications are not in suitable form for international use. Hence, while enough has been done to secure the historic perpetuity of the immense work accomplished in the World's Congresses of 1893, the need still remains for an appropriate governmental edition of the proceedings of the various congresses for distribution among the Governments, colleges, universities, and leading public libraries of the countries which participated in the World's Columbian Exposition. This is required alike by the general welfare of the American people and the just obligations of international courtesy.

CHAPTER XX.

NECROLOGY, 1894.

ABBETT, LEON, LL. D., in Jersey City, December 4; born in Philadelphia, October 8, 1836; educated at High School, Philadelphia; lawyer, governor, and member of the supreme court of the State.

ABBOTT, A. B., at Glens Falls, N. Y., August 27; born at Greenfield, N. H., 1844; graduated at Dartmouth in 1866; taught in the academy at Warrensburg and at Glens Falls four years and devoted himself to business and law.

ADAMS, JOHN QUINCY, at Quincy, Mass., August 14; born in Boston, September 22, 1823; son of Charles F. and grandson of President John Q. and great-grandson of President John Adams; graduated at Harvard in 1853; admitted to the bar, but left the law and became a model farmer; was chairman of the school board and instrumental in adopting the "Quincy system."

ALCORN, JAMES LUSK, Eaglesnest, Miss., 25th of December; born Golconda, Ill., 4th of November, 1816; was educated and became member of legislature and deputy sheriff in Kentucky, and in 1844 moved to Mississippi and began the practice of law; served sixteen years in the State legislature; was active in politics and is often called the founder of the levee system of Mississippi. Alcorn College, for colored youth, at Westside, is named for him. He was twice elected governor and served one term in the United States Senate. He was active in restoring order and prosperity and in promoting the education of blacks and whites in the State after the war.

ALEXANDER, Rev. HENRY CARRINGTON, D. D., New York City, 28th of June, aged 59 years; was born in Princeton, N. J.; son of Rev. James W. and grandson of Dr. Archibald Alexander, and great-grandson of Dr. Waddel, the famous blind preacher of Virginia; was educated at Princeton College and Seminary, and became pastor at Charlotte, Va., 1861; later he became professor of biblical literature and interpretation of the New Testament, Union Theological Seminary, Hampden Sidney, Va., where he remained for twenty years, resigning in 1892. He was author of several books.

ALLEN, JEROME, Ph. D., Brooklyn, N. Y., 26th of May; born Westminster, Vt., 17th of July, 1830; graduated at Amherst, 1851; studied theology at East Windsor; taught in Maquoketo Academy, Iowa, 1853; 1855–1859, was professor of natural sciences, Alexander College, Dubuque; he was pastor at Hopkington and principal of Bowen Institute, and in 1861, when the institute became Knox College, he was made its president, and so continued eight years, when he resigned on account of ill health; for two years he was superintendent of schools at Monticello, when he removed to New York and became an institute conductor; professor in Geneseo Normal School; editor Barnes Monthly; president New York City Teachers' Association, whence he went west as principal of St. Cloud Normal School, Minnesota. Returning East in 1887, he was elected professor of pedagogy in the University of the City of New York, and in 1890 saw the school firmly established in the university; his health failed in 1893 and he became professor emeritus. For five years he edited the Teachers' Institute and School Journal; he also published several works upon educational subjects—Map Drawing, Mind Studies for Young Teachers, Temperament in Education, Chemistry for the Laboratory, etc.

ALLYN, Rev. ROBERT, D. D., LL. D., at Carbondale, Ill., January 7; born at Ledyard, Conn., January 25, 1817; graduated at Wesleyan University; teacher of mathematics at Wilbraham; pastor in the New England conference; principal of the Providence Conference Seminary; superintendent of the State normal school at East Greenwich, R. I.; professor of ancient languages at the Ohio

University, at Athens, Ohio; president Wesleyan Female College, at Cincinnati; president of McKendree College, and from 1874 until his death president of the Southern Illinois Normal University. While a citizen of Rhode Island he was elected twice to the lower house of the legislature, and was an official visitor to West Point. As a writer he was scholarly and lucid.

AMBROSE, E. F., at Tustin, Cal., February 22; born in New Hampshire in 1837; graduated at Dartmouth in 1864; principal Fryeburg, Me., 1864–65; taught in the institute at Norway, Me., 1867–1869; high school, Dexter, Me., 1869–1877; superintendent Indian Boarding School, Santa Fe, N. Mex.

AMES, Mrs. SARAH ETTA (King), in New York, September 10; born in Otsego County, May 10, 1826; graduated at Miss Willard's seminary; married Rev. B. D. Ames in 1854, and shared in his pastoral labors; also taught thirty-five years in New York and Rhode Island.

AMMEN, Gen. JACOB, at Lockland, Ohio, February 6; born in Virginia, February 7, 1806; graduated at West Point, and was instructor there most of the time from 1831 until 1837, when he resigned his commission and became professor successively in Bacon College, Kentucky; Jefferson College, Mississippi, and the University of Indiana; enlisted in the late war and was mustered out in 1865. Several camps and posts bear his name.

ANDREWS, JUSTIN, in Newton, Mass., August 31; born in Worcester County, Mass., in 1819; learned the printer's trade; was one of the conductors of the American Eagle; in 1846 assisted in founding the Boston Herald, and was connected with it as one of the principal writers for seventeen years, and was for four years one of its proprietors. He sold out in 1873 and retired.

ANDREWS, J. B., M. D., Buffalo, N. Y., August 3; born North Haven, Conn., 25th of April, 1834; graduated at Yale; in 1861 was teaching at New York, but enlisted in the Army; was in a series of engagements, but resigned in 1862; completed his course in medicine and became assistant surgeon, and so continued until mustered out; in 1867 he became assistant in the hospital for the insane, Utica; 1880, superintendent of the insane asylum, Buffalo; was professor in the Buffalo Medical College, 1881 to 1893.

AUSTIN, Mrs. JOHN GOODWIN, Boston, March 30; born in Worcester, Mass., 1835. She became distinguished by her efforts to promote among the young an interest in early New England history by her numerous articles and books.

BAKER, J. B., Ipswich, Mass., January 30, where he was born in 1835; graduated at Dartmouth, 1855; taught in Beverley, 1855–1860; served in the Army, and became a lawyer.

BAILY, JAMES M., Danbury, Conn., 4th of March; born Albany, N. Y., 25th of September, 1841; attracted attention as a writer in the Danbury News; gave his library to the Young Men's Christian Association and his property to beneficent and educational objects; was author of several books.

BANKS, Gen. NATHANIEL PRENTICE, LL. D., Waltham, 1st September; born there 3d of January, 1816; educated in the common schools; at 12 put to work in a cotton factory, where he developed a taste for mechanics and became a machinist; fond of study, he occupied his leisure with books and became a lyceum lecturer, and then editor of a Waltham newspaper; given a place in the Boston custom-house, under President Polk, and so improved his time reading law that he was admitted to the bar and began to practice; 1849, was elected to the legislature; 1851 and 1852 he was elected speaker of the house. The next year he was member and president of the constitutional convention, and was elected to Congress, and on the one hundred and thirty-third ballot was elected Speaker of the House of Representatives. He was again elected to Congress, but resigned to become governor of Massachusetts in 1857. He was reelected in 1858 and 1859; in 1860 he became president of the Illinois Central Railroad, and in 1861 was appointed major-general by President Lincoln. While in command at New Orleans he ordered the establishment of schools for the colored youth within the Union lines, and in his early career had been employed as a lecturer under the Massachusetts State board of education. He was always an earnest promoter of the instruction of youth, and his example was an inspiration to those who were not favored with opportunities for study. After he retired from the Army he was for some time United States marshal, and later was again elected to Congress.

BARNES, LORIN, at Wheaton, Ill., August 26; born at Rutland, Vt., June 24, 1819; graduated at Yale College in 1849. He chose the profession of teaching, but poor health compelled him to give it up in 1863 and he retired to a farm.

BARROW, Mrs. FRANCES ELIZABETH, New York City, 7th May; born Charleston, S. C., 1822. She became famous as "Aunt Fanny," the writer of books for children, and published 25 in fifteen years. She was an officer of the Juvenile Asylum, and especially active in promoting the education of young children.

BARSTOW, Hon. A. C., 5th of September, Providence, R. I.; was a wise counsellor in promoting education, especially of the negro and Indian, and gave largely of his means in this behalf.

BATCHELDER, JOHN B., Hyde Park, Mass., 22d December; born Gilmanton, N. H., 1825; distinguished as the historian of the battle of Gettysburg, and for his ardent interest in promoting instruction in patriotism.

BILLINGS, EDWARD C., LL. D., New Haven, Conn., 1st December; born Hatfield, Mass., 3d of December, 1829; graduated at Yale, 1853; studied law at Yale and Harvard; practiced law in New York City and in New Orleans, where, by nomination of General Grant, he became United States district judge in 1876, and so continued until his death, dealing with some of the most difficult legal problems of the period.

BISSELL, SAMUEL BURR SHERWOOD, at Norwalk, Conn., August 23; born in the township of Westport, February 6, 1812; graduated from Yale College in 1830, and from Princeton Theological Seminary; was ordained in 1836, and served as general agent of the Virginia Tract Society. He was pastor of the First Congregational church, Greenwich, Conn., for eleven years; secretary of the American Sunday School Union for New York for five years, and for five years secretary of the Seaman's Friend Society in New York and editor of the Sailors' Magazine. He returned to Sunday-school work and continued in it until his retirement in 1886.

BLAKEMAN, BIRDSEYE, at Stockbridge, Mass., 30th of September; born Stratford, Conn., 25th of January, 1824; noted publisher and friend of education; gave $35,000 to a library for his native town.

BOLLES, FRANK, Cambridge, Mass., 10th of January; born in Winchester, Mass., 31st of October, 1856; graduated at Columbian College, 1879, and at Harvard Law School, 1882; was editor of the university paper, and founder of the Harvard Cooperative Association; wrote poetry, and compiled genealogy of the Anthony Dix family. His essay on "International arbitration" took the Bowdoin prize at Harvard; was associate editor of the Advertiser, and later secretary of Harvard University; he published several books.

BONDREAUX, Father FLORANTINE, S. J., Chicago, January 30; born Terrebonne Parish, La., May 22, 1821. In 1833, he entered St. Louis University, but left to learn a trade; February 2, 1841, he became a Jesuit novitiate. He was afterwards employed in St. Louis, Cincinnati, St. Joe, and at Bordentown, Ky. He became eminent in chemistry. After a time he was active in conducting missions in different States.

BOTTA, VINCENZO, Ph. D., in New York City, October 5; born in Cavaller Maggiore, Piedmont, Italy, November 11, 1818; was educated at the University of Turin and became professor of philosophy there; in 1849 he was a member of the Sardinian Parliament; later he examined the school system of Germany, and in 1850 came to the United States for a similar purpose; he became naturalized and was elected to the chair of languages in the University of the city of New York. He published Accounts of the System of Education in Piedmont, and other important works.

BRAINARD, Rev. TIMOTHY G., Grinnell, Iowa, 25th of May; born Troy, N. Y., 24th January, 1808; graduated at Yale, 1830; teacher, Randolph, Vt., 1832–1836; graduated in theology at Andover, 1839, and settled in several pastorates; was superintendent of schools in Londonderry and Halifax, Mass.

BROWN, JOSEPH EMERSON, at Atlanta, Ga., November 30; born in Pickens County, S. C., April 15, 1821; studied at Calhoun Academy, South Carolina; taught at Canton, Ga.; studied law at Yale Law School; practiced law; entered public life in 1849; held various offices; was governor of Georgia for four terms; differed with Jefferson Davis; sought to promote early restoration of prosperity after peace was established; especially promoted opening schools, with Dr. David Wills aiding the school system of Atlanta, and securing money from the State for a number of years for Atlanta University for the benefit of colored youths. He was twice elected to the United States Senate.

BURBANK, ALEXANDER POST, New York City, 22d of June; born in Chicago, July, 1846; graduated at the university there; served in the Union Army, and was successively principal of Dearborn and Douglas Colleges.

BURNET, JOSEPH, manufacturer of flower extract and benefactor of education, 11th of August, Marlboro, Mass.; born in Southboro in 1820; founder of the noted Deerfoot farm, of St. Marks Episcopal farm, Southboro, also of St. Marks School, where many young men are fitted for college.

BURROWS, Rev. GEORGE, D. D., San Francisco, 19th of April, aged 83; born in Trenton, N. J.; professor in the Presbyterian Theological Seminary twenty-two years.

BURTON, CHARLES, Plymouth, Mass., 25th November; born Wolverhampton, England, 16th December, 1816; came to America in 1820, and worked as a cabinetmaker; fitted himself for college; studied theology in Lexington, Ky.; taught for a number of years, and then studied at Gottingen, taught in Pittsburg, and then removed to Plymouth where he was principal of the high school, and became school superintendent. He was among the first to introduce drawing and nature study.

BUTTERFIELD, Rev. HORATIO QUINCY, D. D., Olivet, Mich., 12th of February; born 5th of August, 1822, in Phillips, Me.; graduated, Harvard, 1848, at Bangor Seminary 1853; studied and practiced law until 1866, when he became professor in Washburn College, Kansas, and president in 1869; 1876 he became president of Olivet College, where he remained until 1892.

CARLSSON, Rev. ERLAND, in Chicago, 19th October, 1893; born in Sweden, August 24, 1822; graduated at the university in 1848, served as tutor; for twenty years pastor of a Swedish church with a membership of 1,600, in Chicago; was president of the board of regents of Augustina College and Theological Seminary for seventeen years.

CARTER, T. H., at Newtonville, Mass., July 11; born in Lancaster, Mass., January, 1799, a member of the firm Carter, Hindee & Co.; established the "Old Corner Book Store;" owned the first type foundry and the first power printing press and the first stereotype plant in New England. He founded The Living Age, with Mr. Littell as editor; he was noted also as a publisher of books for the young.

CATTELL, A. G., at Jamestown, N. Y., April; born in New Jersey in 1816, served as legislator in New Jersey and as United States Senator from that State; was appointed by Grant a member of the first Civil Service Commission, and later financial agent of the United States in London, where he placed Government loans at a lower rate of interest, simplified exchange questions, and effected the payment of the $15,000,000 Alabama claim without disturbing the market. While in the Senate he gave hearty support to the Bureau of Education.

CHILDS, GEORGE W., at Philadelphia, Pa., February 3; born in Baltimore, Md., May 12, 1829; had limited opportunities for education; at the age of 13 was apprenticed in the United States Navy for a year; was in a bookstore in Philadelphia and soon became a member of the firm of Childs & Peterson, publishers; on December 3, 1864, he became proprietor of the Philadelphia Ledger, from which he derived great wealth. He bestowed many benefactions, erected several monuments, and improved the conditions of labor.

CLARK, Rev. HENRY, at New Haven, Conn., November 2; born in Southington, Conn., May 8, 1810; graduated from Yale College in 1835 and from the Divinity School in 1838. While supplying the Presbyterian church at Franklinville, L. I., he taught in the academy at that place; he also taught in Brooklyn and Avon, Conn.

CLARK, Rev. JONAS B., in South Boston, February 12; born in Maine, in 1816; graduated at Dartmouth in 1839; preached and taught, and was chaplain of the Twenty-third Massachusetts Volunteers, and last of the House of Correction, Boston; taught at Needham, Mass., 1866–1872; Wheeling, W. Va., 1873–1876; Des Moines, Iowa, 1876–1878; Indianapolis, 1878–1881.

CLARK, Rev. WILLIAM, at Westborn, Mass., February 8; born in Vermont, in 1819; graduated at Dartmouth, 1842; was teacher and pastor, etc.; taught in Georgia four years; pastor at Orford, N. H., 1849–1852; missionary to Turkey, 1852–1857; teacher, Milan, Italy, 1863–1871, serving for a time as United States consul; 1883–1890 conducted an international school for young women at Florence, Italy.

COBURN, NATHAN P., at Newton, Mass., August 26; born in New Hampshire, February 6, 1817; was a member of the firm of William Claflin, Coburn & Co.; gave $100,000 for the erection of the Eliot church, $50,000 for Colorado College Library; his bequests amounted to $77,000, but his will was contested.

COLQUITT, ALFRED HOLT, at Washington, D. C., March 26; born in Walton County, Ga., April 20, 1824; graduated at the College of New Jersey in 1844; practiced law in Macon, Ga.; served as major on the staff of General Taylor in Mexico; was elected to Congress in 1852; became major-general in the Confederate service; he sought especially to restore prosperity in his State; he favored public schools; was elected governor in 1876 and again in 1880, and was twice elected to the United States Senate.

COMINGS, SAMUEL EDWARD, Ottawa, Kans., April 2; born in Cornish, N. H., in 1823; graduated at Dartmouth in 1845; taught in Norwich, Conn., Brooklyn, N. Y., Palmyra, Monroe City, and Hannibal, Mo.

CONNELL, WILLIAM, in June, at Fall River, Mass.; for twenty-five years superintendent of city schools.

COOKE, Prof. JACOB PARSON, LL. D., at Newport, R. I., September 3; born in Boston, October 12, 1827; graduated at Harvard in 1848; the following year he was appointed instructor and in 1851 Erving professor. He made great improvements in teaching his subjects—chemistry and mineralogy. He was a member of several learned societies, lectured before the Lowell Institute, and was author of a number of pamphlets and books—Religion and Chemistry, The Principles of Chemical Philosophy and Scientific Culture, etc.

COOPER, SUSAN FENIMORE, at Cooperstown, N. Y., December 31; born in Scarsdale, N. Y., in 1813; daughter of James Fenimore Cooper, from whom she inherited her literary talent; established an orphanage, and in addition to her writings devoted herself to beneficent enterprises.

CORRIGAN, Rev. PATRICK, at Hoboken, N. J., January 9; born in Ireland in 1835; educated in Ireland and in this country; built a school and was successful in his pastorate; on account of his intense love of American institutions was involved in much controversy; he was a warm friend of the common schools.

CURTIN, ANDREW GREGG, at Bellefonte, Pa., April 22; born there 22d April, 1817; received an academic education and graduated in law at Dickinson and practiced law; became secretary of state under Governor Pollock, and as such was also superintendent of schools and specially promoted their improvement; favored Mr. Lincoln's election; was himself elected governor of Pennsylvania by a majority of 32,000, and was known as the war governor; was reelected; was minister to Russia, and also three times elected Member of Congress.

CURTIS, GEORGE TICKNOR, LL. D., in New York City, March 28; born in Watertown, Mass., in 1812; graduated at Harvard in 1832; taught school and entered upon the practice of law; was the commissioner who issued the order for the return of Thomas Sims, the fugitive slave; noted as an attorney; was one of the literary executors of Daniel Webster and was his biographer.

CURTIS, ERNEST H., July 14, aged 24 years. He established the school under the American Missionary Association in Malee, in North Carolina, and taught successfully at Raleigh, and also at Marion, Ala.

CUTLER, Rev. CARROLL, D. D., at Talladega, Ala., 25th of January; born at Windham, N. H., 31st of January, 1829. He was of strong, brainy English stock; graduated at Yale in 1854, third in his class of 100. In 1860 became professor of mental science and rhetoric in Western Reserve College, and at the end of eleven years was promoted to the presidency and directed the affairs of the college through the change by which it became Adelbert College, located in Cleveland. He was the author of a valuable work on mental philosophy.

CYR, Rev. NARCISSE, at Springfield, Mass., March 18; aged 70; born in Napierville, Canada; studied one year at the University of Vermont, and then spent five years in Geneva and Paris; he established the first French Protestant paper ever printed in this country; was pastor of a Baptist church in Philadelphia. In 1887 he established a mission for the benefit of students in the Latin quarter; founded and edited Le Publican of Boston, which he kept up four years at his own expense. While abroad he discovered the work "Persecution of the Huguenots," which he subsequently translated.

DICKINSON, WILLIAM, M. D., at Stanford University, California, February 2; born in New Hampshire in 1822; graduated at Dartmouth in 1843; studied medicine at Harvard; taught three years in Maury County, Tenn., two years in Aberdeen and one in Jackson, Miss.; became eminent in the practice of medicine in St. Louis, and was a surgeon in the United States Army; was professor in the Barnes Medical College and in the Woman's Medical College; and editor of Medical Journal, and wrote several treatises on medical subjects.

DOUBLEDAY, JOHN MASON, at Montclair, N. J., September 3; born in Binghamton, N. Y., March 13, 1821; graduated at Yale College; taught for a number of years, but on account of poor health gave up the profession and went into business.

EAMES, Mrs. JANE ANTHONY, in Boston, July 8; born in Providence, R. I., 1816; sister of the late Senator Anthony; frequent contributor to the newspapers; author of several books for the young; made large gifts for educational and religious purposes.

EDGAR, Dr. JOHN, June 5; president of Wilson College, at Chambersburg, Pa.

EDWARDS, Rev. JONATHAN, D. D., at Wellesley Hills, Mass., July 16; born at Andover, Mass., in 1820; graduated at Phillips Andover in 1836 and at Yale in 1840;

taught in Virginia and in Maine, 1843–1845; studied theology at Yale and Andover, and was long a settled pastor, and during 1874–75 professor in Colorado College.

EDWARDS, Rev. TRYON, D. D., in Detroit, Mich., January 6; born in Hartford, Conn., August 7, 1809; was a great-grandson of Jonathan Edwards; graduated at Yale and studied law in New York and theology at Princeton. His pastoral charges were Rochester, N. Y., New London, Conn., Hagerstown, Md., etc. He was prominent in the church and the author of several books and tracts. He was greatly interested in benefactions for education, and for over twenty years he sent to the Bureau of Education all newspaper notices of gifts to education.

ELLIS, Rev. GEORGE, D. D., LL. D., at Boston, December 20; born there August 8, 1814; graduated at Harvard in 1833 and in divinity in 1836; was pastor at Charlestown twenty-nine years, and during 1857–1864 professor of systematic theology in the divinity school, and afterwards lectured before the Lowell Institute; was president of the Massachusetts Historical Society, editor of the Register, and also of the Examiner and many historical works.

ELLIS, Rev. JOHN M., D. D., at Chicago, March 29; born at Jaffrey, N. H., March 27, 1831; graduated at Oberlin in 1851; professor of languages at Mississippi College, 1852–1855; studied theology at Oberlin and Union; professor of Greek at Oberlin, 1858, and filled various chairs acceptably; was also mayor, and associate pastor of the Congregational Church, and was sent as commissioner to Europe in the interest of the World's Columbian Exposition.

