

Research Bulletin

OF THE

National Education Association

VOLUME VII

January to November, 1929

The Research Bulletin is issued by the Research Division, a section of the headquarters staff of the National Education Association. This division was created in February, 1922, for the purpose of conducting scientific studies of special interest to members of the teaching profession.

Bulletin One was issued by the Research Division in June, 1922, and *Bulletin Two* in November, 1922. The first number of the *Research Bulletin* is Volume I, No. 1, January, 1923, entitled *Facts on State Educational Needs*. With Volume I, No. 1, the *Research Bulletin* became a regular publication, issued five times each year—January, March, May, September and November. The Research Bulletins composing Volumes I, II, III, IV, V, VI, and VII are listed on page 3 of cover.

Articulation, English courses, 203; high schools, with elementary schools, 203; junior high school with senior high school mathematics courses, 217.
Assignments, Lesson, avoid involved for dull pupils, 189.
Assistant principals, salaries, 112, 115, 120, 123.
Attendance, high schools, who attended in 1890 contrasted with 1929, 180-1; illness, affected by, 52.
Atypical children, criminality caused by when neglected, 64.
Automobiles, cost of compared with schools, 16; percent school expenditures in states is of, 17.
Averill, Lawrence A., quoted, 51.
Ayer, Fred C., quoted, 284.
Baldwin, Bird T., quoted, 184.
Baldwin, Lee, quoted, 210.
Barr, A. S., quoted, 284, 320, 325.
Bibliography, adult education, 94; apportionment of state aid to public schools, 29; character education, 82; classroom visits by the principal, 318; demonstration teaching, 338; financial aspects of certain administrative problems—county unit of school support, 35, state regulation of teachers' salaries, 36, of state teacher retirement systems, 37, state school budgeting, 38, sources of information on economic resources and school costs, 39; health education, selected references for, 57; individual conferences, 324; individual differences, 73; mental hygiene for children, 65; parenthood education, 94; preschool education, 88; principal in a program of supervision, 286; pupil diagnosis and adjustment, 346; revenues, state, for public education, 24; teachers' meetings, 330; supervision, background for, 307; supervision, general problems in, 295.
Biology, kinds of information public gets from newspapers, 220.
Bookkeeping. *See*, Commercial education.
Booklists, art education in high school, 245; commercial education, 246; educational problems, 100; English courses in high school, 247; foreign languages, modern, 253; health and physical education courses, 248; health education, 95; high-school curriculum problems, 243; high-school subjects, 244; home economics courses in high school, 249-50; industrial arts courses, 250; Latin in high school, 251; mathematics, 252; music courses in high school, 254; preschool education, 98; progressive education, 100; science, 255; social studies, 256.
Boston, 1927 report of Superintendent of Schools quoted, 192.
Buckingham, B. R., quoted, 212, 244.
Buildings, construction, cost of compared with state's annual bills for schools and life insurance, 15; school costs and payments for, 14; state investment in compared with life insurance and public education, 10.
Building designs and plans, principals' cooperation in development of from health standpoint, 56.
Building inspection, principals' duty from standpoint of health, 56.
Bureau of Education, adult education, 92.
Burton, W. H., quoted, 216, 221.
Case studies, characteristics, essential of, 343; outline of individual case history, 344; technic of, 343.
Chamber of Commerce, and the principal, 298.
Character education, activities, 78; books on, 97; characteristics of in classroom procedure, 78; content of, 77; curriculum, 75; definition, 76; direct method of teaching criticised, 79; elementary school principal, 80; emphasis by schools, 75; formal and routine, 77; habits of work, 78; how developed, 77; how test effectiveness of, 80; inductive method of, 79; principles of teaching ideals, 78; problems in, 76; related to other problems, 75; selected references, 82; testing, warning in regard to, 80.
Charters, W. W., quoted, 78.
Chemistry, distribution of emphasis, 220; teaching methods in, 221.
Children, mental health, 60; superior, normal, average, dull, or limited, 184; traits for understanding, 344.
Children's Bureau, adult education, 92; quoted, 75.
Citizenship, activities and traits of good, 206; determining problems of, 205.
City schools, parenthood education, 91.
Classrooms, demonstration lessons in, 333; inventory form for, 305.
Classroom procedures. *See*, Routine procedures, classroom.
Classroom visits, 309; frequency and length of, 309; length in minutes of by supervising principals, 310; notations of, 311; number of per week by supervising principals, 310; planning for, 311; principal and, 318; scheduling of, 310; teachers, do they want them?, 309; types of by principal, 309.
Clerical workers, salaries, 119, 126, 133, 134, 139, 147.
Cleveland, Ohio, differentiated courses of study in, 191; parenthood education classes, 92.
Clinics, child, elementary school principal should encourage establishment of for preschool children, 87; parent education, 91.
Cody, Frank, quoted, 196.
Colleges and universities, overlapping of high-school courses in chemistry and physics, 220; principal and, 298.
College Entrance Board of the New England and Middle Atlantic States, study cited, 220.
Commercial education, booklet, 246; curriculum of determined by community survey, 225; helps from a survey of local occupations, 224; high-school, 222; quality of handwriting needed for clerical workers, 227; research improvement for stenography, 228; retail store training classes, 226; shorthand, typewriting, and bookkeeping, 224; special one-semester courses in junior business practice, 226; survey of in Minnesota, 226.
Commission on the Curriculum, attention of to character education, 75.
Committee on Mathematical Requirements, National, report cited, 213.
Committee on the Problem of Mathematics in Secondary Education, cited, 215.
Committee on the Status of Economics and Sociology in Senior High Schools in the United States, report cited, 211.
Communicable diseases, occurring among children under 10, 52.
Conferences, bibliography, 324; extensive use of, 320; fact-finding, 321; frequency and time of, 320; morale, 322; place to hold, 320; post-teaching, 321; preparing for, 322; pre-teaching, 321; principal and, 324; principal with teacher in relation to supervision, 320; procedures, 323; time of as reported by supervising principals, 321; types of, 321.
Correlation, of different phases of development, 184.
Costs and expenditures, bibliography on sources of information on economic resources and school costs, 39; building construction, 14; eight facts concerning, 5; elementary and secondary schools, 9; higher education, 9; investment in schools, annual, 6; investment rather than a loss, 6; luxuries and schools compared, 14; need for clear thinking concerning, 6; percent of income expended for schools, 11; percent school costs in states is of costs for autos, 17; percent school costs in states is of cost of luxuries, 22; percent school costs in the states is of total tax collections, 23; percent value of school property is of all property in the states, 13; schools and automobiles, 14; schools, life insurance, and buildings compared, 15; states' compared with other governmental costs, 20; states' for mental hospitals, 59; states' for schools and automobiles, 16; state school costs and income, 8; state school in 1926, 9; tax collections and school costs in the U. S., 14; value of school property, wealth, and savings deposits by states, 12.

