Michigan Girl Wins Safety Contest

THEODORA POOLE, thirteen-year-old school girl of Lansing, Michigan, has triumphed over more than 400,000 pupils in the second National safety essay contest conducted by the Highway Education Board, Washington, D. C. As a reward, she will receive a gold watch and a trip to the Capital, this fall. A wonderful opportunity it will be—an experience that will color her coming life! All her expenses will be paid, for she and her chaperon will be the guests of the National Automobile Chamber of Commerce, which gives the prizes, and of the Highway Education Board.

THEODORA POOLE

The committee which decided the winner was appointed by United States Commissioner of Education, Dr. J. J. Tigert. It consisted of Mrs. A. H. Reeve, president of the National Congress of Mothers and Parent-Teacher Associations, Philadelphia; Richard J. Walsh, editor, *Collier's Weekly*, New York City; and James E. West, Chief Scout Executive, Boy Scouts of America, New York City.

Second honors were won by Edwina Hull, Frontier, Wyoming, whose prize is a gold loving cup. Lester E. Rolland, Thief River Falls, Minnesota, won third honors, a silver loving cup. These pupils had previously received gold medals and fifteen-dollar checks for having submitted the best essays written within their respective States.

In the third annual contest, $6500 will be divided into 485 prizes to be given for the best essays by pupils and lessons by teachers dealing with the formation of safety habits.

Miss Poole's essay follows:

My Share in Making the Highways Safe—In a game each person has his part to play. Let us think of the task of making a nation safe as a game in which each has his place to fill and his bit to do.

One might suppose we children have very little to do with the safety of our Nation, but we are the coming generation and in our time shall uphold better and safer highways.

As in a game, there are rules to follow. These things we must do:

Always observe traffic before crossing a street.

When walking on a road keep to the left to meet on-coming vehicles.

Learn automobile signals to know what a motorist means to do.

When alighting from a street car stand until sure of a safe way to the curb.

Help those in need.

Keep close to the curb when riding a bicycle, and give correct signals when turning.

Thus we shall spread our safety interest and information.

Now come the things we must not do, rules just as important if we are to play the safety game.

Don't hurry! Most accidents are caused by the desire to save a few seconds.

Never play in the streets nor dash before moving vehicles.

Never jay-walk.

Never steal rides.

Never make a blind dash across a thoroughfare.

Never stand in the street while waiting for a car—you are safer on the curb. One cannot always stand on his rights.

A child's part in this Safety Game is to keep from being "tagged" by an automobile. In the many automobile accidents in which the driver is blameless, a pitifully large number of children are victims.

Then there are always drivers who consider that responsibility ceases with the tooting of the horn. Since we stand less firmly than a telephone pole we had better be out of their way.

Our Code is a Code of Honor. Nobody can make us play fair. Our schools foster athletics to encourage clean effort. More important than ordinary athletics is the game in which we save the sorrow of accidents and loss of life. If I could feel that by joining this Safety Team I had saved one little child, I would consider my effort better spent than if I had won highest honors in athletics.

These things children can do. It is because of the splendid foresight of our elders that we are having these things laid before us while we are of an age when it is easy to learn. Much time, money, and thought are being spent to teach us safer ways. And if we become men and women who think safety and act sanely we shall have a nation of happier and safer people.

ROBERT EDWARD LEE ON EDUCATION—So greatly have those interests (educational) been disturbed at the South, and so much does its future condition depend upon the rising generation, that I consider the proper education of its youth one of the most important objects now to be attained, and one from which the greatest benefits may be expected. Nothing will compensate us for the depression of the standard of our moral and intellectual culture, and each State should take the most energetic measures to revive the schools and colleges, and, if possible to increase the facilities for instruction and to elevate the standard of learning.—*Recollections and Letters of General Robert E. Lee.*