EMERSON, LUTHER, in Haverhill, Mass., August 26, aged 78 years; born in Salem, N. H.; was connected with the public schools fifty years, thirty as teacher and twenty as member of the school board.

ESTABROOK, Prof. THOMAS, at Olivet, Mich., September 29, aged 74; was an educator fifty years; long connected with Olivet College as professor of the principles and methods of teaching.

EWELL, BENJAMIN STODDART, LL. D., June 19, in his eighty-fifth year; president of William and Mary College, Williamsburg, Va.; graduated at West Point in 1832; was assistant professor of mathematics there, 1832–1835, and assistant professor of natural philosophy, 1835–36, and in 1848 became professor of mathematics in William and Mary College and acting president, and in 1854 president; served in the Confederate army; was again elected president in 1865 and so remained until his death. He adhered to William and Mary College through all vicissitudes and strove to preserve its identity and traditions and to retain its influence as an institution of education in the State. He was an honorary member of the Royal Historical Society of Great Britain.

FAIR, JAMES G., San Francisco, 28th December; born in Ireland 3d December, 1831; became wealthy in mining; was United States Senator; bequeathed $50,000 to Roman Catholic orphanage; $50,000 to Protestant orphanage, and $25,000 to Hebrew orphanage. His property was estimated as high as $42,000,000.

FIELD, DAVID DUDLEY, LL. D., New York City, 13th of April; born in Haddam, Conn., 13th February, 1805; son of David Dudley Field, D. D., and brother of Justice S. J. Field, of the United States Supreme Court, of Cyrus W. Field, the projector of the Atlantic cable, and of Rev. Henry M. Field, D. D., editor of the Evangelist; graduated at Williams, 1825; practiced law, and became eminent as a reformer of legal practice and codifier of law, and was especially known for his efforts to secure the adoption of an international code.

FROST, RUFUS S., Chicago, 6th of March; born in New Hampshire 18th of April, 1826; gave $7,000 to a library in Marlboro, his native town, $5,000 to Wellesley College, and liberally to other beneficent purposes.

GOODELL, WILLIAM, M. D., in Philadelphia October 27; born on the island of Malta in 1829; son of the noted missionary, Rev. William Goodell, D. D.; graduated at Williams in 1852, and at Jefferson Medical College in 1854; practiced in Turkey until 1861; practiced in Chester, Pa.; was in charge of Preston Retreat, Philadelphia, and lectured in the medical department of the University of Pennsylvania.

GOODNOW, Hon. I. T., at Manhattan, Kans., March 20; he was professor of chemistry in Wilbraham Academy, Massachusetts; first superintendent of public instruction in Kansas, and became land commissioner of the Missouri, Kansas and Texas Railroad.

GOODWIN, Miss JULIA A., 28th October, Mason, N. H.; taught fifteen years in North Carolina, Georgia, and Alabama.

GRAHAM, ANDREW J., A. M., at Orange, N. J.; born at Green Creek, Ohio, August 2, 1830; at 14 attended the college at Spring Harbor, Mich. This institution afterwards removed to Hillsdale and has since been known as Hillsdale College, and from it he received his A. M. For a time he was a clerk in New York City, and there became an expert stenographer, and in 1852–53 reported for the legislature of Michigan; reported Mr. Beecher's sermons for eighteen months. He then engaged in law reporting and reporting on notable occasions. In 1858 he published his Handbook of Standard of American Stenography, and became distinguished by his publications for the improvement of stenography.

GULLIVER, Rev. JOHN PUTNAM, D. D., LL.D., in Andover, Mass., January 25; born in Boston, May 12, 1819; graduated at Phillips, Andover, in 1836, Yale in 1840, and from Andover Theological Seminary in 1845; occupied pastorates at Norwich, Conn., and Chicago, Ill.; was president of Knox College four years; pastor at Binghamton, N. Y., and from 1878 until his death was Stone professor of the relations of Christianity to the secular sciences in Andover Theological Seminary. He was a frequent contributor to the Independent, New Englander, Bibliotheca Sacra, Andover Review, and a founder of the Chicago Advance; a member of Yale corporation; through his efforts Norwich Free Academy was founded and endowed. He was also an advocate of the abolition of slavery and an ardent supporter and friend of President Lincoln.

HALL, WILLIAM MONTAGUE, at Ashfield, Mass., December 15; born in New York City, July 2, 1857; graduated at Yale in 1880; professor of political science and dean of the faculty of Colorado College, Colorado.

HANSON, JAMES HOBBS, LL.D., in Maine; born in China, Me., June 26, 1816; graduated at Waterville College in 1842; taught before graduation as well as after; was principal of Waterville Academy, beginning with only five scholars, and did all the work when the number swelled to 150; taught in Eastport in the high school; from 1857–1863 was principal of the Portland high school; was recalled to Waterville, which institution had been changed in the meantime to Waterville Classical Institute, and remained there until his strength compelled him to retire. The Governor Coburn endowment was secured largely through his influence, and also the erection of the Governor Coburn Hall. In 1862 he was elected a trustee of Waterville College, and successively reelected. He compiled a Preparatory Latin Prose Book and was joint editor of a Handbook of Latin Poetry.

HAWES, Judge GRANVILLE P., in New York City, December 29, 1893; born in Maine in 1838; graduated at Bowdoin College in 1860 and at the Columbia Law School; served through the war on General Emory's staff; when peace was declared became professor of rhetoric and English in the State College of Maryland; practiced law in New York; was elected to the marine judgeship in 1879.

HAYES, RICHARD, at St. Louis, February 12, at the hand of ungrateful tramps whom he had aided; born in Milton, N. H., August 14, 1827; graduated at Dartmouth in 1850; read law and practiced; was principal of Pittsfield (N. H.) Academy 1851–1854, teacher in the St. Louis Normal School 1861–62, and in the high school until his death.

HAYWARD, ALMIRA L., Cambridge, Mass., 11th of October; born in Easton, Mass.; educated at Wheaton Seminary; became specially noted as librarian and writer, but taught at Lookout Mountain, Tenn., Cambridge, Mass., and in the normal school at Providence, R. I.

HEMENWAY, Mrs. MARY, Boston, Mass., 6th of March; born in New York City, 1819. She was daughter of Thomas Tileston, and wife of Augustus Hemenway. Possessed of large wealth, she combined with true philanthropy great judgment in the application of her bounties. She was quick to recognize causes of merit whether they appealed to the favor of others or not, and she was willing to risk aiding them at the start. Prof. Larkin Dunton characterises her as possessed of "wisdom, wealth, and love." She contributed liberally toward historic work in the old South Church, aiding the efforts of Miss C. Alice Baker and the lectures of John Fiske, and giving $100,000 of the $200,000 necessary to save the old church from destruction. She gave, it is said, a large sum toward the explorations in southwest Arizona, under Frank H. Cushing, and aided largely in other ways to promote American ethnology and archæology. She expended over $100-000 in aid of Miss Amy M. Bradley's School at Wilmington, N. C., where many teachers were trained, and which had a most excellent influence upon education in that part of the State. She aided at their inception the Kitchen Garden and the Teachers' Benefit Association. She aided in restoring the teaching of sewing and introduced cooking in the Boston public schools by meeting the first necessary expenses. She bore the expenses of a school for training teachers in the Ling system of gymnastics, which led to the introduction of the system

into the Boston schools. She founded the Boston Normal School for Gymnastics, under the supervision of Miss Amy M. Homans, her very competent and able assistant. She purchased the John D. Philbrick Library and gave it to the Boston Normal School. She was a contributor to Dr. A. D. Mayo's "Ministry of Education" in the South, and was active in promoting the education of the freedmen. She had the thoughtfulness to provide that certain of her usual annual gifts should be continued from her estate for a time. It would be impossible to name the many lines along which her aid was bestowed for the uplifting of mankind, or to measure the extent of her influence.

HINCKS, Rev. JOHN HOWARD, at Atlanta, Ga., December 11; born in Maine, March 19, 1849; educated at Phillips, Andover, and Yale, and in theology at Andover and Yale; preached in California; was pastor eleven years at Montpelier, Vt.; in 1889 he became professor of history and social science and dean of the faculty at Atlanta University.

HINKEL, CHARLES JOHN, Ph. D., in Amagansett, L. I., August 21; born in Hanau, Germany, January, 1817; was educated at the gymnasium of Hanau and at the University of Marburg; taught Latin and Greek in the gymnasium in Rinteln, Hesse, at the Polytechnic in Hesse-Cassel, and later in the gymnasium in the same place; lectured nine years on philology and philosophy in the University of Marburg. He came to the United States in 1855, and in 1867 became director of the Martha Institute in Hoboken, N. J., and from 1869 until 1890 was professor of the Greek and Latin languages and literature at Vassar. He wrote a number of articles and monographs on educational subjects.

HITCHCOCK, R. C., Cambridge, Mass., March 6; from 1883 to 1890 was president and professor of Straight University at New Orleans.

HOLLINGSWORTH, SAMUEL SHOREY, at Philadelphia, June 28; born at Cleveland, Ohio, November 11, 1843; graduated at Yale in 1863, and studied law; was professor of the law of contracts, corporations, and pleading in the University of Pennsylvania the last four or five years of his life.

HOWE, GEORGE WILSON, in Lowell, Mass., March 21; born in Lowell in 1833; graduated at Bowdoin in 1859; was settled in several pastorates; in 1876 became grammar school principal in Lowell, and so continued.

HUNT, Dr. EZRA M., at Metuchen, N. J., where he practiced medicine twenty-five years; he graduated at Princeton and at the College of Physicians and Surgeons, New York; was secretary of the State Board of Health, president of the American Public Health Association, a member of the Epidermalogical Society of London, long sanitary editor of the Independent; he was a hearty promoter of sanitation in education, and aided the Bureau of Education in this interest.

JAY, JOHN, LL. D., 5th of May, New York City; born 23d of June, 1817, New York City; grandson of John Jay; graduate of Columbia University, 1836; then lawyer, diplomat, philanthropist, judge; vigorous promoter of emancipation in New York and elsewhere. He was always a promoter of every grade of education. As minister to Vienna he rendered special service to education. He made such efforts that the United States Bureau of Education took up the special exhibit of our education at the exposition at Vienna in 1873, and thus education in the United States began to appear for the first time in its true light at these international expositions.

JENKS, Prof. J. W. P., A. M., at Providence, R. I., September 26, aged 85; born in Middleboro, Mass. For a time he taught an academy, but his great service was rendered at Brown University, where he was a long time professor and afterwards emeritus professor and curator of the Jenks Museum, which was equipped at his expense and under his supervision.

JOHNSON, BARTON W., in De Leon, Tex., May 24; born in Tazewell County, Ill.; educated at Bethany College, West Virginia; became tutor there; was president of Eureka College, Illinois, and of Oskaloosa College, Iowa. He was prominent in the missionary work of the Disciples of Christ, and edited several religious papers.

KUNDSEN, CARL WILHELM, in South Norwalk, Conn., February 26; born in Copenhagen, Denmark, in 1818; was educated in the Military College and Royal Academy of Fine Arts in Copenhagen; taught drawing abroad a number of years, and coming to this country; continued the same work here twenty years; erected a finely equipped astronomical observatory in South Norwalk; was the originator of a system of drawing; was an advocate of phonetic spelling. In 1892 he opened a lecture hall for religious service in English and German, and for free lectures in secular studies.

LANE, MRS. MARY CELESTIA CLEMANS, of Brooklyn, 16th of October; born in Charlton, Mass., 27th of May, 1826; with her parents, early moved to Ohio; began to teach at 14 in district schools; taught one year in Wisconsin and thirty-seven years in Cleveland, Ohio; among her pupils who have become widely known were John D. and William Rockefeller.

LORD, JOHN, LL. D., December 15; at Stamford, Conn.; born in Berwick, Me., September 10, 1809; historian and lecturer; graduated at Dartmouth in 1833; studied theology at Andover, and served in two pastorates, during which time he devoted his attention also to history. He lived in England during 1843–1846, and lectured on the Middle Ages; was a lecturer at Dartmouth 1866–1876. His lectures attracted large audiences in the chief cities of the United States, and did much to promote historical study. He published numerous works on historical subjects.

MCCOSH, Rev. JAMES, LL. D., S. T. D., D. Lit., Princeton, N. J., 6th of November; born in Carch Keoch, Ayrshire, Scotland, 1st of April, 1811; son of a farmer; studied at Glasgow College five years, and at University of Edinburgh under Drs. Welch and Chalmers; was pastor at Arbroath; in charge of a church with 1,400 communicants at Brechin; in 1843 was active in forming the Free Church of Scotland; in 1851 became professor of logic and metaphysics in Queens College, Belfast, Ireland, holding the same for sixteen years, being also for a time examiner for the Indian civil service. He visited German universities and studied German philosophy in 1858. He came to United States in 1866, and visited the colleges and theological schools. May, 1866, was elected president of Princeton College, and was inaugurated 27th of October; continued in the office until 1888, when he became president emeritus, and continued to teach philosophy until 1890. His presidency was marked by great increase in the funds of the college; by special changes in the curriculum; the attendance went up from 246 to 604, and instructors from 10 professors, 4 tutors, and 2 teachers to 35 professors, 3 tutors, and additional lecturers and other assistants. His lectures and publications were numerous. His position as a philosopher was established by the publication of "The Method of the Divine Government, Physical and Moral," in 1850. There followed in 1855 "Typical Forms and Special Ends in Creation," in which he was aided by George Dickie, M. D.; "The Tuitions of the Mind, Inductively Investigated," 1860; "The Supernatural in Religion in Relation to the Natural," 1862; "Examination of Mill's Philosophy," 1866; "Treatise on Logic," 1869; "Christianity and Positivism," 1871; "Scottish Philosophy," 1874; "Thoughts and Emotions," 1880; "The Philosophical Series," two volumes, 1882; "The Motive Powers," 1877; "The Religious Aspects of Evolutions," 1888; "Prevailing Types of Philosophy—Can They Logically Reach Realty?" 1890; "Tests of Various Kinds of Truth," 1891; "Philosophy of Realty," 1894.

MCDILL, JONAS WILSON, at Creston, Iowa, February 28; born in Ohio, March 4, 1834; graduated at Miami University in 1853; admitted to the bar in 1856; removed to Iowa and was elected superintendent of public instruction in 1859. He was afterwards probate judge, clerk in the Treasury Department, Washington, D. C., and from 1868 to 1874 district and circuit judge in Iowa; member of Congress from 1874 to 1876; member of the State board of railroad commissioners 1881–1883; United States Senator, and in 1892 became a member of the Interstate Commerce Commission, and retained this position until his death.

MCFARLAND, Rev. JOHN R., December 9, in Alaska, in the house of a native while on a missionary tour; he was a successful teacher and preacher among the Hovaks.

MAIN, Prof. JAMES, at Washington, D. C., in November; born in Scotland, February 24, 1810; graduated at Glasgow University, where he taught several years; became astronomical computer in the Coast Survey in 1851, and so remained for thirty years.

MALLERY, Col. GARRICK, LL. D., at Washington, D. C., October 24; born in Pennsylvania, April 24, 1831; graduated at Yale in 1853; practiced law in Ohio, 1853–1857; served in the Union Army and received four brevets and was retired on account of wounds; was an executive officer of the Signal Service Bureau, and in 1869 became chief of the Bureau of Ethnology and made important contributions to that subject, especially connected with the sign language of the Indians and deaf-mutes.

MARTIN, ALEXANDER, A. M., D. D., LL. D., in Indiana; born in Mairn, Scotland, in 1822; graduated at Allegheny College, Pa., in 1847; principal of Northwestern Academy three years; professor of Greek language and literature in Allegheny College from 1855 to 1864; founded and became president of West Virginia University; in 1875 was made professor of mental and moral sciences in the Indiana Asbury University, and subsequently president, remaining until 1889, during which time the name of the institution was changed to De Pauw University. He was a delegate to four general conferences and to the first ecumenical conference, which met in London in 1881.

MASON, GEORGE CHAMPLIN, Philadelphia, January 30; born in Newport, R. I., July 17, 1820; journalist; greatly promoted the study of local history by his writings and otherwise.

MASON, LYMAN, in Boston, February 9; born in Vermont; graduated at Dartmouth in 1839; became eminent as a lawyer, but before practicing law taught in Western Reserve and Dartmouth College.

MATHER, S. H., LL. D., at Cleveland, Ohio, January 14; born in Washington, N. H., March 20, 1813; graduated at Dartmouth in 1834; read law in Geneva, N. Y., and Cleveland, Ohio, and practiced there December, 1836, to 1852; secretary to the Society of Savings 1849–1852, secretary and treasurer 1852–1884, president 1884 till his death; a member of the city board of education and an originator of the Cleveland public library. The well-known writer, Frederick G. Mather, is his son. His success in banking was phenomenal. As a lawyer, called to give advice in regard to estates and investments, he secured a charter for the Society of Savings on the plan of the Suffolk Savings Bank of Boston, expecting that the work would be done by others, and that he, at most, would be only legal adviser. At first a tin box was used for deposits, which for safety was put in an adjoining bank's vault each night; but confidence brought depositors, and the society before his death had over $24,000,000 in its charge and gave great steadiness to the financial interests of that locality. He efficiently promoted great improvements in the city schools, under the supervision of Hon. Andrew Freexe.

MEAD, EDWARD S., in Southampton, Long Island, N. Y., January 10; born in New York City January 10, 1847; publisher, member of the firm of Dodd, Mead & Co., in New York City; graduated at Yale in 1869; wrote over the signature of Richard Markham; was trustee of the Museum of Art, and especially promoted education in art.

MERRICK, FREDERICK, A. M., D. D., LL. D., born at Wilbraham, Mass., January 29, 1810; died March 5, aged 84 years. He studied at Wesleyan University, but in 1836, having been elected on the nomination of President Fisk to the principalship of the Conference Seminary at Armenia, N. Y., left college; in 1838 elected to the chair of natural science in the Ohio University at Athens, Ohio; in 1842 was pastor of the Methodist Church at Marietta, Ohio, and in 1843 was made one of two agents for the newly founded Ohio Wesleyan University. For fifty-one years he served the university as agent, professor of natural history, of moral philosophy, president, and as emeritus professor and lecturer on natural and revealed religion. From 1845 to 1885 he was auditor of the university, and raised over $40,000 for its use.

MONROE, ALBERT BRINKERHOF, at Tarrytown, N. Y., April 21, in the fifty-seventh year of his age; born in New York City and graduated at the University of the City of New York. He engaged in business, but retired in 1874 to devote himself to Christian, educational, and philanthropic work. In 1882 he became corporate member of the American Board of Commissioners of Foreign Missions; in 1886 a trustee of Rutgers College; in 1874 he became a trustee of Hampton Institute and later president of the board; was a member of the council of the University of the City of New York, and of the executive committee of the American Missionary Association; was director of the American Bible Society, the New York Sunday-School Association, and vice-president of the American Tract Society; in 1878 he became director of the Y. M. C. A. and later president, and was active in city, State, and international work.

MUNRO, NORMAN L., New York City, February 24; born in Nova Scotia in 1840; publisher; especially known in connection with Munro's Library and Munro's Pocket Magazine.

NASH, STEPHEN G., in Lynnfield, Mass., May 1; born in New Hampton, N. H., April 4, 1823; graduated at Dartmouth in 1842; lawyer and judge in Boston; taught in the academy several years after graduation.

O'FARRELL, Bishop MICHAEL JOSEPH, at Trenton, N. J., April 2; born in Ireland, December 2, 1832; educated in All Hallow's College and at St. Sulpice, Paris, for the Roman Catholic priesthood; was professor of dogmatic theology in Paris and in Montreal, and gave over $30,000 to charity and education.

OSBORN, Rev. Prof. HENRY STAFFORD, LL. D., in New York City, February 2; born at Philadelphia August 17, 1823; graduated at the University of Pennsylvania and Union Theological Seminary; in 1846 pastor at Belvidere, N. J.; occupied chairs at Roanoke and Lafayette colleges and in Miami University. He was an authority on metallurgy and sacred geography. Among his books are Flowers of Palestine, Scientific Metallurgy of Iron and Steel in the United States, Palestine Past and Present, Manual of Bible Geography, The New Descriptive Geography. He was a member of the Historical Society of Pennsylvania, the American Geographical Society, and the Victoria Institute of London.

PADDOCK (Bishop of Washington), JOHN ADAMS, S. T. D., at Santa Barbara, Cal., March 3; born at Norwich, Conn., January 19, 1825; graduated at Trinity College in 1845 and General Theological Seminary, New York City, in 1849; was pastor of several churches and became Bishop of Washington Territory, in 1880. He established the Episcopal institutions of learning in his diocese and collected the money for them.

PASSAVANT, P. M., M. D., at Pittsburg, Pa., June 3, aged 70; prominent in the Lutheran Church; founder of hospitals in Chicago and Jacksonville, Ill., Milwaukee, Wis., the Pittsburg Infirmary, and several orphan homes. He organized the Deaconess Institute. He also promoted the foundation of Thiel College, and was busy preparing for the organization of the Lutheran Theological Seminary in Chicago.

PATTERSON, Rev. R. W., LL. D., at Evanston, Ill., February 28; born Maryville, Tenn.; organizer and pastor for thirty-two years of the Second Presbyterian Church, Chicago; became professor of apologetics in the Presbyterian Seminary of the Northwest, now McCormick Theological Seminary, and was engaged to lecture in the Lane Theological Seminary. He defended Professor Swing when the latter was tried for heresy.

PATTERSON, Miss HANNAH W., at Westfield, N. Y. Left $100,000 to found a library for the town.

PECK, Rev. THOMAS E., D. D., LL. D., at Hampden Sidney, Va., October 2, 1893; born in South Carolina January 29, 1822; educated at Columbia College and privately; was for a time librarian and treasurer of the college; became eminent in the ministry, and from 1860–1893 was professor in Union Seminary, Hampden Sidney.

PECK, Rev. WHITMAN, at Poughkeepsie, N. Y., November 9; born at Greenwich, Conn., May 16, 1815; graduated from Yale in 1838 and Andover in 1841; was pastor in Massachusetts, Ohio, New York, and Connecticut, when his health failed, and he devoted himself to teaching in Connecticut, 1856–1858; Delaware, 1859–1861; Connecticut, 1862–1864; Fishkill, N. Y., 1865–1868, and New Haven, Conn., 1868–1874; was the author of Latin Lessons, Business Arithmetic, and Manual of Christianity.