- Counseling systems**, for dull pupils, 190.
- County supervisors**, Public school, demonstration lessons, 337.
- Counts, George S.**, quoted, 217.
- Course of study**, differentiated, 190; differentiated curriculums, trends in the development of, 182; differentiation of, 186; differentiated for dull pupils, 188; differentiated for pupils of superior ability, 187; high school, published since 1920, 259; home economics, number of different topics in one hundred, 230; home economics, problems in selection, 231; industrial arts, 234; Lansing, Mich., quoted, 224; mathematics courses, 213; Minnesota State, quoted, 223; Missouri State, cited, 237; parenthood and homemaking, 232; Pittsburgh seventh, eighth, and ninth-grade mathematics, 216; "scientific" versus "guessing" method in selecting content, 205; secondary schools, 258.
- Courtis, S. A.**, quoted, 74.
- Cubberley, E. P.**, quoted, 204, 228.
- Curriculums**, art education in the high school, 236; books on, 243; building of for pupils of different levels of ability, 182; bulletins, local, 195; character education, 75; characteristics of good, 227; commercial, 223; commercial expanding, 222; commercial, grades in which to specialize, 227; commercial, subjects to be offered determined by a community survey, 225; content, variations in of particular subjects to meet individual differences, 183; differentiated, 182; differentiated courses of study, 190; differentiation of high school, 182, economic changes and, 177; evolution of, 194; grade placement of materials in the social studies, 209; health education, 239; high school, books dealing with problems, 243; high school of 1890 contrasted with 1929, 180; high school courses of study published since 1920, 259; home economics in secondary school, 229; how viewpoints of have shifted in past 25 years, 182; individual differences, 183; industrial arts in the high school, 233; Latin, 200; music in high school, 235; new content, 183; overlapping between high school and college courses in chemistry and physics, 220; principal and, 298; pupil adjustment and, 344; revision and the principal, 299; science, 219; social sciences, 205; state authority in, 298; Winnetka schools, 69.
- Dalton plan**, for individual differences, 68.
- Demonstration teaching**, 332; bibliography, 342; Detroit, 334; do teachers want?, 334; elementary school principal, 337; outside of classroom, 334; principles, basic, 334; purposes of, 333; rural schools, 336; schools, 335; supervisory device, 334; supervisory visits should follow, 334; types of, 333.
- Denver, Colo.**, differentiated courses of study in, 190.
- Department of Superintendence**, Sixth Yearbook quoted, 58, 227.
- Detroit**, check list in reading, 336; demonstration lessons in, 334; study of different kinds of instruction being made in, 70.
- Dewey, John**, quoted, 177.
- Diagnosis**, pupil, achievement, studying individual, 340; adjustment, 339; bibliography, 346; case study technic, 343; group improvement from tests, 339; individual differences, 239; personal interview, 344; standard tests, 342; using survey test results, 340.
- Discoveries**, list of significant since 1890, 177.
- Drill**, should be provided for dull pupils, 189.
- Dull children**, how shall course of study and method be differentiated for, 188; mental traits of, 185.
- Economic surveys**, for knowledge of the home, 301.
- Economics**, teaching of in the senior high school, 211.
- Education**, expenditures for, 6; for a changing civilization, 177; health and physical, certain trends in, 239; high-school commercial, 222.
- Education, aims and objectives**, English, 202; health and physical, 239; industrial arts, 233; Latin, 200; mathematics, 213.
- Educational opportunity**, related to differences in wealth and income, 7.
- Education and the states**. See, States, the, and education.
- Educational problems**, booklist, 100.
- Elective plan**, for meeting individual differences, 183.
- Elementary schools**, adult education, 93; amount expended for, 9; art education in, 238; health building, establishment of special agencies in for, 56; health problems, needs of principal in meeting, 55; mental hygiene, what it means for, 62; preschool education, meaning of for, 87; salaries of principals, 112, 116, 117, 124, 125, 131, 132, 137, 138, 143, 144, 145, 146. See also, Principals, elementary schools, 55.
- Engelhardt, N. L.**, quoted, 202.