PEABODY, Miss ELIZABETH PALMER, Jamaica Plains, Boston, January 3; born Billerica, Mass., 16th of May, 1804; daughter of N. Peabody, sister of Mrs. Horace Mann and Mrs. Nathaniel Hawthorne; spent her youth in Salem, but resided for the most of her life in or near Boston, engaged in education or literary pursuits. She was chiefly known to the present generation as the apostle of the kindergarten in America. She was early noted as a scholar, and began to teach at 16 years of age. Her sisters were among her first pupils. At 18 she studied Greek under Emerson. She taught in the family of Channing, and was associated with Mr. Bronson Alcott. She delighted in having the exclusive direction of a young mind. Among her published works may be named Key to Hebrew History, Key to Grecian History. She contributed to The Journal of Education, to The Examiner, and The Dial. She edited Æsthetic Papers and The Crime of the House of Austria, etc. Deeply interested in education from early life she was alert for improvements; saw the importance of the kindergarten movement from the first, and devoted herself to its introduction in America. In 1870 she visited the Commissioner of Education, and found him in hearty sympathy with her desire to bring a knowledge of Froebel's ideas to American educators. By the aid of John Kraus, an assistant whose whole thought was occupied with kindergarten, the Commissioner was kept informed of every item of interest touching the subject. Miss Peabody therefore found the Bureau of Education ready through its reports and circulars to forward her purpose, and thus her instructive and inspiring efforts were made known by means of its publications to educators in all parts of the land. Before her death she had the satisfaction of seeing the kindergarten more developed in America than in any other country.

PILLSBURY, I. WEBSTER, at Milford, N. H., October 26; born at Hamilton, Mass., in 1811; his youth was spent in Henniker, N. H.; graduated at Dartmouth in 1840; teacher, farmer, etc. Taught in New Hampshire, 1840, in Pepperell, Mass., 1841–1843; Weymouth High School, 1843–44, and Amherst, N. H., 1857–1861; school commissioner for Hillsboro County, 1862–1864; agent for Freedmen's Bureau, South Carolina, 1865–66.

PINGRY, Rev. JOHN F., Ph. D., at Elizabeth, N. J., February 16; born in Massachusetts in 1818; graduated at Dartmouth in 1836, taught in Fishkill, N. Y., 1846–1853, and Newark, N. J., pastor at Roseville, N. J.; principal Pingry School, Elizabeth, N. J., from 1861 until his death.

POOLE, WILLIAM FREDERICK, LL. D., at Evanston, Ill., March 1; born at Salem, Mass., December 24, 1821; graduated at Yale in 1849; was librarian of the "Brothers in Unity" while in college and prepared an index to periodical literature which was extended to a third edition; was associate librarian of the Boston Athenæum in 1851, and in 1852 became librarian of the Boston Mercantile Library, in which position he remained four years and printed during that time a dictionary catalogue of the library on the "title-a-line" principle; was librarian of the Boston Athenæum, 1856–1869; he organized the Bronson Library, Waterbury, Conn., the Athenæum Library at St. Johnsbury, Vt., and did similar work at Newton and Easthampton, Mass., and in the United States Naval Academy at Annapolis. He was librarian at the organization of the Public Library of Cincinnati, and of the Chicago Public Library; from 1877 until his death he was engaged in the organization of the library at Chicago founded by Walter L. Newberry; was president of the American Historical Association, and of the American Library Association, from 1855–1867, and vice-president of the International Conferences of Librarians in London in 1877. He was the author of Index to Periodical Literature, Ordinance of 1787, Cotton Mather, Salem Witchcraft; edited the Owl, a literary magazine published in Chicago in 1874–75, and wrote many papers on historical and literary topics.

RAUCH, JOHN H., M. D., at Lebanon, Pa., March 24; a widely recognized authority on medical education, and one of the most eminent sanitarians in this country; organized the board of health of Chicago, and was president and secretary of the Illinois State board of health from its organization to 1891; was delegate to the International Medical Association at Berlin in 1890, and to the Pan-American at the City of Mexico; served through the war as brigade surgeon, assistant medical director of the Army of the Potomac, and medical director of the Gulf Department; was a prominent member of the Loyal Legion and of the American Medical Association and American Public Health Association.

ROBINSON, Rev. E. GILMAN, D. D., LL. D., at Boston, June 13; born in Attleboro, Mass., March 13, 1815; graduated at Brown in 1838, Newton Theological Seminary in 1842; 1842–1845 pastor at Norfolk, Va., and eight months of the time was chaplain of the University of Virginia; 1846 became professor of Hebrew in the Western Theological Seminary, Covington, Ky.; 1850 pastor in Cincinnati; 1853 professor in Rochester Theological Seminary, and 1860–1872 was its president; 1872–1889 was president of Brown University, served as lecturer on apologetics and evidences of Christianity at Crozer Theological Seminary, Pennsylvania. At the time of his death he was professor of ethics and apologetics in the University of Chicago. For five years he was editor of the Christian Review; in 1883 delivered the Yale lectures on preaching. He published Principles and Practice of Morality, and a new edition of Neander's Planting and Training of the Christian Church.

ROLFE, H. PERCY, at Great Falls, Mont., March 18; born in Vermont; graduated at Dartmouth in 1874; taught in the Ohio State School for the Blind and in Helena, Mont., and became editor, lawyer, and judge.

ROTCH, ARTHUR, eminent architect, in Beverly, Mass., August 15; born in Boston, May 13, 1850; graduated at Harvard in 1871; spent two years at the Institute of Technology; was in the office of Mr. Van Brunt; 1874 in the School of Fine Arts, Paris, and until 1880 traveled through Europe and studied. In 1882, in cooperation with his sister, he established the well-known Rotch Traveling Scholarship as a memorial to his father, Benjamin Rotch, enabling students chosen by the Boston Society of Architecture to reside for two years in Europe studying architecture. This is understood to be the first American scholarship of the kind. Mr. Rotch's firm (Rotch & Selden) furnished the plans for the Art Museum and School at Wellesley College, the gymnasiums at Bowdoin College and Exeter Academy, and the Bridgewater Public Library.

SCAMMON, Gen. ELIAKIM PARKER, in New York City, December 7; born in Whitefield, Lincoln County, Me., December 27, 1816; graduated at West Point; 1837 was assistant professor of mathematics at the Academy, also assistant professor of history, geography, and ethics; was professor in Mount St. Mary's College, Cincinnati, two years, and president of the Cincinnati Polytechnic College, 1851–1861; professor of mathematics and history in Seton Hall College, South Orange, N. J., from 1875–1885.

SCUDDER, JOHN MILTON, M. D., at Dayton, Fla., February 17; born in Hamilton County, Ohio, September 8, 1829, studied at Miami University; graduated at the Eclectic Medical Institute, Cincinnati, 1856; professor of anatomy there the next year and later occupied different chairs; was also dean and treasurer. He was editor of the Eclectic Medical Journal, and published several books on medical subjects.

SHAFER, HELEN ALMIRA, M. A., LL. D., at Wellesley, Mass., January 20; born in Newark, N. J., September 23, 1839; graduated at Oberlin in 1863; taught two years in a young ladies' school in New Jersey; became instructor of mathematics in the St. Louis High School, was called to the chair of mathematics at Wellesley College in 1877 and filled that position until 1888, when she was elected president, which position she retained until her death.

SHEDD, Rev. WILLIAM GREENOUGH THAYER, in New York City, November 17; born in Acton, Mass., June 21, 1820; graduated at the University of Vermont in 1839 and at Auburn Theological Seminary in 1843; was pastor at Brandon Vt.; was professor of English literature in the University of Vermont 1845–1852; professor of sacred rhetoric in Auburn Theological Seminary; professor of church history in Andover Seminary; assistant pastor of the Brick Church, New York; professor of biblical literature in the Union Theological Seminary until 1874, and was professor of systematic theology there until 1890. He was the author of a large number of works on theology and other subjects.

SHEPHERD, JOHN WESLEY, at Montgomery, Ala., May 1; born at Huntsville, Ala., July 20, 1826; graduated at Yale in 1844; taught in an academy in Huntsville; was for the greater part of his life reporter for the supreme court of Alabama.

SHIPLEY, JAMES LUCIEN, at Springfield, Mass., December 17; born in Londonderry, N. H., March 31, 1836; graduated at Yale in 1861; was principal for two years of Bacon Academy, Colchester, Conn.

SHIRAS, Rev. ALEXANDER, at Clifton, Pa., November 20; born at Mount Holly, N. J., in 1813; graduated at the theological seminary at Alexandria, Va.; was rector at Berryville, Va.; Georgetown, D. C.; Pelham, N. Y.; Chestnut Hill, Philadelphia, and at King George, Va.; was appointed by the President chaplain of Satterly Hospital, at Philadelphia, during the war. He held a position in the Bureau of Education at Washington for about twenty years, and was devoted to its interest and most faithful in his duties.

SIMPSON, Prof. BENJAMIN H., at Chicago, June 28; assistant professor of systematic theology in Chicago University.

SMITH, Rev. GEORGE S., August 12; for thirteen years was teacher and preacher in Raleigh and McLeansville, N. C.

SMITH, Rev. C. D., D. D., at Franklin, N. C., January 3, aged 82; assistant State mineralogist and a local preacher.

SNOW, FREEMAN, Ph. D., LL. D., at Nelson, Pa., September 12; born in Palmyra, N. Y., in 1841; served through the war; was fitted at Andover and graduated at Harvard in 1873; was assistant professor of history at the United States Naval Academy for two years; taught history one year at the Boston Latin School; was appointed instructor in forensics and American history at Harvard in 1881, and after three years' study in France and Germany became professor of international law and American diplomacy at Harvard and held that chair until his death.

STORRS, Rev. HENRY MARTYN, D. D., LL. D., at Orange, N. J., December 1; son of President Storrs, of Western Reserve College; born at Ravenna, Ohio, January 20, 1827; graduated at Amherst in 1846; taught in Virginia; studied theology at Andover, 1848–1851; was a pastor in Lawrence, Mass., Cincinnati, Ohio, and Brooklyn, N, Y.; was secretary of the American Home Mission Society, 1872–1882, and while in that position promoted education; was a trustee of Marietta College for thirty years; pastor at Orange, N. J., from 1882 until his death. As a preacher he was spiritual and eloquent; as a scholar, earnest and accurate; as pastor, tender and faithful; as head of a family, cheerful and affectionate; as citizen, characterized by a lofty patriotism.

STRONG, Prof. JAMES, S. T. D., LL. D., at Round Lake, N. Y., August 7; born in New York, August 14, 1822; studied medicine for a time in Lowville, N. Y.; graduated at Wesleyan University in 1844; taught two years in the Troy Conference Seminary; 1847, removed to Flushing and built the Flushing Railroad; was its president, and showed aptitude in other business also; in 1858 became professor of theological literature in Troy University; in 1868 was professor of exegetical theology in Drew Theological Seminary; was eminent as a teacher, lecturer and writer, but remained a layman. Among his numerous publications are Harmony of the Gospels, both English and Greek. He contributed to Lange's Commentaries. He assisted in preparing McClintock and Strong's Cyclopedia of Biblical, Theological, and Ecclesiastical Literature, comprising 12 volumes, and owing to the death of Dr. McClintock, was compelled to edit seven-tenths of the work. His books of importance number over a dozen, and he was engaged upon a history of ecclesiastical biography from the year 1700. His great concordance is well known. He was a member of the Anglo-American committee to revise the Old Testament.

STRONG, Miss MARY A., at Talladega, Ala., March 1; born and educated in Ohio; taught in Akron High School, Ohio; at Talladega she was chief lady instructor and teacher of mathematics. She was sister of Dr. Josiah Strong.

SWING, Rev. DAVID, at Chicago, October 3; born in Cincinnati, August 23, 1830; graduated at Miami University with high honors as a linguist in 1852, and began the study of theology, but within a year was appointed professor of languages at Miami, and remained there twelve years.

TEAL, JOHN WILLIAM, D. D., in Elizabeth, N. J., June 30; born at Rhinebeck, Dutchess County, N. Y., April 14, 1839; graduated at Yale in 1864, and taught one year in an academy at Stamford, Conn.

THAXTER, Mrs. CELIA, Appledore Island, Isles of Shoals, 26th of August; born in Portsmouth, N. H., 1836; daughter of Thomas B. Leighton; noted as a writer of prose and poetry.

THOMPSON, THOMAS MERRITT, in Taos, N. Mex., June 6; born in Woodstock, Ulster County, N. Y.; graduated at Yale in 1844; taught three years in the high school at South Britain, Conn., and conducted for several years in Woodbury, Conn., a select school for both sexes; he also taught in Arroyohondo, N. Mex.

TORRY, Rev. DAVID, D. D., at Cazenovia, N. Y., September 29; born in Bethany, Pa., 1818; graduated at Amherst in 1843; studied theology at Andover and Union; tutor at Amherst, 1846–47; taught in Chicago; Honesdale (Pa.) Academy, 1848–49; was settled in several pastorates and taught intellectual philosophy at Hamilton College, 1880–1883.

TUTTLE, Prof. HERBERT, at Ithaca, N. Y., June 21; born in Bennington, Vt., in 1846; graduated at the University of Vermont in 1869; engaged in newspaper work in Europe and this country until 1880, when he became lecturer in the University of Michigan. The following year he became professor of history at Cornell. He published German Political Leaders and a History of Prussia, of which three volumes appeared during his lifetime. The fourth volume has been continued and published by Prof. H. B. Adams.

WALSH, Miss FANNIE I., May 2, suddenly at the Bishopthorpe School for Young Ladies, South Bethlehem, Pa., of which she had charge for a quarter of a century.

WARDWELL, J. H., at Williamstown, Mass., July 23; born in Sanbornton, N. H., 1844; graduated at Dartmouth in 1870; taught at Amesbury, Mass., Milford, N. H., Saco, Me., Quincy, Mass., and Milford, Mass.

WATERHOUSE, FRANCIS A., teacher, July 1, at Paris, France, where he had gone for his health; born in Scarboro, Me., January 27, 1835; attended public schools; went to sea two years; fitted at Hallowell Academy and graduated at Bowdoin in 1857; while there was librarian. He taught his first school during his freshman year; after graduation taught at Natchez, Miss.; in 1859 took charge of Hallowell Academy; in 1861, Augusta High School; in 1868, Newton High School, and in December, 1880, was elected head master of the English High School, Boston.

WEED, Miss ELLA, in New York City, January 10; born in Newburg, N. Y.; graduated at Vassar with high honor in general study and with special honor in mathematics; was in charge of a school for girls in Springfield, Ohio, for several years, and left on account of ill health. On regaining her health she taught one year in her native city and then accepted a position in Miss Annie Brown's school, in New York. From the founding of Barnard College she was a trustee and soon after dean of the faculty, and was influential in giving form and substance, breadth, and liberality to the foundations of that institution.

WELD, FRANCIS M., M. D., Jamaica Plain, Mass., January 1; born in Dalton, N. H., in 1840; graduated at Harvard in 1860 and the medical school in 1864; was assistant surgeon in the Navy and later surgeon in the Army; practiced in New York and Massachusetts, and was twelve years a member of the Harvard board of overseers.

WELLING, JAMES CLARK, LL. D., at Hartford, Conn., September 4; born in Trenton, N. J., July 14, 1825; graduated at Princeton in 1844; studied law; 1845, taught in New York College School; was political writer for the National Intelligencer, 1850–1865; 1867, president of St. Johns College, Annapolis, Md.; 1870, professor of belles-lettres, Princeton; 1871, president of Columbian University, Washington, D. C. Under his administration the university was greatly enlarged in all departments—the polytechnic school started and the new building erected at the corner of H and Fifteenth streets. His resignation of the presidency had been tendered to take effect October 1. He was president of the board of trustees of the Corcoran Art Gallery and traveled in Europe in its interest. In 1884 he became regent and chairman of the executive committee of the Smithsonian Institution. He was a member of the Philosophical Society and president of the Anthropological Society of Washington, and also president of the Copyright League of the District of Columbia.

WHEELER, Col. WILLIAM F., at Helena, Mont., June 24; born in New York; he removed to St. Paul in 1857; was private secretary to the governor; located the first telegraph line in the State; was captain in the Fourth Regiment; moved to Montana in 1869, and was librarian of the State Historical Society; did much to preserve accurate historical data and to create an interest in the study of history.

WILLIAMS, GEORGE HUNTINGTON, at Utica, N. Y., July 12; born at Utica, January 28, 1856; graduated at Amherst in 1878, and spent several years abroad studying; became associate professor in Johns Hopkins University in 1885, and in 1892 professor of inorganic geology; wrote on geology.

WHIPPLE, EZEKIEL WEBSTER, at Faribault, Minn., October 4; born at Oberlin, Ohio, August 20, 1845; son of Rev. Dr. George and Alice (Webster) Whipple and grandson of Ezekiel Webster; graduated at Dartmouth in 1867; studied law, but devoted himself to teaching; taught in Springboro, Ohio, 1871–1873, at Faribault, Minn., 1873–1878, and again in Shattuck School from 1879 until his death.

WHITNEY, Prof. WILLIAM DWIGHT, A. M., LL. D., at New Haven, June 7; born at Northampton, Mass., in 1827; prepared for college in his native town; graduated at Williams in 1845; engaged in banking, studying languages in the meantime, especially Sanskrit, and subsequently pursued these subjects at Yale and abroad; in 1854 became professor of Sanskrit at Yale and in 1870 professor of comparative philology; he had been president of the American Philological Association and of the American Oriental Society and a member of other scientific and learned societies; he assisted in the preparation of Webster's Dictionary, and was editor in chief of the Century Dictionary; was author of valuable textbooks and treatises on language, and had been called the leading philologist in America; his books have been translated in various languages and his contributions appeared in different magazines; he received honorary degrees from St. Andrews, Harvard, and other institutions.

WHITTIER, D. B., in Boston, December 8; born in New Hampshire in 1824; graduated at Dartmouth in 1848; taught in New Hampshire, Palmyra, N. Y., and Frankfort, Ky., and afterwards devoted himself to business.

WINTHROP, Hon. R. C., LL. D., Boston, 16th of November; born in Boston, 12th of May, 1809. He was descended from John Winthrop, first governor of the colony of Massachusetts, and was the sixth generation from him; graduated at Harvard, 1828; was three years a student in the law office of Daniel Webster; elected to Massachusetts house of representatives, 1834, and was speaker for three years; 1840 was elected to Congress, and served until 1849; he was speaker 1847 to 1849, winning great favor as a presiding officer. He was a ready debater and an accomplished orator. When Daniel Webster became Secretary of State he was appointed to his place in the United States Senate. Defeated in the election he became the candidate of the Whigs for Governor, but failed of an election and withdrew from politics. He was a favorite orator on important occasions, local and national. His mind was conservative in its tendencies; he was opposed to slavery, but also opposed to the extreme methods of some of the advocates of abolition. He was an ardent friend of American ideas as he understood them, and especially devoted to education. He was for thirty years president of the Massachusetts Historical Society, and for many years presided over the board of overseers for the poor of Boston. He was the special counsellor of Mr. George Peabody in his great benefactions. He aided him in preparing the plans for the Peabody Southern educational fund, advised the calling of Dr. Barnas Sears as agent, and was president of the board of trustees for nearly thirty years. He was fond of speaking of his service in this connection as equal if not greater in satisfaction and importance to any he had been called upon to render during his long life. His first book, "Speeches and Addresses," appeared in 1853, and others followed at intervals until 1880. He delivered the oration at the laying of the corner stone of the Washington Monument in 1848, and also at its completion in 1885. Among his bequests were $5,000 to the Massachusetts Historical Society, and the same amount to the Boston Provident Association; $1,000 to the Boston Children's Hospital, $250 to the library of the Boston Latin School, and also the same amount to the Trinity Church sunday school. (See Dr. A. D. Mayo on Winthrop and Peabody.)

WOOLSON, CONSTANCE FENIMORE, novelist, Venice, Italy, 24th of January; born Claremont, N. H., March 5, 1838, but spent most of her life in Cleveland, Ohio. Her father was Charles Jarvis Woolson, and her mother Hannah Cooper Pomeroy, of Cooperstown, a niece of James Fenimore Cooper. She returned to United States but once after going to Europe in 1879.

FOREIGN.

ENGLAND.

BUSS, FRANCES MARY, London, in December; born in that city in 1827; established North London Collegiate School for Ladies, which took first rank as a school for girls. Her pupils won many prizes after the Cambridge examinations were opened to women in 1863. The Camden School was modeled after her school and became affiliated with it, and both were endowed by the Brewers' Company, and were models for the formation of other schools.

CAMERON, V. L., Leighton, Buzzard, 26th of March; born Weymouth in 1844; noted writer and explorer in both Asia and Africa.

COLERIDGE, Baron, London, 1st of June; born in Ottery, St. Mary's, 3d December, 1820; chief justice of England.

CURTIS, Rev. GEORGE H., Litchfield, 9th of October; born 1824; noted teacher and preacher.

FROUDE, JAMES ANTHONY, 20th October; born 1818; noted historian.

HAMERTON, PHILIP GILBERT, in France, 5th November; born Lancashire 10th of September, 1834; noted author and art critic.

HODGSON, B. H., London, May 25; noted orientalist; discovered the Buddhist scriptures in Napaul in 1824.

LAYARD, Sir AUSTIN HENRY, archæologist, London, 5th of July; born in Paris 5th March, 1817; was of a Huguenot family; was a member of Parliament, and was also in the diplomatic service, but is chiefly known in connection with archæological explorations in and about Nineveh, as set forth in his Nineveh and Its Remains, and other works.

MARSHALL, WILLIAM CALDER, London, 16th of June; noted sculptor.

MOON, WILLIAM, LL. D., Brighton, England, 10th of October; born near Tunbridge Wells, 18th of December, 1818; his, it has been said, "was the talent of blindness." When 4 years of age he lost one eye by scarlet fever, and using the other too much, at 22 he was wholly blind. He acquired the use of the alphabet for the blind and taught the same. One lad for five years tried in vain to learn it, and Mr. Moon revised the form of letters to simplify them. The result was Moon's type, consisting of nine characters, now applied to 476 dialects and languages. Persons of benevolence came to his aid; a society was formed, and his life was devoted to preparing and publishing works for the blind; over 200,000 books have been issued, specially intended for home reading by the blind. Dr. Moon and his daughter, his devoted and principal assistant, who now carries on the work, traveled widely. They came to America and were assisted by the Bureau of Education in making their work known among the blind of this country. His books are on deposit with Mr. John P. Rhoads of Philadelphia.

MORLEY, HENRY, Isle of Wight, 14th of May; born in London, 15th of September, 1822; physician, teacher, lecturer, and author of note.

MORRIS, RICHARD, in Essex, 12th of May; born at Bermandsey, 1833; noted philologist.