- English**, books helpful in building high-school courses, 247; content of courses in high school, 202; courses in adapted to different groups, 203; graduation requirements in, 201; objectives, 202; relation between the literature and composition of a grade, 204; teaching of, cooperation of all members of the staff in, 201; words used most frequently in, 195.
- Enrolment**, of high schools, 1890, 180; of high schools, 1929, 181.
- Environment**, may disturb integration of personality in children, 61.
- Extracurriculum activities**, for character education, 78.
- Failure**, must not become a habit, 184.
- Federal census**, for knowledge of the home, 301.
- Finance**, home and family relationship, 229.
- Fire department**, and the principal, 398.
- Foreign languages**, modern, college and high school, number of students of, 197; conditions which make study of more successful in Europe than in this country, 198; enrolment in classes, 196; methods of teaching, 198; percent enrolment in classes of is of total, 196; reading of, 197; research in, 195; testing for achievement in, 199; use after graduation, 197; what effect has the age of a beginning student on his rate of learning?, 198; years a student may "take" with profit, 199.
- Freeman, Frank N.**, quoted, 60, 235.
- Geometry**, changes in high-school, 214.
- Gesell, Arnold**, quoted, 89.
- Gifted children**. See Mentally superior.
- Givens, Willard E.**, quoted, 196.
- Goddard, Henry Herbert**, quoted, 186.
- Gosling, Thomas W.**, quoted, 181.
- Gregg, F. M.**, quoted, 79.
- Handwriting**, quality needed for clerical workers, 227.
- Health**, defects of the skeleton, 53; gifted children generally superior in, 70; habits aided by knowledge of bodily functions, 240; measurement of behavior, 240; nutrition and malnutrition, 53; percent of physical rejections in the first draft, 51; physical efficiency and the school, 51; physical inefficiency, prevalence of, 51; programs improved within the next decade, 242; problem of common physical defects, 52; speech defects, 54.
- Health and physical education**, books helpful in building high-school courses, 248; courses in, content of, 240; goals, 239; trends in, 239.
- Health education**, booklist, 95; all departments in secondary school should contribute to, 240; selected references, 57.
- Health programs**, experimental studies in, 56; principal and, 55.
- High schools**, art education in, 236; articulation of with elementary schools, 203; changes in from 1890 to 1929, 180; child development and parental education courses in, 231; commercial courses in should train for future jobs, 223; commercial education, 222; curriculum studies in social sciences, 205; economics and sociology in, 211; industrial arts in, 233; literary appreciation in, 204; music instruction in, 235; place in the shifting American scene, 179; progress made by, 179; salaries of deans, 112, 115, 120, 123; salaries of department heads, 112, 115, 120, 123; salaries of principals, 112, 116, 117, 124, 125, 131, 132, 137, 138, 143, 144, 145, 146; salaries of teachers, 112, 114, 115, 120, 121, 122, 123, 129, 130, 135, 136, 141, 142.
- Hollingsworth, Leta S.**, quoted, 70, 71, 186.
- Home economics**, books helpful in building high-school courses, 249; content of courses, 230; courses, bases of selection of content of, 231; courses, problems in selection of content of, 231; courses of study, topics in, 230; president of American Association quoted, 229; secondary school and, 229.
- Homogeneous grouping**, individual differences, 68; Salt Lake City, 69; weaknesses of, 69.
- Hoover, Herbert**, quoted, 6, 7, 44.
- Hospital**, facilities for correction of defects among school children, 53.
- Income and receipts**, annual national, 6; bibliography on state revenues for public education, 24; percent of states' expended for public schools, 11; state school in 1926, 9.
- Individual differences**, booklist, 97; existence of, 67; homogeneous grouping, 68; individual instruction for, 69; percent of unselected children in the different intelligence quotient groups, 67; principal, what they mean for him, 71; pupil diagnosis and, 339; reading, provision for, 335; readjustment of the school for, 67; selected references, 73; six ways in which children differ, 184.
- Individual instruction**, advantages of, 69; disadvantages of, 69; for character, 79; for individual differences, 69; how instruct en masse and still individualize, 192.