PEARSON, CHARLES HENRY, 29th May; noted as historian and educator; spent twenty years in Australia, during which he was professor for a time in the university and again in the Presbyterian College, and from 1886 to 1890, minister of public instruction.

ROMANES, GEORGE JOHN, Oxford, England, May 23; born in Kingston, Canada, May 20, 1848; educated at Caius College, Cambridge, where he graduated with honors; was Fullerton professor in the Royal Institute in London; eminent scientist.

STEVENSON, ROBERT LOUIS BALFOUR, in Samoa 3d of December; born in Edinburgh, 13th of November, 1850; novelist, poet, and essayist.

YATES, EDMUND HODGSON, 20th May; editor and proprietor of the London World.

OTHER FOREIGN COUNTRIES.

ALEXANDER III, Czar of Russia, November 1, at Livadia, his summer home.

BAIGLBOCK, HERM., January 1; school principal in Breitenstein, Austria; founder of teachers' associations.

BAYER, privy councilor, Germany, Wiesbaden; was chief of division in the department of public instruction in Berlin.

BILLROTH, Prof. THEODOR, February 5, at Abbazia, Austria; one of the greatest physiologists of the world.

BIRCHMEIER, Prof. A., February 10, in Chur, Switzerland; a noted teacher of drawing.

BROWN-SEQUARD, Dr. EDWARD, at Paris, April 2; born in the Island of Mauritius in 1818 (his father was an American), educated upon the island and studied medicine in Paris; was appointed professor in the School of Medicine at Paris in 1859; came to this country in 1864 and was appointed professor of the physiology and pathology of the nervous system at Harvard; practiced in New York in 1873, and with Dr. Seguin began the publication of Archives of Scientific and Practical Medicine; became professor of experimental medicine at the College of France. He published many essays and papers giving the details of his discoveries, and also lectures on "Paralysis of the lower extremities," and lectures on "Functional affections." For many years he was president of the French Academy of Science, and in 1881 was awarded the Baly medal by the Royal College of Physicians of London.

BRINKMANN, A., Germany; died at 64 years of age; school principal; distinguished as writer of scientific treatises.

DAGUET, Dr. ALEX., Switzerland, May 21, in Neuenburg; authority in history.

DARMESTETER, JAMES, D. Lit., at Maison-Lafitte, near Paris, October 19; born at Chateau Salins, Neurthe, March 28, 1849; educated at the Lycée Bonaparte, in Paris; assistant professor at the École des Hautes Études, professor of Persian language and literature at the College de France.

DAVATZ, FLORIAN, May 11, in Chur, Switzerland; well-known teacher.

DAVID, Dr. RENNO RITTER VON, April 11, in Vienna; chief of section in department of public instruction.

DOMBROWSKI, CHRIST., July 10, in Strassburg, aged 100 years; was physically and mentally sound till within a few hours of his death; Nestor of the teachers in West Prussia.

FIEDLER, Dr. KARL, April 1, in Zurich, Switzerland; professor in zoology.

FROEBEL, KARL, May 9, in Zurich, Switzerland; nephew of Friedrich Froebel, of Kindergarten fame. Distinguished pedagogical and philosophical writer.

GONZALES Y DIAZ-TUÑON, Zeferino, Cardinal, November 29; born at Villora, near Oviedo, January 28, 1831; educated at the Dominican Mission College at Oscana; was professor of philosophy and theology at Manila, Philippine Islands.

GOUW, JANTER, January 10, in Amsterdam; noted Dutch historian.

GUIMPS, ROGER DE, Switzerland, in December; one of the last of Pestalozzi's pupils; published a biography of Pestalozzi.

HAGE, EDMUND, April 12, in Brugg, Switzerland; school principal.

HALFDANORSON, HELGI, in January; born in 1826; noted Icelandic poet and teacher.

HELMHOLTZ, Prof. HERMANN LUDWIG FERDINAND VON, in Berlin, 73 years old; one of the most distinguished physicists and physiologists of the world.

HERTZ, Prof. HEINRICH, February 22, in Bonn; a well-known physicist.

HILDEBRAND, Dr. RUD., October 28, in Leipsic; noted as contributing editor of Grimm's Dictionary, a monumental linguistic work.

HINTZE, FRITZ, Germany, May 9, in Stratsund; faithful advocate of the modern school.

HOECKER, OSKAR, in Berlin; author of juvenile literature, formerly famous actor in the Lessing theater.

HOFFMANN, Dr. HEINRICH, Germany, aged 86 years. He was the author of Struwelpeter, a book for little boys that has been translated into more than twenty languages, and is still a favorite, owing to its quaint and drastic illustrations.

HUBER, KARL, July 22, in Micheldorf (Upper Austria); active as an educational writer and promoter of teachers' unions.

HYRTL, Dr. JOSEPH, Austria, July 17, in Perchtoldsdorf, at the age of 83 years; one of the noblest characters and a promoter of public education.

JAEGGI, J., June 20 in Zurich, Switzerland, professor of botany.

JAEGER, FRANZ XAVER, February 25, in Vienna; principal of burgher school; known as promoter of vertical penmanship.

KERN, Prof. FRANZ, December 15, in Berlin; principal of gymnasium and one of the most distinguished Herbartians in Germany.

KOSSUTH, LOUIS, Turin, Italy, 20th March; born in Hungary 27th April, 1802; educated in Protestant College of Sarospatak; noted Protestant Hungarian patriot, greatly honored in America.

KRAUSE, RICH., Germany, May 17, in Nordhausen; musical composer and distinguished leader of juvenile choruses.

KRUMME, Dr. W., Germany, July 9, in Braunschweig; was principal of Realschule, editor of Paedagogisches Archiv, and zealous advocate of secondary education without Latin and Greek.

LAHRSSEN, HERM., Germany, January 12, in Oldenburg; president of teachers' association of Oldenburg.

LAREIDA, J. PETER, September 30, in St. Gall, Switzerland; educational councilor.

LESSEPS, FERDINAND DE., near Paris, 7th of December; born Versailles, 19th of November, 1805; diplomatist and financier; his greatest triumph was projecting and carrying to completion the Suez Canal. Late in life he became interested in the Panama Canal.

LIEBE, Professor, Germany, June 5, in Gera; was well known as a friend of birds and student of their habits.

LOEWENTHAL, Dr. WILLIAM, April 20, in Berlin; published books on hygienic instruction.

MARIGNAC, J. K. DE, April 15, in Geneva, Switzerland; professor of chemistry.

MEIER, Dr. A., June 3, in Lubeck. Since 1852 member of the executive committee of the German Teachers' Union, the printed proceedings of which contain numerous papers read by Dr. Meier.

MEIGER, FR., Germany, February 27; wrote juvenile books under the nom de plume "Fr. Brunold."

MEISSNER, WILLIAM, Germany, November 18, in Sondersleben, aged 92; was the Nestor of the teachers in Anhalt.

MEISTERHAAS, KONR., Switzerland, August 5, in Saleure; teacher in high school.

MERZ, Dr. HEINRICH VON, December 31, in Stuttgart. Noted as the most distinguished prelate of Wurtemberg; promoter of church music.

PSCHARZER, JOHANN, April 11, in Klagenfurt; the best Austrian teacher of deaf mutes.

SCHWARZ, HEINRICH, February 20, in Salzburg, aged 75 years; very active as member of Austrian teachers' associations.

RAUCHHAUPT, WILLIAM VON, April 28; member of the Prussian House of Deputies; well known as the sworn enemy of the modern school.

SCHWEIZER-SIDLER, Dr. H., March 30, in Zurich, Switzerland; professor of philology.

SENDEN, VON, in Aurich, Germany; school councilor and principal of normal school; well known as an educational writer.

STAELIN, councilor of commerce, April 19, in Stuttgart; first president of national teachers' meeting at Stuttgart, Germany.

STUTZ, ULRICH, June 12, in Basel, Switzerland; professor of geology.

TSCHUMI, AD., December 4, in Geneva, Switzerland; principal of école professionelle.

WAGNER, FR., June 5, in Dresden, Germany; 79 years old; principal of burgher school and stenographer of the teachers' union.

WANGEMANN, Dr. H. TH., June 18; was principal of normal school in Kammin, Germany.

WAWRZK, JOHANN, May 11, in Vienna; president of local teachers' association.

WILD, Dr. J., August 22, in Zurich, Switzerland; professor of topography and geodesy.

* Statistics of 1892-93.

a The colored schools were in session 151 days.

b Estimated.

TABLE 1.—*Statistics of population, private schools, and public school enrollment, attendance, supervising officers, and teachers in cities of over 8,000 inhabitants*—Continued.

	City.	Total population (estimated).	School-census age.	Number of children of school-census age.	Number of pupils in private and parochial schools (estimated).	Number of different pupils enrolled in public day schools.			Number of days the public schools were actually in session.	Aggregate number of days' attendance in all public day schools.	Average daily attendance in public day schools.	Number of supervising officers.			Number of regular teachers.			Number of years required to complete the course of study.

* Statistics of 1892–93.
a Estimated.
b The high schools were in session 195 days.
c Including 1 year in the kindergarten and 2 years in the normal school.

TABLE 1.—*Statistics of population, private schools, and public school enrollment, attendance, supervising officers, and teachers in cities of over 8,000 inhabitants*—Continued.

	City.	Total population (estimated).	School-census age.	Number of children of school-census age.	Number of pupils in private and parochial schools (estimated).	Number of different pupils enrolled in public day schools.			Number of days the public schools were actually in session.	Aggregate number of days' attendance in all public day schools.	Average daily attendance in public day schools.	Number of supervising officers.			Number of regular teachers.			Number of years required to complete the course of study.

* Statistics of 1892–93.
a The high school was in session 192 days.
b The two high schools were in session 200 days.
c Estimated.
d The high school was in session 200 days.
e In model school and kindergarten connected with the State Normal School.
f Average.

TABLE 1.—*Statistics of population, private schools, and public school enrollment, attendance, supervising officers, and teachers in cities of over 8,000 inhabitants*—Continued.

	City.	Total population (estimated).	School-census age.	Number of children of school-census age.	Number of pupils in private and parochial schools (estimated).	Number of different pupils enrolled in public day schools.			Number of days the public schools were actually in session.	Aggregate number of days' attendance in all public day schools.	Average daily attendance in public day schools.	Number of supervising officers.			Number of regular teachers.			Number of years required to complete the course of study.

*Statistics of 1892–93.
a The academy was in session 188 days.
b There is a "supplementary year" for those not wishing to go to the colleges.
c Estimated.
d Closed two weeks on account of diphtheria.

TABLE 1.—*Statistics of population, private schools, and public school enrollment, attendance, supervising officers, and teachers in cities of over 8,000 inhabitants*—Continued.

	City.	Total population (estimated).	School-census age.	Number of children of school-census age.	Number of pupils in private and parochial schools (estimated).	Number of different pupils enrolled in public day schools.			Number of days the public schools were actually in session.	Aggregate number of days' attendance in all public day schools.	Average daily attendance in public day schools.	Number of supervising officers.			Number of regular teachers.			Number of years required to complete the course of study.

*Statistics of 1892–93.
a Receipts from county taxes are included in column 5.
b The expenditures for sites, buildings, etc., are controlled by the board of public works and do not appear in the accounts of the board of education.

List of cities containing over 8,000 inhabitants concerning which no recent school data are at hand.

States.	Cities.	States.	Cities.
Alabama	Anneston.	Maryland	Cumberland.
Arkansas	Pine Bluff.	Michigan	Iron Mountain.
California	Fresno.		Ludington.
Florida	Jacksonville.		Saginaw (East).
Georgia	Augusta.		Saginaw (West).
	Brunswick.	Nevada	Virginia City.
Illinois	Alton.	New York	Amsterdam (district No. 11).
	East St. Louis (2 districts.)		Edgewater (district No. —).
	Lasalle.		New Brighton.
	Ottawa.		Peekskill (Oakside district).
	Streator.	North Carolina	Charlotte.
Indiana	Anderson.		Newbern.
	Huntington.		Raleigh.
	Logansport.		Wilmington.
	South Bend.		Winston.
	Vincennes.	Ohio	Ironton.
Kansas	Arkansas City.	South Carolina	Greenville.
Louisiana	Baton Rouge.	Tennessee	Jackson.
	Shreveport.	Wisconsin	Manitowoc.

TABLE 3.—*School statistics of cities and villages containing between 4,000 and 8,000 inhabitants.*

	City.	Total population (estimated).	School census age.	Number of children of school-census age.	Estimated number of pupils in private and parochial schools.	Number of different pupils enrolled in public day schools.			Number of days the schools were actually in session.	Aggregate number of days' attendance of all pupils.	Average daily attendance.	Number of supervising officers.	Number of regular teachers.			Number of buildings used for school purposes.	Total number of seats or sittings for study in all schools.	Value of all public property used for school purposes.	Cost of teaching and supervision.	Total expenditure of public funds for school purposes.

TABLE 3.—*School statistics of cities and villages containing between 4,000 and 8,000 inhabitants*—Continued.

	City.	Total population (estimated).	School-census age.	Number of children of school-census age.	Estimated number of pupils in private and parochial schools.	Number of different pupils enrolled in public day schools.			Number of days the schools were actually in session.	Aggregate number of days' attendance of all pupils.	Average daily attendance.	Number of supervising officers.	Number of regular teachers.			Number of buildings used for school purposes.	Total number of seats or sittings for study in all schools.	Value of all public property used for school purposes.	Cost of teaching and supervision.	Total expenditure of public funds for school purposes.

a Optional in high-school grades and in eighth or highest grammar grade. Sloyd is obligatory in seventh grade.

b As far as shopwork and sewing are concerned.

c It is optional for those in the ninth grade, 14 years of age or over, and for all in the high school.

d In day schools. It has been taught for twenty years in evening schools.

e Obligatory in sewing, optional in carpentry.

f Estimated.

g Carpentry is optional; drawing, sewing, etc., obligatory in day schools; in the free evening drawing school industrial drawing is optional.

h In grades 8 and 9 and high school.

i 2,027 including clay modeling and paper cutting; 1,689 for manual training proper.

j Industrial drawing obligatory in the first eight grades.

k Optional in high school and obligatory in the grades below the high school.

l With boys of the sixth, seventh, and eighth grades.

m Except in high school.

n In the elementary grades all work of this kind is obligatory, but in the high school the work is optional for certain courses.

o 12 benches and 12 sets of tools.

p In manual training high school and the elementary schools there were 5,177 males and 5,379 females.

q Except for girls in high school.

r Exclusive of drawing books, etc.

s 1 special, 19 regular; total, 20.

a Obligatory in the first six grades; optional in the seventh and eighth.

b Sewing and cooking in grades below the eighth are elective and are taught after school hours.

c Not including regular teachers.

d It is optional above the twelfth grade; obligatory below.

e Obligatory in grammar grades; optional in high school.

f Graduates from the grammar school may select which high school they wish to attend; if they are admitted to the manual training high school they are required to do the entire work of the school.

g Pupils are required to take mechanical drawing in connection with the shop-work. Pupils will not be allowed to take a part of the course; they must take it as prescribed.

h In the high school a choice is made between music and drawing. It is obligatory in the grade schools.

a Free-hand drawing is taught in the primary grades, and free-hand and mechanical drawing in the grammar grades, one hour per week.
b A little taught in one school.
c Franklin grammar school.
d Potrero primary school.
e Rincon grammar school.
f No connection with sloyd.
g Regular teachers under direction of one supervisor.
h There are 64 boys and 46 girls in the manual training high school.

a Taught by regular teachers under supervision of four special teachers.
b Taught by regular teachers under supervision of one special teacher.
c The classes in carpentry, wood turning, and pattern making, in the high school, are taught by the same teacher. Vise work and machine-shop work are taught by one teacher, and forging and molding by a third teacher. The other manual training teacher teaches drawing.
d Taught by regular teachers under supervision of specialists.
e The time given for this branch, as well as for pattern making, forging, and machine-shop work, is divided between actual shopwork and the correlated drawing.
f Taught slightly in connection with carpentry.
g Taught in connection with pattern making.
h Taught in connection with carpentry.

a Taught by regular teachers under the supervision of one special teacher.

b The main drawing instruction is free-hand work from natural objects and models. The constructive work is given occasionally, two or three times a month; paper cutting and folding are used most in lower grades; pattern making in upper grades.

c Taught by regular teachers.

d This is taught occasionally.

a Taught by regular teachers under the supervision of specialist.
b Included in drawing.
c Evening drawing schools are 5 in number; have 27 teachers and 632 pupils (average).
d Part of junior and all of senior year.
e Taught by regular teachers under supervision.
f 1 building.
g In day schools mechanical drawing is taken only a part of the year in the regular work in drawing.
h This subject is taught in the high school also, having 15 classes under the special instructor, with 1 lesson a week, 50 minutes in length.
i Not regular.

a Taught by regular teachers under the supervision of one special teacher.

b One school has done something in the way of wood carving, sewing, and cooking, but this work has not been done during school hours. In the primary departments of all the schools clay modeling and paper cutting and folding are taught.

c In primary classes there are but two lessons per week in this department, and they may be drawing, clay modeling, or paper cutting and folding.

d Taught by regular teachers under supervision.

		Mechanical drawing	High School	1	68	10	4	1	1 hour.

a Taught by regular teachers under supervision.

b These four subjects are included in one group in the apportionment of time. In the grammar grades they receive not less than two hours a week, and in the primary grades not less than one and one-half hours. Within certain limits this time may be increased at the discretion of principals.

c Not less than one hour per week.

d Not less than two hours per week.

e Occasional.

f Two to 20 a year.

g Free-hand drawing is not taught as a part of manual-training work. Is taught in all the 8 elementary grades by regular teachers and in the 2 high schools by special teachers (2), all under direction of one master of drawing. Elementary school, 15,093 boys, 15,432 girls; total 31,425. High school, 728 boys, 1,175 girls; total 1,903.

h There are 10 manual training teachers, including supervisor and 2 cooking teachers. Excepting the cooking teachers, no two of these taught one subject alone.

i 5th and 6th grades, 60 minutes; 7th and 8th grades, 90 minutes; high school, 150 minutes.

j 1st grade, 20 minutes; 2d and 3d grades, 30 minutes; 4th grade, 60 minutes.

k 7th and 8th grades, one lesson. 90 minutes; high school, two lessons of 150 minutes each.

l Regular teachers under supervision.

m Irregular.

a The only industrial training given in this institution is in the machine shop, where cadets are taught the elements of carpentry, lathe work, mechanical drawing, etc.

b Conducted for the purpose of helping students who desire to meet their expenses. They are paid 12½ cents per hour for their work.

INDEX.

A.

A. N. Engelhardt School to be established in Russia, 399.
Abbett, Leon, LL. D., death and sketch, 1761.
Abbott. A. B., death and sketch, 1761.
Academia Secretorum Naturæ, organization and objects, 1496.
Académie des États Unis, proposed organization of, 1509–1510.
Academies, character and objects of earliest, 1495; in Italy, 369; in 1781, 712, 713; summary of statistics of private, 50, 51.
Academy, early use of, 1493; number, 1493, 1494; in Egypt and Rome, 1494.
  Use of term in England, 1493, 1494, 1500; in United States, 1493, 1494, 1502; in France and Italy, 1500; on the Continent, 1493, 1494, 1500; used by Socrates and Plato, 1493.
Academy of Architecture of Milan, founded, 1499.
Academy of Fine Arts, France, 1498.
Academy of Fine Arts, St. Petersburg, founded, 411.
Academy of Floral Games, history, 1497.
Academy of Herculaneum, founded, 1499.
Academy of Inscriptions and Belles Lettres, France, 1498.
Academy of Moral and Political Sciences, France, 1498.
Academy of Painting and Sculpture of Turin, founded, 1499.
Academy of Science of France, organization and objects, 1498.
Academy of Sciences of Madrid, founded, 1499.
Academy of Sciences of Mannheim, founded, 1499.
Accademia dei Lincei, history, 1496.
Accademia del Cimento, founded, 1496.
Accademia della Crusca, organization and objects, 1496.
Accademia Pontoniana, history, 1495.
Acland, Arthur H. D., 172, 176.
Adams, Charles Francis, on George Peabody, 752.
Adams, H. B., on Maryland and the "Old Northwest," 725.
Adams, John, author of section of Massachusetts constitution on education, 715; gives account of organization of American Academy of Arts and Sciences, 1508–1509; on 5 elements of New England civilization, 673.
Adams, John Quincy, death and sketch, 1761.
Adams, Samuel, born of the Revolution, 710.
Addis, Wellford, on industrial education of the negro, 1019–1037.
Addition, teaching of. *See* Arithmetic.
Adirondack Mountains, report on forests of, 816.
Adkinson, L. G., geologist, 831, 856.
Adler, Felix, on manual training, 888, 892.
Adolescence, problems of, 456.
Æsthetic forms, traced from Greece, 627.
Afognak School, Alaska, report on, 1462.
African Methodist Episcopal Church, statistics of colleges and universities, 97.
Agassiz, Louis, introduces geology into Harvard University, 832.
Age, distribution according to, in Berlin common schools, 296, 297; of pupils in Russia, 391; of teachers in Prussia, 232–233.
  See also School age.
Agricultural and forestry schools at Zurich, 814–816.
Agricultural and mechanical colleges, 791–807; act of Congress of 1890 concerning, 791; fellowships in, 807; forestry in, 816; Government aid to, 804–807.
  In Pennsylvania, and manual training, 892; Wisconsin, 1449; Virginia, 1021–1022.
  Practical information from, 807.
  Significance of, 805.
  Statistics, 134–138, 792–794, 2040–2043; of colored students, 134; of libraries, 135–136; of receipts and expenditures, 137–138; suited to capacity on special lines, 805.
Agricultural population, the conservative class, 804.
Agriculture, a dependent employment, 804; address of William T. Harris on, 804–807; bibliography of, 1755; method of teaching, 804–807; reduced to pedagogical form, 806.
  Schools of, exhibit at Lyons Universal Exposition, 1730; schools of, in Italy, 368; study of, in Italian technical institutes, 355, 356.
Aikin, Governor, trustee Peabody fund, 753.
Alabama agricultural and mechanical colleges, 795.
  City superintendents, 773; college presidents, 781, 786–787.
  Geology in, 820, 852.
  Industrial education of colored race, 1019, 1025.
  John F. Slater fund, 1019.
  Normal schools, 1019, 1021–1022.
  Peabody fund, 1019; pedagogy in higher institutions, 151; per cent of students of Latin, 43; of trigonometry, 47.
  Sanitary school legislation, 1301.
  Statistics of agricultural and mechanical colleges, 135, 137, 792, 2040–2041; of business colleges, 2170–2173; of city school systems, 27–28, 1780, 1797, 1814; of colleges and universities, 98, 100–102, 105–106, 108–120, 122–123, 2017; of colleges for women, 129, 131–133, 2036; of deaf, dumb, and blind schools, 2201, 2203, 2207, 2215, 2217, 2220; of dental schools, 2051; of law schools, 2058; of manual training, 2114, 2118, 2119, 2122–2123, 2126–2127, 2136, 2142, 2146, 2150, 2156; of medical schools, 2045; of normal schools, 151, 154–163, 792, 2070–2071, 2080–2081; of private secondary schools, 74–81, 83–85, 88–91, 94, 1928–1931, 2008–2009; of professional schools, 141–143, 145; of public high schools, 65–72, 85, 88–92, 1823–1824, 1920; of schools for colored race, 1029, 1030, 1032; of State school systems, 8–10, 12–23; of theological schools, 2060.
  Woman suffrage in school affairs, 1416.
  See also School laws.
Alabama Polytechnic Institute, geology in, 820, 852.
Alaska, amounts appropriated for education in, 1451, 1470; exploration and discovery, 1472–1473; fur trade, 1472; itinerary of Sheldon Jackson, 1471–1492; number and condition of schools, 1451; report on education in, 1451–1492; schools closed, 1451; statistics of education, 1469–1470; teachers and other officers of schools, 1470–1471.
Albany, common schools in colonial times, 653; manual training, 902, 903, 911; reached by Henry Hudson, 694.
Alcoholism, 1693.
Alcorn, James Lusk, death and sketch, 1761.

Alcorn Agricultural and Mechanical College, additions to, 799.
Alcuin, induces Charlemagne to organize learned society, 1494–1495.
Alessandria, scholastic administration of, 334.
Aleutian Islands, stocked with reindeer, 1457.
Alexander III, Czar of Russia, death and sketch, 1776.
Alexander, Henry C., death and sketch, 1761.
Alexander-Marie School for Blind, Russia, work of, 896.
Alexandra Feodorovna, Empress, succeeds to direction of Marie institutions, 404.
Alfred, founds University of Oxford, 1495.
Alfred University, university-extension courses, 959.
Algebra, statistics in private secondary schools, 35, 53, 60, 77, 80, 87, 90; in public high schools, 35, 45, 60, 68, 71, 87, 90.
Algiers, schools in, 188–190, 192. *See also* France.
Allegheny College, geology in, 846, 864.
Allen, Jerome, death and sketch, 1761.
Alma College, geology in, 856, 858.
Alsace-Lorraine, boys in secondary schools, 299; statistics of education, 2236–2237.
Alumnæ, collegiate. *See* Collegiate alumnæ.
Ambrose, E. F., death and sketch, 1762.
Ambulatory schools in Finland, 414, 418, 420.
American Academy of Arts and Sciences, organization of, 1508–1509.
American Association for Advancement of Science, rules for spelling chemical terms, 873–876.
American citizen, a sovereign, 641.
American citizenship, preparations for, 744.
American colonies, government, 644; separate nationalities in, 649.
American domination, effects on Sitka, 1477.
American Institute of Instruction, papers read before, on manual training, by C. M. Woodward, 909–913.
American Journal of Education, as a history of common schools, 639.
American literature, little in Colonial times, 649.
American nationality, central idea of, 725.
American Philosophical Society, marks the breaking away from England, 1507–1508; organization, 1503–1508; original members, 1506.
American Psychological Association, organized, 425.
American society for extension of university teaching, 951, 963–966.
Ames, Mrs. Sarah Etta, death and sketch, 1762.
Amherst College, geology in, 834, 858.
Ammen, Gen. Jacob, death and sketch, 1762.
Analaska, report on schools in, 1461.
Analytical Index to American Journal of Education, mentioned, 639.
Anaximander, on reasons for infancy, 436.
Anderson, John A., and manual training, 885.
Anderson, Newton M., and manual training, 893.
Andrea, Novella d', teacher in University of Bologna, 359, *note*.
Andrews, J. B., death and sketch, 1762.
Andrews, Justin, death and sketch, 1762.
Andros, Sir Edmund, Cheever's petition to, 671.
Angell, James B., quoted on World's Congresses, 1753.
Anhalt, boys in secondary schools, 299; statistics of education, 2236–2237.
Anthropological societies, list of, 1538–1551.
Definitions and psychological side of, 446–447; international congress for criminal, Brussels, 1683–1687.
Antioch College, geology in, 845, 864; university extension courses 959, 960, 961.
Antiquities, committee to take charge of, in Italy, 333.
Antwerp Exposition, report of C. Wellman Parks on forestry education, 809–818.
Anvik School, report on, 1468.
Aporti, Ferrante, founds infant schools in Italy, 335.
Appalachian Mountains, the colonial limit, 724.
Appalachian region, educational aims in, 770.
Apportionment of school funds, Washington, 1439.
Apprentices, and the herding of reindeer, 1454–1456.
Appropriations for education in Alaska, 1470.
Aquinas, importance of philosophical distinctions of, 434.
Archæological societies, list of, 1616–1620.
Architectural societies, list of, 1629–1631.
Argentine Republic, statistics of education, 2240–2241.
Aristotle, divisions of the soul, 433; importance of philosophical distinctions of, 434; quoted, 497.
Arithmetic, disciplinary significance of, 632; German bibliography of, 314–323; in correlation of studies discussed, 497–502; its relation to whole field of mathematics, 498; mastery of number, 630; teaching of, in Connecticut, 1364–1365; verbatim reports of recitations, 557–594.
Arizona, city superintendent, 774; college presidents, 781, 787; compulsory education, 1351–1352; consolidation of school districts, 1352.
Free text-books, 1351. *See also* School Laws.
Geology in, 820, 852.
Primary teachers, 1351.
Reorganization of University, 795.
Statistics of agricultural and mechanical colleges, 2040–2041; of business colleges, 2170–2173; of city school system, 27–28; of colleges and universities, 98, 100–102, 105–106, 108–117, 122, 123, 2017; of manual training, 2134–2135, 2167; of normal schools, 154–162, 164, 2070–2071; of private secondary schools, 74–80, 82–85, 88–91, 95; of public high schools, 65–71, 73, 85, 88–91, 93, 1824; of State school systems, 8, 9, 11, 12–23; of the University, 792.
Arkansas, city superintendents, 774; college presidents, 781; colleges and universities, 1020.
Education of colored race, 1020.
Geology in, 821, 852.
Local taxation for schools, 1352.
Pedagogy in higher institutions, 151; per cent of college preparatory students, 62.
Sanitary school legislation, 1301.
Statistics of agricultural and mechanical colleges, 135, 137, 792, 2040–2041; of Branch Normal College, 792; of business colleges, 2170–2173; of city school systems, 27–28, 1780, 1797, 1814; of colleges and universities, 98, 100–102, 105–106, 108–120, 122–123, 2017–2018; of colleges for women, 129, 132–133, 2036; of deaf, dumb, and blind schools, 2201, 2203, 2207, 2215, 2217, 2220; of law schools, 2058; of manual training, 2114, 2118–2119, 2122–2123, 2136, 2146, 2150; of medical schools, 2045; of music schools 2199; of normal schools, 151, 154–163, 2070–2071 2080 2081; of private secondary schools, 74–81 83–85, 88–91, 95, 1930–1931, 2008–2009; of professional schools, 142–143; of public high schools 65–72, 85, 88–92, 1824–1825, 1920; of schools for colored race, 1029, 1030, 1032; of State school systems, 8–10, 12–23.
Teachers' certificates, 1352–1353.
Woman suffrage in school affairs, 1416.

Catskill Mountains, forests in, 816.
Cattell, A. G., death and sketch, 1764.
Cattell, J. M., work in child study, 425, 428.
Caucasus, educational questions in, 398; statistics, 386, *note.*
Cavour, Count, on Rome as capital of Italy, 327, *note.*
Census, school, Texas, 1433.
Centennial Exposition (1876), Russian educational exhibit at, 882.
Center College, geology in, 830, 856.
Central College, geology in, 837, 860.
Central Europe, education in, 203–323; review of work of Bureau of Education on, 203–205.
Central University of Kentucky, geology in, 830, 856.
Certificates, teachers', in Arkansas, 1352–1353; in Florida, 1370–1372; in Oregon, 1423; in Pennsylvania, 1424; in Texas, 1433; in Virginia, 1438–1439.
Cesi, Frederico, founds The Lynx, 1496.
Chadbourne, President, geologist, 834.
Chamberlin, T. C., geologist, 825, 849.
Chandler, Professor, geologist, 845, 865.
Chandler, Dr. Charles F., geologist, 840.
Chandler, G. V., geologist, 824, 852.
Chaney, George L., and tool instruction, 882.
Chany, L. W., geologist, 836, 853.
Chapin, James Henry, geologist, 842.
Chapman, George H., and tool instruction, 882.
Charitable work, in Russia, 401–410.
Charity schools, statistics of manual training in, 2132–2133, 2164–2166.
Charlemagne, organizes a learned society, 1494, 1495.
Charles Albert, grants constitution that becomes basis of Italian constitution, 331.
Charles City school, ended by Indian massacre, 678.
Charleston, S. C., parochial school in, 689.
Charlestown, Mass., Cheever's school in, 670.
Charlotte, N. C., Queen's College in, 686, 721.
Charlottenberg, children in school, 209.

Chassceloup-Laubat, Marquis de, quoted on world's congresses, 1754.
Chatham, Lord, praises American Congress, 712.
Chatham Academy, Georgia, founded, 693, 722.
Chautauquan education, congress, World's Columbian Exposition, 1741, 1743, 1744.
Chaves, Amado, State superintendent, 773.
Cheever, Ezekiel, first maker of schoolbooks, 671; founder of New Haven, Conn., 669.
Chemical societies, list of, 1534–1536, 1649.
Chemical terms, rules for spelling, 873–876.
Chemistry, per cent of secondary pupils in, 35.
  Statistics in high schools, 47; in private secondary schools, 54, 60, 78, 80, 87, 91; in public high schools, 60, 69, 71, 87, 91.
Cheraw Lyceum, S. C., 56, 691.
Chester, Albert H., geologist, 839, 860.
Chicago, increase in supervising officers, 25; increase in school property, 25; manual training in, 892, 911, 934–935; sanitary school legislation, 1329–1331; school statistics, 32.
Chilcat tribe, account of, 1462–1464.
Child, importance of development of, in psychology, 447–448.
Child labor in France, regulations of, 190–191, *note*.
Child study, associations for, founded, 426; bibliography, 466–467; branch of new psychology, 433; differs from adult psychology, 448; Dr. James Sully collects materials on, 426; establishes relations between universities and lower schools, 430; evils, 426.
  Favors leading by bright children, 431; hygienic tests to be made in, 451–453; Hartwell on bearings of school life on school children, 432.
  Importance of laboratory work in, 427; importance to education, 436; Iowa Society of, organized, 457–458.
  Laboratory work and observation, 427; laboratory work at various institutions, 428–430; material on, collected by G. Stanley Hall, 441; necessary in training of teachers, 476.
  Of no service to teachers, 437, 438; on arrested development, 437; opinions of Plato, Compayré, Le Conte, and Garbini on, 447; questioning on the last year's work, 454; results of hygienic tests on teacher, 453; researches of Hall and Preyer in, 433; return to idea of unity in, 432; shows necessity of functioning of nervous system, 431; study of children's minds, 453, 455; suggestions for, by William L. Bryan, 450–455; symptoms and effect of fatigue in, 431; systematic and unsystematic, 456; unity in, necessary, 427.
  See also New psychology; Old psychology; Physiological psychology; Psychology.
Child Study Monthly, founded, 426.
Children, conveying to school, in Massachusetts, 1380–1382; in Rhode Island, 1427; degradation of, in Sicilian sulphur mines, 345; hypnotic suggestion with, 1680; sanitary legislation affecting school, 1301–1349; study of, suggestions by William L. Bryan, 450–455.
  Vaccination of, for school, 1302, 1304–1307, 1309, 1311, 1314, 1317, 1319, 1322, 1324, 1325, 1327, 1329–1331, 1335, 1339, 1340, 1343–1346.
Childs, George W., death and sketch, 1764.
Chile, statistics of education, 2240–2241.
Chirikof, Alexei, reaches Alaska, 1472.
Chirikof Island, convicts transported to, 1481.
Christendom, denial of ecclesiastical authority in, 662.
Christian churches, claims on sectarian education, 662.
Christianity, nurse of modern States, 628; presupposition of, in Judaism, 629.
Christians, statistics of colleges and universities, 97, 142.
Church and common school, same constituency for, 669.
Church and state, union of in New England, 662; people supreme in, 662; separation hindered by denominational schools, 641.
Church of God, statistics of colleges and universities, 97.
Church schools in Alaska, list of teachers, 1471.
Churches, misapprehensions between Northern and Southern, 754.
Cincinnati, increase in school property, 25; manual training, 897, 911; sanitary school legislation, 1331; school statistics, 30–32.
Cities, comparative population of, in United States, 554; immigration of people into, 1691, 1693.
Citizen, life and duties of, in evening continuation schools, 176–179.
City boards. *See* School laws.
City common schools, statistics, 24–32.
City high schools, review of reports of Bureau of Education on, 36.
City schoolinspectors appointed for Berlin schools, 275–277.
City school museum of Berlin common schools, 289.
City school system, administration, 544; appointment of teachers, 556.
  Board of education's duties, 548, 549; to be ultimate source of power, 555.
  Character of teachers, 549; class of cities included, 543; courses, etc., should be left with superintendent, 556.
  Dangers of inconsiderate and improper action, 549, 550; difficulty of putting teachers on professional basis, 552.
  Executive functions to be centered, 545, 546.
  Flexibility desirable, 545; functions of legislative branch, 546.
  Government autonomous and largely independent, 554.
  Mayor should appoint board of education, 546, 547; methods of appointing teachers, 551.
  No one plan sufficient, 543.
  Object of, 543; organization of, 543–556.
  Partisanship to be avoided, 547; principles of organization and government, 553, 556.
  Quality of instruction, 549; questions submitted to subcommittee on, 471–472.
  Report of subcommittee on organization of, 543.
  School director's duties, 548, 549; Seaver differs from committee on office of school director, 555–556; size of board, 547; statistics, 1780–1822; superintendent's duties, 551, 552.
  Taxing power necessary, 545; time of service of board, 548; two branches of board, 548.
City schools, increase in length of term, 26; reduced expenditure, 24.
  Statistics, 24–32; of enrollment, attendance, supervising officers, teachers, 27; of enrollment at different ages, 30, 31; of manual training, 2093–2113; of property expenditure, 28; summary, 26, 29; of ten largest cities, 32.
City superintendents of schools, list of, 773–780.
Civil code of Rome, nurse of modern States, 628.

Congress, Colonial, number graduates in, 712.
Conly, Prof. J. D., geologist, 850, 869.
Connecticut, all could read and write before Revolution, 667.
City superintendents, 774; church and clergy factors in life of, 661; claims of Plymouth on, 694; college presidents, 781; common-school law of 1650, 656.
Early common schools in, 656; enlightenment in, 1776, 659.
Geology in, 823–824, 852.
Indians religiously instructed in, 659; intelligence of early settlers, 653.
No illiteracy at the Revolution, 743.
Profits in farming, 807.
Roger Sherman, judge of, 712.
Sanitary school legislation, 1304, 1305; school reports, 1360–1366.
Statistics of agricultural and mechanical colleges, 135, 137, 2040–2041; of business colleges, 2170–2175; of city school systems, 27–28; of colleges and universities, 98, 100–102, 105–106, 108–120, 122–123, 1781, 1798, 1815, 2019; of deaf, dumb, and blind schools, 2201, 2203, 2207, 2212–2214; of law schools, 2058; of manual training, 2093, 2039, 2114, 2122–2123, 2128–2129, 2136, 2142, 2151, 2157, 2159; of medical schools, 2045; of normal schools, 2070–2071, 2080–2081; of normal schools, 154–163; of nurse-training schools, 2056; of private secondary schools, 74–81, 83–85, 88–91, 94, 1934–1937; of professional schools, 141–143, 145; of public high schools, 65–72. 85, 88–92, 1827–1829, 1920; of reform schools, 2227, 2230–2231; of Sheffield Scientific School, 792; of schools for feeble-minded, 2221, 2222, 2224; of State school systems, 7, 9–10, 12–23; of technological schools, 2044; of theological schools, 2060.
Superiority of graded schools, 1361–1366; teaching arithmetic, 1364–1365; teaching reading, 1365–1366; town management of schools, 1354–1360.
Virtually a republic, 743.
Woman suffrage in school affairs, 1417.
See also School laws.
Connecticut Academy of Art and Sciences, 1509.
Connecticut reserve, first American State educational fund, 659.
Connell, William, death and sketch, 1764.
Conrad, Professor, work on European universities mentioned, 308; work on universities mentioned, 204.
Conrart, Valentine, founds French Academy, 1497.
Conscripts, illiteracy among, in France, 200.
Conservatoire des Arts et Métiéres, at Paris, 811.
Constitution of United States a compromise, 646.
Contract labor law, not violated by importation of Lapp herders, 1454.
Contract schools in Alaska, list of teachers, 1471.
Conveying children to school in Rhode Island, 1427.
Conzelman, Gottlieb, and manual training, 884, 885.
Cook, George H., geologist, 839. 861.
Cooke, Jacob Parson, death and sketch, 1765.
Cooking, in correlation of studies, 511.

Cooking schools, and Mrs. Mary Hemenway, 908; and Sarah B. Fay, 908; and Mrs. Shaw, 908; in Boston, Mass., 908.
Cooper, F. B., signs Iowa child study circular. 457.
Cooper, O. H., on Committee of Fifteen, 469; signs report on training of teachers, 487.
Cooper, Rev. Samuel, and organization of American Academy of Arts and Sciences, 1509.
Cooper, Susan Fenimore, death and sketch, 1765.
Cooper, Thomas, geologist, 845.
Cope, Edward D., geologist, 845, 865.
Corbett, H. R., State superintendent, 773.
Cornell College, geology in, 829. 856.
Cornell University, forestry in, 817; geology in, 819, 839, 862, 940; gift to, 801; psychology in, 429; university extension courses, 959.
Cornwall, Professor, geologist, 839.
Correlation of studies, æsthetic side of literature emphasized, 497; algebra, J. M. Greenwood on, 534; algebra not to be transferred to elementary school, 502; amount of time for each branch, 524–529; analysis and isolation important, 521–522; arithmetic, dissent of J. M. Greenwood, 532–533; arithmetic, evils of home work in, 522; arithmetic in, 497–502; arithmetic, time, 526; arithmetic, W. H. Maxwell on, 541.
Branches studied to be settled by one's civilization, 491; by synthesis discussed, 520–522; by synthesis, C. B. Gilbert on, 537–538.
Compositions, defects and importance of, 525; constitution to be studied, 508; cooking in, 511; course for those leaving school early discussed, 523; courses of one hour per week, 524; courses per week, schedule, 527–529.
Definition of, 489–490; difference between elementary and secondary studies, 513–520; dissent of Charles B. Gilbert from report, 535–539; dissent of J. M. Greenwood, 532–535; dissent of L. H. Jones from report of subcommittee on, 539–541; dissent of W. H. Maxwell from report of subcommittee on, 541; drawing in, 509, 511.
Educational value of geography, 504; error in making every recitation a language lesson, 530; 5 branches of elementary school, 509; foreign languages, W. H. Maxwell on, 541; formal grammar in, 495–496; fractions discussed, 498–499.
General history, C. B. Gilbert on, 536–537; general history, W. H. Maxwell on, 536, 541; general history discussed, 518–520; geography discussed, 502–505; geography, time, 526; geometry, C. B. Gilbert on, 537; grammar and language, W. H. Maxwell on, 541; history discussed, 505–508, 511; history of English literature discussed, 520; history of United States, J. M. Greenwood on, 534–535; history time, 526; insight into world to be aimed at, 490.
Jones, L. H., on, 539–541.
Language, W. H. Maxwell on, 536, 541; language recommendations to be broadened, 536, 539; language studies discussed, 492–497; Latin, value of, 523; Latin, time, 520; Latin in, 512–513; literary works of art not to be neglected, 496–497; logical order of topics and branches in, 489–490.
Manual training, C. B. Gilbert on, 537; manual training in, 511; "marking time," cause, 530–531; mathematics, elementary and secondary discussed, 513–514; mechanical processes to be avoided, 501; mental arithmetic, 500, 502; mental arithmetic, J. M. Greenwood on, 533–534; methods and organization, 529–532; methods of study of geography, 503; misuse of grammar, 495–496; morals and manners in, 512.
Natural science in, 510–511.
Objective basis of selection of topics preferred, 490; oral and written language lessons, danger in, 525–526; oral biography, C. B. Gilbert on, 538; W. H. Maxwell on, 538, 541; oral lessons, 511; other forms of, 535–536.
Penmanship, time, 526; physical geography in, 514–515; physical training in, 512; physics in, 515–516; physiology and hygiene, 511; precocious children, care needed with, 501; programme, W. H. Maxwell on, 541; promotion of pupils discussed, 530–531; psychological symmetry necessary, 490; psychological value
Correlation of studies, etc.—Continued.
of geography, 504; psychology to hold subordinate place in, 491.
Question limited to elementary schools, 491; questions submitted by subcommittee on, 471.
Reading, courses and amount, 524–525; recitations, length, 527–529; reclassification frequently necessary, 531; recommendations, 529; report on, 489–541; requirements of civilization to be considered in, 490; Robinson Crusoe not a proper center for, 521.
Sailor geography, 504–505; school programme, 522–529; school readers in, 494; science, C. B. Gilbert on, 536–537; W. H. Maxwell on, 536, 541; scientific method, discussed, 517–518; C. B. Gilbert on, 537; W. H. Maxwell on, 537, 541; sewing in, 511; specialization of teachers discussed, 529; C. B. Gilbert on, 537; spelling, 526; spelling book, J. M. Greenwood on, 535; symmetrical arrangement necessary, 489.
Text-book in geography, C. B. Gilbert on, 539; text-book in grammar, C. B. Gilbert on, 538; text-book in grammar, time, 526.
United States history to be taught in, 507.
Vocal music in, 511–512.
Corrigan, Rev. Patrick, death and sketch, 1765.
Corson, Oscar T., State commissioner, 773.
Cöslin, cost of common schools per head, 217.
Costa Rica, statistics of education, 2240, 2241.
Coulter, Stanly, geologist and biologist, 828, 854.
Country schools in Italy, courses in, 339; in Texas, 1432–1433; in West Virginia, graded course of study, 1441–1444.
County board. *See* School laws.
County boards of health. *See* Boards of health.
County commissioners. *See* School laws.
County examiners. *See* School laws.
County superintendents, duties of, 1302.
See also School laws.
Course of study, diagram of, 638; disciplinary and information branches, 630; graded for country and village schools, West Virginia, 1441–1444; in Berlin common schools, 249, 278–280, 282–289; in Missouri, 1393–1397; in reading, 1419–1421; in Russia, 394–395; in Vermont, 1437; to be exhaustive at each epoch, 623; to be suited to time for study, 621.
Courses in Italian country schools, 339; in Italian elementary schools, 336–339; in Italian technical schools, 353–355; in law, 997; in medicine, 984, 985; in manual training schools, 912, 913, 916.
Coward, Mr., superintendent of education, 691.
Cragin, F. W., geologist, 822, 852.
Crane, Frank, State superintendent, 773.
Crefield, children in school, 210.
Cremation, among the Chilcat tribe, 1464.
Crime, juvenile, and industrial schools, 182–183; not a disease, 1663; prevention of, 1666.
Criminals, case of H., 1666–1675; deceitfulness of, 1665; freedom of will, 1664; illiteracy among, in France, 200; moral obtuseness, 1665; morbid possession, 1685; not so abnormal, 1663; physiology of brain, 1664; study of, 1664.
Criminology, bibliography, 1697–1699; crimes of crowds, 1686; hypnotism in, 1685; instruments of precision used in, 1665, 1668; international congress, Brussels, 1683–1687; not a science, 1664; purpose of study, 1675; studies in, 1663–1675.
Crook, A. R., geologist in Northwestern University, 827, 854.
Crooker, Jas. F., quoted on education in New York, 1404, 1411.
Crosby, William O., geologist, 834, 858.
Crowfield Academy, N. C., established, 688.
Crozet, Va., mannal training, 911.
Crystal vision, 1680–1681.
Cuba, statistics of education, 2240–2241.
Culbertson, Glenn, geologist, 828, 854.
Culver, Gary E., geologist, 847, 867.
Cumberland Presbyterians, statistics of colleges and universities, 97.
Cumberland University, geology in, 848, 866.
Current movements in Russian education, 396–400.
Curry, Dr. J. L. M., agent of Peabody fund, 741, 764; historian of Peabody education fund, 752; memorial on national aid to education, 762;

proposes statue to R. C. Winthrop, 769; represents Old and New South, 758.
Curtin, Andrew Gregg, death and sketch, 1795.
Curtis, Ernest H., death and sketch, 1795.
Curtis, George H., death and sketch, 1776.
Curtis, George Ticknor, death and sketch, 1795.
Cushing, Henry P., geologist, 844, 862.
Cutler, Carroll, death and sketch, 1795.
Cutler, Manassah, on settlement of Northwest, 736.
Cutler Academy, geology in, 822.
Cutting, H. C., State superintendent, 773.
Cygnaeus, Otto, and manual training in Finland, 880.
Cygnaeus, Uno, reorganizes school system of Finland, 414–415, *note*.
Cyr, Narcisse, death and sketch, 1765.
Cyrille, invents Russian alphabet, 410.