Industrial arts, books helpful in building high-school courses, 250; education defined, 233; determination of content of courses, 234; high school, 233; objectives of in junior and senior high schools, 233.

Injuries, student, of children 6 to 16 from March to December, 1923, 54.

Insurance, life, cost of in states compared with annual bills for schools and buildings, 15.

Integration, causes for difficulty of in childhood, 61; personality, 60; personal traits never completely integrated, 61; variation between persons in personality, 60.

Informal test, to help principal know pupils, 304.

Instruction, standards for measuring, 314.

Intelligence tests, for principal's knowledge of pupils, 303.

Interview, boys and principal, 345; personal, of principal with pupil, 304; principals with parents, 300; pupil diagnosis, 344.

Inventory, annual for principal's knowledge of school plant, 306; form for a single classroom, 306.

Janitors, principal and, 306; scorecard for janitorial service, 307.

Judd, Charles H., quoted, 50.

Junior high school, commercial education, 223; general shop method in, 234; industrial arts objectives in, 233; salaries of principals, 112, 116, 117, 124, 125, 131, 132, 137, 138, 143, 144, 145, 146; salaries of teachers, 112, 114, 115, 120, 121, 122, 123, 129, 130, 135, 136, 141, 142.

Kindergarten education, growth of since 1880, 85; informal, 85; movement in the U. S., 84.

Kyte, George C., study cited, 228.

Languages, Modern foreign. See Foreign languages.

Languages, pupils errors in diagnostic test in, 342.