D.

Dagnet, Alexander, death and sketch, 1777.
Dale, T. Nelson, geologist, 834, 859.
Dana, E. S., geologist, 823.
Dane, Nathan, amendment to ordinance of 1787, 736.
Dante, influence on learned societies, 1495.
Danzig, children in school, 209.
Darmesteter, James, death and sketch. 1777.
Dartmouth College, founded, 657; geology in, 838, 860; not outgrowth from common schools, 657.
Darwinism, shows need of mastery of our history, 627.
Davatz, Florian, death and sketch, 1777.
Davenport, Mass., manual training, 911.
David, Renno Ritter von, death and sketch, 1777.
Davidson, W. J., State superintendent, 773.
Davidson College, geology in, 843, 862; growth of, 688.
Davis, W. M., geologist, 832.
Dead languages, "all perfect," 624.
Deaf, congress of instructors of, at World's Columbian Exposition, 1741, 1742, 1743, 1745, 1746, 1748, 1749, 1750.
Deaf and dumb school near St. Petersburg, 404.
Deaf schools, statistics, 2201–2214; of benefactions to, 2234–2235; of manual training in, 2122–2127, 2150–2156.
Deafness, 1695.
Death, struggle against, 1692.
Decadents, importance of study of, 448.
December conference, called by William II, 204.
Decimals, teaching of. *See* Arithmetic.
De Foe, Daniel, characterization of work of, 521.
De Garmo, Charles, and manual training, 895.
Degrees conferred, statistics, 116–120; in colleges for women, 126, 131.
Degrees, in Italian universities, 364; in law, 999; in theology, 978; statistics of students in courses leading to, 105.
Delaware, agricultural and mechanical colleges, 796.
City superintendents, 774.
First to adopt Constitution, 685.
Geology in, 824, 852; governed by Swedes and Dutch, 685.
Influence of clergy on schools, 685.
Mixed settlers, 686.
Per cent of students of Latin, 43; provision for schools in constitution, 722.
Sanitary school legislation, 1305–1306.
Statistics of agricultural and mechanical colleges, 135, 137, 792, 2040–2041; of city school systems, 27–28; of city schools, 1781, 1798, 1815; of, colleges and universities, 98, 100–102, 105–106, 108–118, 122–123, 2019; of manual training, 2093, 2098, 2114, 2128–2129, 2136, 2159; of normal schools, 154–163, 2080–2081; of private secondary schools, 74–81, 83–85, 88–91, 94, 1936–1937; of public high schools, 65–72, 85, 88–92, 1829; of reform schools, 2227, 2230–2231; of schools, 1029, 1030, 1032; of State school systems, 8–10, 12–23.
Taxation for schools in, 722.
Woman suffrage in school affairs, 1416.
See also School laws.
Delianow, Count, Russian minister of education, 385, 392.
Della Vos, and tool instruction, 881, 882.
Demidoff, Prince, founds commercial school for boys, 402.
Demographical congress, Budapest, 1687–1697.
Demography, bibliography, 1697–1699; history of, 1693–1695; international congress on, Budapest, 1687–1697; resolutions passed by congress, Budapest, 1695–1697.
Denison University, university extension courses, 959, 960.
Denmark, learned societies in, 1499; statistics of education, 377, 2236–2237.
Denominational colleges, statistics, 97.
Denominational schools, statistics, 55, 83, 84.
Dental schools, statistics, 141, 143, 144, 145, 2051–2052.
Dental societies, list of, 1632–1637.
Dentistry, students, 979, 986, 987–989.
Denver, manual training, 897, 911, 916; cost of plant, etc., 923; description of, 920–925; sanitary school legislation, 1332.
Department of Agriculture, and agricultural colleges, 804–807.
De Pauw University, geology in, 828, 854.
Descriptive phases learned early, 637.
Des Moines, sanitary school legislation, 1332–1333.
Detroit, increase in supervising officers, 25; sanitary school legislation, 1333–1335.
Dewey, Chester, geologist, 834, 841, 859.
Dewey, John, professor of philosophy, 429.
Dexter, Samuel, talk with Jefferson on slavery, 932.
Dickenson, John W., and manual training, 898.
Dickinson, Jonathan, founds N. J. College, 699.
Dickinson, William, death and sketch, 1765.
Dickinson College, Pa., founded, 712.
Dinter, quoted on school question, 227.
Diplomas, common school, in Colorado, 1354.
Directive intelligence, need for education of, 621.
Disciplinary studies, preparatory schools confined to, 619; raising standard of, 619; union with collateral, 620, 622.
Discipline, in classical studies, 624.
Discipline of mind, kept up in high schools and colleges, 637.
Distribution of pupils in France, 192–197; in private schools, 51.
District boards. *See* School laws.
District of Columbia, city superintendents, 774; college presidents, 781.
Free text-books and supplies, 1366–1368.
Pedagogy in higher institutions, 151; per cent of students of German, 45; per cent of students of history, 54.
Sanitary school legislation, 1304; school libraries in, 55.
Statistics of business colleges, 2170–2171, 2174–2175; of city schools, 27–28, 1781, 1799; of colleges and universities, 98, 100–102, 105–106, 108–120, 122–123, 2019; of deaf, dumb, and blind schools, 2201, 2203, 2207; of dental schools, 2051; of law schools, 2058; of manual training, 2093, 2099, 2118–2119, 2122–2123, 2130–2133, 2146–2147, 2151, 2159, 2164; of medical schools, 2045, 2046, 2049; of normal schools, 151, 154–163, 2070–2071, 2080–2081; of nurse-training schools, 2056; of pharmaceutical schools, 2053; of private secondary schools, 74–81, 83–85, 88–91, 94, 1936–1937; of professional schools, 141–145; of public high schools, 65–72, 85, 88–92, 1829; of reform schools, 2227, 2230–2231; of schools, 1029, 1030, 1032; of State school systems, 8–10, 12–23; of theological schools, 2060.
District school, defects in Wisconsin, 1446; diagram of studies in, 638; five elementary branches essential, 636.
District system in Oklahoma, 1421.
Districts, school, in New York, 1404–1406. *See also* School districts and school laws.
Division, teaching of. *See* Arithmetic.
Dixon, Capt. George, gives name to Dixon's entrance, 1471, 1473.
Dixon, S. W., geologist, 828, 854.
Dixons Entrance, discovery and naming of, 1471, 1473.
Dodge, Richard Elwood, geologist, 833.
Dombrowski, Christ., death and sketch, 1777.
Domestic education, cooking schools, 908; importance of, 898.
Domestic instruction in Berlin common schools, 288.
Donaldson, H., on anatomy of brain of Laura Bridgman, 1679.

Donaldson's measurement of brain weight mentioned, 456.
Donath, Julius, on physical degeneration of population, 1691–1692.
Dorchester, Academy of, 690; common schools in colonial times, 653; public schools of, 666.
Dortmund, children in school, 210.
Doubleday, John Mason, death and sketch, 1765.
Dougherty, Newton C., on committee of fifteen, 469; signs report on training of teachers, 487.
Douglas schools, report on, 1465.
Douglass, Captain, navigates Dixons Entrance, 1471.
Drake University, geology in, 829, 856.
Draper, Andrew S., on committee of fifteen, 470; signs report of subcommittee on organization of city school systems, 555.
Draper, William, geologist, 842.
Drawing in Berlin common schools, 285, 295, 296; in correlation of studies, 509, 511.
Drawing teachers, cooperation of, in shopwork, 914.
Drew, Andrew A. W., on industrial schools and juvenile crime in England, 182–183.
Drexel, A. J., trustee Peabody fund, 753.
Drexel Institute, Philadelphia, Pa., 911.
Drill, Dimitri, on criminology, 1684.
Drunkenness and crime in Alaska, 1492.
Drury College, geology in, 838, 842, 860.
Dudley, Governor, charter to Harvard College, 656.
Dumb, deaf and, congress of, World's Columbian Exposition, 1741.
Dumb, schools for, statistics, 2201–2214; of benefactions to, 2234–2235.
Dunkards, statistics of colleges and universities, 97.
Dunton, Larkin, presents views on old psychology, 432.
Du Pont, A. V., and manual training, 905.
Durham Science College, Newcastle-upon-Tyne, statistics, 186.
Düsseldorf, cost of common schools per head, 217; proportion of teachers to pupils in, 216.
Dutch, claim to importing common schools, 651; parochial schools of, on Manhattan Island, 742.
Dutch Reformed School in 1633, 652.
Dutch Reformed Church, parochial schools, 696.
Dutch settlements on the Hudson and Mohawk, 652.
Dutch West India Co. *See* West India Co.
Dutton, S. T., and manual training, 897.
Dwight, William B., geologist, 843, 862.

E.

Eames, Mrs. Jane Anthony, death and sketch, 1795.
Earlham College, university extension courses, 953.
Eastman, C. R., paleontologist, 833.
Eaton, Amos, geologist, 843, 863.
Eaton, John, and the Peabody fund, 753, 765; prepares educational necrology, 1761–1778; school commissioner in Tennessee, 765.
Eau Claire, opening of manual training school, 892.
Eberswald, forestry school at, 811.
Eclectic medical schools, statistics, 2049.
Economic geology, in several institutions, 819.
Economic societies, list of, 1551–1554, 1650.
Ecuador, statistics of education, 2240–2241.
Eddy, F. W., and system of sloyd, 908.
Edenton, N. C., school in 1749, 685.
Edgar, Dr. John, death and sketch, 1765.
Education, adaptation to destinies of pupils, 618; American idea of, 641; applications of hypnotic suggestion to, 1680.
  Bearing of laws of development on, 461; bibliography, 1701–1722, 1755; bibliography of German books on history of, 306–308.
  Compulsory or not, 618; Congress of, at World's Columbian Exposition, 1741, 1742, 1744, 1747, 1749, 1750, 1751.
  Essentials to national strength, 618; estrangement from the common and familiar, by, 622.
  Gifts in aid of, 767.
  In Alaska, Jackson's report on, 1451–1492; in Central Europe, 203–323; in Finland, bibliographies, 413, 424; in foreign countries, statistics, 2236–2243; in Italy, bibliography of, 380–383; in Russia, 385–424; in several States, 1351–1449.
Education, etc.—Continued.
  Led by the clergy, 640.
  Of the colored race, Florida, 1368–1370.

Gilbert, Charles B., dissents from report of subcommittee on correlation of studies, 535–539; on Committee of Fifteen, 469.
Gilbert, G. K., geologist, 831, 841.
Gilbreath, S. S., State superintendent, 773.
Gildersleeve family, Liberty County, Ga., 667.
Gill, A. C., geologist, 859.
Gilman, Daniel C., and manual training, 897; trustee Peabody Fund, 753.
Girard College, and manual training, 892, 911.
Girl babies, treatment of, in Alaska, 1459.
Glasgow, industrial school of, 894.
Glenn, Gustavus R., State school commissioner, 773.
Glossatores, their influence on University of Bologna, 359.
Gonzales y Draz-Tuñon, death and sketch, 1777.
Goodell, William, death and sketch, 1776.
Goodison, John, work on teaching geography, mentioned, 205.
Goodnow, I. T., death and sketch, 1766.
Goodwin, Miss Julia A., death and sketch, 1766.
Gorby, S. S., gift to Franklin College, 828.
Goss, Professor, and manual training, 905.
Gossler, Minister von, demand for schoolhouses, mentioned, 210.
Goudy, A. K., quoted on education in Nebraska, 1397–1399.
Gouw, Janter, death and sketch, 1777.
Gowing, Fred, quoted on education in New Hampshire, 1399–1400; State superintendent, 773.
Graded schools, superiority of, in Connecticut, 1361–1366.
Grading of pupils in Prussian common schools, 212–213.
Graduate medical schools, statistics, 2050–2052.
Graduate students, in geology, 870.
Graduates, of private high schools, 52.
Statistics, of art, music, and education schools, 2198–2200; of business colleges, 2170–2197; of high schools, 87; of normal schools, 2069–2092; of private secondary schools, 1928–2017; of public high schools, 1823–1927.
Graham, Andrew J., death and sketch, 1767.
Graham, R. O., geologist, 827, 854.
Grammar, a lever for development of the human, 632; forms of logic discovered by, 633; initiates into the forms of thought, 633; imparts mastery over mind, 636; key to the spiritual, 632; mastery over words, 630.
Teaching of. *See* Language.
Grammar schools, courses in, 664; free for the poor, 655; precursors of high schools, 657.
Grand Rapids, increase in supervising officers, 25.
Grant, U. S., trustee Peabody Fund, 753.
Graphic and allied arts and publications, exhibit at international exposition, Milan, 1727.
Gray, Thomas J., and manual training, 900.
Grazzini, founds Academia della Crusca, 1496.
Great Britain, common schools in, 652; statistics of education, 2238–2243.
Great Britain and Ireland, Arnold, Matthew, on effect of school code, 170.
Bibliography of recent education, 165.
Decline in pupil teachers, 168.
Educational statistics and movements in 1893, 165–186; elementary schools discussed, 167, 168; English subjects in evening continuation schools, 173, 176; evening continuation school code of 1893, 173–182; evening schools discussed, 171–173.
Fitch on effect of school code, 169, 170.
Grants begun to elementary schools, 169; grants to evening continuation schools, 173.
Industrial and social life and duties in evening continuation schools, 179, 181; industrial schools and juvenile crime, 182–183.

Great Britain and Ireland—Continued.
Life and duties of citizen in evening continuation schools, 176–179.
Medical students, 980, 982.
School codes summarized and criticised, 169–171.
Statistics of elementary schools, 168; of higher education, 166.
Technical education under London county council, 183–184; the Empire in evening continuation schools, 179.
University colleges aided by Government, 184–186.
Great men, declined influence, 644.
Greece, æsthetic and scientific forms derived from, 627; at the entrance to the modern world, 628; avenges wrongs on Persia, 628; first to ripen traditions into philosophy, 447; idea of individuality introduced by, 628; mental evolution from, 627; statistics of education, 2238–2239.
Greek, a "perfect" language, 624; presuppositions of theoretical intelligence, 628.
Per cent of secondary pupils in, 35.
Statistics in high schools, summary of, 45; in private high schools, 54; in private secondary schools, 60, 76, 80, 87, 90; in public high schools, 60, 67, 71, 87, 90; substituted by French or German, 628.
Greek and Latin languages, needed to comprehend our antecedent being, 627.
Greek refinements, nurse of modern states, 628.
Greek seats of learning in Asia Minor and Egypt, 628.
Greeks, teaching of geography among, 502–503.
Green, Dr. Samuel, and Peabody Education Fund, 741.
Green College, geology in, 828, 854.
Greenberry Point, Md., schools at, 668.
Greene, Gen. Nathaniel, gift of estates to, 667.
Greenough, President, geologist, 834.
Greenwood, J. M., dissents from subcommittee report on correlation of studies, 532–535; on Committee of Fifteen, 469; verbatim reports of recitations in arithmetic and language, 557–616.
Grenoble, manual training exhibit at Lyons universal exposition, 1731.
Griswold, Leon S., geologist, 819, 833.
Gross, John D., geographer in Columbia College, 840.
Grot, M., leads in blind relief, 407.
Grubin, John, assistant reindeer superintendent, 1453.
Guatemala, statistics of education, 2240–2241.
Guimps, Roger de, death and sketch, 1777.
Gulliver, John Putnam, death and sketch, 1767.
Gustavus Adolphus College, geology in, 836, 858.
Gymnasiums in Italy, 348–353.
Gymnastics in Berlin common schools, 287, 295, 296.

H.

Haak, Theodore, influence on Royal Society, 1500.
Hage, Edmund, death and sketch, 1777.
Hailmann, W. N., his history of public kindergartens, mentioned, 204.
Haines School, report on, 1462–1464.
Hale, Edward Everett, quoted on World's Congress, 1753.
Halfdanorson, Helgi, death and sketch, 1777.
Hall, G. Stanley, child study material collected by, 441; founds association for child study, 426; congress of experimental psychology, 425; on letting bright children lead, 431; on periods of physical growth, 430; on the new psychology, 432, 445–449; on university courses in psychology, 430; professor of psychology, 428; researches in child study, 433; stresses functioning of nervous system, 431; syllabi for child study, 426.
Hall, Lyman, Congressional delegate from St. Johns Parish, Ga., 667.
Hall, William Montague, death and sketch, 1767.
Hallam, Henry, on the meistersingers, 1500.
Hall's types, in Columbia College, 841.
Ham, Charles H., address on "Woman" mentioned, 1749; and manual training, 898, 899, 960.
Hambach, Gustav, geologist, 837, 860.
Hamburg, boys in secondary schools, 299; statistics of education, 2236–2237.
Hamby, John H., geologist, 828.
Hamerton, Philip Gilbert, death and sketch, 1776.
Hamilton College, geology in, 842, 860; university extension courses, 959.
Hamline University, geology in, 836, 858.
Hampden-Sydney College, founding of, 705.
Hampton Normal and Agricultural College, Va., 676, 1021; manual training in, 1024.
Hanover College, geology in, 828, 854.
Hanson, James Hobbs, death and sketch, 1767.
Harper, Lewis, geologist, 837.
Harper, Robert A., geologist, 828, 854.
Harris, G. B., mentioned, 451.
Harris, Gilbert D., paleontologist, 839.
Harris, William T., address on agriculture, 804–807; address on the old psychology *v.* the new, 432, 433–437; member Committee of Fifteen, 469; on educational values, 617–635; on manual training, 891; on world's congresses, 1753–1754; publishes index to American Journal of Education, 639; resolution on death of R. C. Winthrop, 765–766; signs subcommittee report on correlation of studies, 532.
Harrison, William Henry, favors slavery in Ohio, 736.
Hart, Edward, report on spelling and pronunciation of chemical terms, 873–876.
Hartt, C. Fred, geologist, 829.
Hartwell, Edward M., interrelation of mental, moral, and physical training, 458–461; report of, noticed, 432.
Harvard College, a child of the people, 656; foundation of, 656; detached from church and state, 656; leader in elective system and moral training, 664; no sectarian limitations, 656; professors paid out of colonial treasury, 656; raised by bequests, 656; students teach in vacation, 654; unsectarian, 711.
Harvard University, child study in, 428; disciplinary studies elective after freshman year, 619; geology in, 819, 832–833, 856; law school, 995; raises standard in disciplinary studies, 619; standard of admission raised, 619; self-observation in psychological course in, 439.
Harvey, O. M., investigates eye and ear mindedness, 458.
Hawaii, statistics of education, 2242–2243.
Hawes, Granville P., death and sketch, 1767.
Haworth, Erasmus, geologist, 839, 856.
Hayes, Richard, death and sketch, 1767.
Hayes, Rutherford B., and manual training, 892; and Peabody Fund, 751.
Hayward, Almira L., death and sketch, 1767.
Headden, William P., geologist, 823, 852.
Health, public, bibliography of, 1757.
Health of pupils, in North Dakota, 1412–1413.
Healy, Capt. M. A., 1453.
Heath, Dr. F. C., 451.
Hebrew technical school, 1893.
Hebrews in Georgia, 693; statistics of theological schools, 142.
Hegel, in expression equal to Plato and Aristotle, 625.
Heidelberg University, university extension courses, 959–960.
Helmholtz, Hermann Ludwig Ferdinand von, death and sketch, 1777.
Helsingfors, educational efforts in, 423; schools in, 418, 419.
Hemenway, Mrs. Mary, and cooking schools, 908; death and sketch, 1767.
Hendrix College, geology in, 821, 852.
Henry, Joseph, geologist, 839, 861.
Henry, Patrick, interest in New Lights, 668; speech at Williamsburg in 1765, 728.
Herders of reindeer, account of, 1453–1456.
Hernandez, works of, published by the Accademia dei Lincei, 1496.
Hertz, Prof. Heinrich, death and sketch, 1777.
Hessen, boys in secondary schools, 298, 299.
Hessia, statistics of education, 2236–2237.
High schools, and classes in France, 194–195; challenge of methods and subjects, 617; course made interesting, 637; diagram of studies in, 638; elective studies not desirable, 636; elementary studies in, 35.

High schools—Continued.
In Florida, 1374–1375; in Kansas, 1375-1376; in Massachusetts, 1384–1387; in Nebraska, 1397–1399; in Pennsylvania, 1425; in West Virginia, 1442–1444; in Wisconsin, 1447–1448.
Manual training. *See under* Manual training.
Reasons for not incorporating manual training with, 911, 912.
Statistics, 33, 54, 37; of private, 1928–2017; of public, 1823–1927.
Higher education, congresses of, at World's Columbian Exposition, 1742, 1747, 1748, 1749, 1750; isolation of, from common schools, 624; special preparation for, 619; statistical review, 97, 164; statistics of pupils, 4, 5.
Hildebrand, Rud., death and sketch, 1777.
Hill, Frank A., and manual training, 907; quoted on education in Massachusetts, 1380–1389; secretary State Board of Education, 773.
Hill, Joseph L., chemist, 849, 866.
Hill, Robert T., geologist, 848, 867.
Hill family, in North Carolina, 686.
Hillgard, Eugene W., geologist, 837.
Hincks, John Howard, death and sketch, 1768.
Hine, Charles D., quoted on education in Connecticut, 1354–1366; secretary State Board, 773.
Hinkel, Charles John, death and sketch, 1768.
Hinsdale, Burke Aaron, on history of the old Northwest, 725; on public instruction in Italy, 325–333.
Hintze, Fritz, death and sketch, 1777.
Hiram College, university extension courses, 959–960.
Hisey, J. C., acknowledgments to, 557.
Historical museum of cloths, exhibit at Lyons, 1732.
Historical societies, list of, 1570–1615, 1651–1652.
Historico-Philological Institute of St. Petersburg, account of, 390.
History, character of work of Orosius, 519; courses in vogue in Europe, 302–305; deals with human progress and process, 633; general, in secondary courses, 518–520; importance of, 630, 633; in Berlin common schools, 283, 284, 295, 296; in correlation of studies discussed, 505–508, 511; in public high schools, 60, 69, 71, 87, 91; not separated from geography and geometry in Middle Ages, 503; oral lessons in, 511; per cent of secondary pupils in, 35; Professor Baar on study of, 302, 303.
Statistics in high schools, summary of, 49; in private high schools, 54; in private secondary schools, statistics, 60, 78, 80, 87, 91; in public high schools, 69, 71, 87.
View of St. Augustine on world, 519.
History of education, bibliography of German books on, 306–308.
Hitchcock, Charles H., geologist, 838, 860.
Hitchcock, Edward, geologist, 834, 858.
Hitchcock, R. C., death and sketch, 1768.
Hoar, George F., efforts for national aid to education, 762, 763.
Hobart College, geology in, 842, 860; university extension courses, 959.
Hobbes, quoted on the State, 505.
Hobbs, William H., mineralogist, 849, 868.
Hodge, C. F., professor physiology and neurology, 428.
Hodgson, B. H., death and sketch, 1776.
Hoecker, Oskar, death and sketch, 1777.
Hofmann, Heinrich, death and sketch, 1777.
Holfe, L. E., quoted on education in Missouri, 1393–1397.
Holland, comparative educational statistics, 377; cultivation of bulbs and flowers, 806; English agriculture due to, 806; kinds of schools in, 651; leader in agriculture and gardening, 806; permission to trade by, 694; prosperity of, 695; society in, 695; Swift's opinions on, 695.
Hollick, Arthur, geologist, 841.
Hollingsworth, Samuel Shorey, death and sketch, 1768.
Holmes, W. H., professor archæologic and graphic geology, 825.
Homeopathic medical schools, statistics, 2049.
Honorary degrees conferred, statistics, 120.
Hoonah Contract School, report on, 1462.
Hooper, William A., geologist, 841.
Hooper Mining School, geology in, 832.
Hopkins, T. C., geologist, 846, 864; on geology in the colleges and universities of the United States, 819–872.
Hopkins, W. F., geologist, 843, 863.
Horace Mann School, child study in, 428.
Horticulture, exhibit at international exposition in Milan, 1728.
Hough, R. B., Elements of Forestry, 817.
Houghton, Douglas, geologist, 835, 859.
Houghton, George C., and manual training, 907.
Hovey, E. O., geologist and chemist, 829.
Howard University, geology in, 825, 852.
Howe, George Wilson, death and sketch, 1768.
Howe, James Lewis, report on spelling and pronunciation of chemical terms, 873–876.
Howison, on relation of arithmetic to whole field of mathematics, 498.
Hubbell, Prof. G. A., geologist, 845, 864.
Hubbuch, F. Anton, and manual training, 895.
Huber, Karl, death and sketch, 1777.
Hudson, Henry, entrance of, 694.
Hudson River, character of settlements on, 652; hurt by destruction of forests, 810.
Hungary, statistics of education, 377, 2236–2237; of university libraries in, 312–314.
Hunt, Ezra M., death and sketch, 1768.
Hygienic medical schools, statistics, 2050.
Hygienic tests in child study, 451–453.
Hypnotic suggestion with children, 1680.
Hyrtl, Joseph, death and sketch, 1777.

I.

Idaho, college presidents, 781.
Geology in, 825, 854.
Progress of university, 742, 797.
Statistics of agricultural and mechanical colleges, 136, 138, 2040–2041; of business colleges, 2170–2171, 2174–2175; of city school systems, 27–28; of colleges and universities, 98, 100–102, 105–106, 108–117, 120, 792, 2019; of manual training, 2114, 2134–2135, 2137, 2167–2168; of normal schools, 154–162, 164; of private secondary schools, 74–80, 82–85, 88–91, 95, 1940–1941; of public high schools, 65–71, 73, 85, 88–91, 93; of public schools, 1832, 1921; of State school systems, 8, 9, 11, 12–23.
University prosperous, 796.
See also School laws.
Iddings, J. P., professor of petrology, 825.
Ihlseng, Magnus C., geologist, 846, 864.
Illinois, city superintendents, 774–775; college presidents, 781–782, 787; commercial club of Chicago and manual training, 889.
Geology in, 825, 854.
Has third largest number public high schools, 39.
Manual training in, 911, 934–935.
Pedagogy in higher institutions, 151.
Sanitary school legislation, 1306.
Statistics of agricultural and mechanical colleges, 136–137, 2040–2041; of business colleges, 2170–2171, 2174–2177; of city schools, 1782–1783, 1799–1800, 1814, 1816; of colleges and universities, 98, 100–102, 105–106, 108–120, 122–123, 792, 2019–2021; of colleges for women, 125–128, 130–133, 2035, 2036; of deaf, dumb and blind schools, 2202, 2203, 2207, 2209, 2210, 2211, 2212–2214, 2215, 2217, 2220; of dental schools, 2051; of law schools, 2058; of manual training, 2093–2094, 2099–2100, 2114, 2122–2123, 2126–2129, 2130–2133, 2137, 2142, 2144, 2151, 2156, 2157, 2159; of music schools, 2199; of medical schools, 2046, 2049, 2050; of normal schools, 151, 154–162, 164, 2070–2071, 2080–2083; of nurse-training schools, 2056; of pharmaceutical schools, 2053; of private secondary schools, 74–80, 82–85, 88–91, 95, 1940–1943, 2008–2009; of professional schools, 141–146; of public high schools, 65–71, 73, 85, 88–91, 93, 1832–1839, 1921; of reform schools, 2228–2231; of schools, 1032; of schools for feeble-minded, 2221, 2222, 2224; of State school systems, 8, 9, 11, 12–23; of technological schools, 2044; of theological schools, 2060–2061; of veterinary medical schools, 2055.
University extension courses, 951, 952–953, 967.
Woman suffrage in school affairs, 1417.
See also School laws.

Illinois society for child study, founded, 426.
Illinois Wesleyan University, geology in, 827, 854.

Industrial schools, 894, 911; and juvenile crime, 182–183; and Mrs. Quincy A. Shaw, 907 908; exhibit from Bergamo, Italy, at international exposition, Milan, 1724–1725; exhibit at "La Martinière," at Lyons, 1734.
In England, 893, 894; in Germany, 894; in North Bennett, Mass., 907; in Ohio, 1023, 2027; in Scotland, 894; in Switzerland, 894.
Statistics, 2093–2169.
Industrial training in deaf, dumb, and blind schools, 2213, 2217–2219; in schools for feeble-minded, 2222–2223, 2226.
Industrial University of Arkansas, enlargement, 795.
Industries, influence on public education in Paris, London, and Vienna, 618.
Industry, study of, in Italian technical institutes, 355, 356.
Infancy, its importance in evolution of man, 436.
Infant schools in France, 189, 190.
Inflections abolished by spiritual development, 624; not a mark of perfection, 624.
Inglis, Samuel M., State superintendent, 773.
Insight stage in acquiring knowledge, 623.
Inspection, Government, in Italy, 350.
Institute of France, history, 1497–1498.
Institutes, superior, of Italy, history and statistics, 366, 367.
Instruction, public, in Italy, 325–383.
Intermediate or middle schools in Prussia, religious statistics, 221.
International Congress for Criminal Anthropology, Brussels, 1683–1687.
International congress of experimental psychology, 1678–1683.
International exposition of 1894, Milan, 1723–1728; fine arts, 1723; geography, horticulture, 1728; industrial arts, 1723–1724; oil and wine machinery, photography, 1727; sports, theatrical art, 1728; wine and oil, 1727.
Introspection, etc., 1682.
Invisible College, germ of the Royal Society, 1500.
Iowa, city superintendents, 775; college presidents, 782.
Forestry in Agricultural and Mechanical College, 817.
Geology in, 829, 856.
Pedagogy in higher institutions, 152; progress of Agriculture and Mechanical College, 797.
Sanitary school legislation, 1306–1308.
Statistics of agriculture and mechanical colleges, 136, 138, 792, 2040–2041; of business colleges, 2170–2171, 2178–2179; of city schools, 27–28, 1783–1784, 1800–1801, 1816–1817; of colleges and universities, 98, 100–102, 105–106, 108–120, 122–123, 2021–2022; of deaf, dumb, and blind schools, 2202–2203, 2207, 2212–2214, 2216, 2217, 2220; of dental schools, 2051; of law schools, 2058; of manual training, 2094, 2101, 2122–2123, 2126–2129, 2151–2152, 2157–2158; of medical schools, 2046, 2049; of normal schools, 152, 154–162, 164, 2072–2073, 2082–2083; of nurse-training schools, 2056; of pharmaceutical schools, 2053; of private secondary schools, 74–80, 82–87, 88–91, 95, 1944–1947, 2010–2011; of professional schools, 141–146; of public high schools, 65–71, 73, 85, 88–91, 93, 1843–1849, 1921–1922; of reform schools, 2228–2231; of schools for feeble-minded, 2221, 2222, 2224; of State school systems, 8, 9, 11, 12–23; of theological schools, 2061.
University extension courses, 953, 954.
Women suffrage in school affairs, 1417.
See also School laws.
Iowa colleges, geology in, 829, 856.
Iowa Society of Child Study, organization of, 426, 457–458.
Iowa State University, geology in, 829.
Ipswich, Mass., Cheever's Academy in, 670.
Ireland, Great Britain and, educational statistics and movements in, 165–186; statistics of education, 166, 2238–2239; of university libraries, 311, 313, 314.
See also Great Britain and Ireland.
Irish, migration to North Carolina, 686, 687.
Irving, Roland D., geologist, 849, 869.
Irwin, G. M., State superintendent, 773.
Isnerius, influence on University of Bologna, 359.
Italian nobility, favor learned societies, 1495.
Italian universities, 358–365; courses in, 361.
Diplomas and degrees in, 363, 364; distribution of faculties, 362, 364.

Italian universities—Continued.
Emphasizing tendency in, 361.
Faculties in, 361; first in modern Europe, 358.
Income, 364; influence of Renaissance on, 359.
Open to women, 363; organization, 361.
Results of final examinations in, 367.
Salaries of professors, 361; statistics, 360, 361; statistics of students in, 364, 365; students in, different faculties and courses, 362, 363.
Theological faculties dispensed with, 361.
Italy, academies and institutes of fine arts, 369; administration of public instruction in, 332–335; agricultural schools, 368; aim of congress of Vienna toward, 326; asili in, 335–336.
Bibliography of education in, 380–383; birth of Renaissance in, 359.
Casati law provides for education, 331–332; comparative progress of, 378; compulsory education, 343–345, 378; conclusions concerning state of education, 378–380; cost of elementary instruction, 377; course of country schools, 339; courses in technical schools, 353–355.
Dawn of the new era in, 330–331; day elementary schools, 336–341; degradation of children in sulphur mines, 345; difference between regular and irregular elementary schools, 338.
Education necessary for unification, 327–328; education, memorable dates in, 330, 331; educational administration compared with France and Germany, 335; educational statistics compared with other European states, 377; educational status in 1861, 327–329; elementary schools, day, courses, 336–339; Episcopal schools in, 349, 352.
Free text-books, 336.
General political facts concerning, 331; general provisions of constitution, 331; Government inspection in, 350; Government libraries, 369; growth of nationality in, 326, 327; gymnasiums in, 348–353.
Illiteracy in, statistics, 375–376; in 1815, various writers on, 326; industrial and commercial schools, 368, 369; influence of Napoleon, 326; influence of political crises on education, 378; institutes of mercantile marine, 368.
Learned societies flourish in, 1495; lyceums in, 348–353.
Military institutes and schools of marine, 369; musical institutes and conservatories, 369.
Normal schools, 345–348.
Organism of, from Rome, 627.
Pension of teachers, 375; political conditions of, 1498–1800, 326; progress in education in last twenty years, 325; proportion of persons able to read in 1861, 328–329; public instruction in, 325–383.
Relations between good government and education in, 329.
Salaries in normal schools, 347–348; in gymnasiums and lyceums, 351; in technical schools and institutes, 357; of teachers, 342–343.
Scholastic administration of Alessandria, 334; school finances, 373–374; schools of mines, 368; school supply in, 343–345; scientific societies in, 1496; secondary classical schools, 348–353; secondary technical schools, 353–358; Senate, character, 331.
Statistics of education, 2238–2239; of elementary schools, day, 340–341; of elementary schools, evening and holiday, 341–342; of pupils in school, 377; of superior institutes, 366, 367; of superior special schools, 367, 368; of teachers in elementary schools, 342–343; of university libraries, 311, 313, 314.
Study of history in, 305.
Technical institutes, 353–357; training school for teachers founded, 335; tuition fees, 374; twenty years of public schools in Rome, 369–372.
Unification of, 326–327.
Victor Emanuel proclaimed King, 330.
Itinerary of Dr. Sheldon Jackson in Alaska, 1471–1492.

J.

Jackson, Robert T., geologist, 833.
Jackson, Sheldon, agent for Alaska, 773; establishes schools at Jackson and Klawak, 1473–1474; itinerary of, in Alaska, 1471–1472; report on education in Alaska, 1451–1492.
Jackson School, report on, 1462.
Jacobson, Augustus, on manual training, 891, 892.
Jacotot, quoted, 530.
Jaeger, Franz Xavier, death and sketch, 1777.
Jaeggi, J., death and sketch, 1777.
Jamaica, statistics of education, 2240–2241.
James, H. M., and manual training, 897.
James Allen, rescue of crew of, 1483.
Janovsky, Cyrille, quoted on educational questions in Caucasus, 398.
Japan, statistics of education, 2240–2241.
Jarkins, on learned societies in Italy, 1495.
Jastrow, Joseph, investigates child study, 429.
Jay, John, death and sketch, 1768.
Jefferson, Thomas, as a politico-philosophic educator, 732; assails primogeniture and entails, 728; at William and Mary College, 682; correspondence with Cabell, 732; director of public policy, 728; Dr. Small's influence on, 682; early training of, 726; educational ideas and labors, 674; educational influence, 705; embarrassments of, 729; friendship with Wythe, 682; letter to John Adams, 732; letter to Joseph Cabell, 731; marriage, 726; notes on Virginia, 729.
On abolition of slavery, 729; on education and emancipation, 730–731–732; opposed by William and Mary College, 733; opposes church and state, 728; opposes slavery in Territories, 735; prejudice against manufactures and cities, 728; preeminent in education, 726; schemes opposed by clerical party, 733; Virginia aristocracy against, 728; Virginia Baptists led by, 668; wavering on immigration, 729.
Jefferson University, Pa., founded, 705.
Jenks, Prof. J. W. P., death and sketch, 1768.
Jersey City, sanitary school legislation, 1335.
Jesuits, educational methods, 641.
Jews, admitted only in limited numbers to Russian universities, 295; attendance in secondary schools in Germany, 288–300; boys in secondary schools in Germany, 299–302; organize academies, 1494.
John F. Slater fund, 1019, 1023.
Johns Hopkins University, geology in, 831, 832, 858; movement in psychology begun at, 445; monographs on colonial life, 649.
Johnson, Barton W., death and sketch, 1768.
Johnson, D. B., school superintendent, 766.
Johnson, Samuel, president Columbia College, 840.
Johnston, Governor Gabriel, efforts for school, 686.
Jones, A. J., geologist, 829, 856.
Jones, L. H., dissents from report of subcommittee on correlation of studies, 539–541; on Committee of Fifteen, 469.
Jones, Paul M., geologist, 847, 866.
Jones family, of Liberty County, Ga., 667.
Jordan, David Starr, geologist, 828.
Jordan, Junius, State superintendent, 773.
Joynes, Dr. Edward, on needs of South, 760.
Juneau schools, report on, 1464.
Junto, The, Franklin founds, 706.
Juvenile crime, and industrial schools, 182–183.

K.

Kadiak district, Alaska, report on schools, 1461–1462.
Kansas, city superintendents, 775; college presidents, 782, 787.
Geology in, 830, 856.
High schools, 1375–1376.
Manual training, 885.
Progress of agricultural and mechanical colleges, 797; pedagogy in higher institutions, 152.
Sanitary school legislation, 1308.
Statistics of agricultural and mechanical colleges, 136, 138, 792, 2040–2041; of business colleges, 2170–2171, 2178–2181; of city schools, 27–28, 1784, 1801, 1814, 1817; of colleges and universities, 98, 100–102, 105–106, 108–120, 122–123, 2022–2023; of colleges for women, 130–133, 2036; of deaf, dumb, and blind schools, 2202–2203, 2207, 2216, 2217, 2220; of elocution schools, 2200; of law schools, 1058; of manual training, 2114, 2122–2123, 2126–2127, 2130–2131, 2134–2135, 2137, 2152, 2160; of medical schools, 2046; of normal schools, 152, 154–162, 164, 2072–2073,

Kansas—Continued.
2082–2084; of pharmaceutical schools, 2053; of private secondary schools, 74–80, 82–85, 88–91, 95, 1946–1947; of professional schools, 142–143, 145; of public high schools, 65–71, 73, 85, 88–91, 93, 1849–1853, 1922; of reform schools, 2228–2231; of schools for feeble minded, 2221, 2222, 2224; of State school systems, 8, 9, 11, 12–23.
University extension courses, 954.
Woman suffrage in school affairs, 1417.

Law, at University of Bologna, 359; courses, 997; degrees, 999; methods of instruction, 1000–1018; New York school, 1002–1003; students, 979, 981, 982, 987.
Law schools, 994, 995, 998; in Massachusetts, 995; in New Jersey, 1400–1403.