Latin, books helpful in building high-school courses, 251; number of high-school students taking, 199; objectives, 200; research in high-school, 199; what should be included in high-school, 200; who should study, 201; teaching of, most effective methods in, 200; teaching of, valid aims in, 200.

Libraries, public, and the principal, 297.

Life insurance, state investment in compared with building construction and public education, 10.

Lincoln, Nebr., differentiated courses of study in, 191.

Literature, English, appreciation of in senior high school, 204; composition and, 204.

Los Angeles, Calif., differentiated courses of study in, 192.

Luxuries, percent school costs in states is of cost of luxuries, 22; school costs and, 14; states' annual bill for certain, 18, 22.

Malnutrition, 53.

Maryland School Bulletin, quoted, 212, 225.

Maryland State Department of Education, quoted, 228.

Mathematics, adjustment of junior high-school with senior high-school courses, 217; applied problems, 215; books helpful in building high-school courses, 252; calculus, introduction as a high-school subject, 215; Committee on the Problem of, in Secondary Education, cited, 215; courses in, recent omissions and additions to, 213; differentiation of courses for different levels of ability, 217; geometry, changes in, 214; graphs, emphasis on meaning of, 214; National Council of Teachers of, Fourth Yearbook cited, 214; objectives, 213; Pittsburgh seventh, eighth, and ninth grade courses, 216; simplification of algebra, 214; suggested content for course in grades 7-9, 215; trigonometry, numerical, 214.

Mental age, to be considered in making academic assignments, 189.

Mental health, amount expended for mental diseases in 1922, 59; children and, 59; difficulties in bringing personal traits of children into proper state of, 61; disorders, mental, 61; principal and, 59.

Mental hygiene, booklist, 96; case histories, children, 62, 64; elementary school and, 62; nursery school and, 86; practices useful for solving problems of, 64; principals' duty in solving problems of, 63; secondary school and, 240; selected references, 65; speech defects and, 54.

Mentally deficient, comparison of gifted, ordinary, and dull children, 70.

Mentally superior, caring for the gifted child, 70; comparison of with ordinary and dull children, 70; differentiation of course of study for, 187; greater proportion of, in children of English, Scotch, and Jewish parentage, 71; individual intelligence test best means of selecting, 71; means of caring for in school, 71; mental traits of, 185; special training for,

186; types of provision for by city size, 71; usually come from superior homes, 71.

Missouri, illustration of unified course in social studies, 208; state course of study, 237.

Modern foreign languages. See Foreign languages, modern.

Moeller, H. C., quoted, 228.

Monroe, Walter S., quoted, 50.

Morbidity, attendance and, 52; students, integration of personality and, 61.

Mortality, infant, medical science reducing, 83; students, children 6 to 16 from March to December, 1923, 54; students, preschool children in Detroit in 1921, 83.

Museums, and the principal, 297.

Music, appreciation, 236; books helpful in building high-school courses, 254; present status of instruction in public high schools, 235; trends in high school, 235; vocational and avocational guidance in, 235.

National Congress of Parents and Teachers, adult education, 92.

National Council of Teachers of Mathematics, Fourth Yearbook cited, 214.

National Society for the Study of Education, Twenty-eighth Yearbook, quoted, 84; Twenty-sixth Yearbook, quoted, 194.

Neumann, Henry, quoted, 78, 80.

Newspapers, scientific knowledge needed for reading, 221; types of biological information for public through, 220.

New Trier Township High School, one semester course in commercial equation, 226; pupils using Winnetka plan in, exceed quota in honor societies, 70.

Northampton, cooperative nursery school, 91.

Nurseries, day, 85.

Nursery school, cooperative of Northampton, 91; kindergarten, how it differs from, 87; parenthood education, 91; preschool education, relation to, 86.

Nutrition, practice of schools in dealing with undernourishment, 53.

Nutt, H. W., study cited, 228.

Objectives, See, Education, aims and objectives.

Observation of teaching, form for, assembling teacher ratings, 313; form for report on work of teacher, 313. See also, Demonstration teaching.

Organization, high school of 1890 contrasted with 1929, 180; types of supervisory, 284.

Other school employees, salaries of, 118, 119, 128, 133, 134, 139, 140, 146, 147.