Law schools—Continued.
Statistics, 141, 142, 2058–2059; of benefactions to, 2234–2235; of students, 4, 5.
Law societies, list of, 1631–1632.
Laws, S. S., on manual training, 891.
Laws, manifested only in transition stages, 624.
Laws regulating schools in the States, summary of, 1063–1300.
Lawson, Andrew C., geologist, 821, 852.
Learned and educational societies, 1493–1661; for special index, *see* 1653–1661.
Learned societies, character and object of, in Italy, 1495; custom of naming, in America, 1502; early ones in United States, 1510; flourish in Italy, 1495; Government connection of, in United States, 1502–1503; in France, 1496–1499, 1500; in Russia, Sweden, Germany, Spain, and the Netherlands, 1499–1500; proposition to establish one in Connecticut, 1508; rise, 1493–1510; rise in England, 1500.
Leavitt, F. M., and system of sloyd, 908.
Le Conte, opinion of child study, 447.
Le Conte, John, geologist, 821, 852.
Lettingwell, E. H., geologist, 837.
Legaré, Hugh S., on education in South Carolina, 689.
Lehigh University, geology in, 846, 864.
Leibnitz, importance of philosophical distinctions of, 434.
Lejeal, Gustave, quoted on courses of study in Russia, 394–395; quoted on salaries in Russia, 393; on school supervision in Russia, 391.
Leland Stanford Junior University, child study in, 429; geology in, 821, 822, 852; university extension courses, 951–952.
Leland University, geology in, 831, 856.
Length of school year, 390–391; in Finland, 417; increase, 26; statistics, 14.
Length of service of Prussian teachers, 233, 234.
Length of sessions in Berlin common schools, 280.
Leopoldine Academy, founded, 1499.
Lesseps, Ferdinand de, death and sketch, 1778.
Lethaby, William, work for technical education in London, 183.
Leverett, President, Harvard College, 656.
Lewis, Virgil A., quoted on education in West Virginia, 1441–1444; State superintendent, 773.
Lexington, cause of popular outbreak at, 672.
Leyden, Massachusetts common school not brought from, 652.
Leygues, M., minister of public instruction, 188, *note*.
Libby, Professor, geologist, 839.
Liberating genius of pupils, the highest problem, 637.
Liberty County, Ga., nursery of scholars, 723; origin of name, 667.
Liberty Hall, academy in North Carolina established, 688
Libraries difference between development in Germany and America, 309, 310.
Franklin leads in organization of, 1503–1504.
Government, in Italy, 369.
Importance of, in Germany, 309; in Berlin common schools, 266; in private high schools, 54.
School, in France, 198; in Minnesota, 1389–1390; in private secondary schools, statistics, 81, 82; in Russia, 399, 400; in Wisconsin, 1444–1445.
Statistics of agricultural and mechanical colleges, 135–136, 2040–2043; of deaf, dumb, and blind schools, 2201–2202, 2207–2208, 2211–2212, 2214–2216, 2220; of Italy, 311; of private secondary schools, 1928–2017; of public high schools, 72, 73, 1820–1927; of school, 50; of schools for feeble-minded, 2224; of technological schools, 2044; of universities and colleges, 2017–2039.
University, in Austro-Hungary, 312; in England, 311; in Europe, 308–314; in France, 313; in Germany, 310; in Hungary, 312; in Ireland, 311; in Italy, 311; in Norway, 312; in Russia, 312; in Scotland, 311; in Spain, 313; in Sweden, 312.
Library, Franklin founds first public, 706.
Library of Alexandria, origin, 1494.
Library of Sitka, 1477.
Lick Mechanical School, San Francisco, 911.
Liebe, Professor, death and sketch, 1878.
Lima College, geology in, 845, 862.
Lincoln, Abraham, on cheating the people, 650.
Lincoln County (Ky.) Academy founded, 723.
Lindahl, Dr. Joshua, geologist, 828.
Linnæan Society founded, 1502.
Lippe, boys in secondary schools, 299; statistics of education, 2236–2237.
Lisdale, J. B., geologist, 828.
Literature, bibliography, 1756; societies for, list, 1563–1570, 1651.
Literary biography, objections to, 520.
Literary men, institutional side of their lives neglected and unsymmetrical, 520.
Literary societies, in Athens, Alexandria, and Rome, 1494.
Lititz, Pa., Moravian schools at, 705.
Local supervision in Berlin common schools, 249.
Locke, John, draws fundamental constitution, 689.
Loewenthal, William, death and sketch, 1778.
Log College, model of Princeton, 693.
Log College, Scotch Presbyterian foundation of, 699.
Log houses, at Port Clarence, 1453.
Lombroso, studies criminal type, 448.
London, industrial school, 894; international congress of experimental psychology, 1678–1683; statistics of day and night schools, 172.
London county council, technical education under, 183–184.
Longinoff, M., death of, 405.
Lönnbeck, G., quoted on Uno Cygnæus, 414–415, *note*.
Loomis, Horatio, mineralogist, 849, 866.
Lopp, W. T., to resume Cape Prince of Wales school, 1452, 1453.
Lopp, Mrs. W. T., teacher at Port Clarence, 1452, 1453.
Lord, John, school in South Carolina and Georgia, 667.
Lord, John, death and sketch, 1769.
Lord, N. W., professor mining and metallurgy, 844.
Louisiana, city superintendents, 776; college presidents, 783, 787.
Geology in, 830, 856.
Manual training, 911.
Pedagogy in higher institutions, 152; per cent of female students, 41; per cent of students of chemistry, 49; per cent of students of French, 45; per cent of students of geometry, 47; per cent of students of history, 49; progress of agricultural and mechanical colleges, 797–798.
Statistics of agricultural and mechanical colleges, 136–137, 792, 2040–2041; of business colleges, 2170–2171, 2180–2181; of city schools, 27–28, 1785, 1802, 1814; of colleges and universities, 98, 100–102, 105–106, 108–120, 122–123, 792, 2023; of colleges for women, 129, 131–133, 2037; of deaf, dumb, and blind schools, 2201, 2204, 2207, 2212–2214, 2215, 2217, 2220; of law schools, 2058; of manual training, 2114, 2120–2121, 2122–2123, 2126–2127, 2138, 2147, 2152, 2156; of medical schools, 2047, 2050; of normal schools, 152, 154–163, 2072–2073; of pharmaceutical schools, 2053; of private secondary schools, 74–81, 83–85, 88–91, 95, 1950–1951, 2010–2011; of professional schools, 141–145; of public high schools, 65–72, 85, 88–92, 1853–1854, 1922; of reform schools, 2227, 2230–2231; of schools, 1029, 1030, 1034; of State school systems, 8–10, 12–23; of theological schools, 2062.
University extension courses, 954, 955, 965.
Woman suffrage in school affairs, 1417.
See also School laws.
Louisiana State University, geology in, 830, 856.
Louisville, Ky., and manual training, 905, 906, 911; manual training high school, 926–934; cost of plant of, 934–935; cost per pupil per year, 934–935.
Lubeck, statistics of education, 299, 2236–2237.
Luce, N. A., quoted on education in Maine, 1376–1380.
Lundin, Hulda, address on educational condition of women in Sweden, mentioned, 1749.
Luquer, L. McI., mineralogist, 841.
Lutheran schools, 56; statistics of colleges and universities, 97, 142; private secondary schools, 83.
Lutz, Fred., geologist, 829, 856.
Lyceums in Italy, 348–353.

Lyons, Mary, in New England district schools, 666.
Lyons, education in, 1733; school exhibit, Lyons Universal Exposition, 1734.
Lyons Universal Exposition of 1894, 1729–1734; buildings, etc., 1729; educational exhibits, 1730–1734; historical cloths exhibit, 1732.
Lytton, Sir Edward, on popular education, 654.

M.

M., J. W., quoted on degradation of children in Sicil an sulphur mines, 345.
Mabry, T. O., geologist, 837, 858.
MacAlister, James, and manual training, 886, 904, 905.
MacAlister College, geology in, 836, 858.
McAllister, trustee Peabody Fund, 753.
Macaulay, Thos. B., on education in Massachusetts, 682.
McCosh, James, death and sketch, 1769.
McCrady, Edward, jr., on education in South Carolina, 689.
McDill, Jonas Wilson, death and sketch, 1769.
MacDonald, Arthur, on criminological studies, 1663–1675; on psychological, criminological, and demographical congresses in Europe, 1677–1699.
McElroy, E. B., quoted on education in Oregon, 1422–1423.
McFarland, John R., death and sketch, 1769.
McIlvaine, Bishop, and Peabody Fund, 747.
McMartin, A., bequest of specimens to Princeton University, 839.
McMaster, John B., on education in South Carolina, 689.
McMillen, W., geologist, 838, 860.
McNeil, J. F., geologist, 821, 852.
Macomber, E. A., and manual training, 892.
McWhir, William, teacher in Sunbury Academy, Ga., 722.
Magazines, possibility opened by, 621.
Magenta, battle of, result, 330.
Magila, Peter, founds University of Kief, 410.
Magnan, Dr., on morbid criminal possession, 1685.
Magnus, Sir Philip, and technical education, 894.
Mail, proposed transportation by reindeer, 1457–1458.
Main, James, death and sketch, 1769.
Maine, city superintendents, 776; college presidents, 783, 787
  Geology in colleges, 831, 856.
  Pedagogy in higher institutions, 152; per cent of students of Greek, 45; profits of farming, 807; progress of agricultural and mechanical college, 798.
  Sanitary school legislation, 1311–1312; school system changed, 1376–1380; separation from Massachusetts, 656.
  Statistics of agricultural and mechanical colleges, 135, 137, 792, 2040–2041; of business colleges, 2170–2171, 2180–2181; of city schools, 27–28, 1785, 1802, 1817; of colleges and universities, 98, 100–102, 105–106, 108–120, 122–123, 2023; of colleges for women, 129, 131–133, 2037; of deaf, dumb, and blind schools, 2209, 2210, 2211; of manual training, 2094, 2102, 2114, 2122–2123, 2130–2131, 2138, 2152, 2160; of medical schools, 2045, 2047; of normal schools, 152–154–163, 2072–2073, 2084–2085; of private secondary schools, 74–81, 83–85, 88–91, 94, 1950–1953, 2010–2011; of professional schools, 141, 143; of public high schools, 65–72, 85, 88–92, 1854–1856, 1923; of reform schools, 2227, 2230–2231; of State school systems, 7, 9–10, 12–23; of theological schools, 2062.
  University extension courses, 955.
  Woman suffrage in school affairs, 1417.
  See also School laws.
Maine State College, geology in, 831, 856.
Mallery, Garrick, death and sketch, 1769.
Man, as product of nature an animal, 435; different phases of, 631.
Management of town schools in Connecticut, 1354–1360.
Manchester, England, industrial schools, 893.
Mandello, Dr., on immigration of people into cities, 1691.
Manhattan Island, Dutch schools on, 742.
Manitoba, statistics of education, 2240–2241.
Mann, Horace, leader in common schools, 749; preparation for college, 666; propositions of, for popular education, 660.

Peabody, 897, 901; Pennsylvania Agricultural College, 892; W. B. Powell, 898; Charles Pratt, 899; Robert S. Rauchlaub, 920; F. W. Robinson, 897; Edwin P. Seaver, 903, 907; Frank Scott, 892; William H. Scott, 892; Edward T. Steel, 905; Martha B. Stevens, 907; superintendents' meeting, 901; C. O. Thompson, 892; Robert H. Thurston, 906, 907; U. S. Bureau of Education, 902; Francis A. Walker, 898, 899; Stephen A. Walker, 887; J. D. Walters, 902; E. E. White, 887; Henry A. Wise, 902, 949; C. M. Woodward, 887, 896, 898, 899, 901, 905, 906, 909–913; arguments for, 900.
  Buildings and floor plans of schools for, 917–934.
  Conducive to greater mental culture, 904; Chicago commercial club, 889; cooperation of shop and drawing teachers, 914; cost of plant, etc., in Boston, 920; cost per pupil per year in Chicago, 934–935; cost of plant, etc., in Denver, 923; cost per pupil per year in Louisville, Ky., 934–935; cost per pupil per year in St. Louis, 934–935; criticism of, 892, 898, 899, 900; criticised, by S. H. Peabody, 897; criticised, by E. E. White, 897; cause of, 879, 912, 913; in Denver, 916.
  Defense, 891; description of school in Boston, 917–920; in Denver, 920–925; in Louisville, Ky., 926–934; in Massachusetts, 917–920; development of, 880.
  Educational effect destroyed by market work, 437; educative value of, 903; effects on moral estimate of life, 889; equipment for woodwork—carpentry, 913, 914; established in Europe, 880; equipment of school at St. Louis, Mo., 884; exhibit at San Francisco (1888), 901; at Madison (1884) 891; of Vancauson school, Lyons universal exposition, 1731.
  Fruits of, 935.
  Graded exercises in woodwork, 913, 914.
  Importance of, as an educational factor, 899, 908, 909; in sound mental training, 886.
  In Albany, N. Y., 902, 903, 911; Baltimore, 911; Boston, 907, 911, 912; Brooklyn, 899, 911, 914, 915; California, 911; Cambridge, Mass., 911; Chicago, 911; Cincinnati, 897, 911; Cleveland, 897, 897, 911; Colorado, 911, 916; correlation of studies, 511; Crozet, Va., 911; Davenport, Mass., 911; Denver, 897, 911, 916; Fall River, Mass., 911; Fitchburg, Mass., 907; Georgia, 1025; Illinois, 911; Indiana, 911; Indianapolis, 911; Kentucky, 905, 906, 911; Louisiana, 911; Louisville, Ky., 905, 906, 911; Maryland, 890, 911; Massachusetts, 907, 911, 912; Menominee, Wis., 911; Minneapolis, 911; Minnesota, 911, Missouri, 903, 911; Nebraska, 911; New Haven, 897; New Jersey, 906, 907, 911; New Orleans,

Manual training—Continued.
897, 911; New York, 897, 902, 903, 911, 914, 915; New York City, 893, 911; Ohio, 911; Omaha, 897, 911; Paris, 894; Pennsylvania, 902, 904, 905, 910, 911; Philadelphia, 904, 905, 910, 911, 935; Pratt Institute, 899; Rhode Island, 911, 913, 914; Russia, 897; St. Louis, Mo., 903, 909, 911; St. Paul, 911; San Francisco, 911; Springfield, Mass., 911; Toledo, 911; Tulane High School, 897; Virginia, 892, 911, 1024; Wisconsin, 911; World's Columbian Exposition, 905.
Independent organization of, 911, 912; independent schools with full curriculum urged, 911, 912; instruction of colored race, 1024, 1025.
Mention of papers read at superintendents' meeting of the National Educational Association, Washington (1889), by C. M. Woodward, W. T. Harris, Jerome Allen, George P. Brown, Edwin P. Seaver, John D. Ford, and H. W. Compton, 901.
Narrowness in European schools, 894; necessity of, in public schools, 883; not imported from Europe, 895; number of students, Louisville, Ky., 906.
Occupation of graduates in Baltimore, Md., 949; occupation of graduates, St. Louis school (1894), 935–949; opening of schools in Chicago, Baltimore, Toledo, New York City, Eau Claire, and Boston, 892; opens up wide field of occupation, 915; opposition to, 891; opposition to introduction in public-school system, 887; organization of schools, 909–913.
Popular demand for, 910.
Prize for best exhibit at San Francisco (1888), 901; promoters, in St. Louis, Mo., 885; prospectus of, in Brooklyn, N. Y., 914, 915.
Reasons for not incorporating with existing high school, 911, 912; report of director of St. Louis schools, 890; rise and progress, 877–949.
Statistics, 2093–2169; of manual industrial training, 2116–2119, 2144–2146; of secondary students in, 94–95.
Value in training pupils, 902, 903, 915.
Why hand should be trained, 886.
Manual Training High School in Denver, 916.
Manual Training High School in Providence, R. I., 913, 914.
Manzolina, Mme., teacher in University of Bologna, 359, *note*.
Marble, A. P., on manual training, 887, 899, 901.
Marcy, Oliver, geologist, 827, 854.
Marie, Empress, institutions, sketch of, 401–410.
Marie Feodorovna, Empress, death, 404, sketch of, 402, *note*.
Marienholtz-Bülow, Baroness von, introduces kindergarten into Italy, 335.
Marietta College, university extension courses, 959, 960.
Marignac, J. K., death and sketch, 1778.
Marion, Gen. Francis, Horry & Weems's Life of, 692.
Market gardening, development of, 807.
Marriage among teachers in Prussia, 235, 236; in Colonial New England, 654.
Marriott, quoted on Italian unity, 327; quotes Forsyth on condition of Italy, 326, *note*.
Marsh, George P., helped to introduce kindergarten into Italy, 335.
Marshall, John, on abolition of slavery, 729; talk with Jefferson on slavery, 732.
Marshall, Prof. John P., geologist, 834, 858.
Marshall, William Calder, death and sketch, 1776.
Marsters, V. F., geologist, 828, 854.
Martin, Alexander, death and sketch, 1769.
Maryland, city superintendents, 776; college presidents, 783, 787; common schools in, 684.
Demand of, before joining the Union, 724; denominational education in, 685.
Early efforts to establish common schools and a university, 684; education of upper classes, 684.
Feudal power in, 684.
Geology in, 837, 858.
In Continental Congress, 724.
Manual training, 890, 892, 911; manual training school in Baltimore, occupation of graduates, 949.
No early provision for schools in, 683, 724.
Maryland—Continued.
Pedagogy in higher institutions, 152; per cent of students of geometry, 47; per cent of students of German, 45; per cent of students of history, 54; per cent of students of Latin, 43; per cent of students of physics, 47; per cent of students of trigonometry, 47; progress of Agricultural and Mechanical College, 798; Puritan colony in, 684.
"Redemptionists" school, 685; resolution on Western Territories, 724.
Sanitary school legislation, 1312.
Statistics of Agricultural and Mechanical College, 135, 137, 793, 2040–2041; of business colleges, 2170–2171, 2180–2181; of city schools, 27–28, 1785–1802, 1814, 1817; of colleges and universities, 98, 100–102, 105–106, 108–120, 122–123, 2023–2024; of colleges for women, 125–129, 132–133, 2035, 2037; of deaf, dumb, and blind schools, 2201, 2204, 2207, 2212–2214, 2215, 2217, 2220; of dental schools, 2051; of law schools, 2058, 2059; of manual training, 2094, 2102, 2114, 2120–2123, 2126–2129, 2130–2133, 2138, 2147, 2152, 2156, 2160, 2165; of medical schools, 2047, 2049; of normal schools, 152, 154–163, 2072–2073, 2084–2085; of nurse-training schools, 2056; of pharmaceutical schools, 2053; of private secondary schools, 74–81, 83–85, 88–91, 94, 1952–1955; of professional schools, 141–145; of public high schools, 65–72, 85, 88–92, 1857, 1923; of reform schools, 2227, 2230–2231; of schools, 1029, 1030, 1034; of schools for feeble minded, 2225–2226; of State school systems, 8–10, 12–23; of technological schools, 2044; of theological schools, 2062.
To be bounded by Appalachian Mountains, 724.
Union of St. John's and Washington colleges in, 684; university extension courses, 964; uprising of Protestants in, 684.
See also School laws.
Maryville College, geology in, 848, 866.
Mason, George Champlin, death and sketch, 1770.
Mason, Lyman, death and sketch, 1770.

Wisconsin, agricultural colleges, 1449; agricultural work in State University, 804.
City superintendent, 780; college presidents 786, 788; common schools, 1445–1447.
Defects of school districts, 1446.
Geology in, 849–850, 868.
High schools, 1447–1448.
Manual training, 892, 911.
Normal schools, 1448.
Pedagogy in higher institutions, 153; per cent of male students, 51; per cent of students in German, 45; per cent of students of German, 53.
Sanitary school legislation, 1325; school libraries, 1444–1445.
Statistics of agricultural and mechanical colleges, 136–137, 2042–2043; of business colleges, 2170–2171, 2196–2197; of city schools, 27–28, 1795–1796, 1812–1813, 1814, 1822; of colleges and universities, 98, 109–102, 105–106, 108–120, 122–123, 794, 2034; of colleges for women, 130–132, 2029; of deaf, dumb, and blind schools, 2202, 2206, 2208, 2209, 2210, 2211, 2212–2214, 2215, 2219–2220; of law schools, 2059; of manual training, 2096, 2112–2113, 2116–2117, 2126–2129, 2132–2135, 2142, 2143, 2145, 2155, 2157, 2164, 2169; of medical schools, 2049; of normal schools, 153–162, 164, 2078–2079, 2090–2091; of nurse-training schools, 2057; of pharmaceutical schools, 2054; of private secondary schools, 74–80, 82–85, 88–91, 95, 2006–2008; of professional schools, 141–143, 145–146; of public high schools, 65–71, 73, 85, 88–91, 93, 1915–1919, 1927; of reform schools, 2228, 2232–2233; of State school systems, 8, 9, 11, 12–23; of theological schools, 2067.
Township system recommended, 1446–1447.
University extension courses, 966–967.
Woman suffrage in school affairs, 1418.
See also School laws.
Wise, Henry A., appeals for schools in Virginia, 760; and manual training, 902, 949.
Witchcraft, belief in, in Alaska, 1459.
Witmer, Dr., on æsthetic value of the mathematical proportions of simple figures, 1681.
Witmer, L., conducts child study in University of Pennsylvania, 428.
Wittenberg College, university extension courses, 959, 960.
Wolff, J. E., geologist, 832.
"Woman," address by Charles H. Ham, World's Columbian Exposition, 1749; bibliography of progress of, 1759.
Woman suffrage, in school affairs, Alabama, Arkansas, 1416; Connecticut, 1417; Delaware, 1416; Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Massachusetts, Michigan, 1417; Missouri, 1416; Minnnesota, 1418; Nebraska, New Jersey, New York, 1418; North Carolina, 1416; Ohio, 1416; Oregon, Pennsylvania, 1418; South Carolina, 1416; Tennessee, 1416; Vermont, Virginia, 1416; Wisconsin, Wyoming, 1418; admitted to Italian universities, 363; education in Russia, 401; former ideal of, 664; educational condition in Sweden, address by Hulda Lundin, mentioned, 1749; educational efforts by, 770–771; educational work in Russia, 409; in theological seminaries, 976; medical students, 985, 986; names of presidents of colleges for, 786–788; progress of, in Finland, 423.
Statistics of colleges, 2035–2039; of degrees received, 117, 119; of students in universities and colleges, 100–104; of benefactions to, 2234–2235.
Women teachers, first employed in Berlin schools in 1863, 268.
In Berlin common schools, 272–274; in colleges and universities, statistics, 99; in France, 195–196; in Italy, 342–343, 345–348; in schools of Rome, 372; in University of Bologna, 359, *note;* instruction in female handiwork by, 274.
Number in private high schools, 51.
Parentage of, in Prussia, 228–232; per cent in public and private schools, 57; preponderate in North, 39; proportion in Prussia, 230, 237–240.
Salaries, in Berlin common schools, 269–272; in Finland, 418; statistics of, in high schools, 86.
Women's colleges. *See* Colleges for women.
Wood Island School, report on, 1468–1469.
Woodward, C. M., address on equipment of manual training school, St. Louis, Mo., 884; and manual training, 878, 887, 896, 899, 901, 905, 906, 909–913; on destroying educational effect of manual training, 437; on the rise and progress of manual training, 877–949.
Woodwork, equipment for, 913, 914.
Woodworth, J. B., geologist, 833.
Wodson, Constance Fenimore, death and sketch, 1775.
Wooton, E. O., geologist, 839, 860.
Worcester Polytechnic Institute, geology in, 834, 858.
Worcester Polytechnic School, 883.
Work pupils, schools for, in Rhode Island, 1427–1428.
World's Columbian Exposition, attendance at congresses, 1751; bibliography of congress

World's Columbian Exposition—Continued.
publications, 1754–1760; cost of congress work, 1754; departments of congresses, 1752–1753; number and residences of speakers, 1752–1753; manual training exhibit, 905; opinions on congresses, 1753–1754; programme of world's congresses, 1735–1751; summary of work, 1751–1760.
World's Congress Auxiliary, organization of, 1752.
"Work of the woman in Moscow," quoted, 409.
Wren, Sir Christopher, mentioned, 496.
Würtemberg, boys in secondary schools, 298, 299; statistics of education, 377, 2238–2239.
Wylie, Theophilus A., geologist, 828.
Wyoming, city superintendents, 780; college presidents, 786.
Geology, 850, 868.
Pedagogy in higher institutions, 153.
State University, 804.
Statistics of agricultural and mechanical colleges, 136, 138, 2042–2043; of city schools, 27–28, 1796, 1813, 1822; of colleges and universities, 98, 100–102, 105, 106, 108–119, 122–123, 794, 2034; of manual training, 2116–2117, 2142; of normal schools, 153–162, 164, 2090–2091; of private secondary schools, 74–80, 82–85, 88–91, 95, 2008–2009; of public high schools, 65–71, 73, 85, 88–91, 93, 1919; of State school systems, 8, 9, 11, 12–23.
University extension courses, 951, 967.
Wyoming—Continued.
Woman suffrage in school affairs, 1418.
